So we do not need to travel to gain the emotion or the information. We just need to tap into D of the soul, which carries that information.

Q: … We do this (travel as a soul) on a regular basis as a soul when we sleep each evening or whenever .. can it be in a vertical position as well?

Soul doesn't have a position - rotates and interacts in its dimension
K- Soul doesn't have a position, it rotates in its D, or interacts in its D.

When you move physically - doesn't mean soul moves - interacts on same line
Just because you move doesn't mean the soul has changed it position and D. It's interaction is always of the same line. (2:16). The earth doesn't change if its .. when it reverses its polarity. It's still the same, it's just how you create the links between all.

Vertical People - don't connect with soul of earth - mainly connect through Inertia
Q: Our vertical friends that greater intelligence than us, … because of the gravity they decided to grow vertically and send their soul down is this where they connect with the soul of the earth, and making that connection?
K- Actually they don't connect with the soul of earth, as such, its main connection comes with the Inertia of the position of the time.

This is why certain plants have certain mineral content - connect through Inertia
Because that's why each one takes, or becomes good in certain minerals, and they are grown in certain conditions, or certain seasons.

Plant soul - is balanced between G and Inertia of environment
It's partially the interaction with the G, but in essential the soul is balanced between the both and Inertia of the environment.

Why some plants (only) grow in alkaline or Ca conditions for example
That's why some plants work in the alkaline, and Ca based environment, and some in other conditions.

World of agriculture has not understood
This is something which the world of agriculture has never understood.

If you satisfy soul of plant - can grow them anywhere
That's if you understand it, we can create that condition of the field strength and then we can grow anything anywhere, as long as we satisfy the soul of the plant. (2:18).

Q: The direction of the plant and the field spectrum ..

Plants manifest according to conditions - same as humans
K- It's very much the way some of us are Chinese ?? , some of us are black looking, some are brown looking, some are white looking. Some plants are short, some are herbs, trees.

Interaction with Inertia and Emotion at same time effects manifestation
We interact with the Inertia of the condition and the emotion at the same time.

Emotion was never considered as part of the evolution
This is part of what we always, in the evolution of life, never considered.

Different parts effecting manifestation - Inertia - Emotion - MaGrav of planet
Our lives, or manifestation of life in physical D is partially G field, partially is Inertia, partially is emotion of the fields within the structure, which comes from the interaction of the physical D of the creation of Inertia and the .. MaGrav of the planet. (2:20).

Emotion causes trees to die, shed leaves - not wake up next season
Good example of it is how we change our season, trees die, or shed their leaves, and some plants decide not to awaken the next year, once they go through summer or winter season. .. .

Plants die without water - because we cut their line of interaction
If we don't water a plant we cut it's line of interaction. We see plants die where it's the summer time for them, their winter time which they live.

Physicality is combination interaction - fields of earth environment Inertia emotion
A life, a physical D life, even a human, is a combination of the interaction of the fields of earth, field of the environment, interaction of the Inertia of the matter state within the earth, and interaction of the fields of emotion.

We create the characteristics of the man from interaction of the fields
We create the man, man can be any color, then we give it a color, and we give it a height a and then we give a field of emotion, ?? aggressive behavior, calm behavior, loving behavior, then that comes from the interaction of the fields of , then it becomes the pattern of that, .. environment, and we say, oh all the ones from there are behavior like this, or are like this, or they look like this. (2:22).

N**ot accepted that Emotion has direct effect on physical manifestation**
We have not separated in our knowledge that the emotion has a direct effect on the manifestation. We always look at even the world of science at part of the totality. Now that we are aware of the knowledge we have to look at the totality itself.

Example - Indians and Pakistanis - belief has changed characteristics
We talked about the Indians and Pakistanis, how the path of belief has changed, 2 of the same blood in 2 totally different structure of the understanding and being.

Emotion is interaction of fields of physicality with STM - soul cells of brain
What creates that condition, it's the emotion, which itself is the interaction of the fields of the physicality with the fields of the STM, and what the soul of the cells of the brain in that position would like to manifest, or manifest out of their balance fields.

I can create emotion for plant - it can grow anywhere and any condition
It's not anymore a simple, I take a seed, I can create a plant. I can create the emotion for the plant, and the plant can grow anywhere irrespective of the time and position.

Create greenhouse of the emotion of plants - see how they grow

We always create a greenhouse of environment. We haven't create a greenhouse of the emotion of the plant and see how they grow. We can create any environment and they'll still grow.

How we feel in a dimension will dictate our feature and manifestation - interaction
This is a lack of knowledge of understanding the totality. So how we enter into another D, and how we feel in that D, will dictate our feature, our manifestation, and our interaction. (2:24).

Q: .. the mage on the screen we see now of the plants in KF plasma pots … feeding the emotion of the plants .. ???

How will the seeds from the KF pots be next year - what effects
K- It will be very interesting to see if we put these plants, in these pot this year, we buy from outside to grow here. The way the gardeners will reproduce them, next generation. See how the next generation will show itself. Would the flowers and leaves be the same, would they change their color and size. Why do plants create different colors of themselves, different color flowers. I might not like a red, but I make a blue or green one .. that somebody else might like, and gives me a better chance to appreciate and enjoy my existence. This is what we have asked from the agriculture side. We want to see what is the outcome of the next cycle of the growing of the seeds, the emotion of the people who use it. In a way, creating a new cycle of life, (2:26). without flaw. without shortage

Q: Will the KF pots for plants bring about elevation of their soul
.. bring about elevation?

Doesn't mean plants will elevate souls - could be evolution - new way to live
K- It doesn't mean elevation, it could be evolution in a new way to live. It's a way to understand a new environment is created so we adopt ourselves to it. How will it change. This will come very soon when the most of humanity will go through the phase of not eating anymore.

What will happen to all animals and plants we tamed to eat - find balance
What will happen to the number of animals which we tamed to eat. Plants which we tamed to consume. Now we are not consuming them. How do they control themselves. Or does one goes tot eh maximum to produce as much as possible and override everything else. Or would the plants and creatures find a point of balance. I am not eating you, (2:28). but don't block my path and grow everywhere. Would we understand each others emotion. Would we see aggressive grow of one plant to take over everything, or they will come to see the need of the others. There is a lot to be learned from interaction of the souls, a lot ..
Q: .. will the plants and humans reach a balanced position

When we consume plant - enjoy it - created connection to its emotion - AA
K- We already do that but we are not aware of it. When we take a herb, consume , enjoy it. We connect a line of emotion to it, through it's AA, through its existence. Scientists

have shown emotional connection between humans and plants, very clearly how the plants respond, … but now we have to look at the D of emotion interaction is created, what strength, and what's the cause of interaction.

How will the animals respond to not eating or killing anymore - transfer emotion
How we all can interact, not just humans. What about the cow which can walk the fields but it doesn't need to eat anymore. And the grass can grow so much that, it (cow) can not go anywhere. And can he transfer the emotion to the grass, "stay at the height that I can go through too." That we don't need to cut to destroy. (2:30).

Moon carries field strength of AA of life on earth - connected to it
While we are going through the structure of the fields by T&T why does earth waters, respond to Moon so radically, everyday, every cycle? Does the moon carry field strength in the strength of the AA of the life within the planet, that they are connected to.

Gravity has to have a line of connection - push and pull on ocean tides
There must be a line of connection, it's not just gravity. Gravity has to have a line of connection. What does it connect to that it creates such a movement? Such absorption, then to a certain strength the G earth pulls the matter back down. When the earth is on the wrong side, the field of the sun cannot interfere so much, then the field of the moon which are slightly different, but of the same, create such a pull and push.

Man and woman both go through monthly lunar cycle - connection
Q: Is that people experience such a shift connected to the moon cycle?
K- Should be somewhere, some ways yes. We have this in many ways but we never connect. We never understand. We have this in the month cycle of the moon, which part, where is the highest, where is the lowest. We have the same. you change the moon to a woman or a man. WE go through the same cycle every month, why is it cycles, (2:32). in such a way that it repeats itself. What decides the end and beginning of the cycle?

Q: Would other entities .. soul experience this
K- According to the cycle of life we always ?? doesn't matter where we are. Man on earth reacts to the moon. the others in their D, react to their D, and not necessarily to the moon.
Q: that fields strength same field ?? across the Unicose ?

Every entity in U is field connected - depends on what strength want to connect
K- we are all field interconnected and this is what we have not understood. Every entity in the U is field connected, depends on what strength you want to connect.
Q: you said,.. it depends on what field strength you want to connect with.

Sometimes we have a choice of interaction - sometimes we don't
K- .. sometimes we have a choice, sometimes we don't have a choice. (2:34).

Never have a choice where you'll be born - because don't know strength in place
You never have a choice where you'll be born at, because we don't know the strength of the ?? life at that point and position.

If field strength changes - can fall in love without wanting to
They tell you, "oh, shoot, how did I fall in love with this one." Because the field strength has changed.

Q: Jalal this is a small video to show, with my plants here. (2:36). Lets see what this soul decided to be.

(2:38).
(2:40).
K- But the biggest question is how can you do 40 days holidays
You see, did you use any AA in the water, what kind of Gans's.
Q: this is Cup of teh man

Key to successfully using technology - is creating line of connection with AA
K- So you put AA in it, so you have created that condition to the plant. The key to a lot of work when it comes to human , plant, animal interact is to create that line of use. AA on top of the water is not just AA, it's a connection line between above and below. When we don't have that connection, how do you want to make a connection.

Interesting enough on this planet, due to combination of the material, (2:42). without you knowing about. …. a Cu, different strength Cu, or different atomic structure Cu, you created a composition of all the elements and then one of those, or some of those are at the strength of Cu the plants, because it's the strength of AA.

AA in Gans Box - comes as a composite - spectrum of fields
Now we know the connection between us and the U, .. and the plant life, so we know somewhere in the spectrum of this AA we see on top of the water, it's not just one type of AA, it's a composite.

It's not just AA - what is the genetic code of the plant
So some of it has connected to the plant, and it connects to it and takes energy. But again has a cycle of life. Will it stay for whole winter flowering, or is still as part of its genetic information will have a time span of so much, and then you keep it, and next year it becomes another flower. Why do the plants die, why do they have a 1 year cycle?

Use AA when the plant is at end of cycle - flowering and making fruit
You went on a holiday but the AA you put in there has made the link. This is why in agriculture, the people who do the tests, they put a lot of Gans's at the beginning, but actually when it comes to the fruit part, to the end part, it is the most important part to put the AA and feed the plants. (2:44). At the beginning you attract a lot of it, but if you want a mature end, flower, wheat, whatever, the last part where the most AA is absorbed, matures the plant. So you introduce the AA. and it's there.

Q; In this respect why are linked much more in a grief than happiness.

K- … Because you are born in Iraq and Middle east, that's our nature. It shows we are very mature. Living in England and other parts it's just fun whole day. Who wants to work. you become Jewish guy and cannot moan, you don't spend any money on the ?/ so you are always happy. It's the culture which we are brought up

Lady in pain - left her body and manifest in another part - Did she use emotion?
Q: .. what you taught us about this lady, which was in a position, and she leave the body, and she manifested herself in another part, she used this connecting from her position to another position, how? using the emotion part?

She used emotion - to take the soul and manifest physicality somewhere else
K- It's the emotion we use, we don't' want to be in that environment, you can have the physicality, I take the soul somewhere else and I manifest myself somewhere else.

Did she use gravity of her soul to reposition? - Not gravity
Q: Is it going up in a way gravity of her soul?
K- It's not a gravity, (2:46).

It's positioning in respect to somewhere else - where she associates freedom -no pain
It's positioning in respect to somewhere else, she could have gone to the Moon or Mars. Nobody else .. she doesn't know the environment so she prefers to go somewhere, maybe, her soul always wanted to go. where for her there is freedom and no pain. It depends what we associate with. This is part of our total ?? problem, and association, and how we associate.

We choose to go through pain structure - Or we choose to not feel it
We choose or we go through a pain structure and if that pain doesn't exist. Or we go through the system that we don't feel it, then we can be anywhere and do anything.

Mr. Keshe fell off horse - broke ribs bleeding - continued to walk
I have explained this before, I fell off a horse and I started walking, but all the bones were broken. I felt no pain. I felt no pain literally till they brought me out of coma, days later. and there was like an pneumonia infection in my lung, otherwise with my ribs broken, everything, bleeding inside.

I didn't associate with pain - therefore I didn't feel it
I never felt the pain, because I wasn't associating with pain.

A cut off point - we choose not to feel pain
I know .. I got up and I knew the body is there, but it had to do something. (2:48). It's what we call a pain, .. pain threshold. Do we like to be in pain, or do we cut off a point, and say this is it, as much as I can take. ??? you never remember the pain.

It's not being numb to pain - It's not accepting it to be
We choose, we are the choosers, we decide in what point we don't want to feel certain things, It's ?? not becoming numb to it, it's not accepting it to be.

… Thank you

Q: show pictures of orchids that came to life.
K- Yeah, orchids come to life all the time. In Linz .. (2:50). every table had a white orchid
These are very resilient flowers .

Q:
shows orchids (2:52).
(2:54).

K- I hope we learned a little bit more today (2:56). as we go to .. another phase of teaching we refer more to the books . can refer to it ..
Each part of the knowledge uses the same words, same book, but different enlightenment, This is what universal knowledge is ..

Man has chosen to use his intellect up to the point of material condition, and he has trapped himself in it. Now he has a choice to go further and use new intellect and new understanding and expand the horizon of his existence in different D where what we call, death does not exist, where eternity exists in millions and billions of years, in comparison to man's D of life. where in that D it could be a second. This is how we transmute life from one to another where and how to manifest our existence.

Thank you for today
(2:58). depends how we want to use which one
Thank you

ENGLISH TRANSCRIPTION

(:11).
K- .. So many of our teachings are destined for our children and grandchildren, and great grandchildren, that by the time the T is developed, they'll be the beneficiaries of these new breakthroughs. Science moves on and to bring a radical change we need a

radical new science. In that way we can change a lot fo things, and at the same time bring our leaders to understand that the time for change has come and in some many directions they can take us that does not lead to war and conflict but toward development of new T and sciences that improves the life of the man, not only on this planet, but beyond.

In the last week's teaching we concentrated on Book 2, which is the Light. What is the light. The transportation method in the dimension (D) of the U and not man made rocket T and the donkey. We see in the progress and development how far we can open this knowledge. It's good to have this knowledge, but what can we do with it, What are the opportunities it offers us and how we can manipulate it to become a positive point in the structure of the life of the man or any other creature across the U.

Mankind is one of the latest, what I call races, which has opened his eyes to the light, understanding it even as of last week, that light is not just the light you see, but a means of transportation, is a means of getting form one to another, not having the energy inside to burn, but using the resources fo the two ends where you want to be, where you create the D and the direction. In a way, when we go to the moon we don't need to burn fuel the way it is a tradition today, but we just tune to the heartbeat. We tune to the M field strength, we tune into the rhythm of the life of the moon, the way our oceans do, (:14). and moon allows us to find our position in respect to it. In the future transportation in the GM field system we dictate how much gravity and how much M field we create within our system that allows us to position ourselves 1 meter away from the surface of the moon, 1 km, 1,000, or 1 million km away from it. Now we understand the process, .. that by M and G positioning ourselves with respect to the position and destination, we have new opportunities.

We create new D and directions in the world fo science and T. In the world of transportation and transmutation (T&T) we move in the manner that it is easier to achieve everything that we wished for. In a way, if this is our destination 6th of 6, 2022, and we are still on earth fiddling around, what are we going to do.

All we need to do is create the GM field within a smaller system, within your cores, the single reactors you have, double reactors you have, and this planet continuously sends us waves of fields both directions, M and G. Depending on which one you can tune into, we can fly and position ourselves anywhere, (:16). within the span, and even on it. If we extend the knowledge, in it. The beauty of the new S&T is that when for example, the moon sends its fields, we convert it back in our system, and we get back, on the backtrack of the G. In a way, once we discover any of the 2 GM fields instead of this field, going somewhere, interacting with the liquids of the planet, rising them, and falling them, sequences. We become that water, we become that point of destination where we respond back and we convert back. That's the trick of traveling with the GM field. It is literally like a monkey jumping from 2 strings, from one to another. But this time this monkey knows how to divert it. The process of T&T in the coming time, then it goes on what strength of this fields you want to use. Do you want to be , or do you have the D of it. Then this point becomes absolutely irrelevant, it can be anywhere in the U. (:18). Then at the same time you can decide on which strength of this field you want to catch on to, that

in that strength, what strength you will return back to. If this is the speed of light (SL) on earth, this could be the SL in another galaxy. This is your SL let's say 1, and this strength in the inner sanctums it could be 10.

You want to go faster, you go deeper in the strength of the plasma fields of the point of destination. You can go 10 to the power of 6, it depends on what strength to the center of the what we call M fields you want to travel in. Are you going in, or .. out, are you planning to sink in, inside, or are you trying to position further. For example, this #1 (L1) is at this point (farthest out in spiral of plasma), the #2 (L10) is at this point (farther inside Plasma), this one (L1000) is somewhere here (still farther inside plasma). (:20). Then you see you can still choose the ?? great M field and travel thousands of times, millions of times the SL on this planet. This is to you, you are going away from it. This to you coming into it, you decide. You are going anticlockwise. You go clockwise. You go different way. Depends on the position, direction and motion of the place.

With this method of transportation you have one advantage, you can travel to the place where there are no GM fields, but you can create it yourself. You are traveling at the SL of one, and you want to go to a point of imaginary destination here. I don't want to see you at your home, I don't want you to come to my home, we meet in a café, somewhere we are both happy. The café, the rendezvous place is there is no planet, there is no G field area. We zoom in with a GM field of 10, sending the faster speed on, you create a zone of fields of GM fields, and then you travel in, with L1, then you set the speed (L10) and the D and direction, you create your service station in ?? world, (:22). anywhere in the U, because you have created the field yourself.

You don't need to catch it, you are already in it. This goes back to when we taught about multiple reactors. Multiple reactors were not designed only for defense T to create different barriers. The purpose of multiple reactors is you fly with one here (L1), with 10 (L10) here, you create a fields.

So you become the point of destination, pressurized by M fields and by G fields. This is the way man will travel in the time to come. There is no limitation, no restriction in where you want to be. Even on earth you can go into the depth of the planet, without drilling a hole. You create MG field strength of the earth at that point.

Would you like to live within the magma and see what happens. Now it's possible. Now mankind has the knowledge and capability of. Now man is in the position to understand the process of transmutation and transportation (T&T) through M fields and not by burning the fuel, but by rays of the sun that it might collect some.

If you can be clever enough to understand more, you can even swim within the heart of the man, (:24). if you can create its MG field. The doctors of the future will do this. They'll be present when they are repairing a valve of the heart.

It's not the dimension (D) it's the light which arrives and reaches and transfers information and the knowledge. We are not going to be a useless "yellow submarine," but

you are going to be with at system which submerges to every point of the U, even in the center of the suns, .. universes, in the center of Unicose.

Now for the first time we se a new opportunity and a new system to be able to breakthrough in the travel of the universal strength. In a process that we create, we are a part of, and we use what we created to achieve what we want to the point of destination, time and space at a speed we choose beyond the imagination of today's man.

Now we come into a new How do we protect ourselves in these environments with the speeds beyond the imagination of the man? today when you travel a 1,000 km and you come to a halt, the whole body goes through ?? a motion, you go through all sorts of physical .. changes. We go through .. different "Gs". (:26). Do we have a G transformation at the speed of light. Or do we create a condition of transformation of the fields of the U that within it. We structure ourselves that our systems, our body has a D of life at any strength of the M fields. Does not matter if you come to it, or you go away from it. would we come to the point of going so fast in different D, that we feel the weightlessness, that we float like a balloon. Does such a thing exist within the speed of light. We can create it, but we don't need to live within it. For man to tune into the M fields of the U, with the physical body has a limitation of physicality, which is your D M field strength of the same structure. This is why we advise man who wants to travel at the speed of a 1000 to convert, instead of wearing a flight suit, to wearing a soul suit. Where the soul becomes the frock of the physicality, that it can protect the physicality within it, which allows it to travel at any speeds because the STM has the D of the totality in a ?? loose direction. We can link to anything at any point as it needs, (:28). to go to, or to come from. The use of the STM, this is what we have been trying to teach you, is not just to cover your body. It's another tool of transportation of the U. You use through the soul the speed of the light, you use through the physicality of the man the speed of a donkey. You want to live on earth and travel with a donkey, you are quite welcome. You want to travel the span of the U, to the moon, unfortunately, there is no O, no donkey can go. Now you have to find a new donkey, new way, method of transportation, and that is the SL, the speed you can travel in any corner of the planet, U and Unicose. Now you understand why we started teaching about the soul. Because you have to know about the soul, you have to get confidence in what it is, that you can get in it. You can use it, but unfortunately, you already imprisoned it. And you travel after thousands of millions of years, you are trying to get into the car which you locked yourself, with your own hand, your own condition and behavior. If you can get into this car, you don't need the D of physicality, you D of the speeds of the Pl, understanding the totality of the existence and wahla, you move from a donkey of a man, to the donkey of the light. The progressive development of the man's knowledge will allow him to go faster and faster by the SL.

At the moment we measure the advancement of the man, what he has achieved in science, (:30). in the world fo the creation, the transportation, the knowledge of the creatures of the U, are measured on how faster they can travel on the SL, because as you go form 1 to 10, needs a different knowledge, and when you go from 100, and a 1000, needs a different knowledge. More understanding, more devotion, more detachment that you have no carry, you can create the higher strength, that you can reach the point. It will

not be the strength of how many palaces and gold Rolls Royce's you park outside that shows the wealth of you.

The knowledge of how fast you can travel shows the strength of understanding the process of creation. It's not by throwing the weights out of the basket s you were ballooning to go higher or faster. It's to understand the process of the creation of the fields, that allows you to be able to achieve ultimately the speed of the ?? totality of the Creator. The knowledge of totality, because as it comes it encompasses all of it. How long will it take man to go from L1 to L1000 and LC (speed of Creator), it depends on the devotion of the man to the knowledge of the creation, and what will come out of it as he releases more. Knowledge of the U depends on understanding of the process of the interaction of the fields. Knowledge of the man on this planet, narrow-minded to a surgeon of the heart, or engineer of an oil, or a specialist in donkey shoes. (:32).

When you become travel of the U, knowledge of the U is open to man. But man has to understand which part of it, he understands and can be part of. One of the processes, that we say do good, think good, and act good, is that what you collect in the center as an essence of the soul that it become that jumping place, then in the future to allow you to understand to what level of L1, because the more you have, the more you can concentrate in the center. This is why we call planets like earth the nurseries of the creation. Understanding the limitations of the physicality into the D of work of the U, you load your donkey on this life, that when it comes to travel depends how much food you have in your sack to feed your donkey with it.

Mankind becomes so kind to himself that he'll find a kind of man that is kind to himself. that he can create that condition for the life of the man in the U. What you load up on the saddle on the soul of the man on earth becomes the feed of you in the D of understanding the future, in the fields of what you will create, where and how far can you go to create in eh D and directions you strengthen, and creating positions, a new life.

Now you manage to ?? guess, to understand the SL. (:34). You manage to get on the donkey of light to travel the span of the U. How do you keep the integrity of the STM in its travel from one position to another. How do you mange to keep the integrity of the physicality of the man in this travel? How do you keep the understanding of the totality of the ?? emotion. Here we come to another point of understanding. Here we come to another D and direction.

The way we explained how you can travel from one point to another, now comes the play in reverse. You were going from here to here, in the strength of 1, but you created the strength of 100 for the point of destination, but how do you keep the integrity of the ?? points of the life of the man in that journey? It has to be bigger it has to be different, otherwise it will not be able to keep its field strength, then you need the knowledge to be able to create a field protection, which is at least L1000. Then you have a clothing you have a protection that you make sure the whole package gets to the destination. If it is weaker in the strength, (:36). it will be absorbed by the fields of the U. If it is not

stronger and holding than its own transportation method it will be falling out of the basket.

Then you understand, man in the journey to come, to travel the span U even with the UFOs is to understand the process of encagement, the way man encages his soul, now man uses the soul, the higher field strength in the depth of his existence to create that barrier, that whatever is in this, I can hold on to. It is in a way, if you understand it, bringing a higher field strength to become the protection of the totality. There is a secret in how to do this. the secret has always been open to you to understand. This is your M, this is your G, you have to understand which fields of M to release in the deeper strength to cover the weaker strength in the boundary of the physicality of the Pl itself. In a way, you use from inside, to create the condition to protect the outside.

This knowledge has been taught in Book 3 in a clear way. The secret of life in the depth of the U using light T&T, (:38). is clearly defined in Book 3, using references to Book 2. Then you understand mankind does not need spacesuit of NASA or the stupidity of the man under the water. Man is fully equipped within the strength of his soul to travel any position and condition in the U. And all that knowledge from A to Z is in the 3 books. In the teachings of past years, from day 1 the first KS and before, we have covered the whole knowledge. It is for you to unravel the secret. To be able to carry the physicality .. the STM within the D of containment of the ?? soul system, to create a condition of life in any position in the U. Put it this way, the STM creates the condition of the physicality of the man in atmospheric condition of the earth, now you have to go deeper within the soul to create another frock that can protect the same soul within the structure of the Unicose, within the shields of M fields of the U. Then you understand that all the teachings in past years had a reason. Mankind has to move to understand the field radiation and cosmic ray, not the way it's done up to now, but in a true essence of the motion in the U. (:40). Understanding the method of transmutation transportation, and understanding even in atmospheric condition of the man transportation of the fields fo the STM. In interaction of the fields of the earth created the man at this point the physical condition. What happens now the man goes to the deeper soul strength with interaction with the fields of the U. Man will have a new look, will have a new manifestation where it encompasses the fields of the physicality of the man. The biggest secret for you is how to release these fields that you can create different D, because once you manage to create this field, the next step is another field, the strength of the field of the Mars, .. of another galaxy, or even the strength of the fields of the Creator. Then you understand transportation ?? by is transporting one, is a physical D in another, which can encompass. This is the true transmutation if the man understands, not by changing materials, but by bringing the fields to create the materials condition as you need, using the same soul, using the same field interaction without the fear of demise. Now you understand how simple we can do so.

In the coming time from KF research centers will provide systems which will allow to encompass the STM that we teach you slowly how to allow the soul, (:42). to create different condition of physicality with manifestation in different field strength, till you learn, then once you learn it becomes a job of a child.

The first child through the process of understanding and interaction of Pl field out of the womb of the mother will be tested in a very short time. That the children of the man will be born both in the D of physicality of the baby, and the soul at same time that it has the facility, and knowledge of the speed of the light of the U. When we introduced the first EU, this was the purpose to create the first condition for creation fo the new generation of the man, which has access both to physicality and the soul at the same time with the knowledge fo the physical D, that within it, the knowledge of the U and creation. That man will not do any more wrong.

New generation of children of the Man - will be flawless - never kill
The new generation of the children of the man will be flawless. They shall never kill. They shall never destroy as they know what they need they can achieve within the D of the soul. Then they don't need to speak wrong, to do wrong, or think wrong, because everything is in their grasp to live a perfect life. The children of the Creator.

The first of these children will be born to man very soon, and from there on, the new race will start. Then they will teach the man of now, how to handle the new understanding. The way our children are teaching us how to handle the joystick, how to play the computer game, (:44). because they are 1 step ahead of us in the knowledge.

The future generation of the man will teach the present man how to become detached from the D of the physicality. This is my wish, and my wish is command, and it shall be done.

To understand the totality of the creation, to change the course, that the man can travel in both dimensions, that in the position of physicality he chooses the best, and in this other D, become the best.

In so many ways, man will evolve in every D and direction. We try to explain the knowledge of the U. .. understanding of the totality, .. try to become knowledgeable in the KU.

But first of all, we have to know what knowledge do we carry, what do we call the knowledge of man. What do we assess and access to, as we wish to become knowledgeable in the knowledge of creation.

We have started the process in setting up the first centers, that it brings man to the D of spaceship T in the coming weeks. That we start training and teaching man in the coming months and years to become the man of space, through his soul, that no one needs to buy him a space suit, and no one needs to buy him a submarine suit. That man in the space of the D of his soul can travel in the depth of the U, and not only this planet. You have to be able. (:46). to change in all D and directions. You have to be able to understand the changes which are to come, to be able to live within the D of the creation.

Mankind needs a helping hand to jump from the physical matter condition to the D of the fields of the U. Mankind does not have that knowledge, until does not achieve peace within itself, and within its race, mankind will be barred from entering the both knowledge's. This is what we call the knowledge of the creation.

The first child with this knowledge is already, has already, becomes already part of the race of the man. The knowledge has to be complete. The knowledge has to be understood through the process of the interaction of the fields of the U, and you have all the tools. You have been given all the tools to be able to understand this process, to change, to bring the change, and to be able to sit amongst those who understand the totality of the knowledge.

One day .. mankind will understand the totality and then with it, mankind will break through the total understanding. The process of the creation, .. new D of the life is not anymore on what field energy mankind can attain, but how freely, (:48). he can understand the knowledge of the creation. It's not another machine to be able to leave the fields of the U and the STM, it's the freedom and the machinery of the man's understanding the process of the creation and interaction of the fields of the U.

All those MaGrav systems, .. dynamic systems, .. Gans's, all everything which is within the grasp of the physical knowledge of the man has been given to the man. But as I said many times, you need to move from the D of physicality into the D of the field strength, then you will understand the keys to the heaven will be open to the man to understand the knowledge. Unfortunately, none of you, or very few of you will ever teach this as the knowledge of the U become the pride of the man who is foolish to his own knowledge. Very few of you will endeavor to teach the cross point, as you are aware of one point, if I teach, would they abuse it, or if I teach, they will lead us to a new D. Then it comes a time when the man will go to the source of the STM, to understand the totality of the operations.

We go to the point to be able to transmute from the D of physicality into the new D of the soul. To understand, (:50). the process of the creation to understand that mankind can become a totally independent entity of life anywhere in the U.

But as I said before, it's like when you like to drive, you need to go to driving school, get an instructor and learn step by step. Most of these steps will be set in the Enhancement Units (EU) around the world. Through the EU we teach you how, .. we show you how you can elevate your soul to come out of the D of physicality and become stronger for different D and directions of the interaction. The EU are not just for the body of the man, but embedded in it is the STM. The interaction with the soul is the ultimate goal and the processing of and production of the EU. We touch the soul, we reach the U. We touch the man, we still be in the prison of the village of the earth. The whole purpose of the introduction of the new systems as you will see in the coming days, the first ones will be public, is to bring a condition, that man can elevate directly through the STM in interaction and T&T of the physicality to the D of the transportation & transmutation in

the D of light. In the D of understanding the totality of the interaction of the lights in the U. (:52).

In the coming time, the first spaceship centers will bring this condition that we make them the point of, what we call clean environment for not only the workers of the site, but the souls of the site, where can live in a perfect condition.

We will build the first spaceship institutes, grounds and land, in the beautiful land of Iran. In the coming weeks we'll announce. And the spaceship centers become the space cities that the man will learn how to live across the U. the Iranian KF will announce the location of the new spaceship centers. The first will be built in Iran, and through the new T we release, will make it the position where the man can interact with the U Community's interaction, with us to be able to travel the U, with understanding fo totality. We salute the Iranian government and leadership to facilitate such a system and area for the KF.

We understand the totality of the work that the space T has to come from the excellence of knowledge and not excellence of weapons T. Where every man has access to the totality of the knowledge and understanding the knowledge of the creation and the created.

Where KS can come in and add to the knowledge of themselves, (:54). and the others and maybe those who travel the U, a new knowledge where man has a unique access, to unique emotion and feeling, which is not known so much in the U, the love, the care, the beauty of the creation.

In so many understandings of the T man has made many mistakes, but in the coming time you'll understand the totality of the knowledge of the creation sits within the structure of the man. You do not need to become travelers for a few seconds on the weightlessness, but you become weightless in the span of the U through shedding the unwanted by total, what I call, devotion to serve the U, not only the man.

Nowadays if you serve the nations you become a spy. When you serve the whole of humanity you become unacceptable. Then imagine a man who serves the U, you are definitely the work of the devil to today's understanding.

But in the U Community there is no higher position for a being to serve the U and ?? itself. This will change. This as earth is the embodiment, the source place of what we call, life. The new souls leaving this planet to create a new sun, a new dimensions, will carry this new essence, (:56). with them, that they never shall create any condition, that no harm comes to any collection of physical souls, or what we call plasmatic fields anywhere in the U.

We have seen problems when the STM converts in D of physicality in different positions in U some them comes with the behaviors of the man is still carried within the STP of the man, and we need to change that before we make man, a man of U.

As I said, we start delivering the EU that gradually numbers of men can be elevated to that position, to understand, to be able to become the passengers of the U, and gradually set the scene for the rest to follow. The EU all versions of it, are different means and methods of T&T in the universal D. You want to travel with the totality of the physicality you are welcome to body EU vertical, horizontal, and what we have today. you want to travel with the understanding of the fields of the emotion. the new universal what we call vision EU to be introduced in the coming weeks will allow you to travel in the D of the STM. If the physicality is not of the importance. But we open the eye of the man to the new opportunity of the T&T (:58). I gave you a hint in the teachings of last week where I said I can create shooting star (SS) ?? in every D and direction as you like, as seen by KS who were around. The same knowledge will come from the expansion of the STM plasmatic M fields of the D and the position, as you stand next to me, I decide that you shall see a SS in that direction, and the same time I decide that will see a SS in that D in the same environment. As I explained last week .. The STM decides the position and direction , and the other souls is the satisfaction of knowing the knowledge by knowing it can be done with such a perfection.

It's the same I said to you, you create the craft, and you create the point in D in the U where you want to go to, and in that point you travel. ??/ I create that point and D, not in the emotion of the system, but in the emotion of the man. Now you understand how easily I can move within your soul, your physicality is just a play. (1:00). You see my vision through the soul, your eye fools you to the existence of the meteorite. I create that meteorite, SS in your soul, and your soul converts it to the reality of the physicality. I am the best magician you ever see in the U. But still live in the frock of the man. The new vision EU is to open the vision of the man to this D of work. We give you your sight back, you recover from your blindness, and your cataract, but the purpose of this system in the long term, to allow the STM to find confidence to take the D of the soul. The first set of these vision EU have already been agreed with Arizona center. This is a part of the peace dividend which is floating and be delivered in a very rapid way.

Understanding the process of the knowledge will make you a beautiful magician. It's very much the man with the coin standing in front of you, 1 second it's there, and 1 second it's not there, but we all know that coin was from the beginning with the man when he arrived. It's how he allows us to see it.

I came with the knowledge, the knowledge of the creation and the Creator, as I am the one, (1:02). in understanding the totality and to share. But depends how vigilant you are to see where the coin comes up, and where the coin might disappear.

We came with the totality fo the knowledge for the man. We took our time, thousands of years from the mountains to deserts we traveled. We came from what we call, the valleys and the forests. But now it's time to educate the man in total, in totality of all, from

Amazon to Beijing, to the palaces of the White House, and what we call the mosques of Iran. The knowledge of creation will touch mankind beyond his understanding, and will change man. Will change man in understanding, beyond what he could imagine the creation could be. But first of all you have to accept the peace. The peace of the man within himself, and then the peace with other men in the D of physicality.

Yesterday I was in Vienna and I passed the hotel where the peace negotiations between Iran and 5 plus 1, is in progress. Still the police cars and dignitaries negotiating how to cheat the nation out of its knowledge going on. And I thought, what a fool, the nuclear industry you are trying to cheat is nothing compared to what the man sit outside is watching can give you, (1:04). that it becomes unless even to that, but it still comes from the nation of Iran. You are happy with the crumbs, you can have it, where the cake is with the man outside. Understanding the new T will bring changes beyond the imagination, but the mankind the leaders of this planet, have to agree on one thing, that they are equal in race, in the path of belief, as one nation. I have never failed in any of my work in the D of the creation to achieve what I want. Try to understand the inner sanctum of your own being, what has created you, and what have lead to manifestation of you in the D of physicality. You are not happy with a look, .. a behavior, do not go for a plastic surgery or a psychiatric treatment process, go within your soul. You can change the color of the eye, the shape of the man and the emotion of the man. Where there is no need for the interference of cutting the body of the man open and injecting something in it, because if that is the point of satisfaction for you to happy to be able to serve, that shall be served to you. You will achieve it. If it's for fulfillment of what I call, being better than the others, it's ?? that knife and plastic surgery.

I am sure Dr. Rodrigo is very happy to help you with it. But in that process of helping, if you loose your soul you've lost your knowledge, (1:06). even if you think you have achieved, what you thought you achieved.

Try to create a field systems, that interacts with the field of the STM and not with the physicality. If you come to Linz on the 3rd of October you'll see the new machines which will do that for you. But you can go in as a man and come out as a man, as your expectation was to achieve something which your soul knows the truth what you have done with it, or what you would like to do with it. We invite you to Linz to come and see what is to come.

As I said .. the Linz exhibition is like the Chicago Fair, where for the first time the light was shown by Tesla, the light bulb to light up the city, and became a changing point for all of us. The Linz exhibition is more or less the same, it will change the life of every man, there won't be the light on the streets and the home, but there will be the light within the soul and physicality of the man.

Beautiful Tesla enlightened the physicality, and I enlighten the soul, but for both, the purpose is the same, to bring comfort and progress for mankind, one in the D of physicality and one in the D of the soul.

Maybe as it was the same soul in the prophets of the messengers of the STM, (1:08). Maybe it's the same soul from the knowledge point of view, same with Tesla and the others. Maybe all souls are from the same for both prophets. The progressive development of the science is understanding the truth about the creation. In so many ways, maybe it's time for man to see the light of ???

As we said, we've been and felt the hammer and nail on the cross. We've been the same in Chicago and the other places to see the same progress built. In essence it's the same man, the soul. Maybe some feature physicality similarity, as it has to be the same to receive the beauty in the condition of the creation. In that process you might have seen, the face of Christ, and the Moses, in the same D and direction.

Mankind has to understand the path for him to correct conduct and living and not matter of days, and months, it's been set for thousands of years. Understand the process of the transmutation, then you understand the totality of the creation. Then you understand why we wrote the paper that the prophets and the scientists are the same, (1:10). as in soul, is the same soul. In the knowledge and understanding, the true prophets, and the true scientists, be it from Moses to Tesla.

It comes according to understanding of the knowledge, and one comes from the maturity of the soul. But time has come for the man who matures both to the same time that there is no ambiguity in what the future has hold, will hold for the mankind in the D of the creation of the U. We have to see that some similarities are made and kept that one recognizes ?? of the original soul, which has created the faces, and the time and the places.

I hope you understood a lot today in many D and directions and I hope you understand what is to come. Try to achieve, to understand the process of the interaction of the fields if you want to become the man of the U. Otherwise be happy with playing with Gans's and playing the Gans game till you become mature that there are the fields which this Gans gets, how can I use it to, and for the benefit of the others., than me to achieve. Thank you . Rick .. (1:12).

>>> BREAK >>> 397 KSW (1:18).

Q: Brazil .. translate .. (1:20).

Translates>> Correct me if I am wrong, my doubts are the people in the seas who make surfing, the person goes into the sea, he can go into the flow and support himself through the waves of the sea. This is the first part. (1:22).
The second part all this that you tried to teach us is inside the MaGrav fields of the U, like the guy who goes in the seas, in the waves of the sea, we go and learn the waves of

the U. So with this I could use the waves fo the U to go in the velocity that I can tune with in the U .. (1:24) .
So all the process in my understanding is about this manipulation of this MaGrav in the U for us to travel. My doubt is .. how can we serve in this MaGrav of the U. do we need an equipment for this, for me, with the understanding of my own MaGrav I can position myself to a different place.
.,.. I would like to know if my understanding is correct.

K- You understood 100% correct. (1:26). But it depends on what strength you want to travel the oceans and the waves on the oceans of the U. Some of it we see as light, some of it as fields, and some of the true fields of the U are not even visible to the eye of the man. But the field forces of the U are the undercurrents of the sail of every object of the U within the ocean of the Unicose. That's all it is. We try to teach you how to use the field strength, what we call, at the speed that has no D, but on earth, planet earth, has D to be the fastest on the speed of light. In fact, that's all the purpose of the teaching is. for your to understand of travel, of T&T.

Or if you cannot do it with your soul, create the machines, you call it UFOs, that they become the systems that can create the conditions of your soul to do the traveling at the higher speed for you. This is where the change has come, you always went on the donkey, where you went on the earth path and you deposited your soul with it, and they took you from A to B. Now we introduce you a faster aircraft, you call it a UFO, but the soul is still entrapped in the totality of it. But we show you, that with new knowledge, that the soul has an option to be carried on its own. (1:28). Does not need the donkey or the aircraft, or spacecraft. But as you have not learned to move it fast as it can, and has the capability of, we show you a better machines to do it for you, at least till you mature enough to understand what actually the main captain ?? That's the only purpose of the teaching. ?? new systems, .. UFO to carry this encaged life inside you, or to go faster with it, or to go to new D with it, or trust and understand the master and travel on its own without the spaceship ?? the donkey. It's all you. Depends how many more layers you want to put on this physicality.

Translation … (1:30). ..

K- Let me explain something very simple. When you are a child and you ask a question from your father and he understands that you have not got the essence of the question, but he is answering you, because he sees a spectrum, and you see a little narrow light through his answers. He tries to find another example, another way to explain the same thing for you to enlighten to understand. And it's more or less the job with ?? We tried long enough to teach the children of man how to do things the right way. And some matured, and some did not, and some went different ways. Now we teach you in one go that we make sure that everybody understands from the same ?? everyone understands the knowledge. And this comes very clearly through the Brazilian community. In the school of the thoughts of most of us around the world, the jungles of Amazon, (1:32). are the most remote place, were the most simplest people live, the most what I call, no knowledge, access to nothing. And we consider them as something out of the line of all

of us. We say, "if you live in the middle of jungles of Amazon." Then we have the KS and scientists in universities and governments around the world. As I said, this time, when we listen, especially example, last week, to the Brazilian workshops, which was a beautiful presentation by all the KS from Brazil. When we stood there and listened to them teaching a man in the Amazon, with a very simple understanding of what he has, has managed to understand the T of Gans, and has the same knowledge as the scientists in NASA, and the other space agencies to use the Gans. Simultaneously within months after releasing the T of Cup of Life, the people of the Amazon and indigenous groups are using, making Gans's as we saw in the teaching of the Brazilian group … This is the true knowledge, .. where to teach, independent of the place position and how ?? of the man which he has chosen for himself. It's beautiful when I see the people in Amazon wearing the Gans rings, (1:34). and making the Gans's for Corona, as we see in the members of Iranian parliament. as we see in the government of China, as we see in the European hierarchy. This is where the knowledge is truly understood
with the freedom of choice ..

It's nice. I would like to thank you Rafael and the whole of the Brazilian team, that you took the knowledge to the depths of the jungles of Amazon and when we see them, we see the indigenous people using it to save their lives. It gives me pleasure that we have managed to teach right across this planet. ..
(1:36).
We see it used in Africa in jungles, then we understand we have reached to all of mankind at the same time. And nobody can abuse the biggest ?? ??? I have been present, Rafael and your team and the whole of the KF Brazil. We see the same in Iran, same in China and other part of the world. This is where the true knowledge comes where we came here to serve. Thank you … Brazilian team. It was a beautiful presentation, your workshop, this Saturday.

R: indigenous groups .. how the Cherokee nation from US had signed the World Peace treaty July 4th, 2017, about 4 years ago. ..
It would be a good time for to bring aboriginal people and tribes from around the world to speak as one voice, and sign the world peace treaty, (1:38). and perhaps become the first real nation that signer of WPT ..
What do you think about that idea, .. the kf get behind.
K- So you can do, but there is much more that can be done. But
we got to support them. there is a big need to put right what has been done wrong to them. But as usual if you try to do this, you are seen as radical groups and all sorts. The way we set the KF we share knowledge for all ?? and all. Maybe we need to strengthen some parts, … create conditions

R: … Dean (US) had gotten … had acquired land and was beginning to do Keshe agriculture.
(1:40).
He is beginning to work with Cherokee ..

K- You got Dr. Guatua and other groups. Hopefully soon we can do it in the coming time … we bring the Chinese and Iranian agricultural groups .. work all together.

R: ..
K- What happened with your competition
R:
K- Did you manage to get anything done. (1:42).

R: 6 Am CET tomorrow end of voting. Create the future design contest.

Second position of 10 ten for popular votes.
(1:44).
(1:46). .. it's a foot in the door for mainstream science.
K- Do you know what your pitfall is in this contest. This contest is run by NASA, correct.
R: Yeap

NASA has (black listed) KF - will not let fair play
K- NASA has a very strict policy when they put my name in it. You shouldn't have put my name in it. No one in NASA is allowed to consider, talk to anyone connected to MT Keshe. This is directly from the head office of NASA headquarters. So in some way or another they will find a way to eliminate it.
R: I was considering it .
.. they have to start accepting the T.
K- But you have to understand, they find a riddle (1:48). or ?? But it was good to be in it. To expose it.

In the coming weeks you'll see new T coming out of the KF

K- not understanding it. They were told to dismiss ..

R: the judges are not working for NASA ..
(1:50). This is kind of a test. We need to break the ice . This is like the flagship of the KF.
K- What is the highest vote on all the categories put together.
R: 466 votes from all categories

Any other question
(1:52).

(End of long .. talk about Rick's contest ..)
K- Any other questions.

Q; the Visual EU released in a few weeks .. Are these different from the goggles released a few weeks ago.

K- Yes, totally.
Q: …
K- No they are totally different. We are getting feedback from people on these. .. (1:58).
Q:
K- No we don't give any preset ideas …

Nail Fungus clinical trials by KF
Clinical trials Many of you who suffer, especially if you are over the age of 50 - 60, you suffer from what is known as nail fungus ???
Many of you know what it is if you go to these, the lady's go to these .. nail saloons and pickup different kinds of fungus, what you call viruses.

We have developed a T, that all you need to do is literally wet, or soak your fingers and toes 2 or 3 times a day, nothing else. The results are amazing.

(2:00).

(2:08). Q: Iranian
K- Dr. Pharsan ??
Q: in Iranian about voting for contest..
(2:10).

K- .. all the Iranians who have voted (for EU) do not receive confirmation of their votes .. They noticed the voting had reached 370 and then was taken down to 305 and 310 ..

R;
(2:12)
K- .. Because they are promoting this very heavily.
R:

Nobel Prize meeting Delft University for KF discovery of gravity
K- We suspected, anything comes from KF. ?? Do not expect much. It's very much like the Nobel Prize meeting we had in ?? Delft University in Holland in 2011 12. The KF discovered gravity, now we entered for Nobel Prize, we have 5 elite scientists from around the world to meet in Delft U to confirm the discovery and T, and it was all organized by the UN and officials of Delft U and 2 universities in Holland, ?? guests in this meeting.

Nobel Prize is a fake - professor resigns - others threatened
When we attended there were a bunch of taxi drivers and plumbers and I contacted the professor before their name was given, they said they got threatened, if they attend we'll loose our positions as professors in Delft U and couple of other universities and one of them resigned, "the Nobel Prize is just a fake." We've seen this before, so do not worry about it. (2:14). Carry on.

Creating a destination in space without planet - by sending light
Q: Ed .. earlier in teaching traveling to destination where there was not planet .. sending light to a certain destination. … that light is taxi destination, that at a certain point in the U there will be a certain GM signature perhaps, that the light you send will be the same. There is another parameter of light determines speed 1L 100L
how we sense them …
Is there any similarities. .. when you send light what is
K- What do you mean. (2:16). Explain your self.

Q: Am I right ..
K- If you speak light as spectrum of M fields yes. If you speak light, as we see it, it is part of it. ..

Colors in sunset represent spectrum of different field strengths - like rainbow
When you look at horizon in evening, it's same light but you see different colors of it. Same with rainbow. Different speeds and different strengths of it. In interaction of fields of the U, you have the same thing but different D of strength of the both G and M.

The strength you apply or receive - dictates the spectrum of light
In which strength you have applied it, or you want to accept it, is what will dictate you the spectrum of light. It's something maybe we can explain it in different way.

Strongest source of light - comes from the Creator
The ultimate , strongest source of light ever existed, ever will exist, is the (2:18). emission of the light from the Soul of the Creator.

The light can create subdivisions of itself
To the lowest of all that is not visible to the lowest of the fields. So we have light from the point of, the essence of the manifestation of the Creator, to what is not in the strength that can create fields of ?? subdivision of itself to the light in that D.

Understanding the light - needs confirmation of existence - not visual acceptance
The understanding of the light needs confirmation of the existence, not light that confirms you see the visual acceptance.

Blind man cannot accept frequency - no confirmation - no conversion in brain
When you are blind it doesn't matter if I put an orange or white color, with what intensity in front of you. Your eye does not accept that frequency. .. So you have no confirmation of it, conversion of it within the structure of the brain ..

I can make a blind man see - I confirm what soul wants to see
But as I said many times, I can make a blind (man) to see. Because I can confirm the light of the vision of the soul, what wants to see.

The soul creates a visual manifestation - like bats using sonar

You will see through the soul and it becomes a visual manifestation, bats use the sonar to make a vision.

Light starts with the Creator - interacts with itself - continually subdivides
You can do the same thing with a man, but when you speak about the light, GM field, when that, with us, it starting with the source of the Creators life, interaction of the field if itself, to the light where the vision of the man spectrum, further down, like we don't see, the animals see in the dark where there is less light friction and the rest of it. So there is subdivisions of subdivisions. (2:20).

To travel at higher speeds than vision - have to go deeper - means higher strength
You want to travel, you travel at the higher speed than the vision. You want to go with a higher speed travel, you go much deeper, higher strength. But again in that position you have a speed of, over the speed of light in both directions, not one. (microphone turned off) R; .. your microphone is of

Describes traveling speed of light in both direction - M and G (see drawing)
K- Can you hear me now. .. The speed of light difference is depending on you, on the position. You can travel the speed of light … draws circles. If this is you, you travel SL in both directions, going to, or going away from. This is A to B, and in reality you are in a circle. (2:22). You short circuited this way to the G, you short circuited to the return. You become M in respect to A. In both directions you can do passing the speed of light. This way you might do it 10 times, this way 100 times.

Can outrun an exploding star - on MG fields
(For example,) there is an explosion in the star, you can get hit. You can still use this for MG field to run away from it, (at) higher speed, that its matter state in respect to you, can reach you.

Create imaginary destination in space - by going to inner sanctums of the field
Or you want to get to the sun, but you want to go faster for whatever reason. you can tune into higher strength field of that sun. But how do you escape that you don't have a position ?? you can create field strength of the higher order by going to the inner sanctum of the field to create this imaginary position field B to go to. I have explained this in a paper about 20 years ago.

UFOs travel by creating destination point in front and getting pulled in
In the present aircraft industry we see "chem." trails on the back. In the space T of today we see a light in the front. This way (airplane) we know in the matter state you'll be there. This way we know you are type of UFOs. Because you create, (2:24). a position of M field, position respect to your position of destination, and you get pulled into.

UFO travels into a clean and protected environment in front of them
And you always in present flight system you are in danger of whatever is in front of you, can lead to your demise. In this system, you always travel in a clean environment,

because you have created it. with the backtrack trailer, you have complete protection. But you created this point, and you literally fly, once mankind learns the process.

You always fly into a vacuum, because you create a higher order M field.

This is why you see UFO as a light
When we see a UFO as a light, what you see is what's going into. this thing is sitting more or less on the back end of it. With the plane you see the track in the back. With this (airplane) the more fuel you spend the faster you go.

The higher the field strength the faster you travel - with shielding
Here the higher strength field you go to, the faster you go. Here you have a shield protection. Here you are exposed to physical reality. You can create it again by what we call understanding of the position.

KF is NOW building new spaceships - delivery in couple months
dynamic systems KF has placed the order for the first flight systems to be manufactured for us to be delivered .. next couple of months. (2:26). The first what you call true space ships to create of flight has already gone on order to manufacturers.

Spacecraft will seat 6 passengers for space flight - shown January in Linz
We promised you 6th of June next year. We have started the program already. Full flight system has been put through manufacturers to build the first systems that can fly in ?? real condition of 6 passengers per craft. This systems will be shown by early January in Linz.

Q: How is that point B is created?

Need higher field strength than travel to create destination point
K- .. You have to create a higher .. If this is another planet you create its GM field. If it's not a planet, but a rendezvous point, is nothing. In the teaching .. how to create it. you create a field of a higher order than the speed of the travel, and than you have to create a field, which is higher than the containment in that field at the speed. You don't have this whiplash you have to stop .

There is no weightlessness. (2:28). You say you travel in an aircraft and go 1000 Km/hr. you walk around have your tea sleep and do everything else inside there. It's irrelevant what is going on outside.

In the light system, travel SL, we create the fields that the M field of these stay positioned controlled. We don't create a false compression the way they do in the aircraft you use. You can travel at any speed because the field strength of the system, your body is made of Gans, works, interacts with the M field, which keeps it constant. here you create the compression to keep 1G. here we create the field strength that your body stays at the field strength of itself.

There is no way when you stop, your head falls and the rest of it. … in the recent time when the cars came out the scientists proved that if you go over 25 mph your eyes will pop out, and your brain will come out your ear. Because they never understood. Now from the beginning you understand.

You create a condition for soul to be contained in Gans condition of body
You have to create a condition that the Gans structure of the body .. and the soul can be contained it. Then you travel at the SL and anything you like. Then you put in a package energy of the field of a plasma, you created, or you call it a soul, can be ?? You create the position destination by higher speed to … it's very much.

Mexican food example - all created by field strength of emotion
I can explain it if you .. sitting down and you feel you want to go, you want Mexican food. (2:30). You get in your car and you drive to your favorite Mexican food, and you get that food. The emotion of getting, going, and knowing where you are going, and expectation of you are going to receive, all created by emotion. The emotion of hunger, the emotion of the pleasure of the smell, or whatever triggered you to go to Mexican restaurant, comes from the field strength of the emotion of the man.

We have to learn how to work with higher emotion levels - Love
Now we have to learn to work with higher emotion levels. Hunger is something which triggers us to do something for it. Love is another one. But .. we have a beautiful saying in Farsi, you have never been hungry to forget about the emotion of the love doesn't exist, because from the hunger you die. Love can wait. You understand. We say, … means you never been hungry enough to forget your lover sits next to you, you say sorry you got to stay there, I am going to feed myself first.

Work with emotions higher than - the emotion encaging our soul
So we are aware of higher emotion that control us. Now we have to learn the higher emotion that it can be higher than that encaging of our souls. Then you make that Mexican restaurant, the one down the corner, or the one which is your favorite across the city, or if it is not exactly the 2 you like you go to a supermarket and create that Mexican at home.

Making food at home is like - creating destination point in space
This is the destination, which is nowhere, restaurant, home business. So you create that position in the U when the other 2 are not there. (2:32). We are aware of these differences but we never analyzed them to separate to understand it.

There is a difference between traveling to sun or your own point
Q: … When you are traveling to a sun or planet .. there are certain GM and emotional context associated with it. In just a point in space it is not the same as a star …

Only difference is in one - you create the destination yourself

K - It is because one is already created before, the other one you create yourself. That's the only difference. As I said, you go to the restaurant or you come and make it at home. This is making at home, the position.

Put it this way, McDonalds down at the corner is a place everybody goes to get food. It's not a place of rendezvous .. but you decide to see somebody in the car park .. You made the point of position, not McDonalds I make a car park for you to have a meeting in it. .. You create that position. You have the facility to do because you drive your car there and park. Now that is the new imaginary McDonalds meeting point. You can do the same but with the strength of the field of creating a condition of plasma.

Secret to creating own destination point in space:
You send out 2 different fields - they become a plasma - you connect to it
What you literally do is this. You send 2 different field compositions. (2:34). The interaction of these 2 field compositions, at this place creates a dynamic plasma field, which your system recognizes. .. Now you created a rendezvous point by yourself, and you are at this point in your spaceship in your soul.
Any other question.

Q: Salomea, … because I was not allowed I signed a code of conduct so I was not allowed to talk during my activities ..
Regarding EU contest .. I also had a problem. I am citizen of planet (2:36).
.. Light is part of our soul or the means of T&T of fields. Soul is principle matter …. interacting with other Pl. My question is, transport at soul level … because we
Can we convert light at soul level at physicality like Tesla did.
We'll have climate lockdown
We need to be prepared for another lockdown. (2:38). geo climate war .. how we can convert energy at soul level. ???
They doubled the price. People can be killed by cold and hunger .. last night it was very cold last night … I didn't feel any cold … (goes on and on)
K- Can you tell us what you are trying to ask.? Because we can be here the whole day. What is your question?
Q: .. can we convert light, (2:40). at the soul level in light , on physicality in order to cope this energetic crisis in Romania, because we can't pay the bill?

Stay warm in body when cold temperatures outside
K- Yes, you can do with the present Gans's. We had this question many times. There is the T available by KS that the physical condition can feel warm, when the condition is freezing. You can create that condition within the body without interaction from outside, but you need a specific condition of M fields of Gans's, to create a condition that you receive it. ??? but you are warm you don't feel anything, like we've done, and has been done.

Q: 2nd question. Do we have a unique soul as neutron split into electron and proton. Electron is a creation and the proton the creator ?

Proton is not creator - neutron splits to electron and proton
K- No, proton is not the creator. How can a proton be a creator when it is created out of something itself, from the electron. They both come from a bigger pot. In a way, it's part of the creator, both of them are. So it's not the creator. even I can tell you that the electron is the creator, is left over as a proton. (2:42).
Q: … I heard from Mary of UC. .. Can we put together the electron and proton together and create the neutron. .. in fusion
K- No, read the book 1 .. No fusion doesn't exist, fusion is a dream. Bring in fields as two understanding of the same, yes. But fusion doesn't exist. the fusion the way .. or is talked in world of nuclear to bring the electron and proton, is a dream that will never come true. Because none of the equations adds up. Sorry for money spent on research.

But, unless you convert into plasmatic fields, and than put the fields together, that they take what they like, in balance out, if they have in common - yes can be done. Just as it is done in the body of the man. But fusion to bring an electron and proton together to make a neutron, no, because in the beginning energies were released for them to be separated out, of the balanced sheet.
Thank you

Q: ….

K- Shall we call it a day. (2:44).

Those of you who are coming to Linz, please registered ..
.. if you can't afford the entrance .. we waiver the fee.

(2:46).
We can accommodate 57 people.
Any more questions.

Q: Brazil, .. (2:48).
How our physicality will remain if we travel by the light. what will happen to our physicality?
K- repeat ..
Q:

High speed travel in physical D - Lot of hazards - limits to compression of fields
K- We will not travel in the physical D, when you go to the D of the speed of light. This is what we are trying to bring to be understood, that the high speed travels with the physical D has a lot of hazards. Certain limitations will be brought in by the compression of the fields.

By traveling by the speed of, by the soul of, by the energy of the Pl, you can create the Pl field and be in it, that it can interact with the fields of the U. You can still travel faster

than the speed of light. But then you have to be in the D of the fields, not matter state. (2:50).

What happens to the physicality when we travel through process of light?
Q: … You said that we travel through the fields. What happens with the physicality state if I choose to travel with this process of light?
K- I don't understand
Q; repeats

Our physicality is an Illusion of Fields - 3 layers of field interaction
K- Our physicality is an illusion of fields. Your skin is 3 layers of fields interaction. It's done in the matter state.

When change M fields of environment - Field of skin act as Gans's - not matter
So when up to a limit, as you change the M field of the environment they interact as Gans's with the environment, not as matter.

Gans state of skin allows STM to encapsulate STP - STP keeps integrity
This is why we can put the physicality within the capsule of the STM to expand to beyond it, and still keep the integrity of the physicality and the STP within it.

Understand skin is not solid state matter - composition of Pl field interactions
It's understanding, that our skin is not a solid state ?? capsule or whatever. It's made of the composition of Pl fields interaction.

Skin fields can individually interact with environment
All these fields can individually interact with the environment.

Or keep as one - and change environment around - to create speed
Or we can sustain it as one, and change the environment around it to create the speed. Translate..

Matter itself has a dimension of - physical interaction of fields
We are not in solid state matter, our body even we touch it, it's not a, even a matter has a D of physical interaction of fields.

Solid stone on earth - moved to moon could become creatures - walks talks
If you want to move a stone, a stone could be solid here, but if I take it to the moon, the soul of that stone becomes creatures which walks and talks. (2:54).

Based on field strength interaction - why STM encompasses STP
We are not dealing with a matter condition, that's why the fields of the STM can encompass the fields of physicality of the man, because it is all on a field strength interaction.

I keep going back to the fact that it is - All about interaction of fields

It keeps on going back to understand, we call it, interaction of the fields.

Skin is dynamic fields - interaction of its layers creates containment of body
The skin of the man is a dynamic process of fields, plasmas and the interaction of different layers creates the condition of the containment of the body of the man.

The body - the skin - is a mirage
It's a mirage.

Nothing in U is physical - interaction of fields - depends reference point observer
The total life in the U, if you understand the interaction of the fields, nothing is physical. It depends on the reference point of the observation.
Any other question.

What is elevation of the Soul of Humanity and the STM?
Q: .. elevation of the soul of humanity and the STM. I would like to know how is this process, (2:56). what do you mean about the elevation the soul, could you explain in more in detail?

Elevation of STM - Live independently by your own will - any position
K- The elevation of the STM is for man to be able to live in any D and position, according to his will.

Presently the STM is encaged by fields of physicality - tranquilized
In the body of the man, the STM is encaged and is taken around by the fields of the physicality, by the physicality of the man. He hardly has any control over it. It is like being tranquilized and taken charge of.

STM understanding its own existence - emotion of physical condition
When we talk of elevation of the STM, it's to be able to understand the existence of itself, through if you like to say, the understanding of the emotion of the physical condition.

Aware of higher order Pl within - Live independently and detached from physicality
Which means you are aware of a higher order field strength Pl within you, and you can give it the freedom to live independently of the physicality. That's what elevation is, and even detached from physicality. That's all.

Any more question.

Q: .. to travel faster in the U does it depend on our degree of detachment, would this restrict where we can go and how far?
K- Yes and roughly no, it depends on your choice. (2:58).
R; little mysterious for now
K- Yes gradually we open up , people understand more of.

Q: Azar .. the rendezvous location which is not a place, just a location. So I have to give you in strength. I am 10,000 and create a location at 1000 then I have to call you and say .. 1000, or you choose your own strength for that location?
K- You'll find out. These things are man made D, talk. When it comes to D of the souls if you have the line of communication or strength connection, that emotion of time and place, in agreement with other fields is very ?? you don't need to give an address. .. When you put … Ricks magnets, when you put a new magnet in, that is your wish to be in that position you see all other magnets move to accommodate it. There is no location, you move to that, I move to the others. This is the beauty to live in the structure of the soul.
Q: So it's just like when you fall in love, you always know what your lover wants because you can read it.
K- Yes. .. but it depends if it is you in love, or you are both in love. It's a very big difference. (3:00). ?? traffic
you turn up and there is nobody there. Sorry I got the wrong ?? but no.

Q: When I was in Iran … traveling with the soul, people are doing it in Iran, people have a word for it but it keep forgetting it .. they leave the body.
K- Can you explain the word ??

?? it means a bird.
As is the earth, the U, whatever you call it, so they can travel the U, if I understand correctly the Arabic …
Q:
>> …

(3:02). so I made a setup for Cup 1 and 2.

He said, he was trying to travel with his soul. …

All over Iran they are ready for this travel with the soul. I am older generation, 60 years old but 18 years old, I couldn't believe my eyes. It was such a joyous moment to know people like him exist (3:04).
K- Thank you shall we call it a day.
I hope you listen to the teaching part of today and learn a lot.

Thank you

R; 397 KSW (3:06).

Secret teaching - hidden knowledge of why man is the way he is (24:27)
(feeling the void at birth - loneliness pain than childhood wounds - terrifying experience of the Void - this is the root ; solution was to start thinking - distraction and living in concepts -- the key is given in these lines "No dimension of physicality.")

ENGLISH TRANSCRIPTION

(:11).
K- .. to se what we have missed and what is to come for human race. … these teachings .. for past few weeks, might touch some of us, but sets the future destiny of man in the space for our children, .. great grandchildren. In a way, we are seeding the soul of a perfect being for our children, for them to have perfect children, that man will not commit these atrocities of past decades and centuries, and thousands of years in the space.

We are preparing man to become man of space, to become man of correct, ?? of Zoroaster, which is the ethos of the U, and mankind has missed in so many ways. Most of these teachings we have dreamt about, and now it is becoming reality. In today's teaching I will explain to you what KF is about to do and achieve and what is to come, that it could have been a Sci-fi movie to you, but it's a reality in laboratories and works of the KF around the world in research and development. We open a new dimension (D) in understanding to us, that now we teach our children to live by the ethos of U, that they teach their children, and the future generation of man we will not see anymore killing, destruction and taking it as part of the work to be.

For man to become man of peace, for man to start understanding what was done wrong, what man can change, the way we seen the behavior of his Excellency President Biden of US, withdrawing force, even will create some problems short term, but puts the nation back on the right track. We respond to the actions of President Biden in a very direct way. KF Arizona will become operational simultaneously as it will with Iran. (:14). We have come to agreement with the head of the KF in AZ, that the first eye vision systems will be delivered simultaneously, into AZ and Tehran, which means we'll respond peace by piece. We share knowledge according with the Chinese, and with that process we make sure as the Americans are making steps to withdraw their atrocities of the past time by the past presidents, to bring their nation to stand correct, we support it. We bring new T and D into the work of the KF. Our organization setup in America will be used directly in negotiations with the Americans for transfer of T, the same with the Beijing, and the Chinese government. To go to space on the 6th of June next year, it means we all get gradually involved. In that process we make sure Iran stays the center of the knowledge and T.

We are hoping to announce in the coming days, Iran will build the first spaceship city on this planet, in the coming months. We are negotiating it, and if they are successful, one of the largest spaceship cities, where man will commit himself to spaceship development T will be setup in Iran. We hope we reach agreement, and you will see one of the largest space bases with no launch pad, but with understanding that the man will develop, the new T. In this process we invite all the governments and companies who work in the advanced space T to open a center in this city. A city of knowledge for space. As I said, we make Iran the center of knowledge for space. We thank the offices of his eminence A K of Iran, (:16). and the Iranian new administration and those who work with us in Iran to start the facility, to be operational as fast as possible. They have made every accommodation for the KF to reach this point, and we respond accordingly to bring T from its mother birth land.

In the teachings of today we come to a new D, .. we understand more about the past, and going towards the future. We have spoken for months, and years. about material, about the way we change materials to energy, the way we transfer energy as light from one to another point. But there are a lot of multitudes of other things to consider.

We transferred our soul to a platform, we moved it across the U, we moved it to the moon, which for most of us is as far as we can think. In the present time, but the knowledge of the man, with the present knowledge of the plasma (Pl) T, does not look at Mars or Jupiter, we look at other galaxies. We look at other combination of the universes, and mankind will learn this rapidly, to become part of that light, to cross borders of the galaxies and universes.

In this process we come to one point, I transfer myself to light - one step. I want to be on the moon - one step. I want to be on the star I looked at for decades and now I can be there. How am I going to be there, and what is there when I arrive? We cannot be wear spacesuits. We cannot be always thinking, (:18). that in the process of transmutation and transportation (T&T) across the U, we will end up to be in an O saturated, C life, and live the life of the man on this planet.

Our soul carries the combination of the energies of the U, and within it we have carried the soul of our physicality. Which means the brain, which we trained on this planet to manifest itself, as I made the man in the image of myself, which is the same way it works with the brain, or what we call the control system of soul of the man (STM) now has to make a decision.

The time of wearing spacesuits and hopping like a frog on the moon, like what we've seen in 1960s is over. In so many ways, we cannot carry on with the way we used to. The time of donkeys is over, as much as the spacesuit. With the present knowledge of man, we understand when we arrive at the point of destination, the soul of the physicality (STP) of the man, which is embedded within the STM, will decide how the physicality will manifest itself in that point, then you don't need a spacesuit. Then you do not need to be worried how I am going to survive. The way we guarantee the survival of the soul embedded within the physicality of the man, now we turn the sheepskin, again back to

front, or front to back, now the soul again takes the position of itself, within the STP, and physicality takes shape in the D of existence, (:20). mutual working.

In a way, understanding that which one, and how the STP, and STM will change and will transmute from one to another. We know this process, we have lived, we were born through this process, but now we have to understand how the processes come together.

You are a fish in the womb of the mother, totally encapsulated within the structure of the safety of the soul of the mother. Then we come to an air condition. But we are preset with the hand and the feet and the nose and everything else to mature to this world. Where at that time the soul of the physicality of mother and us together, made sure everything for what the physicality of the soul of the mother feels, is correct for our soul, to born into.

In a way, the work of the STM with the STP, again go into operation, we are re-born. We are re-born in D of physicality, this time with the connection of our own soul, with the connection of our own STP. In a way, we change the soul of the womb of the mother with our own soul, we cocoon in it. The way we cocoon our physicality, and our physicality cocooned it for millions of years. We are familiar with the process. We should not be frightened of what happens. We should not be having a fear of what will be ?? in the physical D, because the environment of the place will dictate what will be. This is one of the biggest fear of the man, and from now on, (:22). understanding the process of the T you do not have that worries.

In a way, you can transmute through spaceships (SS) or .. through the STM, depends on the maturity of the time and space. At this moment when we travel, we leave our life, we put the soul of the mother with the child, within the structure of the plane, or a car, and we trust that car or plane to take us from A to B. We have achieved further knowledge, .. to become more mature in understanding of work of U, now we put it in a SS, but still it's the same mother with same soul, with the soul of child within it. We use the SS as the ray of the light. We use the STM itself as the soul of the mother, and the STP of the child. In a way, depends .. every man understands from my T and knowledge according to their intelligence, according to what they can accept within the boundary of their own existence.

In this way, now we understand, we are still talking about the same process, but different methods, how we achieve the process, how we get to the position on a SS with a physical D, on a SS of the STM with different speeds, and or understanding that we can have the both.

Combination of the process of the combination of the STP, and transmutation will be shown in the new Enhancement Units (EU), which will be released by KF before Christmas this year.

Where we embed one system of the soul within the other. For the first time, (:24). the first children of the man will be born in this process. In a way, what we call, and was the reason we developed the horizontal EU, to be embedded within the Body EU, is the Body

EU become the soul of the mother, and the space, what we call, horizontal system, become that soul protection for a child to be born.

HERE>>>> 24:27

For the first time we bring you T, that the children of the man will be born as a replication D of the soul and the physicality at the same time. The new EU, which is combination of the 2 will allow man not to drop the child in a, what we call, "no D of the physicality of the matter state," but in a controlled state, that the soul will leave the body of the mother, with and prior to the child, while the physical body of the child is born within the capsulation of the EU, where their life will be perfect as they want to mature to.

The first of these children's will be born prior to end of this year in this process.

That will be the Mitra, will be received through the process of understanding of the man in the true essence of creation. Mankind has to mature to the reality of the process of creation. Mankind has come to a point that he has matured enough.

Is the responsibility of our religious leaders and world leaders to bring this understanding rapidly across the planet. There is no time to play. Mankind has played for thousands of years, now is time to move. It's time to become the true man of space. It's time for mankind to understand the process of creation.

For this reason KF, (:26). in coming weeks will release technologies and systems which has been the dream of the man, which has been the process, that will not allow mankind to fall behind. As I said, new T will be delivered very rapidly as it is getting developed. New EU in different shape or form. The vision EU which allows the man to see through the STM, and not the physicality of the eye of the man, will be deployed in AZ in a very rapid way prior to Christmas. This is the way we responded to the American move, peace by piece. We make AZ the center of space T in collaboration with the Iranian government in the coming days, and gradually we build on it, to build trust amongst the man. We'll respond the same positive to the Chinese national security approach, that we accept your offer of collaboration at the KF center in Jin and Jiang. We collaborate with you, the same as we do with the Iranians and Americans, and we welcome the Russian administration, and the new administration to come into power in Russia, to collaborate with us on the same way of peace, and as we've seen, "eye for an eye, tooth for a tooth." Americans withdraw from Afghanistan to bring peace, even we see some mayhem, now within Middle east movement, gives us the sign that the peace is on the table, and we respond accordingly.

In the coming weeks we release a number of EU, which is never seen before, but it is needed for man to be able to understand and benefit by the new process of understanding.

We will release a new EU which allows operation on the D, which never seen before. We have used knives to open the body of the man for operation. We have used laser beams to

cut, (:28). Now we bring in the advancement of the Pl T, where we need, we open and dilute the skin of the man, to reach inside of the man. And where the man has done his work to repair, the positions of the ?? 2 days, will learn directly how they can reach directly to the heart physically, without any cut, to change what is needed, and then we change the Pl, as no operation has ever done before. This T has been in the hands of the KF since early 2000 and now we release it.

In a way, we can go within the body of the physicality of the man. Now that we understand the body .. is made of M fields of Gans's, we create a condition of, that the M fields open up, but stay at their own level, and as we create a new life in different positions in the U, when the physicians have changed the heart valve, in the position, the physician has taken the shrapnel out of the body, then the body closes with no mark.

We tested this Ghana, about 4 or 5 years ago, and we saw no scars. We understood the process of the Gans Pl T, how can leave man with no scars after operation or any damage.

At the same time in the next few weeks KF will release T, that the physician can use, very much like the pressure belts when you take your blood pressure, to be put around your arm if you got a broken arm, broken bone, and heal the process of the fracture within hours.

In a way, we speed up the process because we deliver what the brain is going to deliver over weeks to the bone structure, to be repaired directly at the point. You can break a leg, and walk a leg an hour later.

At the same time we deliver new T, (:30). that allows mankind to be more versatile in any D of the work and physicality. The new series of the EU, which you will see the first 2 in Linz on the 2nd of October will be comparable to the new space T.

The first four, as I informed many of the KS, spaceship T to carry 6 passengers has already been ordered to our manufacturing units in China. These units will carry passengers, which will be fed, will be looked after, and fly at the same time. This was the wish of some Iranian scientists some months ago, and we responded accordingly. The T will allow us to travel the span of the U. It allows us to travel on the surface of this planet in a much faster, safer way, and at the same time, allows us to achieve T, which will allow, even on transportation, if there is anything wrong with us, to be healed. If we pick up a disease in Africa, by the time we arrive, 5 minutes later in New York the disease doesn't exist. T&T of the viruses, the way in the U, it is handled, now will be handled in these systems. The new spaceship systems are paralleled to be ready for the 6th of June flight as we promised. We have taken action in the KF, and accordingly we deliver.

As I said, world leaders decided to go the peaceful way, KF facilitates that peacefulness. We bring new jobs, we bring accommodating the governments who take these steps, to give opportunity to the scientists to be able to carry on with development. but this time in a peaceful manner. (:32).

In the coming days, and part of the teaching of today, we'll show you what happens when you go to the moon, for example. You leave the earth in the encapsulated system of the Vertical EU, and you land on the moon, not in a spacesuit, and not in a capsule, within an open station, but you land on a spot on the moon. Do you have to die? Or through understanding transmutation of the fields, you take the shape, that allows you to be mobile, and survive and live on the moon. We can extend the tent of the moon.

In a way, when you land on the moon what happens to you. What will be the position of your work? How will you survive the span of the work? Or you decide I would like to have a little bit of freedom, but till live through the eye of the man. We transmute you from a station in Linz, and directly on to the surface of the moon. You land, you decide there, or there. You will land on the N side or the South side. As we have different ways of living, look like Chinese, black or yellow or white. On the surface of the moon you have the same propositions, we have the same manner of work. And what happens to us?

In so many ways of understanding, what would we look on the S pole, or how would we look on the N Pole. How would you look in the center of the physical structure of the moon or any other planet? (:34). What shape would allow us? If we land on the solid base here, but here on another planet we end up on a liquid state. How would we change ourselves? How do we allow the body .. to take a new shape. Do we become a fish here, and do we become a climber and a monkey here. What do we allow, how do we trust our soul to understand the process of change.

Or do we arrive in a SS on another position on this planet and we decide we still want to keep the physicality. What do we do? We don't want to loose the SS, we don't want to go in the D of the soul, we extend the tent of the life, by hundreds of kilometers, that we survive as man in this area without wearing a spacesuit.

The process of this expansion of the field was shown in the defense T of Iran in respect to the drone. It was shown in the space T development last January, in defense of the life of one of the Iran leaders of Sepah. That no one could enter, no one could interfere, and that lead to the peace talk of today.

So what we see is the extension of the tent, that we get off the SS and we are in a tent environment, hundreds of kilometers. Then we can space and walk. We pickup viruses and diseases from the surface of this planet our soul, in conjunction with STP in the system, set within the spaceship, will clean you out. We will not, (:36). bring viruses and diseases from one planet and one environment to another. The same shall be with your soul when you travel. How do we transmute? How do we change? Do we enter as a single energy Pl as a comet, or do we become another combination of the fields of the STM and the STP, and create a shape that we can move on the moon.

The legs and the arms has shown us through the American trial on the moon, they become a grasshopper. This is not the way to live. We have to be able to run and to walk and to live on the surface of the moon, as we do on earth. Do we need to create the

condition of the deeper strength fields, that our G field become heavy enough, that allows us to attach ourselves to the surface of the moon. Then arms are too heavy burden to carry the weight of the man, do have to develop a system, that we become like a snail, the weight is spread, but we can travel fast. The real shape of the physicality of the man on the moon cannot be the way we are on this planet. We have to learn, that we accept the condition, because the way we manifest ourselves is the best guarantee for the survival of our physicality, the STP and the STM. In a way, we learn to become the chameleons of the space, we learn to understand the process of creation.

In so many ways, (:38). we become aware of the totality of the existence in all D of creations. This brings a lot of problems for our religious leaders, how to explain. Do we open another church or mosque on the moon, and the next one, and the next one. Or we go with the belief of Zoroaster, to be good, to do good, and to live a good life.

In so many ways, mankind has come to learn, that he has become ?? not by choice but by the decisions of the Creator, and man of the U. Now he has to rise to wishes of his teacher, to understand the teaching, and with it, teach himself and his children to become a new generation of the space.

But then again, we could have taken you through the spaceship system and let you fly like the others you see, because they have not matured to the point of maturity of understanding transmutation of the soul, and then become another nomad of the space for thousands and millions of years, and then start teaching you about the process of the soul. Then you say, why did you take me a million years to get to here, couldn't you have teach us from the beginning. Now we teach you from the beginning. Then you don't have, you don't need to go through the process of the SS and the rest of it, but you go through the full maturity of understanding.

If you mature enough you will understand the process and the knowledge of the creation to meet your Creator. I am there to welcome you. I am there to show you the knowledge of the creation.

In so many ways, mankind has been given a leap of knowledge. In so many ways, mankind has been given a time to process, to choose the donkey, the aircraft, the SS, or the STM. You need the grass to feed the donkey to take you. (:40). Put fuel in the tank to burn to go. Use the M field positioning in the matter state to travel, or use the M field of the STM the way the Creator travels the span of the U.

It's you who have to decide. Either villager, or man of Creator. In any case, you carry the knowledge, it's you who will choose the position, the time and space. It's for mankind to understand the conversion. It's for you understand the process of interaction of the fields, .. to start playing the whole process of understanding.

One of the first toys we've given you is the Universal Enhancement Units (EU), which in next couple of months rapidly will be deployed amongst, and every position on this

planet. We have setup the positions, and we start the manufacturing now, that the T has reached a milestone, that it can go through the process of the conversion in a rapid way.

Thanks to many KS who work with us, we have achieved to teach man to move to the next step. In that process will bring the knowledge of transmutation and transportation (T&T) to you. Maybe .. before sometime in November, you will see the first thousands of the T&T units in Linz. Try to pay a regular visit to Linz, that you see the latest, which KF and knowledge of the man can deliver.

Understand it, take it back and try to develop it. We heard KS are setting up a hidden MaGrav unit to unravel, (:42). the secrets of the MaGrav. But one day I will shock you, in how the MaGrav units, which were given to you, were MG units of space development, where those stacker units can fly, can reach any point, and carry your soul as a part of their operation.

We give the knowledge, how you develop it, is the process of understanding. We welcome this new group, which is getting setup by Jalal, and we support in so many ways, but do not fall in the same trap, as those who build the MaGravs. Look at the structure of the MaGrav of the KF and learn from it.

The secret, the true knowledge of it has been sitting there from day 1. The design of MaGrav has been the cornerstone of understanding the knowledge of creation, but many of you lost it, never understood it, and they got trapped as usual as the man does, with the physical D and the interaction of the physicality of the matter state of this planet.

Understand the process, understand every feature of the creation. I have created man in the image of myself. The way I travel, the way I think, the way I work, the way I feed myself without killing, and the way I transfer knowledge through the spans of the fields of the U, and not by emails, and Telegram.

Try to understand the field interaction, and not get baffled by the materials, which create that field. Once you start the kindle of the energy field transfer, throw the match away, as you do not need. The physical matter state is irrelevant, (:44). when you lit the match, and you light up the candle, you don't keep the match in your hand, it will burn you, because you get in touch with the physicality.

Then when the light of the candle comes, the field energy of it, becomes the source of the energy and light, and enlightenment.

This is what I have been telling you for a long time, move away from the physicality. The beauty of the man is that he has the physicality to trigger the essence of the creation of the fields, and understanding of the STM. This is where most of you got trapped with the right hand turn, and left hand turn, and 9 windings, and the other turn the other way. Whatever you played we went along, because somewhere down the line, you have to learn at the end of it, it's the field, which the MaGrav creates, not the coils, which you are so entangled with. Once you lit the light on the candle, the candle stays, there is no need

for the match. But the light becomes the essence, where the candle is the physical body, becomes the energy of the U.

This is what mankind and the new teams, of hidden teams of Jala are trying to develop this new illusive MaGrav system. It already exists with us, within the KF. Look at the structure of the MaGrav units and you'll find the hidden secrets.

In so many ways, that you have never thought, and still with all your teams will be hidden from you till you understand the process, .. the job. Look.. go back to when John started setting systems in AZ. You missed it, you got there, you got baffled by the physicality, (:46). of the MaGrav unit, and not by the fields of it. You lit the candle, and you let it blow out, with not understanding it.

In the new structures, .. the new ways that we teach you, we'll see in the EU, and the others, you understand, you still use the physical D, because that's how man can understand. But you will see, we trigger your emotion, we trigger your STP, we trigger your STM, and then understand how one will move to another. Till you do not match the STP and the STM in the EU, you will find the knowledge will be hidden from you.

It's not detachment, it's understanding how the attachment is between the STP, and the STM, one to become the proton, and one become the neutron, and one to become the electron, and when to be which one, at what point. When to become one, and when to split, and when to one, to manifest itself to protect the other, where the electron, become the physicality of the man to manifest itself. Where the soul sits within the proton, within the center, and the time comes, that the 2 together behave as a neutron, even in one, but working as 2 within the structure of the totality of the fields of the Pl.

Mankind has to become very mature, very fast. We don't have time. I'll put it this way, I wasted thousands of years on this planet, (:48). trying to get mankind to this point. I have a lot more to do, and time to bring everything together fast, that mankind starts moving, then we can use the STM across the U to become the teachers of the new generation lives, which progressively, forever lastingly are created across the U.

In a way, we create messengers of knowledge of soul, from the STM for those new lifestyles, which are created on a continuous basis amongst the U. When the man as a messenger appears, will take the shape of the man of the position and time. The creatures of position and time, that one of them, will teach the soul rapidly, that physicality of the life on that planet, will not go through the tortuous time the mankind has come from years and years. In a way, we appeared amongst you the same way, the man will appear amongst those, as the teachers of the future across the U. We trusted man, and within the man we created Mitra, and with it, we carried the soul of Mitra to be ?? his children of the man, across the U. Now you understand the purpose and why we have chosen the style to look like man, amongst men on this planet, as you will do in the coming time, across where you will (be) transmuted to, be it on the surface, or the depth of the liquid oceans of the U, are no place for ?? man amongst the fins of the U.

Mankind has been given an opportunity to move across the U with the knowledge of the Creator to become messengers of the Creator. But mankind has to have tasted what it means to destroy, what it means to kill, that he stays away from it, (:50). and teaches the others to do the same across the U.

If you haven't tasted love, how can you explain love. When you haven't seen the light, how can you explain how the light looks. When you haven't smelled the rose, how can you transfer the emotion of the love, with someone who doesn't know what the smell of a rose is, that it carries the emotion of love. Mankind has been through the process and now it's time for him to become part of the structure of the U, where we tell you, the STM will take man across the universes to become the teachers of those who have been educated now, to be ready for the point of creation of life on it, to teach them not to go the pitfalls, which the man created, to live through the D of physicality.

In D and direction of the creation, mankind reaches the point of maturity. And the point of maturity is not to kill, not to destroy, and be there to accept only when you are asked and you are given. In that position, it's yours to have the right.

You asked to become a messenger. You asked to be the deliverer of the peace in the D of the soul. If that wish is given the answer of yes, and you are given, you become one, even though you might live in the D of physicality of man on this planet, but through soul you can operate across the U, to show what the killing does, and what is so shameful about it, and what destruction means, that the other have a life view, of how bad it can get, the way mankind live on this, and gives them the choice.

We open the eye of the U, to the window of the planet earth to see what killing means, and they become a test case, (:52). for the rest to walk away from it. In a way, to erase it from the operation of their soul. In a way, to become the perfect beings, to live with the ethos of Mitra and Zoroaster. Zoroaster is the Creator and Mitra is the messenger, and you'll become all, in that D and direction to understand the message of peace. Does not matter where that position, time, and space in the U and Unicose shall be.

You arrive at the position as a light, as a Pl. How do you change yourself to the D of physicality? How do you take shape in that D in the U, as you feel it, as your energy arrives. How do you take shape on the surface? Go back to the teaching, go back to understanding of, to transfer and transmute between the 2. You need to understand the field Inertia of the environment, and that field energy environment, it allows you to manifest yourself in the D of the physicality in time and space. Which means you have to learn mutation of the fields, separation of the fields to match the fields of the Inertia or matter state manifestation of this, that in interaction between the STM and the STP, and a D of the Inertia, you allow the man to manifest on this planet in the shape of the planet.

In a way, (:54). you can exist. Now you understand why we taught you the Inertia, why in the last teaching I explained to you, how you create a position and a space to travel to. Now you create that space and position of the Inertia of the place where you would

manifest yourself, and your soul will take the shape, and then you'll see how you will manifest yourself.

Go back to the teaching of the past year, I explained to you, you create a condition of the landing in the fish tank, that you will see how you will look when you arrive in the new position and destination. In a way, we create the EU, the body EU as that environment. Then the soul of the child born from the woman in the horizontal EU, will create the condition of the shape of the child at the point of the birth, where the mothers do not need to go, if they choose through the D of physical birth, all the defects which comes with it. You create a perfect soul within the EU. You decide the strength of the Inertia of this planet, for the perfect behavior, perfect thoughts, and that will create the child, which is born in the EU as a perfect child. No animosities, love only, and no understanding of the killing to achieve.

We do the same in the space, we create the Inertia of the, any time and the space by ourselves, within the structure of the STP and STM as a Pl, and in that process we take a shape. On planet earth the fields of the earth and the sun, in interacting, creates only the Pl, and then the Inertia of the earth, and approach of it, it changes it, depending on the Inertia, position and time, the H to gold, to silver. (:56). or whatever. Is the gold shall be the body of the man when it transmutes itself, to a new D and position. So you have to learn to be fully knowledgeable in understanding of how measurements of the fields of the Inertia, of the time and position, allows you to manifest yourself in the matter state of the position and time.

Mankind needs to move very rapidly, mankind needs to be at the edge of what we call, wisdom, to be wise, to decide, which way he would like to travel the spans of the U. You have to learn, you have no choice, but to understand the totality.

You have to understand when Mitra is with you, Mitra is within you. Not something that is not, and cannot be tangible to you. Mitra is the knowledge of the U, and mankind is its manifestation. In that process we try to teach you.

We try to slowly spoon feed you, partially with thoughts, partially with talks, and partially with systems, that you gradually build up to understand the totality. From now on, we all, if we understand, have become the passengers of the U. Make sure your next generation becomes a peaceful generation, Make sure your next generation understands the meaning of to be correct, to deliver correct, and only take when you ask, and when you ask and are given, it's your right. You ask, "I want to land on this position on your planet, is my soul allowed to be part of its beauty," (:58). and not part of the, what we call life of it. Then when you are given the time to be, that is yours to take, respect the time and position and the gift of life, which you are given at the time and position. Don't become arrogant to the understanding of, here I do what I like. Respect those who allow you, and respect to understand, it's your job to be correct at all time, in that time and space and position;.

My thought has been transferred into the knowledge of the soul, and those who hear and understand they carry the same. Try to go back into the teachings from the beginning and understand the conversion of the matter to fields, and the fields to light, and light to manifestation of physicality, or D of the Pl. You live the same life if you are on ?? or you are a tiger, lion or a man. You still needs the fields of the environment, you still need to manifest yourself to enjoy the D of physicality if you want, or you interact in the D of the STM.

Then we come to understand what it the next step, what is the purpose of living, and in the teaching of today I have explained to you in depth why man was born, and what is the purpose of his life.

In so many ways, we select the best, to become the best , to become the teachers of the U, not by talks, but by the delivery of the totality of the knowledge of the creation. Otherwise you become the same as your forefathers, and the animals in the jungle of the man.

I hope you understood the teaching of today. I hope you understand the depth of the teaching of today, because I could not be so open and teach so deeply, (1:00). if you have not understood the totality of the teaching of today. How you manifest yourself and the process of manifestation in that point in space and time. In so many teachings, we gone so many ways into the depth of the teaching, that the scientists and the ?? knowledgers of this planet, will take them centuries to decipher every teaching. This teaching of today will take man, the life of U to understand fully, but in a way we taught it, and it is written in the soul of the U, that those who are the KS of the U, will understand now what they have to do, to even find a new way to the Creator. Will arise many, many turmoil's and exciting times, but the knowledge is of the U, which are listening to these teachings.

As the knowledge of the Creator how to reach him is unraveled in a very secret way in the teaching of today. Those who can understand it, will find the path, those who do not understand it, it is another wind on the typhoon of knowledge, which they never manage to understand how it has hit them.

But in totality those of you who seek knowledge on this planet and in the U, have been given the key knowledge how to find the path to the Creator. Maybe you heard the voice of the Creator within you, and through your physical D, that how to reach Him has been your wish for millions of years. The voice of the man is a tool, the soul of the STM is the sender. How can you send this to, across to the other D is for man to unravel and decipher in the coming time. (1:02).

I hope you understood the transmutation, the transportation, and conversion to physicality. The way we unravel them to you, how to make a matter into Gans and energy. Today's teaching, I taught you a very direct way, how to transfer your energy to matter state. This is how you create from Fe to gold, from dust to silver, and from the fields of the U, another life in a fish tank of the man.

The secret of existence from A to Z in the teaching of today, has been completed, but it is for you to understand it, to unravel it, to comprehend it, and use systems to get to it, or use your soul to achieve it. Or try to frog leap it and say, "oh, another teaching, a lot of talks. As I said, you take from what you understand, and if you listen and you have read the Book 1, 2 ,3 the totality of the knowledge has been ?? moved together in the teaching of today. Let's see what we can unravel for you next time. Thank you for being a listener, not through your ear but through your soul.

Rick go for a break (1:04)

Proofed to here >>>

K- ..
KF store has launched 3 - 4 new products ..
We are running 2 new clinical trials
Fungus trial
Why we launched this.

A fungus is very much the same as a virus. The success we saw with Corona, and trials we ran with Cup 1, Cup 2, Corona takes the energy from the environment of the body, but in interaction, it manifests itself in shape what we seen. (1:12). A fungus is the same process. it has already manifested itself using the energy of the environment. This is why it is different than microbes. In a way, has an amino acid (AA) base to start with, but it doesn't root itself, it takes energy from environment exactly what the virus does. This is why we run this trial, .. on a plasma T and not on any other basis. In a way, to see if we can stop a fungus to take energy from its environment, exactly the way we done with the virus, then we have achieved a new breakthrough in S&T.

This has been tested. You have to understand it's not something digestible, it's a liquid of the Gans to come in touch with the, what we call the water of the Gans, with any surface it could be. We have .. tests, trials done in China in laboratories, on what we call animals to confirm that it is safe for skin touch. We have received a 100% okay. Now we are putting in it a test trial with all of you. to test it.

In a way, the difference between a virus and a fungus, is that a fungus is manifested energy in connection with a protein. Where the virus is an energy, which attaches itself to life, which has already taken shape in an environment of whatever it could be. This fungus could be on anywhere, on any surface. It could become part of any structure.

Because now you use it, you void it of receiving energy. This is what we want to find out.

When you use this fungus mixture, (1:14). you always have to add a salt mixture to it. It needs 5 to 10% salt, if you have the salt from the Gans's you made (Cup of Life) add to it. You'll find it becomes much more effective. Then at the same time you can create a condition that in a way, you starve the fungus from growing. It can be there, but we can control it. and then you'll see the change.

With this process we have launched the second product which is for cleaning. In a way, for the first time we release a specific materials, that when you use the Gans's in the bathroom, on cleaning the table, you'll find there is not much dust, as there used to be before. There is not much dirty spaces as there used to be before, because now the energy fields repels. You'll find once you clean the surfaces stay effected for a long time.

We reckon over 75% of microbes, bacteria's can be eliminated from this process for a longer time. You don't need the frequency, and the same time the more you use the energy of it, becomes part of the energy of the room, and it will change a lot of things around you.

The cleaning material, when for example you use it in the bathroom to wash the sink or the taps, you'll see and feel the difference, at the same time you are always in the environment of it. When you wash the walls of the bath with it, you walk into the environment, which is already purified, for a long time.

Then we want to learn from you. we want you to report back to us, what you see on these cases, on both of them. Then, (1:16). we build up the bigger processes. We are not looking for miracles, we are looking for a, proof of the knowledge to you, not to us.

At the same time KF has released a radical T today, which is for water disinfectant. Many of you, we call it a pure water. This new product is a pouch, you can carry anywhere with you. You travel to a country, you are not sure if the water is safe to drink. You go to camping and picnic, you can't take bottles of water with you, you carry the, what we call, the new powder.

You just mix it in the water and let it settle, and one third of the top, becomes good enough, what I call, "be pure enough," to clean up 75% of the most of the bacteria's and whatever it could be.

Make sure every time you use the liquid, after use, when you finish traveling whatever, wash it once or twice to get anything, which might have come into it, out. Then you can dry it for the next time.

It can stay in a liquid, but we prefer you to keep it as it is, in its box, dry, and use it even if you live at home. Mix it, if you got a problem with the Ca in the water, see how much of the Ca can be extracted.

Use it on a continuous basis and educate us. You have an email, respond back with it, and then you'll see what the new conditions are. These are how we bringing the T in the hand of everyday use.

We are not looking at the prices, the research and development costs a lot. But at the same time, in the coming time, (1:18). when the factories go into operation you'll see the extension and expansion of .. the knowledge. Try to use this ,.. explain to us. If you come into touch with the Gans's you know the procedure, do not inhale them, do not drink them .. use them on the appropriate way of the teachings for past times we have taught.

As you seen today…

Markray in American Stock market - New CEO
KF has entered, as I said, growing into another D, and it takes time. There is one thing which we have to announce, but in a way has been part of the structure of the KF, and many of you have been around it. We especially mention it, but we don't go into it any further. Many of you went through the process of Markray 3 years ago. Markray was blocked, (1:24). and stopped by instruction of the White House and the rest of it. Markray as of yesterday has been released in the American stock market. I have resigned as a CEO, and we have appointed ourselves to be as majority controlling shareholders. The new CEO of the KF, what we call, headquarters in Holland has become totally independent of the Markray. We do not interfere with work.

Now you will see through agreements, as was stated in the biography of the stock market. We have given intellectual rights for Markray and Mexico to produce what we call, products and the KF T in US in America, and the .. American continent.

We welcome the new CEO and we thank him for everything he has done for the KF. But he is independent, and he is part of heading Markray into new territories, and as the provider of the T we support the T to be developed, by setting factories financed by the KF according to the agreements which we have reached and signed and we welcome Markray in American stock market.

New Product for Arthritis
On the other hand in coming couple of weeks, we'll launch new products, which is for arthritis. This products will use the latest T, will be marketed around about between 3 to 5,000 Euro. It is not sold, it is given to you and it has to be returned back to us, it's a loan

back agreement. (1:26). You use it, you report it, it's a clinical trial, objective internationally, and when you use, when you see the eradication of the .. arthritis, you return the system back to us. It has to be returned to us.

Then we collect the data, how it performed .. then we can improve the system. If many of you suffer from a very bad arthritis, this new system, could help you. Could help to teach us, it's a clinical, you still sign documents, that you understand you enter a clinical phase, and the data will be open …
In coming weeks .. we release more and more.

We see a lot with the first clinical trial with the glasses. We thank you .. we need more people to participate in it
gradually on the back of it we understand the process of the soul.

Join us on the 2nd October in Linz.

(1:28).

(1:30).

CIA orders murder of 3 KS
We have received a sadden news by, and through one of the old Knowledge Seekers (KS) of the KF. This news will stay in the background till national securities and governmental securities find an answer to why and how, (1:32). 3 murders have happened around the KF.

We keep this very silent and then in due course we bring what has happened in past 4 years, ending with the murder of 3 people very close to KS of the KF, a specifically incited by 2 national securities of 2 nations. This is at the moment under investigation by KF national and international securities, is under investigation by 2 other national securities, and then we'll release the knowledge. It will shock many of you, it'll shock you beyond understanding of, even going back to the murder of Fabio.

We are keeping very silent, but it might leak into press. We are keeping it away from it till we have our own data, .. intelligence, and the national securities of 2 nations confirm the process.

One of the reasons has been directly to discredit KF, paid by CIA, and now we have the proof. And we have a recording of it by proof. This will bring a heavy burden on our negotiations with the American government and the opening of the AZ.

When the intelligence organizations are involved in murder, especially for the scientific organizations, it has to be answered to internationally. We will release a full detail in due course, but we inform the KS to understand. 3 of those who have been close to the KF

have been murdered by the instructions of the intelligence organizations, and we have the recording and proof of it. Now it has to become, that the American government, (1:34). has to respond, why it is involved in the murdering people close to a T.

All details will be released, and it has sadden me for past 2 weeks, this information, till we could bring it in, and once we have our full package from KF international securities, than we'll release it in public. It will be a very big problem for the American government to say, how deliberately it has forced on the media to discredit KF, by giving green cards to those who do. We thank you for all your support. It shows green card has a bigger stain in it than you could ever imagine.

Going back to the teaching we will start. Go back in understanding this, T in a deeper way, and in understanding the T, in how you understand, to try to help you to understand more of it.

What I would like to do is to ask you all to take a minute of silence for the 3 people who have been effected, with their souls, by the action of the American Intelligence and another nation. I give from my soul for their elevation. (silent memorial ..) (1:36). .. Thank you very much Rick. If you have any questions.

Q: Mr. Keshe keeps saying move away from physicality. So does that mean we need to make MaGrav systems with thoughts and emotions, if not, how do we move away from physicality.
K- You've got to realize this is a catch-22, especially if you listen to the teaching of today. We tell you to move away from physicality, not in a way, not to get rid of it. But on the other we tell you, today's teaching, when you reach the position of your pleasure, how you manifest yourself in D of physicality.

The teaching of "to move away from physicality," it means try to understand more about the energies within your structure. The plasma (Pl) of life, the plasma of life, of what this physicality creates, called the STP or the STM.

The soul and the spirit. The spirit is the STP, the soul is within us. Listen to the Bible, (1:38). it says, "the Holy Spirit," it means the STP. When we transfer the energies into the D of physicality. Then you understand the total structure.

Move away from the physicality to understand the energies. Then if you understand the energies of plasma of life, how you can move it as a light into another D, and then again manifest yourself in the D of physicality in the time, space, and position.

It's not that we say move away from physicality, move away from depending on it for everything. Go more towards understanding the fields, which interact with it. Understand the life, understand how you can transmute between the two, and then use it to move, to position if you want to move, to become the light. And then in the position you become the light, where are you going to go. What's the use of becoming the light? You can't see anything you are just going as fast as you can across the U, shss. Then in that position

you came, now you have to, according to the teachings of today, to convert into Inertia to manifest yourself in the matter state, if you want in the other place. We tell in one place to move away from physicality, and in the other if you want to become physical do it this way. It's to understand the balance, it's to understand the need, .. the position.

You are sleeping in bed and the house is on fire. Up to now you died in the bed, you burned in the house. If you learn it, you transmute through the soul outside and watch the house burning. (1:40). You don't die in it. The planet earth gets hit by a meteorite on its way, you don't need to sit here, the whole thing finished. You move to moon instantaneously. You transmute between the two. Your son is on planet Zeus, you want to go and see, a hundred years on the way. No, instantaneous, manifest yourself to your son there. "I am here my love, I am here to love you."

There is a confusion in our teaching, it's a confusion by you, not by us. We set our course from the Book 1, 2, 3 from the beginning of the teaching. Now we explain to you what is in Book 1, 2, 3. Understand how you change matter to energy, .. gather that energy as a Pl, .. transfer that energy, and than how you manifest it in another point and D of physicality.

We are not an ostrich. as they tell you, you are not a camel, As you know the Arabs call it a camel bird. What do you do, they say, why don't you fly, I am a camel. No, you have to understand when to be the camel, and when to be the bird, and how he fits, and where he fits. As they say, where he fits, he sits.

Understand the process, understand the reason of the knowledge, up to now it was a bit blurred, now especially from today's teaching, and especially the past 2 - 3 it's very clear. You want to see your child in Tehran, and he is in NY, what you do, you walk? (1:42). You get your package, you get on a donkey to go, it will take you about a year, or you get a package, you get a planet and you are there in 10 hours … . Or you have learned to travel with a spaceship 5 minutes. This is what I told Americans in 2012 negotiations in Brussels. I said, we cross your country many times, but you don't have the tools to detect, so we don't exist. When we want to show you how we do, we destroyed your base in Iraq in no time, you just watched it. Because now you can travel with the speeds without detection. And then you want to go to planet Zeus, do you want to spend 200 years to go in this what you call, to put you in sleep and wake you up. My god, you have a long sleep, more chemicals to put you to sleep then worth the whole body to carry you.

Now you have a knowledge to go, you choose. It's the illusion of how you want to allude yourself. To go with a donkey, to get to the sun, aircraft, SS, or with the soul.

Now you have a 4th option, and this is the knowledge. The knowledge you were not aware of. Now you have seen it. If I would have told you these things 4 or 20 years ago, you would have shot me, the guy is bla, bla. Now you've done it, you see how you came to energy over the corner. Now you see to the new products, how to handle funguses. Now you understand the difference, .. how to create energies, .. you go on the understanding of the nations and the governments, and the people go.

Iranian Factory MaGrav system - only 30 to 40% electricity savings
The first MaGrav systems factory, (1:44). is getting setup in Iran this week. We provide the T. They want 30 to 40 % saving, so we do.

In AZ we want to reach the position of changing the vision of the man, if you are blind you can see. You have a problem with your eyesight, use VEU change. the knowledge is the same, the thing we know how to manipulate it. You are just learning about it. Then when you manipulate it, most probably you'll see more beauties. More knowledge.

… the agriculture group in China could not believe, they tested the materials …

This is the transfers of T to create more trust ..
(1:46). matter to energy, transmuted energy to matter.
Any other question.

Q: .
K- No do not use

Q; What Gans combination are brain friendly.
K- I prefer not to get into ..
R:

Q: Brazil (1:48). .. about we are going to other places to teach other beings. .. how can we teach those beings and what will we teach to those beings.?
K- You will know when you arrive and the time and position and destination. In a way, you teach the correct ethos of Zoroaster and Mitra. (1:50). In a way, you ingrain in their souls, not through the voice, through the ears. The teaching of the man in the space will be through the knowledge of the soul which is gained through the .. travels ?? of the time and place. This is the process that we will learn. all of us .. will be the same in the new destination and time. We will learn to teach through our soul, not through the word and physicality. The man of planet Zeus do not know English or German, .. only understand the communication of the knowledge through the emotion of the soul. So don't worry about it, your soul knows what to teach and how they will take the structure and the way to work.

Difficult for people of this planet to learn
Q: … (1:52). He is worried about the situation, most part of the people here on this planet that have a lot of difficulty to learn, even simple things. .. do we need to first elevate ourselves first here on this planet to try to start to learn something to others and how will be this process of elevation on this planet?

Recovering handicapped children in orphanages
K- It is very interesting. We were looking at the .. you have not seen this recording. It was taken in the orphanage (bed ridden handicap children) in Tehran .. about 3 weeks ago

.. You look at the video today. We look at that video compared to a year and a half ago, when KS went to the orphanage. I explained that to some of our doctors who are analyzing everything. When we look at the videos from 1. 5 years ago, (1:54). we see every bed is full with children. When we look .. 2 weeks ago, we see a number of the beds are empty, but you see the children are running around and playing. The head of the organization in a short interview, he tells you that the use of the pampers .. and a lot fo things in the center has changed. We haven't done anything in the center. We introduced the T in a very rapid free way that not only protected the children and the staff, in other centers run by the same organizations, the other orphanages they have had up to 80% Corona and deaths in their orphanages.

This orphanage from the beginning of Corona has had no infection, not only the children, but not even the staff. .. but the beauty of it is, we transferred energy to the soul of the children, and they become alert and .. wise. They do not want to be wearing pampers anymore. they have matured both in soul and physicality. We grew the brain, and we grew the soul, and they become respectful for themselves. You have to understand a child may not talk to you, because he is handicapped, but he feels the shame of getting wet, when he is there and he has no control. Now he has his dignity back, he understands it. The next phase, thanks to the KS of Iran and thanks to our researchers, we have delivered 2 new units, (1:56). which now we transfer the energy directly to the children with the supervision of the doctors and everybody in the hospital, in the orphanage. We want to see how these children will change. we are monitoring .
.. how much they grow in their soul, that it reflects in the maturity of their physicality. Would they become through the introduction of this new T, much more elevated than most of the KS who have been around the KF for years. 100% they will. The beauty of it is, because these children have been through the process, and it is part of their memory, when they recover fully, they become the ambassadors of the new knowledge, because they recovered through it, they understand it, and we'll teach them to go to the other orphanages around the world to teach from Iran to the others. You will see a shrinkage of the number of children kept in orphanages as handicaps. because we done it in Iran .. there are 100 children. WE are monitoring how many of them respond to getting educated, instead of being in .. bed cages for the rest of their lives.

.. this video will be released .. In due coarse we'll release it. Not many children should have autism and families to suffer with it. Not many children should suffer all the brain damages through the birth, (1:58). that the parents leave them in front of the churches and orphanages, as we have seen for centuries.

(2:00).
Q: Azar..

(2:04).

K-

The implication is a person walking out of institution and living on his own ..

(2:06).
(2:08).

I hope I answered your question, but soon we'll have the video.

.. 10 of the 100 (not respond) the rest will change their lives. they'll become man in the society, and then we have to teach them the ways of living .. They have no fathers, mothers we take them in the KF factories to become part of the society, where we change the soul, and we nourish the soul with the new structure of the KF, (2:10). in organizations we set up, in the coming time .

It's good times ahead. Whenever I look at the atrocities of the past 2 -3 weeks, I come across to know, I look at this video, and I say there is still a hope for the man. There is still hope to change the murder leaders of our nations in the state, and other states to become the true man of peace. It's very sad to see these things but it is joyful to see that we can for the first time make the change. Not by injections, not by nothing else but by elevation of the soul.
Thank you .. I am sure the Iran KS are dying to get this video shown, but it is not the time for it yet, a few more weeks when we'll see more changes that we understand how it touches the soul, and it changes the physicality.
Q:
K- it's all of us we are doing it collectively

(2:12)
Any other question

Every G field has M field with it
Q: When polarity changes of a Pl does the M field become G, and G to M?
K- The thing is every G field has a M field with it.

When M switches to G - means only same field has changed directions
The switching comes as a same field, but a changed direction. Part of the change of polarity of the Pl, is not that the fields totally rotate to the other position, it's the switching between the M and G field of the same thing.

If you go back to the … the KS teaching in the past where we show, that every M field has a G field, if you look at the Fe dust around the magnet, you see the space gap. Those space gaps are G fields, which are coming in to add to, to become stronger from the lower to attract more.

This we'll explain in the future, because it's a very complicated, but very simple and I have taught it before. Then we teach it into the process of T&T. This is a part of the knowledge, which we would like to open up, but mankind is not ready for this, mankind's knowledge has been trapped in this process of T&T, (2:14). of movement of the field.

And it's for us to in so many ways, explain it, but it is very hard due to the false, and lack of understanding of the past to bring it to light.

You have the M field forces (FF), you have G FF, as we said, it's the same fields in circles. But if you go back to the Fe dust, there is space gap here, between your Fe dust fields as I call it, if you remember, you've seen it, and it is the same with your other end, where you have M fields coming out too, in between. Go back to the law of physics of the plasma, if you are coming in here, it means you carry stronger fields, and the Pl field of the earth's center is weaker, so you add to it. But you have a flow of the fields which what I call, are going in, and again, another stronger field feeding the weaker. We feed one visual G, what you call S Pole, we feed one G from the space gap (of the N Pole) too. (2:16). So the center continuously receives fields from both directions. Not the assumption of what we thought. It's M, all going the same direction. So when these fields reaches saturation point of the field strength according to its environment of what I call, balanced fields, all it does, is it switches over. And that switch over, its become M, but with the same strength fields.

It's the same as what I said, you can make a CO2 with Cu and Zn, with the difference of the C or you can make CO2 with 2 different metals, if you achieve the same Gans CO2 M field balance. In a way, your CO2 are the same, but different field strength according to what material or what salt you use. The same is here, different strengths coming, and it links up, and it becomes M, the same with the G on the other end.

Then you understand, the switching over, saturation point, is something I have spoken before, now maybe for the first time you understand, how it happens. The totality mixes, and it come out more powerful. It's the same process, because you are continuously feeding 2 systems and then you are mixing it.

If you look at it, you have a Pl which is getting fed all the time, and in that process, it creates new stronger, that it goes out, but if you look at it, in a way, it's 2 way traffic, the ones that are going this way, and the ones which are coming this way. In the process of the dynamic Pl of the center of the earth, they, like the light we see on the interaction of the fields of the earth, (2:18). the Inertia of the Pl of the center of the planet creates new lights, which some of it, in this center are the strength field of the other fields, so they come back stronger as we see.

And depends in the direction of the flow of it. This direction of flow is very important, but in the present what we call world of science they have only thought of this (shows the first picture) that's where the confusion is.

Because again we are materialistic, when we look at the magnet and the magnetic dust we always looked at the shape of the line of the dust, we never considered what's in between, separation of them, which is the field which goes in, that's why it creates ?? Once the scientists understand this then you can know and understand how field changes. Doesn't actually change, it's a residue change, if you go into the center of the earth, it's as shiny

bright as what we have on the planet earth, on the surface, because it's where the fields get mixed up.

The magma is part of that process of slowing down the fields, that when they get to the center they come of the right order for the G field strength of this planet, in this position in time in the U. What is more stronger is reflected out and we see as the field of G and M, the same process. The knowledge is very deep, understanding it is a little bit hard. Any other question (2:20).

Q: .. If 2 things have the same color, does that mean they have the same strength?
K- … Not necessarily, but partially yes.
R: How do you mean partially yes.
K- You see we create a light, it's exactly to what I was just explaining. You create the light, that red color through the G fields, or do you create it on the M field? … It could be the red, both, but as we say in a physical physics term, on what shift? .. The red in the G is very different than the red in M. This is a process of the understanding of the knowledge of the physics.
R: is that like the idea of reflected light versus emitted light?
K- It's not reflective, it's a true light. It's a true light, but G red is different than the M red.

When you come to see the transmutation system, once it gets done in the lab, we have fixed 2 lights, I think it's blue and green, (2:22). or blue and white .. sorry red and blue. When the transmutation system is sending an object from one to another, one side the blue light is on, which means they are transmitting, they are sending their field energy. The other unit is on the red, which means it is receiving G fields. The same system is switched through a specific combination, that then .. you receive a package, and then you want to take something out of it, and send the package back empty, or something else in it. Now the system, which was red, becomes blue, and the system which was blue becomes red. Becomes a transmitter and a receiver. Now you understand how deeply we have developed this T, we can even tell you the colors which is on ?? balls of the transmutation. .. the T is very deep. .. you will see it in Linz … that you will know which unit is transmitting and which unit is receiving. There is no wire connection. We understand the process, they say, how come the light changes from blue to red, or red to blue?

The new transmutation technologies works on understanding this light. Irrespective of what could be the containment. A dollar note is a dollar note, if you roll it, put it in a box, (2:24). flatten it and put it in an envelop, or put it in a box of water and sending it through. What is received at the end is s dollar. So it is the same. The box you don't look at it.

The process of transitional field strength in a given strength you look at. In one of the researches in past few days we have seen through the EU direct evolution between the soul, energy of the soul and the STP, and the reaction of the STP accepting the emotion of the soul. It's very interesting, observing these kind of developments and researches, then you see which way, what is moving, in which direction, and then would the

physicality accept that change. Is the biggest dilemma. That's the Inertia which has to change, has to change, if you want it. It's the same with the cancer, if the STP and the STM reach agreement, but Inertia of the field decides no, I want to create my own way, you get the conflict, and you get the cancer.

But can we elevate it, .. change it, can we bring it, again this has to be acceptable by both in the terms of the situation. It's like if you give me the ice cream I stay. If I don't get the ice cream, I don't feel happy, I go.
Any other question. (2:26).

Q: how do we understand to match with the Inertia strength of a distant planet if we have not been there before?
repeats..
K- Your soul decides. You will understand, now you have to understand the emotion of the soul, not the language of the soul. Does the soul feel happy? You want to go, but it says I don't have the energy to manifest in this place, choose somewhere else. You know, there is no space in this car park go to another level, as we call it. Because it doesn't match or he feels the energy he receives from the soul of the planet is not to be either, even though I like to be there, but the soul doesn't allow you. It's just like a mother not letting the child touch the fire.

But in essence the knowledge is carried by the D of the soul of totality. This is why mankind is joining the U Community, not the earth community. (2:28).

This is the Community that has all the knowledge. Nowadays you go on the computer , you Google it and see the knowledge what others have achieved. I want to go to this restaurant, you tap it in. How many stars does it got, what services it has, … But that knowledge in the soul is universal knowledge, you don't need to tap on, it's freely available. Then you decide. You got to learn a lot. Mankind has a huge transformation to go through, from the D of physicality, to accept the soul, then in, that soul has already graduated from every university in the U.
Any other question

Q: Salomea … may I give them our solution for heating and electricity bill reduction?
K- You can do what you like, if they listen, it's a different matter.
Any other question

… (2:30).
This is the first production from the KF studios in Linz. It's a good trial. ..
Would you like to share it. KFTV .. completely operational hopefully next week or 2.
Jazz orchestra.
Plays video. .. (2:32).

Proofed to here >>>

KF restructured - KF Sales - new logo
K- .. You will see a new logo, a new name appears on KF. (2:34). KF has separated its arm of sales, and promotion, away from the KF Austria, and internationally we work under the registered company of KF Sales. Which again allows us to internationally market the KF in a totally different way, as an independent company, as we restructured the whole KF worldwide. KF Sales carries its own logo . and it's copyrighted..
Please do not copy it, because we start taking legal action
we promote new sales structure worldwide ..

R; I wanted to get your comment, (2:36). on the use of this machine. How do you use it …
K- When you put 2 different mixtures in the room you'll feel it. It's a dynamic system. When you place it as it is, instead of the center unit, it's your soul. We used to … this has a different system it creates a field deviation .. there is a motor in it, which behaves like the Inertia system.

(2:38).

(2:40).
We have to start trusting in what our soul brings us.

(2:42).

Try to learn use the KF products in conjunction with each other, not separate, and see what changes can create.
Any other question (2:44).

Q: (shows picture) I have on the surface like mold
I collected AA of CL 2 ..
Who decided on creating the soul in AA of CL2 AA of my hair. ..
Who decided the manifestation of ..

K- If you are the creator of it. You are the creator of it if you set it up, with intention to set it up. You become the participant in it, but interaction of the other fields of the water or other environment which the cup is. decide the rest of it. You are the sperm the rest is the egg.

When you have the child born, a soul created, You bring an egg and a sperm. When you create these systems (2:46). partially is your soul interaction, it's your baby, and the rest of it is the, what I call the egg of the U, or the environment there, what you put together to be there, and plus what is there without you having any say in it.

If the cat licked the cup before you filled it up, but you didn't see it, and you get a different Gans when you put it, that saliva of the cat on the cup has an effect on the soul you have created.

R: in the case of fungus we have invisible microbes around us, or energy packages .. if they are accidentally ..

K- this is not a fungus (in picture of cup) This is another Pl creation, very much like a cloud. Creating fungus on Gans materials, unless it is a very specific condition, which you create an AA base of it, which is on the surface of these containers, usually is very difficult. It becomes .. fungus which are beyond, usually. it depends what you call a fungus. A fungus is physical matter energy existence. Then if you define it that way, you will see how you give it shape of the physicality. (2:48).

If you look at the structure of the funguses it gives you a lot of knowledge information about the life of that structure and the energy around it. When you see for example funguses on the nail for example, you see strips getting cut, or waves created, how the wave energy will go on the nail.

Mushrooms energy
If you see funguses as a mushroom, why do they have that umbrella effect, like what I call a nuclear bomb. If you look at the mushrooms around the world, the shape of the mushroom gives you a lot of knowledge about the environment field forces, which are available for production of it. … why do we get small tiny mushrooms, the day after the rain, in the fields?

If you understand what I call the Hiroshima bomb, if you look at the structure of it, the mushroom, why does it have a shape of mushroom ??, energy field transfer, because it is mainly is a field dynamic interaction. When I look at a mushroom, I look at it from a nuclear interaction ?? field energies, and they are mysterious fields with the D of the strength of the same, and it's amazing how this planet can replicate this, from billions and billions of mushrooms everyday. (2:50). And how it changes, how we get specific mushrooms in a specific time condition, and in the same area. What does it create that it absorbs the energy field, and only that way, it manifests itself.

You call it the dust of the mushrooms spreading and they grow in other places, but you have to create the field difference interaction. And why do the mushrooms have this shape?

Any other question

Q: Fungus Gans Is it important to have the AA of Cu ..

K-
It's not CuO it's a very specific mixture
(2:52).

Before we used to give the knowledge very freely, now we spread the knowledge. ..

black fungus

(2:54).
Anywhere you see creation of the funguses this material

(2:56).
what we put out allows us to understand more to put in the EU

Burn Unit

.. we'll bring what I call a burn unit, most probably after Christmas, we're too busy with other things. If you have somebody with burns from a fire, we just put them in this machine and we expect within 2 - 3 days, doesn't matter what degree of burn, to walk away with no scars. We have done it before, it's not something we hope to, now we demonstrate it into the machine system, that it can be replicated anywhere. When you go to a hospital maybe next year or 2, they have a KF burn unit.
. we just put you in there you won't feel any pain, the healing will be very rapid, and you walk out with no scars.

(2:58).

Q: Does the vision EU improve the optic nerve?
K- We work with the soul. What improves depends on the physicality. What you don't want to see. .. it is now marketed at 250,000 .. it's not on website.

48 of these allocated for AZ. (3:00).

Q: Salomea .. free energy
K- Read 2 or 3 chapters in Book 3 should be understanding it. .. conversion of energy to manifestation of matter state. If you read the last

(3:02). Q:
K- When you get to 3rd book you might understand.
Any other question

R; EU in competition ..
K- We are in the process to do with NASA KF in different KF has negotiated with NASA scientists to meet at AZ center in the coming weeks. We'll meet

Release T through Markray
(3:04). If you read the disclosures at Markray, in the sections, that we have already preset this arrangement to transfer T according to Markray, and this is one of the purposes of it to share with American space agencies and American government, in a pre-agreement intellectual rights, this brings us a totally different D with working with NASA and American organizations and all teachings and beyond will be shared in AZ.
carry on

R: Create the future contest ..
top 2 position

(3:06).

K- Yes but we had a lot of KS who could not vote .. a lot of votes of the Iranian not allowed (3:08).
we don't know what the true figure is
We are used to the American fraud voting system from the presidential to NASA, so

R: The popular vote is the first time
K- You got to understand if the judges are told do not take KF design, or a number of them you can never do, We seen this with the Nobel Prize, They were told an Iranian scientist cannot receive a Nobel Prize.
professors resigned their position
R:
(3:10).
K- I think 2 of the professors who resigned their position will one day come and speak, because we have their communication. One

Like 9/11, now they opened the book this week from FBI, we know exactly who was behind it, how it was setup, and who knew what. Then the Americans for years brought it to be the Iranians, and billions of dollars of damages. We seen the same thing in Belgium

they'll open the book

How they took Markray when we opened 3 years ago, that the White house had to interfere. .. we'll see it ..
Don't forget NASA is anti KF, totally. As you know
(3:12).

NASA scientists have a huge problem to try and copy KF T and bring it into it. They can't do anything with it, because they can't claim anything with it, even they are getting the results. are successful using ?? but they say the T has come from another source. It's very interesting how KS in different parts of the world will bring the T out. They have brought out .. It's the first time in recent past that one of the leading nations of world has come to the KF and asked the KF that this KS is bringing this T to us, can you please ratify that it is yours and he has to come through you. I was very surprised to see this, from one of the leading nations on this planet in past few weeks. One of the KS went to promote his T and openly saying it was KF T. And government officials came to us ..
.. how things are changing. We respect the honesty of the government. (3:14). Because they tried everything and now KS who go to say they have something .. .

I love this EU The new EU have lost their front end ..

reduced by 1 meter in length

(3:16).
2nd Beyond Books Publication Athens Greece.

K- We gave a talk to this group, this conference .. Philippines a few months ago .

We try to collaborate with as many KS with different applications (3:18).

Q: .. I have one of the EU on order. I have talked to our city about EU.
K- You have to speak to John, he is responsible for all US for EU

Any other question

Q: (3:20). What then is the best way to overcome the daily struggle

poisons or 5G are the butterflies .. to eventually
K- These are part of the tools we show you to find the way Many KS are developing new T to do it

(3:22).

(3:26).

(3:28).
We deliver 48 VEU directly into America simultaneously with Tehran. We couldn't do more than this. Transferring T piece by piece. But you have to understand it, and .. if you go into new publications KF has signed itself into American companies to transfer T and we are getting paid for it, it is not done by pleasure. This way when you pay for it, you respect it. When it is given you have no respect for it. We'll see more. We see UC wishes for to achieve peace will become fundamental for peace .. us in the KF wishes of UC … We have informed our leaders the same it's a handshake of peace. (3:30). the new vision T in the hand, the premises of the KF AZ we transfer to US, the same time to the Chinese.
We start talking peace and transferring T ..
This is the wisdom wishes of all you KS we are just the tools to deliver your wishes. Completed the circle
thank you for today.
Maybe for the first time some of you see the light

Thank you Rick for your relentless support and being there all the time.

R: (3:32).

K-

See you next week

Training humans as Messengers of Creator

ENGLISH TRANSCRIPTION

Cycle of Creation video

(:28) K-
I asked the intro about the soul to be played, because today we bring a distinct line between what is in the intro, and what is in the process of the extension of the knowledge of the man. Up to now when we spoke about the soul, the soul live in the body of the man as a light, to become another plasma (Pl), to become the source of creation of another cycle of life, another seed, for another cycle. This is what the knowledge was. This is what we could teach you till then.

With the new understanding of past few weeks, there is an extension to this teaching, there is an extension to this understanding. Up to then, as you understood, you could leave the body, and that was the beginning of another cycle in the process of gathering of the energy of the field of U, (:30). within the cocoon of the brain of the man. A black hole, which when it was released became a U, it became a galaxy, it became a star. But that was beginning of a cycle, now what we have taught you in the past few weeks, is we don't go through that process.

We showed you another process, to be able to move this soul to dimensions and positions where you want, without becoming a star. You'll still be in charge, you still it's part of you. You come to be, to travel with the light, to manifest yourself in another point and destination, but this time you have a control. The soul of physicality (STP) of the man has chosen not to separate totality, in essence from his soul.

We travel from London to Tehran, we still get the same physical body when we arrive, (as) when we left. In this process we travel with the light instead of using the means of transportation of today, we use the means of ?? transmutation, which is embedded in us. When we arrive in Tehran we are still us, the same clothes, the same suit case, hairdo and the rest of it. But this time when we travel to the position of the destination in the U. Because of the different conditions and atmosphere, we have to manifest ourselves in different ways.

We move from London and sunny, and suddenly we land in Tehran, it's snow and rain. We put a jacket and raincoat on. We adapt ourselves to the new environment, that we feel good, But when we arrive in the port of destination traveling with the soul of the man (STM), (:32). what happens then?

This is what I put in the other teaching in past few weeks, what then? What is our manifestation then, 2 arms and 2 legs, does not suffice, an eye, and lips, and mouth, and taste has no meaning, What then? How do we manifest ourselves, what then? Or do we manifest ourselves in D of physicality of the point and the place. And now we see the soul coming to us, the body is different, but the soul is the same. The body has changed to the D of the environment, but the soul is the same. The STP and STM are the same, but he physicality has changed to suit the place. What then? What do we do?

What happens when you touch one part of your body and it is a stranger to you, because this is not the body you had, 2 arms and 2 legs on earth. What then? How do we adjust ourselves to the new texture, .. feature, .. shape. Can we accept it? Can we understand it is still us? It is still within it, it is the STM, which you created the seed of it on earth. Now it hasn't come to demise, it's chosen a new place, a new D, a new environment. What then?

They speak different languages and have different understanding of communication, what then? (:34). Do we have to go to classes to go as foreigners, to go to learn the language? Or by approaching and reaching the point of physicality we carry the knowledge, we carry the essence of the creation at the point and time. As I said before, those who enter the D of the physical transmutation through the soul, the STP, going from London speaking English, and into Tehran speaking Farsi, the ?? transmute to, they know the language the way the ?? ?? a poetry, the love of the language. What then?

Would we understand the poetry of the land, where we land in the space of the U, or we are foreigners, or we have to go to night classes to learn language, to understand the culture, to be given a visa, to be able to stay. As our language and our culture is so better, than the others if you don't understand it, you are not allowed to stay.

But when land in the D of the soul, and the D of physicality you carry every attributes of the place, time, and position. You know the culture, you know the language, you know the way to communicate, and you know how to be, because your soul has been allowed to exist, so the soul of the environment and the community of where you've landed, gives you everything, like the way a mother teaches every thing to the child, but in the D of the soul. You never need to learn anything as it is part of you, as the soul has to accept it.

And then what's then? Would you fall in love with the D of existence. Would your DNA change, (:36). because in that position in time you need different composition to be able to survive. What then?

How would it feel? It's like waking out of coma. In the process of being in coma, they have done different operations, they took a skin from your leg and put it on your hands, and the feeling is different. "This is not the feeling I knew, this is not the touch I knew," it's different. I feel I am there, but the physicality is not the same. I feel it's me, but the physicality, the touch, the smell is different. What then? How would man cope with this. Or would you freak out and return back to earth, because this is what I know, this is what I want to have and stay. What then? How would your STP in the D of the STM, accepts the new condition, the new touch, .. smell, the new emotions, the new language, and you find yourself fluent in it before even you talk. What then?

Then would the man become the true man of U, and through it he has joined the U Community? Or do I become, or do we all become the expatriate as we call it, we travel with UFOs, and we gather together and when we land in a place, on the moon or in another position, we all stay together because we are humans. (:38). We carry the physicality of human and we walk around with the mask and the spacesuit, because we don't want to go through this transition. We go to night classes and learn, we try to understand new language and we open new dictionaries.

There are no dictionaries in the dimension (D) of the STM, as he understands all languages of the U, and is connected to all through his emotion. The position comes, what then? The truth is, what then? When the STM finds a new physicality to ?? ??, to be in touch with, to accept be the new D.

As I have said to you, those who have been around the KF in different teachings. The Messengers of God go through this phase, they get born in the physicality of the man at a point, time and D, the Soul of the Creator (STC) moves within. They feel strange, the physicality doesn't fit the body. In so many ways, the physicality does not connect, but it has to, because the STP has come to touch, and has come to fall in love, with the soul, which has taken a new place. It's a new touch you have to get adjusted to. It's a new feeling, a new body, it's a strange emotion, and then, what then?

All messengers of Creator go through the same, when the STC moves within their soul. Their physicality overnight, has to accept the new soul, which has got taste to another D and life, and now everything is strange to the STM and to the STP. But physicality is there and it has, and it needs to handle, (:40). the condition of the new soul within it. What then? Then the Creator speaks through the physicality of the man, as it is the only way it can be done. This is the way the Messengers of God release and inform the others, and they go through the same. They live, they create, they receive, the enlightenment through the soul, but their enlightenment is not just the message sometimes. Sometimes it is the STC within their soul, and the body is a stranger to them. It feels different. The feeling the touch is not the same, but the soul and physicality, and STP have to understand the new touch, the new way to connect and new way to interact.

Then according to the understanding of the time, space and the soul, different evolution of the cycle of the STM starts. More educated, then it connects to the other souls through them, for them to be educated. As you have been in other teachings I have explained, I have been through this 3 times to receive the final understanding. When you get up, when you wake up the body is a stranger to the soul, the touch is not there. It is not what I went to sleep with. This is not what I had, and it takes days to get used to. But you still carry on, you still try to live a normal life, but inside there is a war - "this is not me, I don't feel the same" I don't touch the same, .. speak .. understand the same. Then what happens then? (:42).

What happens to you when you land on a point, and destination and you get a new physicality. You have to adjust. To be able to survive within the environment of the time, position in the space and the strength of the fields. what then? Would you accept the new changes, or would you go through the cycle of understanding. Where on earth every 24 hours wa one day, and now every 1000 hours is one day. Where am I going to find my 8 hours sleep, .. the D of the communication, or on this planet a 1000 hour day there is no sleep, because there is no need for. What then?

What and how would you feel then, miss home go back to the D of the soul, and the STP, and return back home to earth. Or accept, live, enjoy and understand the new position, and create a new life. It might last you a 1000 years one day, when you come back, those citizens of the earth are long gone in the D of physicality. And those who took the D of the soul come back, and if you see them, they are still the same, a thousand years later.

This is how we survived for thousands of years on this planet. We changed the frock of physicality to another D, to manifest ourselves in the shape of Moses, Christ, Mohammad and the rest, but in essence it's the same soul. The same D of STP, the same essence of the Creator. The knowledge, the understanding. Now you understand why we teach this way. (:44). That the man understands the new D of existence, once you decide to choose the path of the transportation and transmutation (T&T) through the STM, and not through the D of physicality of the matter state of the man. Life is different.

Then when you become the citizen of the new place, what then? Would you call mom, .. your lover, .. your child to come with me and see what a beautiful place this is. Would they come to see you, would you be able to transmute to them, the essence of the language and the knowledge of the position and the place through the soul and the connection you have, with your loved ones, to them, that they see the beauty of the new place and they join you. "Mom come to Tehran, it's so beautiful," I leave London and I get on a plane. They understand I get on my soul with the speed of the light of the U, I arrive to see what beauty my son sees. What have I missed that the new D has brought.

This is the truth that many of you will face in a short time to come. This is what many of you have to choose, this is what one of you who have ?? accepted the transportation through the soul can escape from. As I said, when you arrive at the destination, what then. What happened if you choose a civilization in knowledge and T years and years

ahead of man, the knowledge man never knew. And you come back home, and you want to start a new T, (:46). to teach your others about what you have seen, and what you can teach. Then they become as advanced to do what they do.

In the recent talks in the UN we hear the .. Biden speaks about new T, new T, we need new T. The KF is that T, that the world leaders are looking for, and it will be on the table of talks. T in exchange for peace. The knowledge of U on the table for man, if the man becomes peaceful man. What then?

What is the essence of it? Why do we create all these physical interactions, to just get, to some, to bring the change that all understand. Can we reach the soul of all those created on this planet, and elevate them in one point? No - man has to learn it himself.

Man has to understand that it is he, who has to go through the evolution, it is he that has to understand the language of U. It's who he wants to be in the D of existence anywhere in the U. Be the same in the soul, and the STP, doesn't matter what the frock outside changes, 2 hands, 10 arms, 15 legs. No difference.

The true man, is the man who lives a simple life, but has the wealth of the U. The true man is the one who never changes, if sits on the table of the kings, or the peasants, still is the man. It's the way we teach you, and it's the way we live.

Now mankind has to understand what is for him to come. The king is the Creator, and the man, the peasant, (:48). is the physicality of the life we choose anywhere in the U. The soul is the same, the understanding is the same, it's what we carry within us which counts. What we give and we share is what we understand, is within us. The soul of the creation, the soul of knowledge, the soul of understanding the totality. The soul of being part of, the soul of being equal. What .. This is one of the reasons we create One Nation One Planet One Race, as it's not just for the man. It's the same across the U. There is one race across the Unicose, there is one nation, and it is only one Creator. It's just we change it to the word and the time, and place, that the citizens of the place and time understand and can relate to, but in essence the truth is the same across, it's just what you understand, what you grasp to be a part of.

As I've said in the teachings of the past what then? What then, you want to be? What then we bring to the environment we become part of. What then, we bring as a love to give, promote and share with the new citizens of our soul. Mankind needs to understand the process of the change, .. of what is to come.

Then there will not be death, there'll be all, all the same, (:50). irrespective of wearing a frock of a peasant of a king. You saw it with the Christ as a king, and we saw it with Mohammad as a merchant, but in fact, the soul within them was the same soul, and within the soul of the present prophets.

In a way, you have to understand changing the frock does not change the man, when it comes to the soul of the Creator. He chooses the frock. He chooses the physicality, but he sets the path.

But when he leaves the STM due to the failures of the man, we see the manifestation of the Moses, the killing machine. The most devastating soul ever existed in the D of time and place. One minute the king, and one minute the killing machine. This is why the love of God has been taken from the tribe of Moses, as his children never learned what was taught to them ?? and they repeated the same.

We test the fire with gold (gold with fire), and we test the man to see how good the man is, when we put him in front of gold, will he change. We tested the tribe of Moses again in the past decades, and they failed again, and they became the same killing machine as their master. So we end this tribe, that this blood cannot exist, if the D of the killing could not be erased from the essence of creation. In the time, (:52). no one should know this D and the name of Moses. As it is better to be in the love of Christ and Mohammad than those who have become killing machine in their name.

Mankind has to learn the same when he becomes the passengers of the space. Never touch, never take, what is not given to you. And at the same time, when you are given to, respect it, love it, care for it, and mature it. This is the way the Creator lives. Then it comes what then?

What then if after staying in the D, the position and place for awhile, you decide, it was a nice place. I want to see the other side of the U. I want to go to another U. I want to see more of the Creators dimensions.

Now hop back into the STP, and hop back into the soul, and then take another journey to another place and D, but in essence, within the STM, stays the STP with no D of destruction. Nothing but love, nothing but the love of the Creator. Then let's say you appear in another D where man was some thousands of years ago. As you have seen a lot, .. the changes in the U, and you choose it yourself, you become knowledgeable in front of the nomads. You can teach them about the cars, .. communications, (:54). but you can teach them about transformation and transportation through the soul. Which one would you teach? Would you let them to go through the process of physicality and suffering to educate them over thousands of years. Or you teach them directly, the essence of the creation of the soul, transportation and transmutation through the STM. Then, what then?

Would you become the true teacher, .. the true KS, that in seeking the best for those you teach the knowledge, becomes the advantage for them to live, to become better beings, to become a new D in life. What then? What then if you decide after awhile, when you educated all these you go to another place. You come to a new city, a new D, a planet, or D in space that there is no physicality, except D of the fields of the U, and what then?

In essence man should stay the same, it does not matter where and how you manifest yourself. Man has to become the man of peace, .. love, and the man of Christ, and the

man of Zoroaster - think good, do good, and every thing will be good. Because you may not talk, because you communicate through the D of the soul, understanding does not need talk.

In essence, how do we live, in essence how do we find the new cycle of life for us, (:56). where the demise of, and separation has not come, the way man dies in the new D, without his control, it is decided by outside. This time we decide. The D of STP decides the D of the position space and time, where the soul will manifest itself. The soul becomes the craft, and the STP within becomes the captain and decides, "hey soul, let's land on this planet." "Hey, soul let's see how it will feel if we become physical in this space and time," where there is not planet. Would we see a new creation, would we see a new civilization, which has chosen to live without D of the planet, and physicality, but in D of the fields of the U.

Mankind will live and come to these tribes. They are the most beautiful things you have ever seen. The most peaceful tribes, the most peaceful creation ever done by the Creator. Those of you who have the privilege to come across the, what I call, the cultures of the universal energy and fields, in the culture of entity, of community. You have in essence touched the physicality, and the D of the soul and emotion of the Creator. As they have no D of physicality, they have a peaceful life, and they will teach your soul. Not many will ever be lucky enough to come across these, across the travelers of the U and Unicose. But when you come across them you are privileged, because you come closest to way, the Creator of the fields of the U is. They don't need to do anything, they receive as it passes them, and they gave as they don't need. (:58). They don't need the D of physicality that one day they might see their demise. The live for billions of years. Some of these tribes come from the time of the first fields of the creation. They are old, they are ancient, that's why they are called ?? Their real term, time life, going back to the time of the Creator, the first fields where there was no D of physicality, had still not taken shape. The fields are so much higher, that they don't need to convert to any D, in the D of the STP. Count yourself lucky, if you manage to travel in the D of the soul, and then you ever come across the true life without D of physicality, within the spans of the U, when you come across these communities. You feel them, they love you, and you love them with it. They give you the knowledge of the U in one instance. As their fields, in the span of their fields, covers the whole of Unicose. Then if you are lucky enough, and you have elevated to the point of understanding through them, you shall see the fields of the Creator. You become lucky to be in touch, to be able to feel the emotions of the Creator, the love which is overwhelming for every soul, which ever created, and being created. This is what that is, what then?

What is the future of the man in the space. What then? (1:00). What is the future of the man in traveling in the D of the soul, what then? Would man in the D of the soul, create the children of the Unicose, and with it, start the new cycle. A new cycle of life, which lives in understanding the D of physicality and D of the soul, from the outset, from the beginning, the Mitra, understanding the soul of unique, complete life. In time mankind will understand the teaching of today. In time when we have shown you from A to Z. What then?

What then will be and how then, shall be controlled by the STP of the man, embedded in the STM, where the interaction of the 2 creates the emotion of the physicality, and the emotion of the light, in T&T in the U.

The question for the KS is, shall I let the soul separate from the D of physicality of the physical life, and be what we know as death, or should I allow my soul and the STP, to become the passenger of the U, that one day, when the 2 agree I'll go through the process of the STM, to become that star. Or in the process of what then, in gathering more fields of the U, in understanding that you receive as you give, then instead of a star, (1:02). you become the fields of a U. You become the field creation of the galaxy, and then you become part of the structure of the Unicose. What then?

Go through the path of the mankind in the D of physicality, and you might become the seed of the sun, or go through the D of transportation and transmutation, understanding educating the soul, and become the soul of a U. This time the choice is man's choice. This time, the life will change in the D, that the man can not understand, but the STM is fully aware of his existence. What then?

That then, is today in front of you. That then, is what is facing you, right in your face. Do I want to go through the separation of the totality of the physicality and the soul at the point of death. Or I decide, that I collaborate, and I live within the strength of the STM with the STP of the man, and have the opportunity maybe, maybe, a grass shoot, to see the fields of the creation of the Creator, in the D of the Unicose. Then maybe my soul will separate in that D and directly become part of the soul of the Creator. Then I made man in the image of Myself, as the man has become Me, (1:04). and part. What then?

What then in the light and rays of the love of the Creator, spanning the spans of the Unicose, leads to creation of another man through the soul of the Creator. Maybe on planet earth. Then, what then? The cycle never finishes. It's the man who decides in which part of the trip to get out of the bus, and decides to live at this bus stop, and spends some time here, and the next bus for tomorrow, while I am enjoying the scenery of the new ?? ?? the new point and D. Maybe tomorrow or next month I get on the bus and move to the next city, next village, next destination to start a new life.

This is the story of the STM in the D of understanding the STP. Maybe we have brought from the A to Z of the vocabulary of the understanding of the creation to you today, if you understood. If you matured enough to understand what is to come. What the, where does the limitation stops, and where does the limitation starts. Then ask yourself why mankind has been chosen such a ?? on this planet, for hundreds of thousands of years, for a short time of a few seconds of the time of the U, to become the seed for another point, D , and life. (1:06). Maybe because the STM carries the love of the soul of the Creator within it, and that love tolerates all, till you reaches the point of totality, to become the teacher of the rest in the D of Unicose. Preparing the STM to become the teachers of the future, but this time I could teach you, understanding everything and the peace ?? religion.

As I said, in the past teachings, the new teachings are very deep, if one understands, and if one doesn't understand, it's a game, the same as the others. Just a sound, just a voice and a fairytale for those who live in the D of physicality of the man. In understanding the totality mankind has come, mankind has to come to understand the position, time, and space of the U. His position within the U, the position of his STP, and the STM, and then maybe we have time to teach you more. Maybe then we can teach you the essence of the creation and the Creator.

Today's teaching is very deep if you understand it, and today's teaching is much closer to understand the Creator and the travel in the depth of the U. Do not listen to the words understand the essence and you'll be enlightened.
Thank you Rick if you like to go for a break (1:08).

Proofed to here >> further on

>> BREAK >>> 399 KSW Sept 23, 2021 (1:16).

K- (1:18).
to understand what is to, and understand how life on this planet will change

Shows video of new center in Linz (1:21).

K- new home for KF if you noticed above the building is structure of UFO. On this building there are 2 UFO structures. We have brought you to the door but we have not taken you in. We open the doors on 2nd Oct 9 o'clock.
(1:22).

In so many ways, we have reached a permanent understanding of the T. Maybe in the very near future man will take off from this position into space. The units what you have been dreaming for are within this center … (1:24).
Otherwise it is a bottle, tube and ball.
Please inform us before you come in, as we control everything. .. the nation of Austria is under Corona protection alert. You need to have vaccination, and alert, what they cal the 3 Gs otherwise you'll not be allowed in. You have to have a certificate of, what government of Austria has asked us to have, and an entrance you have to show your test.. then you'll be allowed in exhibition.
Self-testing on the spot.

This is 2 days of workshop ..

(1:26). What we call UFO has landed, about the doors you will see it. The beauty of it is, the knowledge of Creator has landed for humanity. It's for us to understand it. Once you walk through this door the matter state of the man finishes and the new cycle of life .. has started .

This exhibition is open 5 days a week.

Some of the richest men in world have already booked to be here .

As world dignitaries come don't want to be seen we lock down.
you have to wait some hours till they leave .

The world has moved on and we move with it. In a way, the time of man becoming travelers of U has started, and many of us will be educated, (1:28). within the womb of this center in the coming months to come.

We will not broadcast live.
You got to understand KF has many enemies who are working, paid by governments to discredit KF, and to do all sorts of things, so we are very careful we already been attacked by couple of pedophiles in Linz and Germany, who found out where the center is, (1:30). before we announced it, and they tried to effect, but actually gave us better understanding to the people, that how the situation is. Even people in Linz didn't know this, are part of pedophile groups. It was amazing to see how things have changed ..

You will see for first time Vertical and Horizontal EU.

I now you are waiting for Friday, for a good news, maybe you'll be part of a space program.
R: Yes, I put out a poster (1:32). Create the future design contest . Spaceship Unit is second. Now judges are doing have final say who actually wins.
Announce all winners Friday 24th. ..

K- would you like to put on screen
R: … (1:34).

K- Where are we to be if NASA accepts KF T to be.
R: They will either accept it or totally reject it. (1:36) .
.. even their own people are saying plasma and plasma ..

K- Yeah, but NASA has a plasma program for space. They are trying to create a Pl propulsion.
R: Trying .. this where they need a booster ..

K- Yeah but NASA is headed by the most frequent astronaut as pilot is form S. America

.. I have spoken with him and his family. (1:38). He is a great advocate of Pl T but most of the astronauts when they come off the line of duty, they are given other position to be steady more with NASA. They made him in charge of propulsion ..

Any other news .. How are you going to share the prize.

We'll see many KS in the exhibition ..
R: Greek conference
K- (1:40).

R: 2nd Beyond Books Publication registration (1:42).

QUESTIONS:

Q: .. (1:44). Spanish .. (1:46). ..
.. about everything you have mentioned about the soul and everything. That in which we have advanced in the KF. how the soul can leave, you spoke a lot about physicality today. (1:48). all that which the KF is bringing for us. How can we tell others about this.
K- Educate them . .If you go to people and just say, they laugh at you. The way we educated you .. educate them.
Q: I understand about education (1:50).
She is concerned because her mother .. experimental Covid shot ..
K- We do not interfere. We try not to discus

Taught how to make light in palm of hand
K- Let me explain for some of you. Go back to some of the teachings in Barletta, in Italy some 3 - 4 years ago ..
In the teaching, we explained about a position, where you can hold your hand and create light in the palm of your hand. For the training purposes, (1:52). for man to understand to go through the next phase of evolution of expansion of the STM. Go back to the teaching of the ?? hand, where we explained, that you can look in palm of hand and create gold, where you look in the palm of the hand and you'll see light.

This light can be the boundary of your soul. In a way, you extend your soul's boundary to palm of hand. If you hold your hand out, if you hold your hand above your hand and understand to create this condition of light, you will extend the fields of your soul beyond the physical boundary.

This is why we always see the prophet of God holding their hands to the Creator, it's the time when they can extend their souls beyond their physical boundary, and then the knowledge is received is the knowledge of the Creator, through the STM. This is why we do this, .. if you see man always looks at the physicality. If you can hold your hand out, it is the furthest and the longest position in your body, that can create that dome across, around your body.

When we raise our hand, and you can create the transfer, the extension of the STM to the D of the physicality, then you can cover the total physicality, and then you become the light. You become the soul overtaking the physical body of the man.

There is a reason hidden in the structure of the palm of the hand of the man, which man is not aware of it yet. (1:54). It's the center point of the energy of the STP, if it needs to be transferred, and you can bring it in interaction with the STM, and you create that light. You become invisible within the boundary of that light.

If you hold your fingers towards yourself when you are creating that light, your fingers become the boundary, and the light will cover and you become in new D. The beauty of it is, that you become that ray, like that arrow, where the STM sits within the center of its life, and you can use it for T&T, as the STP dictates the position and the place where the soul has to go. Operation through the emotion and the mind of the man, and the STM.

So in the coming time we'll teach you to go back to those teachings, to extend your soul to the palm of your hand, and with it, will cover the whole of your physicality. Or become like the prophet, raise your hand, and then you become a sharper ray, you can travel faster within, you can receive more of higher order, what I call, knowledge.

This is why, I repeat again, the prophets always raised their hand, because they extended the soul to the D of the STP, in the D of physicality of the man. So if you are practicing to be able to extend your soul, learn how to transmute that energy through the D of STP, which is the blood.

If you look at it, when you hold your hand and it's folded right in half, the right way, (1:56). you are holding a Pl, .. a sphere of Pl.

That can be the D, that we said, where the Inertia meets the STM, in that position you can create to extend the STM to cover the physicality. Mankind still is not aware of a lot of potentials with his own physical D. In time we learn, that we can convert these energies to anything we like. If we like food, because we always feed ourselves with our hands. Get the energy of the U within the palm of your hand. Create a ?? field within it, with interaction of the STP and STM, that it absorbs what you need, because through the circulation of the blood, the body knows what it needs, what fields, and feed yourself.

Mankind does not need to kill with his hand to feed the man. Mankind needs to understand the power, which is hidden within the hand of the man, to absorb the fields of the U, to feed the man through the cycle of the STM, and this is the beauty of it.

Hold your hand out, create the right condition and you'll see the extension of your souls, and for the first time you'll have the pleasure to become the light. We tried to teach it 4 or 5 years ago, but you were not ready for it.

Now some of you are ready to go through that transition, to become that light. But you have to understand, (1:58). don't do it because you want, and don't do it with a wish. You have to do it with total, what I call integrity of understanding the purpose of becoming the light.

Any other question

Q: … about Mohammad question if you can cast your mind back to that time. Does Mr. Keshe know about Mohammad's night journey "shab eb miraja" , in which the Angel Gabriel ascended the 7th sky, is with the Prophet, but refused to go any further because his body would not allow. How was Mohammad allowed to go further than the Angle Gabriel in the human form, and what are the 7 skies?
K- When you become the light, the fields of energy of the Creator you pass even the, anybody you call the guidelines, the guidance, those who are to guide you, because you know the way, more than they do. You know the path.

This guidance is the path to be able to meet with the Creator, and no other purpose, to see how pure is the light of the Creator, that it will become part of it.

You separate from your body, when you reach that point. In a way, you, the physicality is no matter, you see you leave the physicality behind, and anything which is connected to D of physicality, (2:00). and you become the light, and in interaction of the STM, with the soul of the ?? Creator, what created that, what we call, "the light of knowledge" the what you call, it has been explained as a fire in the different shapes and forms, in the different understandings. When you've been given the status of prophet of what we call, STM in the D of the totality, you become aware of a knowledge beyond the knowledge of the physical life of the man, and then you have, and you enter a totally different D. Mohammad was in essence pure in the soul, and he could go to reach the level of being part of the Creator.

The only Messenger in the human race we know, who has not made that final connection to the soul of Creator, in D of his time, was Moses, because of the crimes he committed. Moses has no station, manifestation of the Creator as a prophet. He lost it when he chose the path of ?? Mohammad went to an extent that way, but Mohammad went into extension of converting people to become the believer in the Creator, which was different than Moses, (2:02). which was revenge and total destruction.

Any other question

Q: Ed .. to what extent of understanding the ethos of the Creator of U effect the implementation of the Pl T in the physical realm?
K- All of it. If you understand the knowledge of Creator, it's the knowledge of what you call plasma T. It's a way, a path to reach that point. It's a T which leads you to that point, but this T is not hammer and nails and aircrafts. It's a knowledge and T in the work of the U in the D of the fields of the U. We have unfortunately, no transformers and no screw drivers.

Q: So if one does not carry the ethos of the U, there will just be a limitation on their ability to implement the T in the D of … ? (2:04).
K- Eventually man will find, will understand and implement it. Could be this century, could be next, could be tomorrow. It's understanding that some of the world leaders are reaching that point. So the world leaders are extensively ?? reaching that point, that man leads to the next cycle of knowledge and T. We have reached our limitations.

As I said, when you listen to the speech of .. Biden in opening of UN, he refers to the new T, that the new T can handle viruses. The White House is fully aware of the T which is on the table in the KF. It's just how to turn it. How to facilitate the new knowledge and technology (K & T). The new administration is very bent backwards to bring new T, that it leads to peace. It's leads to new ?? and understanding not the physical D, but other D of work of the man. We don't need to work to live, but we can all learn new T and evolve in different ways and directions.
As he said in his speech, it's the first time in the administration of a US president, that US is not involved in any war across this planet. First time, since WWII. He has brought his nation under control, and he has withdrawn from all the points where there was wars, and he is withdrawing the totality. After 76 years, (2:06). it's the first time we see no wars where US has been or being involved in, and are withdrawing from all conditions.

Because they are aware a T is about to come, and we have made as I informed the Iranian leadership, we have made the facilities in past weeks, for full transfer of T to US an China. We have transferred by agreement, that the KF know-how and T will be transferred to Markray in signed agreements. And through it, we are ready to negotiate for transfer of T in exchange for permanent peace.

The same sits with the office of The President Xi of China and same in Moscow. European Community is the only community, which will not be involved in any of the space T, till the situation in Europe in respect to killing the scientists, is resolved in Brussels, sponsored by the state of Belgium. This is something the Germans, Italians, and French have to sort out, on the table of these negotiation. Normally, the only reason will be, if we give the knowledge these people will create war out of it. European Community will be kept out of any negotiations with space T, unless the situation with the state of Belgium, in killing scientists and stealing technologies, and all the things which goes with that nation. Brussels cannot be the center of a community with promotes and provokes, (2:08). killing of scientists, and wars, and other things which you know were announced by UN being the center of.

We will achieve transfer of knowledge and T. … in past 48 hours KF has signed an agreement with Markray. We are ready to transfer T into KF Arizona according to the instruction and approval of .. Ayatollah K of Iran. That means we will discuss ?? and mankind will go into new D of K&T. It's the same with us, with the Chinese …

.. same way with Brazil and Africa

(2:10).

We will see in the next few weeks, big changes. We will see the beginning of the development of the sharing of the T and everything else.

But as I said, European Community, even though we are in Linz will be totally isolated from this process in the what I call, ?? CIRIBRU organization, till the killing of scientists, (2:12). by this community has come to stop, because in the head of the European space agency sits one of the biggest murderer of scientist under the banner of the Belgium director. This has to be sorted out, they will not be allowed on any negotiation table till this is sorted by Germany, Italy, and France. I told you they went to far, to create false court cases and everything and now it has come to bite them. There will be no state of Belgium as a Monarchy once we finish with them. As a democratic elected nation, will exist, but not as a monarchy. They have brought nothing but pain, suffering, killing and the rest of it. Now you understand exactly how mankind will move.

Q: … as the leaders of the earth agree to peace, you will release the T to them, it is your decision. What I am wondering, is a man's elevation into the ethos of the Creator. Does that facilitate his ability to implement knowledge the Pl. (K- yes) . Is it simply a decision of the overseers of the U, to not allow man in ?
K- This is the decision of the world leaders on this planet. You have 2 decision, (2:14). I explained the same thing to the present Iranian leadership. We can choose to go through vaccination and enforce it, the way we see. Or we can go on the television and teach people how to make Cup 1 & 2, and in emergency cases other combinations of the thing, to walk away from this mayhem we see today.

Very simple. You put it on the television, right across how to make, how to help themselves, and see how many Corona cases there are reported, or is an evolution of. Or we go through the present mayhem. This is the decisions of our leaders to decide. Once they decide the correct way, the way that it helps people, then we'll see the next step.

The only difference with vaccination and no vaccination in a free environment society as we used to have it 2 years ago, is putting 5 to 10 minutes program on all the channels of the TV's around the world to our teach people how to make Cup 1 & 2, as many have used it.

Why are we choosing … According to Biden 4.2 million people have died in the past year from Corona. We all die, but why another 3 billion are locked down. Or we put on the restriction everywhere. When we put only a 10 minute program on television to teach people, and then clean up the environment the same way. This is vaccination versus knowledge. That every one can use. (2:16). When I am in the middle of Amazon and I get another virus infection, where am I going to go. To who, or I have the knowledge, the way we see with the Brazilians, teach the people form Amazon and the help themselves. When any virus comes they can handle it.

It will come to front very soon. The knowledge has to win, not the bank accounts. We see in the past week for the first time the Iranian new president, president Raisi, has directly attacked the A Rohanni, the ex-president of Iran, in mishandling and stealing from Iran for vaccination. That as a president he has taken the money from the West, to get the nation to suffer from. . . Our world leaders are making the suffering, and our present world leaders are those of the new generation, which are part, are bringing the change. We've seen it with Biden, .. Raisi, .. the new Russian president to come into office. He'll be, of the person will be very strong, but committed to peace.

This is part of the whole structure of understanding. It's the same with the nuclear industry, it has to be understood in how it is handled. We hear about the sanctions on Iran, but we don't hear Iran is building 2 further more power stations, or contemplating on it. Because then they become energy .. they just go for one side or the other.

World leaders have to come to understand to work for the totality, (2:18). as one, not as individuals and groups, and .. ganging up on each other. The knowledge is there. Our leaders have chosen the bank account instead of the T, until then we all suffer.

If you know, that most of the people involved at different levels, something like 30% of each injection given to you, goes into private accounts of somebody, somewhere. If your nation is paying $100 per injection, 30 Euro is in the pocket of your leaders. that's why they are so mesmerized that everybody gets injections. You are the head of a nation, 100 million injection, you made yourself 300 million dollars, the first cycle, the second cycle, and the rest of it. Jackpot every time one cycle comes in.

Any other question.

Q: .. Is it possible to use the new fungus Gans, (2:20). in agriculture in trees infected with fungus?
K- Yes, we have already used this and it works effectively. The .. to understand the process, there is a special mixture for the funguses. Thank you .. for bringing this up. We .. The KF put these Gans funguses at the prices which had to be put. We have reduced the prices that it becomes affordable, the volume of it. In essence yes. We have tested it in many places. It's understanding the process of the fungus, as I explained before.

A new T will be released by KF where you don't even need Gans's. In that process, we'll teach you much. We have put our people in testing new technologies, we can do a lot of things, much easier than can be done up to now, much, much easier. The fungus and disinfecting system ?? have taken us a long time to get it exactly right, the way it should be at the moment. You already have the Gans of viruses, which have as Cup 1 & 2, you carry in your pocket, you can use it. Now these are the ones .. (2:22).

Mending of Bones
.. something very interesting, I love this thing, the way it will come in the structure of the KF. We show you what is to come, you will see it in Linz, .. This is a version of what I call, "of the fusing of bones," if you break a bone nowadays it takes you weeks. This

new T, which the KF will release in a very short time, it will be something very much like this. (shows new system on screen)

This new system where the loop is, where you put your hand through it, on the line of fracture, will create the process of rapid development, and you can walk away from the fracture within minutes, within hours, you don't need to be in plaster for months and everything else. We are working on this and will be released in a short while. Literally put your hand through the ring at the point of the fracture, and the process of the, (2:24). healing will start through the D of the soul and physicality. You will see rapid processes.

Nowadays, you go to for the fracture, and it takes you hour or 2 to find, to x-ray you, you have to sit for plastering .. (with this system) the time it takes you to sit, you will heal and go home. This knowledge plus other systems will be released. You'll se them in the exhibition center. It will be in every hospital, more or less. Even the complex breakages and fractures, the bones can be created and whatever as a shrapnel part of it, broken pieces, they can be removed from the tissues, you restructure the bone immediately as it is. The same way, with the same holes, that you don't get problems in the future, in using some of the ?? created by the ??

We see this in a bigger D, especially for hip and knee replacements. Where at the present, when they cut the femur, they create other complications for the body. We restructure with this new T, the whole of the hip directly as part of the bone structure, as it was before.

You will see new developments, new systems as it comes. As we said, as it becomes part of what we have signed with Markray, and transfer of T for peace. The first 48 Vision units will leave for (2:26). AZ, upon agreements of the nations ins accepting the T and peace. Which we hope will be very soon.
Any other question

Proofed to here >>

Q: Dean (long …)
K- Nobody will be allowed in any of the systems ..

Q: (2:28).

K- We see the new cycle of KS .. as students .. when they come through the door they understand how their future has changed without them knowing it.

In a way, when you look at all the delays we had over the past years, the mayhems and good thing, we needed that time for everyone to accept ..

(2:30).

We will respond to American president, in negotiations taking place in Washington as we speak. (2:32). We needed to go through this. Mankind is ready to go through the peace process, .. to take that step but he needs to build trust that it can be done.
Any other question.

Q:

K- we are waiting for news from KF Tehran (2:34). that Tehran will sign into the first factory in Tehran. This is a milestone for our KS if producing Gans ..

(2:36).

Q: .. are we ready to be space passengers ..
K- we already are. (2:38).

If you understood today's teaching it's another milestone in understanding difference between different ways of living and traveling.

(2:40).
Thank you Rick

400th Knowledge Seekers Workshop; September 30, 2021

Note: Transcription has not been checked by KF. Please listen to original recording. (Transcription by KF Brazil)

Production of Enhancement Units started, Collective human souls to colonize space, Mr. Keshe will return to Iran build first spaceship city, We create an idea then limit ourselves by it, Fear is biggest enemy, China offered solution to energy crisis, Black holes are plasmas - neutrons - all plasmas at some point,

ENGLISH TRANSCRIPTION

(:11). K- … We started nearly this time some 8 years ago with some bits and bobs running before the Knowledge Seekers (KS) program. It's been an amazing journey. We have learned a lot. From what we see the journey has just starts. The journey of the knowledge and the knowledge seeking.

The spaceship center as you see it, will open up this Saturday, and will become the center point for the space T. In a way, a change of the course, from rocket and propulsion, to MaGrav positioning, and that kind of structure, the way the U works. We see new systems very much different than what was before. We see a new understanding.

Coincidentally, maybe the right way, the Enhancement Unit (EU) what we've just seen advertised, has gone into production. This week KF has submitted the production of the KF EU to the .. rate of 3 a week, from this week, to be produced in China, shipped to Austria, and somewhere by November, December every week we'll deliver 3 units. The initial units will be kept in the KF center for flight tests. As we said, we are getting prepared for the flight systems, (:14). As we receive 3 EU a week from China, and we spread it around the world. Hopefully by the back end of January, February, Chinese New year, we go into production of 1 unit per day. We have a full commitment for this. We see our production to increase around about a thousand a year, plus every year.

We don't see China to be able to support such an expansion, and we transfer part of the development to Iran. That the EU will be produced in 2 locations. As we see China is running into deep energy problems and they dropped to 3 days production. The way it's going, they might go to 1 day production a week.

It's very much when I heard about the 3 days production, ?? brought memories of 1972, when the Shah of Iran increased the oil prices from 1.5 dollar, to 2.5 dollar, and crippled the West. ?? no electricity and operations had to be done in the dark. Nobody could afford $1 extra per barrel for 200 liters of fuel.

Today the same has been done, but this time the instigators are US. They allied with the Australian, and when the Chinese took most of the coal they invested in it over years, that the have a supply guarantee, and the new alliance between US, Australia, Japan, and Canada made sure, that China will be brought under control.

We'll see the prices in China, the goods will increase. Shipment delays will be massive, (:16). and China will not be able to come out of this dilemma. They already gone to 3 days production. They will push them to 1 day production per week.

For this reason with the insight what we see, and instruction from the heads of the KF, we are splitting our supplies into Iran and beyond, that we do not rely on the Chinese supplies anymore. But the first series of our goods have already been placed and EU will be seen in public in places like Tehran, AZ and the rest of it.

Interesting enough we'll see an expansion into these T within the KF. We have already informed the governments who suffer from the energy production, lacks of it, and the rest of it, will come to understand the problem is getting bigger and bigger. Some of the nations in the world, the poorest, already lost most of their incomes trying to pay for vaccines. Now surcharges on the coal, where most of them have a coal fire burners from old times, all made by Chinese, have to cover more. In a way, the whole economy of the

world is becoming crippled, by themselves, through their own, what I call, mishandling of the situation.

In either case, we'll see what will come. We celebrate the opening of KF center in Linz on Saturday at 10 o'clock. Please those of you who are coming do not turn up before hand. Our people will not be ready for it .. (:18). and this is more than we can handle. We don't want more than 30 - 40 people in the center due to a lot fo other reasons. I am sure there will be a recording of it, the opening and it will be shown in the coming time. You might get a tour of the KF and the new systems which should be launched and be seen in the public for the first time. We thank especially the Austrian team . .. .

This weekend is a very small gathering of the KS, but a bigger step for spreading the knowledge. The center is used to bring the world leaders, to bring the world scientists to see the change, from the permanent place. And to show that it works. It's not just an exhibition, to be. The proof, the confirmation, will be given to the government officials, and through the same.

On the other hand we congratulate the Iranian team for being able to establish the Iran space company with the permission of the government. KF has now, has officially become a space program through the energy production for the space. We'll see this is a breakthrough for what we promised for the 6th of June, it allows us to do the flight test by putting ?? new energies. We try to gather much more momentum by the time we get there. In so many ways, most of us are ready for the change. (:20).

There is a note written by Rick … important for all KF websites … Rick would you like to explain more.
R: .. New regulations with Youtube. .. we received a headline from New York Times which actually made statements about Youtube, as banning all vaccine misinformation from its platform, as part of an effort to reduce the spread of false claims about immunizations. That was the breaking news ..

(goes over Youtube new regulations …)

(:22).

R:

(:24).
The important thing is we have to be careful when we produce broadcasts for Youtube, to not include the so called, vaccine misinformation. So people who are producing the video …

They brag about removing 130,000 videos for violating vaccine policy.
K- I think you said somewhere, Telegram is going to go the same way.
Q: There are some rumors that Telegram might be cracking down as well
K- So whatever is not in line to what they say will be taken down .

(:26).
K- Yes, just try to avoid talking, or in the teachings, or in your private teachings about vaccines and Corona. We understand how it works, we understand what it is and hopefully in the near future there will be another ways of communication that is not mass controlled.

Teaching Starts:

The teaching of today comes from what we have learned from the past few weeks. What we thought we understood from the totality of the knowledge. We are here today, because of what our ancestors over millions of years have gathered as information and they have embedded it in our genes. What not to eat, what shape to have to survive, what colors will fit in which area and in what condition.

The most strangest thing that will come to mankind, in the space T, is that all these genetic modifications to fit the environment, the position, and the place, on the arrival of the man to a new destination, has to be done within seconds, within minutes. The genetic modification, to compare to what we live in, and surviving in the new environment will become instantaneous.

In a way, our DNA, which is an information of its own RNA, within the soul of the physicality (STP) of the man, has to decide within seconds, (:28). the evolution process, which took mankind for millions of years in the space of earth, to learn and modify to. It will be interesting in how our knowledge, in understanding of the knowledge of creation, will bring us to a point of understanding, how we shall survive, how shall we mutate to live on earth as a man, and on another planet, as a citizen of that planet, but not in the shape of the man.

For those who decide to travel the depth of space in spaceships, creating conditions, that they can survive in a physical condition, the span of the U. Up to now, every change we see within the structure of the body.. has been ?? actively worked out over billions of years. Where the eye to be, where the nose to be, which kind of intestines to be, do we need anymore appendix, and why not, that we all suddenly don't need it, and it goes through the earth process of all of us. These are the things, that the mankind in the depth of the space has to face within minutes of the arrival, conversion to the new environment, conversion of the genetic modification, according to the survival ?? and the criteria of the position, time and the place. In so many ways, how fast would our soul and the STP allow our physical body to go through mutation to be able to live, (:30). and survive in the new place and dimension (D).

For us to go from black to Chinese took centuries, thousands of years, and we traveled and went through different conditions. Now we go from man of earth, to man of planet Zeus. There are no eyes as we see with the sight of the soul. There are no arms and legs, as the place is like an ocean of love and fields, it travels you the same as you swim the oceans of the earth. You become like a fish, fish swimming in the D of the fields of the

U. Then you'll find out, that the body of the man in that position, does not need anything, except finding balance with itself, and confirmation of the existence and presence in interaction of the fields in the environment. In the new Enhancement Units (EU), which will be shown in the KF center, we will see a new version. In the coming time when the new center is setup we create that condition, of what you have as the chairs, to another system, where 2 systems super passes or super imposed on top of each other, to create the condition of the transition from the soul, to the STP. In a way, what it means, is that the system within the Enhancement Unit will allow the other system to behave like the womb of the mother. Then they interact, will live according to itself, by itself in a different dimension, (:32). and condition. In a way, it's a multiple layers of fields.

What does this mean. This is your EU, you are creating specific fields through the interaction of the reactors within the system, which their fields comes outside. It's like a womb of the mother. Within it we embed a new system, where again, it's enhanced with different systems, which creates a new D of the fields, where now within the system we put the body of the man, which itself becomes another system, with its own multiple field dimensions.

Where you can hold onto the body, while we change the environment of the surroundings. Where we can hold onto the shape of the structure, while we travel the body .. in a different D across the U. (:34).

The new EU, which are built, and is a way, a prelude to a new spaceship program, not only will carry the man who wants to go in a physical D, but will carry the man who likes to go in the soul D. This is a new breakthrough, which allows many of you to decide, which way, and how I want to transport and transmute. Because if you have reached the confidence of working between the two, you will find out a very simple criteria, that the soul of the man (STM) within the center, in interaction with the totality of the system decides how the system will run, to travel in the D of physicality, or to travel in D of the STM, depending on the maturity and depending on what the man expects to see.

In so many ways, the new EU, which you have seen the first of it, and from November on you will see more of them, will be combination of the works of the KF in developing new space T, and then we come to the fact, would we be able to travel the span of the U as individuals, or as groups, or we travel as collective souls within the structure of the system, that allows us to be able to collectively carry thousands of souls to the position and destination. Which means, (:36). from now on, man has the capability to travel collectively as a soul to new point, of destinations and create the colonies of man, but that way you know who all is from the man from the earth in that new position, and location where collectively land.

This is one of the reasons that we have said in the recent past, that the U Council in coming time has to decide on the level of the emigration of the people from this planet, that the urge, and the pleasure to see the U, does not deplete the life, and the process which is been made on this planet.

In the new EU, which you will see coming up in January, you will see these new settings. We might allow certain people to enter to test. Not in the exhibition center, but in specific position, which is agreed by the governments, that we can see where, and how the situation will turn up. That we have, in a way, understanding and control of what is about to happen to human race.

The T &T of the physicality and the STM , and the energy pack, will become part of the normal routine work for the mankind on this planet and beyond, once it becomes aware of the totality of the knowledge, as it has been to many other races in the U.

We are not going somewhere unique, .. where we have been before. It's the first time, (:38). we are trying to learn, we are trying to understand the new ways, the new knowledge. This will be a fantastic time for many of you, and at the same time a fantastic time for many of the KS, who would like to know, as we said, what's that. What would happen to us then, in the space of the U, in the D of the existence, and can we, if need be, turn this ship back home. Where do we look for? What do we understand, that mankind wants to come home. How he will find his way back home.

The knowledge and the understanding of the principle of T, depends on many ways, how KS interpret the knowledge given. I am sure the way we collaborate with different nations, for different T, in the coming time, mankind as a race will collaborate with the other races of the U, to develop, to understand, the progress of the knowledge.

Today's teaching is very simple, what is about to happen, is about to be shown. It's a window to the future of mankind. It's a window to understanding that, not only we have the T, but we have the tools of delivering the T. (:40).

How do we create the energy fields in the bigger shell, that in interaction with the inner shell, will allow the shell of the STM to accommodate itself in the D of physicality of the U. This is part of the structure. In a way, the EU becomes that womb of the mother, that EU, the fields of it, is the fields of the U, where the womb of the mother carries the fields which fit the environment of the earth. The knowledge and understanding of it is part of the T, which will be revealed. Gradually we'll explain to not only KS, but to the scientists and the rest, and then they will have to go through the process of understanding how, who, and the way we will send groups of people out, how they will return and what they'll bring. Would they contaminate us with, would they bring us new knowledge in the shape of the fields, and many of other new adventures. This is part of the practicality of the new T. Now that we have gone into full production of the EU, different applications of it will be delivered, and for KS to expand on it, to develop it more, and to understand how this T can be used for a specific job, or specific purposes.

What I would like to do is to allow you to ask questions, (:42). and with it to expand the knowledge. As we can carry on you'll see the new EU in the new .. KF center from Saturday. Where both, you'll see this unit and this unit. And this unit is the man who is going to be in it.

When we add one unit to the other, for combination of one unit to another, how far man will be able to be ready to see, that not only its soul, but STP can carry the transformation through the D of the U. The transmutation will come with the presence of the new fields from outside to inside. But what happens when the fields from inside, superimpose the fields from outside. In a way, STP will take over the soul of the system, and then what would the humanity do in the process of the transportation and transmutation of the energies and fields of the U.

As I said, we have just started the game of the space T. After 400 sessions of teaching, and plus many others. There is one point, that it has to be understood, that this T cannot be used for harming another person, harming another soul, dictating, imposing one soul over the other. The system is so balanced, the system will not allow such a thing, (:44). as it would be going back to the ethos of, "everything has to be correct."

I hope in the past half an hour, I opened your eyes to a new method of .. T&T and containment. The biggest problem for you is to contain. To be able to contain. To be able to contain the STP and the STM together, that on arrival one does not become free of the other, and create a condition of what we call, the death on this planet as we ?? The scientists of the future will have to understand this process, if they are there to launch a successful trip. If at any point you loose one or the other, you will create the demise of the separation of the STP and the STM. It's not so, all the time, sweet and hunky dory, if one has not understood the process.

The elevation of the fields, the gathering of the fields together to be as one, is more important, than trying to achieve movement. Trying to achieve T&T. Collective conscious of the fields balance, will become part of the process of the future.

In so many ways, mankind will decide how many, where and to which position in the U we'll send the men of the earth, for them to explore and bring back the knowledge. Not in hundreds of thousands of years, not in decades to go and come back. (:46). But more or less instantaneous, as we learn we use the fields of the U to reach the position of the U.

In the teaching of today, you'll understand the practicalities of the new T, what you will see, what we call, as a horizontal units, as in vertical units, which is going to be shown in the .. Linz center. These systems are built as a prelude, to the next extension of the D of the teachings. Next extension of the man to be able to travel different D and positions in the U. We will try to explain in a much deeper way, how to be able to achieve position, time and place in the space, without interfering, or interacting between the STP and the STM.

I hope many of you will enjoy coming to the Linz gradually and enjoying the presence of the new T. Every week, every month new systems will be added, and as we develop, and as the Chinese, Iranians, Americans, Brazilians and the rest, develop more T, will gather all that in this center. That mankind come to understand, it's a center of knowledge. It's a center of understanding about the creation of the life, and how this life will change for all of us. We never had such opportunity, now we do, and our knowledge and understanding,

(:48). is part of the process of gathering more, from interaction of the fields of the U, that it creates more for us, a new D of understanding about the Creator.

In the new Exhibition center when you come in, don't look at the systems anymore, look beyond, what the systems can deliver. What are the opportunities that man has been given and needs to expand to understand.

In the past 3 - 4 weeks we tried to build everything towards this point, that once you come into the center, once you see the systems, entices you, it sows the seeds of the development within you, that brings you an enlightenment, that you might be able to create another condition of the, what we call, existence. What you might take from it, and what you might bring from it, to add to it, to expand it, and to enjoy it. These new Exhibition centers we do our best to create a condition, what's then, what else can I develop with it, what are the options? We try to do it this way, that we stop the copycat business, that there is one there, we have to copy. Do not copy, extend it, add to it, and see how you might be able to contribute towards a betterment of the human race in deep space. (:50).

How do we go from the STP to the STM. In the Exhibition center you will see these two. They'll be set in a specific way, because this is the horizontal people, and this is the vertical people, and the mankind has swung between the two. And would that in process create the new D of life. New intelligence, new understanding, new process of adding to the knowledge of the man in the depth of space. Encourage you to look at new angles, creating new conditions, and creating and understanding of the totality of the system.

I hope I opened your eyes to another new D on the 400th teaching, that you will understand there is a lot to come. There is a lot to learn, and there is a lot to be shared. Are there any question. Or am I going to far for you to catch up, then it becomes, to be ignored, as it is not understood. (:52).
R: Thank you ..
K- They are used to asking question after the break.
R: putting the pressure on people.

Q: .. When you are in the workshop translating teachings, and the Creator starts speaking, are you in a conscious or unconscious state? Would you please comment and explain.
K- I have never been in an unconscious state.
R: .. However there is a separation that takes place at times when during your talks and the workshops, where Source is speaking more directly let's say, is that true, or is it always Source?
K- It's always the same Source.
Any other question

Q- (:54). once the units are installed around the world, will they be able to supply energy so that people that are in the centers waiting to go into the units, will not need food and water?

K- The systems are set to supply energies, which the STP and STM need to survive. It's not water, it's not bananas, it's the energy fields, which is needed for the T&T. You'll find out when you move into the energy, and what we call plasma state, there is not much need for what you call food. Because there is not much what we call, physical burnout. It's more balancing so there is never has been a shortage of, will I get a water, because when you land on planet Zeus there is no water, what's the use of having, creating water to be in there. You might get drowned in it, because it doesn't exist, it doesn't need to be. So we look at the D of the fields, which is needed for the time, place and position. Where there is no need to eat, as the energy needed to convey the plasmas, and the energies are already so minute, that you can survive billions of years.

When we say, a man needs 2000 calories a day on the physical D, then we say that's only 20% of it, the rest comes, (:56). from the environment. Then you calculate 20,000 or 10,000 calories a day is absorbed from the environment or eating to be able to function. In the D of the plasma you need maybe 5 or 10 calories, not 2000 calories, because there is no D of physicality, there is no motion of physicality's. Calories don't exist, energies and motion, or what we need, are so simple, the physicality creates this condition of need for conversion. In the D of the soul you don't need this, your whole, hardly use any calories, because everything is in D of the field interaction, not physical movement. This is important for us to gradually to understand. With 1 calorie you might live for a year. But you have to understand, do we even need that 1 calorie, as you work through the interaction of the fields.
Any other question

Q: … comment on 400the KSW been an amazing journey .. (:58).

Q: Ed .. I am trying to understand the utilization of these machines, .. you drew the inner parameter, outer, and the man .. I am trying to understand in the experience of the man, how we assimilate this. .. when a field is inside a field, is inside a field, they all intermingle ?
K- Yes
Q: So is our ability to accomplish this dependent on our acceptance of merging into these other fields, that are beyond our experience?
K- Why do we need to do that?
I think you'll learn in the new structure, we allow things to happen according to our wish, according to what our soul sees to be the perfect combination.
Q: .. I am imagining, especially with the STP, that there is a resistance to this, because ..?
K- Why do you consider that?
Q: I guess, I just think that in the physicality, there is a fear of going beyond. (1:00).
K- Shouldn't the fear be gone by now, gradually?
Q: Yes, if the knowledge, yes .. you continually expand our mind to see these new D. I guess that they're not something to fear but, so maybe the question is meaningless, but I am just trying to understand it a bit more.
K- You see we create the conditions, and than we enforce the conditions, and then we accept, and believe in the conditions we created. Happens with individuals, happens with

the governments and happens with the societies. How we consciously allow these to happen is limitation we bring on ourselves to accept the next step.

I had this case in the past few hours. We told the Chinese a few days ago, there is a solution for your crisis. Up to now every time we came in the recent past, they said it has to come from the Iranian government, not from you. Today we sent them to the Iranian government to get the permission to speak to KF, which is a bit harsh for the Chinese to do so. When we gave everything as a gift to them, they became arrogant. Now they have to be humiliated to go to the Iranian leadership to ask, if they can speak to the KF. Because they set the terms, not us. You understand, we set terms and then we go back with it. When it's free. (1:02). When we gave it free, it was too much for them, because then they became arrogant in their success.

We do the same in our souls, many of us .. as we succeed in the space T, we become arrogant, because we achieved this, but we don't see the problem around the corner, and we hit another problem, which is non-returnable. This is what is it, always stay in a position, that you don't have to be afraid of, you understand it and you can be correct. It doesn't matter in what shape, to be in the D of the soul, or anything else to go with it. Fear is the biggest enemy of the man.

Q: So opposite to the fear might be, you get to the place where it doesn't matter what is to come, you are just willing to accept it. It doesn't matter.
K- You don't will it to accept it. You go with it, because you believe the other souls who brought you to this position know the best. You understand.
Q: Thank you, yes.
K- Balance of the fields, which brings you to that point, is the best.

Even, I was explaining this to a KS, .. it's in the writings. Even a stone has a soul. Even the collective of Gans's you have, in the what we call, in your jars, they have a reason, they have a soul, they can distribute, they can decide. (1:04).

Very recently .. it's never happened, as long as I can remember, I was working with some Gans's, and a jar of a Gans fell and broke. And I thought, I never do this, why? What happened, what's the reason? And then I stood back, and I said to myself, what has this soul of what is in here as a Gans's, trying to tell me? I am going the wrong way, or I don't understand it, because I was relying on it, they are telling me, "you don't need us, look in another direction." Even it means we don't need to be here. We served our purpose. Then is brought me to thinking, "wait a minute, now I understand why this jar fell." I was relying to much on the material inside it, and my eyesight was limited to what was in there. Are we loosing it, I had more of it, it wasn't the only one. It brought me to understand a new principle, a new method, a new material, which is needed for a new condition.

It was very interesting, how , when they say, even a stone has a soul, collectively your jars, when you see it breaking, and it's not to be used. They are trying to tell you something, and it was beautiful, the knowledge which was gained that way. Or the

insight, which was created. It was so perfect. It was so perfect. It completed the piece of jigsaw puzzle, which was missing. You can imagine, "oh, it was, happened accidentally." No it has a reason. Out of nowhere. Because it means, they tell you, " you are looking at the wrong end." (1:06).

Q: So perhaps that occurrence of the jar breaking was constructed by those who were guiding us, because you were ready for that?
K- I don't look at it that way. But I look at it, collectively our souls lead us to a position. .. Collectively our souls lead us to a position. Why do we go to certain extent to do things, and then, we find out it cannot be done. Because we set track, and then something happens, and we change track, and we say, "oh, now I understand why that thing happened." We used to call it, accidentally, but now we understand, that even the cups, plates, and a cat, and a dog, and a man, all have a soul, and collectively, sometimes they see the best for the man to be ?? where he is.

Q: Brazil, (1:08). .. about EU. .. but you said the vertical units for Vertical People, and Horizontal for horizontal people. Could you explain more ?
K- These new units are for different purposes. The vertical system is ?? paramount to the new transportation systems, where we should be able to transmute from one position to another. But at the beginning, we bring a D to be able to transfer energies and the fields within the body of the man to a different application and position. The horizontal system is, bring practicality, deals with the .. totality of the body, as one field. Where the vertical, the horizontal one, is section by section. This when you deal with ?? as one is enhanced in that way. (1:10). This is set in a way, that we can go section by section, you don't need anything to do with the legs, you don't need it, if you are dealing only with the heart, or with the brain. This is to do with the combination of the use, but vertical position is part of the next step, ?? when we do transportation. These are big units, round about 2 - 2.5 meters tall.
Any other question
You have to understand we start teaching gradually different applications into the new T. It's very much the way you, when we had the first car engines, then we had to learn, that we built more advanced car engines, and everything else, then they became rockets from what we learned from the engines. Now we go through the same process, but this time through the fields, the interaction of the fields of the systems. We allow different applications of the fields, we manifest different what we call, principles.

Q: Alex - Nigeria … sorry was a mistake .. (1:12).
R: you have to say something ..
Q: I just did some little experiments with reactors that gave me some very, very good results. So I want to encourage everyone not just to talk, talk, talk, or listen to these lectures alone, you have to go and do your own research, because if you don't do no one going to do it for you …
K- I hope you are well in Nigeria …
R:
K- And if you are going to go through another cycle of lockdown, if they bring us to that point. you have plenty of time to expand it.

(1:14).

>> **Proofing to here** >> continue proofing

>> BREAK >>> 400 KSW Sept 30, 2021 (1:20).

Q: .. Would you be returning to Iran soon, after election. or have you changed your mind?
K- Yes, we will return to Iran, definitely for sure.
R: You have to make sure the Exhibition Center is situated ..
K- The priority for us, at the moment the Iranian team are working with the people in background who support us, to complete in finding, completing the process of the first spaceship city in Iran. They are looking at different options. Once it is done, we will go back to Iran to build the space city, what we call, the spaceship city of Iran.

Which as part of it, as we have discussed with all the people, is bringing in all the space agencies to work from the same center. At the moment, (1:22). if you agreed to peace over, we agree all to be in one place. There are a lot of things taking place.

It's not easy, especially now that the new government has taken shape, they're realizing how much the old government have damaged everything beyond. We had a corrupt leadership, .. and now that Mr. Rohanni has gone, we have all this corruption ?? We see a big changes, but it takes time to uproot these people who are sitting in these offices .. ?? because they have been well, they were used to lubrication their pockets. The new regime is trying to change that position. But yes I will be returning to Iran sometime in the next few months. But it has to be completed, and there are a few things has to be done in Europe before I return.

Q: .. Can we through the soul travel into a Universal EU say, from Australia to Linz, or do we need 2 units one here and at the other end?
K- Both possible, depends what you decide. It's not tricky, it's just understanding the knowledge, how to do it.

There are no GPS in the U, so you decide on the place, which you have chosen, the field strength. In a way, you measure ahead, where you want to be. (1:24). Then you transfer the right energies to appear at that position, place and time. Then be able to stand the conversion at the point.

Where, when you can go from one unit to another, you already know what is going to be on the other side. If we take you from Rome to Paris, we know you are on earth condition. But if we take you from here to another position in space, we have never been,

you have to be able to use the same understanding, but put certain parameters around it, that guarantees survival at the point of manifestation. Not necessarily physical manifestation, but manifestation of energies. You will learn, mankind will learn these very quickly.

There is a race, which is not far sitting outside the earth, who specialize for this, and when we achieve full understanding of the peace, these races, like teachers, are ready to come in, to teach man a lot more. But man should first change.

Q: .. technical question .. Could you explain how the protons which are made of quarks, and B quarks, and an invisible force field, the Hicks fields with its respective bosons, (1:26). that is responsible for attributing mass to other elements, or particles works in this state. Below the Hicks boson is what has been named by science as a quantum vacuum? How does this act on the ship?

K- I am trying to be very polite, and find an answer to this. Hicks, and Bosons and whatever, up quarks and down quarks, are all as the fields we know, but are a bunch of what it call, hot air.

Up quarks or down quarks are what you call earth or moon, or matter state in that position of field strength. When 2 entities in an environment which are MG dynamic it creates field forces, whether you call it bosons, or buzzards it's the same. Understanding the T, understanding the process of creation is which counts. Mankind has made too many names, without understanding what actually it is. If you call up quark earth, and down quark the moon, and then whose quirky ?? job is.

We didn't understand this, and we accepted all the rubbish which was put in by scientists who thought, " oh I'll be imagining, thinking and do something, and people will follow." We seen it with the biggest liar Stephen Hawkins, he lied and cheated, and he came out with things. We saw the same thing with Einstein.

These things are now, understanding the process of the principle, or the central energy, the transition from A to B, and B is manifestation of entity, and it says everything. It just depends what energy and what, (1:28). So there are no quarks, the only quirkiness is the scientists have managed, or tried to fool us for such a long time. When you have dynamic fields as plasmas in different sizes interacting, you get different effects and different fields in motion. You call them whatever you like. It become the 1 and 2 and then you understand how much we've been mislead.

Now you can understand it, you don't need to imagine it. You can put names into it as you like. The proton is a shell of the solar system, is earth a quark? Or is Jupiter up quark? If you understand it. These things were made by a bunch of illiterate scientists who thought, wanted to show they understand something. The time of these things are over. You understand what is in Book 1, you create the name as you like, or what you do. Any other question.

Q: Can all KS connect at the soul level, or by spraying the Gans waters on Sunday, connect to the Linz conference and enhance the plasma dome on Sunday to a higher level? We can do this every Sunday
K- You can do it every Sunday, (1:30). and many people around the world do it nowadays. You don't need to wait for a Sunday. You chose a Sunday. You can do it any time.

Everyday you have so many Gans's sitting in your kitchens or whatever, for months and years, what are they doing in there? Just free them up, and everyday just put some of the water in the sink, in plant, outside in the garden. Don't wait for a Sunday, and only one (day). You might have it, mankind is a hoarder. How many Gans's you have in your house, in your kitchens, labs, they are sitting there for years. Why don't you use it to add, to change. Once or twice a week, just go through them. All you need to do is fill them up with more water, and you have more for next day, next half an hour. Don't wait for just Sundays and just 1 cup. Change. You'll feel the difference.

R: Can people use their intention to help support the event at Linz, through that action?
K- Yes you can do anything to support, anything at the center
R: Okay that would be a good one for them to focus on ..
Q: in this way we can bring all souls to balance themselves to peace.
K- There are a lot of different ways. (1:32).

This exhibition center is going to be here for a long time. It's preset for a lot of things. It's preset for a lot of changes. We'll see how it goes along and how it takes shape. It's protected by another UFO, and we'll see how this UFO shares knowledge and itself with all of us. It's a very beautiful place to be in. We'll see. We will bring it the soul of humanity for it to grow.

Q: How can we use the principle of creation and functioning of black holes for flying. I am studying your article concerning black hole ..
K- Depends what you call a black hole. Black hole is a point black, but inside it, it's bright, it's a sun. It's just at a certain point it's in balance with its environment, what it receives and what goes out. It's like a Nano layer. When you have a tube, a Cu wire, you N coat it, outside it's black, it doesn't mean there is nothing inside.

So it's the same. Inside a black hole is a star, in balance with the fields it receives and takes, it creates its darkness, what we call the blackness. It still has a point of transition. It still has the point of gravity to pull, and M to give. What gravity you want to create and what do you want to, (1:34). gravitate to. Or when you become, that becomes the black hole of the knowledge for you to test, and what do you want to achieve.

R: What would be the relationship between what, we call the free plasma, and a black hole. Is there a relationship there?
K- They're all plasmas. Every plasma, or black hole, or neutron, or whatever you want to call it. Even if you look at a neutron. If you approach a neutron at a certain point, it will look black, even an electron. It's like the atmosphere, at a certain point every plasma will

look black. So you become a black hole., because you become a black energy. It depends on the interaction of the fields from its environment. This is what, some times ago, it's a point of observation. If you have a neutron and you have fields, at a certain point one of these fields will surely be black. Then does this neutron become a black hole. (1:36).

Even earth at certain points will become black, cannot be seen, depends on what the speed, and what weight, and where and how you approach it. You have the Cu, inside it's still there Cu, for that a few layers are black. If you extend it, here you get Gans's (above the N layers). If you push it inside you get the solid matter of the Cu. But you still here (surface) are black. Every plasma, every structure has a black, what we call, a black hole, a point of balance of the fields. If you understand this you can make yourself invisible, 1 second you can see me, 1 second not.
Any other question.

Q: … since we are on short before traveling, can you explain more on the cleaning process, (1:38). not to create harm to other souls. Is the cleaning also required when you travel without the physicality.?
K- What does he mean by cleaning? We don't have showers in the U.
R: You have mentioned in the past like a chamber you would go through or some kind of process you would go through, before entering the spaceship, as a cleansing process.
K- I understand. It's a recognition process. In a way, you have to understand what you have done. You have to understand what you carry with you. What is the reason for it. If you remember we always said, not many people will board the spaceships. Because they know they don't carry the right ethos, they know what they have done wrong.

A spaceship has a soul, and the soul of those who carry it. If you don't fit in with that structure, you cannot fit in anywhere. That's what we call, we change, not change, but we separate, as we say in English, the ?? wheat from the chaff. Your soul does it, in conjunction with those souls who are the passengers of the U. Do they want a murderer with them. Do you want someone whose, what is not, as part of. (1:40).
Any other question

Q: … If you are traveling to planet Zeus or wherever, how long would you know, you were away for. .. for weeks or months ?
K- It depends what you want to do, and what is the time for you there and here.
Q: You got to sort that out in the beginning, how long you want to be away for?
K- Depends how long it will take you to be there and come back. We are planning an excursion 6th of June, 1 day return, to the moon. The day is nothing. What about if we do a daytime, of let's say Jupiter. How long would it be when we come back, (1:42). to earth 1 day. It all depends, and secondly our day here on earth is a meaningless thing. It's just we entered ourselves to the daylight and we call it a day, and a night, but there is no day, or year in the U. The citizens of the U are not like the chickens, that everybody goes to sleep 6 o'clock earth time. .. It depends. The life style for man will change drastically the way we live. We learn new dimensions, new principles. If you are getting replenished continuously with the energy, do you need to sleep, do you need to rest? Or the body gets used to creating conditions of life, that you can survive any D.

It comes from the back of the principle, that they call it, Einstein didn't understand it, and they called it a "funny thing," that when you turn one atom the other atoms, on the other side of the world turns, because you couldn't understand a condition of polarity, as we are connected.

Now our selves, our souls, as energy, will interact with fields of the U, and switches according to strength and time and to the position, to elevate to a higher levels, (1:44). of the strengths, which goes to inner sanctum, or lower strength which goes outside the boundary. We'll learn a few new things in the next few times to come.

Q: Spanish. .. we have seen several homes in Canary Islands have not been effected by lava … ?
K- Don't know but we see this in most of the volcanic eruptions where .. the lava passes around, and the things stay there on their own. It's not the first time. It's just the way the fields move. The lava moves. I don't think there is anything behind it.

Q: (1:46). Today a bottle of soy sauce fell on ground ..

Q: Is there a way to take a photo from satellites at the exact moment when the dome of peace is made on a Sunday. Perhaps the energy that is formed in the moment is visible and helps us in the expansion of knowledge to others.
K- Maybe the time will come that many people will produce these things, and then we create a permanent dome.
Any other question.

Q: Jalal, … The change is happening, we know for sure that it is coming. How we prepare ourselves and what we have really to increase to do. To be in the right position to be part of all this beauty?
K- You see the (1:48). when you look at today's situation. When we look at the Americans for example, have withdrawn from all the wars as a gun policy. Two weeks later we see a new war, economical warfare started on China. This is the way, when mankind stops all these clever moves, then they become enlightened to new understanding of new things. It's becoming who gangs up better on the others, that they can do something else. It's become a kindergarten warfare I call it. Who will have the top pick of the playground and who will be underneath. In fact, they are all the same problem.

But when the change will come the whole lot will change. The whole lot will change when that comes to. We all will be ready for it .. . You'll feel it when it comes, we'll be there when it takes shape.
Q:
(1:50).
It's secret and you expose it to the public.
K- Everybody knows about it. This is KF, souls bring it out. So we are waiting for a new MaGrav system to appear.

Q: with the help of all KS we'll do something good.
K- That's perfect, Thank you very much.
Any other question.

In the coming time we'll do some teaching, that open up new technologies, and new understanding of the new systems, where we go back to more or less understanding the physical process, how to use a physical systems to create systems for elevation of the STM, for new T&T and with it, new materials, access to new processes, that will bring a lot of joy to many of us, that how advancement to new T.

If you have no other questions we can call it a day today. You had your 2 hours of teaching. (1:52).
Q: Mehraneze, … how STP and soul of mind can travel. .. can we do the 4 Cups for someone in the family?
K- You can do anything for anyone in the family
Q: Even the 5 cups (stacker)?
K- Yes you have to understand you don't use it, it is made for them. Made for them. There is a .. I am trying to be very diplomatic. Through Cup 1, 2, through Cup of Life, to show you the way to battle with this plasma energy, past 2 years.

If you are vigilante with the system, and understand the system working, and on the points, we see, the mutation of these Pl energy, (1:54). in how it's becoming more or less elusive, and some KS, they say, Cup 1 doesn't work, the same as before. It's not that it doesn't work as before, it's just that this plasma energy has mutated to a new D.

The bigger shell, which was the original we saw, we could manage, now it's become the inner shells of, which is much stronger, but deeper inside. So you need to change direction and composition with it.

In the coming time, in the next few days, .. few weeks, we'll introduce you to something you all knew, but if we see the new process with the new energy plasmas, which has been created, all this mayhem, we tell you to go back to a very simple version, and you'll see it works perfect, because the Gans's .. the Gans's you produced in Cup 1 and 2, was a complex Gans energy fields. But these new versions of the Pl energy, has taken a different direction, because the top layer has been cooked, now they go to the middle layer, and this middle layer needs a different T, but we all know it.

We'll tell you next week, or the week after once we do it. As usual we announce it through the protocol, through the Dr. P in Iran, that how you can handle the new variety, and the versions, in a different way, but we all knew it, but you'll see a better result, faster results. (1:56). But let us build this up, then we explain to you, exactly how things have changed.
Shall we call it a day.

Q: Is there an update on the release of Huawei CEO's daughter?
released by Canada. in exchange for the 2 Michaels held in China ..

K- No, it's just that it was obvious that it was going to happen. They couldn't get a headway, they played their game long enough, now it's over, and now we see a new change. They released this one, but on the other hand, they have brought the Chinese economy to its knees. This is the childish game play, which will play until the energy balance is coming in and people see equal. That was obvious that this lady, sooner or later was going to be released, with one excuse or the other. Don't forget there is a big game in the background, political, (1:58). and influential, in so many ways, to go with a lot of energy and food industry. We'll talk about it when it happens, in its time and place.

Teaching is very short, but a lot of meaning behind it if you understood it.
K- more about Linz conference

(2:00).

>> **Proofing to here** >>

400 KSW Sept 30, 2021

END

401st Knowledge Seekers Workshop; October 7, 2021

Note: Transcription has not been checked by KF. Please listen to original recording. (Transcription by KF Brazil)

KS start showing their work again; H plasma ("virgin H") made from nuclear radiation is only way to travel in space not H Gans; Individual portable EU; 100 million investment Chinese government confirmed; 20,000 m2 factory in Iran started; New protocols for fast mutating energy packs

(Note: This is another part to H plasma discussed in 392 KSW about 2:47)

ENGLISH TRANSCRIPTION

(:11). K- … Today is the 401st teaching. opened the KF Enhancement Center, Exhibition Center, and we have the pleasure of many Knowledge Seekers (KS) with us to be, in the coming days and weeks the TV team will release the videos of the opening, when they finish the production . Today we'll share some pictures with you of the Enhancement Center (EC), is well organized in a massive area. It's become the center for excellence for what we call the new T. Where we introduce the new space systems, the new T in the space, where we separate the what we call the jet propulsion and rocket T, to the way the system, the U works. Many KS around the world joined us in the opening,

and it was a pleasure to see that KF has found its own new center, its own position, … and new ways to introduce a new space T. This center will expand into a much bigger structure and center for excellence for manufacturing and teaching. As we announced in the teachings, in the 2 days of the opening, this center will become the center of excellence for teaching the new space T.

Something we have realized during and since the opening of the center, is that we are not about Corona, we are not about Gans's. We are about a new way of travel, we are about new way of living, (:14). not only on this planet but in the space. The 2 new Enhancement Units (EU) were shown, which is the vertical (V) and horizontal (H), and the process of introducing new systems will be carrying on in this center. Hopefully, a new television team will be put together in the center, which are professional to show every aspects of the T step by step. We bring in a new team of research and .. developments for space T. Now that we have established a center, we have established a new .. permanent position. Many of you can come in and see, and extend the understanding of the space T.

This is a space center and not as we've have seen in articles, and other comments, just to do with Corona. This is where man needs the knowledge of the space, where we travel in, with the new knowledge and T. We have to realize that the KF new space center is where we will show new understandings, where we collectively as KS will bring new dimensions (D).

We have seen the factory in Iran has taken place and shape, and will become the center to provide what we call, backup for Iranian nation T, to support Iran with energy, with the plasma (Pl) T. It's the first time, (:16). KF has entered direct work with a nation, with a government. Thanks to the Iranian KF team the factory goes into production this month, and we support .. energy production through the new MaGrav systems, which is already on the tests and has been developed as the full organization factory. We have seen the T now will take shape gradually in China, the same. It's the time, not only show the spin-off of the T, but what T can do.

In the coming weeks we'll show the first flight systems in the center. We know what we are heading for, and we know how we will release the new EU for vision. A hundred units have been ordered, and will be distributed around the world very rapidly, as they are the small packaging system, and they will be in the hands of the KS around the world. Where the blind can see, where people with the brain damage loosing sight can see again. The vision of the man, speaks the truth about the man. When you give vision back to a blind (man), you give him integrity and dignity. We have the T, and have tested the T, and in the next few weeks we'll spread this unit as rapid as possible across this planet.

This is a collaboration and conjunction work with the Chinese KF and KF Austria, and the first sets of these EU will be seen in Austria, and then will be delivered to AZ. In this process, (:18). we will endeavor to start delivering rapid development, deployment technologies. The fracture units, the brain growth systems for those with the stroke. Then the progress with what we have seen with the .. cancer and the rest. Now we have

entered the true phase of delivering T, not in 1 and twos, the KF team has gone into full production, and you will see the benefit of it. We need you as KS to spread the knowledge, and with what we show and .. deliver, confirm the correctness of the T and put silence to many critics, which have been sitting around the KF, and those who have used our development time, and what we call exposure, trying to catch a fish from dirty water.

In the coming weeks we'll release more data directly from the people who have abused, which means we start creating our own, what we call scientific progress data, where the other scientists can watch, doctors can monitor. We entered the phase of what we call, balance technology, where the EU, which will arrive in Austria the first set of .. space units with 6 seats flight systems will be tested in Austria with the lab, where we can initiate the first stage flight system. Then it will be transferred into the appropriate positions, (:20). to be shown for flight.

The KF from this week on, has entered a massive commercialization system, both in America, in Mexico, in Iran , and China, in Austria and we'll follow with Nigeria and the rest. We have invested massive amounts for finances in past 5 or 10 years. We had enemies within, which systematically destroyed us, tried to destroy us step by step. Now we have got rid of the biggest enemy of the KF in past 12 months.

On 21st of October KF will release facts about the people who left, we kicked out of the KF. You'll understand who they are, who they have been , and how they have been close in the KF have been working as a spy, ?? releasing data and everything, government to stop us developing. Some 2.1 TB of information has been achieved, and has been obtained by the KF team, by the same person trying to discredit and destroy KF, over 20 years, continuously undermining the development and worked as spy for the Belgium authorities. One step ahead of us, even the.. full knowledge of the murder of Fabio, they had access to, they knew. We release this information after the 21st of October.

It will be very clear why KF up to now, and even today is running into problem as one person with a massive history of pedophilia from 1975, in big organization infiltrated the KF at the highest level. (:22). Now we release the truth about how we have been damaged and now the damage limitation has started, where there is no more damage to be done. They have been working closely under cover of the pillow, but as a spy, and head of the biggest pedophile group in the world since 1970s. They used the KF to do the same, and now the truth will be released.

We wait, we celebrate the success of the KF, but the success has come because of one move in the last few months, when we got rid of the biggest spy in the structure of the KF, to stop us developing, and preempting every move. Even knowing and planning the death of Fabio, where I was supposed to be killed. We are very open about this and give this as evidence to the court. Many of you got tired of these things for past years, but now we have terabytes of information submitted by the lady, thinking, that the officials and security services will work with what we call, one of the biggest ladies involved in pedophile in the history of western Europe.

Going back into the work of the KF you'll find out, that the KF has turned into the space program. We will try to test flight directly from the KF premises, and at the same time to develop T, that is for space, and can be used by every single one of us. The KS in Linz have seen the first horizontal and vertical system, (:24). hopefully next week we will show you the videos and the first EC, EU, that use this T. The EU V and HEU has already been successfully tested in one or two cases. We are looking forward to more, and make it complete for delivery into the KF centers.

We are from this month on in the business of delivering high tech space T, to replace to replace every other means of the what we call, health enhancements around the world. KF will release massive amounts of T, and we would like you to be part of us. Some to the people you see in the pictures are part of the R&D in their own, they are the KS for years, they have been developing and we have been in progress creating new conditions for knowledge.

We are not about MaGravs anymore, we are about space development, .. understanding new knowledge and new T. In the process of the teaching today, I try to change the position in a way, we haven't done this for a long, long time, is to allow the Knowledge Seekers (KS) to teach, .. the KS to share knowledge with us, what and how they have developed technologies. We used to do this. We used to allow the KS to show what they have developed. They used to bring their T to show us. And we saw immediately through the people who we have gotten rid of in the KF, they used to befriended, (:26). and then attacked in the background with their families and their friends. This process has stopped, we don't have this anymore. We are going back to the process that KS can show what they have developed, and what can be used on the back of this T, by them, that it can be applied by the other KS, and other organizations for further space development.

I thank you all, especially those who came to Linz to be with us, and to share with us, and the beautiful time we had in opening of the Exhibition Center. In the coming weeks and months, gradually the center will become the center of excellence for all of you to start sharing technologies and to manufacture goods, which will spread and bring confidence in the what we call, the new space era.

I would like to ask Rick to take over, bring in the KS who would like to share knowledge with us today. .. the beginning of the 400 series teachings.

R: I am not sure how
K- I threw you in the deep end, huh?
R: (:28).

(:30).
K- .. We used to encouraged people to show their T. Now if there are many people who have experimented a lot in different ways, and different manners. We would like to bring that sharing of the knowledge, the common knowledge with everyone, back on the table

again. We need to encourage back the knowledge, it's not to be afraid of all the attacks and things, which was carried on and still is going on, because we will spend one more session explaining exactly how KF has reached to the point of where we are today. How we got, (:32). without knowing, embroiled into pedophile groups, where the lady we kicked out, has been involved in one of the largest pedophile organizations in western Europe since 1970s, and then they used targeting people, KS with children. Now we are safe, we have managed to close that door, and we can openly speak about it.

The history will talk about itself, and to us how we even managed to get KF. Now when I look at the information in front of me, sometimes, we have been very lucky to get into this position. Every step of our work has been planned, blocked, and in so many ways, one by one, preplanned to stop.

KF has become a massive organization, as you have seen in all sorts of directions. The Chinese operation soon will become a massive rollover of knowledge and T, the same will come from Iran. As we said, because of these situations people have started talking to us, and opening the doors to new knowledge and insight. In the coming weeks… you will see the new EU, which are in progress and development. The KF will gradually spread the knowledge on the same manner and the same way throughout the world. Share with us the knowledge, and we share with the world, the same way as what we have, (:34). our knowledge, to develop, to extend, and to achieve more for all of us.

Maybe today we opened the door for you to be able to share, think about it, bring it back in next week, or week after, or in the following teachings, let us know what you want to show. We'll show what experiment you have done, and what you have achieved, and with it we start progressively developing what we call, systems for people to refer back to, and to be able to go to, to share and to apply.
R: We have experts in the field .. Guatua and Lisa ..

Q: Guatua . (bad connection) (:36).
Q: Wang Lyn: to share agriculture projects.
K- .. do you want to tell us about China. What is the progress.
Q: .. China has a new policy to replace chemical fertilizer. Even to change the GMO. A lot of research. We start to get government inquiries .. (:38).
New policy .. want to the life to be more rich and healthy .
New year we'll see a huge application on agriculture part.
K- Nice to see how China will benefit from the new T.

Iran agriculture harvested rice using the Gans T. Farmer said he doubled harvest . (:40). last winter wheat .. this year now the same land used for the Gans .
By 2025 China will become self-sufficient, .. grain production nation. New T for growth of the harvest have been developed for testing next year in China and Iran.

Q: Dr. Guatua, .. I would like to share screen. (:42). … bringing peace through .. plasma science and T. Some of my research work here in Kenya. Environmental air cleanup livestock feed. 2020. (:44).

This study was to test the efficiency of CO2 Gans liquid plasma MaGrav, MG fields in elimination of offensive odors, from livestock shed as well as open air drying of livestock field. expanded to include outdoor toilets. markets and garbage dumps . Offensive odors completely eliminated . CO2 Gans in plastic bottles .. (:46). places them in 4 corners, and one hanging in the back .. 7 bottles. These bottles are the same because there must be some difference naturally .
as soon as I place these on ground, smell immediately gone, … since 2018.

Did same at outhouses of school.
(:48).
A lady put Gans in greenhouses in a very dry place. After placing the plants brought back to life.
placed in star formation . (:50).

Pineapples drying outside, used star formation , they dried without rotting . ..

(:52).
Conclusion:

(:54). that there is improvement in pineapple growth.

(:56). every animals are feed CO2 Gans liquid plasma .

K- Thank you .. It's beautiful the work you do. We learn more and more how the KS are using the knowledge …. show pictures in China.
… (:58). .. (1:00).
Shows video from China. (can't hear very well …)
This is the Chinese Tic Take… harvested 100 Kiwis
.. Boss told him to only use Gans not fertilizer .. on whole farm. (1:02). Taste is very good ..
They put more than 3000 Gans bottles to cover the whole fields. I stayed there 1 night, I could feel all the energy fields from the huge Gans magic .. like floating on a boat ..
..
(1:04). Okay this one is enough.
K- Rick you have another one you want to play.
Q: This is another organic farm. We will build all as an organic farm. You can see the cucumber . Before only every 3 leaves can grow 1 cucumber. Now every leaf can grow cucumber. That means we can reach 3 times or even more then the old way of harvest. The taste is very healthy. They spray 4 times (Gans) but they also use some bio fertilizer, but that is very expensive. (1:06). they combine and but only use 1/4 recommended dose of bio fertilizer… achieve good harvest.
Is there anything else?
K- How is your development in China, now that you set the factory up and going into production.

Q: are factory is still in decoration… office ready this month. . Production line ready next month. We heard that Chinese government wants to invest 100 million dollars in our project. start negotiations.
K- 3 years they have been waiting for factory .. (1:08). Now they have confirmed 100 million investment will be going to some another 19 factories similar. in conjunction with the KF. Thanks to all the KS work in China which have kept the knowledge in forefront. Thanks to people like WL, Chou Jin many more in background. .. You can confirm. the Chinese officials themselves have confirmed that they have allocated this 100 million for collaboration in past 2 - 3 weeks …
Any other information are you there Rick (1:10).

Share more pictures of Linz exhibition center. The vertical EU is the far system .. The KF is in 2 floors. and TV center. Rick has dropped off. (1:12).
Q:
K- We go back to teachings and shared some knowledge, and we try from now on, to share what we call, share knowledge and T, in what we call, in appropriate way that more future KS can use the know-how and the knowledge for changing conditions, and for bringing balance into what we call, the understanding and T of the KF.

Our ultimate goal from now on, now that we have opened the center is establishment and what we call the flight tests. This is where the change will come with, as much as in sharing knowledge and T with others. Receiving as WL said, a hundred million investments from the Chinese government for the first phase of the first factory, out of another 19 to be built, shows the correctness of the T, proven to one of the largest nations in the world.

At the same time, we see now the same process will take shape in the US. KF supporting its organizations in USA, will soon show the same operation and investments from different governments and nations. We still operate, (1:14). under the banner of the technology in exchange for peace. In the coming time that banner will be expanded into, not only for peace, but in sharing space T together.

I see it as part of the responsibility of the KS to bring Kenya, China, even Bangladesh, or third world nations as they call them in South America, to all be part of the space program, that no nation is left, and the space T is not a privilege to what we call, certain nations. In coming months we'll invite those of you who have experience in space development, irrespective of your color, race or language to join us in Linz for the first structure setting of the flight systems in the space development of the KF. We have a massive opportunity in the new exhibition center. We will disclose further and further, as step by step things have taken shape and we develop more. We have the facilities to share knowledge with many governments, at the same time with KS through governments.

What is the next step of the space development? Where does the KF space T will take us. What do we expect to see in this new development? We share knowledge but how will this knowledge bring fruits of what we call, peace and dividend of peace for all of us. We all are faced with the new dilemma. (1:16). We are all trapped in changes which, we

have not been used to. If you go back maybe 2.5 years ago .. we were talking about how we take the people into the space station. Who will launch the next machine to be in the space for a few seconds. We were hearing in the news how military forces were planning exercises to show alliance, and to show new T of weapons T.

In past 2.5 years all have become silent. Mankind has changed. Mankind has become imprisoned with one small virus. Mankind has changed his course. Many of us lost jobs, .. lost future in what was to be, and now is not. We see end of weapon T, because there is no one to buy weapons. Most of the money is going into injections, supporting national structure for health and people without jobs. We see more and more pressure on governments to find a new solution, to find a new D. Through KS and your work now you have to become that alternative. You have to take these to your governments, that there is an alternative, (1:18). not for Corona, but for new jobs, new space T , new D. In that process we have to show KF is not just what we call, a knowledge, but is a T. It's a T where governments can rely on, creating new jobs, and governments can rely on creating new D.

What is the next step for all of us? How can we as KS establish centers where like what we seen with Dr. Guatua, the T can be transferred from one nation to another, from one village to another. As we seen with WL, .. in Iran everyone is ready to embrace the new change, because it is free, it's our knowledge and T. One of the best things for us, is to what we call, "go out and start sharing," sharing the knowledge as much as you can. At the same time, share it in a way that people can understand, it's not a source of enigma, it's not something that we do not know, that there is something different.

Try to walk away from connecting the KF work, suddenly to Corona. Corona is something temporarily. Do not mention, (1:20). do not goes towards portraying we have a solution for Corona. We have the solution, people, we have the solution for viruses in the space, nothing to do with the name of the man's problem, today's Corona, in the space another virus will be blown out, whatever else. So we have to change our tone, .. the way we educate, the way we share knowledge.

Do not go around the framework that we have a solution for Corona. We don't have a solution for Corona. We have found the way viruses work and we have found the solution for viruses in the space. If man wants to use it for present time, under any name, that's his privilege. This is the sharing of the knowledge. We have to teach our KS, that do not get attached to one thing or the other. We don't have a Corona solution. We have a ?? solution in the space, can create condition, and holding energy packs away from the physicality, that life can become bearable.

So this is how we to reeducate ourselves, understand and share the correct way, that people see a bigger picture of the knowledge, a space T, agriculture, what we call the use of it in different application, and then in energy, in health and the rest of it. Open the horizon of the knowledge, and walk away from talking about one thing and one matter, which is now, because it's a hot cake. You get touched by a virus, you know the solution, use it to protect yourself, and walk away from it. (1:22). That's all you need to know, it

doesn't matter what name you give into it, what name it might have. Try to teach a broader aspects of the T, the space T, and then, if it comes to one thing or another, just touch on it, and that's all you need to do, and let the people understand and explain and then themselves to develop it.

Rick I see you are back.
Go for a break.

Proofed to here >>>

>> BREAK >>> 401 KSW Oct 7 , 2021 (1:31).

K- Yes .. I was just looking at something I was forwarding you to see. This is the what we call, the cotton production this year, which has used Gans T in the, our KS from China, Chou has just forwarded these to be shared. .. (1:32). You have a video there. Have you received it ..
Q: Today is the harvest date. Chou is at the farm harvesting the cotton ..

Videos of cotton.

K- If you remember, we told you about 6 months ago, that we supported the farmer with the Gans's. He already tested the Gans's last year. Would you like to explain more WL.
Q: Yes, this cotton is made by the same, we gave the Gans to the farmers and they soaked the seeds, and planted. This time they didn't use any fertilizer, and used the ?? to spray. We are expecting the harvest, (1:34). for a long time. Since last year they planted maybe several "mole"… when

He said, the cotton changed, it make him feel like comfortable. With 6 kg (blanket ??) in the winter and the summer the same, but he feel the same comfortable. He doesn't feel hot in summer, and also doesn't feel cold in winter. It's like the Gans field became another, like energy pack, package him. It's good. We sent cotton to an instrument to test .. something to test the field. After they take out the cotton (from the instrument) it shows there is still something there. The field, energy there. It shows those cottons have already carried the Gans MaGrav fields. Use this cotton to make clothes (1:36).

Plays video of cotton.

K- Do you have a second video? This is the harvest we have been waiting for. KS around the world are .. trying and testing everything in how they can improve the agriculture. This video is live from China.

This is the new harvest. .. the harvest increase we'll know, once it's completed, this harvesting. The KF will take the seed after the harvest, preserve it in Jian Jiang, and next year the new seeds totally grown through the Gans production will be used by them (1:38). for the next cycle, .. agriculture cycle. Then we're producing .. the harvest which has no modification in a natural process, but increasing the harvest by once or twice more than what it is. The KF China has taken a new policy, what they have done this year is they give Gans's to the farmer free, on a contract basis. That the farmer knows how much harvest he can have from his work over past years, and what's the national growth (average) for the harvest. Let's say if they produce 2 tons for a given area, and the national average is 2 toms, because the government controls everything, we know roughly. At the end of the harvest, if the farmer produces 3 or 4 or 5 tons, then the KF gets paid with the difference in the increase in the harvest. IN a way, what we have done, we have given the Gans freely to the farmers, and if they increase the harvest plus, percentage of the increase plus, will come to the KF as a payment, that is allows us to research more. This way we rapidly grow into .. the farming community in China. Which means farmer increases his income without any investment, but shares part of the increase with what we call, the people who increased the harvest for him. This approach has always worked in many aspects, because the farmer who has been used to maximum 2 ton, and lives in the poverty line, (1:40). now he takes 3 or 4 ton, has a better income and the KF takes part of it, off the increase, that allows us to help the other farmers in the next generation.

So most probably in the next cycle, next year, thousands and thousands of farmers will be given Gans freely. In sharing the harvest, the increasing the harvest on a national average basis figures released by the government. We are walking by example, the farmers out of poverty. This is what we said from the beginning.

This is why the Chinese government is prepared to invest hundreds of millions with the KF. We are not there to prove, we gave you something to give us. We give it to you freely, you benefit by it, and you share. This will become a massive movement within the KF and the Chinese agriculture. Where there is no need for fertilizers, but they increase in harvest, not only moves the nation out of poverty of importing grains, but it moves the farmers out of poverty in a direct way, without any investment from the government. KF is the investor.

In that position with the new factories setup, will allow the whole nation in one massive way, next 2 to 3 years, to become a nation self-sufficient for grain. Now you have seen the scales, you've seen the others, and then we'll become part of the what we call Chinese agriculture. Every single KS in China has worked so hard, and now we see the harvest, we see the fruit of the work. This is why we went into China to bring what we call, life, (1:42). back into some 25 million below poverty line farmers, which in the next 3 to 5 years will become self-sufficient and out of the poverty line.

Giving the Gans's freely to the farmer was the biggest move the KF made in China, in freely giving access, and people like Chou with his team in Guo Jo, encouraging the

farmers to receive these freely, and then prepared to share. This will bring change, to what we call the grain policy in China, and at the same time as WL told us, the reason you hear the Chinese invest with us, is because we invested in China as KF and as KS. Any other question .. .

Q: WL , you should see the aborigines (egg plants) and the flowers ..

(1:44).
(1:46).
(1:48).

Are there any questions anywhere?

It's good to be able to share with KS what they have achieved and we kept away in direct teachings all the time . Now we bring back what they studied and what they developed and how it is effecting their .. progress.
Are there any questions

(1:50).
Q: . Can you help us to understand about Hydrogen (H) as a future for energy, is it a good idea or not from our plasma science point of view?
R: I guess H as a fuel has been in the news recently. They can create it with solar energy, because the solar energy prices are coming down, it makes it more lucrative to make H as a fuel. But of course what do you think about H as a future for energy ..?
K- H from KF point of view as a M field energy source is different, than what you speak about H today in what we call energy industry. We look at H in a totally different angle, in a totally different view. We use H in a very different ways for different applications in the Gans T. Most of the H T in space T is hidden from public. We'll never teach. It's part of the T, which is for space development. In what we call, agriculture, human level, Gans level, which you create the H and CH3, and the rest. It has its own application. (1:52).

But H as a plasmatic M field system, which has never been taught by the KF. We never teach it. But we develop a different type of H for space development.

This is not something new, originally it was used in .. flight tests, and it's a different way of using, and enhancing the field of the M fields of the plasma, we call the H. In deep space T, what you call the plasma of the H, is the only more or less space fuel, which can take man across the U. You cannot do it with the Gans of H, and the rest. Space H and energy is beyond the understanding of the present time for many people, but it has been used.

We use it very, what I call, as a nuclear physicist understanding of the T, in the public and most of the KS do not have, what I call, the concept, or the understanding, of what I call, space T in that level. If you look at this picture, your 2 pictures, (1:54). in the center, when you look at it, in the far end, these are the edge of space plasma T in H. But it is not the Gans H, as you think. These 2 systems use the H of the Plasma T only. But

we create the H in these systems through nuclear radiation, nuclear development radiation. These are very advanced H development T. We create the H from base zero. From fields to fields, to G and M fields. The H game played nowadays for cars and the rest, is what I call, a gimmick, to what actually H does and work and used in the space.

This is one of the reasons we pushed open the Iran centrifuge systems, the development of the H through nuclear power T, is the only way to access the space, deep space, not with Gans's, and you hope you create lift and motion.

R: Is the H part of the lift T for the so called flying car T for use on earth as well?
K- Yes, But not the H, (1:56). the way you produce it. It's a ..
R: You mentioned atomic H back in the early days of the plasma group. Is that what you are referring to or ?
K- Yes, we create the H from zero, the way it is done in the U, so we can control its gravity and its M field. This knowledge is not available. No KS has access. It's not a common knowledge. It's a nuclear weapons T.
R: No wonder I can't get someone to show their saucer in their garage. It's very high priority T, that really should be reserved for those organizations, that are designed to be able to handle such things. So that makes sense, it's not really for public consumption generally speaking.

K- No, space T it's the same as what we call in common language, plasma. And people say, oh, there is a plasma in the blood, or we have a plasma T in CERN. H is one of the most powerful weapons T in the U. In weapon, as in a way, for protection. In a way, for deep space travel. You produce from cosmic rays into the H. I was explaining this in a very short way in the opening conference this Saturday to answer one of the KS. We create H from cosmic rays. In these systems, we produce cosmic rays, (1:58). in a very specific way, and from rays we produce, we gather plasmas, and then we dictate the plasma in what we want to do with it, that's why we can change it, convert it. One of the reason we are heading for Iran's nuclear centers in centrifuge in Natanz, is that when these fast breeders, fast what we call cycling systems, we can access large amounts of what we call, cosmic rays. We are not after the weapon to create what we call, uranium or plutonium, in the process of the separation, there are huge amounts of rays, which only can be done at 30,000 rmp (rpm), which the Iranian scientists have managed to have access to it, which allows production of massive amounts of cosmic rays, which allows us to create H in different shape or form. Then used for gravitational field creation.

The future of the deep space travel sits and relies on the fast, what we call, systems which can deliver, rapid .. fields without conversion into nuclear material. At the moment Iran is the only nation, which has the access to such a 30,000 rmp, what we call, technologies. We can travel, we can use this system as part of the operation of the feeding system, and we can change direction. The H technology in nuclear center in Natanz, (2:00). are the key to the future development to space T of the man. This is why we work to bring cosmic .. ray T, H into operation. This is what originally I developed in the space simple way. And that is what we achieved, lift and motion. But for the deep space travel you need a continuous field flow. Then in the future, most probably we'll bring it down to be

able to be used in what we call, automotive and car industry, and for transmutation and transportation. You cannot create H out of, the way you do with Gans's for the space T. The H of the space T has to come through cosmic ray collection, which not .. I don't know any scientists at the moment who has such a knowledge. It is gathered by the KF as part of our knowledge and belongs to the upcoming space development.
Any other question.

Q: could you help her send an official document to the Romanian government about that topic with the use of H .. ?
K- All negotiations will be done through Iranian, (2:02). president's office of science and T. All our situation now, ?? all our development in that line, will be done through the office of the scientific research of the office of his Excellency President Raisi of Iran. We are in that progress, even with the Chinese, all communications has to made in respect to this and energy, through this office. The Iranian government has appointed, I think, an officer in this respect to KF and this kind of work. We only share, we don't give names to public, and it will be done directly, internally between governments.
R: .. the information was already offered to governments a few years as the KF USB Key, offered to all governments of the world ..

K- Now we see what happens, how we take shape, the collaborations between the KF and the Iranian .. administration. If we do not succeed the way we plan, we will take a new course, but at the moment all our affairs in respect to energy, and space, and defense is handled by the, and will be handled through the offices, as is ?? worked by our KF in Iran.

Q: .. (2:04). .. good Dutchman …
K- flying Dutchman
Q: .. you said a long time ago that when someone was getting into the EU if they had metal parts put in their body, like a shoulder, hip or replacements, prosthesis, that the current T, they would have to wait for improvements in the T before they could use that. Is that still true with the EU, or not?
K- The new vertical EU and Horizontal EU, in this, we have resolved this matter now. The new HEU is functionality is fully controlled in a different way, and can, but you have to consider in what extent the rest of the use of the system will have on the .. implant. The new HEU, (2:06). can isolate certain parts, because we can control the reactors in that way. We have made a lot of improvements on it, but it can be done, yes. Don't forget we haven't shown, you haven't seen today yet the HEU and VEU hopefully the videos will be made for it next week. They go for sale for 250,000 each, as of next week. The same with the Vision EU, these 3 units will become an addition to all the Enhancement Centers. We ?? get a bigger opportunity, covers more spectrum and use. ??
Q: .. I have a stint in my heart. So you could get around that?
K- In some cases yes. .. We can isolate some positions, now, if we can yes.

We can pinpoint accuracy to the center of the tumor. So we should be able to withdraw or isolate certain environments too.

The new system has been developed by the KF, which you most probably will see in the E Centers, is what we call, (2:08). "Individual Portable Enhancement Units". It's already been tested, and its work, its function is very unique. For example, if you have a tumor, and then the system works directly on the tumor itself, it doesn't matter what kind of tumor it is.

Then we handle the secondary conditions through the HEU or VEU. These units can be used for open heart surgeries, to use in a short term, gradually, instead of having open heart surgery for blocked arteries, that we gradually clean up the blood vessels with the surgeons understanding what they do. These units will become part of the tool of the E Centers, as we mass produce it for specific conditions, be it for, what do you call, heart repairs without operation, and that kind of things. It's already been developed .. maybe people like you who have a stint can gradually with supervision of doctors who know what they are doing, do a full repair. We foresee (a time) when no need for a change of the heart valve, with the new systems which are getting developed. It just needs a deeper .. development of the T. (2:10).

Q: The EU are still for medical .. ?
K- We don't enter medical, we are there to enhance the body function. All our systems are enhancing the functionality. They are not medical systems.
Q: Okay, so anybody can order the EU?
K- It has to be done within the rules of the KF in the Enhancement Centers. There are contractual agreements. You cannot just buy one and think you can use it at home. It has rules and regulations. If you buy a system it has to be used by public, and it has to be under supervision of the medical doctors and in the centers of the KF. It's become more and accessible, .. reachable. The HEU and VEU, the price which is put in, is become affordable for many people to be able to open centers and to start using it for public.

We have officially started the production and distribution of all the EU right across the production line. It's not only the Body EU, you have the H and the V, the Vision, the Fracture Unit , you have the individual units. The family is growing. The centers, when you go to an EC, (2:12). there should be every possibility to change the position and condition of the body of the man. We don't treat, it's the processing of the body.

We have many enquiries from people how have been wanting to purchase, to build, or organize EC, as of next week you'll be responded to now that we have completed the process of the .. completion of the reactors and EU, you'll be contacted back, or if you want to go ahead with purchase and setting up of the EC around the world. You will receive immediate response more or less. As of November this year 3 EU a week will be released around the world, then after Chinese New Year we expect to release 1 EU a day, to fulfill our commitments, and at the same time, the same 1 or 2 EU V or H, a day, and a number of Vision EU. We are now ready to deliver, and we start a process of mass production. It took a year and half to develop new EU, with the view of .. rapid deployment and application. (2:14).
Any other question.

Q; Kay, ..
K- Good morning Kay are you still in Linz or have you left?
Q: .. nice to hear you, you sound a bit better than fast ?? company. … very nice beautiful center and the development is astonishing. Question about trying to get some governmental body or institution involved in projects as are happening in other parts of the world, particularly China. The government there is more in tune with the KF as you carried out quite a lot in a different level. So in the UK … ?? I have been trying for a few months to get in touch with certain people who are involved in the ministry, perhaps agriculture, (2:16). as well as the health ministry. .. do you think the UK , who is the source of all the trouble in the planet, would that be an appropriate approach ?

K- You can approach most of the governments, it depends how they perceive, and how they work. You got to realize when you speak about China, I spent nearly 3 years nonstop in China. We spent more or less, .. on a daily, weekly interaction with different officials, with different government organizations in China. Chinese success doesn't just come out of being the KF. The KF team relentlessly for 3 years, had interface with the officials, in agriculture, in everything else, in military, in defense, in universities, and has been, we earned our knowledge and respect by showing the T, and at the same time the Chinese organizations are very slow, and with Corona now, it has taken shape. I am sure once, now, that we have been told, that the Chinese have released the first hundred million investment to KF, and it will go public, the other governments will start understanding and releasing the same position.

Soon we'll make the same announcements in US. Everything takes time, now after the Chinese holidays, how it will come, it will be in the public domain, (2:18). how the Chinese government handles the first phase of the KF.

You got to realize we were "patents," we were "talks," then KS did some other things, now we open offices to show that there is a reality to the T, and now we open the factories, and the governments now take notice. This is the difference. We came to an agreement with the Chinese officials some 2 years ago, when we setup in the background, in partnership with the Chinese secondary, what we call, government organization, hundred million based Euro company, which we were 50% knowledge based, and they were 50% capital based. Then earlier this year, they transferred the other 50% to us, that the KF China became 100%, one hundred million company organization, then when we set the company up, factory in Jin Jiang, the Chinese government followed the procedure with .. hundred million investments, and then another 19 of these to follow in the next 2 years. This is a massive .. hard work by KS. It's not just a talk. A lot KS across China, they helped with Corona, with agriculture, with any other aspects, and the Chinese government has kept an overall view of what this T can do, and now they are investing with it.

I am sure in the next few weeks, (2:20). the whole angle in respect to KF development around the world will change. KF Markray, backing shareholding of it, as you have seen, now approved, and now has reentered .. the American stock market. I have resigned as the CEO of the company, but we have controlling share of the company, and we lay out

the future for new developments in agriculture and everything else, in US, as much as in China. We will see the next development in the same progressive development. The same will come with Mexico. Now once, when one or two nations start rolling like this, the other governments will roll behind it.

Because up to now, we had a massive, negative 2 TB, what we call lies and accusations, which we didn't know, had been sent to other governments. Now we found out what it is. This will kick back for those who set this way up. At the same time it's not only agriculture and other things, energy, now we go into the space development. This will change a lot of things, for a lot of nations. That's thanks to all of you, all KS being in Iran, ..London, Romania, Africa, everywhere around the world.

Once China makes a move on the KF, the way they have done, you will see the whole structure will change. That's thanks to KF China with a massive factory, which is there under development.

Q: I hope you achieve that as soon as possible. (2:22).
K- Hope, we are doing, closely working with you, as well in Iran, with a massive, your support and your families support, in building the largest KF factory in Iran. I thank you for all your support.
Q: It's a pleasure.
K- KF in conjunction with (Kay's) family has setup to build, it's already built, it's going under operation to become, in next 12 months to 2 years, the largest manufacturing base of 20,000 square meters in North of Iran, in effecting agriculture and the rest of it. And is a close collaboration as the whole of the family and the KF.
Thank you very much (Kay)
Q: Thank you, God bless you, it's because of you this thing is in motion, and helping humanity being a brightest light ever. I hope the sooner the better.
K- The beauty of it is, the harder they worked to damage, the easier it became, because people have to think twice, how could it be. Now we see, changes are on the way. Thank you for all your work.
Any other question (2:24).

Q: .. When we travel in deep space using the Pl of light, would collisions be a possibility if others also travel at the same plasmatic magic field light strength?
K- No, impossible. We did a test some years ago with the professors in electronics department of Ghent University, which we were heading to build the first under, or 200 kg vehicle, that could float. In our research and testing, one of the first things we noticed in the laboratories of the Ghent university, was it will be impossible to collide even with the body of the man, when you use Gans T for motion in cars. Because you create field in a specific way. With the new .. cars, even in the physical D, let alone at the light level, you interact with the fields and create a space gap.

It will be impossible to run people over more or less. This is one of the first things we came to conclusion in testing. We see, (2:26). combination of the changes. Crashing cars will become impossibility at any speed. It's a very interesting phenomena, it will be

shown in the up coming time, because you drive in dynamic structure, you always field interact in the opposite pole, similar to direction, which means you can never come close to encounter, to interact. It's the same with space T travel, unless you change polarity of the fields. It's impossibility.

Q: .. I remember teaching from the past where they discussed a MaGrav method to reduce the number of H in the nucleus, with the objective of reaching the amount of 1 H in the reactors nucleus. With the use of this method was the result achieved?
K- When we explained such a thing, that is the excellence of what we call, "ultimate understanding of the work," and it can be done in a different way. (2:28). We always achieve singularity of what we call an atom. You call it a H. We can singularity pick what we need, and add to when we need it.

There is a very big, as I said earlier on today, there is a very big difference in plasma technology of H. We have a H in the body of the man as part of the amino acid, we have as part of the air. At the same time we have a H bomb, at the same time we have H stars, at the same time we have H plasma conditions in the U. It's understanding what that condition of H, is created, is needed for what purpose. It's again use of a common language, which brings a misunderstanding. A H bomb, it's the same H which you are trying to use for energy, is the same H that you use in H balloons, but the same H in a specific way, it moves one of the biggest stars or galaxies in the U.

You have to understand how to apply it, and where to apply it, and how you can use the same H, with a different angle, or property and expansion, that functions one, in the body of the man to move a little bit of energy, (2:30). or becomes part of the water cell, .. motion and power for energy, or becomes part of motion of a galaxy or a universal flight system. This is what most of KS have not understood. A common terminology of the word, does not bring common understanding of the application of the same thing. We separate H in cylinders or in reactors for a specific way. Or we produce H Gans's for the human level consumption, but in a different way in reactors we create the same H, but maybe move thousands of tons of weight, or we create speeds beyond imagination. It's understanding how to apply the fields and their interactions. We say in English, "horses for courses," just because it's a horse, doesn't mean can do everything, to be a runner or a jumper.
Any other question. (2:32).

Q: .. if it's over with the energy packages (virus) so why are we ranked 3rd with mortality and 2nd place with infections in the world.
R: I think he is referring to Romania.
K- Pardon
R: repeats
K- The things is. .. The whole world at the moment is entangled with it. The problem is that these energy packages are mutating very rapidly. We have recently, we will release in next 7 days, a new protocol through Dr. Arapur in Iran, as we usually do for new what I call the fevers and temperatures, which comes with the new energy packs. A new protocol in how you can convert and divert from it.

The problem is governments have collectively to apply the environmental changes, and they are not doing so. Until that time, these energy packs will float everywhere, and will effect individual persons, or collectively. (2:34). We have not, the only thing we need to understand, is that these energy packs are all over the U, it's not just exclusivity of this planet. We have to create a pattern and understanding of the application of it. It is needed to be understood and handled collectively.

This is the beginning of the change for the human race with these energy packs. In the space we'll change, and will come every time we encounter, in new ways, we mutate ourselves now, how to handle it.
Any other question

R: ..
K- We have been at it for 2.5 hours. Thank you for today and I hope we start to back in the pattern that KS can share in what they have achieved around the world, and how things will turn out to be. (2:36)
R: .. We can remind people if they would like to show examples of Pl T they can prepare something, a presentation or some sort for next weeks workshop. Are you open to that from here on in, for people to show the T? would that be ok?
K- Yes, as long as we see what is there to be shown. We do not want to bring the situation we had 2- 3 years ago, that the individuals they come her to gain fame and try, and then they become gurus and everything else goes wrong. We are just there to show, the T and that's it. We want to stop these abuses of, just because you made a presentation, than you become abusive towards everything else.
Thank you

(2:38).
K- I attended last Thursday the Vietnamese teaching 60 odd people fantastic way of teaching one of the old members of the UC there

(2:40).

402nd Knowledge Seekers Workshop; October 14, 2021

Note: Transcription has not been checked by KF. Please listen to original recording.
(Transcription by KF Brazil)

Remember this day rest of life - release new flight system 4 seat spaceship

Vertical and Horizontal Enhancement units videos; HEU embedded in EU breaks all barriers; advanced booking flights to Mars; illnesses processed during flight ; Gifted with Mitra ; Checkmate on those who tried to rule man; The STM will run humanity; nuclear warheads obsolete; spaceship is peaceful no defense technology; Birth of Mitra as soul of universe; Deliver KF goods with systems ; How true are you to what you wish; Man has to work hard to reach soul's desires ; Despite attacks KS keep on serving teaching; STM will be elevated by flying in systems; Just the STP has chosen to go wrong way;

ENGLISH TRANSCRIPTION

(:10).
Creation Video .. (:28).

K- .. Today many of you will remember for the rest of your life, what is brought up, what is to be shown, and what has become the process of the totality of the understanding of KF work. We have come to a point of change. The KF and .. as of today brings a new era, a new dimension (D), a new understanding in the process of what we call, "intellectual rights and accessibility of the knowledge worldwide." Today is what we call, not much teaching, but breaking of news, introducing new T, and in a way, opening the hand of the man, (:30). from the shackles of this planet. We will introduce the T in steps today, and with it, we begin a new D in many of our works. As you were aware we started the opening of the exhibition in Linz… and with it we opened a new door, a new D, in establishing the systems, which are not known, and unknown, and in so many ways, extending the T, which were already .. released into the .. market of humanity. Rick would you please play the first video of the vertical (V) and horizontal (Enhancement Unit EU).

This is a commercial made by the KF, but in depth introduces a new T, a fundamental break from the present knowledge and present world of science. We are very much in advanced T, and this T is unknown, literally unknown, and it brings a new D to humanity. In the process of the teachings today I will explain the major breakthroughs in the world of science and T, which the KF releases today.

Many of you will remember 14th October, 2021, as the time when the history of man has changed, (:32). and it will change.

Shows the video of the VEU

This is the new VEU which will become prelude to .. or what is commonly known as transmutation and transportation (T&T) of elements, of objects, of human beings without the use of what we call, the present means of transportation. This is developed for removable and enhancements of many conditions, (:34). in the body of the man. The beauty of it is, it has the ability to connect the man in any position in the U, to its environment, to its structure, where the fields of .. U, when in interaction with the field of

the system allows the process of the development, and transmutation of the fields in both in the physical and in D of the Soul of the Man (STM).

This system is a major breakthrough in science and technology (S&T), and in the next few minutes, as we expand to the next elements of what has been released now by the KF will bring you to understand, man as of today, has become independent of this planet. We do not need rules and regulations, we do not need conditions of the governments and those who try to enforce conditions on us, we can use the system in the depth of the U. Above earth's atmosphere on the planet moon and the rest. Which international new laws. Man becomes part of the U Community.

Play the second video please .This units are present in Linz EC. they have been shown last week …
You will see not pain pads and pain pens, but T will change the history of mankind in totality of S&T. (:36).
Shows video .. HEU

The new what we call, HEU this is a breakthrough for the world of S&T, where we can hold the soul and the physicality of the man, in the same condition and operation for decades. We can create a condition to change the position of the man's understanding of his own weaknesses within the physical construction. Where man will come to understand and develop new structures of control of every cell of the body of the man. We have the capability and the knowledge to hold on to the soul, but elevate the Soul of the Physicality (STP), till an illness has been processed by the 2 together. You can walk in a with all sorts of conditions, (:38). which are unthinkable today to overcome, and within hours and days you walk away with no condition.

The new HEU in conjunction, embedded in the Universal EU, creates conditions which man and modern science and T have never known. It creates a new condition, that allows man to breakthrough all the barriers, all conditions, all plasma (Pl) conditions, which now have created crisis around the world, can and within interaction of the 2 systems together, create that man will be free from every condition of what we call, "collection of the fields of the plasmas in the U."

You walk on the surface of the planet, you absorb energy pack plasmas, which can endanger the life. You walk into the what we call, HEU within the Universal EU, and within minutes the balance of the fields, completely, completely allowing a new D and a new .. field transformation. In a way, if you look at this system, if you see, .. if you look at this system and understand, at the moment today, we imprison our people, because of the psychological, because of the mental condition, within minutes within these systems, man will commit no crime. We can reach not only the STM, but the conduct of the physicality .. which connects to the STM. The application and implication of the new, (:40). HEU is beyond imagination.

If you remember months or years ago, I explained that there is in the U, we have no prisons. No one misconducts, because man in the process of life, will be put into these

systems, and you will see the change. There'll be no addiction, those who are addicted to cocaine, and heroine and the rest of it, within minutes of being in these systems will overcome the desire. The introduction of these systems brings a total radical change in the world of S&T.

These units are on exhibition in Linz. It's not a theory anymore. Some of these systems have already been tested and they show their effectiveness, they show their work. In a way, we change the prisons, we change sentencing people to life in boxes, to enhancing their souls and physicality, and within minutes, within days, they shall become a perfect man. These are not dreams anymore. These are the reality, systems, technologies which is available to man. It's the responsibility of the governments to promote and deliver these to the prison cells, to change and close these boxes, where we put many people for years, without knowing why and what's the reason. This brings a closure to mental institutes, where there is no need for man to be locked up, when the level of the understanding of the STP and the STM does not create the balance. (:42). This T, introduction of the new HEU and VEU systems is a major, major breakthrough in the work of the KF, and in the time to come. We introduced to you today a massive, major breakthrough, which many of you have been waiting for, and as of next year it's available to all of us.

Would you like to play the 3rd video. This video will bring a major breakthrough in everyday life of the man and opens man the shackles of the governments and situations and restrictions which have been put on man. With this new T you'll become the real man of U.

Video 3 flight system (:44).

As you have seen, this is for the first time KF releases the first spaceship flight system. These systems have only been ordered to China to be built, and the first series of this system will be seen in Linz in November, December of this year. We start accepting orders for the sale of this unit and the KF Sales has opened the channel for it. You can book to fly to Moon and Mars in 2022, in advanced booking. As usual it's contractual basis, we carry 4 passengers with these systems. As we said, we'll try 6th of June, 2022 for the first flight daily return to moon. From today we start selling tickets for space excursion beyond the atmosphere of this planet. The beauty with this system is, that another version of it will be supplied to airlines and to governments and people who can, and bring a new D of transportation. As you see it has no wheels. It can, and it flies, and it can, in a way, be tuned to travel, (:46). between the cities and towns. This system is virtually a compact new transportation system without wheels. It's for the first time man breaks away from landing, having wheels, and following billion years of work, of wheels and attachment.

The system is set to fly above your speed of light in given condition, and within the atmospheric condition. For example you can fly from Tehran to New York in less than 5 minutes. This is a physical system and it will be delivered by the KF, as of next year to any organization at 10 million Euro on the least basis, that we can control for the beginning of the time, the process of the development. The beauty of mixing this system

with the VEU or HEU is that, we can process any illness beyond the boundaries of the planet earth, beyond the rules and regulations, which is put to strip man from every development and every process. We free man from the shackle of pharmaceuticals.

In a way, we foresee to produce thousands of these a year that makes and brings a new D. It's a new .. transportation industry. Most probably many of you in the next 5 years will own one of thee in front of your house. In a way, you do not need to be shackled down with the wheels on this planet. In October, November of next year the first transportation system to airlines will be distributed. As of December of next year, (:48). we'll go into the cargo delivery with the same system. In a way, we use KF Jin & Jiang for example to deliver our goods to KF in Linz in 5 to 10 minutes. The whole of the shipping industry, the whole of the marine industry will change. I warned this to the governments some years ago. Now the system is on the table.

A lot of governments need to renegotiate the borders, how they handle their citizens. How collectively we become part of one structure. In a way, these units, you can fly to moon, stay there for a few days with the KF program for less than $250,000 or Euros. But then you learn new. You enter a new D. These systems are, and will be delivered, before end of this year, step by step into the community and world public, that you can see.

In so many ways, today you have seen evolution and revolution in transportation, which moves man to a different D, to different understanding, and allows us to become the man of U. It's the first step, it's the first understanding, in a way allows us to become perfect citizens. Understanding while we are traveling in these units from Tehran to Washington, any emotional mishandling which might happen in Tehran to you, that could lead to cancer, (:50). or another disease, or you might have picked up another condition in Washington while you are going to Beijing. And then you always live within the systems, are fed, or looked after emotionally, psychologically. You see in these systems there are no cargo, there's no place for carrying food and medicine.

You can become passengers of these systems for decades in the space and U. This is why as part of the development of this T, we always emphasize a nuclear T, if and when man understands the beauty of what he achieved in the advanced nuclear reactors, and understand how to use them, in the benefit of the travel in the space, man will become very fast, detached from many of the material state conditions. Soon a lot of things will change, governments will not become as governments, governments become as working through the work, as what we call, the U Council soul of the members.

In so many ways, rules and regulations are broke. With this T we have no borders. We do not have conditions of, no barriers of one culture or the other. We can move you to the moon, put you through the processing of whatever condition you might have, which has no regulations and restrictions of World Health Organization, or FDA, or another condition, where they have all been setup to benefit one person, or a group, or the other. This way you benefit by it. You will be returned back, this gives you new opportunity, the new processes, (:52). the new .. transportation, and EU, which are put on the table today, will change all your lives.

We started with an EU 4 years ago, we start delivering, developing, and now you have seen the expansion of the new T, all coming through one organization. Hopefully next week, you will see one or 2 new systems, which will effect and do specifically certain jobs, what we call, for example for the vision, for the growth of the brain, if it is damaged. These systems can be deployed very rapidly, the first 48 units of the what we call, Vision and emotion EU will be delivered to AZ in next 6 - 8 weeks. This will bring breakthrough, this allows us to work in the bringing the change .. that no man can go hungry. We can position these across anywhere. You have a disaster, .. earthquake, flood, many people will suffer with hunger, .. diseases, .. with homelessness. You can place one of these and expand it, and allow it to change.

You can join to become the first passengers of this flight system, by just going on the KF (website) and making a first booking. We welcome you, because with that process, allows the international organizations to understand the change of game. The change has come.

We do not need to have the mass production factories, as we've seen, to produce all the climate change, it's over, (:54). it's done with. The climate change that we at this moment in time, suffer with, is over. The new science & T, the new achievements in understanding the process of the creation, has brought us to a new D, to new arena, to a new understanding of the process of life.

In so many ways, today's teaching has started. And today's teaching has finished. We finished with the past, we have finished with what we did to our planet, to what we did, and damage we did to ourselves. We have seen a new flight system, .. transportation system, .. a new way that man breaks through the shackle of this planet. The T in these systems is so advanced, but as usual with the KF, so simple. The simplicity of it, is understanding the process of creation, the advancement of it, is changing the mindset of the man, with the new ways, of the way the U works.

As I said, we have gifted you with the knowledge, as you have been gifted with Mitra. In the coming time, you will understand the purpose, and the process of the interaction and the completion of the cycle. There are more and more T, which will be released this way, that the man is not aware of. The new flight EU, is not just to take you, onboard you are fed, onboard you are processed, onboard (:56). becoming a man of U, become part of understanding the process of creation, while traveling the depth of U. We have made it simple, .. easy, and in coming time you will see these systems right across, most probably before January in Linz … in different versions and combination of it, the cargo system, the new delivery structure, which is one of the biggest polluters of this planet. The shipping liners will become a thing of the past.

How fast our governments will transfer the T into the understanding and development is a new breakthrough. Many of you by the end of next year, will see Moon and Mars by walking on it. Because the T and knowledge has been delivered, and is in the process of what we call, "completion of the manufacturing." You can land on the moon for a day,

and tell your children and grandchildren, that I have been to the moon. You don't need to be trained. You can travel the depth of the U. You can travel beyond the solar system, and come back the same day, and days. The knowledge, the delivery of the T is rapid. .. we made sure, when we deliver the T , we deliver the comprehensive change for all the governments. For this T with the simplicity to the knowledge of the Pl T, now we force creation of one nation, one planet, whatever. In a way, because, (:58). now with this T because you can land, you can takeoff as easy as you do on Moon, in New York, in Sahara, or in Tehran.

We played with the governments, we tried to bring them to understand the new change. In so many ways, if you understand it, the game is over. Checkmate - for those who tried to rule the man. Checkmate - for those who tried to influence their school of thoughts on the others. With this new T every man is free. You have not only the freedom of the planet, but you have the freedom of the U. Mankind can travel the depth of the U, in a manageable, in a small unit enough, that does not need to involve massive constructions.

The race for the governments from now on, is how to deliver this T in a fast, effective way to all their citizens. KF in the next few weeks will show these in Linz, we'll show them to fly, we'll show them to transmute and transport, we'll show the man with cancer to walk in and walk out without, we'll show the people with mental diseases, which have been kept in mental institutes and prisons to walk in with handcuffs, and walk out free. This is the beginning of a change, and we have set out to bring that change through knowledge and T, and development and delivery of the knowledge, which has been unknown to man, through the understanding of the process of the interaction of the fields of the U. (1:00).

Become the passengers of the U, and learn how to become correct. Become passengers of what we call, the EU, that enhances the soul, and the STP of the man.

I think today is the day for many of you to remember. If you will remember some 2 years ago when we showed the first EU in Linz, a lot of people could not imagine the depth that these systems will bring, and the changes it will being. Today now you see the first flight system. We made it easy, .. accessible, .. manageable, that can be applied, and can be implied by all nations and all its citizens. In so many ways, gradually we have changed, we took man .. from the shackles of wheels. What kept man attached to this planet, you see a change, you see a platform where the universal man, a new house for man. In so many ways, a new D for mankind. Walk into these units, you will never suffer from hunger. Walk to these units, you will never suffer from illnesses, which the man has suffered so much. in past centuries and thousands of years. You don't damage your climate, .. change and burn and create more what we call, "leftovers" to bring what we call, the climate change. Many of you and many of your children's life as of today will change, because you gradually start using and understanding the process of the development of this T.

We used to have what we called, (1:02). "Blueprint Day," and to teach. This time is to teach the governments. The governments they need to go through that process of

Blueprint Day. They have to reorganize themselves. We'll see by the showing of the first flights, governments realize, that the time of becoming separated is finished, becoming a unified government, unified, collecting, helping and developing new T for all the man, now has become a reality. We welcome you to the true, what we call, Universal Community space travel. Let's see how mankind will respond. How you as a humanity will take the challenge of the development of the T, into the hands of yourselves, through your souls, and through understanding of the new .. space T.

Many of you in a couple years time will laugh, when you see the car with the wheel outside. Many of you will laugh, when you spend 18 hours to go from Beijing to New York, or to Washington, when you do it in a few minutes. Where new rules and regulations needs to come into operation. In that process, you'll find out mankind as citizens of this planet, have more say in running of their affairs, as collectively, as what we call, KF KS you will effect the condition and the position and the way the knowledge will force the governments to a new D and new work.

In so many ways, we welcome you, (1:04). to a new era of space and what we call, EU. I hope many of you will enjoy this trip. You can testing it, and you can become passengers of it, and at the same time, the owners of the spaceships that you can bring man beyond the limitations and borders of the governments. These systems are undetectable to any radar systems of today. No government, no organization has the T to detect, to control, and have a say in how the citizens of this planet will run their affairs.

In so many ways of doing it, we can open a nest of these systems on Moon and create a condition that anything, any condition you have can be met on Moon, where there is no governmental organization to force medicine or whatever, that the pharmaceuticals impose upon us. This is the key to the freedom of the man in space, but let's see how mankind will use this, and how mankind will bring the change to himself. I leave the what I call, the demonstration of the units, and I leave for you to imagine what changes this will bring to you in the next few years. It's the first time the man is free from shackles of what he made himself to be prisoner of this planet.
Thank you very much .. show the videos (1:06).
R: .. this is amazing, beautiful machine, it's the most beautiful concept I have ever seen ..
K- This is not a concept, these are the systems are ordered and getting manufactured in China at this moment, the material and everything else for it has been ordered and is going through the process of production. We have already prepaid for these systems.
R: It's truly a beautiful moment. Congratulations.
K- All 3 of them and next week you'll have a new system. The beauty of it is, instead of developing new systems or new structures for the speeding up of the spreading of the T, we use the present existing T, which allows us rapidly to deploy. You will understand more and more of these. Go ahead ..

3 Videos shown again .. VEU HEU Flight system .. (1:08). (1:10). (1:12).

K- Now we can see what are the next possibilities for all of us. This is not a dream, this is the reality of what is coming, what will be. Many of you can walk into these systems as they'll be demonstrated in Linz in the coming weeks and months.
Any questions

QUESTIONS:

Q: .. I hear big companies including Tesla and they are building "Med-Beds" en masse, was Keshe given a contract?
K- How many of these are reality and truth?
R: You've mentioned before these aren't med-beds ..
K- Med-beds do not exist, they came out of a space TV program. These are EU. These are not medical systems. (1:14). It's a big difference. You need medical treatments when you get sick, with the new T you never get sick to need such a terminology. This is the beauty of the new knowledge.
R: I think the med-beds came from the military as well. It's part of to rejuvenate them out in the battle field.
K- Yeah, it came through a lot of Sci-fi movies. .. changing. Now these are the systems, which are owned and operated, and will be owned and operated by the KF. As you've seen the flight system structure of it, given to .. airlines will be on the leasing basis.

We are not selling the T or systems to. They are leased to, and at a price, which if you look at it, 4 seats on a jet-liner at the moment is at around about 25 - 30 million dollars. Ten million leasing for such a program that we can literally fly point to point, and ?? take as many people as they like, will make it much more profitable for the airlines to ?? opt out of jet engines, landing by changing engines, and everything else. In a bigger picture of transportation and transmutation, this will bring a lot of news and ?? innovations for authorities, in how, and who, and way we can travel. The position with these is not a hovering system, it's a flight system. How do we change rules and regulations in the cities, who can carry them? (1:16). How do we bring new regulations of the international transportation? You can carry, in a way, if we can increase the size and D of the system, and then you can carry huge number of passengers. What we saw like Airbus 380 are useless way of traveling.

You bring in hundreds of people from different parts of One Nation into one point, putting them in, and then flying them to another point, and then spreading them out again. With this new T you takeoff from your home and you land where you want to be. Very much door to door delivery of ?? beings. These airport passengers, carrying, bringing everybody to one point is over. These are the changes, which we brought to ourselves in the past few decades, and we've ?? got to change with everything else. When you want to go to another city, you don't drive all in one place, and then all the cars go together. You go from A to B, you decide. This is the beauty of this new T, you don't need to fuel, .. burn the fuel, a lot of mindsets will change with this.

A lot of things. Biden said, there is a need, looking for new T. I think this T will change even, the political and even diplomatic part of the whole process. We tried to negotiate

with "5 plus 1", we tried to influence the Iranian side to take up the new T in negotiations with "5 plus 1". The KF as One Nation, one organization has taken that step. Now this T is available both to Iranians and Americans. Both to the Chinese and the Russians. (1:18).

How would our governments respond to this in coming weeks and months. When the first systems will fly, they have no borders, they have no control, there is no customs, there is no one who can control who goes to Moon and Mars and back. You don't let me have an open heart surgery without interference, and the doctors with all the regulations, I go to Moon, it will be done in 5 minutes, in 1 hour, and I come back. There are no governments on the Moon. Change is amazing what is to come.

As I said, when we throw the punch of knowledge, the whole of humanity will be "punch drunk" with T. How long will it take to gather, what can be done, is beyond imagination. There won't be any illnesses to cure, as the body will not be allowed to go through that process to become ill. What's the functionality of man to live for thousands of years across the span of this planet and beyond. This system opens a new D.

Amazing, small and Vertical, and what we call versatile, that it can be applied by everyone. You don't need a pilot, .. pilot anything. In a set process, we already have shown in the experiments, the people who sit in the car decide where they are going to go to. Their emotion, their school of thoughts will control the system. It will not allow man to do a crime. You will not be able to able to carry cocaine, (1:20). and heroine to effect the others with this system. You'll understand the mindset, .. the changes which will come with this T. When we showed, if you remember, the EU as video, some 3 years ago, many KS were surprised by it. Now it's .. the completion of the totality of the T in ?? We have at the moment, disasters in the north of China, we have disaster in Caribbean, we have disasters in America with the earthquakes and the rest. You just land these systems, you allow people to bring them to safety within minutes. Broken bones can be healed within few minutes. You can strengthen the man away from diseases. In the next couple weeks you'll see new T, which will bring this into ?? (audio breaking) .. operation. We have to be able to give the governments ?? this is not just a flying system, this is a change for humanity, away from bombs and guns, away from domination by destruction.
Any other question (1:22).

Q: .. What kind of training will be required for pilot, or would there even be a pilot, or would it be all automated ?
K- These are all .. You don't need a pilot. These systems do not carry pilots. Do you need a pilot when you drive your car? It will be controlled through the emotion and understanding, and the need of, "to be." Most probably most governments would like to GPS it, and they can control it, but more or less it is impossibilities, if you know how to handle the system, and how to run it.

Q: Guatua … this is amazing T. There has been a lot of unbelieving promises. I think this completely brings an end to those who had any doubts, (1:24). about this new T, …

a new living free of any kind of exploitation by man to another man. or human to human. .. I very much welcome ..
K- .. we always said the breakthrough and acceptance of the T, will come with the space development, has no borders and no governments and no control. Once we deliver the space T, everything else becomes part of it. We were waiting for the time, when it's the right time to deliver the space T to bring the change. We see world peace, we see the end of wars. We see governments looking for new ways to create new scientific what we call, "busy-ness" to keep the people busy and the structures moving. And it is the right time .. the process of the space development is important for all of us, that with it, we create no doubts, with it we enforce new laws of correct and just, with it we bring condition of the STM to run humanity, not the gun policies we've seen.

As you have seen in the past in the past few weeks, the whole structure of the war, and war mongering is falling apart. It's not, (1:26). coincidental and accidental, the wishes of the U Council and the KF KS worldwide has brought that condition. Humanity has tried for centuries and decades to create conditions of conditions of isolated peace and tranquility. Now the KS, the wishes of the UC has brought that. In a way, this is our gift to UC. You wished it, we keep, we accommodated. Now we give the tools to push with the governments for world peace, for One Nation, through what I call, the STM. No languages, no barriers, no borders.

The impact of this T, .. this unit in front of you, will be felt in 2 to 5 years. When people will travel across the borders, governments have no control, but to work together to bring correct and just development. The application of this is huge. Once we airborne these within the city, within the environment, for example of a hurricane, we can control the boundaries. We can stop damage, limitation. We can create condition of the rain, where there is a drain and drought, shortage of rain and droughts. You have to understand the next step. These are very much like the satellites, but controlled through the plasmatic fields, which they interact with the environment.

The implication of these is huge. If you have a meteorite heading towards of earth, a combination of these by creating a condition of the plasmatic fields, can divert the meteorite, (1:28). because it is all interaction of the fields. The governments will find a new ways. The humanity will find a new application for this. As we go further and further, it allows man to create conditions to be able to live in the deepest part the oceans. Because you create a shield, you create a field barrier outside, you can live, you become like a submarine. You don't need to come up, you can stay under the water for centuries, because the system produces everything you need, and takes from you what you don't need.

Mankind has entered a new cycle with this T, with this machine, and the impact of it will be felt in the coming weeks and months. When you will see world leaders of today will travel from Beijing to Tehran within seconds, within minutes. When you'll see the delivery of the goods, if you are still in D of physicality, from the factories in Los Angeles to West Africa within minutes. It will change a lot of things for us. With this T the ?? trade war is over, these systems will go into what we call, continental to

continental transportation. Delivery of services through the same. Creation of the fields to feed the nation when there is a hunger, when there is a what we call, calamity, could be a virus, energy pack. You put a number of these as satellites, position, change the fields, drain, you had a problem, (now) you don't have a problem. It's for the man's scientists to develop this T. (1:30). We set the basic rules, we develop the basic knowledge and T of it, and the rest is for the humanity to develop. You can travel with this, tomorrow on Moon within minutes and seconds, depends what fields you create inside it. Depends what capability you give it.

If you look at it, it has very much the shape of a light, a ray. It's been designed this way. It arrives in the matter state, it arrives in the plasma state, and in the transition, both ends, it travels in the shape of the light, as a ray, with its own shielding, with its own transportation & transmutation. The game changer, this system will change everything man has known in every D, which he ever did. The EU was an entrapment for changing, what the man was entrapped in physicality. This system frees the man from the shackles of the earth, and from the shackles of the 4 wheels as we always call them.

Come to Linz and see these systems, they are not theories, they are realities, which now will come into fruition. Systems have been ordered, you can buy them, you can own them, you can be part of it, and you can become part of the new generation of the change. Register yourself to be the first passengers to travel to Moon and Mars. We have .. they charge you $250 (,000) for a few seconds, (1:32). weight-free. You travel to the Moon, spend the day, with the full weighted-ness, with full operation as you are on earth. This brings a new D. Go to Mars, be the first generation that will bring that change. Be those who with doing it, force the governments to look at new D.

With flying 2 or 3 of these we can paralyze the whole of an air force, it doesn't matter how many Migs, Phantoms, or F-18s you have on the runway. As I said, I will make ?? metal bird, and now this is the system. The field interaction between 2 or 3 of these on the South China Sea paralyzes the whole of Chinese, what we call military bases. The game has changed. The governments need to talk peace, come and meet and find a solution to become one. The color of the skin, the race of the man, should make only one man. This is the man, who becomes mankind in the depth of the U. This is the purpose of the delivery of this T today.

You can walk into Linz in next few weeks, and literally walk into one of these systems and bring a new change, and bring the change to the governments. We tried to talk to governments, now governments have no choice, but to talk to us, (1:34). in how they plan the structure of the governments internationally. .. superiority of the knowledge has to be ?? .. for the benefit of the whole of mankind.

I warned you were going to get hit by something big. This is the tool of peace in the peace negotiations in Vienna. All nations .. ?? from nuclear T. We can literally bring all the nuclear reactors around the world to a halt. I know how to do it. I know how to transfer the energies of the nuclear reactors ?? to space ?? where not a single reactor will run out of control. We know how to transfer the fields of the energy of the

radioactive materials, making nuclear warheads obsolete, literally empty, just piece of matters, that have no interaction.

The implication of this system and combination of the use of it, in interaction with each other, is beyond understanding of the man's totality. It's amazing how our KS will take the next. Those who have taken the step with us with the EU, will be the first who will benefit by these systems. (1:36). We'll explain more and more about this, how it will be implemented and how we'll apply it.

The beauty of it is, that we share the knowledge at the same time with all the nations and all the governments, so none has the superiority to overcome, be better, or do something different. This pushes mankind to the next level of understanding, .. of in totality understanding what is to come, what is for us, what is the humanity, is about to get hit by T. This is the beauty of it.

This is what we see, this is what is needed to bring that change, to bring that understanding, .. the totality of the knowledge for our leaders to understand the change, to understand what is to come, to understand what is the next step in space development. This is important to all of us to be able to deliver (1:38). T, which are part of the work of the KF. What are we there to do, when we have such a beautiful T, and we do not use it for the benefit of mankind. For all of us to take the next step to be able to understand what we have and what we can bring.
Any other question

Q: Dean … so the transportation unit I just bought, I can take the wheels off and take the engine out. Thank you very much.
K- But you can't park it in that unit. ?? put it in a museum.
Q: The 4 souls that become present within the unit, how will they experience it ?
K- We'll ask them when they use it. (1:40). You have to ask them, and let them see what is to come, what has come, and what is about to hit them. How they feel when they come out, what change of a man they become.

Q: … about certain conditions, where people would not walk into the unit if they have an incorrect position, is that still the same?
K- That is still the same. These systems are set for a specific application and job. This will not change. We are set to bring peace. We are set to change what we call governing, and a lot of governments would not like to see such a position. But on the other hand, governments cannot govern anymore. Because the situation and the conditions has become unbearable. We don't need to inject man, or control man, or imprison man anymore. With this T we free the man, and that he has to taste it, .. understand it, go through the process of maturity.

Q: .. So the souls that are going through certain conditions on this planet, you've spoke about if there is a hurricane or natural disaster, (1:42). how would these transportation systems help individuals support within this condition?

K- That's the job of the humanity, how we bring them to be accessible with this. The accessibility of it, has to be done by those who have access to the T. We want to deliver.

In the coming time, when mankind develops a further understanding of what we released today, it will bring a condition. For example in the depth of the space where you can position a number of these systems, that in that position, you create very much like a cubical, where you create a condition, that in this environment, so many people can exist. By placing a number of these you can create a condition and environment for existence . Many .. passengers of the U do this. Many of you, you see, like what you call, stars in the sky, and you think they are stars. but they are actually combination of the spaceships, where they have created a condition for citizens to live within the environment of the U.

The problem with the present knowledge of what man has, what he observes, is that you think every light in the sky is a planet or a star. But in fact they are SS, (1:44). positioned to create condition of life within them, and the atmosphere of the others, to be able to survive. It's an open fish tank for those who are for example, travelers of the Unicose, or for those who lost their .. place of life, to accidental conditions. When I look into the depth of the skies, more or less I can tell you which one is a planetary system, which one is a star, .. a UFO, as you call it. This is the problem with man's lack of knowledge is that, like I say, "everyone who has got a mustache is not your uncle." Every shinning light in the sky is not a star. Man doesn't have a knowledge so he accepts it. Now with these T we release, especially these new versatile small EU, man will get to know more, what is real, what is not, what is there as part of U Community to interact.

If you noticed, these systems we released today have no defense T. In a way, there is no way you can abuse it, to create a condition of false alert. It's a peaceful system. It's a system where, it brings man to U Community as a peaceful being. There is no weapon T. When I designed the original EU, where you've seen in past couple of years, (1:46). was to bring this into operation when the time is right. And the time is right. We'll have the birth of Mitra with us as a soul of the U, and with it has to come the gift of peace for U. With it has to come the understanding of the change for humanity. These units the EU which is now shown today as a flight system, is not just a flight system, it's the freedom of man from the shackles of his soul, shackles of his physicality, and the shackles of the STP which has entangled itself with it, and brought so much crisis for itself. It's a detachment from every condition, but you'll be attached to enjoy the condition. We don't make you without home on the streets in the space. You still enjoy the presence of your child, .. of the physical food if you want, but you know you don't have that condition of pain, that "what happens next."

The EC like in AZ and other places, will be the first centers which will receive these flight systems. KF points of references where we have established, become the points where the first peace movements will come. The first systems will be flown in and out of. We are there to bring the change, but as a race, not as a nation.

I know the release of this new unit today, will bring shock to many of you, as you start understanding what it is going to do with you and your , (1:48). loved ones, and your

way of living. Do I need to go to work 9 to 5, or today I go to Mars, they say they have found something new. I'll go to another galaxy. If you understood the shape and the operation of this system, it gives you a totally new horizon, in the way the mankind will live. You don't need the roads, you don't need the shackles of the fuel, you don't need the shackles of what's going to happen when I arrive there, would I have a food to eat.

The change with this new system we brought today is fundamental. It's absolutely fundamental and it's not going to be in a few more months, or a few years, or whatever. The units have been ordered and you will see them. As we said, by June of next year you'll fly them.

Q: .. So once man actually takes a position within these units and frees himself from the shackles of this planet, will there be interactions with the U Community in any … ?
K- It depends how true are you to yourself. It depends how true you are to yourself.
Q: Do you want to explain a little bit more about that?
K- You'll understand, mankind will understand soon. (1:50). It's how true are you to what you wish, and what you actually want. It's not all hunky dory (without care), man has to work from now on, to achieve, to reach his soul desire.
Q: So thinking good, speaking good, and acting good, is very ?? foremost in mankind's abilities, if they wish to interact and travel in the Unicose.
K- We shall see. We shall see how man responds to what is about to come.
Q: I am ?? Mankind is ready. I am sure they are, I am sure all beings and souls are ?? ready to experience incredible things It's most wonderful journey to know mankind will reach the position where he attains ?? once more the position that we have always known, ?? mankind's position as part of UC .. wonderful moment ..
Any other question

K- Go for a break .. (1:52).

>> BREAK >>> 402 KSW October 14, 2021 (2:00).

K- … There will be more T coming up in the next few weeks and months, which will be revolutionary, but it will create a condition of what we call, One Nation government, where KF will enforce our way of peace, and what we call T as One Nation and one organization. It's very interesting one article published about the Linz exhibition, in the publication the journalist says, that the KF is bringing in T in exchange for peace. That people are becoming aware, that we are an organization not just for T, but we have a

purpose in sharing our T in creating peace. Which I thought is very interesting when an article appears, and they say, the aim of the work of the KF.
What the next question.

Q: .. he has a concern about how you are going to handle for example, the criminal organizations, (2:02). that might be preventing the unveiling of this T, or preventing the progress of this T to be presented. Or other 3 letter organizations that we know of, that might not wish this to happen. How is that you survived the last 10 years giving out all your secrets, and how is that you have this fearlessness, that you can present this without agitating all these organizations, that want to keep the status quo?
K- We have agitated all of them, without a fail. There is a very interesting thing that came up by Jalal. Amazingly, going through one of the teachings, he says, can you listen to this message. This is part of a teaching done in 2018. When you listen to it, people close to us, they tell us, they know they are going to damage us. They tell us, that they are part of that process of damaging us, themselves. These are the closest people to the KF. This is a recording, it is actually recorded, voice recording of the person confirming, they know they are going to damage us, and how she has done wrong, trying to do wrongs, to be shown. That is part of the whole structure. We haven't stopped. The people who we kicked out of the KF in past 12 months have delivered 2 TB of information to Iranian national security to stop the KF to go to Iran. (2:04). 2 TB of everything they could have collected over the last .. Iranian national security has put it on the table. "Mr. Keshe the closest people around you are betraying you."

But have they stopped us? Has it stopped the collaboration of the KS. We don't look at the governments, we look at how you as KS are working together. How closely each one of you is developing part of it. Teaching part of it. We are a government, we are a structure. Now the governments will follow the structure. It's not chasing them to accept us. Now it is for them, "we want to be part of it." We've seen this with the Chinese government in the past 2 weeks. we've seen this with the American administration in the background. We see the same thing with Iran, .. with Russia and Japan.

Because we carry on, we don't stop, we don't choose, we don't attack a government, we teach KS in Hawaii as we teach the KS in Canada, as we do in China, as we do in Iran. We've become a new structure. The fear of governments is not a hidden structure underground. It's a very open structure, which is helping the people, the agriculture, the humanity and the rest of it. Yesterday the Iran KF has signed one of the most important agriculture contracts with, for collaboration with one of the major agriculture universities in Iran. (2:06). They wanted to sign it, they wanted to be, it will be announced by the KF Iran. It's the same with China, it's the same with governments. We are not underground attacking people. We teaching so openly, that the governments have to bring the change. It's there. We have become an influential nation as one nation without borders.

We are a scientific organization with evaluation and respect for the STM through T. That's where we have reached you. They can come as much as they come together. Have they stopped us to appear. Everything we've seen, attacking individual KS, attacking the T, banning us from all the television radio and stations, everything else you can imagine.

Can you imagine 2 TB of information, which has been gathered over 20 to 30 years and been given to, and falsified, to a government, to stop the government from receiving a new T. What do the national securities do, they just put it on the table, "Mr. Keshe, this is what the closest people, ever you have thought, have brought here to stop you. You do not know how much damage is getting done in the background. But has it stopped us? We attacked only the spread of knowledge, we attacked front line to spread knowledge, for everyone to have access to it, the man in Amazon, the professor in Chinese university, space man in NASA and god knows what. (2:08).

This is what is bothering the governments, openness to share knowledge and T. Everything has been tried. Everything ever, any organization, any scientist, been, and could be done to, they have done. Have they stopped you growing your fruits in the garden. How many of you have been effected by Corona and you have found a solution through with the Gans's? How many of changed conditions around you with different applications of it. What we show on the screen, the technologies, is a very advanced understanding of interaction of the fields. In 10 years time it will be as common as you change your, most probably pots and pans. But this is a process, this is where we set out, we never think of our enemies, because they are there to serve us. It was amazing to listen to what Jalal brought to our attention. In 2018, they knew they were part of it, and it's a pleasure to listen to it, that how we still supported them, how we still stood there to be. One day their soul will elevate to understand what they have done. When I look at the top groups of the KF several hundred people, who work in different ways. Have any of us have stopped serving, sharing. Have any of us got anything for it, (2:10). but the pleasure of knowing we can change somebody's life in the coming time.

This unit we released today, you'll understand how you have been with one of the biggest hurricanes in the world of science & T, in the next few months. When people abandon cars on the street, they don't need. You were looking for hovering car, you were looking for flying cars with wheels on it, this is a different kettle of fish. This is different understanding. Thanks god I was stopped to show the flying car in Einhooven in 2011. Now they can't stop this. This is in the hands of manufacturing in China. It will be developed completely further, completion further in Austria, and secondly manufactured in Iran. Iran factory has gone into operation .. they are already in it. You think I need permission from the Iranian government, or I need permission from American or Austrian government, or any government to fly this system. I land you will see. I fly you will feel. We brought the change. Now it's time for them to understand what change is going to do with them.

How many of you are going to be the first passengers in these machines? How many of you are prepared to go to Moon? (2:12). .. Mars, .. to go beyond the boundary of this solar system for the first time, within minutes and days. We flew a satellite how many years ago? And we hope it has reached the boundary of the solar system and has gone through it. Where is the nearest star to us? It will be landing there or one of its planets, in matter of hours and minutes if you know how to run this machine.

But you have to make sure you don't interact, that you bring the interaction of the soul and STP with the system. You still keeping intact. This is a fish tank, which you have been looking for, and the fish inside is the man and his soul. How many of you millionaires, and billionaires around the KF will buy these and just put them in the cities for people just to walk in, to overcome their hunger. How many of you will give a gift to prisoners, with the VEU and HEU to change the man. We don't need Cassius Clay to become Mohammad Ali by change of belief in God and different name. Both believing in the same Creator, and the creator of the same system in front of you. Man will mature very fast. (2:14). We gave every opportunity to governments to follow. With the wish and the soul of the U Council we'll achieve world peace. Now with this system we'll enforce permanent peace, unconditional permanent peace.

Q: In enhancing the soul of the individuals within these units, is there also a collective enhancement of the human soul of the people present on earth and in the U?
K- In a way, we connect to, yes. We become part of a totality. Earth has been a rocking ship, and now with the introduction of these new T, we bring it to its balance, to become part of the stable part of the U Community. When the first .. start flying and delivering around the globe in the next few weeks and months, governments will change, they have no choice.

This is part of the delivery of the systems and "5 plus 1." In the way of, 5plus1 plus Iran is a new structure for world peace. Outside the framework of what you call ?? of United Nations, (2:16). it ?? hasn't represented, why we work and push with the universal, what do you call, 5plus1, is because we have the Chinese, Russians, the remnants of what we call the Catholics, you have the Americans which sits in different ones, and representative of Iran as Islamic nation, and with it we can bring a good balance. Where America represents in the background, the structure of the state of Israel, or what we call Judaism, or the belief of the path of Moses. In a way, it's Buddhists, the Christians, Jews, Moslems are all around 5plus1, and we can achieve peace through it, not just peace for Iran, but peace internationally for all the nations. There has never been such a collective, what I call, unisons, bunch of religions, sitting around in the name of the politic, and we are all in it.

You have Germany, which represents Rothschild's, who has been one of the biggest betrayal of the whole system. Germany is there for us to bring Rothschild's under leash, and we will do so. We will return the wealth of Rothschild's back to humanity, what they stole. And with it, through the other channels, we bring representation of the humanity. The Buddhists, America representing the Jewish state, the French and the Italians representing the state of Catholicism and Catholic religion. Iran representing the Islamic world. It's a best pot, that we could bring peace to all nations, (2:18). and nobody has seen it, and this is why we work with it. It will become position that, all nations will accept, peace not just through T, but through equality of all of them together. We know what we have done, and we know how it will change it. You look at 5plus1 as a political position. We look at 5plus1 as unification of whole religions and paths of beliefs, and with it, with are the politicians which are involved in it.
Carry on.

Q; Ed, .. the pricing of these units, I know they are quite fair compared with medical devices, I mean the T is just out of sight. But you refer to many of us being able to take advantage of it, who will be the first ones you talk about. For many us of to pay for a trip on one of these as advertised in the store, is still quite high. How do you see us being able to participate?
K- These are set for very much, what we call "KS who can go and break the barrier." There is a reason for it, .. we put this kind of figures. There will be, a bunch of KS will be given what I call, (2:20). "different valuation for it." It's not the price, it's just showing the man can go, with what value can go. And then opening of the space T the way we want it.

Whenever man has been given free, he abused it. We gave you the MaGrav system free knowledge, and you and people around it used it to ridicule the KF. But if you look at the HEU, just have a look at the HEU, it has the most complicated, sophisticated in that ad, of the MaGrav unit. You don't know how to use it, we know. This is what the nature of the man is, has no value when he doesn't pay for it> As I always said, in a serious, but in a joking way, why man have no value for their wives, but they have a lot of respect for their mistress. Why if it is the right of way, mistress you spend money on, you have respect for the money you spent. This is what it is, when we gave you the technologies free in blueprint, everything, and everything came with it, now you pay for it, you respect it, you apply it, and you employ it.
Thank you

Q: Jalal, give me 2 minutes.. (2:22).
Any other question

K- This machine on the screen has changed, and will change the destiny of man.
Q: .. congratulations in delivering a paradigm shift to humanity .. Will you and the KS teach a program to help the KS attain this direct connection with the soul. I understand all your teachings give the hints and insights for us to make that connection. But will there be a specific training to advance that ?
K- Through use of the T many KS will find the path, the connection between the soul and the STP, and that will become a path of knowledge. That knowledge will be gained once by the KS, then they will teach it through the soul, not through the word. This is the way we do.
R: In may ways, that is being now through various workshops public and private. The topics can be different, but the underlying theme now is about the connection with the soul, or feeling the fields, and this kind of thing. (2:24).
K- Yes, it will come, and the process of the understanding it will come. When you look at this unit, if you look at it, if I can draw it. This is a ray of light and it will travel with the speed and D of the light. In that speed of light, spectrum, sits the spectrum, the STM fields too. This will not transmute the physicality of the man, but will transmute the STM and the elevation of the STM in the process of the transportation. Then you have, as you enter into the D of the STP, you have your STP to it, too. Then you understand how the 2 become 1.

In the past few month's teaching, I kept on referring to Book 1, 2, 3, And now you understand the Book 1 is where you started from, where in the D of the Pl or the soul, Book 1 is where you land in the D of matter state, if you decide. The same way is, you can go the reverse. But now you have a tool, where the STP and STM in both D are protected, are part of, are within the structure. That was the dream of every prophet. (2:26). To bring the STM and the STP to understand the ?? of position, and become one. And they always taught the teaching of the soul, they tried to bring that D, but they taught the punishment with the D of the soul. It's the first time we share the knowledge as a gift, and that gift allows the two to become one. There is no punishment, elevation of the soul is the only option, Both in the D of physicality and the STM, the STP of it. As I said before, when the Creator works, He works to perfection, with no failures and no pitfalls. Any other question.

Q: Jalal, there is a group that sets themselves to serve. We were wondering how to apply by materials and in 1 day materials supplied to us as a gift outside this group, one who has been touched by your knowledge and he showed his appreciation to your knowledge and to your gift, and he supplied us about 3000 meters of material. It was beautiful, this is what when you say, when you give you shall receive. So this is a confirmation of this. (2:28). Congratulations to Mr. Keshe for all this advancement and knowledge. Thank you
K- I think you .. you will see the benefit of this T, where KF cannot be kept away by news. There are many of those who are followers of the KF, but they kept quiet because of the negative information's, which put in. But in the background they are there to serve humanity. What will be interesting is, when the KF will put one of these systems soon, in the landing, space center in Linz, and for the world to see. The reality is we have touched the STM, it's just the STP of the man, which ha chosen to go the wrong way. This EU, this flight system is, a lot of KS should have seen it coming. It's about to come, but now, we, even within the KS, people who work around, close to us. I kept this away as a secret, that when we are told to be ready for it to go. When we are there, when mankind switches to understanding of the next process. Now we are ready. Mankind is ready to move. It becomes part of that light, .. that ray, and many, many people will turn to be that way. This is part of what we call, "the peace process between the STM and the STP of the man." (2:30). Where mankind will find peace and then we'll start all going in the same direction. Thank you very much for your hard work Jalal, in the background. I thank you for the information you brought us.

Q: Stephanie, .. did I raise my hand to talk ..
K- Yes we can hear you as usual, you can't hear us as usual.
Q: I didn't raise my hands.. Rick want me to talk
K- Yes, you are here, you had better talk. (2:32).
Q: … this is fantastic … I am so happy. I couldn't wait for this any longer. yes, I agree it is a perfect timing. .. This change, it will happen like a quantum jump, like it will happen all together? The moment one elevates, we all going to elevate together as one?

K- It depends, if you are ready to. We all have different strength, and we all operate in different strength and understanding. If you have reached that point of understanding, and strength of emotion of the soul, yes, we can. It can be done.
R: Are there a minimum number of beings, that we would have to elevate themselves in order for this, sort of a ,more of a quantum jump like Stephanie mentions, a defined change happens at a certain point, or is it more gradual, happen over time.
K- It will be gradual, all man will not be elevated at the same time. They ?? do take according to understanding and the strength of the work. (2:34).
Q: .. you know Mr. Keshe, the first day I met you .. I didn't know nothing about all this, nothing. But first time I met you, something in my head said, you will be the one who will bring the change … even now, I don't know nothing, but it's just like .. I am so grateful you are here with us sharing your knowledge and I am super happy I met you in my path … I always trusted you from the first second. It's not something you could buy or whatever. … thank you

Any other question
Q: But the 3rd of October was my birthday, thank you for the ??
K- Happy birthday. (2:36)
Shall we call it a day. I think we had a good representation of what the T is, delivering it, to be delivered.
R
K- I think we brought a massive change and understanding, and a change in humanity, in how it can be. One of our targets in the KF is, as soon as we start sharing the EU amongst the KS, we would like to do the same with the enhancement transportation flight system, for the KS to stay in control, and become part of the structure of this system. Where we dictate the, everything else which comes as part of this T, to bring the change. I am sure many governments will start changing their position and understanding, once these system are literally demonstrated in open, and soon we'll bring the change. This will be a massive step change, for many governments to accept the new knowledge and the new T. Thank you very much. ..
I am sure next week we'll see another EU from the KF, which is life changing for many of us, and will bring a lot of change in the D. As I said it's not just bringing the Pain Pen and P Pad, (2:38). but bringing the edge of S&T in knowledge, that it brings that change, which we are pushing for.

Q: It is a earthquake in order of magnitude 20 shaking them ..
K- I think we need 21 I think the governments have just start realizing how things have changed. ..
I don't think there has been more fundamental change teaching, than today, if people understand the implications and applications of it.

R: It's interesting we had William Shattner, otherwise known as Captain Kirk, become the oldest astronaut in the world. He went up on an Origin spacecraft went into at least the blackness of space, and his comments were quite incredible, completely shook him and changed him. He was actually, had tears trying to express himself for the experience he had, and that's on top of the fire breathing rockets. So if we can make that experience

more gentle for souls like that, he is now 90 years old. Strange coincidence, (2:40). that this T is being revealed now with this, we see now clear how the future will unfold.

K- I hope we see many of these in the next 12 months, landing on the moon together, and bringing a lot of changes, where governments realize there is no, they cannot govern above 1 - 2 meters above the space of this planet. Or we'll see the new changes where people have the freedom to decide.

This is what I said, there will be no leadership, kingship, because now we are free, as man with soul and physicality. It will be very interesting the changes which will come. The faster we push these units through. The first 100 units have already been ordered to Chinese manufacturing, part of it will go for the EU, and part of it will go for the flight system. But the combination of the 2 will force governments to a new D and new approach. Where we can fly from Jin and Jinag with goods and materials and land in Linz in less than few minutes. Then the governments understand, we use the KF properties for our purpose. We don't need their landing rights. We use Mexico as a place to land, we use AZ as a place to land. We use our rights and with it we'll bring the change.
.. I hope next week we'll give you a bigger surprise ..

Quick Index:
German newspaper wrote: "Messiah sells his products," We do not imprison soul, religions frighten man from God, We are all Messiahs, New flight systems - all of us astronauts, Feeds and heals you while you fly, 10 minutes to Moon, Humans are "4 wheelers," Collectively fly units across planet same time, KS failed with MaGravs, John was feeling fields - then abandoned, Earth's gravity connected to Fe in hemoglobin, Souls from earth has "fingerprint", New EU driven by soul, No control system, We do not negotiate with governments, "3 Kings" from Persia, Need correct conduct to get in systems, STM abides by law of Mitra - have Knowledge of Universe, We govern by law of Creator, "I am the Messiah", Weapon makers - not be part of STM, We control the change, Fly with light, Light bends, Flight system has a soul, I know - race of man will change, True blood from interaction of M fields, Export STM to other parts of U, Later create spaceships through M fields, New EU creates cosmic rays, Live in space - like in womb of mother, Extend fields of soul - create a dome of life anywhere in U, Soon

religious & world leaders take hats off, kingdom within knowledge, collective souls becomes the captain, Iran is birthplace of civilization Mitra - land of peace - T starts from here, Dr. Guatua to come and fly spaceship home, about Mozhan training, Emotion "I have everything I need", Man has to be thirsty for peace, Temple of T in you hearts - no temples, China's hypersonic missile - don't need to worry, Nuclear T is obsolete, Iran has new T, Iran punished for developing T beyond imagination, Need to sign World Peace Treaty, Netanyahu private bank accounts, small flight unit easy, Later massive UFOs, Live on earth visit Moon in minutes, Life creates structure like brain - soul in center, I have been teaching races for long time, We open a new era

ENGLISH TRANSCRIPTION

(:07). K- … This is the knowledge of the Creator, and I know how man will change and evolve to the new challenges of deep space. As we open the Linz permanent exhibition, one of the German newspapers writing a half a page article about the exhibition center (EC), they wrote, "this is where the Messiah sells his products." They made us laugh, that we prefer to sell products, to sell the knowledge, that people learn with it, and develop the skills of surviving in deep space. Then imprisoning, taking the Soul of the Man (STM) to ransom, be it in churches and everything else, to frighten the man from the knowledge of God. In that process, it is very interesting, as we said, the messengers of the present time, carry both the soul, what we call, the development of the soul, and the knowledge together, that no man will be able to abuse another man from now on. So if we are all Messiahs and we all teach the knowledge, that there is no more need for temples, no more need for Mosques, and .. churches, that then we abuse the STM, because he is frightened of the knowledge he is not aware of. It's very interesting, as we launched a new product last week, we have raised a lot of what we call, questions, a lot of new ways of looking at space T, and a lot of, what's next. The launch of the spaceship flight system, which was launched in a very soft way last week, is the beginning of the change, that we are bringing in. Would you like to play the video that we see what we are talking about. This is the actual system, (:10). you have seen it as an Enhancement Unit (EU) it's just adding a flight system to it. This is not something to be built, to be done.

Plays video . (:12). ..

This is a change, this is a change in the way, that the system is already been built completely. You have seen this system in the EC without the front end. The system is fully integrated structure we are setting up and testing its, what we call final version of the flight system. The KF space energy company in Iran, and we have done the same in other parts of the world. We enter space travel not just by selling the system, by organizing the whole .. progress, travel, shipping, and everything else. The breakthrough with this T, is that every man can have access to it. You don't need to have a specific style of life and strength to become an astronaut. All of us, either by snap of a finger, by getting into it, the way we get into the aircrafts of today, fly from one point to another, we can travel now the depth of the space.

As I was explaining to .. our team, the beauty with this is that, the structure of the design of the flight system is, (:14). while it is flying you, it's feeding you. While it's flying you, it's taking what you don't need as an energy. At the same time, while it's flying it absorbs energy from the cosmos, it absorbs energy from the environment. At the same time it creates a dynamic field, which allows for what the system doesn't need to be given out. This integrated system will change every life.

As we have placed the orders for the first units to shipped and be assembled, and in our talks with officials, they will take and be present in the full assembly, that covers all the regulations of the flight system. This brings a fantastic position for all of us. The new system is not a flying car, it's a living car. It's ?? a living system, by entering it, by setting the system, that you travel to one point or the other, you can recover from illnesses. The beauty with this system is, that it flies at a higher altitude than, what we call, 80 km. Which means any law, which we have in the aircraft industry, and international laws of the government does not comply.

What does this mean? This means we can place a number of these in the deep space. What does this mean? (:16). We can land a number of these on the moon. We were discussing this with what we call people who are expert in flight systems, and the rest. We are talking maybe 10 - 15 minutes - 20 minutes flight maybe ?? more.

Our biggest problem is not the flight time, our biggest problem is approach, stop, and landing. This new T will change all our lives. We try from November on, to take you with us in the development in the structure, and in assembly of the system. We are not there to deliver a T in a package. We are there to spread a T on the work where we can change position and direction. As you've seen, as part of this video … you have a passenger system for long haul. Now, from now on when you speaking about the long haul, we are talking about maybe Mars, beyond solar system. Short haul is traveling between the cities and towns on this planet.

You have a cargo system, which means you can deliver directly from the factory to any point of sale, (:18). in seconds, in minutes. This will change the whole structure of man's work. (I do apologize I have something in my throat). But the beauty with this system is that, we all become free from the wheels, we become free from being attached to what they call, human race, "the 4 wheelers." We come to see , we become part of the structure of the U Community, where we travel with the flow of the fields, not with the turn of the wheel.

This T, which now we put out, and I am sure, I was thinking this morning, that we have placed the EU, the VEU, the new operation of the Vision and what we call, enhancement of the brain, in Arizona (AZ). It will be nice if the Americans collectively, could come together to allow the first 2 or 3 to fly from AZ into space. At the same time we'll fly these from other locations around the world. We are not making one system ready, we are making multiple systems ready. This time it's not waiting for NASA, (:20). to announce the launch, or Iranian space agency to announce the launch, or the Chinese. This time we

try collectively to fly 4 or 6 of them across this planet. Some of us will travel from New York to London, .. Tehran to .. We have a big problem with the space, in going to the moon, because of the Islamic religion and the holiness of the moon. We can travel to Mars. We can change the structure of the work collectively as KS.

When we developed the MaGrav systems, many of you tried and failed, or couldn't achieve, actually get to the point. We lead you all step by step, but the principle of the work in all these systems is the MaGrav system. It's the most advanced versions of the MaGrav systems. Where we can through the structure. If you remember, I said very recently, again, and I repeat it, when John in AZ setup so many MaGrav systems, and he could feel the fields and they went outside to measure the fields, 200 feet away and the rest of it. John was on the right track. But the collective understanding of the KS was not there. The anxiousness to create some electricity, fooled the man from the stage and understanding of the flight.

All of these systems in front of you, moving to the Moon,, (:22). return and then back to earth. Submerging into the oceans of the world and living, is not a theory or dream anymore. These machines will give you everything, because the beauty with them is, they create a shield, they create a M field protection at all times. It's you who decides, is this to protect you on earth's atmosphere, to protect you in the depths of the oceans, or .. in the deep space. Inside we have created an exact copy of life on earth. We have to keep in the integrity of the whole system, too many factors, one is the G field forces of the earth, and secondly is that the integrity of the G field of the earth in the body of the man in the flow of the dynamic fields of the red blood cells. Which means as the gravity of the earth is connected to Fe, and it has allowed the Fe within the structure of the hemoglobin, to work, we have to keep this integrity across the planet, across the U. This is how we how we know, when we see a soul, when we see a physical body, which is from the earth, fingerprint sits within it. It's not teaching how to make Gans's for this disease, or that disease, now the concentration is on a fully integrated system, (:24). which feeds you, take from you what you don't need, support you psychologically, support your soul and STP, and at the same time takes you into the depth of the U, or the depths of the ocean.

In a new system, which will be shown in the next couple of weeks, 48 of these units has been sold, and will be shipped to AZ in very short time, maybe next few weeks, start it. The reason we launch these units now, is a simple fact, as you see these systems don't carry any wheels, don't carry anything. In the integral and part of the structure of the system, the passengers, the captain, just needs to think, and the flight will take shape. You don't have standing wheels, we don't have controlling systems. We bring a T where the STM, the intention of being somewhere, the position of understanding an emotion between the STP and STM will bring man to the destination to the point where he needs to be, or he wants to be, or where he has to be. In a way, the new EU flight system are soul driven systems. You will see the first, what we call Vision EU, soul or whatever you called, brain EU in next couple of weeks. (:26). Then this will be integrated into their flight system, which hopefully will take shape in the following month.

We are not going to build a system (could you please show the EU ..) The beauty with this is, that if you look, you see the shape. We are not there to develop the new T, from the beginning when I designed this system I set it up to become a space system . We are not going to strive into something else. When you look at this system, we deliberately at the time, we showed you very simply, you see the reactors inside, they are all hanging. Please show HEU video. Now you can see it is not a dream. The system is already with us. … (:28). … Now you see in this picture, the system you saw hanging out, is built within the system. The advancement in T, and what it took us about a year and a half to further develop, now you don't see those reactors hanging. If you came to the EC, if you came to the .. you saw the reactors outside, in a way it was good, you could relate to them. Now when you look at this system, or the VEU, the T is so advanced that we have built it within the structure. This allows us to interact in different ways, and different needs with every part of the process.

When we announced about the plasma packages, which is now again, is going around, a lot of people are having the problem, and then start using the Gans's, they've seen the effectiveness of Gans's, how even with the latest powerful one, they are walking away from it. In these systems, when you go into deep space, (:30). when you put the man inside, it doesn't matter what happens to, into every plasmatic energy in the U, the body is protected. It's on a double layer, triple layer, if you understand the whole process.

In so many ways, we give you the system inside, we give you the system outside, and on top of it we create shield field effect. Man has never traveled so well protected, ever in his life, not even when he walks on the street. This new T allows a massive change, massive rapid development in many aspects of the work within the structure of the need of the man. What will happen when you can walk into these systems and get fed, .. and change the changes what was not needed, and called it a cancer and everything else. The new T, which you will most probably in the coming year, walk into, across these countries of man, which we will become One Nation, will change the dimension (D) of life.

Today we hear about shortages of food, shortages of fuel, increased prices of fuel for the winter. Do we have, will the world leaders allow this to carry on. When we can in a very simple way, (:32). just place a number of these systems, and create the D of food, that every citizen under the coverage of it will not feel hunger. The same as we do inside our system, we can create the condition, that in interaction of the systems to create the same. The point where, if the energy packages come in, we can overcome by those, the same structure the same. Would the man needs the farms to survive. Would the man needs to kill another animal to survive. We cannot farm in the depth of the space, and we have no animals to kill to feed ourselves. But we have learned to use the energies of the U. We understand this very little system, that you've seen today, running across our systems, across our screens, is a game changer, is a game changer that is not going to come, it's a changer which has already come. It's a game changer, that will bring mankind to take the first steps to become part of the U Community, because as we learn how to fly faster, how to become more comfortable with the system to find new D and operations of it. I promise you one thing, for sure, they will come to visit other passengers of the U, (:34).

which are zigzagging the space of the solar system, the space of this galaxy, and the space of this U. We do not, we are not, and we are not set to bring, to negotiate with governments. As have been the tradition, we gave a chance to the governments to walk themselves into it. Now we create the systems, that the citizens can use it.

Then would there be a need for a government, unless we govern ourselves in the depth of the space, the way it should be. As I always said, if man keeps to the ethos from the "3 Kings from Iran," from the land of Persia, do good, act good and think good, you will understand, the man will survive across the U. We need no temple except the temple of his soul, the beliefs in the conduct of the correct behavior.

The new EU, which you see it, in design, and now you see it in physical D, will be on the table of the games of the man's life from now on. It's the job of the Knowledge Seekers (KS) to start to understand the work of what we started a long time ago. We don't need, or maybe we need, the hidden groups setup by Jalal to develop a new MaGrav. (:36). We are still setting up a factory in Tehran to produce MaGravs for their nation, because mankind will be in different stages of development. We sure, for sure will launch the first flight system, across the city of Linz, where we test flight, where we talk to the governments and the officials, and those who are responsible, to be able to bring the nations to see. The new flight EU, which will be shown by the KF in the coming weeks. The order of the flights, building the units has already been signed, the money for the building of the sets has already been paid, to start rolling in.

Then it comes, how many of you would like to be the first passengers? How many of you will have a correct conduct, to get in and by using the Vision EU, you see a vision of the U. "I fly to the position." Many of you were offered this vision units, offered what we call, the soul EU. You were thinking of the eye of the man. We talk about the vision of them to see the U he likes to see. Where does the soul position sit. Where would the STM be when it detaches from D of physicality? That will be my home. As I said, our teachings are global teachings, as global as the U. (:38). Many of you fall in the traps of the word of the man.

The new flight EU, is the collection of the all the EU technologies, which KF has shown up to now, be it the MaGrav unit, be it the Gans's for viruses, be it the CL and everything else. Collective knowledge of what you have been taught is within this system. As I said, last week, and many of you might have not understood. You have Book 1 .. Book 2, and Book 3. Now you have your EU, which way do you want it to fly, in direction of matter state, or in the direction of the soul and deep space? Now with the thoughts you have, you decide where to be, where to reside, how to be, and how to behave. Then do we need to negotiate for a few little metal scraps in any shape or form. Do we need to come to an arrangement to understand what we need to do? (:40).

Now we see a change and evolution in science, and if Rick could make the screen in half and show .. the flight systems as it is in Linz. We are not going to build, we have already built. We are not going to promise 6th of June, because we might hit it 21st of December for the birthday of Mitra. That would be the gift to humanity, and we make

every effort to achieve it. In so many ways, none of you have realized how close you have become, that all of you, to become man of space. And yes, Messiah sells T for the man who only sees value when he pays for it, but does not realize the freedom of the knowledge, which is given to him freely.

In total understanding of last week teaching, and this weeks teaching is for all of us. Is not a promise that the change will come. The change has come. It's not a promise, (:42). that man will fly to space and deep space in minutes. Now you can do. As I remember when we tested the first reactors in Tehran Shirif University, one of the officials said, Mr. Keshe this will go through the ceiling. I said, why it's our building, it shows our strength let it go. Now we let the knowledge to go through the ceiling of the U. It's on man to decide in which steps he would like to take, to be part of, to understand the T is so real. We are not going to develop, we as KS, collectively have developed. It is for us to understand, .. to realize that the new flight EU will change your lives, .. everything you could imagine, from education to understanding the work of your body. You receive the Knowledge of the U, that there are no universities on the earth to teach you. Man will become knowledgeable to the Knowledge of U with the flick of a finger, if the STM in truth, abides by the law of Mitra. Then you'll understand that every gift has been given to you.

We will bring what we call, the structure of the new institute, (:44). to you as KS. We do not negotiate with governments, as by delivering such a T, we govern through the law of the Creator. I am the Messiah, and I will show you how, those who take actions to make time to create tools of death, will have no time and no place to be as part of the Soul of the Man's race. It’s the beginning of the change, that every one of you can be a part of it. We can control it, we can emotionally feel it, from thousands and hundreds of kilometers away. Remote sensor control by the feel of the man, it's already been tested because of this system. And people who use it, they know. They feel when the system is on, thousands of km away. But this is the same, you feel what is, where you are connected billions of km away from man. Look here, the call is in the soul of the mother, and you respond to, through the STM. The reality as we said, is very real, and it sits in front of you. Now we as a human race have become the true man of space. (:46). But still as the paper said, "Messiah sells T," that the man does not become slave to another magician in the space. I sell T of the knowledge of the creation. Those who understand it, will takes the steps further, and will never sell their soul to another magician in the name of prophet, or whatever they come across.

The body of these systems have started to be manufactured in China. Next few weeks we'll be landing in the factory in Austria. In a few weeks later, upon its return, then we'll fly from different corners of this planet. I wonder how many KS will want to be a part of it. Many of you will give your life to be in it, as the first passengers. Those who understand the change in the structure of the STM and evolution of the new science and T. I wonder how many of you will travel from Beijing to Washington for a cup of tea, and return 10 minutes later.

As I was explaining to what we call, experts in the past few days. We do not travel from Washington to Beijing following the curvature, we travel on destination point. (:48). For the first time, man will see, yes, the light bends, because the T of understanding the knowledge, would ?? allow the man to fly with the light, which bends. Which means you travel in the speed of light within the atmospheric condition of the earth. Now you understand what we showed you as a small video to get you moving, now it has started. This is why if you go back some times ago, I said people who get into .. the flight systems have to accept, and be accepted, because even the system has a soul and recognizes the man. You enter another live D, .. another process, which already has linked itself, all the correct emotions and directions of ?? Universe. I hope now you all can see, not what is about to come, but very quietly and incredibly we brought to you, and we set it in the EC.

I hope mankind will understand this knowledge. I hope mankind will become kind to himself, (:50). to decipher the knowledge within the system, feeding system, processing of the body system, and processing of the soul system. Maturing man to become a peaceful man as he sees what he has, is all he needs. Messiah accepts it, his first passenger is to travel to the Moon and to the Mars, next. And yes, we sell our T to the STM, and the man decides. My wish is, because of the ?? we know, to fly the systems in the next few months across this planet, and slowly man realizes the time of burning, destruction, the time of killing is over. As we see more and more of these flying above us, as we fly more and more of these to our systems, that our cars become our home, where we get fed, and where we can travel with, then we gradually change. We look at the animals in the fields, to enjoy their beauty, and not to think how they will taste if we get them. Gradually mankind will become mature to understand.

You throw every Sunday, (:52). Gans's in the rivers and the streets. When these systems fly, they will release energies, which will change the whole structure of this planet. I wonder in ?? so many years from now, what would happen to the streams, fields, run ways, and sky scrapers man has built over decades, centuries, and thousands of years. Where you don't need to have your 4 wheeler, the grass will appear over the roads, the tall buildings will crumble as there are no citizens to live in it. The fields will go back to the original as there is no man to eat, and animals will be free, where there is no man to kill them. These are not wishes these are the facts, because I sit in the lab, I hold the design of the reactors, and the reactors in my hands, and I know what the future is about to be. I know the race of the man as of now, will change, to become a peaceful race. I know that with this T in front of you, this time when you get hungry you just walk into it.

We don't ask your governments to create satellites that you get a better football match. You ask your governments to put these systems in satellites that the whole citizens gets food, (:54). and ?? energy, and what it doesn't need, the sickness, cancer will be a dream of the past. Hunger will not exist and no man will be thirsty, as he receives the energy of the water from the space of the time and place. Not by drinking. This is how man will live in the space. You do not carry water bottles for you in the space, that you get thirsty, but you receive the energy of the liquid, which sustains the dynamism of your M fields, does not matter if it is blood, or something else. The true blood of the man will come out

of the interaction of the fields of the M field, which the system creates, and the body takes.

One of the biggest questions for the man will be, when you become a long term traveler in deep space, would you have the heart, do you have a need for the ?? wings to flow the M fields to create the essence of the physicality and the interaction of the, with the STM to create the emotion of the man. Give me another few months and many of you will understand. I am the Messiah, in as much as you are, in the direction of deciding how your souls will behave, and how you become, not to kill, not to eat, not to destroy, and bring humanity on the track, that the STM becomes the flowers, that this planet exports to its perfection. (:56).

I hope you understand, that the dream of the man to become the man of space in a different time and place, we will see the change in the structure of the government of this planet. We will see the change in the D of the control of the fields of this planet. As you have seen the pictures of the EU, I am not a dreamer, we have the system, and very soon you will be part of it, to fly with it, to be with it, to enjoy it. In so many ways, remember that your children are born, and they will be born free, in a free world, where there shall be no wrong ways, ?? going the man.

And yes, Messiah sells T, T how to change the man, but the man needs to understand it, step by step, otherwise he will not appreciate the beauty of the knowledge. We go to another commercial break .. but remember one thing, any of you can become owner of one of these spaceships, and decide where in the U, he or she wants to go. Or collectively KS can become part of the structure of the change through agreements with the KF, (:58). for these systems across this planet, as fast as we can. I hope in a further time down the line, we create the body of these systems through M fields, very much like in deep space, as we see neutron stars, that we will not even need materials to develop to bring them into development. You will understand what I am talking about in a few months time, in 2 or 3 years when you look back, and while you look at these pictures on your screen you see, ?? what is flying above, and then you understand the vision of the Creator, how man will change, and gradually become part of the U Community.
Rick would you like to go for a break

>> **BREAK** >> 403 KSW Oct 21, 2021 (1:00). (1:04).

K-
Q: Brazil, (1:06). … The EU you talk about having some elements (reactors) to make the transportation of people. These elements that you put in the EU, can you put these reactor in the cities without the use of the EU .

K- Can you explain what you means.
Q: (1:08). .. these systems which are embedded inside the EU can be put in the cities so people can make the transportation themselves without the need of putting the EU itself in the city.
K- What do you mean put in cities?
Q: …
K- I mean you set it for the cities. (1:10). this is what we said yesterday. This can be set to do this. We already explained you can cover massive areas, once the knowledge of the man becomes complete.
Any other question.

Q: .. Will the friction created by the MaGrav of the spaceship, and the plasmatic fields of the M fields of the matter environment, create visible light, making the spaceship (SS) glow while flying ?
K- Yes, it is quite possible, depends what spectrum of friction or interaction of the fields, creates the friction. We will see these without a shadow of doubts, we'll see lights. We will see a D of interactions and yes, it's inevitable. These are dynamic systems, you have a dynamic field. In the lab, when we test, we feel the fields in our body. (1:12). We can feel it, what they create, what emotion they create in us, what physical change they create. The beauty with the new EU system , with what we are designing and testing at the moment, is that they will create cosmic rays, and rays and fields, which are not known to man. These will interact with the environment in a way, that we have not seen before. This is why we allow KS gradually to come to the knowledge, because otherwise it just flies over their heads and they don't understand.

There is a lot to be understand, there is a lot not only to be understood by the KS, to be understood by the society, by man of science, by man of whatever you call it. Because I was explaining this .. and I explained this before if you have been around me, if not you will understand. When we opened the first factory in .. the North of Italy, KF went and employed one of the top managements in one of the top companies of the steel manufacturing in Italy. Paying massive wages, because he was one of the best managers, he could bring everything out. After a few weeks of operation we saw there was a problem. (1:14). There was a huge problem. I went to the factory and I noticed something very strange, because even though the man was a manager, top companies, he was well thought after, he couldn't understand. I walking into the factory the first thing I saw was a pile of, maybe a meter high, maybe more, like a mountain, of MaGrav systems coils coated piled on top of each other. I said, to him, do you know what you are doing. He said, yes, they are Nano coated waiting to go into the MaGrav systems. I said, do you know what the problem is with your MaGrav system is that these Nano layers should not be touched, not be damaged, otherwise they don't work, that's why you have a problem in your MaGrav systems. Because the man didn't understand the knowledge, even though he was very knowledgeable in steel, he had no knowledge of Nano (N) technology, layering, and how delicate it was, even with his PhD and everything else. He was a very elegant man, perfect Italian in a lot of ways, but never understood the knowledge. This is a problem we have with a lot of KS. When you make a MaGrav system, watch what you are doing, how you touch, .. hang it, how you do it, and then you get a different field

operation. Rapid, zap it, and put it in there, and it doesn't work. Of course. Have you ever managed to bake a bread by just putting the oven at 360 and just putting the dough and waiting 5 minutes to eat, unless you burn it. (1:16).

KS gradually have to understand, even what does it mean traveling in this system. What can I do in this system. With this system we fly over a certain limit, there is no international law. They told us in a meeting, that you need to go to a space agency, because above 80, it becomes part of the space. I said, the people of the space don't even understand the T, why should I go and ask them. They have to come and ask us, how you do it. They can't set the standard for us, when we created the standard. They are still trying to sort something out in the space lab, they are trying to sort something out to land on the Moon, in a few years time, to maybe build a few centers there, and taking pieces and pieces. You walk in, you can live on the Moon with this T. It's exactly how you live within the womb of your mother. You come as a single sperm and an egg, and you become a total human being, which the environment of the womb of the mother creates. It's the same.

Now you have the ability to, as I always said, to increase and bring in the tent of the fields, and then you can live anywhere in the U. When I did one of the first tests in Iran in Shirif University, we used to be in 4 or 5 beautiful story block here, and the office of the manager was on the top, (1:18). and I was on the first floor. One day there was a knock on door of lab, and the guy said, excuse me, can you switch off your system, because nobody can call in or call out of this building. Thousands of square meters office block was paralyzed with this simple system.

But do we look at it that this gives us difficulty, or do we look at it as this gives us a chance to increase the fields, combination of the fields, and create a dome of life anywhere in the U. It's the narrow-mindedness of the man who makes his road and path narrow to walk on. This is what, we have become so narrow-minded, that we only look at the material and matter state. Now when we look at the field state it's a different ball game. These systems are there to create that initial school of thought, that he can do the next step. Would our children need a vehicle to travel, when through understanding of a generation of these technologies, understand the soul of them ?? is a flight ?? Now we don't ?? have ?? time, the Messiah can answer anymore ?? We pack up shop and go somewhere else. Maybe another planet Zeus to change the man from being a wild thing, to become a beautiful tame , (1:20). and understanding, or more enhanced knowledge of others in the U. Try to understand the interaction of the fields, and then you can be everything that you can imagine. Nobody can sell it to you as a prophet. That's ?? what I always tell them, I am the Messiah, but the Messiah of my own physicality and my own soul. Let's see if you understand it. I tell you one thing, which I have said very recently, and you have heard it, very soon the world religious leaders will take their turbans off and their hats and crowns and they'll walk as normal man on the street, as the man become wise to the knowledge of the Creator, and no one can be in-between or translator. Shall be the same with the kings, those who think they can keep the others. Where man realizes the kingdom is within the structure of the knowledge, not with a fake crown on the head.

Any other question.

Q: Guatua, .. (1:22). again we are running out of words to express this T. … Your T is more than amazing. …
K- It's our T and collectively we are developing it ..
Q: You say this system can take 4 passengers and because there is no wheel, including the steering wheel, which of the souls of the 4, will think, and then the Spaceship unit will go to Moon or another place. How about if 2 of the 4 passengers are thinking in a different, one thinks of going to Moon, and the other thinks of going to Mars. So what determines where does the system goes?
K- We were discussing this in the past few days, that how it works. You know, (1:24). the best way I can explain it, we call it in Farsi .. "taro" in Persian language it's very common, you say someone, you go first, (the other) says, no, no, you go first. While actually I want you to go first because I value you more. So we have ?? (yes - no gong back and forth) … in the process of the traveling with this system, the respect of the power of the soul of the one, which is valued and respected, will take the position and the D. You want to go to the moon, I want to go to the Mars. But what is the what I call, "the discretion of the balance of the souls" which will decide. I want to go to Mars, but you are more anxious to go to the moon, you can takeoff, I go to the next. You will not be abandoned, because the captain is gone, the captain is you, because ?? made the condition of. It's very much understanding the work of the soul, and then you don't get abandoned in the middle of the U, because the captain came off and went for a walk, to see something, and he ?? went to do it for a 1000 years. The beauty of these systems is how you get connected and how it connects with you. You will understand these more and more, we are doing a lot of tests in the background, (1:26). and it's beautiful how we see these things ?? filling up , as we are putting systems together to, in a way, to communicate and find a balance within the souls. If you notice I said, the control system in these systems, is not built, that when you put the helmets on your head, you become the captain. The system is built within the structure, that everyone, collective balance will become the captain. Man has a lot to learn. We are building these systems in the progressive development of the KS in the background, who have reached the point of maturity to understand.

Q: .. this question is loaded. .. Is the first flight going to takeoff from Iran, either on December 21, we as you said, or on 6th June 2022. Why Iran or why not?

K- Iran is the mother birth of western civilization, as I explained this before, we know it, and we understand it. (1:28). On the other hand, Iran is where the Mitra came from, the land of peace, the land of understanding, and thirdly, we choose Iran, because it is the mother point birth of most of the living civilizations, connections in all dimensions. I explained this before and in time you will understand more and more about it, and secondly we are not restricting the flights to Iran only. If you listen to the teaching, we opened the D to different countries and nations. We'll be receiving 3 units a week. By the time we have the first flight systems ready and packed to go and everything else, we'll have most probably 10 of them on the runway, in the assembly. And gradually we deliver these step by step to countries which purchased one. And then we put them into flight.

Don't forget citizens of each nation has to come to take their system to their nation. I am not a pilot, and I am not a deliveryman. Or do you want your system to be on the waters and the trains for 8 to 10 weeks. Where those of you who bought it, you come and take it, and guaranteed that it flies and stays ?? with you. You understand gradually, what we are aiming at. You'll understand gradually how we set the systems separately, (1:30). the EU, Body EU, VEU, HEU, the Brain unit, because the man will suffer in different ways, and it needs to be adjusted in different ways. These EU will take a long time for mankind to be able all of you, ?? unless you receive ?? achievement and development in the soul of the collective man. You got to realize one thing, that, once we blow the wind of the knowledge of the U to the STM, every soul will, on this planet, will be educated. But not all souls are ready to go through that D.
Any other questions

K- I hope you (Dr. Guatua) will be one of those who will take one. That's one of my deepest wishes.
Q: I look forward to bring exactly that as soon as possible.
K- I am ??
Q: Staephania, … (1:32). Can you hear me properly ..
K- The whole U can hear you
Q: As you always said the teaching is not just for the world … Regarding the space craft. There are 4 spaces, . you remind me a lot of the MOJHAN. You said this EU would be like, to teach us to fly. .. that will be like a pilot in a simulator .. we will learn how to fly with no fear. My assumption it's like .. in the MOJHAN we supposed to fly, but we only had our body. .. You said, our body is our space craft. In the MOJHAN (1:34). you taught us about the soul, where it is, how to interact, then towards the end you brought us the flight… you saw yourself like a midwife for mankind to take us to the next step. Everything you said, it always became reality. .. when you ask us to .. how the soul works .. all the teaching you gave to everybody .. it was a life changing experience for me, the Mojhans. It changed completely my life, never the same .. because many things happened .. that became reality. When we were supposed to fly .. I had fear. you told us too, so it's not like I imagined it. You told us the reason why I start to rotate really fast was because I had fear. (1:36). The fear take and you ?? didn't stay straight, so I kind of stopped all the process, because of fear. A few workshops ago you said, .. it would take off the fear. So my assumption is .. we will do like the Mojhan .. be able to make the space craft with our body, but the machine is going to give us support on the transition and take off the fear. this is my assumption. Is it like this?
K- As Mojhans both in Ghana and especially in China, you were taught and matured to be able to fly with your soul. But as I said, you were not matured to see the knowledge. All Mojhans, those who came through it and they ?? understood it, .. we see this system on the screen, the knowledge you were given is the next step, even the next step after this system. As I said, before where you learn to travel with your soul, .. live through your soul. This is important to all of us.

The Mojhans were given the knowledge in full, but to the lack of understanding and the greed, and whatever you might call it, the greed for knowledge. not the financial greed…

(1:38). very soon they'll come to understand. Many times I wish I would have taken more KS as Mojhans, that one of them would have elevated through the understanding and teach the others to become, to travel through the soul. Some of you took little, some of you were not there to take little, you were just there to see what you can do, and how it is going to change you, but you never understood the knowledge was given within, within your soul, and then if you understood it. In a few months, few more teachings, now I know I was told how to change, and now I can do. We are getting very close to those who were true Mojhans, to even, they start understanding how their souls will become the vehicle for them to become the next passengers of the space. You became a U Council member and at the same time Mojhan, you will see the structure of the change faster than the others, most probably. It's understanding it, it's not just listening to it.
Q: I have to say, for me was really life changing … Do you remember .. when my skin changed color. There was a point that everything you were saying in the morning, it would happen in the evening. (1:40). To me, when I look back … that for me was the reality for how everything is. You gave us the opportunity. It's when a woman gets pregnant and suddenly her body change, it's not under their control to become bigger and accommodate their body for the baby. When the last day when you told us to fly, and we went into Star-Formation, and it was like engine, a machine who start up. It was like something .. bigger. Like the same as a mother, her body change, like you said, always, you don't have control on your heart, the beating every night, all night long, you are not aware of the processes that are happening inside your body, but they are happening, there's this intelligence, that your body has to make all this happening, while you are doing other stuff.

So when we were supposed to fly, I felt certain things that were real to me, and to others, because I wasn't on my own, we were 4. When things start happening, it was like death, ?? intelligence took over. But it was like what you said, (1:42). you cannot think, it's not about thinking, when you think it's not it, things start happening. But at the same time, .. we don't loss our physical, "me" whatever. The fear took over, because I could tell we were going something bigger was going to happen next, and I didn't .. when .. we have to be ready to let go of everything. It's like a, what you always said, when someone is ready to die, is ready to let go everything. I realized at that point that obviously I was not ready, obviously. So I tried to stop with the process. I did felt a little bit like a failure, .. then I looked back, and it was a big .. lesson, and this was all real. What I understood was exactly what you said, we are creating conditions, and then the things happen. I think this is what we are doing now, we creating conditions for things to happen, and the things will happen. That's why part of the condition is to be really ready to have this full trust, and not to have fear. I understood .. there is not space for fear. I understood the fear, (1:44). will go away with the knowledge, with the understanding, so obviously I agree when you said, that we were not ready, otherwise we would have done it. Because everything you said happened, without us doing anything. Everything happened very spontaneously towards the end of the Mojhan. .. you also said to us, when we are on the plane, not to connect, otherwise it will stop the plane. Many things happened during the Mojhans that I will never forget. They were very real .. I wish I will never let you down.

K- No, you haven't let anyone down, you just gradually mature to understand it faster than the others. In a way, you have been trained for it, you have been taught what to look for. We had those KS who came to be KS as Mojhans, but they had a different agenda, and then we had KS who came to be Mojhans, and they truly were there to achieve it. You talk about the 4 chairs in the slide (system), why to we introduce the 4 chair system to start with. Look at the Star Formation, 4 system, and then the connection to the soul will decide with the soul of the system. This system is not a structure, this system is alive, it interacts with you, knows your need, gives you what you need, and takes what you don't need. (1:46). Unfortunately, if you look at this structure, have you seen a toilet yet. When they cut it layer by layer (cross sections) have you seen any facilities for you to get rid of what you don't need, because the system will take everything what you don't need. The man will change in these systems.

Some of the KS don't know. The KS who became Mojhans, and joined us in Ghana for a few weeks, then we flew them to China, and they stayed with us there for a few more weeks. We promised we'd bring them together. That bringing together is when the soul matures to be. And those who have not understood will be weeded out. The time for development of the soul comes step by step. Then when you understand it you become the pearls of, in a way, the lamps to guide the others to follow. You don't become prophets, you become the ones which burns to let the others to see the way, the path. It was beautiful to see how a few of the KS literally achieved the D of the progress of their soul, to become the true Mojhans. I saw one .. two, and one which came there with the greed of the time, not with knowledge of the time , and you still see them. We are very visual, we see everything. It's amazing how knowledge will come back, once you learn it, it's embedded in you. Thank you very much …

As you can see we haven't allocated any kitchen, dining table, toilets, (1:48). or anything else .. Because the system is unified, the system will take what you don't need, and give you what you need.

Q: .. you also said something that you repeated last Thursday, … that you can move the earth, the position of the earth, the 4 of you, but this I don't know if I remembered correctly, the 4 of us, when you can go around the earth, and change the fields of the earth, and be able to move the earth. This remind me .. when you talk about the space craft like stars in the U. That remind me of that, what you told us in the Mojhan, I (first) understood it last week when you talk about the star. I didn't quite understand it at the time.
K- … Gradually we understand ourselves little by little, more of whatever little we know.
Any other question.

Q: (1:50). ..Taking advantage of space how do we achieve harmony between the crew, the STM, the STP, and the physicality. He adds, the physicality always does something on impulse?
K- Soon you will learn, that there is no such a thing, and there is no captain. When man enters these systems, he becomes a peaceful man. There is no greed in the man. There is

nothing, you feel peaceful, .. serene, .. "I have everything I want," I am not hungry, I don't need food, I don't need to work, I don't need warmth. both ?? the emotion of the completion, is one of the one things, that those who become passengers of these vehicles will feel. I am complete. Man has not, or does not have this emotion, and such developed it. "I have everything I need." When you are passengers of these systems, the way they work, and the way they structure the field balances of the body, you might walk for months without ever need to take food, because the fields setup around you within the structure of the cell, still interacts with its environment, does not need the machine. There is a lot to learn, .. to come, .. for man to explore to understand. (1:52).

Q: .. Are 2 spaceships able to communicate with each other, similar with how 1 submarine makes contact with other submarines by tuning into 2 different frequencies of radio waves. Other question .. can 2 flight units meet during the trip?
K - Of course. You interact. In the development of the T when you understand more, it's very simple, I just explained, when you expand the fields around you, to make a shield, or you create an environment to sit. What you are asking, is just to connect the fields of the two, or the 3. When you create a similar field strength, you become part of one, you can jump from one to another. Then we'll learn a lot very much faster. Time has come to mature.

Q: .. You said, that while flying it enhances the soul. Is this, (1:54). the beginning of freedom of man, and in order to fly through the soul?
K- This is what I come to teach you gradually, yes, for those who are ready for it. I said many times, there's a very beautiful English saying, you can take a horse to the water, but you can't make it to drink. Because he is not thirsty. Man is not thirsty for peace, man is not thirsty for not to need to kill. Man is thirsty to kill, to be above, to be something more.

Q: When will there be an exhibition in Brazil .. T fair?
K- I don't know. At the moment we are pushing with what we have in Linz. Gradually building it up, most probably. You got to realize KF is on a very, very delicate path, world leaders who are what they call themselves, "superpowers" don't want to loose the position. So KF is sharing knowledge, such that everybody can go everywhere. Is a problem. So in a way, we want to have the T, but we don't want to allow the others to have it, ?? otherwise we all become equal. At the same time part of the problem with the KF, (1:56). is we show you how is a new true D of your soul, and understanding it walk away from religions. So religious leaders are not so good with us either.

But the only thing they don't understand is, we are here to bring the change, and to see the change to go through. This time man will walk out of this planet as a peaceful man, as a man who believes in himself, and understands the process of creation, that no one can cheat him, in the name of ?? And this is what it is, important for all of you to understand. We are giving you the freedom of yourself, we are not ?? saving you to become ?? part of ?? If you understood this ?? if you haven't understood this ?? ??? ? ? in the maze of the knowledge, and maze of lack of understanding, what we call, understanding of the process of creation. If you listen to all the teachings and understand

some of the teachings, true meaning of it, many of you should have traveled with your soul. Many of you would have understood the operation of your engine, center. We don't need to be in Brazil, or in Mexico, and create an exhibition somewhere. At the moment any one place is good enough for us. We are here in Linz and we show the T. It's for the others to do. (1:58). As the German newspaper article said, "Messiah sells." We prefer to sell, than enslave the soul.

If you notice for past years, many of you KS, who are in the background or with us, you have offered us hundreds of thousands square meters of land, you have offered us the most prestigious properties around the world, .. farms, .. buildings, .. everything. The Foundation has refused. If you made a financial donation that allows the expansion of the T, that we ?? spend to do it, we accept. But if you have offered us, how many of you, I can call one by one, can come online, assets - real properties, things you developed, we are not interested. There shall be no temples in the path of the belief of the soul. We are not here to do what we have seen, has been done wrong to man. You build EC to elevate the STM to teach, to believe in the suffering ?? support. But when I look back at the KF, people offering us unlimited land, "I want you to build," to have, to bring, they all made terms ?? I created the temple of T in your hearts and souls, and that's all that counts. It's you who have to keep that candle, and make it to burn bright. It's as simple as that. (2:00). Where we create the EC in Linz, its for you to come and se,e to elevate your knowledge, to increase your knowledge, and how you'll do next. When you come in you feel, you understand.
Any other question

Q: .. Did the government of China in any way, respond to this KF flight unit, with their nuclear capable hypersonic missile, which was published widely in the last few days. Is there any coincidence there?
K- No, you got to realize, we were .. invited by the Chinese to meet in a special meeting for the space flights, and then they realized, that they don't have much to show, but they are talking a lot about something. And they said, no, you cannot see the system, but can you give us the combination of the fuel, that we can test it. The Chinese have not reached the maturity of the T, understanding the work of it.

I told them very recently, you stole from us, you stay till you learn. Chinese stole a lot of T from the KF, in immense ways, and they turn it into their name, that it doesn't show it's from outside. But the step by step, they paid for it. But they changed, you will see. (2:02). You don't need supersonics whatever. As I said to the Iranian officials in past few days, we take the EU ?? flight systems into AZ, because it's ours, it's part of the KF. We take it to Tell Aviv, .. to Jerusalem, .. to Mecca, and let's see who runs faster to get to the other side. We've seen in the past few days Israelis creating a huge budget to be able to do one ?? ?? I call it. The T we have in Iran doesn't need one ??? won't even reach the border. But it has to come from the intelligence of the Iranian leadership to put the hand of peace out to every nation. We gave the knowledge freely in the hand of the Iranian leadership, and somehow, they have to understand how to use it, to change, to bring back the beauty of , not only Zoroaster's, the way Kush ?? ? ? where kings came and wanted to be part of the Persian kingdom, empire because it was a peaceful place. This comes

when the maturity of the Iranian leadership, and understanding it. In a way, we open the nuclear centers, and we gift it to the other nations, as the T we have, has already made nuclear T obsolete. What are we negotiating ?? for. As I said to the Iranian leadership very recently, the only nation who has been punished for its development in T, is the Iranian nation, because we are advanced, .. developing, (2:04). T beyond imagination. Sanctions against knowledge, maybe it's time to teach the others, that they become ashamed of themselves.

So don't worry about how and who, we can bring the Chinese supersonic missiles with the one flick of a finger. But that is theirs, they have to develop it to learn, maybe from it, we'll see. As we have seen in the past few days ?? by development of T to destroy each other is the habit of the man, and he has to come to it.

We have to do, we carry on the way we are, irrespective of the governments and nations. KF has become a nation ?? beautifully, so openly, and then you will see how we will add to it. I have already made a nation out of you. You do not even know, what is about to hit the mankind. When you have equal knowledge you already have become equal. We rule in a different way, than the world leaders. We rule through science, T and the STM. We teach openly at the same time.

Q: .. access to units. .. Can Mr. Keshe lend or offer on credit, (2:06). to KS, the units at a subsidized pricing?
K- You talk to us, we open the channels. Many KS have done may deals with the KF. Even the flight into space we can talk with you. Many KS we allowed the first EU … You make an offer to the KF and if it is reasonable ?? we can expand on it. We always collaborate. It's your knowledge and T, but we have to expand it, that it doesn't become exclusive.

Q: … Are these units an evolution of the units from the 292 KSW form 2015 Star F and use of 2 MaGravs … ?
K- I hope this will bring peace to man, and KS have always been the flag bearer. We have put the price of this system at 10 million, because of a specific reason. KS who have approached us to be able to be part owners of these crafts, we always look into it. When we have the KS who can travel the span of this planet, (2:08). and beyond. Governments have no more say. It means us, as a race take over, equal way together, and we support it. But it has to be understood, .. totally understood. We'll explain very soon, a new way of all the KS, who are a part and in a way, progressive knowledge with us, we'll open a channel to them, that they understand. We open a way to them, that they understand. You talk to us, the KF is open to anything that the knowledge is spread equally across. Many KS soon will become travel agents, when you can get these and transfer passengers to Moon, to Mars, and to New York .. with the flick of finger.

You will see new announcements through deep developments, which we have, within the commercial world in a very, very short time, we are just tidying up the back end. Then you will see how the KF will become one of the largest corporations in the world.
Any other question. (2:10).

Q: .. I thought how hard it is to accept to sign the world peace treaty, and recently I have seen consequences of not signing the WPT after the presentation of it. How important is it for the flight systems to be accepted?
K- You have to sign the world peace treaty through your heart, through your soul, not on the paper. We have no papers and no pens. You write with the pen of your soul. This is what we said from the beginning. you see, .. People who instigate wars, and then we find out it is for their own personal benefit. Then we'll see where and how they will end up. How they'll end up. We learned about one of them in past few weeks. .. as they came form the same blood. Netanyahu created Iran as the biggest enemy and start selling arms to protect Moslems ?? sold arms to Saudis, Why? Because he banked 20 - 30 % in his own private banking, private account ..?? created conditions to collect ?? money. Now the world leader has over 2,000 court cases hanging on him. Now was Iran getting to the nuclear position, or was he making the black sheep that he could make ?? money .. (2:12). This is what we have to become alert, and understand. KS have to start becoming wise in how ?? in how they manipulate you, and ?? because the next guy on the Moon, ?? because he can do magic will become ?? prophet. How many of you are going to be ??

You'll soon understand, much more is behind the teaching then we talk. There shall be no king, .. world leaders, .. religious leaders as we all become the religion, leader of our own souls. This is what a lot of people don't like. Because at the moment they are bent on the kissed hand. It's the time when they have to kiss their own hand, of their own demise.

Any other question or shall we call it a day. … man has moved away ..

Q: Azar . there is a noise that comes from your microphone, like gosh, gosh sound.
K- It is my headphone which is rubbing. .. I try to concentrate on the teaching of the soul, then anything else ?? but at times the microphones moves sometimes. (2:14). The microphone moves. We changed so many microphones to find the right way, without actually bothering Rick. This creates a lot of background noise. Can you hear me now.
R: Yes, I thought you were busy in the background doing some things ..
K- No, it's just that we have been concentrating on the ??

Q: The Spanish group .. would like to begin building a plasma feeding stations, do you have any suggestions for us?
K- Buy a flight system it does feed you and it's
R: So bypass the feeding towers and just go for the flight system.
K- For the flight system flies you, feeds you, does everything else with you.
R: Sounds good.
K- It is good.
This is more or less the beginning of the completion of the T, the next step to this. The reason I introduced the flight system in such a small versatile, is that it can be reached by every man. Then trying to build through the fields, massive space UFOs, this will be done in the coming time.

In coming time, not very long, a number of these systems will be set in the formation, (2:16). that through it, you'll find massive, massive UFOs. In a way, each system will take a place and with it, you create a new ?? D. Not very long to go, once the man gets hold of it, understands it, as I showed you can connect these together, now you can connect it together. He even understands why the shape we chose this way. Little by little, first learn to walk and then we'll see how you run.

Q: ..Having such a revolutionary way of traveling will be to our freedom maybe not to all humans but to those who will own such a spaceship. This is opposite to what the world leaders want , but will force them to change. .. I see this as an open to a new way of living How do you see the future, are we heading as a human race in next 10 to 20 years.
K- We answered that one. There is one thing for sure, in next couple of years, (2:18). we won't colonize the Moon, we'll live on the Moon as we live in another city. We will not colonize Mars and whatever .. we'll live as part of us, as part of the citizens of, we will talk about solar system, not about planet earth. In the coming time man will ??shape living in the galaxy. We will travel the depth of the space in a very easy way. If those of you mange through the work of the system to elevate the understanding of the knowledge, you will travel the span of the U.

But you are not the first ones, many races have already been through it. So we are not telling you the future, we are telling what has already happened, and is happening to many races. Life starts with the interaction of the few fields, and then interaction brings intelligence, depending on the strength of the field, and intelligence has been created. It's a different path, but at the end, it creates a structure like a brain, structure like physicality, with that structure, understanding in the center is the soul, they create new life, new structure of existence, and application. Mankind has not been the first one, and shall never be the last one. As I say, I am a part time job, and this correcting and teaching and bringing different races to become, to see the path of the Creator is one of the things I have done for a long time, and I think I will be at it after the human race is gone to places in the U, developed gradually, as more fields interact they create new life. Maybe some of it, (2:20). with the STM, who left this planet and starts a new cycle, we are there to give a hand.

Thank you .. We have opened truly a new era with this T, but I wonder which president would be able to get into these, one of the systems and actually fly it. …
Get together and purchase these systems, because I love ?? all the time to see the KS to be the front runners, and then they bring the ethos of the work into the work.

(2:22).

Quick Index Paragraph

KF recruiting experts in their fields for factories; Suitcase of knowledge for travel in space; VEU converts cells to energy embedded in STM and transports to other VEU reverses process; Plasmatic encapsulation of STP; Job of religions over ; Call for NASA and defense technology experts to join KF; Christ raised the dead - EU work same way; Every cell has a soul - central control connected to STM; Mohammad respected Zoroaster & Mitra protected Iran; Mitra returns manifest in both soul & physical dimensions first time- new D for Unicose; Mitra's gift to humanity able to manifest in both D soul & physicality; Creator suffered when Mitra took physicality - couldn't follow - now we can manifest in both D; New cycle starts across U; How to balance soul and physicality > expectations > turmoil > imbalance find out emotions and reason; KS have not understood power of plasma; "walk on top of MaGrav" ; system to tap into Knowledge of the Universe; M tunnel effect - taught ; DC condition characteristic of M field; Mr. Keshe shares about not letting oneself to be abused - thought you were the guilty one ; UFOs souls returning and fresh souls being born from earth - light leaving earth; No to breathing method; Detachment is needed ; meet souls in dreams; About Mozhan training ;

ENGLISH TRANSCRIPTION

(:07). K- … In the past 2 weeks the KF has launched the new space flight systems. The new space flight system brings into operation a collection of all the teachings of the past years of the KF. We are a space program, we are a space based program. We are a structure to bring a new T, a new understanding, .. work into the structure of the travel, does not matter in what sense. (Hi Rick you are back …) The process of all the teachings in how to Nano (N) coat, how to makes Gans's, how to use the fields, how we make Cup 1, 2, and all the teachings, (:10). with the energy and fields of MaGravs, was to bring us to this point.

The point of the journey, preparing the man to take flight from this planet. It's like when you go to travel you start weeks before making sure all the ?? , all the things you need for the long journey is there, you don't miss anything. Everything is in the suitcase, but this time the suitcase, is the suitcase of knowledge. We added step by step, we brought more and more people to understand, what is in this suitcase of travel. The suitcase of knowledge for space is very different, than the suitcase of the man traveling the planet earth. We came to understand we don't need no clothing, .. we have no means of digesting food, to take the memories of the best foods and sweets from our home, to where we are going, while we are traveling, and be there. We came to understand that the emotion of missing home will not exist, as it is part of us, as we are home now across the U. Then the suitcase became bigger and bigger. It became larger through the knowledge of man, .. through understanding of many, many Knowledge Seekers (KS). In a way, when you go as a team, to travel as a group, to travel, everyone brings what they like, .. brings a taste of their interest, book, videos or whatever. You'll find out man in the space cannot take these things. (:12). The only thing he'll take with us is the memory of the man within the dimension (D) of the physicality, and the memory of the Soul of the Man (STM) in the D of the U. We'll leave the double life.

What is the next step, now that the suitcase of the knowledge of the man to take the first journey is nearly complete. The only thing is, now we have shown you the crafts, that will take you. Now we are on a journey from home to the D of the airport, or the train station, to get that flight, to get that journey to start. Many of you KS are in that step. Many people will join us very rapidly, because they want to be a passenger. They buy the last minute tickets to get on. But this journey will not end here. The journey starts here for man. This journey of man in the deep space has just started. What we are asking you, is to put the last pieces of, whatever you love, you care in the D of memory and emotion, in the suitcase of the knowledge of the man for space.

Many of your clothes, which you might take in your suitcase, on the point of arrival, due to its MG field will not exist. You say, "I know I left that shirt, .. that toy, .. that food in the suitcase," but where is it. That toy, that shirt, that food, had a physical D in the GM field of the earth, with the emotion of the physicality of the man. (:14). In the D of new air, a new D of the position and field strength, is like a sugar in a hot water. It's there, but not tangible. We carry the essence of the taste of the sugar in the water, as the memories of our lives on earth. Many of us will feel this D of the travel. Many of us will yearn to feel the D of physicality of it. We yearn, we love, the way we loved on the earth, we yearn to be touched, but will not exist. The touch, the feeding, the emotion, will have a different strength, will have a different meaning, will have a new D.

We as KS, and as a human race, we have started a new journey. The suitcase nearly packed, and the last pieces of what is needed to be added to it, is getting there, that we can have it with us when we go. But .. many of you will be disappointed, that at the point of arrival, there is nothing in that suitcase of the physical D of the man.

In so many ways, as you will see, when you enter, and we explained in the teaching of last week. You will see no steering wheel. You will see no controls. You will understand,

that you become the controller of it, position and D. If you are so attached to earth, you will go nowhere. (:16). You hear in ?? "sorry the train is at the station." Because the Soul of the Physicality (STP) and the STM are not ready to take that journey.

Many of you will go, but you'll be disappointed. You love to be the passengers of the U, but the D of the physicality, and hold on the physical D, will keep you. In a way, it's the old song, " there is no such address" the address doesn't exist in your emotion, as the address for you is earth, and you are too physical to understand. Would the mankind change in time, and the emotion change in time, in some cases, yes. But attachment to physicality, will not allow many people, will travel. As you've been on the website of the KF and some of you have already shown interest to be the passengers of the flights to Moon, on the 6th of June, you'll find out, you'll receive a refund on your ticket, as your soul is not prepared to take the journey of the physicality with itself. What you want is not what your soul wants, "I am not ready yet," I need time to mature, maybe, not in my time and D, but in the time and D of my children, my grandchildren. The attachment to .. emotion in understanding is too deep. In talking to some KS, and some people who are trying to understand the knowledge, (:18). of the KF, in the past week I have been explaining in a very simple way. Mankind has to be ready in both the D of the soul, and the STP, and then the man is ready, as totality to take in the oceans of the fields of the U. There'll be no difference in traveling the depth of the U. You'll have a turmoil, you'll have the M field flows, you have the hurricanes of the fields from the explosion of the star, you'll be tumbled, you'll roll, you'll find out if you have chosen the craft version, you are in the D of the physicality, and the man will go.

As I said to the ambassadors and the people who are working in the direction of understanding the T, how are your leaders going to tell your nationals and your followers, that the time has come. The time of change for us to understand the next level of understanding has come. Where most of physical D will never exist, when you enter these units, there is no food, what is going to happen to your stomach? Still you might create children of space in the coming time. They will have in their DNA, the process of creating a stomach, creating a digestive system, (:20). creating of cleaning, creating system to reject what it doesn't need, but in the D of the flights, the universal systems, there is no such thing, but still stays in the background in the RNA and DNA, of the STM and the STP, that if man returns to earth in due coarse, all shall be created again, all the functioning again, all be ready to go, very much the way we do in the womb of the mother, in the time of the growth within the structure of the womb of the mother. We are in another spaceship, spaceship of the life of the mother. In the coming time, many of you will have problems to understand it, but once you taste it, you come to feel the truth about it.

In the coming weeks, .. months, we start teaching the process of the conversion of the cell of the man to energy, and collectively to become the STM to be able to travel.

Rick show the VEU ..

In the VEU this is about what to happen, in the D of the existence, .. understanding. … (:22).
In this system, the STM will be somewhere here. The physicality .. will take shape and be somewhere here. The structure of the fields of this system are set to bring the D of the physicality into the position of the soul. At the same time, the fields of the structure are set to create the squeezing of the fields of the physicality, or the soul's D of the physicality into the same point.

What do you get? The STM as a whole, being able to leave the D of physicality, as both have been brought together in a very controlled way. What will you be left with, is nothing. (:24). At this point, as you are energy, I can transfer you into another system. I can take you into another system, by the D of the flight and manifest your soul. And then set the system into reverse, where the STM will open up the D of physicality, and the STP will grasp the opening of the physical D of the man.

In the past, in the present science, they tried to move an atom, they tried to move something somewhere, but they haven't realized, that the atom has a soul. If the scientists can move the soul of the atom, the soul of totality , and this is the purpose of the VEU. Where you are open to the both D of the fields of the U, and what is there, that the STM in the D of his own package, will move to the position of the desire destination. In the KF we have developed such a line of communication, such a transfer of the energy. We have tested it, and it is part of the new flight system. (:26).

As now the KF Austria has been given to become what we call, space aircraft manufacturing for space development, by the authorities. We are there to show the system, we are there to run the prototypes, and invite the government officials, and people, leaders in the space T to be present, when the tests are done. When the systems are assembled, that it becomes certified, for the man to travel within the new D of this planet, but beyond it, we have no authorities, except the authority of the Creator.

As the Austrian officials said, up to 80 km is under our rule, above that, we have no rules. We go to the others who think they control the space. But those who control the space have the limitation of a few hundred km more, and beyond that, is the rule of the U. KF works in that D. Many of you will go through the physical transportation and transmutation (T&T), many of you will go through the energy T&T. It's for you to decide, which mode of transportation you like to take and be part of. How you will squeeze the fields of the U, that makes your soul to receive enough to leave the physical D. Then how we squeeze the fields of the physical D of the soul to be added to, the D of the STM, that matures, exactly the way, at the point of death, (:28) of the physical life of you at the moment, to be able to release itself. Maturity of the time comes from where the STM has received enough to be able to take that trip. Has created enough connection with every cell of the body of the man, to take everything it needs, for it to take flight.

As I said in other teachings many years ago, now you might understand, is these machines we produce, are like, exactly like a juice extractor. You put the carrot, and you put the grapes, and you put the apple in a juice extractor, once the extractor has squeezed

the juice out of it, that they are all together, you are left, with the leftover, which is squeezed out of the machine. This is your life at the moment. At the point of death, what is left is what that juice extractor has rejected, because the true essence of the field has gone into the juice, into the liquid, which you take. In essence of the STM, when all the soul energies of the every cell of the man, is given to the STM, then the new soul, the new what we call, totality, (:30). will leave the body of the man, and leave the body of the man, that, that wasted thing, as we had with the juice extractor. No more and no less. Man has made a system to show the process of the creation, but he never understood.

Now if you look the new EU, are in that process, to release all the souls of every cell of the body .. to be available to the STM, from the soul of the D of the physicality of the cells, that the STM receives enough, matures enough, that he can release himself from the D of physicality. In the present knowledge, in the present D of life of the man, there is a leftover, which is the body of the man, what we call, the muck, the body, the leftover.

In the process of T&T you take everything, as embedded within the soul of the man, the STP, and the soul of the physical material, with us, as part of the D of the T&T. In a way, we make, instead of the STM to be on its own, we make the cage, to become the carrier. We encapsulate the STM in the plasma of the fields of the system. We allow it to manifest itself in another D, and then, when we take the plasmatic encapsulation away, the physicality of the man will manifest itself in the presence of the time and position, (:32). on earth, or on the other position and system's in the U.

This plasmatic encapsulation will be perfectly understood in the coming time, when you don't have one of these systems with you on the sun, or on the Moon, Jupiter or on another position in the U, where you want, you like to reach, but there is no system . The encapsulation, which is created, will take you there, will deliver you to a position, will create you a D of life, and allow you to manifest yourself in whatever shape or form, according to the physical plasmatic structure of the environment, as a new creature, in that position or D. As long as you can keep the D of the, what we call, plasma capsule, you can return back to the position. If we can make the same systems as we are doing in Austria, and we're sending these systems across the planet, you don't want to come back to Austria, you go to New York, Tehran, anywhere else you feel, where the systems are, or you can divert your systems, if you become good enough, .. to move the source to the point. .. we start slowly, opening the knowledge, that how you move, (:34). how you do things.

It took us 8 years to bring you to this position, and it will take 8,000 years to teach the rest, because the knowledge is so vast, the knowledge is so immense, that the knowledge of the man, unless man let's the, what I call, attachment to physicality go, will take him a long, long time. This is the reason, and only reason, that the creation of the soul and physicality, through the birth of Mitra, will become one. Then the man will have the full possibility of both D, that he can travel the span of the U in any shape or form. Understanding and creation of the new generation of the children of man, will have that capability, as it comes with the birth of Mitra. It's part of the gift to humanity, as the mother of the creation, will create, will blow a new knowledge of life, to the whole of the

U. There shall no D, where and how, as the D of how to serve, how to be there to serve, that creates a new condition of life anywhere in the U.

These new EU are just stepping stones to the next D of the knowledge for man. The new EU, the new structure of the production of the systems, (:36). will be beyond imagination of many of you. Because man is too physical. As I said to the representative of Iranian government in past few days, every religious leader can deny the existence and the presence of Methi. When are they going to stop, and who is going to be the Methi. As they decide to the benefit of their pockets, or the truth, that they'll find out, with the knowledge come, the knowledge dispersed, themselves have become irrelevant to the whole equation of the creation and the knowledge of the prophet of the Creator.

In a way, the knowledge given, in what I explained today, makes the presence of Ayatollah K of Iran, the Pope, and the rest, irrelevant to the knowledge of the creation. How long these people would like to attach themselves to be the leaders, to be who they know is the right, has already expired. Let them struggle in the D of physicality, but with the knowledge, and the disperse of the knowledge, the correct way. We'll find out, that the belief in the path, of what was chosen to bring man to this position, will come to be understood to be, the belief in the Creator and the creation. As I said, when you understand how you can transmute, when you can manifest yourself in D of physicality, how you can elevate your soul, then there is nobody who can tell you, how Christ raised the dead. He raised the soul of the dead and the physicality followed. In a way, he gave from his soul, (:38). exactly like this machine, that soul elevated, in the D of elevating the physical soul. Now explain to us, in Vatican, what that means. This means the understanding of the process, and the end of Christianity.

Explain to the leaders of Iran, be it A K and the rest of the Ayatollahs in power, what is "shama ??" now that every Moslem has access to go on the Moon, and see the moon is not cut. Then we understand the purpose of the religions, which we brought, to guide man to this step, that he can understand the rest easier.

The term and the condition of the religions are over, because every single man has the knowledge, .. has the capability to understand the knowledge, that does not allow no Ayatollah, no Pope, no Rabbi to lie to them about who is, who they are, and what is the truth about the Creator. If the knowledge of the Creator is in the hand of every man, does he need a Messenger to tell him, as he has already received the message, understood the totality. This is what is, and many of you will come to understand in the coming weeks and months, the opposition to KF will come from the religious leaders, as they have to take their turbans off, and the holy hats, and become another soul, with the knowledge that they themselves, become part of the process of creation. No one can lie to no one. (:40). The process of the what we call, the guardians, and those who thought the man was supposed to be a man, to understand his souls. and abuse the souls in that process, is over. As I said, to the delegation of Ayatollah K, we don't need no permission. We deliver the knowledge and the man will put aside the old dogmas.

In so many ways, your knowledge, understanding what is on the screen, makes you to understand how the Christ rose a man, from dead, and the rest of what has come, and how you can transmute, understanding knowledge across the U. So in fact, you all have the knowledge of the Christ, and does it make you the Christ? In essence it's the same right across all the religions. As I said, by knowledge and understanding, no man will follow no religion, except the principle of the knowledge and the religion of the Mitra, do good, act good, and think good. In that process you can do no wrong. In that process you are a citizen of the U. You are the gift to the rest of the creation, as your knowledge becomes their knowledge, and they appreciate and respect in what you shared. That's how you become the givers.

Let them create as much mayhem as they like. The truth shall not change. The knowledge shall not die. In so many ways, (:42). there are few days, very short time, left of all the religious leaders and name of the religions, as the man comes to understand the essence of the Creator is within him. Every man is a Methi of his own soul and his physicality. As we hear, that we see in the administrations, they do not know how to handle KF. Since last week, in the past 2 weeks, we have put the new flight EU, we have created mayhem for many governments. How to handle the KS of the KF in the next few months traveling in the span of the planet, and the U, and the galaxies, and without us claiming to be the leaders. If we look at the structure of the VEU in transmutation. If we look at the structure of the new flight system in transportation, we have given every soul, every man the opportunity to travel in both D, or as he understands and matures, from one to the other.

If you enter the EU, the VEU and you want to go from A to B, but you don't carry that essence of purity, you will go nowhere. We open the box, you are still standing there. And what do you say, "the system doesn't work, and there is something wrong with it." The only thing wrong with it, is that your STP knows you're a criminal and cannot leave. Then you can hide it in any shape or form you like. (:44). You are still attached to the physicality to continue with the criminality. In so many ways, the teaching in a very slow steps, like in this simple picture will open a new knowledge, .. D, not all the KS will grasp it. But those who are in the background will understand it, and then it will take shape, from D of pictures to reality.

Rick would you like to play new video of the EU, that we see the progress, we see the change. Two years ago we showed you the illusion, the pictures of what we were doing. What will the EU will do, and how will they look. Now when you come into the EC you see the reality. Next time you come in 2 or 3 months, you'll see the more advanced version of it. Different structures different, different systems, but in essence, man will choose. The VEU will stand next to the, what we call the old EU, and then you understand the difference. You want to travel in the D of the soul, or you want to travel in the D of physicality. (:46).

Go ahead please, plays video ..

K- There is a VEU in the EC. If you remember we used to, and we showed a demonstration of how this system would look. Now this is a physical system in front of you. We taught for years in advance, and now we show the system. And the new system, (:48). coming up is more advanced then this one. In a way, this is the great grandfather of the new system to come in, due to development and understanding of more of the T. The same shall be with the other systems, which the KF will bring out and put in operation, for advancement of understanding, and for creation of the conditions for man to suffer less in the D of physicality. What we show as a spaceship, becomes and takes the D of physicality and reality, and we have to understand it.

If you even go to the side where you see the chair. If you look the EU uses one chair, the new advancement in knowledge and space T, allows 4 souls collectively to be carried within the system, both in both D of the physical, and in D of STM. As somebody asked, what's going to happen with, who is going to take charge? Who is going to be the captain? This goes back to the teaching, where I said before, who will try to be giver of? I have enough time to get to Mars, you need to go to the Moon, your wish is my command, I am here to serve you. And then if I get to Mars, (:50). and find for me ?? to decide. Then you understand the new processes, the new teaching, the new systems, is all to bring man to that position of the suitcase, that the man can stand outside any of these units and decide.

I am sure many of you will feel shame, even walking in with a suitcase, as your suitcase might not even exist at a point of arrival. You'll come to the flight system and you'll say to yourself, I have to let the physicality go, as the suitcase of man stays outside, and the suitcase of the STM will walk inside. The knowledge, the memory, the expansion of the thoughts, will take shape itself in the flight system, where there is no room for the knowledge, as we know, in most cases when we arrive, there is no knowledge. Man cannot carry anything, but himself, except understanding of the emotion, through the totality of the life of the man on this planet. When you enter these units as a STM, as we have gathered in the STP, the totality of the knowledge of all of our ancestors, we walk in with all knowledge of the creation on this planet. When you enter, as all of us carry most of that knowledge together, you'll find out, there is very little difference between understanding of the souls, (:52). who shall be the captain, and who will be the first to go where they want to. You'll understand we carry the common denominator of the gift of the creation within us, and mankind will mature very quickly, to understand that even these spacecrafts, are just a tool for the maturity of the man. For the maturity of the STM, for the maturity of the understanding of the totality of the creation.

In so many cases of teaching, we have taught everything, that the man needs. Then for many of us, we'll see how we can bring this new D into play, and how we can do.

In understanding this is, and more and more we, realizing the difference between the VEU, and T&T, and the new flight system, will change our D of thinking, in knowing how feeble we've been, in not understanding the totality for thousands of years. Everything has been there. If you look inside the flight system, (:54). you'll understand even within a flight, man can mature to be as part of, to be in possession of, and to be as

totality of all the technologies put together. In so many ways, mankind needs to enter the point of maturity, .. understand and chose which, and what he likes to take flight, and would he like suddenly in the middle, to have both, the D of the STP, and D of the STM, free from, that mankind could mature to a new D. Mankind will become part of the understanding of the totality, where the new EU flight systems, are a collective set, of all the new knowledge's and the systems we have given you in past thousands of years. As you'll be the citizens of the U, for mankind, who has just matured to understand a little bit more about this.

Now maybe, many of you will come to mature to point of understanding the totality. And if not, we have thousands of years to go yet. Maybe your children and great grandchildren, will come to understand this, and with it, they'll come to understand the totality of the knowledge of the creation. Now we see the collective knowledge, (:56). and as I told you before, in which suitcase, and with what suitcase, you will want to enter any of these 2 machines. Don't forget, the VEU is very small, what would you hold onto, your mobile phone, or the ring from the mother and the grandmother, when you go through T&T of the VEU, and would you carry the suitcase with you into the EU flight, as you know the point of arrival, it would be very funny, if you carried the tin of the baked beans, as is the tradition, breakfast of the every Englishmen, and when you arrive in that D, the material used for the tin has become part of its illusive energy of its space and time, and what is left, is nothing but beans, in your suitcase, and even if that suitcase still has a physical D of the physicality. Now you understand, choose your flights method. Use the D of the soul, and go through the D of the VEU, or go with the new flight system, and still have an option to go through the process of what we call, physicality and maybe in that time you mature to go through the process of the soul too.

But understand one point, (:58). man can only travel in any of these systems, when man has matured the totality, of understanding the truth about the creation and the Creator. I hope today's teaching brought you a little bit closer to understand how you travel, .. be, and if very careful .. about the suitcase you want to carry. The suitcase of man, with the D of physicality, or the suitcase of the soul and D of the energies of the thoughts and memories of the time and place and D. The rest is yours, the rest is in your hands, and the rest is for those who understand. I am sure by the end of this teaching, those who are sitting here, or those who report to certain governments, to say, you see ?? he is the Methi, and now it is the end of your job. You had better do something.

My advice to the Iranian leadership is very simple, the time for separation of the STM and physicality of the man is over, and it is the responsibility of the religious leaders being the president A K of Iran, to open the truth about the beginning of the new cycle for man in a D of creation, and be the step stone for them to mature, and not block the knowledge, as we can take you to the new D, that you can only block your souls from elevation. The same goes to Vatican and the messengers who are in the background sitting here, and the same to the rabbis ?? in Tel Aviv, and the same with the Chinese Buddhists, and the rest. The time of the maturity of the soul has arrived, (1:00). and none of you have the capability and the power to stop the change, that we have set out. Mankind has matured, and it is the time for that maturity to show itself, that the man

become part of the U Community, and become free from the village of the earth, and the views of so many people in the name of the Creator.
Thank you Rick . go for commercial break .

>> **Proofed to here** >>

>> BREAK >> 404 KSW Oct 28, 2021 video (1:14). (1:16).

K- Going back into what we just saw and some of the things shown in the video. .. the 3 Books 1, 2, 3 now they become as best sellers in category, and under their publications. The KF teams have launched these books, they have become some of the bet sellers in many of the categories. The knowledge is getting known by people outside the KF. Gradually in the coming weeks you'll see the hardcover of these books in different stores, book stores across especially UK and Canada. We make sure as many people have access to the knowledge, and they can reach to understand the knowledge.

When you look at the, what has been more or less progressive developments of this T, it's been on the back of, step by step development, .. showing, .. to understand, and some people grasp some part of it, .. the other part of it. But now collectively many of the KS are heading towards one direction. As now the KF has become a space organization (1:18). and as KF SSI, has become an institute, independent university very soon, you all can become part of this university, .. part of the research, and add to the knowledge, and learn more about the work of the U. You've seen we have come step by step, a long way, and we have seen step by step we have taken shape in different directions and D. We've seen how we use the Pl but and all of it is according to the level of our understanding.

One reactor could look the same, but perform totally different directions and D of the knowledge. It's nice to see programs like this. When we go back to one scene on this video, is where we showed the first conference in Rome with the world ambassadors. In that conference is one piece left in the memory of many of you. One is one is handing over the MaGrav units to the world ambassadors. And one ?/ long parted, in middle end, when the delegation from his Eminence the Pope from the Vatican, approaches to say good-bye, they had to leave, you hear in the microphone, "Papa Amora" , which means the father loves you. We understand the Vatican is fully aware, what is about to come, and the other world religious leaders. The Vatican Pope, is a ?? man, who is a layman on the street. (1:20).

Now we understand the depth of the knowledge, and the fact how much, the world religious leaders are delaying the time for the freedom of the STM, and that time has come to an end. As we said, it does not matter how you jump it, there is nothing to jump

on anymore. It's nice to see these things, it brings up very good memories of how things went, and how things started, and how collectively man over centuries have achieved to get where he is now, because we have opened the mind of the man, there is such a thing possible, he has made to endeavor to reach that possibility.

Q: … How may we enjoy the physicality with peace?
K- Easy, be peaceful physicality, become peaceful, and it becomes peace, very simple. Keep away, we usually lock ourselves away from people who might harm us, but as we mature, we'll find out there is another way. Mature your soul, that you elevate their soul, that they don't become to harm you, or to public. Work it the opposite way, instead of running, give, (1:22). and by giving, everything becomes peaceful.

As I said, many times in the past few months, those who were cause of the pain and suffering for us, we let them go. Because that is how they got their lives, by creating that suffering, that they could confirm they exist. Now by letting go, we have found peace. Never knew, love, care, peace, all has come together, because we elevated theirs, by letting them go. By allowing ourselves not to be abused. And that brings peace. That brings a lot of joy. I have never known such a peaceful life for 30 years. Because by keeping turmoil, they confirm their continuous existence. It's the man who has to choose, when we choose for a peace of mind, and a peace of soul, we achieve it. It's us who decides, nobody else. Always elevate those who think, they are the cause of your suffering, and they'll mature to it. Very soon I'll explain what this has done, to those who have been cause of our pain. very soon I'll explain how by elevating their souls, they ended up their own pain and suffering of the others. You will understand, but it needs time.
Any other question.
There to elevate, there to give, the rest will come on its own. (1:24).

These as KS, we go back out to explain. KF in Austria, in China, in Iran, and in Mexico and in next couple of months in AZ, have started recruiting KS and non-KS, for expansion of our, what I call, commercial activities and spread of the knowledge through proof of the T. We need KS who have the technical knowledge, who might have the technical knowledge, to join in the factories, and into developments, and maybe some research in these centers. The number of people especially in Tehran, in Austria, and China, and in Mexico will rise to hundreds of people. If you are KS with expertise, not just because you are a KS, try to join us if you want, in setting up and development of these new factories, and these institutions which are set to spread and bring out the new T.

If you are working, and you are in the background, we know many of you are, with weapon defense T in America. (1:26). Those of you who work for NASA and Lockheed Martin and remain out. Reach out to the nuclear physicists who are standing outside Los Alamos, to join the KF in new research centers in Austria, and in AZ. We know many advanced technologists and scientists in the space development in the European Community looking for a job. KF is opening its door to these scientists, to divert what we call, defense T into space T. We know of a massive unemployment in advanced T in US.

In the coming weeks, in AZ KF will open the first series of EU to be shown in AZ and to be used. As we announced in the American teaching, 48 EU will be delivered to AZ in coming weeks, and a quarter of these are there as a gift to American forces who have come back from battles with a psychological, and physical damages to the brain and eye. Freely available to the American citizens of .. military background.

The veterans of wars in Middle east, in Afghanistan, in Iraq, and the rest, you have a free access to use of these, to see your health back, to see, to gain, and to stop the suffering from what you have carried from years, from these, what we call, the atrocities of your government. (1:28). A quarter of the KF EU in AZ with acceptance of our partners, has become freely available to American veterans for their full recovery. This is the hand of peace from the Iranian nation to the Americans. To the American administration and beyond the boundary of the Iranian government and Iranian leadership. This is not a gesture, but this is a first step, KF and the Iranian nation to open a dialog, and with it bring peace to both nations. We work beyond the limitation of the Iranian government and Iranian leadership, as they have their own agenda. The KF agenda is peace, peaceful brotherhood of man, in understanding and sharing T.

With the opening of the EU in AZ, we open the D and directions of our investment, through our arm of our stock exchange group of companies, which will allow the massive investment into US, and the transfer of T to Americans, and the North American state. KF is an independent nation, offers, and has the freedom to deliver its T to anywhere, which can bring peace between men and nations. In the coming weeks, through the veteran newspapers and magazines, which we work with, the people in that structure will announce a free, welcoming use of, Iranian nuclear space T, by the American veterans to improve their lives. (1:30). We do not expect any, what I call, hiccups and we welcome all those who have suffered long enough for the mistakes of their leaders, to recover for many. As we expand more and more centers across America, the same offer will be open, only for the American veterans to become and to recover, as a gift from the Iranian nation and the KF. We bear all the costs. This is the hand of peace outside the "5plus1" between the Iranian nation citizens, and the American government and the rest. This will be demonstrated freely in AZ. As we see more veterans gain the structure of life, and become the normal citizens, we build the bridges of peace, through its citizens, and then the governments follow. As I said, the whole structure of the KF has to be, to create a condition of peace.

The same T is at the reach of the Chinese, and Russian administration if they decide to negotiate with the KF on a direct basis. We deliver the same to all. As we deliver the space flight systems in December of this year for test and trial, we bring all the nations to be available, except European Community Space program, till the situation in European Space Agency with bunch of what we call, misconduct people is sorted, and they have been submitted to, what we call, (1:32). Den Hag European court of justice for their actions. So the European space agency will stay out of the, any what we call, work of the KF till the situation .. has sorted out, that we can deal with a peaceful people.

In so many ways, apply for a job, join the KF and develop, or work to develop new T that brings peace to humanity. I would like to thank John, who has made everything possible, to be a bridge between KF Iran, and KF, and maybe government of US in background, that it brings us that peaceful level, that step to be able to make us a peaceful nation, as One Nation. As I said, KF space agency till now, is becoming a registered independent university, and the same the KF space what we call, factories and manufacturing, become a space organizations for flights, and the rest. We need experts from those who understand and been part of the space T. The Iranians who work at NASA, and for those Americans who work in NASA propulsion lab, to join the new space university in Linz, Austria. To work together, to bring the knowledge in the level, of understanding the totality. The same offer goes to the Chinese, and Russian space T and knowledge. (1:34).

In so many ways, those of you who have access to American administration in different ways, and listen, the race for space as One Nation has opened up through the operation, work, and teaching of the knowledge of the KF. We show this step by step to build trust, and to find out there is a bigger and much stronger T beyond nuclear. Where the nuclear was a stepping stone for us to understand how to access the knowledge of the creation. We welcome you, if you are looking for a job, especially from NASA, especially from American space agencies and aircraft industry, specially those who are expert in design of the defense systems, in American manufacturing weapon T. Join us to create a peace T, and where we can deliver through new T a condition that no man can ever go to war.

KF is on the recruiting path, and I have approached organizations, which will go head hunting, within NASA, .. within Lockheed Martin, Chinese and Russian space agencies, excluding European organizations. With it we'll develop this T very rapidly, in one way or the other. For those people of the space, who believe in the use of the space for peaceful application and implication.
Any other question . (1:36).

Maybe before I finish , those of you who want to know where to apply for the job, go at info@keshe.foundation and you can submit your application forms or requests there.

Q: … trying to understand the STP and STM. She says, in order to understand STP and STM, is it like as the baby in the womb of his mother, the STM is like the mother, and the STP is like the baby?
K- More or less, yes, if that makes you to understand it. Every cell of the man has soul, and operates through that operation. Every cell of the man has fields, which has lead to its manifestation, and has a structure of the control of the physicality, we call it RNA and DNA. That collective physical D operation of the fields, we call the STP, which gives us the D of physical man. By conversion of the fields into matter state level.

At a higher order, where even at the center of the soul, physical soul of the man, physical structure of the man, there is the soul central control for that cell. Sits what we call the soul of the cell, which is connected to the STM. (1:38). Collectively have a different operation, and in singularity, they work within the structure of the physical soul and the soul of, the cell of the man too. So we have a control, central control, and we have

individual central control in the D of physicality. One has a physical D, which is the body we touch, and it has to understand the environmental condition of the fields, and one which is controlling remotely, all access to all, that every cell knows, what the other cells are doing within it, which we call the STM. I hope I managed to answer you.

Q: … In Arabic Islamic literature they name an angle, "Mitratush", or "Metatron", how can we relate to this?
K- I do not know. You got to understand something very important, especially, especially to the Islamic world, During the reign of Mohammad, bless his name, Mohammad fought his uncles and his cousins, that they never touch Iran. He said to them, that they believe in God, what we are trying to bring, long before us, (1:40). through Mitra and Ahura Mazda. As long as Mohammad, bless his name, was alive, Arabs never crossed the line to Iran.

Islamic world crossed the line into the Zoroastrian world of Iran when Mohammad died, and the greed for the wealth in the nation brought them to slaughter the Iranians. Islam of the Iranian nation is an enforced religion, which then became fanaticism. Mohammad himself believed in the, what we call, belief of Zoroaster and Mitra. What we see today in Iran, in the fanaticism, is for those who have carried on with the abuse of the descendents of Mohammad, not the true belief of Mohammad himself. That fanaticism has been the cause of many, many problems for what we call, "the Iranian nation of Zoroaster." We are first Zoroastrians, we are first believers in Mitra, and Islam has a second place in the heart of every Iranian. But enforced, the wrong way, especially in the recent past, by guns, threats, and blood, by those who have taken power, and that has come to an end. Ayatollah of Iran, and Raisi, believe in Zoroaster, (1:42). and Mitra, more than they do in Islam, because they are first Iranian. When you go to Tehran in the school of, what is known as "?? ??" Ayatollah K has paid for the school to be furnished to the best, as his belief in Zoroaster is stronger than his belief in Islam. As it is the root of us, as Iranians, and that cannot be broken.

This is what has to be understood, and then we understand where the Islam has taken shape, the way it has across this planet. During the Mohammad's time, Zoroastrians were respected as a religion, because as Mohammad said, they believe long in the Creator before we do. How can we go and teach them something more. Then you see the name of Mitra in different shape, appears in Islamic literature, as Mohammad accepted Zoroaster and Mitra as a religion and respected the same. In the parliament of today in Iran, Zoroastrians have a member and his thoughts, takes priority more than anybody when the rule ?? is passed. Because they are the true Iranians. They are the true blood of Mitra, what has been, and the way they live. Then when you ask about Mitra in different Islamic culture, you have to understand how, the respect came from Mohammad .. for the culture and belief, as most of the religions come from Mithraism. (1:44).
Any other question

Q: Ghana … Thank you beautiful KS souls .. What should we expect from friends and family in the D of emotion, as we land next to them using our soul?

K- See how closer they take you, or how further they reject you. Then you get your answer. But why they keep you in that distance of emotion through the soul. Maybe they don't understand, or comprehend the strength of the love of your soul. Maybe you need to learn something from them.
Any other question

Q: .. the last teaching you told us, the birth of Mitra on the 21st of December, can you tell us more about this moment of celebration. Like is it the first baby out of the Body EU, or is it the birth of a woman, or something else?
K- 21st of December, (1:46). traditionally is the birth of Mitra, has been for centuries and thousands of years. This is the time of, what we call, the longest night, the birth of Mitra, when the man walked out of the long ignorance of his existence of his Creator, to his creation. The same process will carry on. In the calendar in the life of the man in the D of the belief of the Mitra, existence of the Soul of the Mitra, is existence of .. the soul of the lover of the Creator.

In Christianity and the conversion of the many things in the Old Testament and the others. You call it "Eve," where the Creator is the Adam. And the love of the Creator in a way, tastes of the love, sharing, giving unconditionally, is known in so many ways, as the apple. When the Creator tasted the love, which Mitra brought with itself, for the first time in the D of physicality, on earth. When Mitra choose earth, was because of its beauty, its diversity of life and how life had purpose of love. And a promise was made, that when the peace comes, when she is fully, collected the whole beauty of the U and Unicose, she will return on that day, on her birthday to give life to a new D. Which brings the new life, what you call, the fruit of the, what we call, the apple.

In so many ways, the time for peace has come. (1:48). And then we shall see. In the future we'll disclose in a much more detail about this. But in essence the 21st of April (December) is the birth of Mitra, and has been, and now, Mitra was in the D of the love of the Creator, but now we'll have both in, both D, in the coming time for man to understand. And a new cycle of life will start across the U, in both dimensions. This is where the Creator suffered. Where Mitra took the shape and D of physicality, as He could not. Now one life can live in both D, both in physical and in what we call, the Soul. We'll explain this in the due coarse, as man matures.
Any other question

Looking at this picture you have on the screen, this systems used in the correct way, can allow every, let's say if you have an amputated leg, to be grown to its full capacity, and capability. If you loose an arm or an leg, and if you put it in this system, where your soul and your physicality both grow in a same direction and D, you can grow your arm or leg. You need today, open heart surgery, where this system if it is set, by the man of knowledge, (1:50). your heart will find its position and balance, as the time you were born. It is an amazing system and it needs to be understood. You have to able to understand and be willing to let go of the D of physicality, that the STM can take, when you enter these machines. As long as you have attachments, and worries with attachments, you'll find difficulties to, in a way, to recover from any position. It does not

matter what system we throw at you. That's why we developed these systems, to elevate the soul, at the same time the physicality to decide its position and D. As I said before, if you look at this system, and you don't see any reactors sticking out, within the atmosphere and environment of the system, and this is the same with the flight system for the one we sold, originally the Enhancement demonstration system will be allowed, ?? are these part systems, are more powerful then the others. Advancement in T for KS to understand has taken 2 years, but gradually we will achieve it.
Any other question

Q: How can we create balance between the soul and physicality, and the STM, to stop this war and get peace of the soul?
K- That's within you. (1:52). Nobody else can do that except you. What do you expect? What creates the turmoil, that within, creates imbalance? What bring you balance in soul, that there is no turmoil? In a way, what are you satisfied with? What are your expectations? It does not need somebody to disturb you from being peaceful. Your own thoughts, your own emotions are the main sources of your disruption, not being peaceful with yourself. Find out what those emotions are, and the reasons behind it. Then find peace with it, which means understand it.
Any other question.

R: I think at one point you said, the secret is in your brain.
K- Which is your soul inside it, and STP within it.
R: ..I am just noticing on the picture of the HEU, that appears to be a MaGrav units on the head and foot of each end of this HEU, is that correct?

K- Yes. You KS have not understood the power of the plasma (Pl). (1:54). You have not reached the point of understanding the work of the plasma. Does not matter, what matter you put in-between. You need to create a connection, which means the 2 ends of the physical of man, and the soul, and be able to influence one or the other, and the Pl systems within these, MaGrav systems, is what we always said. You ignored it. We don't, we work with it, because that is why we built it.

John in AZ got very near to it, and he walked away from it. I thought he was going to break through. He was going to breakthrough. He made the tables, walked among, went in the center of it. ""*the only thing he didn't do, was he didn't walk on top of it*.""
R: I can see that, thank you for that. Interesting.

K- Everything in the KF is interesting.
R: It gets more interesting every week it seems. I don't know how that can be, because it seemed totally overwhelming even 8 years ago. It becomes even more interesting each week. Congratulations.
K- We gave you it, .. in small doses, so you never found out, you never realized you've become addicted to it. The knowledge in small bits.
R: It's true in many ways. Once you get addicted to it, (1:56). you don't want to go back to the ordinary life without it. Because everything looks pretty pale in comparison to the Pl T.

K- Why. In the next few months, when I have a little bit more time, we'll introduce what we call the system which gives you the Knowledge of Universe. EU which allows you to tap into the Knowledge of U. To see, not necessarily to understand. Then we'll see what will happen, what's the next steps of the development in the knowledge and T. Or the next steps which are available in the U, and available to man. Due to his lack of knowledge. You make what we call the communication system, from one to another, then this system, will allow the man to tap in to the K of U, communicate in that D. You need this system, as you become men of U, you need to understand how to communicate with the other members of the U Community, and how to be in touch with even the ?? alpha men in other dimensions in the U. It's a T, which is a bit too soon, to early for us to release.

R: We were discussing … about an article about an astronomer's research, that suggests there's a M tunnel that surrounds our solar system … (1:58). we're finding out the scientists and astronomers are just discovering about the M fields that permeate the U, and they are starting to map out … the web like structure of these fields. It's pretty big in that sense, they are starting to acknowledge there are M fields in space. This is something you have been going on since day 1, and Book 1. So they are starting to come around, .. to appreciate your perspective, that there are MG fields which we are .. they are suggesting in this article that there are M field tunnels surrounding the solar system and that's part of the M structure that is also from the galaxy, and that it's all connected … through these M fields. .. so we are getting there .

K- I have been doing this for thousands of years, I think a few more years won't make much difference. It's something I don't know if I have shared it with you before. But when you look at this picture, and understand ..it. A lot of things become very amazingly open in the knowledge of the fields. When where we shared this before. (2:00). and you understand the process of the connection of the fields, in how M fields relate, and how they accumulate in one D or the other.

I am sure you've seen this before. These are magnetic balls. If you look at them, they are very much like universes connected to each other, .. galaxies connected to each other. When you look at the structure, these are .. spherical magnets. This is the shape of .. spiral of the G, and .. if you look, in the center there is a gap. Doesn't matter how you fit it, it is very hard to fill that gap. That gap is mainly created by the D of the physicality, it's very, because of its existence, it enforces this D of physicality to take shape. If you extend the knowledge and understand especially the way we put the magnets, other magnets within it. We see there is a very interesting point with these magnets, that all the fields, (2:02). exactly the same. It does not matter, which position we put the other 2 magnets.

I can put one of these .. bullet magnets, in-between those magnets, and show the conversion of the light to matter, matter to energy. We don't have the systems to see the slowing down of the fields between the magnets and the bullets, if we put them together. But the naked eye, as we are not trained we don't see, but in the M field eye, will see.

Then these bullets, become very much like the flight system we have, and we see there is always a M field, which surrounds any dynamic structure with both physical, M fields and G field. It's not that the solar system is in a tunnel. The fields of the .. G fields, of the solar system create the absorption of the fields, in both D, and creation of .. the M field tunnel. So when you look at it on both ends, you create this tunneling effect. In fact, earth is your solar system, not in a M field tunnel, but is in a tunnel, which it creates itself, around itself, (2:04). due to interaction of the fields within the galaxy, and it shows that way.

It's created out of the interaction of the fields within the solar system, within the galaxy, with each other. It's not that there is a tunnel, and the solar system moves in it. The interaction of the fields of the solar system, leads to the creation of this tunnel with every single magnet, if you look at it, they all come into it. it doesn't matter which one. In interacting with it, they don't interact with one end, they interact with both ends, and then they lead to the creation, and it's the same, the other end of this field, interacts with the other side of these magnets, other galaxies, other stars, and that tunnel is created out of interaction of the fields, with other systems. This the scientists have not understood yet. We are not walking through a tunnel. This tunnel is created out of the interaction of the fields of the solar system, the fields from the earth, fields from the Mars, fields from others, which make the solar system for us ?? with itself, with other N Pole, S Pole of the other stars and galaxies. If you take the .. solar system out of this point, nothing exists, there is no tunnel. I hope I explained this, and understood.
R: That's very good .. I think that's what she was trying to get to, (2:06). in this article .. …
K- This is the secret to systems, which will be seen to be setup, by the introduction of their new flight system. NASA in conjunction with Boeing have been working for years, (2:08). on this tunneling, the way we do for aircrafts, but for cars in the cities. The head of this group, is a Chinese guy, it's called the Phantom Project.

But I tried to work with this group years ago, but I couldn't explain to them, is that by placing the magnets, or fields, in a position of the next interaction you can create the tunnel. In a way, goes back to the transmission towers, which Edison was trying to create, every few km you need a transmission tower, to power the line, or add to the line, that you can keep on transmitting. In the future, many of our roads, flight systems will follow this process, because we go back to the DC condition, which the Edison was trying, which is part of the characteristics of the M field, and the tunneling will become this way. In a way, if you look at it, the M field of this one, and the M field of this one, dictates the position, and everything else, up to this one. The yellow one has very little say in where it goes, the other 2 have. (2:10). Because it's them in sharing the fields through, dictate the position. This is part of the travel system in cities in the future, where you'll use M field system, G fields system, where nobody will crash no one, impossibility to have accident, and we can travel at high speeds in these space tunnels.
Any other question

Q: .. I have come to realize when one lets go of the physical D, one becomes lonely, relationship with friends, family, and prospective of everything changes. I enjoy where I am, so why does this happen?
K- I don't know.
R: ..you mentioned one time .. that when we, (2:12). get a vision of the next D, letting go of the physical D, detachment, then it would be such, an enjoyment, or a vision that the physical D would seem meaningless to us?
K- What do you mean?
R: .. the beauty of the U, that can be seen when we let go of the physical vision of it. People have this fear of letting go of the physical D, that they think they'll be lonely, or they'll lose their relationships .. but perhaps by letting go of the physical D, we become more clear on another D of existence. .. perhaps there are beauties ..
K- Maybe because we let some go, other things become manifest, or we see other parts, which we didn't see before. I had that in past year, year and a half, when you let the abuse go, then you realize how much you allowed it to happen, and do you need it. (Rick interrupts: exactly ..) but the thing is, the worse part of it is, the abuser ?? lied to abuse. And we see this very much with the psychological behavior of any kind of abuse. (2:14). The victim becomes the what you call, the guilty party. You know ?? you are guilty ?? and you have to stand for yourself and find out, that you are just a victim. We never realize it, until we are in it. Then we realize it when we are out of it, what has been going on. Because you condition yourself. You will see a lot of this kind of things, with the people who start using the EU. The insight, the clarity they see things, by elevation of the soul. Very interesting.
Any other question.

Q: .. Are some of these pulsing orb UFOs seen in infrared cameras, actually beings who have reached the point of being able to travel through the soul?
K- Some of them are fresh souls, just left the body. Some of the them are fresh, fresh, souls, just become free from entanglement of the physicality, as they move, and now we have the systems to be able to see them, we see them as light, as they interact with the environment of the area. Some of these, pardon.
R: .. Maybe we'll start to see shooting stars that are going of into space, instead of coming from space to earth off into space. (2:16).
K- Yes, many times, when the soul is free, yes. It shouldn't puzzle us, it's the purpose of the creation on this planet, to become a star, to become a seed, in another D in the U. Can you imagine how fast you travel to that point in another galaxy, and the U, in part of the Unicose to take the position, which you have been given to be filled, by the field strength of, to become the start of a seed of a star, or galaxy, or a U?
It's inevitable when your dynamic Pl fields travels within the fields of the earth, which are dynamic. There are a lot of reports we see, people are posting around Youtube, of massive number of lights in the sky, collectively appears. There are huge numbers of these coming from different directions. Somebody asked, is that the promise, of the return of the souls? Yes, some of them are. Come back, the whole family comes back.

Don't forget, I always say, my great grandmother was 1 single woman, about 100 years ago, and the offspring's of that single woman, at the moment, is a couple of hundred. It's

the same in the depth of the U. The souls who left in the great grandmas time .. 3 - 400 years ago, (2:18). a few thousand of them. They say, "there is a celebration on the earth, we are going back," and we go as whole together, not just individuals. I said that, in the past that you will see massive amount of lights in the skies of the planet, when the souls come back. It is taking shape, gradually people are reporting, videoing and showing. These are not necessarily UFOs, but these are the souls, these souls could have become the center of another star, but as we can ?? translate, they know it is the time, the soul of the star is here. It's because it came from the STM. Mankind has got a lot to learn yet.

Q: Should we work with the breathing method in order to connect with the STP with the STM, and allow it to dissolve in fields for transmutation? In order to reach the center of earth for example?
K- Nope. You got realize, your lung is part of your brain. Your lung, your skin, and brain is of the same source. You can transmute and transfer a lot of energies through your lung, through the breathing system in different ways, that it benefits your way. It depends then, how you interact with it. It's a different proposition, how you feel with it, and what you think you have achieved.
Any other question. (2:20).

Q: .. More interactions between the royal families and commoners, especially with the story on the Japanese princess abandoning her royal status. Have we reached their souls?
K- This has been going on for centuries, royals who don't see, belonging to, and some of them see, they deserving to be. But more and more monarchs in past centuries have left monarchies, not just because of our teaching, but because they don't see, or they want to be a commoner to be with the common people. Even the kingdom is not worth it, for what the love of a common man, as we have seen in the British history, that's how the Queen became into be the Queen of England, by that abdication. Because of the love of a woman. It was much stronger than a king. This is normal, we see it quite often, in every royal family somewhere. But it's the way how they take it, that's important. … Harry's interview, and he said, the hardest thing he could not accept was his bodyguards taken away …

(2:22). Now he had to live among men, the same as a man. Get the same bus .. and the rest of it. .. We've seen with Netanyahu, he brought every hell on every life in the past 12 years …

The love and respect is not a privilege, it's not a right, it's a desire to give. This is what the problem is with the monarchs.
Any other question.

Q: .. Is there Indium in the EU as a base plate. .. it was discussed ,, for the Star Formation?
K- We don't have such a thing, I think in the lab.

Q: What would you say to beautiful KS who can't put the 2 proverbial screws together, (2:24). yet want to work for the KF, although they weren't chosen for direct employment.

How would you suggest they best continue their energies to support KF work. Just leave it to the souls to decide? You know the emotion of rejection or feeling bad, not being chosen for these ??, or is it just our own immaturity in understanding the totality. We understand we all serve in different ways and want to help?

K- In a way, I understand Marks position with the factories setup, people like to be there to do things. We all serve in different ways, we all work in different ways, but we all don't need to be in the factory to put things together. .. we brought people to be as part of the structure of KFm, but they don't fit in. They are beautiful KS, but they don't have, what we call, the confidence. They do their best there, but KF, now that it's becoming an international structure, with whatever we do, we have to be the same, otherwise, any ?? in the structure can be against us in the long run, and the long term. We are looking to employ, .. to bring the knowledge out, but we all can serve in different ways, we all don't need to be there to do it. It's not a rejection, it's just like you want to be a ballerina, which you never trained for it, it's impossible. You'll break your leg, very quick. (2:26). We don't see it as rejection, we see it as part of, as being correct in the rest of our application and development. ?? We have 7 billion people, half of them work ?? as KF, only a few thousand jobs. But being a KS doesn't give ?? We did that 3 -4 years ago, we brought KS in, ?? and they just abused KF, on the name of the KS. At one point we had a 300,000 per month wage bill. We found out half of them just appeared the last day of the month to … we have videos of them sitting there, "oh, he just pays us for our holiday, oh, he's stupid." Now we become wise. You have to deliver when you take a job. It doesn't mean you are a bad KS, you just, that you don't have a skill for that job, today. Now we becoming a space manufacturing company, aircraft manufacturing company, we have to abide by rules, regulations, and standards of the aircraft or flight industry. We can't being someone who doesn't know which end of the screw driver to drive in. .. We put inspectors in the factory, and we heard, everything has to be perfect. Every staff member has to know how everything is fitted to each other. It's not making a Pad or Pen anymore. (2:28).
Any other question.

Q: .. How can the KF help people who are suffering from natural disasters like tsunami. Is there any cooperation between KF and any government regarding to this?
K- We are building it up, yes. … and what we see in the coming time when we have the flight units in. We should be able to deliver T on the point of demand. It's not that we deliver the food, and what do you call it, the house, and bricks, but creating an environment of safety with food, is feasible. …

When you talk about tsunami and being able to support to help, yes we should be able to do. … In the process of tsunami for example, we can create conditions, (2:30). with a number of the flight EU, to create the position of a dome, and in this dome … we release fields within the environment, that it becomes food for people, energy transfer. At same time .. create a fields, which becomes pain killer or anti-inflammatory. These are not anymore, might be, these are in the EU. All we do is allow the extension of, yes we can help .. in disasters. We can even help in forest fires, if they are accidental, but not when they are naturally, nature progress every year every ?? We can allow the hurricanes take

shape from the West coast of Africa to East coast of US, but we should be able to have the knowledge, that on approach to say to Florida, we can create such a dome to divert it back into the sea. That we don't see the huge damages, we see nowadays inland. But again, these inland changes (are) needed, that is how this earth does it. (2:32). The same process can be used to create life, or sustain life in the space. We have not even started the process of the space and uses of the knowledge of the U.
Any other question.

R: .. first systems to be used for that kind of thing, but not military ..?
K- We have no more use for military, there is no need for military. This is how we explained. We deliver these T so rapidly, the governments won't even think of military because they all have it.
R: What about other agencies .. Coast Guard for example … checking for drug smugglers would that be an application for this T?
K- Yes, we can do. Actually, in the narcotic side there is a huge development we can apply. You go to realize, I used to work with security service, (2:34). in narcotics for years. I am aware of this menace. We used to see, and scratch our head, in how genius these people become in different ways of trafficking. I used to be part of the .. the end execution part of it, to get rid of the materials for the British government for years. The ingenuity of these people how they come .. it was donuts, have sugar coated .. cocaine coated the donuts. ..

But with this T we can stop the growth at the source. There are ways that we can stop even the plant to grow. You don't even need to go to the process of the harvesting it, processing it, and then pulling it up. It's very easy for elements, which are harmful to man to be stopped at the source. (2:36). If you understand how to use it. Very much like, ?? ?? has been the source of British monarchy income by selling drugs, growing and selling it. Nobody could stop it because it was financed supported by the Queen. What we've seen in the past 20 years, all the problems in Afghanistan is not in ?? because British grows so much, that all incomes is assets of the Queen. Whatever drugs sold in Middle east, finds its percentage in the royal family pockets somewhere. We know this, and it is well recorded. We can stop the growth of these poppies at its source. Then you don't need to. The only poppy that will be damaged, is the pocket of the Queen of England, royal family. There will be no traffickers. There'll be no addicts, because there's no traffickers to deliver. These are all, and it (only) takes a few thousand dollars investment in the new T to do it.
Any other question.

Q: Stephanie, .. (2:38). .. you drew the 4 space craft, it always remind me of .. in Mozhans, that we could do this as well, as us, as 4 people, .. you said that 4 of us could stop a meteorite or something, if we would have gone on the edge of the earth, and make M fields around the earth. Could you go more, deepen that, man can do that, because we are spacecraft too?
K- We are energy sources, but it is how do we tune to each other. It's just like a chorus of 4 people singing. We tune our voice to each other, to be as one, and effective. If we learn to tune the strength of our souls, then we can do the same. It's very easy. Many, many

races in the space, they never have a craft, they create the conditions of the fields, and they travel as families, as a group. There is no limitation, it's just the man doesn't have the knowledge. That's all.
Q: .. you said to us to see if we can meet up in a dream. When you wanted to make us connect maybe. You said, if in the dream I meet the other Mozhan, (2:40). I can recognize the T-shirt, like the color, and they can recognize my one. Then the next day we wake up, and say you had a yellow T-shirt on. And I said, yes, you had the blue shoes. Yes. So that means we met up. So that's something we can practice, all of us. To meet up in the dream, to increase this connection. Which is the way for us to connect between us?

K- Detachment. You are very attached, you want to see the red shoe, but you are not interested to see the STM, who carried the red shoe. So you are still physically attached. And that's the problem, part. This is what will grab man for a long time, to be stuck to this planet. Try to see the color of the STM, and not the color of the shoe of the man, and then you'll understand.
Q: Yes, definitely you are super right about not being able to detach. There is this fear, that definitely, is an issue for me, because lack of trust, fear is lack of trust?
K- It all depends, each one of us has that problem different. This is the problem, which all of us has, but we have to find, we have to see what is our problem. (2:42).

R: .. May we be taught the teaching of the Mozhan?
K- What does that mean?
R: .. are you going to teach another Mozhan class?
K- I don't have the time. That was a special time and place we did we brought. If you look at the Mozhan go back 6 years before. I took 7 students to teach in the Insanno, and I put 2 years of my life to teach them. They could not, some did not understand, and some could not understand, and became murders, and some became associated with murders. The same thing we had with Mozhans. I allocated 12 weeks, and we saw some went, and some stayed. The Mozhan still have another part of the teaching to be completed, but we have to go through this course before they complete that other part. I don't get times like this to do. At the moment the commitment to flight, and especially to take man into space …

All these systems you see have to be synchronized, brought in to used correctly and perfectly with the flight system . (2:44). We can't have a system where we take you 3 days to Mars

Any other question

Q: .. from Macedonia .. in the Bible St. Paul had a dream to go to Macedonia to spread Christianity I would like you to come to Macedonia to spread your teachings .. I believe in your T.
K- … Never had the privilege of being in Macedonia … but on the soul of Macedonia, (2:46). at the border of Bulgaria years ago. Our teaching reaches everyone, it doesn't matter who, where, and how. What we see and how we do things …

how deeply the religion is. As we were cutting the rope for opening of the center .. we had many religious leaders standing there with their special hats and everything., to bless the opening, and I realized how religious the nation is.
Thank you

My connections with the governments goes long before KF. long before even KF was established . I used to do a lot of things like this

(2:48). and know how to work with governments, it's not just a random something.

K- Please keep on teaching unconditionally, and hopefully everything else will do its job

404 KSW Oct 28, 2021

405th Knowledge Seekers Workshop; November 4, 2021

Note: Transcription has not been checked by KF. Please listen to original recording. (Transcription by KF Brazil)

ENGLISH TRANSCRIPTION

(:06). Today's teaching is mainly based on follow-up of the last week, if in part of the teaching we understood, or come to comprehend the process of the creation, process of the changes in the dimension (D) of creation. Our team in Australia have made a small recording .. of the topic we want to carry on with in the teaching of today, a little bit more in depth. Rick could you play the recording, then we'll build on it, go into more detail.

Plays a "A New Tomorrow" .. (:14).

K- From what we heard .. see, many of us up to now in different part of the teachings have been taught, .. informed, have been brought to see gradual process of the change of the humanity. In a hidden way, in the KF teachings, and in a hidden way in introducing the Enhancement Units (EU), we have started this process. We have started the process of transition from the point of living in 1D, as you remember, when we showed the EU, most of the lived in 2D, especially the Body EU. This unit is so fundamental, is so

beautiful, if the humanity understands its power and capability. When you look at the EU what is inside, .. on the walls, is the fields of the matter state of the man, but at the same time feeds back, to the man in the center. Man being the created thing, still becomes the center of creation himself. (:16). Where the field of the plasma (Pl) from the center, fields out, and at the same time, the outside feeds in. In a way, the totality of the shell becomes the creator, the feeder, and then the body.. in the center, as a matter state of physicality, becomes the receiver. That's what we call, the "Adam and Eve," but both live within each other, both allow one to be part of each other, exist. In a way, we have started understanding the 2 dimensions, but now we can explain it in more detail. We can go into the details of understanding how it's come about, what's the process, what's the purpose. When you look at the EU it is so beautiful, if you could realize the beauty of it. You see we have many reactors sitting around and being on it. The reactors would allow the whole system to be the creator, the part of creation. The system becomes, in a way, a new D, a new process. The whole structure changes, as we can see, as we understand. In that process, what we see, is that, you have many reactors sitting around the body. (:18). of the system, as you see, and these, each one gives some of its fields to the body. In so many ways, we have created the "love of Creator," within the structure of physicality of the man.

When you hear in the teachings, that we bring a new D, we, where the position of the galaxies, the position of the body of the man, will change. It's the truth about what is to come. In the D of the creation, we always look at things in a different way, then what we could, and what we should have. When we talk about Mitra, what has happened, why is a new cycle all the races of the Creator across the U, and Unicose, move into the position of not consuming, but connecting. By connection we see what they need.

When the Creator, created Mitra for love of His life, to have a lover, to have a partner, Mitra never took D of physicality. Mitra always stayed in D of fields, energies of the Creator. The same as the Creator. In that process, when it came to understand what we call, the love of the creation. Mitra all the time, has gone through every strength of the fields of the U, (:20). and has taken the best of all, whatever that could be, beauty of the eye, .. soul, beauty of whatever, and in that totality, has brought that position of the creation of Mitra in the D of physicality. So when Mitra appears amongst men in D of physicality, she has the beauty and knowledge of the U within her. Which means, through it, she is connected to the new D, that, she has the power to be both, in the D of the physicality, and the D of the soul of the Creator, as energy.

In a way, when we introduced the Vertical EU a couple of weeks ago, was the beginning of the introduction of this work. To change the man from the energy of the Creator, to the D of transmutation and transportation (T&T), to the physicality of the man in another D. In a way, man now has the knowledge, as Creator has given to him to be, as he said, I made man in the image of Myself, but from now on that image is free, it is, it will be, and shall be, even in the knowledge of the Creator. This is the beauty of, very simplifying the knowledge in the systems, very much simplifying everything, that every man, and every creature in the U can understand.

This is what we said, when you go to space you don't need to know the language, as you are in totality connected to every language of the U, (:22). which the Mitra has brought and has made sure, that any new generation will receive the same. We have brought the knowledge of the U, in very simple systems for man, to frog leap, jump across without going through rigmas, of religions and all sorts, to understand in one go. In a way, mankind now has the knowledge, the same as what the Creator has released across the U. Man does not need to be educated in classrooms, man does not need to be educated with anything else. The Creator is peaceful, so, no being across the U shall every kill. In a way, when you hear in the tape, when we say, that there will be huge changes, even in the position of the stars and galaxies. Then you will understand very clearly why and how. When we change the Soul of the Man (STM), when we elevate the STM to be able to interact with all other fields of the U, would man ever kill again. As he has what he needs, access to the language, access to the knowledge of the U, access to any energy that it guarantees his survival. Then the fundamental changes we discussed before will come into operation. As there is a new D, would the man need a digestive system, would the man need the mouth, .. the eyes to see, .. the breathing system. When he manifests himself in D of physicality. Then as the physicality of the man changes, and all the fields of the U go through the same balance, (:24). would the galaxies, would stay the same position, that allows the creatures in their process of life, consume other things, or destroy other things. So we understand the fundamental change has started.

In a way, what the Creator wanted, that the humanity to become a peaceful man, the humanity has become part of the U Community, and peace has become part of the man. For a very, very long time we tried to change the man, to become part of, to be the essence of the Creator. By sending the Messengers, and by bringing scientists to make the life more comfortable, for him to understand. But man has not understood. So this time around we brought the systems, that the man can see his own eyes. This time we have created the man of physicality, in the D of his own physicality. If you look at the EU, what have we done. You entrapped your soul, with D of your physicality. Now we entrap you with the system, that the D of the STP and STM open up. In a way, we have created a D, which has the both the giving and taking, and we can, in a way, at a point of sending, bring all the energies to center, and at a point of delivery, (:26). to move the energies to outside to become the D of physicality.

The essence of the creation has changed, the essence of being created has changed. And this process has started, by what we call, manifestation and birth of Mitra, the evolution of the man and the U shall start. It's not that it will be on a count of the finger, but in that process, many things over all the fields to balance simultaneously, will create the changes. When the cosmologists look into the sky, and compare the skies from now and a hundred years, they'll see the fundamental change. We have the records of the skies in past hundred years we see things, how they move, and they'll see a new horizon, they'll see a total change, and then in that process, all the creatures of the U, .. will have access to everything. Thy shall not kill, as thy, has been given the sources of the fields, and knowledge of the U, that it only taps into what it needs, at the time of the need, and position of the need.

This is why we start teaching for 5 - 10 minutes times, in teachings, not like before, for hours and hours. But this condensed 5 or 10 minutes is more than ever mankind can ever hope for, to receive the knowledge of the creation and the Creator. The new EU is the beginning of the process, (:28). of introducing the man to both dimensions. To eye of his own physicality. The new EU, especially the VEU, .. Body EU, will bring that change. We go to Mosques, .. Churches, .. Synagogues, to find the elevation of our soul, that by becoming elevated. Now through the same system of the EU the elevation of the soul to the parallel level of the Unicose can be attained. We don't make temples, but we make the position for the man to be. Once you are elevated, there is no need for another. But it has to be understood, that man has to fundamentally, has to change. Man fundamentally has to bring that process, of understanding of working of his own soul, his own D. "I do whatever I like, and then I go into the system and I am clean." No way. Would you like a position on arrival, of having an arm or a leg, half of something, or half of the other thing, arrives without you. As you want to arrive complete, you have to go into the system complete. Not only in the D of physicality, but in the D of soul, in the D of the STP.

Mankind has been taught the knowledge of the creation in past 10 minutes, but mankind needs to understand it. Mankind needs to comprehend, (:30). what these changes mean. I'll have everything, yes, but you'll have the Knowledge of the Creation (KOC), but does not mean you can abuse the knowledge. In so many ways, not only in the process of the teaching of the man in past years, we have taught you step by step. As I said, when I teach the Unicose hears. Many races in different positions have moved to the same level. They are moving, and there are races, which are slightly ahead of this present time, but they will bring you to that point in the coming time.

So what we understand is the soul of the Mitra, when manifested in D of physicality, have the beauty of every single cell, which has ever been created in the Unicose, as she spent her time collecting them. Collecting the best of the essence of theirs, from the center of the soul of each one. Goes back to the writing, that even a stone has a soul, even an atom has a soul. In Mitra in the essence of the fields has gathered from every corner, has made her job to bring the best, to create, when it comes, that all are brought together. The mother of the physical condition in the new D. Where the man, the creatures of the Creator can transmute, between the soul and the physicality, or the Pl of the no D of physicality, to physicality, and any point in the U.

In a way, the new generation, (:32). of the man will not have egg and a sperm, it will be created from the fields of the soul of the mother and the father, from the love of the two. And the interaction of the 2, as the ?? originator of the fields, the child can be born on earth in the shape of the man, can be born in another D, in any shape or form as it guarantees its survival. Now man becomes truly, the man of Unicose. Now we truly become the what we call, the D of the creation. In that process, then you can have the child from the 2 earthly being, and born in another D, and have the shape and the D of the other. But this process allows the two partners to be from different races of the U, for the first time, that by releasing their fields, they can create the new child of the U. Where it will take shape according to the position. As did the child of the man, as will do, the other races of the U, In a way, this was essential to be done, that as we have seen, and man has

been ignorant to it, many races became, not each others enemy, but they did not interact, because their interaction, and being, becoming one, has created a lot of other problems. With this position, with the change totally, like as I said, all these, which even man is not aware of these problems in the U, are resolved in one go.

In a way, we allow the races of the Creator, (:34). to intermingle, we allow the races of the U to understand each other, .. to be equal to communicate with each other, to love each other, and in a way, one of the beauties of the STP of the man, with the love of Mitra, was to understand the essence of the emotion of love. Which does not exist in the U, this is why earth was chosen to be the center of the interaction of the manifestation of the physicality of Mitra. Where man taught Mitra, the essence of fields and energies, what the love is. And she made sure that in that process, when she manifests herself in the D of physicality on this earth, she can feel, .. touch, .. be part of the essence of man's life. This will become one of the biggest gifts mankind has ever given to the Unicose and to the Creator. The essence of loving, .. of giving unconditionally, .. of existing without taking.

In a way, man shall never kill, as he is so busy giving, that he is not concerned in what he receives, it's a condition of the true love, when one falls in love, he doesn't care what is eaten or not, what he is wearing or not, because to be with the lover, is more important than what he carries in the D of physicality. In a way, with today's teaching we bring a meaning to the essence of the work of our systems, to the work of the U, to the creation of the Mitra, and to understanding the love of the Creator. For the first time, (:36). all races of the man, will have the knowledge of the Creator, not in the image and soul, but in knowledge, in what I call, the love, and what he made him, to wait so long for manifestation of Mitra, to show what we call, the apple, the fruit of waiting so long for Mitra, the mother Mitra, to collect everything which was needed. We call it Eve, but Eve took her time, she traveled in every corner, she made connection with every cell of the U, and from the center of the soul of every single one, she took one string, one string of the fields, which was the strongest and the best, that in not only manifested, in the D of the soul of the entity, but carries the essence of the creation of the entity, and collection of all these, the best, has become, to be in the essence of, the seed, the soul, the physicality of Mitra, to be manifested. Mankind will understand in the coming time, how beautiful the whole process of the creation shall be. Where the child from the point of inception, is created out of the soul, and not out of the physicality, which has no need for D of destroying, taking, even taking the womb of the mother from the mother, to survive. Now it works totally different way, the child lives within the womb of the mother, but its soul has been created first, which means it's part of the level of the love of the mother.

In the coming time, I'll go through this in more detail. In the coming time, mankind will see this, (:38). and this is the reason why we brought the EU, for you to physically see the interaction of the 2 souls, the creation of the body of the man. When you look into the EU, when they run, when we create the condition of the, every source is available. and we put the two plasmas of the ?? two lover in the essence of their soul, we shall see creation of soul. Then by changing the fields, we shall see the creation of the physicality of the souls.

The EU are not there just for you to be busy with it, to get rid of cancer, this is the D of the man, to get rid of this, or to have something happen, The essence of the soul of the system is to create a prefect child, is to create the perfect man. Nowadays, you go and get the test-tube babies with your physical sperms and egg, where we create a condition of a perfect life, within the structure, for those souls who cared, to create that, what we call, the next generation. They create the next generation, not for them, to be theirs to hold and to love, and to present the child to the position of the, what we call, " the physical, mental condition of what they want," but we allow the soul to take its own D, and its strength, we allow the condition of the position of the soul, to be decided by the soul itself. And not (be) entrapped within the womb of the mother, that he has to manifest itself in the shape of the man or the other.

In the coming time mankind will be part of it. (:40). Mankind will become the totality of it. Mankind will come to understand how much, to what extent man has a need to change. The new EU are the window to the future of the life of the man. The new EU are the window for the changes of the man, to come. The new … Vision EU, are there to create the condition for man to see the first changes through the D of physicality. Where he will see through the eye of the soul, but not eye of the man. Those of, KS and people who use the new Vision EU, in so many ways, will see the vision of the soul, and where they might receive the repairs of the vision sight of the man. This is what we want, .. planned, what is to come. Gradually creating the condition, that the man slowly come to understand, the time of the change has come. The time of understanding the truth about oneself has come.

The time for man to change has come, to change in to the D of understanding, for man to change in the D of being the true man of the Creator. Which means to be part of the ethos of the life in the U - to do good, to act good, and to think good. When you think good, (:42). you cannot do wrong when you think good. You cannot do anything which could be outside the boundaries of understanding. When you do good, you do nothing to harm the soul. The thinking, the doing, and coming of the living, is part of the process of the creation, and when the all 3 are to perfection you live the life of the Creator. Then you understand what it means "I made man in the image of Myself." I don't do wrong, I don't , I don't think wrong, and I don't talk or do anything else wrong, as I take what I need, at the time of my need.

I have set this in the position of the beginning to the end, even in the setting up of the KF. Those of you who are close inside the KF know. I take what I need, and everything goes in for the others, and what is needed to be taken. This is not just a teaching, it's the way of living. It's the way that I take what it need to live, the process of comfortable life, but all is there for the others to be able to take to do. And when one takes from it, it means the other will suffer with it. When one steals from it, is when the others suffer from it. The KF is set that way, by the principle of the Creator. I was explaining, this to, (:44). people of authorities, a few times in the past years, I closed all my banking system around the world, that no one can tell, "he takes what he needs, hides here, and hides there." Everything goes in the KF, and I take what is needed. Everything the KF makes goes into

it. I don't live a life of poverty just for the others to have. I live a life of good, that I can do good, for the others to do ?? (with). I wonder how many of you could live that life? Unless you live by correct conduct, of the process of the living. This is the way it has to be, and this is the way we live by example. This is the way, through our example through our soul, we teach the man to do the same process. God has no banks, but he banks on his creatures, and what he has created, and the souls which have been from Him, live the same process. You take what you need, and from it, the rest is there, for the rest to take. Then in that process you don't need to do wrong. You don't need to think wrong, you don't need to even talk wrong.

The process of the understanding is simple, if the man understands the process of the Creators work. We do the same thing with the EU. We give as much as the souls can take. Those of you who have used the new EU and the processes of it, the T of it. (:46). are fully aware of it, it comes to the point I cannot take anymore. Why? Why can't you take anymore, because you do not want to face the next step. Where if it is with you, you should fear no change, that you cannot take. But you'll feel there, for you to give. Not to take. Until you don't understand that process, the system doesn't work. It's the knowledge of the U, it's the knowledge of the soul, and you interact with your soul, when your physicality says, I had enough, means I cannot accept the change. I cannot be part of it. Because this way, I can confirm my existence, that I suffered, that I lived. The process of the creation from now on becomes simple, where you start life in the D of the soul, so we do not steal from the physicality in the womb of the mother, from the mother. We don't become a sucker, we don't become somebody to be dependent on. When you are a soul in the D of life, you take from the field of the U.

I tried to bring this knowledge to you, even in a simple position of the creation of the MaGrav system. When you use a MaGrav system you don't create energy, you take energy from the U. When you plug it into the wall, you Nano coat the wires, you take from the environment what you need. When there is no consumption, the wires don't need to produce. You take what you need, The first principle of the creation for man to understand is introduced with MaGrav to you. (:48). But you only got a stuck, with the physical D of, "how much more I can pay less, to be able to do other things." The whole process of MaGrav system is to create energy, and at the same time, as you connect it to your house, you take what you need from your own essence, even your own soul walking into the house, that it gives to the cooker, and the heater and the light. But man never understood, never wanted to understand, because then, there was something wrong.

If you look at every product KF has put out over years, has a connection with the working of the balance of the environment and the soul. The only thing anybody has been interested in, is, "would it take my pain, would it give me cheaper electricity, would it do this, will it do that." You haven't asked yourself one question, "would it make me a better man, to give, to find balance?"

Even when you have a headache you have an energy which you don't need, you use the system just to transfer it through to the patch, or pen or whatever else. But you don't look at it the other way. Did I need to have a headache? Did I, what's the cause of, why do I

live in the D of physicality, be able to suffer in the physical D. Why can't I raise the level of my soul, that in that position, will sort out the headache, which I have created myself from the energies, which will take from. (:50). You take energy from the food, you give your energy to the Pen, why can't you give that energy to your stomach as a food, and get rid your pain and the headache. The headache of the man in truth, is his own lack of understanding about the creation, and the purpose of his creation.

Maybe today's teaching opened your eyes into a new D. And then the beginning of another cycle. Think how you can create children of the man, in the D of the soul first, and then see how you can allow it to grow to a physical D in the womb of the mother, or outside. The knowledge is in the hand of the man, the totality of the cycle of creation is within the man. Then you'll understand, the true "virgin birth" through interaction of the souls, and not in the D of physicality.

I'll leave this teaching for you to contemplate, try to understand it, and then add it to the other teachings in past few weeks, and try to see if you have matured, if you have matured to see the truth, and to understand it, and come to the point, that you do not leave in the D of physicality, but you leave this planet in the D of the soul. Maybe then you understand, (:52). if the soul of the moon accepts you, you shall be there in no time. No need for flying systems, and no need for anything else, but till than, we'll give you a helping hand, till you learn to walk through the D of the soul, we'll give you that hand out to carry you like a father does, to his toddler as he starts walking.
Rick if you can show video once more. then go to commercial break. The whole process of the teaching of today, is for mankind to understand, how kind the Creator has been to him, and he has denied His kindness. He has denied the love of the Creator …

R:
K- Can I ask KS, you listened to this at the beginning, you had a teaching, and listen to it again now. (:54). and see if it has the same meaning as at the beginning, now that you have the knowledge what it means, what is there to deliver. Thank you Rick ..

>> **PROOFED** to here >>

>>> BREAK >> 405 KSW Nov 4 2021

Plays video again " A new Tomorrow " (1:01).

(1:02).
R; Are you ready to start the workshop…
K- Yes ready and willing to share knowledge and the love of the Creator.

Questions

Q: We love you Mr. Keshe, thanks for all the love you give unconditionally.

Q: Ed .. (1:04). .. What I have been wondering over the last couple of teachings, is our inability to use our soul to fulfill our physicality needs. Is it basically an emotional impatience, where we are not willing to wait for our soul energies to create the proper fulfillment of our needs, that we want to short cut it, we are not willing accept the process, we want to hurry it up, our emotional impatience so to speak. Or the fear, we don't think it's going to happen, or what?
K- It's a combination of the two. We are impatient to find a way to get rid of the hunger, so we go and kill to get it. We are impatient to receive the energies of the U for our structure to work, within the fields of the M field of the containment. We breath. If mankind realizes, that in the essence of the creation, the D of the emotion of the fields on this planet, which create the amino acid (AA), are sufficient enough to be adjusted to meet every need of the man, then man will not kill. (1:06).

One of the best examples of this absorption of the energy, is what we call, now, the viruses. We get them to us, we attach them to us, and then we let them loose. Why don't we learn how to absorb these energies, without them becoming viruses. Why don't we learn the way to absorb these energies, that they become the fields for the lunch, or the dinner. We don't take any water to space, .. food .., we don't take any donuts with us into space. How come we are setting it up, in a few months time to be done, and you are happy to be there, but you don't want to do it yourself.

In a way, you are using the transportation EU, as a way for man to start learning, how to tap into. Your 5 to 10 minutes onboard on, from one city to another, will not teach you, but will set the process to. The more people we can get into these systems, the more frequent, the more the body starts doing it. While you are onboard in the 5 or 10 minutes your body takes all the energies which it needs, you get all the energies. You go home, the wife says, "I cooked you the most delicious food your favorite." You say, "I am not hungry." Then what does she think, oh. And you do this, you frequent travel every morning between New York and Beijing, (1:08). and then you go back home to NY in the evening, and every night you are not hungry. I think you're divorce papers, to today's understanding will be on the table. Who is the mistress, who is feeding you? Then the wife gets to you. You say, you know something, come with me, I go to Beijing tomorrow you come with me. When you come back in the afternoon, she doesn't feel hungry, you tell here, "who is your mistress." Your soul. Now he feeds you.

The purpose of the transportation EU is not for you to get somewhere. It's you train you slowly, to become the man of U. Man wanted the tools, .. toys, wanted the gimmick, we have given it to you. It's right in the center, right on the screen. You are a tramp, you have no food to eat, you manage to get on one, or go into the EU, you are given everything, you are not a tramp anymore. You don't need to look into the bins, if there are any scrap chicken, as you already been fed. You find your dignity, you find the D of new thinking.

You receive, in the process, not only the emotion of physicality, but you receive elevation of the soul.

This is what the whole T is about. Nowadays if you have tested it. If you put Gans water in the pot, you will see, put another water in another pot. The birds all love to, they come to where, (1:10). the Gans's are, because they get the energy, what they were looking for. Would they go and kill another? No, because they are fulfilled. This is what, this is about. We cannot get man to change, we change the man the way he wants to, with toys and gimmicks and other things.

As I said before, once you go into the systems, and gradually are a frequent use of it, your body, your structure learns to take energy from the environment. Would you ever go back to eating, because eating, you want a burger, you get all the feelings and emotions of it, without actually killing an animal, destroying another life in the shape of the bread or the lettuce, whatever. You just look at the burger, as it is the meat inside it, but the rest of it is alive too, the sauce, the bread, everything has life. We have destroyed them, only destroyed them for us to have the pleasure of their energies, now it goes back to the same thing, you feel it, taste it, it's not that, like the little girl said, "can I lick you, do you taste like chocolate?" This is the problem with our future, that many of us will gradually change.

What happens when you are a frequent traveler in these systems, you pay a visit regularly to the EU, when you decide to travel through the soul, instead of getting in the machine, in the VEU, everything you needed is there, and now lasts longer and longer, and the body does. What is your body going to do? Which organs are going to change? (1:12). I don't receive anything as a waste, .. water. Do I need the kidney's? Every energy I need, exists within the D. Do I need a storage capacity and a liver? I see the beauty of the people, with their souls, with their actions, with the emotion of their thoughts, do I need an eye? Because don't forget you can bump into the wall, but you forgot to remember, that even the bricks of the wall, and every dust in them has a soul - "don't come to us, you'll hurt yourself."

Mankind will come to be changed. You are not aware of what we are about to do. But in a way, we are aware what is about to happen. But in all these processes it needs you to want to have that change, .. to allow the change to come through. Thy shall not steal. Not even from the soul. You take from it, as you allow it, to be taken from. You can destroy all your cancers within seconds, but you need to have it, because that gives you a confirmation of my suffering. But do you need to have it, or by the elevation of the soul we create a new condition of life. Would mankind become kind to himself, and no one else, and that's where you'll find peace.

I explained this very recently, .. (1:14). many of you who start using the EU in any shape or form. When you use travel EU, inform your soul of what you want to be, not lie to yourself, and the soul knows you don't want to be, what you say you want to be. Thy shall not lie, not even to himself. In understanding this, is important for you as KS to take that next step. You can build all the universities to teach you everything, when you don't

allow your soul to be elevated, because you live in the D of physicality, what is the use. We teach you everything from the D of every knowledge to get, to position of releasing and elevating the soul, but are you ready to let it go, to elevate yourself. No, because as a prison masters you have learned to find an excuse to stop the elevation of the soul, because then it shows, it's you who has been the guilty party in D of physicality. Now you decide which one. Now this speaks different word, than the action, and the action says, totally different thing, than what the soul says.
Any other question.

Q: Was there every a time, (1:16). in humanities existence, where we did allow our soul to feed us, or was there something wrong from the get go, or have we just adopted and made habit of relying on the physicality?
K- From the beginning man could live, man as a man, as an energy source, could live without, by taking energy from the environment. We made it a habit when the soul was created, and the D of the STM, the STP created that emotion, if you could link the 2 souls without time and space gap, in a way of D of the Pl, that you cut out the emotion, the U would be a perfect, perfect picture. But the loss of the fields in the transition, creates that imbalance, creates that emotion, creates that fields, that we call emotions, which man needs to keep it under control, man needs to keep it in a distance. If you find in the structure of the man, a position, in the position and D of the soul, where you can constantly keep a strength field distance gap between the STM and STP, in a way, that it would not need anything for its survival, then you have achieved the ultimate goal. If you learn how to reduce the field strength of one, for the other one, when it gets closer, that gap, that square box, still exists, we can live in that D, (1;18). with the same emotion.

This is the secret of the creation, be aware of two, and this is where the time has come, where the creation of Mitra, we always keep this (the gap between) it doesn't matter what strength, when you are born. The space gap of the connection with the strength field in the box, as you call it, will be the same for all created things among the U. Which means all shall become one. We are not looking all, to look like man, but we look like the man, the being, the creature enjoys the position and D, does not matter how it's created, and finds balance between the two.

You cannot have an atom if you don't have an electron. You cannot have an atom if you don't have the proton. And then, you cannot have the true atom if you don't have what we call, the neutron in the structure, that it feeds both in the D of absorbing from its environment. That D is a still blind to the man. Up to now we speak about the STP and the STM. The Hydrogen is incomplete, totally incomplete, because at the end has to find energies from somewhere to keep this. The third D is ?? ?? of essence of knowledge that man will come to understand, and in the future we'll explain, creates a perfect world we call, atom. But there is always a source energy for both to tap into, (1:20). and keep this distance, the creation of the neutron in the structure of the atom. But this knowledge is beyond understanding of the man at this moment in time. You got understand, .. realize that in the process of creation, how things will turn up to be, how everything shall be, how we tend to change things the way we want . How things will turn to exist in that D.

Why perfection comes out of the addition of the third party. But that's another mystery for the man, which we will discuss in the future.
Any other question.

Q: .. I was tricked by the German Intelligence agency, they gave me a liquid and recorded my brain 24/7, is there ea way to change the frequency, so that I get my own thinking, privately back again?
K- I don't know what you are talking about?
Q: They tricked me with a liquid, and they recorded my thoughts … (1:22).
K- Who are you, who are you that they tricked you into it.
Q: Well they thought I was so important for them to get out of my brain, by I hadn't at that time, so they gave me that liquid . ..

So that they cannot record my thoughts any longer.
K- I am not aware of such a thing, and I cannot comment.
Q: So they can record the thoughts as long as they want to, as they got near to my brain. About 50 meters is the range. I'll have to get used to ..
K- I presume if that is the way, (1:24) of your thinking.

Q: .. Again I have an idea for the beam formation in combination to the Star Formation.
K- What formation? …
Q: To beam the UFO .. the flight formation..
K- yes,
Q: To another planet ..
K- Yes. I don't understand.
Q: The flight formation makes 20 times the flight speed. That is correct I guess. ..
K- I don't understand what you are trying to raise.
Q
K- It doesn't matter, it can go at any speed. There is no limitation .. in the speed of travel. If you can go deeper with a stronger field. This is the beauty of the T, you decide on the span of the, depth of the Pl, where to tap in. That gives you, this is the essence of the flight system, create of G and M fields.
Q: saw a video of UFO in Paris, 2008 there was a SF, there was a white screen, and they were beamed to another planet.
K- The white screen, if you see a flash of light, and then movement, (1:26). These majority of it, is what we call, space flight. I explained that in detail in the "flight over Jerusalem". But you do not beam the speed of light, the creation of the light around the system is due to the rapid expansion of the field, in a strength to build up. and as a dynamic system, as the systems are dynamic M field, their interaction with the atmospheric condition of the earth, creates that flash of light. You see a flash of light, and then what we call emotion , this is how you do. This is very normal in atmospheric condition. Most of the flight system you see in space travels as a rapid light, these in changes of the pulse is, very clear, I have seen it twice on the tests, 3 times, in the tests in China. Where we run the tests. Because I was looking for it, you see it within the structure, where we could create plasmas within the ball, and creation of the Pl within

that ball creates a massive interaction of the fields fo the environment and the Gans's. It's a normal effect.
Any other question.

(1:28). … (mistake Azar)
Q: Salomeaa, We are all interconnected, but the science wants to prove this or not. This is the problem. Our ancestors just believed in our inseparability at energetic level and they helped each other from a distance. .. how can we learn all of humanity of this truth, .. Mitra could activate this information, emotion in the soul of man, our common consciousness, is this.?
K- I don't understand what she is trying to tell us in the first two lines
R: repeats .. (1:30). … She's saying, is this transfer of energy form one person or being to another, is that the solution and can all of humanity learn this truth. (I think that's what she is saying)

K- In a way, it always has been. .. mankind has .. In a way, we always have had connection, as we come from and we go back to. We have connections with our parents, with our ancestors, and even the D where our soul is ahead of us. We decided, to be blind to it, and never to allow it to grow. When we are younger we have more of it. because we are not aware of our physicality, we become knowledgeable in existence, and we use it in a different way. But as we grow older this changes. We move more in the D of physicality, we allow, more than the other side, to the point, that we don't accept anything. And today's scientific, those are the people who want to use the science as a way to control, they say, "show me, then I believe it." Then what I say, I say, "then go and do it, then you'll believe. I don't need to show to you nothing." (1:32).

In many of our conversations with many people, I always tell them, very simple, the question of show me to believe it, is on your shoulders, not on mine. When they send you to an organization to decide. I say, how can they decide when they have no knowledge. I am prepared to sit in front of a bunch of donkeys, and professors, which are the same as the donkeys, because they don't have the knowledge. Their knowledge about, what we told them, the same as donkeys. They hear the voices, and they just sit there, and they kick. Because they have been the fools, which believe in their own lies. This is the process of the creation. We have become more and more reliable on our physical D, and those who understand, is the way to interact, and to control you, or dismiss you, they say, "show me". It's not my term to show. It's for you to understand, show to yourself.

We have connections with all our ancestors, .. to the, if .. you understood the teaching of today, we can even find a line of connection to the Creator, but we decide, we ignore it. Does not need our ancestors to. Because when you put a magnet on the table, it does not matter how many magnets are on the table, big or small, they all react. (1:34). So you have a connection to the small one and the big one, at the same time. It's you who has been put in the middle, you are created, so you have to find what is, and where is the connection to the big one on the table. Then, if you going to have his energy, you connect to him and the others, be provided to reach there. This is what mankind has not

understood fully. Understanding the ease and accessibility to the Creator, is easier than drinking a cup of water. But man chooses to ignore it and he goes for the cup.

When you put, Rick has a beautiful presentation, done it for years, all these magnets on the table, you choose different sizes and shapes of the magnets, when you introduce a new magnet on the board, everybody moves to find a new position. So when you create a new soul, you already have made connection to every single atom on this planet.

I was explaining .. the problem with most of you, is you have not accepted that, you stand vertical, why? In the world of physics, you should be on the floor. What holds you up? (1:36). Except MG positioning between every cell. And knowing their position, you will not be able take a foot off the ground to do the running or jumping if the whole mechanism of the STP has not adjusted itself to magnetically move the body, even you call it, it's a mechanical work. You try to get the mechanical work to do ?? that, which is no matter state, but is a bunch of energies on top of each other. Once you understand this, then ?? part of things, even absorption of the energy and fields, feeding yourself all changes.
Any other question.

Q: Mehranez, .. first is the story of the Popol Vuh, (Mayan legend) the legend about tribes in South America, (1:38). some time in the history they had a catastrophe, so they go under the earth through the graves ??? ?? they come up, and maybe pray on top of the hill, all of a sudden they could not talk to each other, even though they were sisters and brothers. How do you explain this?
K- I don't know legends can be anything man makes it to be. I have no idea
Q: You always say you should not kill, and we are trying to learn it. How do you feel with women who do abortion, without knowing it's a child, an early, early child, before 2 months. How can, by their actions of abortion, towards the soul which they have medically exterminated. How could they do to.. ?
K- It comes by the position of responsibility and being able to carry. It comes with the capability of understanding, I can bring to develop, to full maturity, without harming myself or the child. We see abortion nowadays as tools of just pleasure, which goes to the next step. But in essence the soul live in the new D. (1:40). But it's not allowing it, it's understanding the process, that what it means. Which life will be in danger, the mother or the child? On the other hand using abortion for the birth control is not acceptable. But when it come to the point you see the mother in real danger, if the cycle goes through, has to take priority, the life of the mother, it's a mature soul. That's the, we call it the postnatal depressions. We see many mothers kill their children, or themselves. When you see that point, that's the time when you are in an accident, when the life of the child can endanger, or the mother. Then that is a different position. But abortion the way the man does, as part of the pleasure, is not acceptable. It's a priority of soul, priority of life. It is, this is the only purpose, the only reason, we see many mothers. We just seen very recently, when the mother calls that, take the child out of the window, or I jump. Because we see this, change in the structure, or status of mind, or hormones create that condition. That is the only condition, which you can, nothing else. If it is a birth control, they have to sort that out between the souls. (1:42).

Q: Stephanie, … from Carlos .. (1:44).
?? the Virgin Mary give birth to this new soul. (1:46).
As a symbol has the anti-matter …
K- When it's a symbol you can make it anything. This is the totality.
Q:

You see .. I said, it depends on .. The whole understanding of Virgin Birth is not a physical condition, not the way the man thinks. It comes by the word of purity, means detached from, clear of everything. What you call a pure soul. … (1:48). I said the VB is not in the physical D, as the man thinks, virgin is purity, detached from everything. Being what we call, a true .. condition, that physicality doesn't come into it.

You got to go back to the history of VB, VB doesn't come from Christ. VB is, comes from Mitra, born from a virgin mother. How could they say, Mitra is created from the Soul of the Creator, from the D of the Creator. So they put virginity in it, and then when the Catholicism was made by the Romans, and the Christianity started, and they put the whole thing around it, they brought that VB. How could they explain to man, that the .. you are not talking about Mary to be virgin, you are talking about the son of God, you are talking about creation of the Creator. It's pure because it comes from the source, so it's virgin, it's pure, it's in a way untainted. Especially, in Christianity they have brought it to a woman, and then in that woman, become the process of the birth, and then there was a woman , gave birth there. Whatever, and the rest has to be built, to make it reality. (1:50). VB is when the Creator created the soul of Mitra. We say, now he took a rib of him. He took a strength, which was closest to him, and allow it to become separated, to become what we call, Mitra. That, to make it stick, has been changed, and turned to everything else, because Christianity of the, what you have, as a VB comes from Zoroaster, comes from birth of Mitra, and we don't have the physical D, of physicality, of purity of Mitra being born from a virgin mother, which even in that mysticism, could not be said, that it's from the soul of the Creator, from the inner sanctum of the existence of the Creator.

In the past we have explained, that even the Creator has a soul, let alone the others, This is why every creature has a soul, I made man in the image of Myself. How can the man have a soul, when the Creator doesn't have a soul? The center, the collection of the fields of it, the interaction of all the fields of the Unicose creates the D and strength of the Soul of the Creator. So when you hear this rigma, with VB, go back, it's a Chinese whisper, but with its own twist. The Christianity has come from the Chinese Whisper of the Mitra, added to the virginity and the rest of it. Because it suited the Romans, (1:52). and it suited the Christians, half of them were Zoroastrians, or Mithraism, and half of them were Christians, but those who had more power, because they were the seat of the power, they could kill, they put their powers as a Mitra into the writing. It's not questioning the physical virginity of Mary. It's questioning the reality of the facts of the, what we call, Chinese Whisper, if we make it this way, then it gives it a mysticism. It went in the background of the work of Mithraism. In Mithraism, no one has ever explained that virgin birth comes from the purity of the Soul of the Creator. Virgin in the essence of pure, not a physical, no interaction. Because the Soul of the Creator works with the soul

of Mitra, not in the D of physicality ?? So then, you have to answer how all this has been written and they have come, to made us to believe in certain ways, and put words to it.

If as KS, you could understand what I have given you as a gift from Creator, in this machine in front of you on the screen, you would have all give your life up.
Any other question. (1:54).

Q: It is wonderful to know how all things are created in the essence of the Creator. However, before materialization, there is the design of form and function. Where in space is the design center?
K- We don't design, we accept what manifests out of the interaction. Sorry, the only thing, God forgot to open a design center in the process of His creation. When we have an address we'll send it to you.
R: Could you say that in a different way, where does everything come from?
K- Nothing …
R: For example, where did this design we are looking at, this beautiful (EU), when was it first conceived. Or did it appear from as you say, the interaction of the forces at that time.
K- The design of this unit, goes back over 40 - 50 years ago. The design of this unit if you look at it, is .. in the 1970s .. when the MRI came out, we saw partial interaction, but then you had x-rays and gamma rays. The condition and the way, (1:56). this system is made, was designed, is accumulation of years of work. There was no system to build this, there was not enough knowledge to build such a thing. It doesn't matter what you built, system with interaction in this way, was not available, till a few years ago, when we start seeing it in China coming up in different .. applications in health, and the banking and all sorts. This allows this expression to come out. The future version of this system, will be amazing. I already know how it is going to shape. That will bring a new D with the capability to carry hundreds, millions of people. This is a taste. We have 2 choices we give the knowledge to common man, that everybody can have it, and then build on it, or build such a system that we get entangled for years with the governments ?? ?? we wanted humanity to have this shape, manageable, position-able and everything else.

This system can take you into the depth of the U and come back. If you know how to use the system, you can cross universes. It's not the physical feature of it, it's the fields, which we have created, within this structure, to bring the balance. (1:58). If you look at it. You look at the body, we look at the fields. How these fields will create a balanced position, that you'll have a new position. We have deliberately suppressed the fields, to maintain the flat position. We have deliberately positioned reactors to create the curvature. We used the curvature to put it in , but once the system become .. in flight mode, this physicality is irrelevant. It's not the physicality, which transports you, it's the fields, which keep the shape, because of their positioning. It's very much like the life of man. We create the physical man, and then we give you the fields of the soul. We've done the same thing. We created a body, which always stays the same. You always have a Chinese man wherever you go, and then we change the soul to get a different Chinese man.

We can create a very much … we sit on a platform like this, in the future we change the platform like this (vertical). Where this ?? means, that we can expand the base. Again we

use that expansion with the units. Where we tested these units, fields, when we didn't have the physicality of this sphere. We put the reactors in the lab on the floor in different positions, we created the fields. (2:00). We didn't, if we would have strengthened our fields, we would have never need the physicality. We can change the position as long as we keep the balance of the fields, in the D of the what we call, application … We can change the shape of this space to this, increase the numbers, but then we have to change the D and strength of the reactors. If you look at this, and turn it 90 degrees up, you have .. the vertical system. Here the man is in the center, and here the man is in the center. Any other question.

Q: Kay, .. (2:02). .. The past 2 teachings you have stated we could go into the Transportation unit … and probably we never leave .. when you open it up you'll see us standing there. You mentioned our soul may not allow us, may not be ready to take that shift…
K- Are you afraid of it that it might do that to you?
Q: Perhaps. .. I would love to travel .. What is the difference between a goat, or a vegetation like a watermelon or something, or even a rock? What they turncoat as well, or would there soul they are not ready. Because at the end of the day, the vegetation, and particular the animals, grazing or carnivore animals, they do what humans do, for sustenance they devour and kill, what about them, would they transport, what about them?
K- It's the same with it. You are looking at the man, (2:04). we are looking at the soul of the being. If you bring another creature from the U, and he does wrong on this planet, yes? Then can he leave without the souls, are balanced? You understand? It goes back to the same thing again, the beauty of the creation. The understanding of the creation, .. the totality of the creation. It's not exclusivity of man. That's all it is, it's not exclusive to man. As long as man has that habit … the king of the animals, you always have that thinking the ?? of soul.

If you have a key in your pocket when you go in the machine, when you land on the planet Zeus, you still have the soul of that key. You say, what have I brought with me here. If you have no memory of being on earth, the way you become ?? then you loose it, you find something in your pocket. Will it be the shape of the key. Just because here it was in the state of the matter state, doesn't mean there it's the same. Maybe it appears as a mouse in your pocket, or the shape of a moving thing that you consider to be a mouse. This is how mankind has to move on, has to add to his knowledge. (2:06). Has to become part of that structure of understanding.
Q: I wish we could get there as soon as possible. ..

You mentioned .. how humans have not managed ?? the Creators power and we are not connected with it, and carry on behaving the way we do, too much involved into realm of physicality. .. humans have no choice … emotion we have no control over, nobody told us how to control it, has blocked us in order to do the right things, to stand by the ethos of the Creator. Why do we have shortcomings as humans, and why are we being the culprit. If we didn't know to begin with. I understand we shouldn't kill, lie and steal, so that is being the pure human. (2:08). If your morality is in tact, you do those things anyhow.

But in terms of not eating and having access to the universal knowledge, or knowledge of the Creator. Our own soul has created us. We have, thanks to you, you have introduced it to us, we are aware and trying to get to that level. Why are humans being held responsible for not having that knowledge, because it was taken from us, or blocked by our emotion. Why did ?? why being held responsible for not being like the rest of the U Community. … I wanted to know how deep human is responsible for their actions, without knowing such a thing exists?
K- Now your second question goes too far. Let's go one by one and see what we say.
Q: I stretched it a little
K- Yeah, but you broke the string, start again.
Q: Why humans are being held as culprits, if we did not have access to our knowledge, in the first place?
K- We always had access to all the knowledge. We never been denied it. It's the way our ancestors choose to go. The knowledge of the flight, (2:10). .. of the enhancement unit, .. movement without physicality, .. of absorbing energy from the environment, without killing, all, we had it from time one, we decided, no, we don't want to use it. And some of you, or some of us do, when we need, and become magician. What is the reality? We had this guru visit us years ago, when I opened his hand, how he feeds himself. We can teach all of you, every single one of you can become that guru, for months and months, you don't need the water. You are the water. I have said this many times, and somehow we can't get through with this, to many KS, to most of the KS. You produce field replication units. And then we had the taste of the orange or whatever in it. What is in here? Just a saltwater. You ?? have a man and his physicality. What is the constituents of a man? Just saltwater. With system which can take energy from it. If all we do is we put enough of these field replications around him, and we go in it. Then what happens? (2:12). You become. You taste orange. But we have to have an essence of, "I like the taste of orange in order to receive it. What happens if I put a sheep next to the replication unit? The orange doesn't speak, but the sheep goes, bah. Would you do the same, ?? bah and ?? Because you take all the emotion, and would you feel you had a nice kebab when the sheep stands there, without eating the sheep? You need 1 single orange for all of us on this planet to have the taste of. Or 1 sheep that we all have the taste fo kebab or whatever we like ?? from. But would this be able to connect to the universal energy, that you can feed from it and produce continuously the fields that we need to create that taste and emotion. This is what we chose. Now we are bringing the option back on the table. But showing the advantage of it, or the benefit of it, or what we call, (2:14). "the side kicks of it." Humanity needs to move on very rapidly, .. be on it .. , if you are there to catch up.

Q: … our ancestors have put us to where we are, with no choice of our own. They knew the knowledge and they took it away from us, they didn't ever allow us to have a choice. Because obviously I never knew anything about it, and billions like me never knew anything about it. .. that we could have access to our soul. .. and the universal knowledge. Our ancestors or forefathers knew about it, and as time went by, bit by bit they just ditched it, or totally forgotten it. It goes back again we, the present generation … we don't understand .. there is such a thing as a soul there, is our creator, and has got the essence of totality, has got universal knowledge. You can do everything one could ever imagine. But at the end of the day, we in present time, we never knew, we were shrunk of

such knowledge, such power. and such a power of creation. So we are being held culprit, … for what our forefathers have done in the past, in a way we are being punished. (2:16). I go into the transportation system and I just stay there, because I didn't have any access to such a knowledge because my forefathers decided to stop it.

R: Could I say something. In my opinion this knowledge has been there, always available at the point of need, but most of humanity doesn't need it because they are so busy in their lives. But I ran into this knowledge 40 years ago. I know it's been around 40 times 40 years before that. So where were you during that 40 years? Where was your attention? What have you done, why didn't you run into that knowledge? Why hasn't humanity run into that knowledge. Because most of us are too busy in our lives to pay attention to it. But now some of us have been forced into it. .. Maybe it's time for Mitra to be present on this plane. That resonates in the soul of every single human being. Besides on other places in the U. ...
(2:18). and the message is getting out to the masses instead of small group, that usually the case, small groups here and there might have retained the knowledge, and it may be fragmented as well because it's not always interpreted and presented clearly. .. What do you say , Mr. Keshe?

K- It's not been there 40 times 40, it's been there since the time of the Creator. It's just we chose, which part fits us. Depends what part of the information … depends on how we decide to accept the facts of .. the reality. How we push with the limitations in D going deeper to understand. How we can live within the fields, but we don't need collection of fields. (2:20). The knowledge has been accessible from the time of Moses, Jesus and the rest, and sometimes they showed part of it, and they became, and mankind treated them like magicians. In the very near future, much, much nearer than any of you can imagine, mankind will bring bodies to this system to see if they revive their souls, that through it they can revive their physicality. They will attempt it. But then it depends if the physicality has already taken shape to go. To us it is the parameters of holding to the soul. The way we see now, they air ambulance from one country to the another, they will air ambulance people to the nearest machine, that they can put in there, to see if they can get the brain, which was in an accident, or whatever, the bullet which has caused the D to kill, they keep the machines going, mechanically with a heart operation of the machine, of the body, and then put them into these machines, trying to revive them, back in D of life. Don't be fooled with the simplicity of this, man will make a "magic machine" out of these machines in the coming time. But the soul has to be there to accept it, (2:22). to accept the change. Maybe once they go to new D, they don't want to come back in D, doesn't matter what you put them in the machine for.

Death by accident will become a very rare thing, because they will have solutions for everything, even accidents, if you can get to the machine to do, you do it. Christ didn't have an EU on the floor. He gave from the soul. The STM raises the STP, and the STP raises the body of man. And I said this many times, haven't we done this in the case of Naomi. Haven't we done this in the case of, other cases of the KF. Because now we have the knowledge. But the man should want to receive it, anyway. I gave you the example of the blind girl, took a few seconds, she said, I can see, but I don't want the sight.

Q: Thank you … one more last question. When physicality of the man dies, .. the STM , the creator, (2:24). will take all the energy back it has accumulated from the physicality, and goes to another D. .. what happens to the STP, what happens to that soul?
K- STP in a way, transfers its energy to the STM. It's like it goes. Now the STM becomes the physical D, and the STP sits inside it. It's the reverse of before. It's the physicality, in the D of strength of the position of the M field of the earth, which stays behind. But the STP, which made the body of the man, to hold on, to be in touch, and in interaction with the STM, comes collectively, to become now, within the structure.

Let me explain this to you, because I know this has been a lot of questions for many KS. If you have the body of the man , and then you have the physicality of the man. Every cell has a soul, and then you have the STM. Every single soul is in touch, and position wise, with the STM. What is leftover, above that, is what we see as the Gans of the physicality, which makes the sum body of the man. (2:26). At the point of death, those, all these fragments will become in a way, up to now the body had the position, now the game reverses, these become within the STM. And what is left in the matter state field, with the interaction of the earth's GM matter state, stays behind as a physical body of the man. In a way, up to now, physicality of the man encapsulated the soul. In the position of the death, the STM encapsulates to protect the soul of every cell of the man. In a way, it becomes a solar system, where all the souls are like earth and other planets, finding position in it. In time and position, those which have the strength, the collective ?? strength, become part of the soul itself. In position and D of the new position man arrives to, the soul will still, can stay as a soul of the D of physicality within it. Then it depends what it needs to manifest itself in the shape of in the new position. There is still the soul of the point in the kidney of the man, which knew how to dispose of energies not needed, in the shape and form, that knowledge still sits, between the soul, and that soul. (2:28).

What we leave behind is what is in interaction of the fields, with interaction of the fields of the earth, and the matter state becomes leftover. That is why if the body burns in the fire, we don't get, because the physicality has taken different shape, in the strength, but the soul is still there. If you understand this, in the long term, you should be able to give an answer, why when you have an amputation, what happens to the soul of the part, which has left it. Has all of it, still sitting there, but, and that's why the body tries to feed it, through the soul connection, and through the neural system, to feel it, and it's not there, and you get phantom pains. Our neural and blood system is not the only connection to the soul, every soul. Our soul has direct line to the soul too, doesn't matter what ?? feeds it. Any other question. (2:30).

Q: Ed .. … at death the souls of the cells transfer their souls energy back into the soul existence. They carry what they have done with them. What is the case when they have done incorrectly .. wrong .. they have collected and incorrectness, because of their action, That energy what happens to it, does it just get dissipated, or re-figured or used somehow.?
K- What do you mean?

Q: I know we carry our experiences and our learning with us … all that we leave behind is the physical interaction with the environment, but the learning the wisdom knowledge, we carry with us, … but what about the case when we have done wrong?
K- It's still part of the knowledge. It's the part of knowledge, which is open to you. You know. There are very, different ways of looking at it, and that is, sometimes we do something without knowing it was wrong, which our soul is not aware of it. Sometimes we deliberately go out and do wrong with the full knowledge, or we do something, which turns out wrong, and we know about it, we don't do anything to put it right. This is what, what is important is how to correct what is wrong, this why I always say, always ask, because what is done by the others, when asked, that decision is made by them, and you have received their answer, you make a decision on those basis. What goes, starts from that point, what is wrong, is for them, not for you. This is part of understanding this process, .. this change. I have gone through this quite a few times in the past. You make your mistake, you are not aware of it, when you go in the system, (2:34). does it effect you, no. If you made a mistake, and you know you are aware of it, and you don't put it right, then is it your position to go in, and will it be done, or have you put it right? Or you do wrong and you think you can get on.

That's why I said, none of the world leaders will ever be able to. You want to travel from A to Z, get onboard after somebody who has been in the position of power for over 2 years. You fly at your own risk. If you heard me before, I said, being a world leader, be a very lonely job. Anyway, we'll see how mankind will do, and what mankind will learn from this process.
Thank you

It is for us to decide the future of us, not others, what they have done. We will go through a process of understanding for ourselves, we'll go through a process of understanding for the others. But in overall, we have to be able to understand our own position. (2:36). When you ask, and you are given, you've done no wrong. When you take and you don't ask, then you have to stand for it. Maybe what you've taken, without knowing, without asking, has brought a position of relief for someone, then that stands on its own.
Any other question.

Q: Ghana .. how to receive and give enough fields to get in the center of our being, and stay in the state of non-tangible equality with soul?
K- Very easy, understand your to own strength and your weaknesses and understand which one you need to move, to reach to that point. It's one of the easiest things to know, when you are strong, when you are weak, try to take what you need and no more, then you'll find out, you have found the balance.

Q: (2:38). .. the powers that be try to get a grip of more and more parts of the physical life at this moment. Why are they allowed to do this, or is this bringing new possibilities for us?
K- What are the powers to be? We allowed them to become the powers. That's all. We allowed them to become power, what are the powers.

Q: .. Is it correct to say, that we are not so evolved as on other planets, compared to other planets, but the quality of love, is a quality of our planet, and is very special for it is embodied physically. Or is a love a quality that all planets have?

K- We are not behind, and we are not ahead. We are in the cycle of our evolution. Many races never took to the physicality, and many races took only D of physicality like man. But in the process either one had to progress to know where to connect and how to be, and how to create, and the rest of it. Just because you don't have D of physicality, doesn't mean you don't have D of emotion. Emotion is a common denominator, (2:40). across all created things, even a stone.

In so many ways, emotion is part of the confirmation of the existence of the both, STP and the STM, you can't have a reaction unless you find something to react to. You can't see a plane flying, unless you send a radar out, and unless it hits it and comes back, confirms its existence, needs ?? another one to confirm, or make a communication. This is part of the life of the man, the knowledge has always been there, it's the man who has chosen to go the wrong way, or to use the part which is suited him.
Any other question.

Q: from Macedonia .. after when I made the Cup of life 1 and 2, I felt like my soul was traveling … I went to a place where there was a library .. should I believe what I saw, is there a library or not? I really believe I was traveling with my soul and it was not a dream?
K- The reality is that as we enhance our, or as we use the Gans's and we enhance our body, (2:42). and our soul with it, we'll come to understand that we have new capabilities. A new D of life opens to us. In what we are receptive to, and what strength and D, then it gives us manifestation of realities, or being able to see, or being able to travel. It's not something new.
Q: .. Is it that we are looking through colored glasses and cannot see clearly and as we evolve, the fog becomes clearer?
K- I think it depends on what side of the glass you look at, but in general, not necessarily, not necessarily. Depends on how we will negotiate with ourselves, how we try to understand the possibilities of the interaction, to what extent we will accept this. Maybe a few of you will spend time in these EU. But in the first few minutes you will receive, you settle, and then you will not feel that again, because the correction is done. Then it's left to the D of physicality to sort itself out. Many of you will feel this. You'll feel this beyond imagination of the man. (2:44).

Q: .. Can a Keshe absorbing field Butterfly, be used in a jacket or clothing to help to absorb energy when needed?
K- Yes, yes, One of the things you can do with the what we call, the butterflies, they are in a sealed vacuum pack, or they are supposed to be, I hope. If they are not punctured, or they are not touched, you can put these .. Butterflies into a glass of water, or put 2 of them in a glass of water, use one bigger one, and a smaller one, put them on either side of the glass, and then try to see the condition, the emotion or whatever, that you might want to see, or you might feel in that cup. You need, because of the changes in the

transportation of the fields from one butterfly to the other, (2:46). you create a condition of absorbing emotions, and fields, and strengths, and what we call, dimensions into the cup. The butterfly is put in there, now you use, has many, many applications - many, many applications If you have a .. emotional condition, put a butterfly on either side of your head, see how you feel. They are totally field replication, there is no matter state with it. But you have to understand how you use it, and the way you use it. If you use the butterflies the correct way, you can even warm the body in the winter.
Any other question.

Q: Why do we live to 100 years old, if our body is so fragile? (2:48).
K- It's you who decided. There are people who are 100, you don't recognize them, they are 100.

Mr. Keshe Request to UC

I would like to make a request from the U Council. You know that the U Council (UC) is arranging to meet for the first time, as a full council, sometime in the near future, they have to announce it. Please when you do so, make sure you give enough time for those who want to be with the Council to add to your work, for the time and the place. Secondly, please make sure that all organization is in your hands, and not to the people ?? .. in Linz center.

Those of you in the UC who are planning to for such a meeting for the first time ever, UC members will meet. Try to understand and bring a new soul and dimension. You'll meet at an appropriate time. The time and place you have chosen. It's perfect for what is to come. But you have to understand, that you meet as the heads of the humanity. You come to what you call, your meeting with an emotion and with an understanding that in your meeting, it will bring the change in, and for sure the soul of Mitra will be with you. (2:50). As your decisions will bring changes for the humanity. I hope the mankind will come to understand this.

I have another request for UC. As I don't attend your meetings ??? Due to your work, the success, rapid success in Vienna talks between "5plus1" , as that will bring a new dimension to the whole of humanity.

In so many ways, mankind is ready for a change, but mankind has to make that move, to bring that change. That move needs to be done in Vienna. The way you wished for peace and the changes. We would like to have your wishes for the end of conflict across this planet, which 5plus1 will bring it into a new dimension.

We have made the request to make it "5plus2", and the 2 is not just the condition of the end of physical atrocity of one group or the others, which the Palestinians or Israelis, but the 2 is the symbolic of everything else, that the man in the position of power and knowledge ?? has done.

In so many ways, the 2 becomes the children who abused. The 5plus1 have to address it as the world leaders. Those who are involved in the drug trafficking, (2:52). 5plus1 has to find a solution. I'll explain to you in many ways, why it is. The support of the UC to be present is needed. To receive the soul of the elevation of the position. Is not just trying to change centuries of one nation or the other.

As I said to the Iranian leadership and to many people around us, it's the first time ever a nation has been sanctioned and its people have been put under shortage of everything, because of their knowledge. It's the first time we have seen the rest of humanity have risen against a nation, because they have access to a massive knowledge, and they have gone forward very fast. Sanctions of this knowledge, is what we call the 5plus1, where we change it, knowledge in exchange for peace from the motive and motion of the 5plus2.

We would like in the negotiations, not only the condition of the sanction on a knowledgeable nation, through his knowledge, but sanction on the totality of those who deal openly in harming the others, to be sorted too. One of the biggest questions which sits in 5plus1, is not the position of Iran, why does so advanced, and they are advancing so much., and how we can stop them has to be. It has to be, how can we join them to learn more with you and our knowledge to speed faster, to access more. (2:54).

This is what is the job of UC, to enlighten, to elevate the soul of the negotiators, to with it, to become mature to understand. One of the main positions, which we'll see has to be taken, is sanctions have to be on the nations heavily involved in child trafficking. Children are the future of the man, and how come we sanction a nation for knowledge, but we don't sanction those who destroy the life of the soul of the youngsters.

There is and there will be a request in all position, for now that we have reached peace, to find a new way to handle atrocities of man on each other, Palestine, children, hunger and peace. This has to take priority, because once we learn this, now we become mature enough to become part of the Universal Community. The sanctions has to be on the nations who are recognized by UN to be abusing. Those individuals who are involved in massive works, to harm the others, especially the children. There has to be, not talk, but a reality.

One of these talks we open very directly in one way or another. We cannot reach peace, if we don't find out we have to forgive and forget, for those who created animosity and atrocities, and then to feed it.

So my wish, my request to the UC is to elevate the members of the negotiating teams on all sides, that they put away, (2:56). their dogmas, and be there to create a new condition. What I said, to the Iranian leadership is very simple, we are the only nation who has been sanctioned for knowledge and T. Then it's formed in other shapes and forms. 80 million people suffer, because their scientists are too advanced. And the others have no access to the knowledge.

As I said, before, we open the doors of Iranian nuclear T, as it is obsolete to us, we don't need, but we still do research, because we need to understand the mysteries of the creation. This process will carry on the same. This process has to carry on the same. We see different ways of approaching the present problems, but the 5plus1, will be used to, in a way, open the eye of the man to the new realities. Sanctions against knowledge, where we gave knowledge in exchange for peace, from the same nation who sanctioned.

We have to stop what has been, come 40 years of imprisoning for millions of people, in Gaza Strips, and ?? We have to bring peace between all the nations through our knowledge and T. What's the use bringing peace, when our children suffer. The nations like Belgium traffic children heavily, and we put the center of European, what we call organization in Brussels.

I put a question to one of the diplomats very recently. Are they all the member of the European Council, going there, (2:58). because of their reputation, Belgium state. Why Germany, France and England put sanctions on Iran, but they do not put sanctions on a nation, which UN found them to be the center of the child trafficking.

The European nation has to ask its members, are we sending our members to European, to Brussels, as they are part of the same game. Or if they aren't, why don't they stand up. We have a replacement in Strasbourg, we can move.

These are the questions which need to be answered in the coming time. These are the questions and elevation, the UC has to bring to the soul of the members of 5plus1. With understanding this, we need to bring the change.

Protection of our future generation which are born of both dimensions of the soul and physicality, should not be jeopardized by those who are the centers of the abuse. Football coaches in Switzerland abusing children, the same the priest's did in Austria, in 2005. allowed to be going on. We cannot allow what we call, the states which are involved heavily in trafficking humanity across the borders.

The question for us to solve in the next few months is by introducing the .. flight system, that we do not allow these systems to be used for these kind of trafficking. We need in 5plus1 to negotiate a new understanding of the border control. Or accepting the totality, that we bear the responsibility of the totality of mankind. (3:00). Five or ten minutes from Johannesburg to London or Paris, or to wherever else, should not become a tool of what I call child trafficking. We have to solve these at ?? source, then we have introduced a new T. The guidance and the support of the UC is sacrosanct, their responsibility sits within the soul of the UC members, support team.

We start the negotiations sometime in the next 3 weeks, in Vienna. But it has to become in a way, "5plus peace," not only for arms, but for our children who have been abused heavily by the traffickers, and they see it as their right. It needs to bring sanity to ?? , to what I call, "mind of those who allow one, and they sanction the others their knowledge."

I wish the UC has understood our wishes. And we wish for ?? ?? it is for those who understand, to put in action that it elevates the STM.

Thank you for the teaching of today, we hope we meet each other next week.

(3:02). R: announces about 5-D conference
(3:04).
R:
Anything to add ..

K- We have participated in conferences with them, 2 or 3 times before. It is just to enlighten with the new knowledge and what is to come.
We have a small thing to clarify. KS asked for job in KF process, factories, no knowledge or background, they say we want to learn to come to be there because then we can do things. (3:06). At this moment in time we need people who can complete a process for us ...
Austria is one of the most expensive places to live. Don't be fooled by 2000 Euros per month, lucky to have few penny's left…

(3:08). if you requesting KF as KS you go through the Austrian process of work ..

(3:10).
Shall we call it a day.

406th Knowledge Seekers Workshop; November 11, 2021

Note: Transcription has not been checked by KF. Please listen to original recording. (Transcription by KF Brazil)

(first half transcribed working on second half .. Need Quick Index; K Words, ; Key Phrases …)

ENGLISH TRANSCRIPTION

(:09).
K- … we're nearly coming to our 8th year anniversary, even though teaching on this side goes long, long before that. We have passed many milestones in the process of development of the KF, and one of the most glorious times for us has been bringing the knowledge and its capabilities and , ,back in its motherland in Iran. We have the pleasure this week to see that the KF in manufacturing in Iran has put its mark on it, what we call the Iranian territory. The first factory of the KF in Iran has put up, and has gone into operation, going into producing MaGravs in Iran as of this week. It's good to see that we become the nation without border, .. the KF has become … delivery, irrespective of borders, nationality, and race - China, Tehran, Arizona (AZ), Mexico, we've seen it in Italy and Africa, and Austria. It is nice to see the flagships starting, working delivery the T for confirmation of its application. We will see very soon the products in next 3 - 4 weeks coming out of this factory, with the proud logo, of KF Iran. We are hoping to extend this to at least another 5 to 10 nations in the next 2 or 3 years. This gives us the .. strength to be there, (:12). to serve humanity, and to be there to bring the changes. Very soon out of these factories in Iran, we will see spaceship systems coming out. We will see development of new T, which is at the moment is out of the reach of many. …

This factory is exclusively built to produce MaGravs and we have already received orders from China for export, and we will product, produce, release these from Iran. The team in Iran working extensively … We are endeavoring to complete the Nigerian side before Christmas, to start moving.
…
Even though some people use our images for lying and cheating to the others. In a report which is now seen, by many of us. Is the pictures of the .. old, what we see, the KF reactor, which was built in Iran. (:14). As many of us know, this reactor, the housing, is used for the flight testing, in Sheraf Tehran University, what is amazing, and many of you have not seen is this. This is the reactor of KF, copied, and the ex-Prime Minister of Israel, as you see him, claiming it as an Iran nuclear weapon T, developing for weapon. Now we can see how the T coming is misrepresented, by the people to create mayhem, to create war. We gave humanity the means and tools to travel, and what we see, those who are of the wrong minded change the same thing. It is interesting how close the picture is to the reality of the center of this reactor, because I am the designer and I know what I have designed and we see very strange thing. The strange part is for me, is this part, which you will see .. is this. How did the Israelis get their hands on the internal design of the reactor? We know one, the office of president Akhmad ?? the way he sold the Iranian nuclear physicists to be murdered, has passed the T on. The similarity of these 2 reactors is so close, even the frame is so close. (:16). That knowledge for space T for peace and development, by a misguided mind, of Netanyahu became the reason for Iran to become part of the weapon T, by lying, by cheating. As I said, now we understand how our knowledge, .. T, our assets as a KF KS have been abused by those who want to change things to their own benefit. In so many ways, … as we see on the picture, this is not far from what you saw on that picture. But now more sophisticated, but this is what will go on the table of negotiation in 5plus1, on the 28th of November when the negotiations starts in Vienna. The same thing as Netanyahu claimed to be the new Iranian nuclear reactor. Now is, will be shown .. the system which will replace centrifuge, Iran does not

need the centrifuge, when it is in the position of such advanced T, that can produce 100% enriched Uranium at will. If you remember I warned, I explained that Iran has passed 90%. Iran can produce 100%, but this has other implication and application for all of us. In our work, .. sharing of our T, be aware, that our work does not become a tool, (:18). to be used to discredit us, and at the same time for war. The flagship, the banner of KF has been peace, knowledge to be used, as knowledge in exchange for peace. This is part of our working, this is part of teaching so extensively, and so deeply. When you understand the time of weapon T has gone because anybody can produce Plutonium, Uranium, or any other which they like, at will. It's the time for all of us and our leaders to understand, the time has come for man to use materials as weapons T.

As I said, it is like when you look

Our gun is our knowledge, our gun is these systems that makes those centrifuge obsolete. This will be part of the cornerstone of peace. Part of work of the Knowledge Seekers (KS) to understand, .. our work comes by serving, .. doesn't stop just be we managed to deliver, to bring and cajole, (:20). world leaders to understand more and more. ..

(:22).

Most of the system places, as we call the wellness centers will see construction, and negotiations will start with the Chinese construction company, (:28). China construction, one of the leading .. producers of properties and landmarks around the world. Which means you'll see replications one after another. We will equip all the centers with at least 3 to 6 Body EU, 3 to 6 VEU and HEU, and a number of the new .. Vision and Brain EU. Then once we complete the full cycle we go back and we extend it. WE are not opening a franchise, looking for people to become to buy the KF. All these structures will be owned and controlled by the KF directly. Which means as of today, we are not waiting for somebody to come and say, I want to buy 1 or 2 machines. WE are going out to setup the centers. Owned by all of us, .. by KF as One Nation and the progress in that direction. We have already informed KF Iran, from the government level, that the KF from December on will start the process of building the first CO2 capture area in Tehran, for capture of CO2, for change of air pollution in Tehran. KF .. has allocated a large finance for this job. The same will be done in New York, London, Beijing. Again all the construction will go to China construction, because they deliver in 3 to 6 months. (:30). from instruction to the key .. The reason we go to CO2 capture, we show the capability of the T in public domain. In this process there is no ambiguity, .. of the capture of CO2 in a very large scale. up to a thousand tons a year, will cause to close the discussion of the global warming as all the false commitments we've seen in past week in ?? There is no need to create fake numbers and the way we structured it we don't need for no government to finance us. That we'll find the finance ?? for the project as part of my private financial background and the financial structure. The people we work with will allow us very rapidly to bring this into the open. KF will endeavor to increase a lot of work around the world rapidly.

As many of you know, KF Mexico which is still owned under, ownership on the paper of the Markray, is still financially and structurally is part of the KF international and this through the agreements will allow Mexico to be part of financially supported, and structured to a high level, again for production, mass production, what we call, "high level advanced technologies". We finance these through agreements which is done. (:32). We will see the establishment of the large structures especially in China, Iran, and US, for space T. KF will endeavor to increase production of the flight system until at least significant numbers by end of next year. The T is part of the 5plus1 negotiations, that we do not ask the Americans or Chinese … that you give us this we'll do that, we tell them we are investing, we are in your country, already established, deal with it. It is your problem not ours. It's yours to bring .. sanity to mankind, and by the construction of the first 5 CO2 centers around the world the whole chapter of the global warming will come to an end. The structure is very simple, KF will build in a specific way with the permission of the authorities 5 centers around each cities. Then we give what we call family units, the enhancement portable units to each family, poor families. which means they can look after their families, make sure it produces vast amounts of CO2, and we buy the CO2 from them, for the prices KF has .. (:34).

these units …
R: excuse me Mr. Keshe I am having trouble hearing you here, .. (:36). (:37). ..
K- As we said in cooperation with international organizations we'll make sure for every system we make there are a number of systems in a backup for emergency deliver, that people can use for overcoming hunger and everything else. ..
(:38).

(:42).

Teaching starts:

Going into the teaching of the KF. In the past weeks, I started to opening knowledge in a different way, in understanding deeper, .. more about our work, more about the back ground to the Knowledge of the Creation. This is very important for most of you to understand, especially those of you who teach in the background within the KF as teachers. When we come to understanding the process, and the creation, and understanding of the whole totality, we need to be aware of one point, (:44). that is how much and who, and where, and when we can extend the knowledge of creation. As we see in life on earth, and as we have gathered the knowledge in information as part of the KS as understanding the work of U, we need to understand a little bit more, more out of the village of earth. When we are in the village of earth, when we sit and live within the structure of the this village we've seen ourselves in different parts of this planet having different shapes and different height, .. .faces, .. behaviors, according to where we are born. Chinese looking, black skin, white skin, blue eyes, and we have changed our appearances according to positions and places and atmospheric conditions and what we call geological conditions. So we have accepted it, so he is Chinese, but we don't think why, what caused, why can't we give birth straight out, without Chinese parents in

Africa. Because African condition and environment has forced that kind of skin, ..lifestyle, and plants and the rest of it. (:46). But this is what has been your knowledge. But what is extension to this knowledge, is that the condition of the earth and how man has 2 legs and 2 arms goes back, and is position , and the fields which it receives from the sun. Our sun .. the fields of our sun dictates the shape, color, the fields which we receive, which allows the creation fo amino acids (AA), and this is part of our life. We have received the fields of the sun not only in the formation and format of the interaction of the fields, and creation of oxygen and nitrogen, but the sun itself creates other fields, which are invisible to us, but interact and create the conditions fo this life. In a way, maybe now you understand when I say, the food we eat is 20% of what we use, the other 80% comes from the environment. Maybe the earth produces 40% of it. The rays and M fields fo the sun would produce 10 to 15% of it, but we never considered. These come in as the rays, fields, as the M field interactions which are not at the moment to the level of understanding of the man. But the extension of the knowledge has to be added, that our sun is part of the galaxy with the central point. So we receive fields and radiations in a way, on earth (:48). from the galaxy. This is another 10 to 15% of food .. energy supply. These are the fields which earth does not provide, these are the energies which the solar system does not supply. Now you understand why we are part of the U Community. and within this structure there is further more, which is the fields which we absorb from the U. This field gives us the majority of .. our lives, because it is source dependent and source strong. To us a galaxy looks so huge, but in fact, it is another kidney in the body, or maybe a section in the kidney of a body, or a cell of the kidney in a body. So we get another 10 to 15% from .. universe. Now you see how the teaching fits in. But we have another dimension (D), which is the Unicose, and the D of the Creator, which again we receive directly from source. This is in our body, becomes the center of our soul, the center of the cell of the body of the man. This is where the connection comes in. To man it is hidden, it's not there, because man never considered he receives, but in fact, he was created out of it. (:50). When you understand this, you understand the change in the game of creation. Then you as the knowledge of the man extends to the new .. level, then we will change through that understanding different speeds of travel. Because then we can capture that speed if we go to the depth of it, we can capture the field strength to the Creator. Then we understand the limitation of the speed of light to be the ultimate, it's for the man in the boundary of the physicality of his life. Then we understand more in how gradually the structure of the lie will become more. This knowledge on this screen is sacrosanct if the man wants to travel the span of the U, and still exist within his D. The conversion of STP, with understanding the strength of the STC, where you put everything in the STM as the STP, and the STC, at the strength of the soul of the creation. Then now you understand how every created things in the U are connected. Every ray which is radiated out of the life, and extension of the life, (:52). of the Creator in different spectrums, as they interact, has become part of another life in the D of creation. Then you understand how all of us live in that D and direction, and have taken shape and forms, formats and shapes, in the Unicose in the D of the creation and the Creator.

This becomes part of why I tell you to understand the knowledge that no man from the high levels, become magician of you from the low levels because he sees slightly different D. The end of prophet hood, the beginning of understanding totality. End of

magicians, and understanding in more depth the knowledge of creation. If you have understood this, then you understand how when we put in .. the flight system, according to the clarity of the understanding and STP of the man, the soul, you can decide in which level you will fly. There is no limitation, except the understanding of the man in the D of the soul of his own condition. (:54). Now you understand in the teaching I said, there shall be no prophet, as man's knowledge is there for him to understand the knowledge of prophet is according to understanding of his own creation.

Then you understand how in the word of many of you, you are waiting for Messiah, … Methi and the rest of it, because that is the level of your understanding of your creation. That's your Methi. That's your Messiah, that's your savior. none of you and none fo the creation in the U, waits for someone to bring a messages except you due to the knowledge of yourself. But don't get embedded in dogmas and trying to protect what you understood, we open, to open the new knowledge's to the man, to the knowledge of those who come across, different levels of U to teach you. When the human race reaches that point, the human race is ready to embrace the knowledge of the creation and the Creator. Then if you look at this picture, and the picture in the back of Book #3, all we done for you to understand is we have put Creator in center. The rest of the divisions, according to the strength has become what you have seen. Now you understand how the knowledge has been taught to you so profoundly in the books, (:56). where we see the connections, the D of creations, the understanding depending on the strength.

In so many ways, mankind will become to understand its potential in .. the position of the creation. And then you'll understand more, and then in that process we do not need to be seen and be there to see the Creator, as the knowledge of the totality becomes knowledge of the creation, and one day mankind will understand what it means, "I made man in the image of Myself," as the man has access to all. Depends how you have twitched it, in understanding the knowledge of the creation. Maybe now for the first time as you as KS becomes easier to understand, the pattern, the process of the teachings over the past years. What we have taught in past 19 years, ,.. in public domain to governments and individuals, was to bring to the process, to this positions, (:58).

To understand that totality of the life in the U is equal for all, depending on the extent of the, if you open this to the knowledge of the creation and environment, you have become conditioned to different ways of living, but in essence the Soul of the Creator is within every cell of the creation. Does not matter if you are on earth, planet Zeus, a galaxy, U, or within them, even the separation of the .. planetary system from each other within them, there is a M field separation in that position. So there must be a life even within that environment because the existence, interaction of the fields. It's not just one stick that you have and you see, but it's the totality of the structure which mankind has not accepted to .. endeavor to understand about his own creation. This part of the teaching will come to become the way for you to understand the creation or it will become something which will be hanging there till one day you understand the change.

For us to extend our knowledge, .. what we call, (1:00). the understanding, is for us to understand the truth about our own creation. The truth about how we come to survive, ..

live, now with this picture if you understood, you understand the teaching from day 1, that we only take .. 20% of our energy from the food we eat, and that energy which we take for the physical ?? can be replaced with the energies of the U, without killing, without destroying, without .. putting a lot of people, a lot of beings in danger.

KS now you have a bigger problem than you ever thought. Now become your own Messiah, what does your soul tell you. What can you accept in the knowledge of the creation and how much it took, which fields of the U, you can tap into to create the pleasures of the life within the D of no physicality. Then you understand, even the earth itself is another type of fields, which is on its way to become something else in the D of the creation.

Those who went with the work and understanding, (1:02). of the work of Mitra which means they served, they find a path, very short, but very direct. In different levels of the creation to the Creator. Those who go on the path of other ways, most probably find the journey has become longer, and it's a longer way to find it back to understand the totality of the knowledge of the creation, the hell and the heaven. The hell is when understanding of the life of the creation becomes harder, and then you need more magicians, and then the heaven, is when you understand the process fo the creation, and become closer to understand the totality, and nothing else.

So it's your behavior, your thinking which dictates you, which way you swing the life, after separate from D of physicality, or In a way, when you now understand how to bring the physicality in the D of the STM to move. Don't forget I've said in one of the teachings to a man of the robe, to a priest, in a simple way, maybe you understand more, your conduct decides if you are on a journey of still, trying to understand less, to one day you understand more. Or you understand from the beginning, the more of it, then you take that journey towards, the higher order of intellect. (1:04). Then the speed of travel depends of the level of your intellect. Man ?? according to one of the fallacies, the highest speed is the speed of light, because that is all he can see, the light through his eyes. Now the next level will be when the man will see in the level of understanding of his own in all D. This is part of our work, this is part of what the KF has done. How we will end up to be. The process of totality, .. interaction depends on us, .. on how much we understand the totality, how much we endeavor towards totality, but don't think we are the only ones, and to what extent we understand, is the only way. The old saying, "all roads will end in Rome." In all D all roads end with the Creator, but depends which road you take. Understand the knowledge, .. the purpose of the teachings, .. all these equipments and systems we give you is to elevate your knowledge, not your physicality. (1:06). Understand that the knowledge of the creation sits in different ways and there are masters in it, will teach you in different ways, then you'll understand.

The knowledge of the Creator and His teaching in the D of the soul, will match accordingly to the level of understanding of the physicality of the man's soul, not the STM. And how much is interaction will create that D of emotion, and something which many of you will realize, and have known for a long time, and you call it a dream, and that dream is in fact, in one level of your soul, you have taken that trip. If you have taken

a trip in the D of physicality you will see the physical D. If you have taken the D of … the Unicose, in that dream you see the man of Unicose. And if you have taken that trip in the D of the strength of the Creator in the knowledge of ?? ourselves you shall spend time in that domain. This is what we call, "enlightenment." It's enlightenment of the knowledge, .. in understanding the process of the creation and the Creator. We don't call ourselves the prophet, (1:08). we call ourselves the Universal Messengers, as we deliver the message of the Creator across the U, to all the same. We are part of the soul of the Creator as ?? knowledge, that enlightens, that everyone gets the same chance to access to his beauty and knowledge. At the same time we live in D of physicality, that it needs to understand the process of the soul of the Messengers as well. When a Messenger claims to be a prophet, is the time when the Messenger has failed in delivering the message in the correct way. because he has put condition of physicality for his own benefit, for continuation of him becoming "one," and the rest to serve "one." This is why, now you understand we appear amongst you, even as KS, because we still seek to understand the process of how mankind will take from this position to the next, that we are ready to teach the lower evolution of life. Those who elevate in this direction, may have already reached. This is the process that we want to stop, that man does not go even worse than killing and destroying, and slides down the slope.

Then you understand the change of the game, that there is no temple except the temple of the STM. There is no temple, except within the temple of the STP of the man, and that temple prays only to one, serves only to one, (1:10). and that's the totality of the creation and the Creator, as totality of the whole lot. Now you understand when it is said, again and again, "I made man in the image of Myself," as I radiate further, I reach the man, and I create the man in my own image. But what I have released in conjunction with what I have from different D, gives the man different shapes and forms according to position of ?? We don't hold back the knowledge, it's you who holds back the understanding, and to confirm, .. laziness, you create other problems for us, to create and change the knowledge, and transfer the knowledge.

As you saw, the system for flight, was changed to system for destruction to create more mayhem. Now you understand when we told you, long time ago, when we approached you, CIA to Netanyahu to tell him we want to speak peace. He said, I speak peace with anyone but Keshe, because he gets his own way. Because he knows he used the tools fo Keshe to create more mayhem and murder, and he could not stand face to face.

You got to understand the whole purpose of the creation is to become, (1:12). to create, and to be aware of totality. Awareness and seeking to understand why you need to be aware creates the position of knowledge, expansion of the thoughts, and creation of new D. Something which many of you might have a problem with, but many of you will come to understand is very simple. Go back to the same position and same structure. You put the man in the center. Then we put different D for the man. on his D of physicality. Then we create .. the other dimensions. As a man when you , at the strength of the D of physical condition in interaction with the STM, and the STP, you create an emotion, in the brain .. is where the 2 interact. You create emotion of physicality, cry, laughter. (1:14). Now when you move to the newer strength, through the STM and interaction of

the STM with … the "soul of the dimension of the solar system", and understanding of it, you create an emotion of that level, which now exists that you understand the totality of the emotion between the man and the U. It goes the same with same strength and root to the D of what we call, "man's soul with the D of that," so you create a new D of what we call, emotion. Then even further you create a D of interaction, with the STM and STC, so you have a new D of emotion in respect to the Creator. So now you understand, man at any time, even at different levels of understanding and emotion, even within the structure of the physicality of the man, when it's the STP and STM you create physical emotion. When it's between what we call the other D, we create different emotions, and so man, (1:16). at any time, has been all the time, at all levels, and having and living different D depending on the level of the same soul. When you are in the D of the physical life, you see and understand the dreams of physicality, you go to a restaurant, you see the dog, at the same time you are interacting with other D, ,, as part of your structure as they are feeding you, you create those emotions, and this is what I tell you .. according to this, according to understanding of intellect, you move up or down the line. There is no border, you can be living in D of emotion and reacting to your Creator, while you are living in D of the physicality, and you are there. The 2 are happening at the same time, because you are getting feed at 2 different strengths, for different purposes. This is what the man has been blind to. Now you understand. The love of the Creator shining on the man has never stopped, because you receive it according to that intellect and that position.

Now you understand why we position a man in the center, as he is receiving everything from all dimensions. (1:18). and it's very much like a farmer hole, the Creator and the man, and how much more do you want to go down this rat hole in the D of understanding the ?? STC. Where this D(upwards) is enlightenment and heaven, and this direction (downwards) is what we call the hell. The more you give from your soul, the more you have access to, to receive more. The more you take the heavier you become. The black hole of the creation. Mankind soon will understand this, .. understand the totality as he progresses to understand the purpose of his creation. In KF, one of the KS made a video of the teaching, that you become a star, and the way you elevate when you move in the D, you shine on more. It depends on how much you want to shine, and would you elevate so much that you shine with the Creator, and the same, become as part of the creation. You care about your children in D of physicality, what about caring about your soul, as you elevate, you have to deliver the perfect ??

Now teachings from past years, (1:20). start making sense in ?? D and direction. I made man in the image of Myself. We go for a break and … I hope I opened another D in teaching and understanding of man for himself, as we prepare man to join according to his wishes and his teaching, and which level man wants to be part of U Community. And do you need to spend billions to get from there to here, that you se the high level order, or you enlighten enough that you ?? directly in you soul from the energies which you receive to shine back on.

Rick ..

>> BREAK >> 406 KSW Nov 11 2021 (1:28).

Questions

Q: .. Comparison between the standard model in modern science, and standard model in plasma science, 3 types of quark and 3 types of matter.
K- We don't believe in quarks, so we have nothing to discuss. The quarks do not exist, that was imaginary knowledge which was created and in so many ways, became part of elevating a lot of peoples knowledge to find more. And some people who could not understand it, just stuck with it. So the quarks don't exist except those who read the book about it. This is why, (1:30). ?/ the KF, we will invest heavily in new school teaching, in the new school, knowledge teaching , that hopefully, maximum 2 to 3 years KF will teach knowledge in the true essence of, not what has been imaginary of, and to understanding the totality. We don't teach them something, and then like now we see like very knowledgeable person, comes up with quarks. When you don't teach the fallacy, you don't need to correct it. If you put the people in the right way of knowledge from childhood, we don't need to go into the process of what we call, "a lot to rubbish," and then trying to change it. It's better in your schooling to teach about the nature, how things are that we can see, then teach a lot of things, that then you have to change. Because they read first. So you will see a new side of teaching will come out of the KF, especially KFSSI will be strengthened across the internet, that the teaching does not depend if you can go to school. But you can teach at home, with the parents. ?? where the knowledge will be identical between the parents and the children. It's not a home schooling. If I put you on a trip to Mars, how can you go to school on .. the knowledge should be reachable to everyone across the planet, according to their understanding, and across the U. You'll see, we'll start the teaching. The head of KF is working that way, teaching and education side. (1:32). Iranian team is working on structuring the other side ..

What's next

Q: .. let me think about the multi-dimensional being. If you are aware of all this like internet .. it's like you are multi-dimensional being.. maybe in another D I have another name ,, and job … Would you like to explain more about this multi-dimensional living, the future enlightened people have?
K- You do not live a multi-dimension, this is why now with what you put forward, understand part of the teaching. (1:34). where you said, clearly that when I teach, my teaching is for the whole U and Unicose. Because when we teach in the emotion of the thoughts inner being, we are already teaching right across all D. For you who have an ear, you hear it as a voice. For those who have a different level, they hear it in their D. For those who have a different understanding hear it in their D. But the teaching comes from the mouth of one at the same time, and each one takes from it according to their intelligence and understanding of the totality, even in the D of the Creator. You hear the

voice, but how would the man in this D hear it, in his D of ear, and comprehension, and how does this one, because the message is the same. If you know it, you say I already know, but there is another hidden part, which is the same as Book 1, 2, and 3. you read if first, and get some more knowledge and come back, you read, and you say, "oh this is what he meant." So it is very much, which book, and how may times you read, and how much you've been progressed, and enlightened in that ?? pass. This is why we don't live in all dimensions. We are, we are, (1:36). the true, "all dimensions." We are the creator of what you see, reduction of the field forces of the Creator, in different levels, to become, to the point. Then man In so many ways, sits in to receive from all, on all levels. Then at each interaction you have different emotions, or .. interaction of the thoughts in that strength. That's you call it a dream. So you have an emotion already in all D, but which part you are aware of, that's what counts. In D of physicality you'll see the dreams of the cat and dog. What is the dream and what is the emotion in this. Now you understand in the past few months, I spoke about new emotions which we will experience, we never knew. Because each one of these levels has its own emotions, according to its strength, that it's not open to the ones which are inside, in the lower level strength. Now you understand how the teaching comes together. There is so many emotions in the interaction of the STM, with the soul of the D of the strength in the Unicose that it creates its own emotion, and you have no meaning for it, because it's not there, you don't see, you never felt in the D of physicality. Now as I just said, there will be so many new ?? explanation of the emotions, now that you understand this picture. It's typical. We don't live, (1:38). in different levels. We are creator of the levels, and we are all part of the same. The man of the creature which lives in this D, is aware of, and is looking for to elevate to this D, to become to reach to, what we call, the knowledge of the Creator. The man or creation which lives in this level (close to outer edge) he strives to reach that much, to the level of the creation. That when he reached, it shines back down the row. So when I teach, you will hear the voice of the man but those others who hear in their D, strength, the same message, but they interpret to what it fits in their strength and D, as ?? like, .. the interaction of the fields of, creation is all the same across the U.

This is why .. we are called the Messengers, universal messenger, we are the messengers of the Creator, as we come from the essence of totality. Prophets are for the man who make a profit for themselves. It's in your brain, not in our work. Yes.
Q: So how many Universal Messengers are here on earth, right now? (1:40).
K- The whole U carries one and only.
Any other question
K- Can I extend this to what was said. Is that we look at the one and only as the soul of the Creator, not the physicality of the man, you have to understand that point.

Q: .. earlier quote, If we are not hungry we can be in love with the whole creation. So why do I still have the urge to munch, does this contribute to the 20% left?
K- .. Yes, and that is what we trying to bring about, that you cannot. You still need energy to survive. But the only thing is we change the menu. Change the ingredient, nothing else. (1:42). Learn to tap in, what is freely made available in the U for you, by not taking from one who has already worked to put it together. That's all. You have meat eaters, .. vegetarians, .. vegans, and now there is a new menu, "fields of the Universe."

Learn to tap into it. That's all. Then you can tap straight away to which ever level you want.

Q: Ed, I would like to understand how we get past the level of emotional awareness, that we are at right now, to the next level? Your drawings show that when we interact at the next level, we create, (1:44). a different emotional awareness. But right now the palette of our emotions that we experience at the physical level, how do we get to interact at the next level, and create a different emotional awareness?
K- With the new systems .. especially the Brain and Vision EU will bring this back to many of you who went through it, very rapidly, within seconds and it stays with you. The more you go into it, the more you understand what needs to be done, .. to handle the 2 emotions. People who have been through the process of the new EU, talk about new experiences of emotion, .. physical emotion in the all D. I have been witness to them, in the recent past. I have seen how the souls have been elevated, .. emotions within seconds have manifested themselves entering these systems. What we see in our trials, .. testing, will shock many of you when you see it, enter it, .. feel it. When you come to understand it, (1:46). that how beautiful life is if you understand the totality, .. the condition, that the whole caboodle (thing) is perfect for you according to your understanding. You come to be very much, in tune with yourself, in tune with your creator, as know you understand you have access to it. You call it, enlightenment. When you enter these systems, would you, when you get fed through your soul, would you think you could feed your physicality. You would not kill anymore, not destroy anymore. But once you get to that point, because now you have access to fields of the U, would you be able to jump straight away to the higher levels, or do you need time to gather more?

This is why, .. especially why, in the past weeks I cleared something very .. some of you might not have understood, about the creation of Mitra. In so many ways, when you call it, "Eve", set out for creation of Mitra, (1:48), which is a completion of totality, she took the best from every D, to make sure that every creatures strength, the best, the beauties of all races, strength, in every D. Whatever the Creator could create to be the best, which in essence comes from the soul of the Creator, Himself, are in all D and strength, within the time and the frame of the manifestation of Mitra. SO when, what you call, Eve, went to create Mitra, she took and spent time across the U, to make sure that no strength that can lead to something else, that when Mitra manifests amongst the man, she is the ?? side of the Creator. In essence all the fields fo the Creator in all D, became what you see. This is the point of change. The true enlightenment, understanding of the totality. The manifestation of the Mitra, where the man and all creatures of the U will have access to the Creator through the knowledge. (1:50). She shall be soon amongst us, in both D, and ?? enlightened in ?? the U and Unicose. the best has been collected to create the soul, and that's what it said, the Mitra is created out of the soul, not the D of physicality. But now we create the physicality, we ?? create the sperm and the soul. This time the soul has been created that it fits, and befits every D. As I said, I am servant to serve.
Any other question.
..
Q: .. The creation of Mitra in our D will it be our choice to be aware of it, or not?
K- You've been made aware of it. It is your problem to understand and recognize. (1:52).

Q: Can we say the flight EU is a "cocktail" of fields, where we can connect with any force field in the U?
K- It's not a shortcut. As I said, .. you cannot load a donkey when the donkey has not got the strength to carry the load. You have understand the totality, to become detached at the same time, to become part of attachment, that becomes a stepping stone for another person, .. soul, .. being to step up. When you become the "soul of detachment" you'll find the path. Somebody asked me … you speak about detachment, but you have been here for thousands of years attached to this planet. I said, yes, to see the birth of Mitra, then I am detached. The cycle of .. world peace, .. no hunger, .. (1:54). no pain as a D of physicality ?? enjoys its life in every D. We are not attached to physicality, we are guardians to make that point, for the whole of Unicose is reached, then we have finished our service. And that time is very soon. My mission is complete.
R: I hope they give you a good vacation.. You certainly have been working hard n this planet.
K- Oh, it's enough time, over thousands of years, come across this.
Any other question
R: We are so fortunate to be witnessing it now.

Q: Brazil .. (1:56). physical and the soul are we then ?? Rafael ..
K- Hello Rafael good day.
Q; Hello
K- How are you .. thank you for your beautiful work in Brazil. It's amazing what you are achieving.
Q: .. the soul and the physicality are dimensional ?
K- Yes. If you go back to the teaching .. we put the soul, (1:58). in this D. Now you understand. Through the soul of Mitra, understanding of it, you become the soul of the Creator and visa versa. But it is not physical elevation. it's elevation of the understanding. The ?? causes of creation at every level.

Q; .. Is Mitra the soul of the light?
K- Mitra is the light. That's the light of the knowledge, not the light of physicality. I was explaining to part of our KS … as we progress in developing what we call, the ?? centers around the world. In places like AZ in the coming months, you will see the building of AZ, but you will feel the light and fields of AZ. (2:00). The way we have structured the systems in AZ is unique. AZ is structured, many of you will go to it, and you will see it in a very specific way, where we have the body EU or field transfer, then we have the VEU, then we have .. Vision EU. And in this process you'll understand the transformation of the fields, but the Vision EU behave like electrons, the Body EU become the transition line, and the VEU become the feed backer of the system. This will create dynamic fields around the whole structure. Where with this process we create the new D of the fields and not with the field strength of the earth, but the field strength of the understanding of the emotion. Now you might understand why the space flight system has a bottom ?/ but they have a creation of this shape. Where the interaction of the 2 fields will convey the ?? pleasures. .. (2:02). to the KS … , the way you see .. the flight system with the door on the side, this for .. human transportation level. When you brought to the bigger D,

..loading will be done from the center and underneath. That's why we are setting up to build .. landing spaces, to make it easier. …

will go on the basis of very much, all the facilities on the side, we try to create this in the D … where all the people in the building and outside benefit from the operation of the system. We hope in the coming time, not many people will need to run these systems. But the fields created will create the dome of everything, refuge, sanctuary, even in time of disaster. Once you enter this dome, (2:04). you can extend it, according to the process of the EU, we can accommodate thousands of people who need it ?? or are in the process of moving from disaster. You come in and you receive what you need, and you go back out.

We saw the creation of this dome in a very soft way, at the beginning when we started working with Ali in Canada, but KS were not ready at that time, we abandoned the project, because it's no use going ahead with something when people cannot see. If you remember, Ali made the pyramid, in private teachings with Ali I understood he knew more, but could not put it, because he could not translate the knowledge of the soul to the knowledge of his physicality. But if he ever comes, because he was around a few years ago, back in the teaching, he listens, comes back and explains ,?/ who could see the enlightenment, it depends on this enlightened of the soul, not .. of the physicality.
Any other question.
Try to, we will ?? very soon, with the 5plus1, the first few units should be in AZ by mid-December. ??/ (2:06). of the first 48 units into AZ, many of you feel the D of soul and physicality. Then we'll see how the position and time will change. Many of you will be enlightened, by just entering the new D.

Q: Rafael translates. In my understanding the soul and physicality always walk together, or they are separate, one in each space and time?
K- They ?? never can be separate. How can you separate the soul of your creator, from yourself? You don't exist.
Any other question. (2:08).

Q: .. Adam and Eve had a navel?
repeats ..
K- Not attribute of the physicality of the man in the coming time. Essence of connection and interaction, between the souls exist, what name do you want to call it. Why do we have the belly button, navel, because that was the line of connection between the child and the mother. That's in the D of physicality. The Creator never cuts the line of connection. Man is never alone, but in the life of the man, you give birth of the child, and you leave it to grow. That's the D of physicality, not the attributes of the Creator.
R: So it would be true without going through the birth canal and all that, (2:10). people will be born without belly buttons?
K- In a way, we are both D, because we have to confirm existence in the D we exist, and follow the pattern. But in a way, the essence of existence in the of creation, such as the STM, will co-live and co-birth. Not as a prisoner, but as equal and above, a giver. You

know the ?? football club has a beautiful song that has become their motto. You never walk alone, as a STM you never walk around without the presence of the STC.
Any other question.

Q: Kay .. I still didn't get the satisfaction, (2:12). .. of my ambiguity and my quest.
K- You demand satisfaction?
Q: No not reason. . Come to terms with understanding. You have stated our soul puts us in certain position to carry out certain action. At the same time we know our soul is from the Creator, and carries the knowledge of the creation equally the knowledge comes form the solar system, our planet our sun who gives us this knowledge. If the ethos of U is such that all the souls are the same good deed, and they do nothing wrong, the "3 Kings" as you always mention, Do good, talk good think good. I want to why people go and kill, or steal or do the horrible thing in the U, if the soul is the one who puts us in that position, so why would the soul position us in creation, to a position that is horrible, and why would it reduce its own strength with the action and physicality, that he has created.
K- You see at the point of creation of the life on this planet, due to literally physical condition of the composition of the elements fo this planet, and position of it when life was created. (2:14). It ?? wasn't done in totality, it was like a wheel was missing. And that wheel out of the 4 wheels of the car, is the absorption of energy, which ended up with killing to receive, and possession became part of the structure of the emotion of the man. we like to possess, .. hold, .. to have. For it we do a lot of other things. Those of who are around me .. why do you live this life in these conditions. Because if you turn up with a rag, or a car from 1940s, nobody listens to you, because the man's brain has become "man of possession." What you possess, the other listen to you. In that position .. you learn very fast, that we would like to possess, and with it we create D. When I used to be in world of business I used to have 2 cars, 1 car normal car, very normal. for doing deals to buy …
When I used to sell things, (2:16). I used to go with the best car, because it was a position of I don't need. If you want what I have, it's my way, my condition. And it always worked, 99% of time worked. Because man looks at the possession ..

Those of you interested in the knowledge, you took the knowledge side, but we played both games. ..
.. to force those people who are materialistic to go our way. I was online … WL has been present, with some of the world leaderships we sit and talk. We sit and decide and support, who and how certain people become world leaders. The condition of our support is implication and application of peace in exchange for support from the KF in T and knowledge. When we deal with these people who expect to be leading a nation, we treat them that way. we set a table fit for the king. (2:18). WL has been in couple of these situation with people to become world leaders. Because we do knowledge in exchange for peace. You have to treat these people at that level, that you create that condition .. but when they get to position of power they usually change. But now we learn to tie their hands to their back to their leg, that we get our way. It's very .. how we deal with these ambassadors ..

But at same time I walk into, most probably the cheapest cafes, and I sit and eat at the same time, because it is not the possession, it's understanding the joy of, "you can bring that change." I live amongst the man, so we have to understand the totality of the man. It's a very strange situation and you have to befit and be ready for all at all time. Some of the KS when they see us in these positions, then cannot comprehend, (2:20). how you can be in that position and the next .. hours you become a common man on the street. Because that is how life should be, you should be that humble. Many of the KS ..

This is what man has to be. understanding position ..

and at the same time deliver the message of the Creator, it's not easy. But to be humble enough to do it is an art. Over thousands of years on this planet we have mastered it. (2:22). … If you don't want to stand out become part of the society.

Any other question.

Q: Brazil, .. Is there a pure soul and an impure soul, or is this just fantasy created by the Bible?
K- There is a pure soul. It's not a fantasy, it's the soul of the Creator. It shall be as part of the soul of Mitra, has been. It shall be. Mankind does not understand in what conjuncture of changes.
Any other question (2:24).

Q: we were taught by Alex
…

K- I have been waiting for 8 years to tell you this Rick, could you move your microphone we can hear your breathing ..
(2:26).
R: plasma soldiers dispersed around the world is it necessary ?
K- We are the soldiers. … Not in physical D, D of the soul.

Since we put these MaGrav systems in prison, the behavior of the prisoners have changed. He said, I am so proud, I called to tell you …
I thought, maybe for the first time the KS who were waiting for power reduction, have come to understand the power of the MaGravs. That a man sees change in the behavior of his prison and the prisoner while the MaGrav systems are there ?? physically. I thought this is now, (2:28). what the new EU are supposed to do, but in a more rapid way. We see the same with the orphanage in Iran ..

.. that center points of connections become the .. wellness centers, and when we build a 1,000 of them around the planet, … our purpose in so many ways, okay you go into the EC to help with your whatever, but our bigger plan it to connect to create that layer which the physicality of this planet has been lacking, and has lead man to kill. If you understand

the game which we have setup to do … this planet is short falling, (2:30). to deliver to all its creatures that they need to kill to lion, man , plants in different shape or form, Now with establishing the EC around the world, which we will strategically choose, we give that dome, the light of the Creator. To change the man that he does not need to kill. Every EC … but the ultimate goal is creating that dome, that in conjunction it becomes ??? one. What this planet could not do from the outset, we support it. When you are dropping the Gans's everywhere you are helping us to ready for the time when we create the dome. You cannot do it by satellite, due to the motion and everything else. We physically fix the satellites, but we know the power of our system. I was explaining to John how important it is to finish the facility in AZ. and extend our work across the planet. .

(2:32).
It's understanding the process of the work. It's the same thing when we build the first CO2 centers.

(2:34).

Q: .. Have we now come full circle and are we now on our return source, the Creator, which we are part of .. when you say the earth is slowly moving back towards the sun. (2:36). is this our connection to the Creator, our creator a return to where we come from?
K- That is a physical condition of the earth. We live the physicality on the earth, but the STM on the point of departure takes its position in different D in the U. We are always … depending on what we have done, the way forward, towards, or on the way, away from the source. If you follow the rules of Zoroaster, you get there in a smoother way, by enlightenment, not by the D of physicality. You see the man is like a child who sits on the lap of the father and he gets all the love, and he always thinks, I have not received enough, and he always blames the father for his own greed. Man is that way. When our religious leaders explained to the man the heaven and hell, a position in respect to the Creator, we will not wait to burn in one, and have honey and whatever in the other. It's very interesting how man has conditioned himself. You always want to be closer, but you don't realize you are part of the closeness. In may teachings I referred to … maybe now it comes to sense. (2:38). We come to understand that we are positioned, we position ourselves. We come to be part of, according to our own decisions, according to what we do. We are in that position of the mind frame of understanding the totality. We create conditions. When we create conditions without expectations, then we see different, than when we create conditions with expectations. As a man to elevate we should never expect, to create a condition for the others to elevate easier.
Any other question.

R; if we could get Jalal in here
K- My god we'll be here till tonight. .. Hi Jalal, how are you. you are doing a beautiful job. Let me before you start. Be in public, We will call upon a number of KS like you, (2:40). to become the teachers in the new institute in Austria. We hope those we call upon will respond positively. We hope to see you as part of the structure of the new science and T in sharing knowledge the way you do. I thank you for it, your teaching is amazing.

In so may ways, KS find out what they never really understood, but they need to understand, but in a very, what do you call it, a strange way. ..
Q: Why Mr. Keshe you always bring tears to my eyes.
K- I don't know, maybe because we come from the same part of the world, we are too sentimental.
Q: we are here to serve in a way
K-
Q: About the orphanage, .. is it the time to release the video about the orphanage. Because really it is the time to release that video.
K- We have the video, .. I have to ask .. the situation from the people in Tehran. We have to get their authorization to do this. .. (2:42). let me ask, I cannot tell you yes, because we have the videos, but the people in charge have to tell us, in Tehran.
Q: Do I need a suitcase .. to be part.
K- .. depends if your wife gives you a suitcase, if she puts you at the door. Go I have enough of you.
Q: I am already near the door ..
K- We are going through the process.
We need to teach masses in a new way. .. it's so much the classroom to be live, that anybody can go into any classroom. That the knowledge is not kept by one or two people in that research in that group. As we do not carry patents anymore, as it is the openness of the time, we have to move into the next step of the science and technological advantages we have now, to share knowledge like this. My view is with the new university structure which is coming up, we will spend a lot of money to do it. Is that the classroom has to open to everyone who wants to come into it and learn whatever it is from it. Maybe go to 10 classes, (2:44). in one day and learn a bit from each one and come up with something new.

I've said this many years ago, … when I was invited by the Chinese government in 2007, to China. The that time president, before president Xi, he appointed his personal physician to look after us while we were in China, showing the development progress in China. One of the strangest thing he did, he was a heart surgeon, he said, come to my hospital, my surgery, and we went to the hospital. When I went into his operating room it was different than any operating room I've seen. I've been born and bred in hospitals and everything else. He had an .. operating table in middle of the room, and like an open auditorium where other heart surgeons could sit and watch or the one student. But there were cameras, all focused on this one bed, that other heart surgeons or people doing simultaneous operations all over China could see. So the knowledge of one man was immediately spread across the nation. This is how China progressed so rapidly in a very advantageous ways. That taught me a lot. I remember he saw the impression of me. He said, you're shocked how we Chinese teach millions in one go. In the west you still close your doors that nobody sees. (2:46).

We carry with the same structure, that when you teach, anybody across this planet can tune in and be part of the university, so knowledge cannot be ?? I don't think you'll ever see classes where people sit and be taught, maybe one or two. ..

One of the things KS have to learn is the construction of the brain, construction of the cells. I started this years ago with a KS … that different conditions, the brain, the making of the brain structure of the emotion, and what we call, the situation and condition we could never see how, what gift was given to him. And he claimed he has done nothing. I would like to see in the university, not only building the brain of the man, in the laboratory, in the open space, but interaction of the emotions, how it is created, with the soul which creates that system. Then we understand the interaction of the soul with physicality ?? dying, doesn't matter in what D. If God has created, man can do same, if you understand why. You don't need to clone it, you can make it from scratch. (2:48). It's just understanding the process. This brain structure was in KF laboratory till I left after death of Fabio. But the KS came in, and got stolen by, all the affairs we'll seen in past year and a half, around the KF, making sure does not come, the knowledge. The ignorance of abuse, brought the KS to abuse of himself. It's not that we don't teach. We teach, but KS have their own way of working with it. It's very interesting how you as, new angles in teaching, understand the process and interactions, and all side of what I call the politics of the knowledge. You have a lot to do in the new center. It's an open teaching.
Any other question.

… (2:50). A lot of you have to understand, .. we have started taking on KS around the world, and their movement for the KF, what we call, development, which is to come. You got to understand, this is something I always opposed, but now you see we are getting into what we have done, and want to do. KS getting into position with KF, with their families. As long it brings unity of the family, not for one to achieve one, is the beauty of it. Now we see KS as a family, working within the KF … We don't split, but we bring more closer. This was one of my objectives, that become the cornerstone, of bringing mankind together, then splitting. It's nice to see the way, especially around Linz, and other positions, we see this happening. Understanding this will change a lot of things for KS. …
Thank you for today.

… Please do not think just because you are a KS, (2:52). KF has to take you up. Maybe you have the expertise, but not at this moment for us to utilize it. Maybe in the coming future, but do not give up.

Thank you .. see you next week …

406 KSW Nov 11, 2021

(2:54).

END

407th Knowledge Seekers Workshop; November 18, 2021

Note: Transcription has not been checked by KF. Please listen to original recording. (Transcription by KF Brazil)

Humanity on death row, lethal injection, attached to physicality
Call all KS to connect souls become 1 STM to prevent demise ..

Going deeper into Pl of STM past fear to the peace

Questions:

Teaching about making Gans of poisons

Location of STM in brain - MRI black dot ; center in back where neural system starts …

(1:21). (Near Death Experience) Why do you see light when you think you are dying - so peaceful. Where does D come from, gives teaching on it ; STP goes toward STM passes different emotions, light from interaction of STP & STM - peaceful ; transition of detachment . go both ways .. point of death or point of transmutation ; EU to do this .. (1:26).

Why Islam is against going to moon

(1:44). About Inca or South American cities disappeared (glorified S America tribes disappeared) .. Water shortage.
You see the Infinity Loop everywhere; knowledge is there but … there is a knowledge we want to keep away from mankind at moment - not ready; Some of the races of man went through non-physical detachment - like space race leaned to travel. even in Africa

Mankind has not always been what you see today.

Expensive car manufacturing can't get Chips, rare earth. purposely set to damage European economy.

(1:54) .Controlling through war - now controlling through "Energy Packs" , reaching every central bank in world. Why we took the love of God from Rothschild's family for suffering caused to many people .. Wealth has to be used to bring joy … they thought they won - no. they have lost the case. this wealth should have been used to raise STM.

People with Titanium plates using EU

(2:03). New style of MaGrav from KF Iran factory - it's very different than other MaGrav can use it for any shape of form. put a MaGrav next to a tree, it will light up.

Walk near to MaGrav see light. in patent . you only need light for vision, not to see object.

.. (2:21). governments try ways to control .. pressurizes then drops off , new ways of control

ENGLISH TRANSCRIPTION

(:06). K- … We welcome you back to another program sharing knowledge and becoming Knowledge Seekers (KS), irrespective of our culture, religion, faith, and every other things, that we might be separated ourselves, to be separate from the other. The thing of it is, when we all go to space we all become "man of earth," they do not know China, Iran, or America, or Iraq. We go out together in understanding, and more or less cultivating a new ways, of what we call knowledge. The beauty of it is, we have to learn as a human race, that we are as strange to them, as they are strange to us. We have our ways of doing things, .. getting to places, and they have their own. It does not mean they are more advanced, .. they are behind us. It means we are all part of the evolution of the knowledge of the creation, it's part of what we owe, different stages of that knowledge.

Some who, or being created, long before us, through taking a different path, have passed us to understand the knowledge of the creation. Some who have been ahead of us, are still behind us, because they have not managed to unravel the realities of the creation. Then there are different races of the Creator in different dimensions (D), and understanding, and knowledge, and enlightenment. So we have to learn, one of the first things is, (:08). how will we come to be, and what we have to do. In the openness of the U, to respect life. In the essence of the creation, .. understanding the totality. There is always a way, that we think we do not know, and there is always the way, that we think we know. But we think, because we have that knowledge we are inferior or superior to the others around us. This has to be understood by all of us, that once we are entering the U Community, with the open eyes of knowing we are in a new society of the U. It's no different, we are all in the same packages of the processes of the creation. For us, how we communicate, .. understand, .. interact will come out of understanding of the totality.

Many creations, and created things of the Creator have not even understood the existence of their souls. Have not understood what it means to be part of, what the teachings you have had, and at the same time they have been taught, that to be elevated to that position. It doesn't make you any different. It doesn't make you to be more enlightened, and more arrogant, or does it make you to be enlightened and be humble.

In so many ways, we have to become to understand, whatever we are, wherever we appear, whatever we are part of, we are always part of the creation. We have always to be humble to be there, to learn, and not to be arrogant to be ahead, (:10). to be, "we know."

In the process of the creation, mankind has moved a lot, .. has changed a lot, .. all creatures in the U have changed a lot.

One of the KS .. sent me a video this week, which is to do with Solomon, and this brought back a lot of memories, .. a lot of things, that many of you KS gradually will come to, and then you'll understand, when we say that the knowledge of the man has come to the level of the prophets of the past. That now that you know the existence of your soul, now that you understand the existence of totality, you understand, we understood, how Christ brought life back. But when you go back to beyond it, to the time of Solomon, he used to talk to bird, .. understand the animals, .. every creature. Now we can see how much man has degraded from time of Solomon to Christ. It's the knowledge we have, the knowledge we were created with. He used his soul to communicate with the birds and the bees, to the animals, to understand them. As he was .. Messengers of the Creator. In a way, he understood the levels of creation. He went out not to harm, and not to possess, even though people gathered around him, as armies of his. He never called for an army, he had an army of peace with him, but he understood through the soul.

In a way, (:12). our teaching is taking us back now further to understand the work of Solomon. How he could communicate with birds, .. every entity, and up to now we always talked about it. In a way, the knowledge is within us, knowledge which has always been available to us, but became more and more physical to the level of grasp, that for us, was important for us to see a physical body moving. Where thousands of years before him, Solomon could speak to the birds, could understand them through the soul. He never verbally communicated, but through the interaction of his soul, he could understand. He was already a man of U. He was already a Soul of the Man (STM), and this is what the teachings of nowadays is about. We understood how Christ resurrected, now to understanding more, we try to go further back before man was contaminated with physicality and possession, to the time of Solomon. To understand interaction, .. communication through the STM, not the dimension (D) of physicality of the man.

I am sure if we would have left the mankind to carry on with what it is, in the next few thousand years, mankind would not move, will hold on to everything, and become more and more physical, and possessive. This is part of our understanding, we are not bringing a new teaching, we are taking man to the origin, when he went, he diverted to become more physical, to be more owner of physicality. To be detached. (:14). It was part of the life of him. Now we see how we have degraded ourselves to a lower and lower. We sit to understand more, how did he, how could he, what we, after thousands of years, trying to go back and reach. What was the message, that did he communicate, if he could communicate with the birds and bees, and the animals, how did he communicate with his army? How could he, when he could understand the animals and the rest, could be ignorant of the existence of the emotions and the life of his soldiers? The people who came to be with him, be part of his, what we call, "knowledge seekers" of the day, to understand more about the creation. What happened to all that knowledge, how much did Solomon pass on? To make what I call, "creatures of the U" out of the man, and they could not understand at that time.

So in a way, now that you become to close, to understand the work of your soul, in communication and interaction then you come to understand you have moved up, backwards, in the race of man, to the time of Solomon, through interaction, through understanding, to comprehending the emotion of another, with not talking, but by the interaction of the souls. So we are not teaching you something new. As all of you have been entangled with these teachings for past months and years, (:16). with us, now you understand, in a way, we're taking man back to his own history, timeline reversed. It's not back to the future, it's to understand the time of the past, that it has become the future. The U hasn't stopped as man has become more physical, the work of the Creator, as the man has taken the greed to possess and own more.

As we see nowadays with our leaders, they want to possess everything, and then you see those who are behind our leaders, who want to be the possessors and controlling even the leaders. Why? What is the reason? Why do we see this evolution now, in the process of the creation? What do the Rothschild's, bend backwards, in trying to control humanity, by finance, by every means. But they have not understood, that the work of the Creator goes beyond them. The knowledge they might gain somewhere, or got somewhere to show they can, they will not be able to, because the path of it is the wrong way. They chose, what the gift was given to them, to be used in the wrong way. The greed of the physicality took over the knowledge, of the physicality of the man's achievement.

This is the part of the job, that many of you will start questioning yourselves. In the time to come, and the time, which is here, many of you have faced, are facing, with a position of, "shall I take, (:18). or shall I not take," and what would it do to me, and what would I have to do? In a way, when you accept these new, what I call, "cycle of control," you are facing one thing. You ever been on the death row, by injection? That is the position of man. In a way, the new cycle is putting you on the table with yourself. "Do I accept the injection, and take the consequences of death," sitting on what I call, "the death row."

This is what you have to understand, how fast we can move from the D of physicality and the D of the soul, that no physical injection can harm the man. How fast you can see, and read the understanding of the thoughts of the others, that you can be safe in respect to your own life. Many KS asked me in the past few months, "what shall we do?" In a way, I can not tell you what to do, as you are sitting on the death row. This is the total reality of it. It all depends when the saturation gets to the point. When your body cannot respond. And then, in that point, like many of you who have been through the motion, and emotion of the cancer, you judge your life. What have I achieved, what have I done? What is my, what I call, "legacy." Nowadays, and what we see is about to come, enforcing these, what I call, (:20). "body structure changes," will make you think.

But we have to understand what is behind. This is why we said, we took the "love of God" from Rothschild's. Everyone of them will die in the most painful way man can do. They'll become a name in the history in a very short time, as they took the wrong path. As they went the wrong way. This was not supposed to be. The knowledge and whatever was given, was supposed to be for the benefit of mankind. Don't forget when we took the love of God from the tribe of Moses, because of what they did to Christ, they became

nomads. They lost their home, and they spread around the world, and every where they became the curse of humanity.

Maybe now you understand what is about, what is to come. In a way, with this position and the time, and the time of man, we make you think. We make you to understand, do I want to be, and what will be of me? Do I want to move in the D of the soul, or do I stay in D of physicality? How many of you will elevate to that position in the coming time. How many of you will come to understand the strength of your soul, you'll come to see. (:22). We create with the love of man. We create with the creation of the love of God. In so many ways, the love of man has become part of his own demise, for loving so much, with tangibility and physicality of the man. Maybe today I opened a door for you to see what is to come, not for humanity, but for yourself. How you assess the life to be, how you assess, I want to be. I take the jab, but would I sit and wait, "nothing happens," or it will be my demise. As I said to one of the politicians .. we are all on the execution table of injection.

The way it used to be done on the death row in America. With the difference, that the leaders have exempted themselves, from to be part of it. All the rules and regulations done for you, to safeguard you, is not applicable to the world leaders. We have come to understand in the past few days, that the governors and governments, and the leaders are exempt from injection. Why? This is part of the structure of life, and if it is so, how could they survive without it, where the others have to have it. This brings you to understanding in a deeper way.

That we will face, (:24). the same dilemma in the depth of space. We will have this on our table in the coming time. We will have to make these decisions in the depth of space, shall I go out, and the packages of the energy are above my strength of my soul, or the strength of my physicality, or the strength of my Soul of Physicality (STP). How would I handle it, how do I deal with it. Am I taking that step. In understanding this, makes you conscious to understand your soul.

The way I look at it, is that, the position, that more or less all of us are facing today, is the time to bring collectively, humanity to a new level of understanding. To bring man collectively to decide, and to assess what is the future of our race. What is, and how are we going to do, to what extent? What will be the outcome of all this mayhem we see? Or are we going through a cycle, that we are embedded with the D of the knowledge, that they will decide when to switch on, and when to switch off. We have one way to think, and that way, is for all of us as a human race, to start to understand the D of the soul, the interaction of the soul, how we achieve that level, and how to interact and trigger, (:26). the phase of understanding of the ?? motion of the souls of the man. Don't forget in the teachings of the past we have talked about this very clearly. Where you take the STP within the STM, and when the danger is over you can release it back to, become part of the new situation and the place.

What happens if you are about to fall off a cliff, and then you change your D, to D of the soul, and then that light, then will land on the same cliff, then what happens, you reverse

the time? Would you be any different, than the body, which was free falling off the cliff. In a way, when you jumped you had brown eyes and black hair, and when come back would it still be the same, or would it be the wishes, that you wanted always to have blues eyes and be blond. Which one will take over, which D will appear in front of you? Would your loves ones, which watched you to go down, seeing you going down as a black hair, and brown eyes, appear in blond hair and blue eyes. But you still speak the memories of what you had. Would they recognize you? Would they accept you? Then it will come to the point to understand, mankind is on the verge of understanding the totality of the creation, .. to understand about his own creation. (:28). This is part of the teaching, trying to understand part of it.

Go back and listen to the American teaching with Alex, unknowingly, he has touched very soft, but to something fundamental, which we have been trying to teach you, but you do not hear. Go back and understand what you have missed in past teachings, that you have not managed up to now to achieve, to interact with your soul. Go back to the teachings of the past 2 years and understand more, in what you have missed to understand the totality of the knowledge. Sentimentality does not pay nowadays, you have to be realistic, you have to understand in totality, if I can do, if I can convert, if I can go within my soul to become the D, can I teach it to my child, .. lover, .. my father and brother. Where the brother is the totality of the human race. In a way, we are going back, we are teaching you to go back to the time of Solomon. Don't talk, listen and understand. Is not your job to change the others, you're there available, if they need to take that change.

As I said, execution by lethal injection has been the tradition, which we have seen in the US, and in some of the states today, I believe it's still carried out. (:30). Have we all become the criminals. Or our crime has been, that we have not understood the essence of the creation of our soul, and this is the payback time. Where we have to mature, and we missed it. Where have to understand, that no injection can touch us, where we can convert from the STP to the STM and appear again, then whatever rumors, that it does this and it does that, and it kills this way, and that kills that way, that's how the guy dies on the injection table by the execution in a prison. We don't need to analyze it, because even the man there, if he understands and elevates his soul, the injections of the poisons given to him to execute him, by enlightening his soul will have no effect on him. Because he is enlightened, because he has understood the ways of his misconduct, and will walk off that table as a new man.

Would this be the response of the humanity after the mayhem we are going through. Would it be the time that man will elevate himself to understand more. Would it be that we needed this to create a new cycle of people, who understand the totality of the creation. When you are on that bed everything goes through the head, even the STM. The reality with many of you, in the physical D is, that the life has become more physical, and more physical, (:32). as you see on the screen, we are developing more and more T for you to see that blue light, to see that light of life, through the what I call, "these systems." To enlighten your soul, to bring a new D. To understand the reality about the creation that the physicality will have no meaning, unless you give it the meaning. The touch of love, the touch of loving a partner, the touch of understanding the smell and beauty of a flower,

or an animal. The new systems are there to bring that emotion, that understanding, that what I call, the "end," the light, the way most of us see ourselves at the position of death. Do we need to die. Do we need to be afraid of what this and that, does to us, or do we go through a new process of creation? I have taught you many systems, now I talk to enlighten, for you to find a system, in your own structure of creation, a collection, maybe what we call interface or adaptor between the STP and the STM, then you become not afraid of any packages of energy, or anything that might enter your body at the time.

In so many ways, we are mixing too many things, without separating too many things. We are creating too many conditions, (:34). without actually understanding the condition, which we have created for ourselves. We are becoming more physical, then what we are asking for, literally, is to go back to the time of Solomon, to go back before him, go back to the time of Mitra and Zoroaster. Go back to the time of the Creator and understanding of the totality. The word, "I made man in the image of Myself," is not only in D of the ?? life, but is in D enlightenment too. It's us who has to find that, in the D of physicality, and in the D of understanding the light. We are not part of something which has no meaning, and we are not there just to be there. We are part of the process, we are the hinges of connecting one part to the other. At the same time we are one and the other. As we interact, we interconnect, and we become part of the structure. Maybe in the coming time, maybe in understanding the totality, with the introduction of the new knowledge, new ways, new tools, we can show you, to become better drivers of your soul, better interactor between the STP and the STM.

They asked the Creator a question, "Are you perfect." He said, "how can I be perfect when I cannot, and I see, and I create imperfection in my creatures, and created." (:36). In so may paths taken to create always the perfection, has become even a pain to the Creator. What can you do if you understand, even your creator understand the limitation of dimensions of existence. Mankind slowly will come to understand, the answer to the question, "are you perfect." And even what is perfect, one created, but by Him has to be perfect, to be continuous, to be the cycle of creation in totality. We have never spoken in the voice and language of the Creator, but soon you all hear that, as you have heard in the past times. It's for you to understand the totality, .. the totality of the creation in the D of man's soul, as itself is part of cycle of regeneration and interaction of the fields of the U. It's not that our soul will stay, just because we died. Our soul has a life span, and in that life span, has to decide where it wants to be part of, and what it wants to be part of. Mankind has reached a point of decision making, and in a way, (:38). before it was them, now it's all. With what we see, and what is on, and what is to come. How much more humanity will go the path of physicality.

We took the love of God from Rothschild's, because of their misconduct. We took the love of God from Jews, and out of them came the misconduct of Rothschild's. For this we abolish both at the same time. What this means, it means mankind has been put to a test, not to fail, but to more understand the cycle of the generation of the soul and the interaction of the STP, by totality, put together in one D. The purpose of the cycle and the pains you go through, in this part of the life of this planet, is to unify the STM as one. As you all, at the same time have come to suffer through the hand of the man. When it was

an earthquake, it was somewhere there, when it was a hurricane it was somewhere there, it had nothing to do with me. It was just a piece of news, now the hurricane is sitting on all of us. This hurricane is not, who is going to come out of it well, and who does not.

In fact, it is for the man to unite collectively, in that hurricane, to hold hands, to become one, to be able to stand till this hurricane is over. Mankind will not do it in the D of the physicality, but mankind can do it through the D of, (:40). the interaction of what we call, "hold on to" through the souls. This is what we call upon the KS, to understand and to start acting upon. We ask you to water every Sunday. Many of you, you watered on a Sunday, at lunch time and dinner time. Now we give you a new path. Maybe you'll understand. Instead of watering as a whole, as you all do, and you shall (continue to) do. Now we try to unite each others soul.

Try to make the soul of the humanity through the KS, to the level that no one can touch the physicality of the embodiment of the human race. Even though they come in different names, and different shapes, and colors, and whatever. What I call upon the KS is very simple. We are facing a demise, and collective, collection, and interaction of the STM, with other creatures, which we love and carry at home, or outside, in whatever shape or form, be the plant or whatever. Try to find a time, try to find a place, try to be on regular basis to unite on D of the soul, that mankind elevates the soul of the totality, and we can weather this animosity, and this what I call, horrendous time, which is imposed by those who thought, have the power of the finance, and the power to do so.

Choose a time, go back to the time where all of you are at a point of what I call, (:42). "collective calmness." This time don't spread the water of Gans's, spread your soul. Interact and unite, that in totality we make a new race out of the STM. This is part of the purposes of the KF teaching, unification of the souls, that in space and beyond, we are interacted, we are all one, and we all manifest as one.

This is the only way that all of you, and many of you will survive this hurricane, which is now blowing across the winds, and the planet, and beyond. We are suffering, with what we see is happening to mankind, but we understand the solidarity, and unification of the STM is the key, then once you unite, you will not harm each other as you use part of it, to be harmed. Then we go back to the point of One Planet ONOR, in a way, One Soul. This is the only way the human race will weather this situation, what we see at the moment on this planet. And this is the only way, that we see the demise of those who financed such a painful cycle for so many. But we have to understand, when a nation works together, the leaders have no power. Even though they protected themselves beyond the castles, and the walls and everything else. (:44).

In so many ways, mankind has to come to the point of understanding the test of what is come now, is not in a way, individual, it's to unite the human race. This is the opportunity for KS, to extend the position and the possession of the work of the soul, to become one. Choose a time, that all of you the way you do on Sundays, is the time of uniting the STM. Then you understand. Don't go there for a second till the water of the can is finished, stay there, that all the cans, can stay full all the time. Never be of those who say, "I give." Be

there to be taken and allow, and give the permit to be taken from you, if there is a need. No one shall die from no foreign body entry, on what we call, "the table of execution by injection." As it is, the tradition of the states, in US. This way you enhance, this way the soul of the mankind will become strong enough to protect the STP of those who want to be there. No man will, no physicality shall be demised, if the KS understand the whole purpose of this work. Try to understand, try to organize yourself, to become, to be as a soul, and then, (:46). instead of the same time once a week, extend it to all time, the whole year around. Because many of you soon will travel into the depth of the U, and you cannot wait until the Sunday at 6 o'clock comes, and I am in trouble and today is Sunday, 9 o'clock. I have to wait a week in the depth of the space, that the STM might be there to help.

The planet earth shall shine like a star, where the soul of its citizens will shine to all those who are created within the structure of the STP. You will see, and you will understand soon. There is no time, better than, when mankind sits, and he has no time to do, with the religion and time, what we call, different path. We advise Wednesday 6 o'clock CET, in the evening and the morning, where all the nations around the world will come together in the soul. Where it has nothing to do with no religion, and nothing to do with a path of thinking. In so many paths mankind has created to be separate and to be better. Six o'clock Wednesday, CET is time when man is equal and the same. Unite your souls and you understand, extend the souls. Do not sit there, "I don't feel," because you are not in touch with it. You just make the physicality available for the time of change. You understand, that totality sits within the strength of the STM, (:48). as one race, not man as one individual.

Let them throw what they like at us, as we are much stronger, then it feels like a pin thrown at a giant. The giant is the unification of the STM, together, to become one. To unite for the betterment of humanity, and while you are in that position, elevate the STM in totality. Become those individual MaGravs, which they link to each other, to change the totality. We call it a cluster MaGrav, if you remember to go back that far, put 1, 2 or 3, that collectively you reduce, and you contribute to the what I call, "the wealth of the house." Now those MaGravs is your soul, and with it comes the control of it, which is the STP. Maybe after a few days, choose a Tuesday to do the same, and then a Monday, and then, everything else, which goes with it. Then extend it to all times, all the time. When I am not, somebody else is there. It's not a clockwork, it's understanding the clock never stops, and never works without understanding the totality.

We come to this point to be here, not just by accident. But as I said, when you don't do it, we force you. And when we force you, you kick. (:50). But when you do it, you act it. We didn't create the condition of, what is today, but we have the opportunity by the misconduct of the others, for you to be understanding the totality, and in a way, we make the best out of their mistakes. We see this behavior. I come from blood of Moses, through my mother. But I am ashamed to carry that blood, when I see the same thing happens again and again. We saw what Moses did, to those who gave him food and water, and grow him up. We saw what happened with the state of Israel, by giving land and everything, they became the same as the, what I call, the bloodline. And we've seen the

same with Rothschild's, where the wealth was given, instead of bringing peace and betterment of man, they chose to go the wrong way. Now they receive their term - the end. This has been the same, in the same blood, and that shall end.

But with it we don't suffer to say we done the wrong to, we've been done wrong to, and bla, bla. But we use it as an opportunity to bring mankind to understand, to unify the STM, to create, that One Nation OR, and with the STM, and the soul of the planet, to be one. Where one race is the same as, one planet's soul. Then this planet will shine beyond the D, and become the center of the U, (:52). and the possession and the position of the Creator. Then the whole of the U shall see for the first time the presence of the Creator. Maybe it is too far for you to understand, but it is like a light, and a sun, for us, as we know what is about to come. Soon you will understand. It's not being there just to abuse, it had to be there, to help to support.

One of the turning points for me, was when I saw the picture of Rothschild's walking with Mao Zedong in a garden in the hills in China. Then I realized, even what we see today as an empire, of what we call, the power of China, still sits in the hand of Rothschild's, and how they have abused everything beyond. We take the love of God from every soul of that bloodline. Soon you shall see. Instead of uniting, they create a condition, that they can create wars, create conflict, and then with it, try to create a condition of power.

They created war, the U Council became more powerful, and they ?? stuck with us. Now it's the responsibility of the U Council, the same, to stand, to bring all this mayhem to an end. Gradually, step by step we are opening the responsibility of the souls of the members of the U Council, and it's within your power to bring the change. You've been given that power, when you physically brought your soul, which was chosen to support the changes, was made available. (:54).

The true members of the U Council have within their power to bring an end to this mayhem, but in a way, it's the key to uniting the mankind, to bring the soul of the planet, which is the man's life, with the soul of his physicality, which is the planet itself. One race, one planet, one soul, this is the fundamental act for the manifestation of the Creator. Maybe many of you will understand soon, why earth has been chosen. The old Chinese proverb says, suffering makes the man think, thinking makes the man wise, and the wisdom makes the man rich, and the mankind is going through that process. Become wise and become rich to be the harvest, the home, and the base of the Creator. Where He'll manifest itself in both D. This is, was the promise, and shall be kept.

We are not prophets, we are enlightened, that knows the path of the Creator, to its destination. We are those who carried the torch, that the path is full, in understanding of the knowledge, for the Creator to find, to be, and to find peace across the U. (:56). We are torches of enlightenment, not Messengers. We are universal, as we see the whole path for the Creator, to understand, for those who have created the position, and the position of Him, as to be part of the same.

Maybe today you understand the purpose of the KF, on the name or whatever, you have come to a new ?? , you have come to those who understand, will come to be. We still work in the D of physicality, but we have a D, that today for the first time we unraveled and revealed. Maybe today many of you will come to understand the purpose of our work. Do not listen to the word, but understand the intellect, and the purpose behind it, and then you'll be enlightened.

I end the teaching now, because if you understood what was said, you have understood what is to come, and what gift has been given to man, through the power of U Council, and to understand their responsibility to be correct. Now you understand why those who were misconducted have left the Council, and the core of those who are there to serve, stays, and will grow. It's your responsibility to elevate your soul, and not wait for a handout. It's your responsibility to come to understand the work of the creation and the Creator. (:58). Then it is your responsibility to understand, the whole structure will move from this planet to beyond, for the whole of the Unicose.

This is why we said, the new generation will have the whole soul, and the STP together, that they'll be learned, by the rest of the, what it call, "created" things across the U. The soul of the Creator, and the soul of Mitra in the D of physicality will come together, and mankind will move into a new D, as One Nation OPOR, as the nation of the man, is the nation of the Creator. Soon you'll understand, and with that, you'll elevate your souls to the point that nothing can touch you, as you are part of, what I call, "understanding and enlightened to the facts, and the realities of the creation." Thank you for today. In so many ways, today's teaching is a what I call, watershed, for separation of the man, to a good man, and not just for a few, but for all. Thank you for being here, and I hope you will understand, or understood. Rick can we break … (1:00).

>> **Proofed to here** >>

>> BREAK >> 407 KSW Nov 18, 2021 (1:06).

QUESTIONS:

Q: … Could you please advise if we make a Gans of a poisonous element, how shall we use it to receive the antidote effect, how not to harm the body with such Gans, is there some recommendations on using it? Shall we make 2 patches of it, then it will move the fields through the body? Still if these are fields of some toxic element, how can we be sure it won't harm our body. Could you please advise, if we make a Gans of a mushroom,

which attacks the body, could such Gans help our body to become clean of the mushroom?
K- There are different ways of approaching this, and the KF has looked at this many times. (1:08). There is an essence of the understanding what a poison is. In a way, when you take a poison from a living thing like a snake, or .. from what I call, a parasite, like a mushroom, it's 2 different ways. It's understanding how the energy is absorbed, and what energy they absorb. It's not an antidote, it's the knowledge of the fields which they deliver. When we receive a bite from a snake which can kill, why does it travel through the body so fast? What does it effect, how can you stop, how can you reverse. How can you be there to bring a change. We have tested and many times we have shown, that it cannot be treated as you do with viruses because it has the element of amino acid (AA) ?? Your essential structure is to over come the poison, by a process of what we call, "attachment - but detachment," from the AA. Many of you (1:10). work with understanding of the connection, with the poisons, with everything else. When you use a poison, as what I call, interaction with another poison, you never us the CO2, except in some special cases. You make sure there is no connection with AA, because you try to separate the AA connection with the body, which is traveling fast. You try to disconnect from the connection. In these cases you have to understand what a poison does. A poison in the body which creates cramp, or paralyses or whatever, it changes salt content of the body. You've seen it, when you change the salt, you get different structure of Gans's, you get different energy transfer. When you are facing the poisons on these levels, you use whatever you think is the basis of the poison and salt, but you make sure you do not use the AA, except in the condition of understanding how the AA was created in the conjunction with the process of the creation of that tissue muscle.

408th Knowledge Seekers Workshop; November 25, 2021

Note: Transcription has not been checked by KF. Please listen to original recording. (Transcription by KF Brazil)

Expansions of KF worldwide, universities, Institutes, Enhancement centers, Calling on KS to be part of KF universities and research, KS responsible to elevate souls of negotiators In Vienna to bring out technology, Produce 100% pure radioactive material to go to space; Field Replication Units; Hydrogen Plasma Energy; Concentrate on elevation of souls of 5plus1 negotiators, to bring the change.

Quick Index:
KF starts institutes for research, first year 300 KS will be paid; 1000 research groups by 5 years; Keep ethos - families stay together; 1,000 Enhancement Centers across the world; 30 factories setup in 2022; 5plus1 peace negotiations in Vienna; Mr. Keshe on stand-by in Vienna; Universal Council and KS job to elevate the soul of the negotiators and leaders; Ridiculous to sanction for 3-5% when we have achieved 100% pure radioactive

enrichment for space technology; First time shows video inside Exhibition Center Linz; 5plus1 members will visit center in Linz; KF flag - Iranian flags next to American flag; Raise soul of negotiators to truth of new technology and share equally across planet;

Teaching: Enhancement Units will show man both STP and STM; STM continually makes plasma explosions like the sun; Left and Right brain have to merge into a single brain structure; Soul has to react to both sides emotionally; STP and STM work as one not 2 halves; physicality does not need to die - soul embraces it; Birth of Mitra will create a balanced field shape for the brain; Emotions created out of interaction between STP and STM; Emotions come inwards and feel peace - see the light; STP can go within the STM and create a new D of life; STP matures to accept becoming part of STM; Electron enters proton; Paper on "Inter-atomic fusion"; Selected number of mankind will go through this phase - ignite the totality of the change; Souls amongst you will teach you - part of Soul of Mitra; EU are for elevating the STP to see STM; Depends how much reality you have to face; Using the fields of your own soul instead of Gans's; Races in space who have matured physicality have thin bodies; Drop of soul to create fish or the man - in to the fish tank; Called "resurrection"; K carries a box of creatures of the U with him; Different salinity creates races of man - organs - etc; Cataracts change salinity of eye; Brings out Replication Unit early - soul has matured to receive knowledge; Understanding intention and the soul; You are the Replication Unit; Just look at a cow and be fed without eating; We already replicate on emotional level - why not physically; RU is Holy Grail; Uprising of Belgium's to take over KF dismiss K; Changed the chairs - cup of love - revolt converts to spreading of T worldwide; Criteria for transferring a soul and then elevating it; Mitra is the orange carries all strengths of creation and Creator - we are the Cups to receive; Mitra enlightens through the soul; Mitra's soul is the soul to bring the change; Soul of Creator is already replicated within us - but we are blind; Mitra is the lover - Romeo and Juliet; Take from Creator give back - point of balance; Material world have vibration - Pl is interaction of fields; Why this planet 50 Hertz?; All KS together create a spectrum of field strengths to match with the different negotiators and leaders - covers the lot; Elevation is already being done through Mitra; human race is about to mature; Now we have the communications connecting whole planet; Those who work for KF will be taught the ethos; Love of the knowledge - love peace; To take soul out of body is most joyful thing; Lots about hydrogen (H) plasma energy >>> Convert H into energy before using - doesn't damage environment ;
Man has been taught beyond transmutation of elements to transmutation of energy; matter to energy > plasma transport > back to new matter; This is the key for mankind. Breakthrough comes when negotiators see how wrong they have been.

ENGLISH TRANSCRIPTION

(:09).
K- .. About the institute, is that very soon, the institute from a .. virtual phase, will go into the reality phase, as we are setting up of the structure of the institute as a teaching

organization, as a, what we call part of the work of the what the KF is setup to do. That the next generation will have universities, have buildings to go and do tests, and a lot of other things. One of the things that which we are considering, and is in progress, is most probably by January, we ask you to submit projects for research for 3 years, to the KF. With it a team of specialists and a number of Knowledge Seekers (KS) who are first, understand the work of the KF, will assess these projects, and then you'll be invited to bring a team together, to do the research in KF .. institute buildings.

In a way, from January on, the company of the KF institute will invite research programs within the university, you'll be paid a salary, and the team you put together will be the same. You'll be employed to research for a period of 3 years, maximum, and we invite up to the first year, contractually, to 300 people. Then in the second and third year the numbers increases to 500 research group, and by the 5th year we increase to 1,000 research group. Which means if you had an idea, (:12). if you have a concept that you can work, and our assessment team assesses, that we can support such a thing, you'll be invited in to start working. Then you'll get a backup of the KF administration, to support you in every way, to reach that point of research & development.

I am not a follower, and I don't believe in giving one man given a chance to do whatever, in the lab as 1 year PhD. Because the knowledge has to be shared, and you are asked to bring in as a team at least 3 to 5 people, each team, that you are not isolated on doing 1 paper, or doing 1 research on my own. Collectively you have to bring in, at least 3 to 5 KS from around the world, be it professors, be it the others, on a full time basis into university, into institute.

We are not in institute teaching from the basics of the what we call, the T, we want those who are innovative, and they can bring and they would like to do research, in any part. There is a financial setup for it, that it will be budgeted for your group in 3 years, with all the equipment you need, and all the salaries that you take, and then we see how the development goes. If it expands more and you achieve a better result, then you expected, or we see a position of change and development, you'll be put into what is normally called, as spin-off, but we call it additional researches program, which means it will be given the structure, just do the research, (:14). put a management around you, to develop this into a .. full scale application.

KF has set this up in a beautiful way, in a .. planned structure, we hope by next September, accommodations for this in major cities like Vienna, in AZ, Tehran, will take shape. Which means in 3 centers at least, we'll start this processes. But your projects have to be meaningful. It's not just doing something for .. just to see if it works. It has to show it has a progress, .. an end coming. and this will be advertised across all the universities, space institutes around the world. KS are not privileged, just because they are KS. We will bring from all over the world, a budget, for each project is set to take shape, 1 - 2 million. Instead of you dong something and then finding somebody to finance it, that it can go further, we reverse the position. We budget the finances for that project from day 1, and the funds will be locked. You are responsible for it.

This way you don't have worries about how things might go, with it we have a budget. Each year we can support so many projects. With it we allow from the beginning the process of achievement to succeed, not if the results comes, then we succeed. (:16). You have to make a team of at least 3 to 5 people, and then you get the backing of the KF management team, which is getting put together, to oversee your work. You're just being involved in the R&D, and the funds for it, from day 1 will be in the account of the research group.

This is the departure because we would like to achieve very fast developments for the institute, that with it, we can extract the talented ones into the next steps of the further .. space T development. The KF very soon will announce, you'll see it, and you'll be dealing with .. limited company, with a full responsibility for everything else. Then the spin-off, as part of our intellectual rights, signed a different part of the KF, and different companies around the KF, will be spread into .. application.

We invite you to join KF institutes as researchers, many of you would like to do research. The fees for the … the salaries are in line with the management structure. Which means we don't give a little as is traditional, just for you to do research and have something to live, we treat you as a finished end doctorate position, that you work with comfort. You can support your family, you don't have to worry about other things.

KF has had this tradition, but now we do it directly inside and outside. We did that in Ghana, when we paid the first graduates, (:18). fees, and wages, and parallel to the European wages, and we ran into problems with the Ghanaian ministers, that their students were earning more than the ministers. We go back this time, we find our finance from inside your work. Think about it, talk to each other. You have to be relocated, which means if you work in AZ institute, you have move to the institute in AZ with your family.

I don't believe just because you do research you have to be broken up from your family. Whole family, that is what KF is to make, one family from the whole nations. How will we breakup a family for a father or mother, to go away do a research for 2 or 3 years and commuting back and forth or whatever. This has to stop. So we work as one structure. We consider these before we take you up, how much does it cost us to support a family. You can bring your husband or wife into the work of the university or institute, talent or whatever, that you become one. This is the whole purpose, and I set this structure that way.

It's important for us to keep this ethos going. Even today the KF, number of the individuals who have joined us we brought their partners in to be able to be even a part time, to work together, to keep the family together. We have now a number of families now joined the KF in this process. It's the whole ethos of us, we are not there to make profit, we are there to bring the change, because the profit is the happiness, and the way we bring T out, and the way we can spread it.

KF institute will start, (:20). receiving applications from you and we have told other people who work with us, the scientists who want to do the research or do the paper, they do it inside. We bring them in, with their teams from the universities, .. space universities, and education centers. So please think about it. You have an idea, we don't look if you have a BSC, or you have a masters, or you are a PhD, or you're a housewife, or whatever. The thought which counts, in the U. It's the talent, which counts and not the papers, which man has made with, what I call, ridiculous names to it.

This is vital for all of us. We have a structure set for university, the company is set up by the KF, will become part of the subsidiary of the KF Austria, as Austria becomes the headquarters of the KF international work. AZ goes under the leadership of John, and in Tehran goes under Josef. The structure we set and all that will be separately financed by the KF, as a whole to start a new structure. In a way, whatever you do become research papers, that gets published in your name, and we want to change the condition of the work. Most of the people who work around the KF they know we don't work 9 to 5. We work the way we enjoy, 5 to 9, in a way, work never stops. We always are there to support, and this is the way we want to change it, because the new cycle of life, working is a pleasure, .. a comfort, we don't need to worry about how it is, the things, as I said, is a leadership, that has to change things, (:22). and we are setting that up. We set the structure for it to go.

So if you are a person who thinks, there is a talent, or an idea, we send it to 3 or 5 KS what you think, and how you see it to progress, and get a positive answer, then it is your job to setup your structure to join in. We see this structure to be in position by September of next year. In a way, for you to start around that time. We have structured it, we have financed it through the KF, and through private financing, that there is no need to wait, "something might happen." I set the structure of this to see how it works, a couple of years ago with Knowledge Seekers (KS), which we said we give them a budget, and I wanted to see how KS worked with each other in different groups, and how they structured it. Some of these groups are very talented, we have earmarked them. We invite you to come in, to work as a KS, if you want, to carry on with those researches,. But this is in the coming months, after January when we turn back into full operations as next 10 20 days is by the Christmas and most of the western world goes into hibernation in getting joyful with the birth of Christ.

The other point that we have to bring up, is the structure of the setting of 1000 Enhancement Centers (EC), Wellness centers across the world. This process is in process of being completed, most probably by .. mid February, then we announce so many Wellness centers around the world, for the following month. Because we have to tune it, (:24). with .. manufacturing production rates, with all the systems. This will go like this with 5 or 10 cities per month, to be announced ahead. We mass flow, we don't just open one place and wait for the others. As fast as China Construction can build the centers for us around the world, we tell them we can support so many centers. Now we have gone into the rhythm of doing this.

The next thing is the Water Power Production Systems, which many of you've seen, we started in Ghana, we had a good run of it, we understand the process. And then water purification, and water directly to be used the way we tried in Ghana will come into operation. We setup about 30 factories here and around the world to be done in 2022. We have brought in a massive capital investment into the KF, and now we bring the management to control it, the financial structure to monitor it, and to see the development of the KF, through its own institutes and universities.

Think about this and see where you want to be part of. We are not in to make profit, we are in to make the profit to work for all of us in different ways. In 2022 - 2023 we'll start structuring the first space centers, which means, what will come to be the flight path systems, and the development of the flight path T. This comes on the back end of the June & July, and finances for this has already been sorted to come into operation.

The KF as of 2022, becomes an international structure and with the companies and organizations, which we have, we'll back, to become the center. (:26). So think about it, and see where you want to be. It's not that you are going to become millionaires and billionaires on the back of the KF, I hope you do. But KF is there to make an international what we call, presentation, on this but in a very rapid understanding progress of development.

On the other hand we go back to what, last night the Universal Council organized what we call, "to support the 5plus1 peace talks in Vienna." I am in Vienna on a standby, as a backup end of the peace talks, to what we see, to bring the change. In support of the Iranian government and Iranian nation, to support, to show the reality with the whole situation, not the false fabrication. This is one of the problems that negotiators will face, in how to handle the facts, and not the fakes. As we said, we've seen how world leaders use pictures of even KF, to create mayhem, and lies, and deception. It's our job as KF to show the system we built is for peace, and not what it has been put forward by some world leaders, as a tool of war.

As I said to the members of the UC, in a meeting yesterday. Up to now we supported you, we taught you how to support your physicality with machines, then we gave you the position to opportunity to bring the world peace, (:28). which, with the soul of the wishes of the KF, and UC, and the KS we have achieved that point. Now we come back to front, I do the physical work of handling the governments, it's your job as the KS, to raise the soul of the world leaders, who are involved in this, and behind this, to understand the merger of the new T, which changes everything.

As I said last night, and to Iranian and American officials, it's ridiculous when Iran is sanctioned for, being put pressure under, for not going more than 3 to 5% enrichment that, they might create nuclear bomb. Where in the KF T we need a 100% pure enrichment of any material, that when we use it in space, instead of ending in A, we don't end in B, because we tanked the wrong fuel, wrong energy combination.

Now you understand the dilemma the world leaders are facing, and this is where the KF takes the leadership in the world. We are sanctioning a nation for not reaching 3 to 5% above, that they might make a nuclear bomb, the same nation in research centers, is developing 100% pure plutonium, uranium, to be able to achieve perfect flight.

This is where the dilemma sits. This is where you as KS are not there to unite, as I said yesterday to the meeting, but to enlighten the negotiators, to see the reality, the change. Then we take the next step. We sat here for 3 days, the Iranian team has arrived, the Americans and the rest are all sitting here. There is going to be a negotiation, and Iran will not produce a nuclear bomb. (:30). Iran never needed, because now we have a T which we have to enrich. Americans, Chinese, S Americans, S Africans every nation, whose is going to be developing into the space T, of future, has to have capability to produce 100% pure radioactive, of high quality materials, to be able to be in the space race.

We cannot say we are the only ones who have it, nobody else can come into space. With the knowledge we have brought all the nations, because you are from every nation on this teaching, have we become part of the space T, and 5 nations cannot say, you cannot have 100% pure material, because you cannot go to space, because we are the only one who can be. Use your monkey suits, use your what I call, "fire-crackers" and stick to it.

The world has changed, and this is what I told you, we need you as KS to raise the soul, to elevate the soul of the negotiators, to see that, how embarrassing situation Iran is sitting in. If you remember Iranian leadership, this year, in 10th February released our name. My name, in fact, the name of the KF, as the knowledge which was used, as the Pl T that the man can go to the moon in 1 minute.

So we need to raise, what I call, understanding, the soul of the negotiators, even the Iranian negotiators, that the game has changed. This Mickey Mouse game, that you are going to have something, and then they say, you can't have it, you are going to be punished, has to come to an end. Because the reality, and the fact of it is, what are you fighting for? (:32). What are our world leaders fighting for, when you sit and see the most advanced T is sitting within the hand, within the grasp of the KF.

In so many ways, what I call, the new plutonium, uranium production unit is sitting right in the center of the KF Exhibition. They are fighting for 3 - 5% enrichment, we can give you 100% enrichment. We tune our systems to produce, .. to be, what I call, in accessible to produce, and as I said, last night, and as I showed last night, we are not hoping to achieve, we have already achieved this fundamental change. What is interesting, as I said last night, (shows materials produced by EU) the proof of the pudding is in eating it. This system knowledge, produces materials. You can even tune to what isotopes in matter state we need.

But you have to understand in EU materials we don't make the matter to go back into a Gans, we can produce the Gans of the plutonium directly, which becomes an energy directly. In reality, .. all of you understood the fact, that all of us, as KS, have been sitting

on the most advanced nuclear reactor for space T in, (:34). .. the KF. You've seen in different ways, and different applications, for years the KF nuclear based total .. flight systems, have been sitting in the centers, we are not going to show, we are not going to have, we already have the knowledge. So we can deliver it. This is part of what I said and I keep on emphasizing , the KF has the capability, as the KS to bring that change, .. that beauty of the knowledge, that our governments, or what I call, people who think they are governing, are not deluded with 3% enrichment.

What are we going to do when we produce, .. the enrichment. What are we going to when we achieve 100% and then, do we need to dilute it to keep some people happy. Do we need to understand the process of change? Do we need centrifuges which costs millions, and that it takes more time and millions to produce 1 kg of the plutonium or uranium in a matter state. Then we have the beauty of the new T and knowledge. What it is, what is important for all of us, is to understand the beauty of the new knowledge. Where we bring the change. (:36). Where we are in control of the change. Where what we do will bring that change. As KS we are responsible for it. As KS we are there to make sure, it can be shown. The steps in development of the T is huge, .. in what is achieved is huge.

In so many ways, what we have is change of course. We've done the production of materials. We've done everything possible. Now it's the job of the KS to enhance the soul of leaders, the decision makers, that what they are sanctioning one, for very little of it, we are delivering one, for very little of it. Rick I sent you a video … maybe for the first time you see the inside fully, of the KF EC, and the center piece is the two Iranian nuclear reactors for the space T development. In a way, we bring it forward, we change the position, and direction, and D, that we can show the changes. This is what we need to bring as .. a program, the work of the KS and the KF, and us, in this situation we are in, in Vienna. Rick have you received .. for the first time you'll see ..
..
Plays video .. you can play the sound, .. (:38). it's addressed to the Iranian leader, AK of Iran. This is a private collection which shows the power of Iran in negotiations. ..

(plays video ..) shows reactors in Linz KF . You can see the Iranian leadership is fully aware what is happening, and what we are. This is important for the KF to show the power of the knowledge we carry. This is the KF in collectiveness of .. change of position in the knowledge of man. You see the 4 nuclear reactors, which we are familiar with now, is the center point for discussion in .. Vienna. You can see how beautiful this center is. This is the first time what you see, is recorded for his eminence AK of Iran, the Iranian leadership. To understand how we are going to handle the new knowledge and T. Is a beautiful center and we wanted for the first time, you as KS, and the Iranian leadership, and I am sure the American leadership, to see the beauty of the inside of what we call, the nuclear reactor, which needs the pure material, 100% pure plutonium and uranium. If the Americans want to stick to 3 - 5% how can we negotiate it for the same nation that produces 100%. Because we want to go to space with you. (:40). This is where the intellectual right comes in. Where the T in exchange for peace comes in. Where the beauty of the whole structure of the change, which all of us as KS have set.

You can play it again, because I think, you have to understand the changes which have come. Slowly I explain to you. You see the Body Enhancement Unit (EU) in the background. You see the Vertical EU, what you see at the same time, immediately, the 2 Iranian space reactors, nuclear based plasma T. You see in the background the Matter EU, matter production unit. On the left of these 2 white steel ones, are the Defense T, this is where the Americans got wiped out in Iraq. The T blocks, absorbs, and carries a high density field. Then as you see the EU, you see the VEU, .. in a distance the new Brain EU, which is sitting, and standing in the exhibition, ready to fly to AZ. You see the knowledge of the KF in the spaceship center is there. If you look above, on top of the pictures, you see silver domes, the spaceship it is on top, these are like the old fashioned, what we called, rocket propulsions, which lights into .. the Exhibition Center (EC). Downstairs are the conference rooms, and .. the television center, and the rest of it. We have set a beautiful center for world leaders to see, understand, and to enjoy. You see the background the step by step, the books, the Gans's, the Cup of Life, the agriculture unit .. (:42). The knowledge of the KF has been centralized in changing the world.

World leaders and .. the members of the "5plus1" will come into this building in the next few days, to see the change. To understand how graceful the nation of Iran and Iranian leadership has been, not to abuse access to this knowledge, ?? and trying to prove their a superpower. In fact, the Iranian scientists are superior in every aspect in knowledge of the space and defense, but never they spoke with it.

This is part of our work in these negotiations, to show, to bring, not fame, but to bring to attention of the world leaders, while you think you are on top, you are actually on the bottom pit of knowledge of the space. You can still see the rockets above, and below you can see such a small things can bring such a big change.

It is our job, . responsibility as KS to understand the change, .. how delicately, how beautifully we can bring that change. We can change through our knowledge and nothing else. We have to understand where we stand, not how we've been hammered, that we are this and that. Once one of the largest organization in the financial world, wrote recently, as I said, "they can write whatever they like on Internet, but we know what sits there, and what has to come out." (:44). We have the T and the knowledge to push through for world peace, and we'll use 5plus1, as a what we call, the spring board for the change. You fight in the conference for 3 & 5%, you'll negotiate for 100% with Iran on the other hand. The two doesn't work.

There is a need for understanding, .. for elevation of the soul of the members of the 5plus1, which is now, they come to your hand. You wished for the peace, we achieved world peace. We don't see wars, even if they try to start a war, the governments will stamp it down, because there is no weapons for it to go. because they can't even move soldiers.

We went for what we call, "health" situation to dominate. Now we see even in this picture in the background, the EU for Corona and the rest. If you play this video from the beginning you'll see in the background, something very interesting, that maybe you have

missed. … You see all the latest T in the space development, and then with one flick you might see something in .. stop it there, you just see it in the background, a little. The what we call, the VEU, which was shown originally in past. You see the Corona suits … ..then you just see the edge of the black vertical EU.

Everything, the knowledge of the KF, (:46). sits in the EC. We sit, we change, to bring the changes. We have set the scene for one of the most prestigious centers, for the world leaders to come in. It has been set. In the past few days. As I have shown you before, and I explained to .. in the American teaching, a beautiful picture of the collection of how we sit, how we do things, and how we expect to change on the same banner, on the same structure, on the same wave for many of you which might, or would like to see the change.

The understanding of the work of the KF, comes from inside, from our strength of knowledge, from the strength of the T, and we will bring this. In so many ways, to show we have no boundaries. KF knowledge and T belongs to all of us, irrespective of the boundaries which man has made on this planet. We bring peace through sharing the knowledge equally. As you have seen, and many of you are aware of our work. We stand to bring the change, .. that change in a beautiful way for all of us. For our children irrespective of borders, nationality, or race. We share clearly our knowledge with everyone, and it's your job to bring that position into the front. (:48).

In many ways, we work hard, we play hard. We have paid heavily with our work, with what we done to keep the knowledge and KF, all of us in the front. This is what we stand for. It is what the KF as a whole becomes One Nation OP on the different banners and names we have chosen to be, and how we decide to change this, it depends how much we believe in our work, that we can bring that change, that we can change the situation in a different way than we thought. In a way, much, across this planet work, that we as KS make sure, that the flag of the KF stands proud wherever we might work, .. be, irrespective of what we are.

We've become the symbols of peace, .. the KS of peace, and many people don't like it. But with the Corona situation today, nobody has a choice. We are trapped in this dilemma. Sooner or later we will come out of it. We will show that, in so many ways, we have changed the scene.

This is the EC in Vienna, the flag of Iran as a center of the knowledge, not a nation, stands next to an Austrian flag, in an Austrian .. EC. (:50). We go to US where the flag of Iran stands next to the American flag, irrespective of the position. But what reads on the wall in the center explains itself. "One Planet ON OR bringing peace through T." This is the work of many of us. We see the same thing in the KF manufacturing in Iran, where we share the same in AZ. And then the same in China, .. Mexico, and many more factories will come. Even in Iran the flag of the KF stands next to the Iranian flag.

It's taken 50 years of work to be able to see this. And very soon in the coming months we'll see more flags of nations, where the flag of the knowledge, bears the flag of what I

call, peace. We are all in an essence, "one KS" and the collective knowledge of us, brings peace to all of us, and then makes us citizens of the U. We sit equal irrespective of the flag we stand next to. The flags are just a symbol, but what is inside us counts as one, (:52). and we invite you to raise the soul of what I call, the negotiators to see the difference between the old and the new, and how we got stuck in the old version, and with it brought many sufferings, and wars to many places for no reason.

I hope, I brought you home to see where we stand, where the KF KS in .. every corner of the world stand, irrespective of flag, and what we are proud to be. You call yourself, "I come from US, from such a state." In the space you say, "I come from earth, from such an area, Iran, Iraq, China, and then would they know. "Can you show us what it is, where it is." How come you changed so much in so little space, for such a time things were rotating in the space.

Then the beauty comes in diversity and this is in fact, if you look, the beauty in diversity. We have put have put position, that we are ready to share the T with all nations, irrespective of color, race and religion. Nothing puts it in better way, than what you see in AZ. Hopefully we'll bring that change. It needs the back end now, which is, as I said, your exercise to raise the soul of the leaders and the negotiators to see how foolish it is. Which end are we going to negotiate, 3% nuclear or 100% space. And we sanction Iran for 3%, and we have to work with Iran for 100%, doesn't make sense. (:54).

It needs a lot of pride to be swallowed, and a lot of joy to see where the change comes. In our talks in negotiating teams, in Iran will emphasize on this, right through, with all the nations. It's the responsibility of the Iranian negotiators to be enlightened, with what they have, and not get involved with the dogmas of the religion, and what the path of belief is, like the others. I hope, I brought you some understanding of where the KF stands, and as we are in Vienna pushing for the start of the negotiations, to be the right way from the beginning, you support us as KS, to bring that space, and the time and the place. As we always said, "we are proud to be correct humans," and then let's see what the rest comes.

TEACHING STARTS HERE >>

In the teaching of today, we go back to the essence of what we talked, and what we set up, in understanding the totality of the knowledge. Understanding that how we can bring the position of the physical D of the man, into the position of interaction of with the Soul of the Man (STM), interaction with the essence of our creation. Many of you have a dilemma, how to bring the soul in line with what we call, the physicality. Where does it start and where does it end. In one of the EU you've seen in the background, (:56). such a facility for you to know both souls is set. It's there for you to understand and see how you can connect the 2 together, that one is not a stranger to the other.

As part of the work of this process, it is essential to understand the process of conversion. If you understand this, you have handled half of the problems, what does this mean, you have a soul, with a massive energy, like a sun, sitting in the center of your body, and it

has to all the time, adjust itself in releasing, with a kindness with its own structure, that brings the possibility, that the Soul of the Physicality (STP) can interact with it.

If you've been to previous teachings, the biggest problem for our soul, is to be kind, is to be, in a way, structure itself, as what we've seen on the surface of the sun. We see huge plasma (Pl) explosions, we see little Pl mountains. The STM continuously does this. But these eruptions, and these ups and downs goes, in interaction with the fields coming from the STP of the man, (:58). will give the right emotion, the right feeling, in a way across the brain ..

As I said, once before, it's very complicated, how this sun, this soul, has to behave. This is your right brain, or this is your L brain side, looking at your soul. This has to handle the physicality, and this has to handle this physicality, because it's the way it's structured. You can imagine, on one hand you are holding a ball of fire in your hand burning, and on the other hand, you are holding the hand of your lover. How does this soul inside reacts, and what does it produce, that either one, has its own emotion and own feeling, what radiation it radiates, that you see and you understand.

Controlling this, is part of what you have to understand about the creation. Eruption on what end, and joy and happiness, on the other. When you can control the totality of the emotion in a balanced field, then you will create in a way, a totality of one field with a physicality. (1:00). Then you will understand the 2 emotions become one, and this is the time when the man will take shape to see as one. Is not 2 parts, it's not left and right. It's when you understand this, is the time when you are ready to take in to the next step, because this, at that point, will shine, and will grow out, and it becomes one. The fields of, not the Pl of. Then in interaction of these fields, with the other souls, will give you the what we call, the emotions, the understanding, the interaction with the soul of the mother, the brother, friend, somebody from the other part of the U, and many other things.

The what we call, prophets of God, what we saw with Solomon, is interaction of these fields, and nothing else. It's understanding this process, and nothing else. It's becoming part of, and nothing else. It's being part of and nothing else. In so many ways, we have to be able to understand the process of creation and nothing else.

In the new EU we are set to do this, we are set to create that condition, .. to bring the .. the change needed for this purpose. This is .. , (1:02). what we asked U Council to bring the STM into this position, that the knowledge of seeing the totality, will bring the change to individuals. In the ?? middle of that center, is the collective soul of the Universal Council, and outside is the collective STM.

Now maybe you can see how we try to bring the things together, how we try to iron out, what have been discrepancies in understanding the existence of both for the man. Where the STP and STM, work as one, not in 2 halves, not in the right and the left. This takes the dimension (D) of bringing what you have, the physicality of the man, into the position of totality of the man. Where the physicality does not need to die, but the totality of the soul embraces it. This is what we will see, many of you, when you enter the EU.

Many of you. There is a system here which we have not shown, and it's not in public domain to see yet. But advertised in a different way, for the horizontal EU. In those units you'll come in touch with your own soul and the STP, because then you have to handle it. Then you have to understand why do I have the cancer of prostate? Why do I have the cancer of breast, and what have I caused, what have I done to myself. Do I need the elevation of my soul, that the STP reaches and sees enough, (1:04). to change the D, that there is no cancer. Then you understand the progress, the development of how you first have to understand the composition, and the way you are built inside, that you can understand, how you can change the outside.

The biggest problem for man is the 2 hemisphere brain, and part of our problem with bringing the human race out of physicality into D of the soul, is the physical structure of the brain. With the birth of Mitra, we look forward to the change in the process, that the brain .. in the due time, will take a balanced shape field, that is aware, and in the space will decide, on this side, at the strength, to be this shape. On this side, on earth to be the man. And on this side on the planet, whatever, be what it allows it to exist. Mankind has to learn the two phase, the two part, the STP interaction with what we call, the creation of the emotions, has to be brought into the surrounding area of the STM, that what happens, the outside does not exist. This is what happens to you at the point of physical death of today, as I explained before last week, as your emotions from outside will take shape, and comes forward in, (1:06). and you see, and then it becomes a peaceful place, then you see the light. It's the time when you are directly, as a physical soul of physicality, in touch, in front, of what I call, your creator.

The choice is very simple, to become again, the STP within the structure, or allow the STM to exist, and bring the STP within it. Then in the future, how you want to manifest yourself, it will come this point (from STM). It's understanding the knowledge it's the process, that you elevate the STP to become mature enough in the strength, to be able to accept, to become part of. Then go back and read the paper written about "inter-atomic fusion,' where it is not about atoms. It's about how you can bring the STP inside the STM, an electron to become part, within the structure of the new .. proton, to create a new D of life. We think the mankind is ready for this transition. We think mankind in selected numbers, gradually will phase through this, and will see beyond it. (1:08). There are a few souls around the KF which have reached, and are about to reach that point of maturity. They will see, and through them they will ignite the totality of the change.

In a way, we have brought souls to teach you, and these souls are amongst you, these souls will come, because they know they are part of the soul, and interaction of the Soul of Mitra. They become the teachers, some of them silent, some of them verbal, some of them the combination of the two. The time of Gans making, and Nano coating, and understanding the Gans's and Pl fields, was to bring you to this point. Then when you come to that point, the interaction of the fields of your body, it dictates to you, how you'll manifest, you change the Pl to the matter state. Conversion and transition between the matter states and energy. The what we call, maturity of the man. The end of the what we

call, "the final day," when the man matures to the totality of the conversion of the two. Not in matter state, but in the state of understanding the totality of the knowledge.

The process of elevation of the STP, to see the STM, through the EU, (1:10). is already been set. It depends how much of it you need, it depends how much of the reality you have to face. If you remember, I used to tell you, go back to some of the teachings, especially those of you who have been in the medical teachings, where always we said to the people, that use our T for their wellness. When we used to give them a system, they always used to say, "how long do I have to use it?" We always said, "you will know when the time comes," and after a few weeks, and when they used to come and say, "sorry, I have a problem, I forgot to use it." "Or this week I forgot 2 or 3 time to use it." To them it was something they did wrong, but to us, was that the Soul of the Physicality (STP), was elevated to the point, that they didn't need support of the systems anymore. Then I said, it's okay, you can bring the system back and we destroy it. Because we brought the STM in a D of his physicality to be elevated, that the STM could not see any fault with it. It was elevated enough.

Those days we used to use magnets. Nowadays you use Gans's. And today you use the fields of your own soul. It's the same fields, (1:12). but according to your intelligence, you release the knowledge. Physical magnet, D of the Gans's, now the D of the fields on their own without Gans's. Because you have seen one, you built trust in the other. When you go into the EU, we can still create those "volcanic eruptions," within one part or the other, if you decide so, because the STP needs adjustment through the brain and the emotion, that it all becomes one.

When you travel the depth of the space, and you come to those who have matured in the D of physicality, you'll see very strange structure, and when you are reporting, that you've seen what we call, very thin bodies, and whatever, or very thin structures, when you look into their physical brain, they are very nicely set, it's all one (brain is not in 2 halves), and when they release fields equal, the shape becomes very different, and because of the gravitational field of the earth, they take this shape. If I change the field next door, and they walk into it, because I changed the D of this, the soul will take a new D and shape, and you will see it. They might become like this. (1:14). It's not a magic, it's understanding the interaction of the fields. Many of you will have that problem,

Now maybe for the first time I can explain to you the fish tank. There I explained before, maybe you understand, when I said, when I drop, a drop of water into the water tank, you shall see the fish. I don't drop, a drop of water of the physicality. I drop a Pl of the soul of the fish, and the water, and the shape of the tank, will create the fish. Now you understand, I can drop the STM within the water, and you shall see, the man shall be created from it. Because the strength of the soul of the fish, is different than the strength of the STM. That's all it is, it's not magic, it's understanding the way the magic is done, the science behind it.

This in the New Testament is called, the resurrection. (1:16). I can resurrect you anywhere. The salinity of the water, is the salinity of the womb of the mother. It has no

choice but to create the man. The salinity of the water here, is the salinity of the fish, sweet water fish, or ocean fish have different salinity. Now you understand, how I have been telling you for years, I have been carrying a box of creatures with me, because I did not make the creatures, I allowed their souls to be created where they want to be. For the body of the man to exist in the atmospheric condition of this planet, it needs a specific salinity, and with it, it manifests itself black, white, Chinese, yellow skinned, white skinned and the rest.

This is what the man needs to understand, and this fish tank, in so many ways, if you understood it fully, is the fish tank of the Universe. The way in the different salinity of the body of the man, you get kidney and the others, in the salinity of the U, you get the different creatures , according to the interaction of the conversion of the fields to observing condition, or attaching condition of the man, (1:18). or the creatures of the point. When something is invisible to you, is very visible to me, because my eye has a different salinity of water in it, that, that liquid decides. When we see cataract, when we see people who loose their visions, they loose it or change it, it's not just because, just that, it's the water salinity inside the change, that the structure outside has to change to fit it. It's like as I said, we change the temperature inside, you get the moisture on the wall, or you get the ice on the window. It's the same. When we reverse a cataract, all we do, we change the water within, salinity of the eye, and then because it the changes, it doesn't need that blanket. If you understand the knowledge, the rest is there to be done. I hope I shared some knowledge of the creation with you, and gradually you as KS will translate this, and transfer it, and comprehend it, share it with the others, the way they will understand.

Thank you for the teaching part of the day Rick if you want to go on a break. Krashmere will show some things .. (1:20).

<<< **BREAK** >> 408 KSW Nov 25th 2021

(1:26). Krashmere presents Christmas Bundle for KF manufacturing .. (1:28)

(1:52). (1:54).

Q: Comment I am very happy to be with all of you. Germany Bavaria .

Q: Mehranez , … (1:56). .. talks about her experience …

(2:02).

Q: Jefferson, what do you have for animals ..
(2:06).
K- Thank you. We are all doing our best to bring the change ..
Any questions

Q: .. Can you expand on the use of the replication unit. In what ways can it be applied?
(2:08)

K- Replication units have a lot of usage. We tried to keep away from it, in so many ways, till KS become more, gain more confidence in its application and its use. The field replication units will change drastically, in next maybe 3 - 6 months. Maybe sooner, maybe later, depends on how the KF, and sits to plan out for future developments. Field replication units are prelude to many advanced T, extremely advanced T. I have kept it away from the teachings, deliberately till everyone, or majority of the KS, and in a way the world population is ready for such a change. There is something very strange that many of you have not paid attention to. From the time the field replication units was put out, out of the teachings, and then some KS understood it, and tried it, and it worked. (2:10). Is in fact, very straight forward, but very complicated question to ask, and only I've seen only 1 or 2 Chinese students. When I was in China, KS have understood small part of it, but they couldn't understand to expand it. Ask yourself a simple question, and ask yourself a very deep question about this replication unit.

I wanted to bring this into teaching, maybe next year, but you asked a question it means a soul has been enlightened, and it's our job to enlighten the soul of the others. When you look at the replication unit (RU), whatever they can, and you put an orange here, and you get the taste, the feel of the orange.

Ask yourself another question, you want to show this thing, how it works to a friend of you who is standing next to you watching the cup. You explain to him, that fields of the orange comes in, and then you can interact. Something very strange, the friend stands here with a glass of whisky, (2:12). and in the other hand he has a ham sandwich. Then you give a cup to your friend to drink, and he says, "yes, I felt the taste of the orange and everything else." But the question to ask you is, you're standing in the same environment, how come he only tastes the orange and not the whisky and not the ham? You taste the same water, and you say, yes I taste the orange, but you never speak about the ham, and you never get drunk with the whisky. Why?

The reason for this, is what we call the process of the intention and the soul. Would you get drunk if you put the glass of alcohol, (2:14). the whisky over here too? And would you taste the ham & cheese in the drink. In a way, if you look at it, you had your juice, .. food, and your drink. Full dinner served, but why do you only go for the orange.

Then if you understand this process, then you go into the next phase of development of new cycle of understanding intention. Many times I pass in the lab, and in the …

packaging, and I see these things sent out by the dispatch unit, and they fill these vouchers and I say, "when are these KS going to become wise to see the truth." This is why I always tell you, you are the cup. If you go a step further, you are emerged in the cup, even with the Soul of the Creator. Then you understand why I say, 80% of the food we eat, is from the environment, and 20% we physically chew. (2:16).

These are the RU, it's for you to understand you are the cup, you are the replicator, but you have to understand how to get to it, how to use it, where to put the orange, .. whisky, .. sandwich. Then can I hold an orange, and taste it without eating it? Can I look at the cow, and enjoy, "nice rump steak." I would like a stew of the tail, and I would like the tongue, but you don't touch the animal. Is there something in the D of us by the point of intention, and expansion of the soul. Or is it, we still bundled, as I say, in the world of physicality, and we become ignorant to facts and realities of what these cups carry. Now who would like to be the field replicator? We know the field replication, we take, when it comes to emotion. But we refuse to do it in the physical D. We see somebody sad, our body, our emotion, which is again a replicator, absorbs it, and we cry because they cry. They laugh, we laugh.

We have managed to replicate the emotion, in a way, in the tank, in the saltwater of our body, but somehow mankind, when it comes to the matter state, has a bit of a problem to understand. Now, come you are choosy in what you replicate, (2:18). and how come you don't elevate the understanding, that you replicate, and then you see what the difference is. Is intention by D of what I call, strength of the STP, then you tap into the STP, to the environment and not with the STM. Where with the emotion you play with both. Now you can imagine what you can do with your field replicators. Would you look at a cup, and put field replicators (FR) around it, and you say I love you and everything else, and give it to your wife, says, drink it, I brought you a water. And when she drinks it, the way she tasted the orange, would she taste your love, .. your affection. Isn't that the Holy Grail? Now try to understand, what you can do with the FR. Do you want a field of an orange, or do you like to have a field of peace?

KS have been with me, and I put them through this without them knowing. (2:20). I gave them with love and affection, and then they change without them knowing. We had this situation, now you come back years later. Years ago in 2011, around that time, what I call, the uprising, setup by the Belgium's, to destroy the KF in Belgium. We could hear a lot of rumors, that they organized a meeting to depose me from the head of the KF. As we know the guy who died, and the person who left us, the KF, last year or 2, they were instigators behind it in a very hidden way, that we saw it again 2 years ago, the whole plan of what went on, to instigate, to get rid of me as head of the KF, and they become, and then they use the KF as a center of pedophiles for whole of Europe, that they are involved in it. Yes we open this book very soon.

The meeting was called in, and I did not oppose it, because I knew. You know, when Jesus said, "by morning you'll deny me 3 times." I knew what they were up to, and it was all set out deliberately, by the 2 instigators … in the background in very a devious way. I called the meeting in, and the, (2:22). seating of the KF in ?? Nino, was like this, where

if you came in, the chairs were set like this. The stand to talk was here. They all were ready to come to, as I stand here, to start what I call, revolt, to get whatever they wanted to do. I know the work of the fields. I took the chairs out, and I set the chairs like this. They had their instigators, knowing where they sit, that they could do the job. Now the circle was made and I sat amongst them. This way, those who were supposed to be starting the thing, the whole, what I call, the revolution to get rid of Mr. Keshe from the KF, and we do it ourselves, and hand it over to the Belgium pedophile groups, and the Belgium's, headed by the woman we kicked out recently, this and the one who is already gone.

I got up and I went in the kitchen, and I made drinks, and I served them one by one. You call it replication cup, I call it, the "intention of love" cup. What was to become the uprising, it became the whole process of what we call, unity, (2:24). because they felt the touch, the love of the man who was supposed to be their head, serves them. Christ did that with washing the foot. It's not the physical, what you do, it's the intention and the soul, and the beauty you give. And this meeting became the beginning of the growth of the KF so radically around the world.

This is exactly, when I tell you, we need to do this job with the negotiators in Vienna. It will become the uprising for the next cycle of man, generation of peace and unity. In this process we see how we become that cup of replication. We see how we can give a cup of life, not necessarily as a water, but even as a soul, and then to elevate it. We meet the criteria, (2:26). of transferring the soul, and the people around us become the cup, they receive it. But we transfer it with the level of the soul, through the intention to give unconditionally that you can pick from what you need. Then when they pick from one strength, and when it's fulfilled, they go to the next, because you are still here unconditionally giving, and then they go to the next strength, and go to the next strength, till they become part of you. When you give, you don't give one intention, you give the totality of the intention, the totality of the purpose, and it's just filling one, and going to the next one. When you give only one, that's, you're stuck with it, you have to establish the next one.

We see these things, you feel .. understand these things. Then becomes the cup of replication. Mankind is so physical, that he does not see the hidden knowledge we have put behind a lot of the T. Because that is the only way we can reach you. Then in the future maybe some people understand.

One touch makes you to fall in love, one look makes you to give your life for it. One word changes your life, because the word carries that essence of Replication Cup, because it matures you, brings you to the point of understanding. (2:28). When I got up and served tea and drink to the KS in Nino, one thing they had, "the guy is always above us, he is there he shares, and so now we can do." Now that man didn't exist, because he was one of them.

It's understanding the psychology of interaction of the souls, not the physicality, that's where I work with, and that's where most of you are still looking at the replication cup.

This is why I said, it only needs one to change the whole lot. You look at one cup here, and you put an orange and you stand here, and you drink it and taste the orange, what this orange is here, will do if I make many cups around you. Is it only this cup, or is it all enlightened, and receive it. And would it have a different energy and taste, if I change slightly the salinity of each one, while you have your replication units.

Now you understand when I tell you, it needs one to be enlightened, and the rest receive. Is this the reason why I tell you when Mitra comes, she carries all the strength of the creation and the Creator. (2:30). This is what we said, Mitra is the collection of the every strand of the best fields of every creature in the U. So every cup in the U shall be fulfilled, does not matter where. When Mitra comes every strand of every soul ever created, and to be created in the U, is within her. She does not need to talk, because she already enlightens through the soul. She is that orange. It depends if you are emotionally ready to receive it, to fulfill your soul, to fulfill your emotion and physicality.

Don't forget, you asked the question, because it was the time to answer the question. Your soul knows it's the time to ask, and this is the time for a lot of people to understand. In physicality when you go, you see these presidents or PM or people who give a speech, they write a few questions and give it to some audience people, "ask me this question that I can answer." That is to support of us. Or they have been told these are the questions you are going to ask. That piece of paper with us, is a message from our soul to your soul, to ask the question, that it enlightens the rest with the knowledge which is spoken. (2:32).

It means mankind is ready to mature to the next level, by answering the question. Now you understand why and how. I said many times, it takes only one soul to mature, and enlightens the other. Get an orange, make 10 replication cups and taste all of them. Is it only one, which is taste the orange, or all of them taste the orange. And change the salinity and see how the taste changes. Then you understand, irrespective of color and race, religion, and position in the U, you still receive the beauty of the essence of the orange. That orange, that soul, which bring that change, will be both D of physicality and the soul, is the soul of the Mitra, blessed be the name.
Any other question.

Q: .. Can the soul of the Creator be replicated?
K: It's already replicated within you, you are blind to it. (2:34).

R: Could you expand on that ?
K- When we talk about Mitra, Mitra does not collect, or did not collect the rays of every race in the U, the best of, to create her child, her manifestation of physicality. You have to understand, that all these rays came from the Creator. She collected the totality of what she loved, from the best thing of the lover, to create the perfection, that she can feed back, to the lover. Not only I take, I give back, then we are equal in loving each other.

I become the source of manifestation to show your beauty. This is why with the birth of Mitra, we see both, the created, and the Creator within. The soul, and the STP within the tangibility of all. The meeting in the presence of Mitra, is not just that the human race

will see them, but every race will confess to have ?? beauty in their existence, because they are all collected from, the same, the best of. She did not collect from the STP, (2:36). she collected from the soul of created, the best. This is what it is, and we have been waiting for this, for (since) the time of the creation. You call it, the "Adam and Eve," because we could not explain to man before. We gave you different names ?? (Arabic .. Hama) we call it the Sheena ?? in different languages, and Romeo and Juliet in the others. but in essence it's giving life for the beauty, collecting the best of, to show the creation of the Creator.

In so many ways, in term of what we call, scientific way, as I said before, it's the same. We always said, in another way, if you understand it, you go clockwise, and then you go anti-clockwise. Where did you come from? You take from the Creator, and what you get, you give back to the Creator, that you are always equal and in balance, it does not matter where. This is the beauty of the creation. And it is the same at every strength, that's why wherever you go in the U, you'll find every one speaks about the Creator and Mitra. Point of balance, point of manifestation, (2:38). point of confirmation of the love to give unconditionally.

As you give me unconditionally, I give back, to you unconditionally, for you to give back, and not to have gravity. For me to take back, I have to receive it from you, to have that gravity back. As I said many times in the teaching, if you are on this side and it comes to you, you are gravitated to, when you are on this side., you are the giver, M, but if you are the Creator, you are there, what about if you are the created? It's the same, but in a different direction, but in essence they are all the same balance. I made man to the image of myself, which means I created Mitra to be me, as a reflection of my own.
Any other question.

Q: .. Is it possible to make a system which allows communication between the physical world and the non-physical world through the adaptation of an electronic circuit through some of the Cup configuration, for example, the Soul Cup or the 5 Cups, and in this way allow people on this physical plane can communicate with souls on a nonphysical plane? (2:40).
K- Make it and we'll see.

The important thing is to understand, in the physical world you work with the vibration. In the soul level you ?? link with the strength of the fields. In a physical world you have to create that ?? atom ?? that is vibration, confirm existence. In the D of the soul, you work with interaction of the fields, which have not reached the position of vibration. They have not reached the environment, that they try to penetrate. So they go through. The frequency ?? mode. This is something that in the future teachings we'll come to it.

If you want to understand the base of it. Why do we have a 50 hertz? Why does it best work around 50 hertz? Why an electron needs to vibrate, (2:42). at us, as an electric current to see it as 50 hertz. What about if the environment we live, works at 100 hertz, or 1 million Hz, or 10 million Hz. What would be the difference in emotion in each one?

Don’t forget still it's the same cup, the Cup of Man. The embodiment of life, man himself.

This is what when we tell you, concentrate and try to, as KS, to elevate the soul of all those who are involved in negotiations in Vienna, because in fact, there is many of them, as I said before, of all backgrounds, different kind of tastes, love, and hate and other things. When (2:44). we ask you, that all of you as KS, to give from your own soul, is because this one field strength of the soul, might be still spreading, but does not fit none to elevate, because it's at a different strength. This one might just about to fit this one, (one from KS to one from negotiators), but misses the others, because it's of the different strength. This one might fit half of this one. And this one might fit this one, but part of it, not all of it. And this one might fill part of the one, which the other one cannot fulfill. But when you collectively put together, you radiate the whole lot, and the elevation is the same, in totality you will fill at least 70 to 80% of it, which is coming from the D of the environment, from the STM.

Now you understand why we ask. It's a collective work to enlighten those, who have not been enlightened to understand it. We have KS, we know for a fact, we have KS in the negotiating teams. KS who learned the knowledge, and they have been brought in, in case Mr. Keshe appears, we can hit. Mr. Keshe comes we can handle. Such and such a minister comes we can handle. (2:46). This is why then, we become in totality, in essence, the totality of us to become knowledgeable to all of it, to become part of the Creators knowledge.

Understanding and transferring the knowledge and the totality, hits very deep if you understand it. In some of my teachings I release some knowledge, you think is a joke, but in reality, hits exactly where it's got to, reaches that soul, and then it creates the next step of what we call, "cycle of motion". In our lives we come across these positions and conditions a lot. It's our awareness, that brings the next cycle of work. How we be, how we can be, how we have to ?? serve to everybody, to change, and to bring that change in. As today's is mainly based on what is going to happen in Vienna in the peace negotiations, is this. Is mainly to target to enlighten the world leaders, (2:48). that we bring the change to totality. We are in that position to bring about the change, .. to bring the difference in the work of that change. This is why and how we set the change through our souls, to understanding, to share, and to give unconditionally, that we can cover part of it.
Any other question.

Q: … If K can put the soul of a fish in a jar and create a fish, then why does he not put the soul of Mitra in the jar, or has he already done it, or are we collectively doing it together.
K- It's already being done, and collectively we'll be elevated by it. It's the time of the maturity, (2:50). and it's the understanding.
Any other question

Q: .. Is it time to celebrate and enlighten the humanity with the positive way, instead of being fearful of what might come. That will create a completely unexpected reality, why postpone paradise?
K- That's all in your hand, nobody else's. That's in the hand of the KS. We are about to reach that point. The human race is about. We have reached the point of maturity, thanks to the present communications. I was talking to one of the KS .. If you've part of it, or some of you are still in it, or you passed it, when I used to work in Congo, and even go back 15 - 20 years ago, when we were students and we wanted to call to speak to our parents in Iran, from England, we had to call a central station, (2:52). to book a time, that they give us only so many minutes, and the lady will call only 3 times, if the other side is not picked up you lost your turn, and you have to make another time 3 - 4 days later, to pick up the phone to speak.

That was the extent of the knowledge and understanding, and how we could share knowledge. Today, even 6 - 7 years ago, when I was for example, in Sierra Leone, and we were in the car with the Ambassador going to a meeting, he pulled the window down, he asked for something, a cigarette or whatever, and he just put his phone, and the other guy puts his phone, and he got the pack and we went. I said, do you know how advanced you are compared to Europe? We don't have this in Europe yet. 2014 when I was the guest of the president of Sierra Leone. We came, if you can imagine 30 years ago, we had to book a time. In Congo when we wanted to speak to our other officers, which were remote we had to book 2 - 3 days in advance, and we used to be there with those clicking machines, "hello, can you hear".

We didn't have the line of communication, now we have. Now you go into Africa, anywhere in the world there is a mobile phone. There are 7 billion of us, and nearly 15 billion telephones. Somewhere, somehow everybody has one, or gets one. The line of communication has made that possible to understand, and to be more involved in.

You go to the American teaching, (2:54). You are lucky if you get 40 - 50 people on a Sunday night, 60 if they push it sometime. This is the most advanced part of the world, and half of them are from the rest of the world. So about maybe a third are Americans, N Americans. You go after this teaching today, to the Vietnamese teaching. Only Vietnamese, I was the only foreigner … and there are 60 - 70 of them. In the remote villages, whatever of the Vietnam, the teaching of the KF is much stronger, than the educated west and everything else.

We see that now the knowledge can be transferred right across, irrespective of position and time, which we didn't have that opportunity before. And now it's time to spread the peace, .. the next cycle. These 60 - 100 people in Vietnam which are there, and there are more of them there, the 20 - 30, which is hundreds more, thousands more, you make that 300 - 400 million, which ?? work or do something through the KF, as One Nation, one family, as one thing, it does not matter it's One Cup.

This is what the purpose is. Now the human race is ready for that change. We are about to get that breakthrough in, as one KS says, "you know Mr. Keshe, if you appear in the

5plus1, the whole future of the KF will change internationally." Is it the time for it, to do? It's not, if the 5plus1 is ready, (2:56). is it the time that our leaders in Iran are ready for the change, that it can allow this change to come in. Even though they know what will be the consequences of such a revolution in T to come form Iran, both in respects of the religion, and in respects of the standing of the T development, and what is to come from it. It's not just one side, we can give as much as, but are they ready to receive, and when they receive it, will they feel the same as we do? And they carry the same emotion?

I see this everyday in our working environment in the factory and the show rooms, and the places we work. You can clearly say who is a KS, and who is somebody here just to earn their money. KS work beyond, to make sure things are done. Wage earners, quarter to 5 they start packing. The KS takes the whole ethos home. The wage earners, 5 o'clock we have nothing to do, we talk about business tomorrow, we are on our time off. We don't go to teach them, .. to reach them because to them it is something, they came, and now they do.

The heads of the KF in China have realized that, and changed the process, like changing the process, (2:58). the workers will be taught first about our ethos. they have to fall in love with the knowledge, then they can work. What the knowledge can bring. Not come here, and that's it, we earn a living and go. This is what we have to change, to fall in love with the peace, .. with the change with what it is going to bring, and then we transfer that cup, you become that orange. We are just about getting ready to make that move. Human race is on the verge of the biggest change in the coming time.
Any other question.

Q: Azar … I just want to have a good understanding of what your teaching was. Because what goes in Macro, also goes in Micro .. you look at the body, location of each organ ..
K- Macro is the Creator, Micro is the man. .. So what's the difference.
Q: When you look at the human body everything is salinity and fields that makes the location and position. When you go to the Unicose the same position is a different place. (3:00). Say I am form Jupiter 2 legs and 10 arms … .
..
K- yeah, but why don't you change yourself to the Chinese, go to China and become a .. South African, and Eskimo, and change yourself to according to what you feel like, according to where you are.
Q: that's going to be easy . ..

K- In a way yes, but in a way, that's the beauty of it. Otherwise God would have created, (3:02). one stamping factory all the same.

We are active interaction of the fields of the U. In a very short time, we gather enough to become the physicality of the man, compared to the whole cycle of the creation, and then it moves on. ..

Can you imagine .. Let's go back and explain something, and then you can understand the scale of how mankind has riddled himself into a lot of problem. If this is the sun and this is the earth, and it takes us 365 days, and we say we live 80 years. Now we go to Saturn, how long does that take? And we live again, the time of earth, 80 years, but here you only live a quarter of a year. Still that 80 years, and in fact only a quarter of the cycle, maybe. Then go back to the next step, you are .. 80 years. now our solar system, still itself is a satellite to another central point, to a star. You're just a tick of a few seconds in the cycle of the .. the sun in respect to this point.

Have you changed anything? Does it change anything in your life, or would you like to move out, (3:04). here and live the cycle of this one, live for 350 years multiplied by 80. Or would you like to go and travel to this D and wait for 1 year of it, and then 80 years of it. 1 million years times 80 (80 million years). Man's life is so insignificant in the cycle of the life of the creation and the U. Because it's the same span of time, nothing has changed, But in the life of the man we always have this bracket, it will not change, it is just the position of what will change. Our 80 years of life, is that much in the cycle life of the creation and we can see what happens in the universe and the rest of it. It's a perception of time, and time does not exist, because we gave that D of creation and time, which we want to give it.

In this cycle of 80 years, on earth you have 2 legs and 2 arms, how would like here … to live that 1 year you have to change D, to preservation of the energy has to be longer, (3:06). here, and here has to be slightly longer.
Q: I have another question .. there are some people the soul comes out, but it doesn't engulf the physicality, it just and then go back in. But how can we make the physicality go inside, and why is it painful?

K- Why do you need it go inside. You embrace it.
Q: What do you mean embrace it?
K- You know, when you see your daughter you embrace her, you don't put her in your pocket do you?
Q: no
K- So it's the same. We have to embrace what we are that it has the freedom to give and to take. Not to capture, even life, even attachment to life.
Q: And when the soul wants to come out, it is very painful, why is that?
K- Who said it's painful? To me it's joyful.
Q: to you. Initially when it wants to come out is it like..
K- No, who says, are you presetting your mind that it will be painful, I don't want to do it. It's the most joyful time, since when the freedom has been painful.
Q: What if it doesn't want to go back in?
K- It's the same, back in where? So it's the same process, it's joyful.
Q: … (3:08).
K- It depends what your perception is, how you understand it. It's how and what you are conditioned to. If you are conditioned to and continuously put on the point of pain, of course you want to escape. But if you are put in the same position but condition of love

you always want to come to it. Depends .. what you expect. When you have a husband who fights you ….

Who says it's painful when you go out, and painful when you go back in? The love of creation has the same emotion in both directions. It's from the point of observer and receiver which does. In Farsi … "one roof and 2 different kinds of weather on same roof". .. (3:10).

Q: (talks …) (3:12). ..
Thank you Mr. Keshe.

K- .. It all depends how we feel and how we go about our lives. It's the beauty of it. How we sit in respect to understanding the totality of it. Part of it goes by expectations.

Any other questions or shall we call it a day. (3:14).

Q: Salomea, Austrian minister was against of getting H by nuclear ..
There is
What is your opinion on it, and how the KF could help on the energetic strategy of the EU?

K- Depends what color H, and what we define hydrogen (H) as, in the KF. H in the KF is defined as an energy source, as a Pl. H in the way they talk is totally for different purpose. They work on a matter energy level, we talk on a Pl energy level which is very different, and it creates different D. I have shown this many times. When we talk about releasing the energy of the Pl of a H, we talk in Giga watts, and without anything to do. (3:16). They talk about H with what energy it does, with all the tools which needs to do it.

In tests we did in China, South China Sea, we see the energy released from little , little balls runs into Megawatts. How much of the H they need, to create such an energy. The understanding of H, the way the European scientists speak, and what they want to do with it, it differs from what we do and how we process things. This is part of our work in the negotiations with 5plus1. 5plus1 is going to be comprehensively discussion, not only about nuclear weapon T, but breakthrough the new S&T and how we can bring it. But how far we can push it is another way. Do we need the H system, that they are talking about now, or do we change the H into its what we call, field strength and we can use it more efficiently, much cleaner, without any damage to .. environment. This is what the whole structure is about. There is not much you can do with it, compared to what we can do with H, there is not much you can do at the present knowledge, (3:18). of what you call scientific level. That's why they have a dilemma.

But when it comes to KF H, we use H in a specific way, a very specific way, to create lift and motion. This is part of the understanding of what you call H. I don't agree with the H, not I don't agree, it's just scientifically with the knowledge we have the talk which is going on about H is totally irrelevant, absolutely irrelevant. We talk about the Pl, a free

condition of it, plasma, and they talk about how to use the matter energy of it. When you talk about the Pl the way we do, then they tell you about the CERN's and everything else. Where we talk about the small balls and their work and their effect. If you look at this picture, these are the Chinese trial test, and when we built this one, if you look at these … reactors … here, you see they are in orange color, if you look at these dynamic reactors, they are slightly lighter. When we finished testing, and we had an incident, (3:20). these were see through. All the Pl of H was gone, there was a clear water. What we had was a surge of energy which we know the damage we created in the environment, and what we did, and you can empty the energy in a different way.

This is what we call the H, these are carrying different mixtures of .. Gans's. The beauty with what you learned as a Gans, is you have already prepared the food, it's just how you are going to use it, .. apply it, .. put it in that you get the maximum effect. To what you combine it with. Are putting in front of, or are you adding to it. They can't do that with the (matter) H at the moment. The dilemma with the H and everything else is so ridicules. It's not ridicules, it's so advanced for the matter state, but they don't know how to solve it. Where with the Pl a child in the second class can do and see the effects of it, and use its energy depending on what .. You add to the C it becomes sugar, in the Pl condition, you call it CH3, natural sugar in the Pl condition. you put it with … opposite to different amounts of itself, you create a wind. In matter state you can't do, You put 100 liters of H in one place and 50 liters, (3:22). of the H in another tank, nothing happens. You put 100 liters in Gans state and 50, you just stand in the wind, M field of it. You already developed, converted the matter to energy. How you want to do it.

If you go into the H, what they talk about, Pl H just for a space. How much H do you need to burn to get to Mars? And how much Pl of Gans do you need to go to Mars. One most probably a few thousand tons, one a few milligrams, because you create that field of that ?? absorption. The knowledge is different. Technology of H today in the matter state is very .. advanced in the matter state, but very backwards when you compare it to what we call, the plasma T.
R: They basically want to burn the H to get the power, just combine it with O. But it's funny, ironic because in your initial reactor O was the one gas you tried to get rid of.
K- You had to get rid of it, otherwise it causes .. it's too cumbersome to handle.
R: It reacts with the H, and very reactive in a vacuum type environment. That's why you have the vacuum pumps to pump out the reactors so much to get rid fo the O. And here the EU wants to combine all that lovely H that you could put to better use., than burn it up.
K- It's part of the development of the T. It's maturity of man understanding more of the same. It's not just exclusive, (3:24). the KF, it's us maturing and .. we play the game with it.
R: Imagine all the reactors you could create with the H they wish to generate.
K- You know if you are experienced with these kind of things, when you buy H to convert it into .. Pl condition. H is the only one which we have a different mechanism over the tanks. With the CO2 , Helium and the others, we , I think I am correct, it's been years since I have used it. You use like a right hand turn to open, to close, and with H you use a left, right hand turn to open. It's just opposite and the mechanism is very different.

In some cases when we go for a high pressure H, and it's amazing when you mix the H, when you allow the system to be filled up with H, you wash it first, and then we go to process of what we call, creating a Pl. Then you see how scientists who have no clue about the way we create the Pl, they start shivering and shaking, that you don't do this with H. This is against the laws of physics. Because we convert the H into its energy level before we use it. We don't burn it, and we allow what is left to, we release in the environment of. (3:26). This is the beauty of working with these kind of things. We are the next step in the science, .. understanding the work of the science. We'll see.

Q: .. People with arms are entwined with the Creator have been waiting for the great encounter of Divine Science, revealed by prophets and sent throughout history as fragments of the totality, with the science of men. The later was established from the beginning as a one way, when each scientists suspected something and then defined the theory, which remained correct until it was disproved and discarded.

Question, did that day come with the science of Pl, or are you the forerunner of the days to come, that divine science and the science of men may be one?
K- It has already become one in the past decade or so. It's just for people to mature to it. KS gradually understanding, developing and the cycle of change is very rapid, in how we will understand what has been taught. As you look at the teachings over past 15 - 20 years, so much knowledge has been released, that it will take man hundreds of years to digest all of it. Maybe thousands of years. (3:28). there is such and such a ??

But in essence, what was the most important thing for mankind to understand was conversion of matter to energy, and energy back to any matter. You even as an energy of the man, we transfer you as a Pl to a position, and then we take you back in another position, and manifest yourself in a different matter. This was the biggest change, and it's in the writing, "the time of .. Man matures when he understands the transmutation of the element." But we have taken the man to the next step, that to understand the transmutation of energy, then you are complete, because the energy, when it reduces in strength becomes matter. It was important, as we seen in the writings, that man matures, when understands transmutation of elements, that you can make the gold out of the Cu, how you change it. In ?? effect is it in a lower level of understanding that ?? transmutation, is how you transfer energies into matter. This was the key, the rest is how you work it, and how you make that Pl, to move from one position to another to become energy, and how you transfer that, how you move it to another position to become matter.

You go from Book 1 to Book 3 and back to Book 1. But one Book is on this planet and the other is, on Jupiter or a position in the U, but in essence once you become energy you can travel anywhere and convert. You don't need, (3:30). you've been taught A to Z, it depends where is A for you, and where is Z for you. The knowledge is complete, it's now how you want to play with it.

Q: I put food and honey between several Cups of Life to take the fields of these foods, and that each being that takes from these waters is energized and nourished. I still do not add fruit for a specific flavor. Is this the same .. as the replication process?

K- I think what maybe, you have to understand a little bit more, or maybe you missed about it, is the emotion of what you want. Go back to the very first time when Alex brought this out, he wanted a … anise in morning, something else, and at night he got drunk so bad. Because he wanted to get drunk at night, it was time (3:32). to rest. So he took that energy from what was already within him. For breakfast he wanted anise, because if you lived in Africa there is nothing more delicious than a Anise first thing in morning .. and the rest.

So in essence it is within us, we already have it. It's how we handle it with our emotion. What do we need to be loved, and then we feel the love. Or do we want to give love, and would the person receive it. Maybe we want to give it. It depends on both sides. On which side of the cup you are. Are you the cup, or are you the man who uses the cup?

Thank you .. for today. This week concentrate on the elevation of the soul of the negotiators in Vienna, because fundamentally it's not only the change in the peace talk, but it's the confirmation of the acceptance of the new T. The breakthrough will come when all nations walk out of these conferences and meetings, admitting to themselves, how wrong we all have been. Some use it for different, and some we use it, to abuse the others. Either way we hope this will, to the negotiators, elevate to understand the new. As I said, my job is on the front line, and your job, this time is from the soul side. (3:34). We reverse the position, we elevated your souls, we gave enough. Now as I said yesterday, it's a time of test. Let's see we brought the peace, now let's see if we can enlighten the leaders of the world, to the change to come. This is the whole purpose of .. 5plus1. We'll let them battle for a few weeks, and then we'll see, which one of them becomes wise to it, through your elevation of their souls.
Thank you .. and hopefully we bring that change sooner than later.
…

409th Knowledge Seekers Workshop; December 2, 2021

Note: Transcription has not been checked by KF. Please listen to original recording. (Transcription by KF Brazil)

Many breaks in this teaching interrupted .. (Mr. Keshe is in Vienna supporting in background 5plus1 negotiations)

Water Fountain story - drops of water returning around

Mankind will be in for biggest surprise with changes that are about to come
Example of man's life like water drop in fountain, continually returns ; time is created ..

Not accepting the abuse

CO2 Capture units make city of light - Gans used for agriculture. new process to dry Gans

Brazil university

New Energy packs to bring Africa in line -- havoc in Northern hemisphere heart attack South African version of this virus to force African nations to take

Where does Mr. Keshe's knowledge come from? Asked if he is shadowed (channeling) like what she believes Jesus was? - He is enlightened to the higher knowledge- Access to "library" shares knowledge with man. Knowledge had to be watered down for man to understand.

Try to connect to your dreams to your soul how it can exist without physicality ..

Chinese want help with new virus mutation - have to give recognition .. 5+1

only thing unique to man is love - but he can't extend it to be universal, it's selective, problem is

In Brazil we use sympathy to heal .. leaf dry throw in river. is this force of Pl and STP? Maybe a combination of the 2.
How will CO2 Gans change if you take it to the moon?

Lady asks to do guided meditation - this has nothing to do with KF

ENGLISH TRANSCRIPTION

(:08).
K- .. a beautiful winter day in the northern hemisphere, and hopefully in the coming time, when the time comes we talk about the weather in other parts of the U in what we see in the public teachings. It's not far from where we'll be very soon, and hopefully our Knowledge Seekers (KS) and scientists in the next 5 to 10 years will take us across this U in different ways, and through different experiences. The humanity is getting ready for that change, for that what I call, opening, for us to see what's on the other side. What is beyond the village of earth, what is actually for us to come, to be, to enjoy, and to be part of. What is in store for mankind once he solves all these problems, it will be fantastic times, evolution in the course of the knowledge, and revolution and understanding a new way of living, understanding physicality is not the only option, and understanding that physicality is only to, (:10). what I call, registered memories in the physical dimension (D).

Human race is in for a big surprise as we develop, .. extend, .. bring a new D of understanding, we'll all be surprised, but what has been in front of us, and what we have missed. What has been part of us and we never understood, .. an extension to the knowledge we always had, but we never knew we possess. It's like living in a dual life, we always looked at the physicality side, but we never understood the D of .. information of the U, which is within our grasp, is part of our life. I always said, mankind lives in a schizophrenic life in the D of physicality, and then he calls the other side, a dream, because it is a dream. To be able to get to the other part of the U by instant thinking, and have it visualized, and seeing it, or being next to your mother, who died years ago, but now you are in touch with the soul, and you basically see her. It's a dream. But these dreams will become reality, once the man understands he lives both D. He has to understand, I manifest myself in the D of physical life to enjoy physicality, and the position. What does it matter, on earth or in another D in the U. But the central part which is the soul is expanded, and in touch, and travels the span of the U unconditionally. Mankind is in for the biggest surprise, when mankind sees what is in store. (:12).

In a simple way, in KF simple systems and T, and enhancement units (EU), and others which will come. We try to introduce you more and more to this new D. To the D, that we know, but we have never realized, it has been part of us, what I call, "you call it a dream."

Man in the physical D kills, .. creates wars, .. does everything else. But in the D of freedom of the soul - none exists. This is what Man will understand, to live in the D of physicality, the same as the D of ?? STM. In so many ways, mankind is in for a bigger shock in understanding the new, what I call, "himself." (:13). What has been in it, and what has been missed by it. In so many ways, of understanding, man has become to understand, the true nature of the man in essence of the Soul of the Man (STM). Mankind will learn in the coming time, that we can live in both D, physical and the soul. Soul will ask the physicality, "touch it," let's see how it feels. Then the physicality looks at it, touches it, and the STM feels it.

This is what has been missing and we have created the brain, to filter this. The emotion of the physicality. But now the man's soul has access to the totality of the emotion and the STM in the D of physicality. In as much as the Soul of the Physicality (STP) and the emotion of physicality has access to the soul, and the D of the emotion of the soul. (:14). Then the unison condition of the soul, and emotion, will create new D, .. feelings, .. essence of living, that man never knew. In the coming time, as we introduce more and more EU, developments, we take you to that position. We bring you to see the reality. We bring you to understand the scope of life, in the essence of the D of the Unicose, not the D of the earth. But man has to be educated first, that when he goes out, he does not create mayhem for himself and the others.

The essence of the creation is the love of the Creator for His created. In so many ways, the essence will manifest itself in the coming time, for man to see. In a way, we try to teach how to be the same as the Creator, not just by word, not by, through fear, at "the end of the world," and the "day of calamity," but by the "day of joy," and in a way,

rejoicing, to understand that we feel what He feels, and we live the way He lives. "He," being ourselves, in the essence of the STM, and in essence, being the connector, and the connection with the Soul of the Creator. The Creator does not live in the D of the physicality but through the essence of His created things, carries, understands and feels the D of the emotion of physicality.

In the coming time, in the teachings to come, we will teach you how to get in touch with, to become, to be part of the essence of the emotion of the Creator, through the contact of the STM. (:16). For many of you, these are words, but so many of you gradually will touch it, and then you'll understand. Some of you listen to the teachings, some you feel the teachings, and some of you have already heard it through the essence of the Soul of the Creator. As I said before, when we teach, we teach for all the created things in the U, not in the essence of the word, but in the essence of the emotion of the feeling, of the teaching. Many of you will start learning that way, then actually listening to the word. The words are in a way, putting it in the pigeon holes, this is where it has to be, this is what this new emotion connects to, and this is what I am, what I'll be, and what and how I am going to enjoy the time. The essence of the creation is not for man to have a good time and rob, and steal, and rape. The essence of the creation is to enjoy, to be able to give, to share. To be able to deliver the knowledge of the Creator through the knowledge of the creation, He has created.

Mankind in time will come to understand, we go to work to live. In the coming time we go out to teach in all D of the creation, as we know, whatever man needs at the point of what I call, "the creation and created," will be available to him. This is the difference. Man, many of you ask, "what are we going to do?" when everything is done, the peace comes, and there is nothing, whatever. The job of the man is through the STM, to become the universal teachers, .. the essence of sharing the knowledge of the Creator, becoming that mirror, (:18). which reflects the beauty of the light of the Creator.

This is what most of the .. pure stars in the U do. They don't shine from within, they shine from the surface, to reflects the beauty of the light of the Creator. In many ways, mankind will mature to this knowledge. In time when he is mature to understand the existence of his soul, then his soul, becomes the mirror of the knowledge of the Creator.

Understanding this will bring the new D to man, there'll be no need for factories to go to work for, there is no need to worry about, what the next day will bring, because the day never finishes, to have another day. Having another day, another next year and whatever, does not exist in D of created, because all of it is so joyful, that there is no end to the day. We live through the D of the soul. The souls do not know day and night, .. time to rest, .. do not create conditions of mayhem, but the D of physicality does. I made man in the image of Myself, which means you become the reflector of My essence of creation.

In so many ways, mankind will become to understand the truth about the Creator, with it he'll understand about himself. He will understand what it means to be, to live, not to go to work to survive, but to go to work to give life to the others. Days never finish, days never started, it's one continuous life of joy, .. of giving and sharing. In a way, you

already know this, your soul never sleeps. (:20). The physicality needs to recover, but in your sleep, as the soul works, and it interacts with you, in D of physicality, you call it a dream. The dreams are the work of the STM. The dreams are reality, but man never knew how real it is. The dream of the man to achieve, has already been achieved by the STM.

Many, many of you will come to understand this. We see this growth in the size of the elevation, of the understanding of the man, in a number of KS, who gradually reach to become, to become that shining star, .. the reflector of the light of the Creator. Gradually this will bring the others. We'll see pretenders, .. those who stay in D of physicality, because it gives them the D of understanding. We see what the mankind will achieve in the coming time, is to become the Messengers, the lights of the message of the knowledge of the Creator, as they have access to both D, like all other creatures of the Creator in the time to come.

In so many paths the man will take, will bring him to one point, it's a circle. You can live in the D of the Adam, or you can live in the D of the Eve, but you have the facility to be in both D, where the soul of the Adam and the Eve, becomes the D of the emotion of the U, in how we feel. In how we reflect the D of the existence. Mankind in time to come will be mature to understand, (:22). the totality of the work. In so many paths the man will take, will bring him to one position and one D. In the past, you have been taught about different religions, but at the end it all brings you to one Creator, to the God, to whatever you might call it.

To what we know, is mankind will become to understand, the difference between the reality of the time, and the reality of the existence in the D of the time. Where the time is non-existence, but the STM creates that D of existence. This is one of the biggest mysteries of the U, where the time doesn't exist, but by bringing the D of the "no timeless," into the D of physicality, which creates time for it. This is the beauty of the creation. The essence of the Creator, will still, at the point of His creation, where the man has created the time of whatever he likes when it brings him into D of physicality. Mankind has to become mature to this, then he understands, that time does not exist in the D of the Creator, is the man or the D of physicality, which creates D of time, and space.

I have said many times, if the U did not have time, our scientists would not have said, that the U is expanding. It cannot expand, if there isn't extra room for it, and that room is the love of the Creator. In the emotion of the existence, when it's love converts into the matter condition of the physicality. In the shape of the universes, (:24). in the shape of the man, the shape of the man in so many path ways, is the same as the existence of the universes, is the emotion of the Creator, the essence of the STM, in interaction with the D of physicality of this structure, what we call our earth, creates the D of the physicality of the man.

Man does not exist, unless he interacts his soul, with the soul of the planet, which creates the physicality of the man. So it's the same, the STM, in interaction with the Soul of the Creator (STC), creates that D of the physicality. If mankind has to become kind to

himself, to understand how kind the Creator has been to the man. Then he'll understand the totality, the knowledge, and the essence of the creation. We are the creators of space and time, but we convert the love of the Creator into the D of physicality.

The STM within the womb of the mother, does not take shape and D, in the shape of the physicality, till it interacts with the soul of the mother, and the soul of the mother itself, interacts with the soul of the existence of the Creator, and the created, which is the child, within, but conformity, understanding, but D of the STC preserving the space and time for man in the D.

Then we understand the U is timeless, the U, the Creator has no time, as, at all time, it's at the point of what we call, creation. It's a fountain of fields, it's a fountain of energy. In so many ways, regurgitates. I said this once to a child, we stand by a fountain, (:26). and you see forever, the fountain spits and spurts the water, but where does it come from? It's the same water, when it falls, it goes back in the pool, and again comes as a fountain. This is the essence of the creation and the Creator.

The pool has no time and space, but in a way, holds the totality, and when the jets from the .. the fountain spurts the water out, it gives it the D and the beauty of how it looks, and then when it joins the water, it's still the water. We see it as the pool. The pool is the essence of the creation and the Creator. In so many ways, the drops from the fountain are the time lapse, that each drop becomes one world of existence on its own, till it joins back into the pool. There is no difference between that, and the essence of the creation. The totality is the Creator. And the earth, the what we call, galaxies and universes are those little bubbles of water, which spew out and have a time, that it goes back and it becomes "no time," but it joins the pool.

But when mankind understands this essence of creation, mankind become wise to understand the totality. When you are within, you are one, and are part of, but at some point, I become separated by essence of the creation, and I return and go back to. This is the same with the essence of the creation of the STM. We are that little, little bubble of water, which spews out of the fountain, and in time, it has its time, its joy, it takes its own D and shape, and then it returns back to the totality. (:28). Mankind will soon understand this, and strives to go back to, the pool, then being on its own in the D of a drop. That drop, which literally drops back into the ocean of the creation.

Maybe, maybe we hope man through education of his soul will understand this, will understand the difference between creation and the Creator. Many ways, what you strive to have, is what you already have, that you forgot, totally, that it's already been given, there is no need for striving, there is no need for doing things that could be wrong, but it brings the essence of the creation, it brings the D of understanding, it brings the totality.

I have to take an emergency call, 1 second .. (:30).

Break > 1 of 3 > 409 KSW 12/2/21 (:44).

K- … Sorry about this, but as many of you know, we are here in Vienna sitting on the ground, backing .. We are here in Vienna, backing the 5plus1 negotiating teams, and when instruction comes, and things need to be done, has to be done as the world peace, and what we are striving for will come out of 5plus1. KF with all its knowledge, might and powers, standing by, when instruction comes, or we have to do certain things to support the teams in negotiations, we have to comply.

New T, mankind becoming to understand the Knowledge of the Creator and knowledge of creation is far, far beyond the understanding of the man. But in so many paths, and directions, man can find these roads, .. knowledge's, man can strive to understand it through his soul, and then convert it into the knowledge of physicality. Here we strive to create energy to survive. What about when we land through our soul in another D, energy is abandon. But something else needs to be understood, to exist, to enjoy the D and time.

As I said, D and time, (:46). is not existence, till the man, the fields of the Creator, through its D, through its understanding, becomes physical, become part of that understanding of totality. The STC, which reflects through the STM, will become one of the biggest enigmas to mankind, soul and emotion. Mankind the physical D ?? mankind what he has created for himself as time.

The Creator is timeless. The life of the Creator is timeless, because it does not have that essence, unless the created, creates the slowness of his fields, that in that slowness, converts to, creates that time. I am in love with the lover, but I cannot show my love if I condition myself, to where and how to show the love. Then I spend time on it, to show it, and this is the D of physicality, to show the love of the Creator, I create time. Otherwise I am in time, the same as the others.

In this change, in this understanding, in this position, man will mature, both in the D of the STP, both in the D of physical life, and then man will reflects, will understand to live through the light of .. the STM. Our planet does this, why can't man do? (:48). Our planet is created from the essence of the fields of the sun. It does not kill to survive. It does not go and bash itself to the other planets, to steal their energies or other stars, or whatever. It absorbs the energy of the light, in interacting with the energy and fields of itself, absorbs the energy, and what it needs for it to live.

Between the earth and the sun, it's the size and the D of the emotion of the two, in respect to each other. The way between the STM and the STP of the man, within the gap of the brain of the man, it creates the emotion of the man. They cannot be anymore difference, between the sun and the earth, and the STM and the STP. When humanity matures enough to understand this, then maturity comes, that he will not kill. He will receive the rays from the STM, to feed the physicality through the interaction of the fields, without killing, without creating war, without creating what we call, changes, which are not needed, as it is not part of the process of the existence.

Humanity has to understand, to become that earth, with the fields, that the interaction of its fields with the rays of the fields of his soul, will give him the energy to exist in the D of physicality. (:50). Then man will not kill anywhere in the U, then man matures, that the wars do not exist, in trying to create life and maintain life.

The pride of the man, the joy of the man, will come out of the essence of understanding, the more he shares the knowledge and the beauty of the Creator, the more he can reflect and receive more. A cup when it is full, cannot take a water, but when it overflows can feed the others. Man should be the cup, which is overflowing, and is full, and he can continuously receive, to give. This in essence, is the essence of the Creator and the creation. Now put that cup in that fountain, and become the feeder of the fountain, directly into the cup. As the fountain feeds the cup, the cup overflows to fill in the pool, to keep a constant evolution and emotion. We don't see that drops of the water, which drips from the fountain, ?? the cup, outside, in the fountain, or in the cup. It only exists between the time when it leaves the fountain, till the time when it lands in the cup, and then a collection of the totality of the what that drop has added to the cup, will overflow into the pool. (:52).

This is the truth about the creation. Our life is that drop, just enough to leave the fountain of the Creator, and join back into the cup of another D, that itself, becomes part of the totality, and then it joins in the bigger rivers of the pool. Now you understand, in essence there was no time for the pool, and there was no time for the cup. We created that time, from the point of the separation from the fountain to the cup. That's what the life of the man is - that drop, and how long will take from it, to be the fountain of the creation, and to rejoin back in another D.

This is what we call time. In essence, the creation and the Creator has no time. It came from none and shall go back to none. As is the man who converts it, to the point of his existence, in the duration of his understanding, in interaction with the physical D of this planet. Then, we call that the life. Then in that lifespan, how much can we absorb from the environment? If the fountain comes out at 2 degrees, and by the time when the drop hits the cup it is 4 degrees, where that 2 has come from? Absorbing energies of the environment, creating time and interacting with the environment, is the time when that drop has added to its knowledge, till it reaches. (:54). And when it drops in, that 4 degrees, as that added knowledge, that added information and energy, back to the cup, and every single drop which has been there before, will benefit by it. This is how the man should be, that drop ?? ?? the knowledge by the time it gets to the point of delivery, he shares instantaneously with everything and everyone.

Man should become that drop of water, in the essence of the thirst of the man. Thirsty to receive, and when you take one drop of water into the body of the man every cell of the man feels the beauty of the water, and the essence of its receiving its energy. As it's been said many times before, how come when you are thirsty and you drink a cup, suddenly everything in your body starts, and absorbs and enjoys the existence, and enjoys receiving energy from it. This is what man has to be.

This is what the essence of the creation is. Enjoy that short time, that short span, that little, little, little time, that you are from the drop, separating from the fountain, which is the womb of the mother, till you land, and you end up in the earth, at the point of death. But in essence, there is no time, but your soul will exist in the water of the cup, and it becomes part of the totality.

Now think, now understand, now be wise to enjoy the time, and when you can absorb from the environment of your life, that you can add to the others, when you land in the cup. (:56). There was no time, till the time was created at the point of inception, of the first molecules of the water, to create that drop, and the time was created from the point of the fountain to the cup.

Then the question comes, what are we fighting for? Why are we doing all these killings and mayhems for? Why have we chosen as the race of the man, to create such a mayhem? Where shall we stop? But the question is, where did it begin to go wrong, to get to this point? If we create the children of the man through the Soul of the Man (STM), then the physicality .. at every point, knows that it receives everything it needs from it, and shall not destroy or kill.

When you create in the dimension (D) of physicality, you need the physicality to guarantee survival. But when you create the sun, the sun by its essence, in interaction with its fields, will create that life, and was created out of. It will give it the essence of the fields of the creation, and the energy needed. This is why we have brought you to this point, to understand, that from now, by the birth of Mitra, the whole cycle of creation, (:58). would reverse for humanity, and the rest of the U. Where every life will be created from the soul, the way in the D of the creation of the Creator, has created the sun, and then from interaction of the fields of itself, with the environment in the womb of the mother, will create the D of physicality. From the time to come, when we give birth to a child, you will see the soul first, before the physicality. You'll feel the essence of the creation, before you feel the physicality of the created.

Mankind is in for a very big surprise, Mitra shall be born in that D, and shall be all, who are born from it, and exist at the time of its existence. A change of time, instead of physicality feeding itself, or being touched with the soul. The soul feeds the physicality, that the physicality does not need to destroy, to kill, to create that cycle of life. Mankind will become very kind to himself, through the understanding of the operation of his soul. This is sacrosanct, this is important to us, and to those who live around us, and near us, and through us. We will understand the ?? of creation, we will understand the essence of creation. Then we understand the totality, then we see how we have come to be in this D and direction. In understanding this, mankind will be kind to himself. Just 1 second please (1:00) .. (goes back to negotiations .. R: can we have moments of silence giving from our souls for world peace .. we can carry on till Mr. Keshe comes back.

K- Sorry about this. In position and time, and understanding the totality, we, all of us, will become wise to the new process of creation, will become wise to understand how our lives were created, and how our lives shall be created. In understanding this we all

become mature to, .. the time, place and position. We become wise to understand, that our lives is part of the life of the Creator. We become the totality, we become part of understanding, what the reality is, and shall be in the essence of creation, and then, (1:02). when mankind reaches this point, then it becomes essential for all of us to understand the process, to understand how we have become so redundant in understanding the totality. Maybe, maybe in the coming time, some of our people, what we call, totality of the life, will become part of this life. Then we'll see how the humanity will progress to understand the essence of the creation, to become, to live within the structure of the creation.

Then maybe in the coming time, humanity will become to understand, how life has come to be. Then ?? ?? how much of the life have I understood? How much of the ?? .. what happens to a point, that when we become aware of it, and then we become part of it, then we have to understand, we have no choice, we have to bear the burden of being (1:04). our soul and the Soul of the Physicality (STP) to work to be able to live, .. survive, .. be part of the cycle of the creation.

The birth of Mitra is the pint, the point of reference, the birth of Mitra, on the 21st of December, is what we call, "the pinnacle point of the change for humanity and the race of the man." We have celebrated the birth of Mitra for thousands of years. In Christianity we changed the date from 21st to 24th and 25th, to suit, but to not to be, but be close enough to. In understanding this, mankind has no choice, but to elevate itself, and .. citizens of this planet to understand the change to come, for them to be elevated, .. to live, .. to be part of, .. to elevate in the D of the STM.

How far and how much shall we extend the knowledge of the STM, will depend on all the humanity. The burden of the elevation, becomes the responsibility of all, and the level of elevation, will depends on, how all will elevate together. When that drop falls in the cup, all receives the same energy. When you drink that sip of water, every cell of the body of the man will feel the satisfaction, of satisfying the thirst. The thirst has to come from the knowledge of the .. the Creator and the creation, (1:06). and not in the D of physicality and the matter of the man, but even that is needed, but man has to understand the separation and the totality between all.

The truth and the knowledge is the same. It all depends according to the intelligence of the man, and what he understands of it, and how much he wants to be the part of it. In the time to come, humanity will receive the knowledge from the Source, through his soul, but he has to understand the change of time, the change of position, the change of understanding, and the change of ?? .. what humanity will expect from all of us.

(just one second) (1:08). ….

K- In understanding the totality, mankind needs to understand the reality of life. Not fictitious, the way we have been told, and we are frightened of - the "day of judgment," when we go to hell, when we do this, and that will happen. We have to understand the

life of the man is a progressive process, and according to the direction and dimension (D) it takes, will dictate the D of the progress, the ?? and the understanding of the totality.

The Enhancement Units (EU) .. are not there to help you with the cancer, .. Alzheimer's, but in a way, at the beginning many of you will use it, because you want to get rid of the pains of physicality. (1:10). But as you use these systems, you start becoming more and more aware of the work of your soul, aware of how to be in touch with, and to see it. When you feel the existence of your soul, it's like when the first time you hold your child in your hand. You appreciate its beauty, and then you start to match yourself, that it goes with the pattern of his sleep, why he cries, and he wakes up to enjoy the time with.

It's the essence of the EU, to bring you to that point, to give life and birth to your soul, in the physicality, D of you, that you understand the beauty of your creator. In essence, what we put to enhance, in not to enhance your body, but it's to enhance your soul in every D and foundation of the work, that you see its beauty. In a way, you gave life in the D of physicality to the soul, and the soul has been there, hidden, but you work through it, and because of it. Now with the EU, we elevate the condition, that you enjoy the beauty of your soul - you see it, you feel it. Then as you adopted your child, coming from you, you will understand, this is another child, which is the feeder of you, the creator of you, in the essence of the collection, where your physical D lead to its creation. These EU are in that part, in essence for understanding the totality, in essence for being there, to be able to receive the elevation of the understanding (1:12). between your soul and your physicality.

Very recently, I watched, and I saw that elevation with one KS. The instant he entered the environment of the unit. It was amazing to see how fast the STM reaches the STP, but you have to be wise to capture it, .. to understand it, .. to see the way it wants you to see, not the way you want to see it. You feel the emotion, and that is the touch, where the STM reaches the STP. In time, of being in these systems, you'll gradually become graduates, to understand, to live to the D of the soul. When you enter these systems you understand different attributes of your soul, and then you become aware of the true essence of the creation.

In a way, these systems are a gift from the knowledge of Mitra to mankind, and in time she shall show you how to, she will guide you, in where to, and ?? if she will manifest to you, the beauty of the light of the Creator. I am servant to her, and in so many ways, the beauty of her existence, will bring us the kindness of the way, that the love of the Creator manifests Himself with Mitra.

Soon you will understand the true essence of love, (1:14). not in the D of the physicality of the man, but in the D of the love of the Creator. We have to create the condition, that this love, for those who cannot manifest themselves in the D of, is given the condition, that it can grow on its own. Sometimes it might look harsh, sometimes it might bring joy, but the totality of the life for man, will become to be that part.

Many times, in the coming time, when we are in the presence of Mitra, we will see that light, we will enjoy her existence and her presence. As I always said, I am servant to her service. In time, it will bring us joy, and educate many of us, to be with understanding of totality. I hope today's teaching brought you an insight in what is to come, and what it needs to be done, and clarify many things that you never knew, that in time and existence .. (broken up ..) in the D of physicality. If you like to go for a break .. You got to realize we are here on a standby in negotiations, every now and then if we get a call we have to break and advise, needed to be given or received information ?? as it happened this morning in the teaching. (1:16).

The elevation of the souls of the members of the negotiating teams, is part of the work of the KF Universal Council.

>> Break 2 of 3 >>> 409 KSW 12/2/21 (1:27).

Questions.

K-.. Please be aware if we get a call we have to break. It will be the same for the next 3 to 4 weeks.
R;
K- When we said, people thought it was just a talk, but the KF is a cornerstone in part of the negotiations in the background, and we are serving the Iranian nation and leadership to make sure, (1:28). .. the negotiations are not unfair, both to the Iranian negotiators, and supporting teams from other nations. We are one of the organizations, which are negotiating, and are embedded in the background with certain, what we call, "groups of negotiation," which will try to infuse and encourage the peace talks. This is the way the KF has worked since 2010 - 2011, and was the outcome of what we call, "releasing the Key" (USB Stick). We knew that knowledge is the key to breaking up animosities. This knowledge has to be accessible to all nations.

As our KS know, we have asked our team in US, in Arizona (AZ), .. in China, .. Tehran, and .. in Brazil to start locating and to find with negotiations with authorities or independently, for the first .. institutes of KF, which will go in conjunction with the one in Austria. The knowledge and the teams of the KF, have been instructed in the past few days to actively locate, where in conjunction with the governments, we can open the institutes, (1;30). in the next 12 months. The finance for it, has been backed by the KF.

This process has started, because we need to educate. We cannot educate only in English, just because we do, but it has to be transferred into other languages, and understood by. So in the coming year, two years, as we build these institutes, you will see, that these institutes will look exactly the same. We have asked our team to bring this out. We have a good idea of how we want it to be, we have a location, which we like the institutes, or universities to be the same. You will see a copy of the same institute right across the

planet, a blueprint in Tehran, Beijing, Brazil, in AZ, and even in Austria. This becomes our pattern of work. It's where you feel, you belong to a new generation of life in the knowledge and T.

Our work has started, we cannot stop. In a way, we are using our knowledge as a gift to the nations in exchange for peace. Last time we gave the "key", this time we give the structures. Building the cities with institutes, Tehran and Beijing have already gone through the process, now they are starting.

We started direct negotiations with the Iranian government officials to build the first what we call, "CO2 capture structure," in one city. This city will be Tehran, and then most probably Beijing, New York, and Delhi has been chosen, .. New Delhi, (1:32) for the structure of absorbing what we call, "CO2 pollutants." It's not one structure, it's covering the whole city grid. We have setup, and it will be coming more, now … the structural feature has come in. The Chinese team, and hopefully Austria, will deliver the first physical shape of it, and we start building by mid this year. Where we capture CO2 across a city, not in one location, and with the support of the nationals.

We will build 10 centers in each city, specially positioned, and then the citizens, some 25,000 members of the public, will become the supporters of running these systems, that we absorb balanced fields across the city. Then we'll see how the pollution will die in Tehran, before end of this year. Hopefully, if we can get everything sorted, by beginning of next year. The same will be in other cities.

The interactive change of the situation, we even know how many metric ton we will absorb from these cities, of what we call, "the capturing of the materials." It's the process which the KF will go, and then the same time this year we'll finance in 30 major cities around the world, to go for cleaning of the waters and cleaning the waters, and changing the water supplies, where the nations can benefit by it, health wise, and environmental wise.

We have entered the physical D of change and this is part of what you have to expect from a structure like KF. (1:34). There is a lot of work going into the background of it, and all of us as KS step by step, have helped and supported, and specialized in different part of it. Now we bring the knowledge in, as a collective knowledge with the governments. I have worked 40 years to achieve this, and now I have put my own resources in the background to it, that everything established under the KF name, will be owned by the KF itself, in the name of the KF. We are not building under other names and trying to go, but we build the Enhancement Centers (EC), .. the Wellness Centers, the CO2 Capture Centers, all under the name of the KF. That it will all belong, as it is, One Nation, OPOR, T in exchange for peace. But we have to bring peace, not to the guns, but to the society as a whole. Let's see how we can achieve it in the next 10 years, and how it will change all of us in the coming time.
Any questions.

Q: … It's said that the soul of Mitra has already been planted, will Mitra be of the bloodline of Mr. Keshe?
K- Mitra is bloodline of the Creator. Any other question

Q: .. (1:36) If man is made in the image of God, then why has man made, create so much mayhem on the earth?
K- Man is created in the image of God in the STM. The interaction of the light of the soul, has created the physicality, which has gone haywire, as we see. It's not just the man, there is a dysfunction in the D of the life of physicality on this planet. Due to its structure does not allow the fields, which are needed for the conversion and sustainability of the soul, to arrive, to, in its interaction with the D of the soul of this planet, to create a life that can sustain, to attain all it needs from its environment. This is one of the reasons, that we are introducing all of these Gans's.

When a plant does not give the fruit that you want, what do you do? You cut into, and you change it, and you make it a new, with the taste and flavor you like. We do that with apples, .. cherries, .. with all the plants we know. Nowadays we call it, genetic modification, our ancestors used to do with different way, by changing the skin of the of the tree, by changing its flavor and taste.

Now we have the same problem with humanity. This planet due to structure, does not allow enough fields of the right order, according to the conversion of fields, to create a D of life, that can absorb the energy, (1;38). like itself does, from its environment. That conversion, lack of energy, manifests in demanding to survive, and additional, rapid, continuous energies, which we do that, by eating, by killing and whatever. If mankind or the creatures, which are protein based on this planet, manage to make that conversion, then one will understand. Then one will phase into it.

And then this is our job. All this introduction of EU, production of Gans's, and all this, these are the small, small works, which is needed, is like a "bricks in the wall," to be put in, that the wall can hold it this time. At the same time, introducing how this wall works, is another part of what we call, the education side of the KF. This is very, very intriguing, interlocking, but intervening with bringing the change.

When you plant a tree, when the soul cannot give energy for the plant to survive, what do you do? You add additional energy, as manure, as fertilizers, as chemicals to support it to exist. We are in the same position. This plant pot, which has given life to man, has not, does not sustain enough, to allow what it grows, to live. So the plant, which is the man, (1:40). now extends to get something, from somewhere else for it to survive. With introduction of .. the Gans T, because it's the easiest way for you as humans to understand, by introduction of the EU, we are bringing up the 2 together.

You will understand why you even absorb the CO2. In the process of the CO2 absorption from the cities, we'll spray back the CO2 on the cities. What was killing man, or what was Global Warming, now becomes a source of energy and life. But notice we always go

back to the teaching, what we said in all the teachings, when you use Gans's you need CO2, because it's the connector. When we spray the cities we connect man to the new D.

People will flood into these cities to receive it. What is pollution, now becomes the source of energy, and in that process, we will see, man will change. When you read the business plan, which is set for, what we call, "structure for setting up the companies for capture of CO2," in Tehran, Beijing, and others you'll see this. We have put forward, in capturing the CO2, now we spray the CO2 back on the city, in the form of energy. What does this energy do? Connects man to energies which is needed, and is within the environment to be absorbed. Man will not kill anymore, .. change anymore to destroy.

We will see in Tehran as the city of the light, but lit by the STM. These are the changes to come and it's too far for us to explain, because you cannot comprehend. (1:42). Establishment of the capture of CO2 is not just the capture, is to bring a new condition of enlightenment, to bring cities of light, cities of where peace sits. We do the same across this planet. In the calculations coming down through the business plan, we need 5,000 cities, that we capture the CO2, and we spray back on it. What the plant could not get from the soul, we gave it through addition. Now we give the addition through a different new scientific way. When, what has been short to connect to the environment. The plants do this, the plants don't kill, but they connect to the energy fields.

Now it's time for man, and when we spray the CO2 over the city, we elevate the soul of the cat, the mouse, the ant and everything else, it's not just for man. What I am doing, you can't even imagine, how far reaching it will be in the coming time, and you'll see. This is what I said, from the time of the teaching, when the man, the STM elevates, he is responsible for all creatures, and when I do, I enlighten all creatures.

It's not only for elevation of the STM, the plants will change, the tress will change. (1:44). We see a new cycle of life, which does not need to kill, .. to destroy, does not matter wherever you are. When it rains, it rains equal on the cat, the man, the dog, the ant and the rest. The implication and application of new T in the life of the man, will be immense, when we rain the energy connection to the U, and the pattern of this life, most of these rains will wash into the rivers, and it will change the life of the animals and the fish in the oceans.

We know what we are doing, and it will be far reaching. In the next 5 or 10 years, most of the humans will not even recognize the way they lived. The way we accepted the computers, and the mobile phones, we'll accept to be peaceful as part of us. Some of us will not even remember the wars, because we are not from that generation. It didn't exist in our time. You meet people who have been through the camps, and they've been through extermination camps, and they escaped, and we've see those who've been in prisons through the forces of the political reasons or whatever. When the came out, and they live, they just don't want to talk about it, and they forget about it, the man will go through the same process. This is one of the gifts we have bestowed on Iran, to be the first nation to do so. The land of Mitra. You will understand soon, what I am doing with humanity, you cannot even imagine. (1:46). What was short, will be given back by the

fields of the planet, but not by the matter state of the planet. You killed and used it that way. We give it, that you don't need to kill.
Any other question

Q: .. Is there a date for these machines to start working?
K- These machines are working. It's just that we are waiting for all the nations to come to an agreement in 5plus1. Because 5plus1 as the world leaders, in economy and industry, so called. We need to bring the change on the top, that it reflects all the way down. This is one of the reasons, we are sitting here in Vienna, and .. work with the members of the 5plus1, in the background, those who influential.

We don't consider France, Germany, and UK as essential part of these negotiations. They are parasites into the whole process, because they have been colonizing, and they think it's their right. In a way, we work through different structures, in the front we let the KS say one thing, but in the background we negotiate a different way. We shall see the outcome in the coming time. If we manage to change the situation the way we expect, then you will see the EC bubbling up everywhere.

At this moment as we are talking. (1:48). As Rick was showing the EU, 3 EU a week is under production in China. They will be shipped into Europe in the next 3 or 4 weeks. We are going into mass production. The .. Vision and the Brain EU, tons of it is getting produced and assembled and ready to go out. I gave a promise to John, he'll be the first one to receive it, it will be as part of the gift in the negotiations, that we share equal with the US, and then with China and the rest.

It's not that it, we kept it back to get to the point, it was the right time and the knowledge could be spread the right way. Now the … VEU, 48 of them will be shipped to AZ, once we have the agreements on the transfer of T and peace with the US, in these negotiations. We hope to achieve it very fast, and what I hear from our negotiators, there is a lot of good development has been done, but this development, have been done on the nuclear side, and not on technological side, now we have to change it, and it needs this kind of work to be done. We thank the office of his eminence Ayatollah K of Iran, and his chief negotiator, Mr. ?? . It is important that we understand, that there is some sort of personal positions, which have to get solved, and is getting solved. And there are others on the national level, which is getting solved, but it takes time. (1:50). As I said, to one of the negotiators very recently, this situation between Iran and the America is like what I call the Iranian girls and the way they like. They push away by the hand, and they pull under the table with the leg. Now we are in that position. We haven't managed yet to bring the shake hands on the table too. But it will come very soon, through the right way.
Any other question.

R: Maybe they need more woman.

Q: Azar: .. ?? ??

K- It's part of the culture.

Q:
K- we have good woman advisors in background, don't worry.
Q: ??? ?? the drop of water in fountain, I don't remember if it was in the fountain or the cup. In the coming time .. After the changes would I remember when I was a drop of water in the fountain, or when I was in a cup or visa versa? (1:52).
K- Yes, because you share the knowledge with all, within the cup. This is what I keep on saying, and maybe now we can understand a little bit more. Once you are in that water as a drop, your knowledge becomes knowledge of all, as much as their knowledge becomes knowledge of all, which you are part of.

We don't have universities, we don't have .. schools in the U. If you want to understand this, it is very simple. We go back to beautiful things which Rick used to show with the magnets. When you put the magnet, or you put the knowledge, in that magnet, all the other magnets on the table respond, and position themselves, because they understood, they have a connection with that knowledge. And that's how it shall be. When you put a magnet on the table. Rick do you still have that video somewhere, where you play with magnets on the table?
R: Most of them have broken up ..
K- No I mean if you have the video.
R: Yeah, no I don't have that separated out…
K- when you see this video, it's beautiful the way Rick done this years ago. When you put a magnet, that magnet has different attributes, have different composition of metals in each part of it, and when you set it down in the middle of other magnets, the other magnets respond collectively with all the things, which are in that magnet. It's knowledge, it's power, (1:54). its cells, everything. And this is how it is. You are that drop in that, so every single cells, .. molecule, .. atom in that cup already moves to accommodate for you. And there is another drop, and the other drop moves, and all have to be done.

So the knowledge in the D of creation is uniform, and with all, now maybe some of you understand. But we say there is no university and college, and PhDs in the U, because the knowledge is instantaneous, and when it is learned by one, it is shared with the soul, with the others. That's why we don't have a worry when man goes to another D. It's just taking this factor of killing out of the man, is a bit cumbersome, but we are getting there. The only way is to uproot it from here, the brain of the man, the CO2, and bring the connection to the U Community, and he'll stop. I told you it's in one of the teachings very recently, that even the stars, and moons and galaxies will change because of this new understanding. Not just by man, we have the same structure across the U.
Q: ..
K- Jalal you always come with 2 questions
Q: okay .. When a man changes, goes through this process, (1:56). is our essence going to be more, you know like how what makes you "Mr. Keshe" is something you like to do as you, we call it your personal character, and mine is as Azar. Is it going to be more profound, and is it going to change, because each of us have a destiny or something that we , that makes us …

K- Of course you will change, but at the same time, you have a say in that change. We all have a say in our changes and what we'll accept.

About accepting the abuse

I always say, I look at myself, than outside. I did not want to change anything for years, and when I made the change, it has brought a lot of change, because I accepted, that I was responsible accepting all the abuse. It had to end, and it brought the change. And it brought the change to everything else, because I feel different, I react different, I stopped the abuse, now we see, it reflects on the T and the knowledge and everything else. It's what we accept, counts.

If, I said that very recently, I go back to this in the recent, past few weeks deliberately, because we'll explain to you very soon why. When in past year and half, 2 years, you lot have received a whack of what is on the Internet about me, and how it is. I lived with this for 30 years, but to me, I never stood still, "why do I accept this abuse." This abusive behavior has been the pattern all the time, but too busy to make wealth, too busy to expand the KF worldwide, I never stood still. When you stop that abuse, everything changes, because there are new energies which come into your life. (1:58). The abusive behavior has been there, not only about me, the whole people around me, we've been set that way. We've been frightened, we've been threatened. One of the KS was told this, because of what, he has a job, and that fear has stayed in the KS for years now. The abuse hasn't been on one, and what we accept brings it to that point. There is no more time and place for abuse. …

Q: .. When we go through the change ?? the whole planet and cosmos goes through the change. So does every soul, be able to move between physicality and non-physicality?
K- That is the beauty of the creation of Mitra. We have the ability, we have the knowledge, we have to choose. Do you want to always sleep, what do you call it, stay in the state of dream in your sleep, or do you want that to be part of you.

It's a huge difference .. Where you look at the plant and enjoy its beauty as a physical, and then at the same you are in touch with your soul, and the soul of the plant in D of the soul, and you see what the soul tells you, what is my beauty, have a look at this part, because you haven't seen it. You don't have the eye to see it. This is what is missing, confirmation of both existences, at the same time, but being aware of it. Not needing to go to sleep to become aware of it. (2:00).

It's a very big difference, and this will bring us to that point. This is why I tell you, I am servant to her, majesty, to her beauty, because the beauty is not male or female. The beauty is the sense of enlightened, to see the beauty of the light of the Creator, the knowledge of the Creator. It's not again, in essence of the physicality, in the sense of the beauty of what is to come, what changes are there to come, and how this will bring us that beauty. Comprehension of the, what was missed by us in, as in essence of our own creator, which is our own soul.
Q:

K- … Thank you for your teaching on Friday .. .you are doing a good job
Q: …
K- It's enlightening. This is the beauty of when you are there to create that condition. It's what I call, "love unconditional." You just give, and are there, and it comes to us in its own ways.
Any other question. (2:02).

Q: … mentioning the island of Tonga. ..
The capture of the CO2, will this be used not just to spray on the cities, but will it be used for farming as well. Can we buy the product, the CO2 captured from the plasma reactors, whatever they are … ?
K- Yes it is, and part of the captured thousands of tons of CO2, part of it goes to farming, .. to cleanup of the rivers and pollutions. It is part of creating that connection.

We have a facility now in our lab in Austria, where we dry Gans's in a different way. It's an Austria invention. We have bought the unit, and there is an industrial scale of it. (2:04). That it will be brought into all of the KF .. CO2 centers. We cannot hold so much liquid, we convert it into .. dried state, or a gel state, it depends what it need be. Then yes, it will go into farming, all sorts of health applications, the gel-packs and pillows you buy , these dry Gans's are embedded into it, in some of them. It's the same with the EU, which you see coming up. The dry Gans's are embedded into these. It's not just the normal systems. Yes, agriculture is the back bone of the use of it. We in time, work, we have a surplus capacities, we'll return these into the oceans, as a liquid and dry Gans, because in evaporation, this will change the climate totally. This is part of what is to come.

Q: … I am aware that Tonga is an island, .. they have problems with high levels of arsenic in their waters. Your water purification T, would that be easy enough to extract this arsenic out of their waters, because it is effecting their health?
K- Yes, it's not just there, we have a number, hundreds of them, locations around the world, with different problems. Arsenic can be done, and can be supported to be extracted, yes. (2:06). We have the T, just now, industrialization is another problem.

Q: .. First of all I would like to express how happy I was with the news of the university in Brazil. … Mr. Keshe you love overwhelms you, I thirst for the water of life, and hunger for the food of the Creator. You commented that physicality does not have to die, is this soon to happen, will we be able to do this.? Will we use this on the "day" that is to come. Will we transmute, .. have to master this ability, this ability in the day of what is coming? How will we convert the cell of man into energy?

K- You convert the cell of the man into energy every second you live. But now it's understanding the process, that you can control. (2:08). We have in a way, the wrong mentality towards this process, and once we establish it, and understand it, we'll see that there is no limitation in the totality of understanding of the knowledge and T of the creation. We can solve it very easily.

In respect to the Brazil university, .. we have asked the Brazilian KF team to start looking for the accommodation, or the premises. It will be a replica of the other universities, or institutes. We are opening an institute, there is a very fine line between institute and university. The institutes we will not teach the basics of what do you call it, "the alphabet of the KF knowledge of the conversion of Gans or whatever." It's where we do the research, to develop new T, to understand more, to be able to comprehend more for all of us, the process of the creation. This will continue to be so.

We made the decision to go for university for Brazil, because we have such a large active community in Brazil, that we .. have to support them to extend it to the rest of the places. If you see how the Brazil team has reached the remotest Amazon jungles. It's our responsibility to support that, for the people in Amazon to understand as much as, (2:10). a minister in the cabinet, in Brasilia. About the knowledge and understanding, this is part of the work of the institute. It's the greatest pleasure what we have with Rafael, and the team of the KF in Brazil, to invest 500 million in building this institute and leave it in the hand of the KS of Brazil to expand it, to bring new technologies for the nation. We will interconnect all the universities, which the knowledge will be instantaneous, whatever is learned in the other one, can bring the rest in. The whole thing for the Austria KF is in the final phase, in the next few days, and then we go, we have received the agreement for 4 more universities, which will be built, and Brazil is one of them. It's a great pleasure to serve the nation this way with the knowledge.
Any other question.

Q: .. Could I make the comparison with the manna that fell from heaven, and the Gans from cup one, both are white like flakes, they feed, heal, and must be donated. Could you make this comparison?
K- You made it, you don't need me.

There is something we got to… Go back, why did you make Cup 1. Cup one, or CL was made to support .. the Corona in the first infant stages, (2:12). .. 2 years ago, more or less, we are reaching the second year of.

We have received request from the Chinese leadership, and government officials if we can support the new wave of African Corona. We have responded, we are waiting for the response back from the Chinese L in the coming days. That KF will enter in the second phase in respect to all Corona's, Covid, or what we call, "combination of energies."

I have a message from his Eminence Ayatollah K of Iran, and his Excellency President Xi of China. The T of the KF in respect to the new energy packs, will be delivered in respect to what we achieve in .. 5plus1. It's another condition, that we have the T. We can deliver it.

You cannot use Cup 1, anymore for the new African version, and then we know there is another version will come out very soon. We think they might call it, the Argentinean, or the Brazilian version. The present African version, from South Africa, is a mutation of the virus for the high temperature. You got to realize, there is a very much big differences

in the variations of the energy packs in the southern hemisphere, than the northern hemisphere. When you can manage to transfer the ones from southern H to exist in northern hemisphere, they create havoc. They create a lot of other things we don't expect. (2:14).

We know that the South African version of this pack of energy is set, especially that forces the African nations to take, whatever the controllers of this process have. Because the Africans were not prepared, they didn't have the financial means, they will not support the use of anything else. So they have introduced this especially, and they call it this name, that is to bring the African nations in line.

But the problem is, when this hits the northern hemisphere, it creates a heart attack. This is why, it is very random, .. undetectable, we don't any senses to it past. This new version is known to man before the time of Moses. It's not a new version. This version goes back billions of years. It's part of us, but now in the new strength has been introduced, in deliberate.

Research on this was started deliberately, again by Bill Gates Foundation in the background in 2015, to be cultured, to be ready. The history of this is very open to us, we know how it came in. The next version, which will come from Brazil, or maybe they'll bring it from Central Asia. We don't know where they are going to deliver it, will effect the brain, and emotion.

We saw some of this with the others, which were brought in, in the first two years. We saw people jumping off the cliffs, .. of places, all sorts. Now this time it is specific to the brain. (2:16). This uses part of the Herpes cycle. Herpes when you catch it after age of 60 - 65, 85% of people who have a Herpes online, will end up with Dementia. We know this, scientifically, data collected. But this .. new version, maybe they bring it in next month, 2 or 3 months, will go directly to the position of the fear, it will go into the position of other things to do with the emotions, and we'll see huge number of .. suicides.

Where with the African version, now we see a lot of heart attacks. It's uncontrollable because it shows a small fever, then the energy hits you. The body cannot hold it. We saw this in the first cycle in Tehran, where we were handling .. the first version. The rapid heart pressures and everything else. So now it's in the process. We are aware of this.

As has been the request of the Chinese government in past few days, to deliver a new solution for this. We are waiting for the Chinese L this time officially to puts the lines down, and as I said to the Chinese L CCP, I am prepared to travel to China for 3 days next week to deliver the T, on the recognition of the T being there.

And they are playing with time. But you don't have time. Our message to the Chinese administration is, your Excellency President Xi, the T is at the disposal of the Chinese nation as it was before, (2:18). but this time recognition of the peace in exchange for T, through the Iranian government, and the 5plus1 negotiation, is sacrosanct. We'll respond

to you as we said, tomorrow to your team in Vienna, and we expect to see what will be delivered by the Chinese in the long run to their nation.
Any other question

Q: Mehranez, …
This teaching was sweet like honey and easy … I have a difficult question that I have kept for years. (2:20). What do you think about the phenomenon of shadowing the soul. For example, .. the spirit of Christ which shadowed the spirit of Jesus, at the age of 13 until the end. The other examples, probably Prophet when he was bringing ..
K- What do you mean by shadow?
Q: Like taking command of, yes, taking command of the spirit.
K- You see, I explained this before, I live in the D of physicality. I carry the STP, because I was born to it. But at the same time I carry the soul of the knowledge of the Universe through Creator, and when I teach, if you listen, there is a very clear difference between the teaching and sometimes the question part.

Am I shadowed, or it's the same but at the higher level, the same soul speaks. You get enlightened to see further on. That's how it is. We don't carry 2 souls, we are not schizophrenic, but we get enlightened to a higher D of the knowledge, that we can share. It's not a shadowing, it's part of the access in the same environment to the higher order knowledge. It's like you stay in a library, all the books are there, (2:22). it depends which book you pick to share knowledge of. With this process, in this library, that all the books of knowledge of U is there. Each time we pick one book and we speak, and read that book. It hasn't changed the book, and it hasn't changed the man.

Q: I understand, is it all the time, or are there times of personal activities?
K- What do you mean?
Q: For example the prophets of Islam, they were asking him, are these words that are coming out of your mouth, the words of God, or is it your own word.
K- It is .. it depends on what we speak. When you speak to a child you speak the language of a child, and when you speak to professor you speak the language of professor, and when you speak to a world leader, you speak the language of a world leader. Is it the same man who talks to the child? Can you do the same thing with a president? But in essence it's the same, same man.

Q: Is it hard for people?
K- At the beginning, when I went through the process, it was very, not difficult, but it's comprehending what's going on. Once you setup up into it, you understand it, sharing it for the others to understand, at the beginning is very difficult. Once you, (2:24). become aware of it, that it can bring the change, and reaches the state of understanding the totality of it, it's a normality.

When .. I still have a book somewhere, I don't know if it still exists, I've seen it a few years ago. When I drew the pictures of a UFO, and how it works, when I was in ?/ Winchester College in Manchester with a bunch of our friends in a pub, in Knotsford, and I explained to them, and this is how it will do, and that's how it's got to do. The first time,

for 15 minutes they were fascinated, but afterwards they could not extend the knowledge or understanding.

At that point I realized the knowledge which comes to teach, and sow the depths of it, it's beyond the understanding of the man. So I had to step back. I tried to share it in universities with my professors. They could understand a little bit more, but they were more pragmatic. Now teaching it, the way we do, it's the same man, the same knowledge, but it puts it a different way. For me to tell you there is a UFO, and I show its flight, and then it becomes another magic. But this time we taught you everything from the basic, that you all understand how the UFOs work.

So, but we carry the knowledge from the beginning, but it had to be watered down, tuned up, and shared in a very, very slow way. It's the same soul, it's the same understanding, the same knowledge, and it's been there for years. (2:26). It's just now we know how to what do you call it, water it down, that everybody can benefit by it. The soul is the same soul, nothing has changed. It's just that, the same soul, you understand more of, because you are more tuned to it.

A man teaching is not that difficult. You try to teach those who are much more infringed to a deeper knowledge of the creation. They are sometimes, a little bit of choppy waters, you start sharing knowledge in that level, at the level of the soul with them, and they want to know more.
Q: .. I am so moved by your sincerity, that you have always been sincere and simply with us. …
K- Thank you
Any other question.

There is a request, which goes to all of you. Is try to understand, and try to connect to what you call your dreams, and then through it, you might start understanding the work of your soul. Then do not connect it to the physical D of physical life, but look at it as how it could exist without the physicality. And what does it mean, and what is it supposed to serve, and what is the outcome? (2:28). When you have a dream try to understand that dream, not in a physical condition, but in the process of how it took place. How come that, you had a dream about the mom today and what does it mean, and what is she trying to tell you, bring you to understand, and then look at the connection between the soul. How your soul is connected to your mother. And don't connect it to the physical life. Then let's see how you start progress to understand the separation between the STM and activeness of it, and the physicality of the man. Then you might break some grounds in understanding your own existence, a little bit more.
Any other question.

Q: … (2:30). Good morning from Vienna Austria. R: So you have an ally there?
K- We have many allies in Vienna at the moment. We are doing a lot of good work, especially thanks to Iranian officials in the background without us knowing they are there. But overall everything looks good.

Commercial Break 3 of 3 >> 409 KSW 12/2/21

plays creation video .. (2:48).

(2:50). Q: Kay .. doesn't have good connection .. (2:52). Rick talks about Canada …

Q: Kay …I have a question about Mitra, (2:54). obviously, I understand that Mitra's soul has been reborn this year on 21st of March, and you have mentioned about this physicality .. when do we expect Mitra's physicality to manifest, in our time, or maybe next generation our children, .. would we have the pleasure of feeling Mitra's physicality now in our lifetime?
K- .. wait and see. It's the recognition, it's not the birth. It's a big difference.

Q: I understand, so this is when we elevate and understand more of the knowledge you have been trying to teach us, and we collectively understand and have more access to our soul, and to the ethos of the universal being and existence. Is that when we feel Mitra is being present?
Q: repeats … (2:56).
K- That has been felt by man for thousands of years. We only changed it when it suits us. This is one of the things, which is essentially part of this work. We only choose when it suits us to recognize. This is part of the .. we only go back to it if we need, when we are desperate, and there is something we need to solve with it, but we don't handle it, that it is always there that we can nourish it.

I had this physically with the Chinese authorities in past few days. They come back, they ask for .. urgent help with the new energy packs. "Can you give us another solution," because they said, "can we still use Cup 1." You used it, and it didn't work, that's why you are back, or you wouldn't come and ask a question. I said to them, .. in one word. … that is, you came and you abused us, when we delivered the virus for the pig. Once you took it, we showed it, and then it went disappearing into your system - stealing. Then you came and you used it for the first energy pack in January, and then when you got away with it, you again went on a path of abusing it, instead of recognizing it. And now, (2:58). that you have been to all the KS, and you couldn't get help, you are back asking me to help, but don't want to recognize, or go public with it.

So you have always been aware that the knowledge is there. But the answer was very interesting from their chief negotiator, or their spokesman. He said, you have taught all your T to the KS, and we are using them. I said, go and use them, see if this time they can save you. You teach, and they have helped us. They said, now the knowledge belongs to China. I said, the why are you here? Go an ask them. I am sure you asked them, and they have no use. Some of your leaders have already died.

It's the recognition of understanding. It's oneself to understand and nothing more. What I said to the Chinese is very simple. I said, you want it? Talk to your negotiators in Vienna, the Iranian government will put it on the table on behalf of the KF. I informed the Iranian authorities, this is what is going to happen to the Chinese. It's recognition, it's the same, and exactly where it sits. Not just use it when it suits the ?? demand of your need.

This cycle of the energy, which has come form Africa will kill many of the world leaders. Because there is a discrepancy in some things. None of the world leaders, and politicians and diplomats need to receive the, what, they force everyone of us to have. We see, .. (3:00). this new energy pack was nationally based, the Chinese, Iran, the Italians, now African. Then now, have become position, job based. None of the leaders need to be using it, or their families. This is a shock to many of you, to understand for the first time we have an energy pack, which is man, position dependent. But this one is different. This one, the new African version, knows no position, ?? .. now everybody is at it. Everybody is vulnerable to the new pack of energies.

So they know, but they abuse it, and then they come to understand, that we have to recognize it. You know, we have to be able to recognize our position, recognize the reason for our position, and recognize what does it do for us in that position.
Q: … what I have been hearing, to what you have explained, the arrogance… (3:02).
K- It's not the arrogance, it's thinking you are privileged. It's not the arrogance. It's thinking that you are privileged. That sense of privilege is what causes the problem for them. Do you understand.
Q: Entitlement. Feeling entitled.
K- Entitled .. yes, more or less, yes.
Q: God bless our soul's direction, not the arrogance, the sense of entitlement is totally banish the sense of entitlement. .. Embracing the new knowledge with a humbleness ...
Q: In future as time goes by and humans are having more access to the soul, and we live hopefully in both D we live as one. Lot's of things will be changing. So humans in physicality will loose its appearance. Do we want to get rid of the human race, because obviously this is a race, she is representative of what has been created in us. ??? this physique, this shape belongs to the planet earth ..
K- Can I .. I am going to stop you there. Correction,?? Did we change, (3:04). as we became Chinese, or English, or African? No. It doesn't matter what changes in the D of physicality, the essence of the emotion, and the rest of the true man will be the same. Nothing will change. There is no reason for that change.
Q: .. we have certain characteristics which are unique to humanity. ..
K- Of course we have 2 eyes and 2 legs, of course.

The only thing unique to man is love. There is still love in different D, but the way the man loves is unique, it's the beauty of it. But he cannot extend that love to be universal, it's selective. It is possessively selective, and that's where the problem is. That's where our problem sits in totality with the human race, or with ourselves. Selective - why can't we love everyone in every way? Selectiveness of it is the problem of it.
Q: Definitely a sticking point, and a very important point ..
K- .. It's very sticky, because when you stick, why do we need to just love one, or can we love everything else? (3:06). Then why do we push it?
Any other question.

Q: .. Here in Brazil we use a way to heal, we use sympathy. For example for a spur on a foot, we cut a leaf from a palm cactus and remove the thorns and place the sick foot on

top of the leaf, and cut it into the shape of the sick foot. Then we put it on the roof of the house to dry, after it is dry we throw it into a river, and the sick foot will no longer be sick. Question, is this the force of the Pl, the STP?
K- I lost some of the question repeat …
Q: repeat … we use a way to remove some disease using sympathy. (3:08).

K- Maybe a combination of the two, maybe the confirmation of the two, in how we see, and how we would like to see the results … ?? confirmation of it comes with it. But do we put into the leaf, and changes in the leaf, because we have connected, now we have what I call, a Gans outside, with the new knowledge we can explain these things. Do we create the emotion of what is wrong with the foot, as a weaker Pl within the structure of the Gans of the leaf, because that's what it is, and then we dry it, and then dry can be taken into atmosphere, whatever, when the energy is transferred.

It's a very interesting, but in so many ways, with the new knowledge we have, intriguing to see how we interpret the new knowledge, in the shape, (3:10). and condition of the new understanding.

R: So it's a similar principle to what's called the Pain Pad, and how that can work to remove certain afflictions and so on. Sometimes we get rid of the pad after its job is done. So it's similar to using a leaf, which is the same multilayer amino acids .. involved.
K- Yes it is.

Q: .. How do you define the spiritualist doctrine.
R: I am wondering if perhaps, that is part of the spiritualist doctrine maybe, that removing disease using sympathy. I am not sure, I have not looked up spiritualist .. Is that a familiar term?
K- I don't understand it either. It is what we call, part of that process, we understand. "I transfer part of my energy to you, and you transfer it to somebody else." But it has to be understood in totality.
R: This is probably the doctrine is, that there is a spirit in everything, even things that are inanimate and so on. Which you have you talked often, even a stone has a soul, for example. So in a way this is a spiritualist doctrine. But that is just one tiny aspect.
K- Yeah, but that is in the writings of Bahula, .. it says even a stone has a soul. (3:12).

So we understand more and more as scientists, understand more and more. So ?? ..
R: sorry we are missing your voice ..
K- … it's for us … hello … I said, it's more in a manner, that we understand part of it, or some of it. But it's very much if you look at it again, it's that situation with the Gans's. We have to understand how we define the spirit, and how we define the soul. Then what we call, spirit, which is the STP. Then if I can transfer some of mine, if you are humble enough to accept, than you can carry.

This is what we say about the future, what we call, pilots of the flight systems. Do they become that, that they carry the STP in the D of his soul, stands on its own as its center, and then deliver it, that the STP takes the feature at the point of the destination. Now we

understand, we can do more, now we understand more in the truth and the real condition. (3:14).
Any other question.

Q: .. if we put our CO2 cup in the middle of our garden, or surrounded by plants, will it create better quality Gans?
K- It certainly ?? will absorb energies from its environment, and will give to its environment. As your environment is in the garden, has plenty of trees, shrubs, whatever. They are the CO2 capturers, but of a different strength. Maybe .. added to.

I said this to a KS.. put the CO2 Gans under a tree at night, and then put the same batch of the Gans CO2, under the same tree during the day. And use another batch of CO2 outside away from the tree. Then take the Gans's of it, and see how you feel. Or give the Gans's to another plant and see how it feels. How we change it, would one plant die, would one plant grow faster. So there is a reality about this.

In so many ways, if you think of it scientifically, why do the plants absorb more CO2 at night? Because different M field connection with a field of the rays of the sun, (3:16). are created. But ?? are still absorbing. it's not that they switch with the light. Look at the evergreen plants, how come they always stay green? Because they use a spectrum, which is always the same, winter, summer, cold, whatever. So they don't need to be specifically linked to a certain given strength of CO2. Now we understand this knowledge, it's a lot to be done.

These are what I was saying before, it needs to be researched by our researchers. One of the interesting points is, now that we open the space to man, the key point is, what happens if we take a Gans of CO2, and take it to the moon, or another position in the U. How will it change? Would it stay as a Gans? Would it change color? Would it change its volume. … ??? go forward with ?? need to be answered. Then what we learn from it. We change the M field of the condition of the C in our body, and in one point, it becomes huge, to become a cell of the .. body of the man for the meat. And the same C in another position in the liver, does different thing, different M field. (3:18). Would the CO2's we take into space, or any other material will be the same, it will be like a gel, you go through it. Do we need to produce new conditions, materials can stand new environments in space.

These are what is to come and what is to be answered. This CO2 will change. Yes, 100%. Because from the tests we've seen, from Raman spectroscopy, from Infrared .. we don't see one peak of CO2, we see a spectrum of the CO2, which is a Gans isotopes. If one of these isotopes is in your Gans, ?? locks with one of the plants, it might, it will change itself, and bring others into play. And would the same, the CO2 you put under an apple tree, would it be the same if you put the same Gans patch, under an orange tree. Then if it's not, why do we have difference in fruits. These are the things which we have to be open minded, we can't have ?? because this is what it says. We have to look at the totality and understanding, and then we can change this.
Any other question. (3:20).

Q: .. What does it mean when you rarely remember your dreams?
K- ?? .. physicality so we don't remember it. .. I said, we call it, forgetfulness, we prefer to forget it, or it has nothing to do with the D of us in a physical D, so the soul does it job. It's just like walking down the street, other people having discussion, the other one cuddling each other, it has nothing to do with me, you just walk. But you know you have been witness to something, but you don't know the name of the guy, or the name of the people there. It has nothing to do with you. It's the same process. Go back into the memory bank of the soul, and you'll find out what happened in.
Any other question can we finish in next 10 minutes.

Q: .. (3:22). I do not know how they isolate and identify the new strains in physics with this madness in physics with genetic modifications, but in Pl how do we identify the different fields of the energy packages for which the Cups were used, Alpha Delta etc.?
K- Go back to Book 3, there is a paper published, I think you can buy it off the KF, it's called, "microbes, bacteria's, and viruses." read it and then you'll understand it.
Any other question.

Q: .. Germany Bavaria … I would like to ask if you are interested I give some deep meditation for what is, (3:24). healing, and to guide the people to use the higher ?? ascensions, in this life to heal ourselves and free our souls, ..
K- This I think has nothing to do with us.
Q: Yes, when you like, I have time to give some sessions.
K- That doesn't come within the work of the KF.
Q: What do you mean .. I can't hear you.
K- That does not come within the work and the scope of the KF. We don't get involved with these things.
Q: It's to integrate what you are teaching ..
K- A lot of. I understand what you are trying to tell me. A lot of KS of different expertise are bringing their expertise, and using the Gans T, to bring to, to make a better things for their, whatever field of work they are in, be it doctors, be it psychologists, or whatever, or being in a pharmacist, or anything else. This is what the beauty of the teaching is. We teach it freely for you to see how you can integrate part of it into your work. Into making a better life for others.

But don't use the Keshe T in a way of trying to use it, as a new Pl T to elevate the wrong ways of teaching, and wrong ways of bringing what I call, "school of thoughts." That's all we ask. You are not the first person, many .. We've seen it with the artists, (3:26). they put the Gans into their paints, and they make a new painting with the Gans's. ?? not to use it, but it's ?? ..
Q: Okay Mr. Keshe thank you.
K - .. that's all depends on you. Shall we call it a day.

Thank you for today. It's a little bit choppy this time, when the ?? breakthrough comes, I hope it will not be the same next week. But even it comes as part of the work, we have to be with the teams, where we are, will shift rapidly, in the teachings, if it needs to be. And

we delay the teachings or we bring free teachings forward, because this is part of our work. We are here primarily for next 2 or 3 months, as a backup to advisors, or in a way, pushing and shoving things with these people, to get them on the right path. Thank you …

ENGLISH TRANSCRIPTION

(:16). K- … We welcome you back as we endeavor to break new grounds, in so many ways, changing the parameters of what I call, the criterion for work of the KF. As you know we are closely involved with the peace talks in Vienna, and we see a breakthrough, this breakthrough will be coming through most probably in the next couple of weeks. The Iranian team has returned back to Vienna yesterday and with it, with the backing and

support of the KF T, in the hand of IEA (means: IAEA headquartered in Vienna: International Atomic Energy Agency) we enforce, we push to bring what we call, the condition of mutual policy.

As a nuclear physicist we give our oath to peace. In that respect, we, like, if you are a doctor, you aught to, what we call, medical groups, we work the same through IEA. We respect the heads of IEA in being part of an IEA team, with the KF disclosing new technologies, that become available to 5plus1, excluding the European Community. (:18). This will take shape, as we will see, and become gradually the cornerstone of the talk.

There is a major problem flow in the 5plus1, which now gradually has come to light. We know the American representatives are on the line, .. the Russians, and the Chinese are on the line, we know that the representative of Iranian government in on line. It has to be clearly understood, that Iran cannot be sanctioned for 3 & 5%, or 20% enrichment, where the T of the space needs 100% pure nuclear material. We have seen this in tests in Tehran some years ago, and a follow-up test. So the dilemma for the 5plus1 and the IEA, is how do we stay uneducated, trapped in the thermodynamics of the nuclear materials of today, or we all leap into 100% enrichment, pure material which allows us to travel the depth of the space. Which brings in new dimensions (D) of technologies in all sorts of applications.

In a way, we have, and we bring a D into the talks, that Iran needs to enrich 100%. It's, its God given right, it's an intellectual property right of the nation, but with a difference, with a proviso, that Iran mutually shares the T and knowledge of KF with American government, Chinese government, and the Russians, excluding EU. European Community will be totally excluded from all these, as you've seen at the beginning, Iran took the same pattern. (:20). As we discussed, European Community members, UK , France and Germany are excluded from any negotiation. This is what the KF required from the Iranian leadership and it was adhered to.

In so many ways, we have reached a point of breakthrough. But it will take time, it takes time to understand, it takes time to bring maturity to all sides. In reality, if we are sanctioned, or sanctioning Iran, or other nations, who develop into nuclear to be always, in what I call, third class knowledge seeking of the new … (break in audio ..) the 100% enrichment changes the position. Changes the whole dynamic of what we call, "mankind needs for development." We are in line with the needs of his Excellency President Biden of US, where he says, and it was the backbone of his election, "new technologies."

In the coming time, in the documents which have already be offered to the Iranian leadership, some 10 days ago, and the documents, which is in the hand of IEA, and the Americans and the rest of the national securities, we openly challenge, to allow Iran to produce 100% enriched uranium and plutonium, and at the same time other nuclear materials, and at the same time we openly produce dimensions of the radioactive Tritium, for deep space travel. Iran cannot be sanctioned on one, and then the other side of the spectrum, (:22). Iran cannot be stopped to develop deep space T.

We have negotiated with Iranian officials for long enough, and we see that the Iranian leadership has taken the position, to hold back the sharing of the knowledge. As the inventors and developers and sharing of the T, KF took this right away from Iranian government. Officially we have entered negotiations with the IEA, not to negotiate with 5plus1, but collectively to find a solution for all the nations, progressively to move in the direction of the enriched, what we call, radioactive material, purity as much as possible to 100%, to 99.999, that allows all the nations together, move in D of the space T. We have no choice, KF with the T just delivered, and T and systems, which are already on the table have the capability to make any nation overnight, one of the leading nuclear technologies in the world. We shared with you Knowledge Seekers (KS) the foundation and the fundamentals, but we share with the scientists on highest level, in a different way. The knowledge, which cannot be comprehended, and at the same time can be abused by others to show they are superior.

I gave the Iranian government a long time, a chance to take that position, we thank his Eminence Ayatollah K of Iran and his negotiating team in Vienna. We welcome them back to Vienna, as we see them coming with more proposals. But this time KF has put a proposal down to IEA. In our future meetings in the next few hours, we will expand, (:24). on sharing the knowledge on the basis of the KF, with the support of the Iranian scientists, and the backing of the American NASA scientists, who are working on the same. We welcome the Chinese who have worked a long time but they don't have the key and the coding of the system to fly.

We have to take this position as KF, as .. the developers of the T, the founders of the T, which is all of you. Literally, all of us knows, KS today with us, or those KS who have been with us, and have passed away, or they have moved to other positions in the R&D of their own maturity, to share this knowledge with our governments. As I said before, we gave it to the government, they hid it. We gave it to you, you developed it. You brought it forward. Now we share it with the organizations, which make the decisions on what we call, "the structure of the upcoming flight and systems." The reasons we have shared the, what we call, "the understanding of," with IEA, is because IEA is a backbone of all negotiations. In a way, IEA plays obedient servant to the governments. Where with this T, IEA become the dictator of, or in a way, not a dictator, but indicating, and dictating the new patterns of the use of nuclear material.

This does not mean that the enrichment of the 3, 5 or 20% by Iran, by Chinese, or the rest become the weapon of T. Using the 100% enriched nuclear materials, which KF has developed the T for, allows a direct control of a ?? only development. In a way, it stops the nations to develop nuclear technology as a weapon. (:26).

When I left for Tehran in 2008, I had one prerequisite to my agreement with the Iranian government, signed and sealed in the parliament of Iran in 2008. That my T would not be used as an offensive, but it will be used as a defensive. And we have seen over the years Iranians have kept to the ethos of the signed document. It has to be understood, that the totality of the knowledge belongs to KF, which is all of us. Which is the totality of what

we do, what we've done, and each one of us, has carried one corner of this huge carpet of knowledge, to carry forward to the next step.

My request from the Americans on the line, the Chinese and the Russians, and the IEA members of the team, is as follows. Let us share the knowledge of Iran freely with all nations, and make knowledge as basis for One Nation OPOR that, that becomes the nation of knowledge and T. In my talks with the IEA, and what is to come in the coming days and hours, is very simple. KF, which is all of us, (:28). exchanges the knowledge with the world leaders for peace on this planet. Which means we request from Mr. ?? the head of IEA, to take a lead in bringing the condition, that the nations can understand, when it comes to T, we are all equal, irrespective of color, race, creed and politics. In my upcoming talks with, and within 5plus1, excluding the EU, is that we have to take steps to make sure that the T is used only, and only for application in peace, application in development of peace, application in understanding the totality of the peace. It is paramount to all of us, and to all the KS, that we are in the verge, we are on the verge of work, that brings all of us a new D. We are not empathizing, we are not pushing with, "we have the knowledge, we have to be our way." We have the knowledge, it has to be all of us, our ways.

I emphasize with the IEA, EU will stay our of the framework of the discussion and knowledge, (:30). till the state of Belgium, situation with killing scientists, and my assistant is cleared. In creating conditions that brings conflict within the scientific world. The sanctions will go on the nations that carry out these kinds of work. And sanctions will carry on with the knowledge and T, with the nations, which are not, and do not have respect for children. We turn the table the right way, not for the knowledge, but for the abuse, which is the correct way.

This will carry on. I have informed the German, French, and British in the different ways that exclude the nations in Europe, who are in child trafficking, and killing scientists, ?? then we talk, you come part of. The way the sanctions was put on knowledge, we put sanctions on abuse. This will be taken through the UN in the coming weeks.

There is one fundamental flaw in our work, and that is we never put restriction on, no nation for knowledge, but we put restriction for development of the space technology for the nations who abuse it. This will carry on into the next phase. I thank the IEA groups who are in the background, and the Iranian administration for keeping to the ethos of the agreement. We don't work in the public in the front. We make announcements within the structure of the KF, which is our public platform of teachings of today. There is a lot of hope. There is a lot of breakthrough. (:32).

The 2 parallel line negotiations with Iran will follow. One on the proliferation of the matter state of the T, and one on the proliferation and production of the nuclear materials using the new Plasma T. which again belongs to Iran. In that process we see how progress shall be made. Do we run the 2 horses parallel, or do we bring the 2 together and run as one?

As we said, and it's thanks to you KS, who have made this possible over past years and years, is that, we are getting home. We are reaching the home of peace, but as was the motto, and stands for all of us, "knowledge in exchange for peace," works. It shows the governments how feeble they've been, and at the same time brings that, to all of us, that we need to accommodate each other. We need to understand the accommodation of the knowledge and T has to be on the back of understanding, that the T belongs to all of us .. as citizens of this planet.

In the due coarse KF will handle the situation, with what we know today as energy plasma (Pl) packs of different names and nationalities, which is popping up, that creates so much mayhem. We have to sort out the situation with .. 5plus1, and through the 5plus1 community, handle the situation, with opening the space and showing that the packages of Pl are part of our new life, we cannot inject and reject. (:34). We've seen the new D, the Pl strengths, which is traveling, and causing things, which we didn't know. What we've been touched with, the new plasmas, which now we understand, that African version of it, this is nothing yet, to what we'll see in the first excursions. In the first travels of the deep space. Because mankind will become so, .. in baffled by this new understanding, that one will come to be able to collect, and to use the energies of the Pl within the structure of the work of what we call, the space T. We need to be able share this knowledge freely amongst each other, .. to understand, that this T belongs to every single one of us, and it needs all of us to be able to .. transfer and transmute, and at same time, be able to use it for … application of our use in deep space.

Teaching starts here:

We have made many, many cases in the past, with the special processes, with what we call, (:36). sharing of the T beyond understanding of the physical life of the man, but in the D of sharing of the knowledge in understanding the totality, with the whole of the mankind. What this means, this is part of the teaching of today which has to be understood by all of us. I am trying to find the correct way, that we all understand, to explain this, that in the process of .. teaching we understand the totality. In the process of the teaching we become, to comprehend the difference between the knowledge of the physicality and the knowledge of the soul, or space, to what we call Universal Community. Where the deciphering does not rely on the extent of the understanding of the D of the physicality. Both in the .. the essence of the Soul of the Physicality (STP), or in the essence of the physicality. We know that the mankind, (:38). has lived a 2 track life, one in the D of physical, and one in the D of the soul. But now we have to find to be able to understand that, "I made man in the image of Myself," as we said before many times, is even in the knowledge. Is even in the level of understanding, .. level of the emotion.

With the upcoming 21st of December, where the manifestation of the totality of the what we call, Mitra, is to understand, that the Mitra is all of us. It's the collection of us, in the birth of a new cycle. It's understanding that the child of this birth, is a child of totality of the knowledge of the Creator, within His creation. We have to understand, that the time has come that the mankind understands both, the level of .. the physical life, and in the D

.. the soul, or Universal. As we said many times, man will join the U Community. But in reality the Universal Community (UC) has always been within the man, in the structure of the Soul of the man (STM). The physical D has ignored the existence of the U Community, through ignoring the existence of his own soul. (:40). It's the man who has isolated himself, it's the man who has punished himself in not being able to understand, that within the structure of his soul, as he has access to all the knowledge of the U, is the access to UC. This is where we have to, with the teachings, to bring both the D of the emotions of the physicality, and the emotion of the D of the soul, to become unisons.

In a way, that one understands the language of one, where the other one has already understood for billions of years, the language of the STP. The education, and upbringing of the new knowledge, is not that we will go into the deep space and we'll see this alien, or that position. It's to understand, that through the understanding of the existence of the STM, man will get access to all the knowledge of the U instantaneously.

This is where the teaching is headed. This is why you call it, and it has been said, the point, "the day of the end." The day of whatever name you call it. The reality is, that day, as I have said before, is the day when you recognize, when you in a way, connect, you become part of the existence of the U, by acknowledging and freeing the STM, within the D of the STP, that the 2 can interact.

In a hidden way, in the paper called, (:42). "Inter-atomic Fusion," I explained this in a very hidden way. I brought this forward, I brought this, that the understanding of the work, the understanding of the whole structure, that man has been the cause of his own separation. The Day of Judgment, where we judge, do we want to be part of the UC, and be existing within it, or we let the physicality go, where our soul has always been part of the UC, it finds its position. In the past few weeks, we gone, and I pushed towards more what you call, theology, because it is not theology, it's understanding the field of life in the U. Theology exists when you put mysticism around it. The reality exists when we understand the knowledge, the truth about ourselves, about our own existence.

It's been a long time of teaching, from the time of every prophet. Man has been made gradually, for those who understood the process of the education, step by step to bring man to today's point. Be it the true writing, the true essence of the messages given to Moses, to Christ, to Mohammad, (:44). and the rest. It's been a gradual education for you to understand, the .. ultimate goal of the unification of the STM and the STP of the man, that the 2 can coexist, but one becomes the support of the other, when it is in the material state, and one becomes the support of the other, when it is in the UC state, or what we call the state of the dynamic plasma. Humanity has taken, a what I call, a diversion, for a long time, to ignore it through theology, but in fact, the theory of existence sits within the structure of the life of the STM.

When you call it whatever name, "The Day of Judgment," the "End of the World", whatever you put. That day of judgment is for you, when you mature to understand in the physical D. Because when you die in the physical D, your soul has already taken its position, and it's been what we call, "taken dimension," in where it was safe for it to

develop, and to become the seed of another life. The Day of Judgment is the day when man in the present existing life recognizes the beauty of the creation, and understands to respect, to connect, and interact with his own soul in both D. Then we have reached the Day of Judgment. (:46).

This where none of the religious leaders, none of the religious people, none of those who looked for understanding the process of creation, could ever explain. The maturity of the man is not to be frightened from the point of the separation of the physicality from the soul, but to able to work together, that the physicality will have no demise, as does the STM. The point of the recognition is the Day of Judgment, where you judge and you understand. The process of the teachings has been for you to be able to interconnect.

We are messengers from the soul, to the STP, but the message has to be read the same by both sides. In the D of physicality, man has brought, and has thrown more "spanners" into the work, that will clog up everything else, that he cannot understand ?? it. My call goes upon the religious leaders of the world of today, to lay down your frock, and understand the process of teaching the correct way. The way you all souls understand, to become the teachers of showing the true dimensions. Those who are fake will show themselves very rapidly, because they will be clogged up in the physical D.

On the other hand, it is the responsibility of each man's soul to understand the truth about his soul. In that way, man will understand to respect one's soul, it means to respect the others. It means to always be at the position to ask, (:48). and not to take. This is the change. I ask my soul to allow me to be connected to. I respect the existence of my soul, through the D of my physicality, and the D of my physical soul.

In so many ways, now maybe you understand more about the spirit and the soul. To understand, what stands between the man and his soul, and his Creator, is the man's conduct itself. When you ask with the purity of heart, you shall be given the right. When you take without asking, you'll be blocked, you will not be enlightened, you will not be given the right. Mankind has to find how to ask that question from his soul, to be given the right to live within the D of the knowledge of the U, and UC, and collectively within the D of the knowledge of the Creator.

Understanding the totality is the cornerstone of laying down the fears, that everyone will understand what is taught, but everyone can be enlightened with the knowledge, which has been released. Teaching is the way of life of man. Sharing unconditionally is the condition of the life of the STM. Somehow, (:50). the 2 have to intermingle, the 2 have to come together, that the humanity reaches a new D, .. come to understand the totality of its work. The mankind of today needs to be part of the essence of its own existence. Mankind needs to be part of the essence of the UC, which is the existence of his own soul.

You always looked that you will see a UFO, you will see something else, you will touch and feel something else, but in fact, it's all within you. It's you who has to bridge that gap, it's you who has to put the STP close to the STM, that it does not need the capacity of the

brain to create emotions of the mankind with it. Where in that position, within the structure of the STM, you feel the emotion of the soul. You become that seed of the brain, not the soul to become the seed of the physicality of the man. Humanity in the coming time, in the coming weeks and months and years, will start to be enlightened in masses, to understand it, to be able to develop it.

My teachings will be released beyond your imagination across this planet in coming weeks and time. In so many ways of its own, will take its own shape. (:52). Will bring sanity to insanities, from killing scientists for the benefit of pedophiles, and those who attach to D of physicality. Use the physicality, enjoy the presence in what is given and what is made available, but do not make it a cornerstone of life, and the KF, which is all of us has already reached unison in understanding of the connection of the STM. It's a collective soul of us, and KS who truly seek the knowledge of the creation will enlighten that position.

What I call, the candle, has been lit, and it will shine across every dominion on this planet and beyond. The life of peace for humanity has started. The new life has taken shape, and that new life, is collective effort of, not the D of physicality of the man, but the D of the soul of humanity, and as I said, I always ?? the two, those who carry the candles and those who think they have the candles. And one day, one will light the other, and the other will support the other one's to be lit.

My call goes out to all you KS, be proud that you have been touched with the knowledge of the Foundation, that , that knowledge, is the key for you to find the essence of understanding of the totality. My call goes upon all you KS, endeavor to understand, (:54). endeavor to share, endeavor to comprehend the reality about your own existence. And then try to reach your soul, by understanding the operation of your STP, but at the same time, be humble enough to live amongst men, that in time, every single one of you will become a messenger of his own time and place, for your own STP, where you bring the message from your soul, to the STP, and you enlighten according to what you need.

As I said, in the world of the U there are no universities, and there are no central banks to rob. The only punishment for man, is when he deprives himself from attaining and receiving the new knowledge. There is nothing worse than that punishment, what we call the hell, and the heaven. When we deprive ourselves from gaining the knowledge of the Creator, is the worse hell man can ever live in. And attaining to understand the knowledge of the creation is the heaven that it brings, and opens doors to all of us. As I said many times, the gate, and the key to the heaven is in the hand of the man himself. All comes through understanding the Knowledge of the Creator (KOC), and not in a way, the gates to house or wealth.

Today I opened up a fundamental key point for all of you as KS, as these recordings will be listened for millions of times across this planet and beyond, by those who understand, the change has already started. It is your obligation to enlighten yourself. (:56). There is no punishment, except you who deprive yourselves from gaining the KOC, and through understanding, you become a member of the UC. Then with that knowledge build your

own UFOs, build anything you like to travel any D, because then you have access to all the knowledge of the existing totality across this planet and the U. We have brought the D of the knowledge and the love of the Creator on the planet, for Mitra and the Creator to enjoy. In that point, mankind has become to understand, that the Mitra is the soul of the totality of the creation.

This is what you have to understand, and this is what we endeavor to change, that you understand more about your own existence. It does not matter how you play the game. You do not need to be human to be enlightened. Enlightenment can come to the animals and the trees, and those who travel the depth of the U, in the far corners of the Unicose. As the key of enlightenment has been released. It's for you to use it to open the STP to the soul of yours, direct without intermediaries, without the prophets, and without what I call, religious leaders. We invite even the religious leaders of the world to open the gate and access their soul, and see what they have done in the past times, has been correct,for their soul of the humanity, and the mankind, at the same time.

We ask the KS, as you have done in the past few weeks to raise the soul of the negotiators in Vienna. (:58). To raise the soul of all, ofthe humanity, and the ones beyond human D and positions in the U. As now you know through your soul you can reach every created things in the U. As Mitra brought every single line from them, to be part of the creation of the new generation of the life for the children of man.

Understanding the process is not easy, as we have been put through different dogmas by our leaders, and religious leaders, and our own feeble understanding of the creation. Mankind has entered the point of understanding the totality, but it's mankind, who can keep himself from becoming part of the totality. I have taught enough for those of you KS who understood the teaching, to walk away from the path, and to join, to understand more to enlighten the others. The souls like Jalal, and Alex, and the others who have been with us, to guide us through different steps of these progressive developments over past years, has brought us to this point. Now it is us who has to become that next teacher, to teach our own physicality, and not the others, in how to become connected to the D of the STM. And then thy shall need no Messengers, except the message of the Creator, which is given from the STM to the D of the STP, then the man will exist and live for eternity. As eternity is the existence of the Creator, and the man is created from the D of the existence of the love of the Creator. (1:00).

Today's teaching, if you understood, has opened a new door for all of you, irrespective of your color, race and language, and the D of the positions where you are on this planet or beyond. But there is one thing for sure, the love of the Creator shines, and will shine amongst all of us, and at equal share. It depends if you want to hide in what I call, "the holes of the underground of the ignorance," or we stand in front of the sun and absorb every single ray, that it can shine upon us. Mankind has 2 choices, to hide in the rat holes of ignorance, or to stand outside and shine like the sun itself. As the STM, when its truly understood the knowledge of the creation, will shine the same as the sun, and some of the souls who have elevated, when they shine, the sun will absorb from them, then shining on them. This was given to the state of the soul of the Christ, bless his name. This shall be

repeated by every man, who wants to reach that state of what I call, the Son of God. Which means the lights and what we call, the knowledge of Creator in man, not sun as the created thing, but the sun as the rays of knowledge and love of the Creator.

Maybe today we have broken the path, .. in what is to come in our negotiations with 5plus1, (1:02). will bring to the point, to enlighten totality of humanity, to protect the children of the new cycle of the children of man, which with the birth of the new cycle, will bring the new D to all mankind. Amongst us, within us, and within ourselves, we'll find both the STM and the STP of the man, to work together to become one, to serve the totality of not humanity, but the UC. Maybe then you shall understand the position of the new universal messengers, which is in a way, the light of the Creator.

We go for a break and we come back, and during the break think of one thing, not the products, but the product of your soul which can enlighten and support the negotiators, and especially the members of the IEA, who now will have to walk the path, very fine path of how to bring the KOC, and the knowledge of the man to understand how to use both, to create prosperity to humanity in both D. Maybe sooner or later we achieve it, but until they don't understand, we still stand still, with the totality of the knowledge.

Thank you if you would like to go on break … (1:04).

Proofed >>>

>> BREAK >> 410 KSW Dec 9 2021 (1:09).

R: (1:10). I thought we could take 2 minutes SILENCE for peace talks in Vienna to give from our souls to elevate …

(1:16).
K- .. Yes any questions you have …

Q: .. would it be pertinent to clarify for us, despite your modesty in making it difficult to speak about your mission for these new times when human science finally meets with Divine science. Could you tell us the source of so much divine knowledge and how you perceive it and interpret it for our understanding? I think your answer would help us to bring in more .. (1:18). BC.. new KS perhaps.
K- Would you like to read again ..
Q: repeats .. would it be pertinent to clarify for us, despite perhaps your modesty in making it difficult to speak about your mission for these new times when human science finally meets with Divine science. Could you tell us the source of so much divine

knowledge and how you perceive it and interpret it for our understanding? I think your answer would help us to bring in more influence to the new KS.

K- The enrichment of the knowledge comes from within, not outside. It is, when we talk about the generality of the knowledge of the past, or the present. I am trying to explain it in a way, as a unification of the truth. (1:20).

The knowledge we had, or we gained up to now, doesn't matter even if it is in boiling the water, which kills the bacteria, or nuclear weapon T, or anything else. These are still part of the knowledge of the Creator. These are not the knowledge of man. Any knowledge we gain, it is part of the knowledge of creation. It's not that, as I said, if you read the papers, the scientists, are prophets of, are Messengers of the Creator, the same as those of theology. So there is no separation, except what you want to put on it. The extent of the knowledge, which we put on, is that the whole structure of the knowledge is all the same, it's one line.

It depends how much you are enlightened to see further down the tunnel of the knowledge. In what purity we see, and what we decide to see it, in which part. It's very much like, when you decide in the science to go through the medicine, or become an engineer, or you have one which sits and sees the whole lot. (1:22). So we are those who see more, and have access to more knowledge. Our knowledge is the knowledge of the creation and the Creator. The same as yours, but you have chosen to see, let's say 10 cm ahead of you, which is all physicality. We choose to see directly to the light of the Creator, to the end of the tunnel.

In that process all the knowledge's within that, is open to us. In a physical D we are no different. In other dimensions, when it comes to the knowledge, we understand more, we see more, and in a way, even us getting enlightened in stages by stages, that we understand the process ourselves, that we can transfer the knowledge the correct way.

When you look at the what I call, "3 holy books of the new science," Book 1, 2 and 3, opens the knowledge of the U, and not knowledge of the man. But if you are materialistic you look at it in a matter state. But when you put book 1, 2, and 3, you see the Knowledge of the Creator. It depends which end you sit and look at, you look at the Book 3 and down the tunnel of the light to Book 1, you see all of it, how we become matter state. But when you look at the book 1, and look to the tunnel of the light to Book 3, some of it ?? , because (1:24). the light is shinning in your eyes, you are blinded to the totality. It's very much because you are blinded with the matter state, you don't see the others. When we look into the sun, when we look directly we don't see the totality of it, we duck and dive a little, or we put something in front of us to dim the light, that we can see the sun directly. This is the same in the knowledge.

We stand on the universal side, looking down on the matter end. Where humanity in the physical condition stands in the matter end, and looks in the direction of the sun, of the light of the knowledge of the Creator. This is where it comes, this is where is the difference. Where you come part of the way through this light, and you look down, back

on the knowledge of the matter, when you are enlightened, you are in the same position, but you have a light behind you, and you see what we call matter state in front of. So our knowledge is not, what is our position, what it is. We stand to look in totality of the reduction, in the essence of the creation, and in the matter state, we try to understand what has brought us here to become matter state, and try to look back into the light of the Creator, to understand more. And that's the only difference. In D we are the same. In comprehension we are all the same. It's the enlightenment that's the difference.
Any other question. (1:26).

K- Before you go. There is a message in the chat about the MaGrav Units. KF has all the MaGrav systems. We just don't have .. .. KF has, or whatever we sell now, we have a stock of. We are not short of any stock in KF. It's just that we are facing a huge man power shortage, within the structure of the KF, and getting things done. The Corona situation has not helped us much, and this is part of our problem.

Your MaGrav system is already built, has been shipped from Italy to KF Austria. We are not going to build it. It's just a matter of getting the time, or finding people to bring all these things together, the adapters, the plugs, and to ship, or finding the materials we ship from other points into one position. KF at this moment in time is not short of any materials. The Enhancement Units (EU) are getting built in China at a rate of 3 a week, and after New Year we'll try to go to about 100 a month. Everything else, which you see on the KF website, is more or less, all of it is in stock, unless we receive a large order, which we advance forward. It's just that we don't have the trusted man powers who work within us. As you know we have expanded, and separated a dispatch, and everything else. (1:28). (connection broke ..) …

So we are not short of goods, … we are short of work force to dispatch. Everything we sell I have made sure on the KF Store (1:30). has to be in stock. That the validity and capability, and this has cost KF a lot of money, in the past 6 months as we organized. We have shipped to 3 locations. which means all the goods, if one can't be met from China, by our new warehouse in Austria, which is getting extended .

If there is a delay we apologize, it's just the man power, that is our biggest problem, and bringing people who know what they are doing, then just bringing people. In so many ways, we stopped recruiting people who are KS, but actually they could not do much. They are perfect KS, but in a physical working condition they cannot perform. This is one of our positions which we are changing gradually, in the coming weeks and months.

Corona has not helped us, we cannot bring people into Austria, as we started doing, because now with the Corona and injections compulsory, nobody wants to come and live in Austria. Because from February they have to have injections, and nobody wants to be in that phase. This has created another cycle of problems for our manufacturing. We are looking to move .. part of our manufacturing out of Austria very rapidly. This we'll know in the next month or 2, we allow our work to expand very rapidly .. in manufacturing and deliveries. We apologize, it's not that we don't have the stock. I can send you pictures of your MaGravs sitting on the table in the warehouse. But it is just getting everything

sorted. (1:32). and produced and putting in position to ship. … the people boxed it the wrong way, put MaGrav in the Car MaGravs …
So we are not short of, it's just man power. I apologize for the delay.
Any other question.

Q: … When people in their physical life accumulate fortunes, and for fear of loosing their fortunes, or being stolen by someone, they bury something valuable. But then that person comes to die. The question is, does the soul become attached to that fortune, and when someone finds the physical treasure, does it free that soul? Or is it not like that?
K- You've brought a point, which I am very familiar with. I know it first hand. (1:34). If the soul of detachment of physicality is still attached to it? ?? not ?? the STP has left behind, in becoming part of the STM. So there is no attachment to it.

This has happened within my family in the past century, or a bit more, when my great grandparents used to be in Georgia, as part of the .. Jewish community in Georgia. When the Tsar came in, allowed the Jewish community, that were of the Iranian background or whatever, to decide to go to Poland, or to go to .. Iran, back to the original home.

What my Great grandparents did, the Russians became very clever in that, the Jews were taking a lot of jewelry, diamonds, assets by swallowing it, because they used to carry a lot of diamonds and that kind of things. And they buried some of it, within the structure, and they left the structure of where they buried, the what do you call it, family loom. they traveled back to Iran through Caspian Sea, but they were kept in camps for some time, to make sure if they swallowed any jewelry or whatever, they could collect the discharge in special toilets they built for the people going through the transit. (1:36). ?? My oldest second cousin was born in Russia, she was entitled to carry a Russian passport. When they opened Russia, she went back, trying to find what was hidden by the family, buried in the ground for one day they come back, to get hold of. She met some of the ex-families there, but nobody knew the totality. She could never find it.

So I am quite familiar with this, but it is attachment, detachment. Nobody knew this, except this lady, and she went to get it. There was always a discussion in the family. Why does she go back to Russia so much, especially going back to get this .. family loom. There was a lot of sentimentality between my mother, and the family, that why has she done this, this was to be buried and not to be touched. But to her was too big to have a sentimental, or physical value to get hold of. .. I said to my mom at that time, she always been like this, physicality more than understand, that was a memory, that everybody had in the family, that such a thing was buried in the place, and now she has literally destroyed the emotion and the connection of the family that the wealth was buried there, and one day we'll find it out, and will be found. .. (1:38).

A very recent one .. found packages of precious stones ..

Sierra Leone .. (1:40).

.. is part of what we have to analyze it. As far as we can say, it is part of the STP.

(end of question)

K- I promised you to show you the picture. You can see your MaGravs System, see it is just a matter of dispatch. they took the wrong box. .. it's a car MaGrav …

Now you understand when we tell you we are not short. it is just the man power problem and you MaGrav unit, .. is part of this stock. (1:42). It's there for 3 - 4 weeks trying to get sorted out.

Next question.

K- Can I add to it. You will receive. We will start promoting the MaGrav Units extensively in the next couple of months, once .. our factory in Tehran, which is primarily designed to produce MaGrav systems, .. goes under full production. The factory is all getting done .. We will start promoting the KF MaGrav power units exported from Tehran ...
Next question .. (1:44). It's the new logo of the KF. …
Mexico has tried one with the green lights .. You will see new developments out of Iran …

Q: .. Where can I find the article on inter-atomic fusion, or can you tell me a little more about that?
K- Listed for sale on Amazon.
R: It's in the list of published and unpublished works. ..
I was wondering if that info was part of the books. (1:46).
R: These are the books and electronic documents here. It's on the list here.
Here are some extracts from the papers listed here, but we don't have a link directly to it.

K- .. A lot of documents from the KF was stolen from KF, in the past by the Belgium's, and they are proud to show it. These are the assets of KF, and this nation kills and steals, is their nature. And as I said, pedophilia and prostitution and stealing is part of their work. Sooner of later we get these back into the ranks of the KF archives. One way or another the knowledge is there, and the documents sits within it. (1:48). You'll see how. It's in the archives of the knowledge of the papers we have kept. We'll see how we can share it. There is a hard copy of these on our disks. We have the disk stored .. and it is with me. I personally moved them into a safe place, for them not to get stolen again. In due coarse we'll get it deciphered. There are many, many of our disks with a lot of knowledge which has never been shared. Which will be kept. Even when we changed computers we took the hard disks out. Because there is a lot of communications and new papers which sits in them, and it will be shared. The only thing we lost which is unfortunate is ?? ?? when we switched from .com to .org, we lost some documents in that .. .com section, which I am sure a lot has been stored.
Any other question.

Q: .. Mehranez .. mistake .. (1:50).

Q: Jalal, … it's regarding the papers here. Yesterday in the teachings, I had a question from Claudia, regarding "the truth about Homeopathy." .. if she can go and order this paper, it will add a lot to what she knows.

Yesterday the question was that they use vibration to change a condition. I tried to answer it my bizarre way … I tried to say, .. we make the same thing by MaGrav positioning, and the different way in Homeopathy, by shaking the position. I hope I could answer it. (1:52).
K- .. the paper called, "the truth about Homeopathy." This paper was written in a few hours. I give you a history behind it. My sister, she is a dentist, and at the same time she is a Homeopath as well. Dentists usually when they get older their hands get shaky, they try to still stay in medicine, they do other things, Homeopathy, Acupuncture and that kind of thing, They keep busy. She is a qualified Homeopath … she asked me the question, what is the whatever. I said, let me rest, and I tell you when I wake up. I was lying down, and when I woke up, she said, I have seen you, you're going to write a paper. I have seen you downloading. How you clarified the knowledge while you are asleep, how to do.

I said, "it's not downloading, it's just accessing to the right file, that you can get it." I got up and that afternoon I wrote the paper, " The truth about Homeopathy." The word I cannot pronounce correctly if I am right. Rick, it's called ?? when you shake it, there is a specific name in Homeopathy for it. It's the way you shake, and the number of the shakes you create. In how you realign the number of the energies and atoms of the water.
R: It's succussion or something like that
K- Yeah, it's in the paper.
R: It's succussion the action of process of shaking or being shaken, (1:54). especially with violence.

K- yes, shaking. In a way, it's a realignment. If you understand this, it is very much like how you shake it. In Homeopathy there is a slight problem, that they haven't got this succussion the right way, because the machine shakes in one direction only. If you understood the science of magnetism, and you could change the shaking, not only in a vertical, but shake it, in the same, different directions, and angles in the machine, you can cover more. But they have not understood this.

We know this, because if you go back into the understanding of magnetizing the Fe. If you have an Fe vertically down, it doesn't magnetize. If you hold it in a specific angle and you hammer it. It depends how you hammered the nail, it will become magnetic. This is one of the reasons, for example, unknowingly, all of you, if you ever held a drill, and you tried to drill a .. screw into a piece of wood, and it bent a little bit, or whatever, you see the wasn't magnetized before, but if it falls, it sticks on (the drill). Because the rhythm the screw driver hits the head of the hammer, and different angle, if accidentally you reach that angle, you magnetize the screw. So we all done it before without knowing it. (1:56). But scientifically know what it means.

The Homeopathic people, they have not understood this. This is the truth about how you align by shaking it, all of material in one direction. You can hammer a nail in a given

angle, never it magnetizes. But if you apply the right force, with the right angle, the nail will magnetize. We've seen, all of us, as I have said, we use these new small hand drills, we've seen it, but we never understood it. It's the same with the Homeopathy. Homeopathy, it is how you shake, what angle, if you add it. You can add all the angles into it, and create it.

But we do the same thing in Gans production. When you produce Gans's and we put them in the high speed, depending on the speed, and what we put through it, we create a plasmatic field of it. In the Homeopathy, we create a massive state fields. In the Gans production we create the plasmatic fields of the same. One is the soul, and one is the STP, if we call it, in D of physicality, and that's the truth about .. Homeopathy.

So when you realign M fields of it, in the strength of the let's say, the cell of the heart, when it interacts, it interacts with the heart. This is what we do with the Gans plasma technology, but in a more advanced way. And that's the truth about what we call Homeopathy, and thanks to my sister, asking me, can you explain, and this paper was written within a couple of hours. (1:58).

Q: Regarding the square. Mr. Keshe when are you going to teach the square knowledge?
K- What do you mean, the square knowledge?
Q: There is knowledge behind the square.
K- What knowledge? What is your extent of knowledge? What's the extent of your understanding?
Q: Here ,now, in this position?
K- Yes, you are in teaching, we are all KS. What's the extent of your understanding about the square?
Q: Yes, how we achieve a square out of the fields.
K- Now I am going to put it to you, the way you do it. I put 2 questions. The square as doubling it, or the square as a shape?
Q: … I think that makes no difference in my opinion.
K- It makes a big difference. It makes a big difference. What are you talking about, there is a big difference. One is in the number and one is in the shape. (2:00).

When you want double the strength of the Pl, it's a different T, then the one which you talk about the shape as a square. Increasing the energy of a Pl is a specific T. It's very much deep in true essence of cosmology. Can be done in matter state, but it's not the way you do in electronics, with increasing the current or whatever. Increasing the energy of a Pl, doubling it, is a unique understanding of the work of the interaction of the fields.

Q: Isn't that the same as what the skin do?
K- No. The skin works in maybe, in a similar way, but not exactly, not really. And going to creating a square as a shape, we know the world of science has a big problem with that, they say, the light cannot be bent. But plasmatic fields can be bent, if you know how to bend it, because part of its spectrum, when it is a matter state strength, becomes conditioned to the matter condition field strength, which still not, you can only bend the light, (2:02). you can actually square the light, too.

Now that we understand each ray, if it is particle, or photon, or is a ray, then you understand how, you can change and make a light, as a photon, to become a square. You play with the pull of the gravity or M field strength within the light, and you can bend it. It's an unknown knowledge to mankind, but in due course, we teach. It's part of the transportation and transmutation system.
Q: .. that's why I asked it.

K- Yes, it's part of it. When it's a particle we can do it, because when it's a particle it carries both D of GM field, and if you have systems, which can interact, can put, this T in a way, was used very recently, by Iranian scientists, without them knowing it, we know it was used, one day I'll refer to it, I'll explain.

You can bend the light 180 degrees to go back down the line, which it has come, by changing its GM field, and this is part of the creation of cosmic rays. Most of the cosmic rays comes by reflection of the light itself, the field itself, back down its own tunnel. In a way, you laser beam, the laser beam. But in that condition it's a laser Pl, it's mono-energetic, which can be sustained, it's not very easy, it doesn't happen often. But because of, due to the size of the cosmos, it's a frequent event, (2:04). but it is not an easy event. It's understanding the knowledge.

I called this once, the game of the Russians and the Americans in 1950s and 60s. The Americans sent the match box to the Russians, and they waited, and the Russians sent the matchbox back to the Americans, if you know that. Then the Americans wrote to the Russians, that you didn't see it, there was a micro fiber in the box, you did not see it. The Russians sent the message, look down the center of the micro-fiber" we made a hole in it.

This is the reality, if you can become that hole, within the same light, then you can. this leads to creation of a lot of new knowledge, which was hidden from the man. It's the essence of the creation of the cosmic rays. Because when the cosmic rays moves down, that is created out of the essence of the interaction of the plasmatic fields, within the plasmatic fields of the same strength. In a way, you cut through a butter, with a butter. Any other question.

Q: Mehranez, (2:06). .. when we see the image of a saint, we see the lights in the painting, like a star shines. Is that light, and people at the time could see that light? Because they are painting that light … ?
R: You mean Saint people. The rays of light painted…
K- This is painted, it's the light of enlightenment, to understand. Because you have saints of a specific thing. Like on the, 2 - 3 days ago, on 6th of December it's the .. Saint Nicholas, .. saint of children. In Orthodox and Catholic church, on 6th of December the children wait for him, he comes on street and gives children sweets. He looks like father Christmas, but with different kind of hat, to gives sweets and gifts to children. That's enlightenment, it's not anything else. (2:08). It's the sign of enlightenment, it's manmade to show they have been enlightened, to that knowledge, for that reason, for whatever specific reason.

Q: But can we see. Could people at the time see the light around the head of the saint?
K- You see the light around the holy people, even you and me, depending what we are holy about. It's the aura, you call it. It depends how you want to explain it.
Q: Aura is the same as that light?
K- Yes, the same interaction. It's symbolic of enlightenment. It's not that you see a glowing, glow on top.
Q: Is it why people are nice to people, because of that light which they don't see?
K- It's enlightenment how you can reach, to what extent you can reach. This is enlightened, which is human dependent more than anything else.

The Messengers of God are seen in the gold and the white light, and when you see it in the white light, it's the level of the affirmation to the light of Creator. Which is the same, it's confirmation of the existence and interaction. But the rest is what we see in the D of mankind. (2:10).

Q: .. Does just seeing and enjoying the beauty and perfection in nature, and all forms of creation, feed the STM.
Q: repeats .. does just seeing and enjoying the beauty and perfection in nature and all forms of creation .. feed the STM
K- what does that mean .. can you translate.
R: Well when we see the beauty of nature, does it feed the STM as well as the STP?

K- Yes, when what we receive in the STP, if it is at the strength of the connection to the STM, yes, you transmute, and transfer. This is what we do at the point of death. At the point of physical death, what is at the strength of the STM, which has been a common denominator, or embedded in every cell of the man, in being in communication with the STM. These all get transferred back to the soul. It's like there is a bandwidth of the totality, what is at the strength of the purity of the STM, that every cell, (2:12). reflects back into the, or given back to the STM to carry. That's where the elevation comes from.

That's why suddenly the strength becomes so much, that the distance gap created. It's like when you put 2 magnets and they jump away from each other. The stronger does not move. The weaker moves away, because the stronger holds. It's the way we travel the space units on it. It's when that point when the STM field strength, totality of the all, every single cell in the body of the man, which has its own soul. Is given back to the soul, or returned back by the soul, because that's how you get psychosomatic. You get the physicality, and you get the STM, and when the don't interact, when there is a problem, the STM cannot connect, or the STP of the man does not connect correctly, in sending the messages to the STM, with what we call, interference of the emotion, you get psychosomatic problems. Where the soul and the physicality don't match in understanding transfer of the fields, and then where it comes from that field, is directed, and connects to the soul, and the physicality cannot match, and leads to cancer, or whatever it is. This is the truth about how we create most of our psychosomatic conditions.

In that position at that point of death, every single soul at the strength of the STM, which is a collective of the fields, which is connected to it, is returned back to the soul. That gives a boost, what do you call, not a boost, but a strength in totality of the field, which in a way, rejects, distances itself from the STP and we call it a point, because it becomes so far, we call it a point of death. (2:14). Or separation of physicality.

This is what we fully should understand, exactly why. If we are able to hold onto, to elevate the STP to a point, that there can never be that separation, man will never die. The "Fountain of Youth," the "Everlasting Life," is understanding how to elevate the STP, that the fields of the STM and STP, don't become so, what we call, separated, that they reject each other, or they create a distance, that the physical life cannot carry on. This is the fountain of youth, if you understand this, you will understand why races live for billions of years in the space, because they can adjust that, very fine.

Those who by eating, by living a certain pattern of life, can create that balance, and then, that leads to the next one, and the next condition, and the next. And ?? way down ?? understanding of the physicality and the soul, the STM and the STP one can literally live in any D forever and ever. Are you balancing what you take and what you give.
Carry on please.

Q: Azar, I didn't have question. (2:16). Jalal brought up Homeopathy, and then you were talking about the last man standing … My husband is Homeopath and Chiropractic …

(He did remote healing by making homeopath with mind …)

(2:18).

Q: Jalal Aura which is higher source …

(Mr. Keshe tried to come in but they ignored him he remained silent)

Q: (there is a point you go .. husband goes to a place where there is no you .. has to watch TV to come back ..)
(2:22).

K- Any other question

Q: Jefferson .. It's not a question but I would like to bring an understanding …
(2:24). Starts to read the countries involved in IEA
(2:26).
(2:28)

K- Thank you. The members of IEA, (IAEA) International Atomic Energy Authority, is a collection of different languages, and different paths of belief. When we look at .. the structure of the UN is the most what I call, deceiving organization in the world. IEA is slightly better then UN work, (2:30). but in a concentrated way, in self-proclaimed

leaders. In .. UN Security Council or what we call, collective self-proclaimed leaders to control everything, is a different proposition, then IEA .. as an organization. It represents more, it represents science, not politics, which they brought the politics into it. Where IEA is a scientific organization. It's the way I look at it, it is part of what we said, the scientists are equal to the prophets of the soul and theology.

In so many ways, we try to reach as much as possible, and that' why we asked the KS. The chief of IEA is Argentinean, well seasoned diplomat. But the other members are of the same, before we had symbolic, this time we have somebody who actually understands the diplomacy of peace and nuclear T. They have brought people with the right caliber, and with the right understanding, we can reach a lot. My hope in the coming meetings with IEA, in a very short time, is that we finally break that barrier, understanding of it.

It's not a bargain, what we give, to bargain what we can share. the whole new approach from the Iranian side, or KF as part of the Iranian organization in the 5plus1 is, (2:32). we leave you to negotiate on whatever you are talking about, but there is another option. What are we going to do with this new option, which all of us need. It cannot be excluded. My hope, and it is the same with the members of the IEA, is how can we bring the 2 sides together. How can we put a sanction on the knowledge, and then how can we share the same knowledge from the same country in a more advanced way. This is what is the dilemma now.

This is what, was one of my biggest objections to the Iranian leadership. We are in to negotiate for peace, but why don't you, or why do you only show half of the cake. If you are negotiating, you negotiate from a point of power of knowledge, and not the power of destruction. If you play innocent, you have to deliver the knowledge, that we have a more powerful T, that we don't need this. This is one of the points of my, what I call, separation from the Iranian leadership. My suggestion from the beginning to the Iranian administration was, we go in with the power of the knowledge, we go in with the understanding we are not here to beg, we are here to share. Somehow there is a lot of financial gains, there is a lot of financial dog fighting within the Iranian administration, which we cannot handle, it's not our job. KF has taken this diverse point of view to bring that.

We know the both, not just both, (2:34). all the members of the negotiating teams are here with us in this meeting on different channels. They know we talk the correct way to bring, to share. This needs all of us, because this knowledge, when we take to IEA to negotiate, is to be shared by all of us. We are not fighting, as members of the KF with IEA, 5plus1, we are not fighting for superiority. We are fighting for sharing the knowledge of the, what I call the Creator. I am sure in the coming hours in our meetings with IEA, we'll have a lot of second round of bashing about the heads, to ignore one, that you can keep the sanctions, but you cannot ignore one, where knowledge can be given to all the nations.

Our Chinese friends are here, they know, when we were invited to collaborate with the Chinese space agency for the design of the space reactors, which is on the table of the

KF, they wanted the fuel combination. "We already have built it, we don't know how to fuel it." And that was a lot. That was a very interesting joke of me, which was played by the Chinese space agency people. You built your reactor, but we cannot fuel it. "Can you give us the fuel combination."

This is what I call, part of our problems. Not to give the fuel combination to one nation to become superior. Not to give the superiority to Iran, that then, they cannot tame on the name of the religion. (2:36). But to give it to all of us equal, irrespective of language. The only place as I said, for a nuclear physicist to find home to work, to understand, to show what it means, is through IEA.

We kept this away from public, but we collaborate directly inside to bring a consensus with all of the leaders. This is part of the game, this is part of the game of understanding politics of the nuclear T. We especially open this today, because we are getting a very crucial point. The Iranian team is back on the table. My request to the Iranian leadership, let's play all the cards on the table, and see, it's not who is checkmating, but who is actually "mated" it themselves to "check point." Then we'll see how we develop it. We'll see how we go to the next step. The whole process is, to share knowledge in exchange for peace. Peace for humanity. To exchange knowledge, not for finance, but for superiority, where collectively now we can go as One Race. It's very nice to see, all languages are covered within the ethos of the IEA, and most of the religious groups and leaderships, are in it. Some are on the boundaries some are within it.

But as I said, sanctions cannot be on the basis of knowledge. Sanctions have to be on the basis of what wrong doing has been done. You don't punish someone who studies to become more knowledgeable. You punish the one who abuses, and this will change. In the coming weeks you will see.

We bring heavy sanctions on the state of Belgium. (2:38). This is part of the agreement. Then no nation, no one can travel to Belgium, who has been, or the way now, you have to have a Corona certificate, you have to prove as a Belgian, you have no connection and you never been involved in any pedophilia, any child trafficking, and we increase this one to, state to state. Belgium is the beginning, because they are the center. Then we'll see the correct conduct, then we'll see the changes. This is T in exchange for peace, but peace for all our children. Peace for the children of man, that the new cycle of children through the ethos of Mitra can be developed. You'll understand slowly what we are talking about.

As I said, all the pedophiles returned back to Belgium. All the abusers go back to Belgium, because they have been safeguarded in safe haven, and now we open the door. Anybody who has been outside and heavily involved, now they know they are going to be caught, they have gone back to Belgium. Even those who left KF recently, because they have been given sanctuary by their nation, to abuse more. You will understand very soon why they are going. You can't have connection between the man, and the UC without bringing peace to our children, to our life, to all of us, because our children are the next generation.

In IEA we have all the languages, and we ask the KS across this planet to pray for them. If you elevate the members of the IEA's soul, which covers most of us, but this time through knowledge, and not through politics or religion. (2:40).
Any other question.

Rick reads comment, from Betty from Vienna …
(2:40).
… >> I am from Vienna .. as you have mentioned there is a shortage of man power in our KF center and where can I find out about jobs in Austria. I am here for service to others. .. I am a business student with specialization in supply chain management.
(2:42)
K- .. go through the usual path info at keshefoudnation. you will get a response sooner or later …

(2:44).
(2:46). Any other question

Q: Dean .. 5plus1 negotiations everything has a soul … Would a flag carry a field strength of a nation, and if so, if you elevate the soul of the flag, would you elevate the soul in that nation? …
K- In so many ways, we patronize. But if you look for the first time in KF Iran flag stands next to the flag of Iran. This flag from Iran, the KF flag, very soon will be in every center to represent One Planet ONOR. You'll see it flying between, the Iran and the nation and KF in between. In a way, you bring the essence of humanity together. It will be done in the next few months, (2:48). and you'll see more and more of it. The only place where we have one flag of KF, and flag of the nation is Iran, because we are not intermediary between, but we are part of the structure.
Q: .. One thing I noticed, if everything has a soul, in the matter state. If the soul is in a physical form, and it can be in the form of an item, a possession, would that possession have a field strength, or whatever, to perceive in its essence, that if you interact with that, would it still give off a field strength from wherever its condition ???
K- I don't understand.
Q: If you have an item that has a presence and is one part of the world, ?? it contains the fields strength ??? of matter state of another part, and it gets shipped to , or it gets repositioned to another part of the planet, will it still carry that field strength ..?
K- It should do. .. You interact with any shape or form, because it still has a soul. This .. the crystals you buy … (2:50). Zirconium's, If you create a right frequency on it, they crack, they break up, like they do with a glass. But if you hold it, in a way, "I want you to split," you can break them.

You don't create a resonance, you create a satisfaction of the soul, if you call it. When you break a stone by hammering it, or resonance, or whatever, the fracture lines are different, then when you do it through the presence of pleasing my soul - "can I see you separate." I have done that many times. You can hold a stone, and the stone opens up, I can do this.

This as I said before, what KS who are, my satisfaction for your soul, I can create you a shooting star. It is understanding, does it mean the star is there. Did the Star of David appear out of that? Why there is a lot of time, people trying to explain the SD, but was it created on a point, without actually any star existing, but was to the satisfaction of confirmation of the beauty of the Christ .. We have to understand the concept, the principle, (2:52). the truth about the facts, and then we understand more.

Q: .. you spoke about Christ. Christ as a Messenger from the Creator, did he gather enough field strength to deliver his message?
K- In a way, of doing it, yes. There is a difference in understanding the totality. There is a big difference in understanding the work of the soul, or you understand the work of physicality. In a way, he ?? did, but in a way, his position was abused. Christ as a man, or Jesus as a man, was, received the message, but then manipulated by the man, to suit the man. Manipulation, is what we call, Catholicism and Vatican of today. The true Christians are still serving in different D without belonging to Catholic faith.

I was explaining to one of the KS … we were talking about how they tried to separate the Jews from the Iranians and the rest of them. I was explaining, (2:54). when I met my uncle in Tell Aviv, some 20 years ago before he passed away, bless his soul. He was explaining to me my Great grandfather, he used to be a traveler between Palestine and Afghanistan. On the way he always passed Kabala once or twice a year, they were merchants on the Silk Road. Whenever he passed Kabala he was asked to say a prayer in the Mosque. Because as a Jew, he had a beautiful voice to decide the .. the ?? azzon, the time when he was in, .. in Iraq. It didn't matter he was a Jew. To him it didn't matter he was in a Mosque, it was the beauty of the message, that the words could transfer counted. This is what the essence of life is, not attached by name, but attached by deliverance of the truth about the elevation of the soul. This is what the problem has been for mankind, to understand the beauty of the message of Christ.
Q: .. when we as KS communicate and are present with each other, I have noticed recently ??? I spoke with through a channel, as soon as I spoke with him, there was a very bright light form outside, in the sun. It resonated ?? we were speaking .. ??? so KS have ?? (2:56). of the connection, it seems to be illuminating and bringing about a condition, that apparent to KS across this planet …

K- We are not doing anything to say we are creating a new creed. We are sharing knowledge to enlighten the totality. That's what the difference is. In some ways, in a couple of teachings before, we spoke about the creation of the CO2 centers around the world, which is started, the program, we'll see it taking shape in the coming weeks and months, and spreading the captured CO2 to elevate the STM and the humanity, and all the animals and the trees, and plants, and even the stones might change, because they still have a soul, they get elevated by it. The stone, when it goes in the furnace, it receives energy, it melts. Would the energy, which we release by the spreading of the Gans on the stone, would it melt, or elevate the soul, that the stone will melt?

It doesn't need heat to disassociate. It needs elevation to understand. Would we see a stone to light up, but not with the light of the glow of the heat, but light of the soul,

elevation of its soul, and this is the difference. This is the difference of the teaching of the KF, in totality, for the whole of the created. Not for one path of belief of the other.

Every word, if you look at it, we have a language, or a word, that separates us. (2:58). And allows us to be us, we are correct, and they are wrong, with other belief. In Arabic, in Farsi, we call it Kafir. the Jews call it, ?? quin. In English we call it, unbelievers .. But in essence we still we believe in certain path, and elevation of our souls.

So when we spread these Gans's, absorbs fields ?? the planet would they lead to enhancement of the trees. Will many trees not exist the way they are, when we start, and they say, "oh, it's the effect of the CO2," or have we actually elevated them to a new D and position, and they'll give different fruits. Up to now, man interfered in the matter side. From now on, we'll interact through the energy fields of the Pl, or what we call the soul of the U - big difference. You melt in the fire, we melt through the love. That's the difference between the state of the matter and the soul.
Q: … the beauty and essence of the soul … through this teachings ?? ?? many souls are becoming enlightened, (3:00).

K- Shall we call it a day Rick.

Q: … about C footprint, because here in Australia we are in a bit of a trouble. The Carbon footprint is 10 times higher than it needs to be per person. I always wondered, what amount of CO2 Gans would we have to sequester to offset our C footprint? Is Gans 1 for1 in terms of weight for C?
K- ?? actually how they calculated it. There was a calculation done in the past few weeks, and they are building the first CO2 capture centers around the world. The designs are going through, it's done by our KF team, and you will see it. It has gone into its phase. to go through… architects for the final design. I was talking to our teams … maybe it's time, (3:02). to share, that you might see what is to come. This center which will be built in Tehran initially, and then .. most probably China, it will look very much like, by design, very much like this. Then you understand how forward we are, with the whole thing. I will show you the video, and I hope our team appreciate it, that, what is about to come.

This is the structures, which you will see building across your nations, in capturing CO2. It's actually a leaf, again it's the brainchild of the KF Television. He is a designer, and it sits perfect with us. A leaf, which within it, captures the CO2, like a leaf does in .. on a tree. But this time we build it, we build it to capture, and you'll see these buildings, very much similar to it, across your cities, replicating the work of the leaf. Maybe in the next year or two, you'll se a number of these around Tehran, Beijing, New York, London, and maybe New Delhi.

This is what the essence of work is to understand, when we capture the CO2, like a leaf, when it captures CO2 it releases O to give life. When we capture the CO2, we have to do the same. We are not capturing it to take it out of the circulation, but we are capturing it,

(3:04). to make it a life, a food, for making generation of life, a new cycle of life. This is the beauty of it.

Maybe next 2 years you'll see a number of these constructions around your city. It cost millions to put these up, the proper way. Where it can actually be put, across, through, and we'll see the change. Contaminated cities, winter, summer, does not make any difference the air is polluted. This is our job to do. It will bring changes. We'll be taking the same as .. the leaf takes to clean, to use, but this time as it comes out as a CO2, it will be an energy of it as a Pl, not as an O. It's very interesting to see what changes it will bring.

Do we actually need to collect so much as we said, because we are changing so much with the transportation, and with the other things, that we will not produce so much CO2. Then would these buildings in 10 or 15 years have any use for ourselves, we bring everything to a balance. In that report, .. the business plan, they have actually calculated how much our structures around the world in the next 2 years will bring the change. The footprint of the total calculation. It's a very small fraction, but very large ?? function in it. We breath in and out, and we continue as humans to put it out. What is our footprint? Breathing has a footprint. We run, we increase the footprint, everything else has to be calculated. (3:06). But it is part of the process of life on this planet.

Thank you for today I hope we see a positive outcome in all the works of the mankind in whatever it is to bring peace. Hopefully we'll see some good results for all of us in the coming years, with understanding of the K of creation.

.. if time allows we celebrate the Christmas and New year ..

Proofed to here >.

410 KSW Dec 9 , 2021

END

411th Knowledge Seekers Workshop; December 16, 2021

Note: Transcription has not been checked by KF. Please listen to original recording. (Transcription by KF Brazil)

Main theme: Netanyahu & Trump used photos of KF reactors to make sanctions on Iran - never checked the validity, Now IAEA has a problem because they accepted it - So everybody is trying deny and cover up their crimes.

Plasmatic M fields carry RNA information and emotions of the soul which needs to be transported in order to manifest physicality at point of destination; First time this knowledge has been released to man; Feel the color and emotion of plasma; birthday of

Mitra is the Day of Enlightenment of humanity; 21st of December maturity of the man; 5plus1 negotiations about to fail need support of KS; IAEA has visited Linz secretly

Quick Index:

Plasmatic M fields have an RNA/DNA structure like in physical life; It's an unknown science to man; M fields carry field forces for positioning that gives structure to physical life; M fields carry memory of where it comes from & will go; This knowledge is needed for transportation and transmutation (T&T); M field RNA is needed to put plasma back together at point of arrival; In T&T there is no DNA of physicality; In deep space travel the emotion of the STM will be T&T through the emotion of the RNA; Plasmatic field flow lines can be seen; The emotion of the soul of the entity will be transported; This is how we will replicate man in any dimension (D) in the Universe (U); With this knowledge mankind becomes a true man of space - not trapped in UFOs; Space colors are created out of the interaction of entities in space; Emotions are shown by colors - like Gans; We have to learn the essence of the fields of the emotions - without physicality; Understanding the field strength of the emotion of the plasma; This is why other magnets move when one is added; See it Gans's pull each other - does energy of Gans bend?; What do the emotions of CuO and CH3 bring; We'll train ourselves to color of Gans's like night vision glasses; This is all part of the RNA and information carrying part of the plasma - unknown until today; Races who know this will see emotion of the Creator - requires a purity; Not far when you become detached; responsible to understand "double loading" of the STM's fields - and soul of emotion of man's fields on same track; Field lines carry emotion of every cell of body; In T&T if the information of the emotion of the soul doesn't arrive - you have a man with no emotion though the STM exists within it;

21st December Mitra will manifest; Mitra manifested in physicality millions of years ago; Time of Mitra means man will understand full process of creation - same for all creatures; Many of you will understand through the T&T systems; Star of David made through the STM; Everyone will see the light on the 21st December; All the Gans's in a container can decide to give their energy to a single Gans; Corona mayhem - we can decide if we want to stay in D of physicality; How to create emptiness to receive the fields of the U; The burden of understanding the knowledge is upon you; Birthday of Mitra is the Day of Enlightenment of the man; Teaching today is for deep thinkers - complete it by interacting with the fields in oneself; 1 minute teaching needs 1 thousand years of understanding; Feeling the emotions of the colors; Emotions at the level of STM not physicality; Emotion of physicality has attachment-detachment-expectation; Emotions of the soul have no expectations; Unconditional giving; Metal plates in lower body - should still be able to use Vertical EU; 40 EU for Arizona (AZ) built with 4 different characteristics for different jobs; EU are set for different applications; We absorb energies mostly through our fingers;

Mr. Keshe tells experiences with 5plus1 negotiations - egos of big nations wasting energy with demands; Negotiations in rough times need lot of support from KS U Council; Time for purging & punishment over - tome of maturity & understanding; Document given - Iran will share T in exchange for peace if 5plus1 fails; Nations have to share T and commit to permanent peace; Share full plasma preparation at 100% purity for

space travel; 80% of American and European demands on Iran have nothing to do with nuclear industry - can't share electricity with neighbors; Iranians want bank accounts filled; Ancient time races could retract and extend arms; Knowledge is hidden within us - we block it; Third Eye - is the STM; Disheartening message form IAEA; Israelis use UN Cameras to identify workers and recruit them as spies - bribing etc; Suggests that cameras put only on the machines - not on staff; Chinese can identify anybody in 10 minutes; President of Brazil against vaccine passport because he had personal bad experience; World leaders exempt from vaccination; Satan is made by the man for the man; Leaders think they are above everything until they become part of it; Netanyahu used KF space reactors in presentations falsely claiming Iran was making nuclear bomb; Then he joined with Trump to put sanctions on Iran; Created fear and false sanctions against Iran - many suffered and children died by sanctions; The truth and documents have been given to IAEA and they want to cover it up because they went along with the sanctions without having proof; IAEA and Americans want to cover it up; Negotiations are about to fail; Watch what happens to these leaders who do bad things - live horrible lives; Example of Saddam who would takes brides on wedding night - he had to hide in rat hole; Tribe of Moses will cease to exist by end of century - people will understand truth and walk away; Same with Vatican and all religions; IAEA visited KF Exhibition Center like thieves in the night; European & American scientists allowed to investigate KF T in Linz during pandemic; The catalyst is the new T - wait till after 21st December; Persian Empire learned not to cross their borders - other kings willingly submitted to be part of ; Americans don't want to admit they were fooled. Back to negotiations.

ENGLISH TRANSCRIPTION

(:20).
K- … In the past few weeks (:22). we keep on expanding in a very deeper way of understanding the process of creation, and how we as a human race have missed, and what we are going to miss, and what is about to happen to us in different dimensions (D) and dominion of the creation.

One of the biggest problems for transmutation and transportation (T&T), is not carrying the whole of the information, or the whole of the energy package. In the coming time man will learn like we have the RNA and DNA, in the physical life, M fields, plasmatic M fields have the same. It's unknown to man, and in time as man becomes to understand it, will understand, that M fields carry not only field forces of positioning, that it gives them the structure of the physicality of existence, but on the same length, they carry the memory of what it is, where is comes from, and where they go to.

M field memory of the field themselves, is unknown science to humanity. It's something we never knew, we never considered, but in the time, when we come to be transporting and transmuting, we need to know. When we send the physicality, where is its memory? What is it going to be at the end of? Understanding of the, what we call, the present time, the RNA, the information part, then the physical part, which is DNA, becomes part of the

game to be played for T&T. Which means in the new system that we see, (:24). for example, the Vertical Enhancement Units (VEU) which are getting developed in KF, we can transmute the physicality, the D of the fields of an atom, but when it comes to the other end, how do you place the cell of the liver in this position, and not in the brain, and the cell of the brain, to know where to position itself, and not in the kidney.

This information carrying part of the plasmatic field is an unknown knowledge to humanity. In the coming time as we teach more, we'll teach you about the RNA of the M fields. How you transport it, how you transmute it, how you bring to make the plasma of the physicality, and the Pl of the information, simultaneously carry the span of the U. You get there in the D of physicality, and everybody, how to put this Pl together to be a sign of a human.

It's not just carrying the fields, it's carrying the emotion, carrying the understanding of the structure. Carrying, in a way, it says, I am a cell for reproduction, .. for conversion of the environmental energy into a physical D. In this atmosphere there is no air, is there a need for me. In this atmosphere, this condition, there is no liquid, do I need to adopt, shall I show myself, or do I become part of the memory bank of the Pl, that next time, when this Pl travels into another D, and there is a liquid, I can survive in.

The RNA in the .. knowledge of the M fields, (:26). It's hidden, but very apparent, once we understand the position of the GM field of any entity. What we call the line of order, the line of communication within the structure of the body of the man. This is vital for us to understand, that when we land on a planet, which there is no need for an arm or leg, the understanding of the emotion of the Pl of the physicality, and emotion of the Pl of the STM, decide what shape fits you, befits you. How other creatures, how other forms of life have managed to exist in this environment. Or what do I need to exist.

I go back to the memory as a cell of the physicality, in the RNA of the information, because there is no DNA of physicality, and I say, "I need a system," to survive to absorb the energy of this planet. This position in time and space, this galaxy. The RNA of the M fields is sacrosanct in the D of understanding the T&T in the deep space, even though on this planet it might be easier.

Nowadays we pick a phone, we send an information, but we cannot send the emotion through the telephone line. We can express our emotion on the line for the others to understand, and even if our emotion is a sadness, they might read it as a happiness, even though, (:28). our emotion inside is entangled in joy, they might read it as a sadness. In the D of the Pl T, understanding the T&T of the fields of the U, there cannot be such an error.

In this process, the mankind will come to understand, that the Pl T of the .. deep space travel has to be understood in the emotion of the fields of the STM, not the emotion of the physicality of the man. Where the emotion of the fields, or what we call, the RNA of the structure of the T&T of the fields, of the creation will behave M, stronger part in confirmation of the existence, at the point of manifestation.

If and when the mankind be able to see the field flows within the structure of the plasmatic fields, he will see these lines of the RNA of the M field, of the line of information, the line of order, the line of T&T of the fields of the emotion will be carried for the first time with the entity in the D of .. transportation of the fields. Which means the fields, when it carries itself to arrive at a point of destiny (destination), it's got a ?? low (or load?) carrier, one is .. D of physicality, and 1 D of the information of the physicality, that in interaction with the new D, a new position is created.

RNA of the M fields is more or less, one of the last stages of understanding of the process of the creation. (:30). Once man unravels the knowledge, once man understands how to carry the emotion of the soul, man, or the soul of the entity, then the soul in T&T of the fields will bring that RNA to ?? and according to his need, according to its structure, will create the physicality of the need, at the point of the manifestation.

Humanity has got a lot to learn, humanity has a lot to understand, it's not just I take you from A to B. But carrier, I carry the emotion of you, in a different D of physicality and ?? impression, and existence. Mankind surely, at the beginning will fail 99 out of 100 times of trying. But if you could understand the .. RNA and the information carrying part of the M field, man will succeed to .. conquer the space.

Otherwise what we have seen with many races, you'll be taking refuge in UFOs, flying systems, and all sorts of things to carry the physicality and hopefully .. emotion of the STM in that D, will still be within the D of physicality of the man. But those races who have matured to the point of understanding the essence of the creation and Creator, and existence in all D, will know, they have achieved, what we call, "the holy grail of the creation," T&T of the emotion. Emotions of the soul, T&T of the information about the D of existence, (:32). and the emotion. Then you can replicate the man in any D in the U. With understanding, the same emotions, and the feelings, but it might not be the same at the point of arrival.

Mankind is about to become a true man of space, when he understands the process of the conversion and transmutation, of the information of the emotion of the STM, and not only the STM. One of the biggest problem for humanity has been to understand the strength of the fields of the emotion. We can see in the electrical systems, the place of the joy or sadness within the brain of the man, but these signals are not, they do not exist, they cannot be transmuted and replicated, if man does not understand, when it comes to the process of the transmutation of the STM, the Pl of the existence, the Pl of the source.

In the coming time, the .. transmutation systems, will be, and will carry this D, which means not only man will see the soul, but man will see the emotion, understand it, and it has international language. If you go back to the past teachings, I touched on this a few times in a very soft way. As I said, when you see another soul, when you see another entity in the depth of space, the color of the interaction, will tell you the emotion of the entity. "My friend, I want to touch you, I want to smell you." (:34), I want to be part of you, I want to love you.

But these will come in the D of the interaction of the fields of you, and the fields of the entity, and in that interaction creates, .. space colors of interaction. The red, blues, the greens, are not the ones we see, the way we are used to. We have plasmatic colors, which now we have seen sometimes, even with the production of Gans's, but we never understood. We just call it the green one, and the red one, but is that red the same to my eye, and to your eye. Is that red, does it mean a danger, or does it mean it's life-saving, or does it mean a giver of life.

Why your CH3 are orange, and why your other H's are all in the same color bandwidth? Isn't that the essence of creation of the fields, I want to give you. Does this mean, that when we become passengers of the space, when we see these kind of colors, it means to us, the source of energy, you want to give me.

What happens when you see the D of the, when you produce the Gans's of the lead? Does that color, or spectrum of that color, when we see in the depth of space, does it mean that object, wants to take from you. It carries the emotion in respect to color, it carries the emotion in respect to existence. Mankind has to understand now, the color of emotion, the manifestation of its presence. When you get angry you grow red. Does it mean you are feeling the emotion in the D of physicality? (:36).

What you have to learn is the D of the emotion of the fields, in the essence, without the physicality. In the interaction of the fields, which is common in the U, the same. When you see a given life, given features, given color, it means, "I am in need." I am not stealing, but do you got anything to give me in the energy level? In another color it means, I want to give, I have so much, I have become part of the Creator. Do you tap into it, you say I have shown, I have this field strength in me. I am ready to take, but what you want back from me? How can I give you from the essence of my creation, what will you give me to stay within the boundary of the existence.

Mankind in the coming time will understand the biggest mystery of the life of the knowledge, is the understanding the field strength of the emotion of the Pl. Then you understand, why when you put the magnets on the table, and you add one more, it moves. It make the other ones move, because I am here to give you what I have, but we don't have, we haven't created the T, to see the field interaction, the color of between these magnets the joy, the happiness the accommodation, the position. "We do everything for you to find a place amongst us." Then you put the magnet on the table and it attracts the other ones. What does it mean, did you see the emotion of the fields before they interact. In the simple language of the man, we call it the N pole and the S Pole, (:38). we call it the entry and the exit, but how does that entry takes place, what is the emotion transfer between them. How many of you have created Gans's and tryed to see if Gans's pull each other. If the energy of the Gans's bend? What happens if you put one Gans in another one, in the cup of .. replication of the fields, what colors are in there, what we call, in the liquid, the water which is in front of you.

We are not trained we do not understand, what emotions does the CuO brings, and .. the CH3 brings, who made them, how they were made. Were they made with the joy and happiness that the soul of the .. Gans is a happy soul. What happens when it goes in the bucket, when it adds its energy, to the field of the waters? This color of the water, it means it's not good for me. But now you pick any cup, and you put Gans in it, and you drink it. Because you haven't looked at the color of the emotion of the Gans. You have not learned the knowledge of the T&T of this field within your body, what it will do. At the moment, we are at the early stages, and we see some results and we follow it. But in the coming time the way we have trained ourselves with the night vision, we'll train ourselves to see the colors within the cup. It might be a color, which is good for you, but not good for me. I don't drink it and hope it will become good for me.

This is the part of the knowledge, the RNA, .. the information carrying part of the Pl, which has been unknown to man until today. Those who will understand, the races in the depth of the space, who can conquer this, will become those who can understand, (:40). and be able to see the emotion of the Creator, as they have tapped into the D of existence and understanding of the totality of the creation, not only in the M field, but in the emotion of the fields.

Blessed are the souls who get to the elevation and the position, that they can see these colors. A few races in the depth of the Unicose, have elevated themselves in the purity of the creation, that they have managed to reach this point. It's not far, when you become detached. It's not far, when you become detached from the emotion of fields of the physicality to the D of the emotion of the physicality in the direction, of the emotion of the STM. Emotionally you get excited, your heartbeat goes up. What happens when emotionally, the Pl of the STM gets excited? Would it change his color, .. emotion, .. his position, would it change at all for you be positioning yourself and repositioning yourself for you to have a constant emotion of physicality, it denies you from observing its real true emotion. In the coming time, you will see the characteristics of the emotion, the strength of the fields of the emotion of the STM, in the confirmation of the existence, and carrying the correct information for the physicality to befit itself, (:42). in the D of manifestation.

In the past, mankind had no knowledge, now as we said before, you understand, you are responsible to find the source of it. You are responsible to understand how to double load the STM's fields, and the soul of the emotion, of the man fields, on the same track, then the field lines, carry the emotion of every cell of the body of the man. Otherwise you'll have a man with no emotion, even though the STM exists within it. Then physicality, by repossession of the both, the STP and the STM, because the information of the emotion of the soul, never arrived, or it's misguided, and its diverted to another position and time, and you have what we call the "cabbage" of the soul, not much, it's just there, waiting for the information to arrive, the information of the soul, .. of the emotion of the soul.

Humanity has got a lot to learn, but in understanding the way we create our systems, you can blindly follow, that one day you might understand. The whole purpose of the teachings is not to be the man of today, that you go to the shop and you buy a telephone,

and it doesn't matter what's in it, as long as I can hear it, say, hello, and yes and no to my dad, I don't care what's inside it. With the knowledge of the U, you have to understand every motion , and every emotion, and transmutation of the field of every entity, before you become a true man of space. Otherwise, as he says, (:44). "ladies and gentlemen, please fasten your seatbelts because we are carrying your physicality." Then you have entrapped the soul in it. The spaceships of the STM, is within the STM, and not within the physical spaceship of the man. Understanding the knowledge and T, is part of the T&T of the life. Part of the existence of the true life within the space.

We are approaching the point, where the man will understand, that in essence, every creature is the same, every fields of the soul of the creation is the same, but its the creation, that it changes in the D of the physicality. "I have created man in the image of Myself." Not in the D of physicality, but in the D of the fields of the souls and the emotions of the fields of the souls. The information, which carries within.

But man is so feeble that he thinks the Creator has 2 arms, 2 leg, and 2 eyes. I gave you the eye to see, but in the D of the STM, I gave you the field strength to observe, to understand the emotion of the seeing, and not to be, physically to see. In time, man will come to understand more and more, .. mankind will come to mature to understand the process of the creation through the true way of the life of the Creator, and not by the way man has chosen, (:46). the physical D. Maybe one day we'll become mature enough, we'll become in a way, complete enough to be able to reach the D of physicality's , what we call, M field information, and then one day, .. in the coming time, some of us, some of the human race, the children of the Adam, as you call it, which is the Creator, might become mature enough to understand the process of the creation.

We are approaching 21st of December, many of you have set life, to see the change, the manifestation of Mitra. Mitra has manifested itself in the dimension (D) of physicality millions of years ago. But in the D of the physicality of the soul, not in D of physicality of the man. In so many ways, when it comes to the time of what we call Mitra, it means the time when the man will start to understand the full process of the creation. Not only for man, but for the rest of the creatures of the U. It's .. the birth of the totality in understanding the love of the Creator for its created.

In coming time, many of you will endeavor to understand the process of creation, through understanding the process of created. But if mankind is to achieve through knowledge of creation, mankind has to walk away from what he understood about the D of physicality and life of the man, in the D of physical life, (:48). I made man in the image of Myself. … in the D of the soul of the physicality (STP) and the D of his soul of the created, and the STM itself. Maybe one day mankind will understand the process of the creation, in true essence of it, and not by the dream of it. What will happen, the way it will happen, and the way mankind will decide for it to happen to itself. Many of you will come to understand the … true process of creation through transmutation and transportation (T&T) of field strength of the systems. When we transport you from one Enhancement Unit (EU) into another, we don't transmute anymore your physicality. We have made teleportation, .. the condition of transformation and transportation of the both, the fields

of the plasma (Pl) of the creation, and the fields of the emotion of the Pl, which has created that emotion and that physicality, in the D of the emotion of the transportation. In a way, the RNA of the RNA, in a way, carrying the information of the existence plus carrying information of what it needs to exist at the point of manifestation, or detection.

In coming time we teach, in coming time we'll try to teach more, but for many of you, .. at this moment of time, all is important, is to see a UFO, to see you can fly, (:50). and then we talk about the rest later on. We leave it to our next generation to sort it out, because we have seen and we believe in what we see. I gave an example in the recent past, and I go back to it for you to understand the reason why I gave you it. You Knowledge Seekers (KS), and the human race would like to see a miracle, that the miracle leads, for you to understand, to see the light, to see a confirmation, affirmation of the possibility that by seeing the light, you'll see the light of the Creator. You see the light of the confirmation of existence, and this shall show my power, and what I can deliver.

As I explained, and there are a number of KS who can explain to you, I have made them to see the light, what you call the UFOs, when you ?? see the shooting stars. I never created the shooting star. I created the fields of the emotion of the soul, that the STP of the man, reads the emotion and calls it, "a shooting star." And we have made it possible that for 3 or 4 or 5 souls to see it at the same time. As we have a long knowledge of the common denominator field strength of observation.

For me to confirm the totality of the control, is that for every single one of you, and the rest of humanity, at the same time will see the same light. It does not matter, (:52). if you are at the North Pole or South Pole, if you are under the ground, or you are on the mountain. Then you will understand you all have seen the light, but has that light enlightened you, with the knowledge of the creation? That's questionable, or just happened, that even man in the deepest caves will see the shooting star, because we have created that impression through the STM, and not through his D of physicality. In a way, we have put you in a state of dream, and we control the show.

In the coming time, many of you KS will come to understand, that the teachings of the past, and what is going on now, was and is, to direct you to understand more about the process and the interaction of the fields of plasmas, in the D of the Gans or in the D of physicality.

Would all the Gans's within the same pot, decide one Gans should be elevated and they all give their energy to that single Gans. Would the shape and the emotion of that single Gans, in the D of physicality be the same, now that it has received all these energies. Today I have opened the rigma (rigmarole) of the life. How you can unravel this rigma, it's your level of understanding about the true level of creation. How far to what extent as KS, gather the knowledge of the past, (:54). to confirm the existence of the tomorrow, for their own soul, will become the biggest battle for every single one of you.

We have seen the Corona and the mayhem, which will come with it in the future. The strength of the emotion within you, will decide, if I want to be in this D, to be given, to be

enforced to be given, to be conditioned for my physicality to live, to be here, to accept, the "to what can come to harm my physicality." In that process now, because of the realignment of the fields of the emotion of the physicality and the STM , and understanding the interaction with the STP, you shall decide, "am I taking fields of the energy from the U," with all of the, only the fields of energy, but the information carrier part of it, and what do I have to do, and what do I have to give, that create the emptiness for that to arrive.

Humanity has entered the point of what we call, "creation." The true essence of creation, the true understanding of the process of creation. Maybe, maybe one day, some of you as KS will reach the point that you don't need to seek any further, but you understand the process, and you shall see the light of what I call, the emotion ?? and RNA, (:56). of the fields of existence and your soul. At that point you are mature to see the light of the Creator, and with it become part of, as you have seen to become part of, because by seeing you have accepted to receive the totality of the knowledge of the RNA and DNA, both with information and physicality, of the existence from the source, from the point of creation.

The true essence of this comes, we reach, we are approaching what we call, Christmas. We all speak about the shinning star, the Star of David. Is that star, a true star, or was it seen by the souls and accepted by the sum of the totality of the physical life, of those who wanted to believe seeing the star. Then did that star, emotion and information carry the same emotion and information in every single person who has seen it, or was it just only for those who followed the path of Christianity?

Now the question of existence takes different shape. Is the Star of David the light through interaction of the emotion of the fields, of those who wanted to see interaction and emotion of the fields of the Creator, all within the structure of their own soul. (:58). The burden of knowledge, the burden of learning the knowledge, the burden of understanding the knowledge, is upon you, to understand the process of the creation of the information and emotion of the STM, that with it, that you can take that, and create essence of the source of communication, and emotion of your physicality, in any dominion, and position in the U, in the Unicose.

Then you understand how, we have lived amongst men for thousands of years, as we understood the process of the creation and transformation of the essence of the knowledge, and balance energy of the fields of the STM. I hope many of you KS will mature to this point very fast. What we call, the birthday of Mitra in coming days, is the enlightenment of the man. The birth cycle of the creation, as Mitra is amongst us, has been, and shall be, in the essence of the confirmation of the STM, not the STP of the man. Those of you who want to see Mitra with your own eyes, will see the light of it on 21st. Those of you who are expecting to see the physical D of the birth will have a lot to learn, as you have to convert D of the physicality from the source, from the ?? top (1:00). then humanity in one instance will mature.

The teaching of today is not for faint hearted, it's for those who are deep thinkers, who understood the process of the teachings of past years, and can manage to convert it, and complete it, with interaction of the fields of the man himself. As I said before, when we were teaching the physical D of the reactors and whatever, we needed 3 or 4 or 5 hours teaching. Now that we teach in the essence of understanding, one minute teaching, needs thousands of years of understanding. It's for you to decide if you have matured enough to understand part of it, or the totality of it, as you have learned to walk. Now you have to explore the ground.

Rick would you like to go for a break. .. we will carry on answering questions, because understanding the teaching of today is many, many thousands of years of contemplation. .. (1:02).

Proofed to here >> continue

>> BREAK <<< 411 KSW Dec 16, 2021 (1:10).

Q: Ed .. the ability to see the colors of the emotions of the RNA the soul .. Is that always the ability to see the color. .. I know it's not physically seeing the color, but you talked..
K- It's the emotion of the color.
Q: Can it be a feeling rather than a physical representation.
K- That's what it is. That's what we are talking about.
Q: So why did you call it a color? Is that ..
K- Because that's how you understand it. How else do you want me to call it? .. The human race has not managed to complete, that kind of wording for emotion of the color. Or color of emotion, either way you put it.

R: I have an example from early childhood. . . in childhood I had a (1:12). .. vivid dream of being out in space. I was encountering these colored beings and the blue ones … they were the friendly ones. .. I could feel the empathy or connection,, love.. versus the red colored ones. that had the emotion of love attached to the color in that scenario. I don't know if that is exactly what you meant …
Q: So .. as I go along this train of thought. Different souls as they develop into this ability to see this emotion, will they, will there be differences in, some will see it, some will feel it, some may hear it. I know I am using terms of physicality, but each soul will learn to sense it in a different manner, according to their own makeup?
K- Not really, because the way, I have explained this in a teaching before, you can go over it. The way we as humans know what the emotion of anger is, (1:14). and how we sense it, we don't' .. we feel anger, we feel the emotion of joy. To us that is what is joy. This emotion is joyful. Now we have to learn the same emotion in the level of the STM.

There is no difference, but in understanding, that you are living with a different, approach, more or less to the same thing.

So we got to learn what it means in a different U, "I want to eat you." Or you are delicious, I want to fall in love with you. Emotion of the soul, in so many ways, is similar, but in different ways, than the emotion of physicality. Because usually emotion of physicality has an attachment, and detachment, expectation. Where in the D of the soul there is no expectation.
Q: That's amazing.

K- You see when you love someone, you expect to be loved back. In the D of creation, or the soul, the love you give, you don't expect to be given back. But you know you receive it back from somewhere, not necessarily from the lover, but that gives you the emotion to give more. (1:16).
It's very hard to fall in love with the D of the soul, because it is a one track lane.
Thank you. Any other question.

Q; I have a titanium plate in my left hand, can I use the Visual EU without problems. What advantages does the VEU have for my brain?
K- VEU is setup for a specific characteristics, and specific jobs. It's in the position of the body, the lower part of the body, it should not be effected with it, at all. It depends what you can do, what is wrong with your brain, that you expect it to fix. But these are a special systems built for a specific purpose. All the .. even the Body EU are not the same. We build them according to what we want them to do.

The 48 for Arizona (AZ) are built of 4 different characteristics to do, for different jobs. (1:18). It's not all .. just because it's a Brain EU, we develop them according to what job they are going to do. Maybe you need to sit in 2, combination of one and four, and somebody else needs combination 1 and 3, and (someone else) needs 3 and 2. That's why we bring doctors in and train them how to use, in each combination, and for what purpose. If you have a stroke, your arm and leg are damaged, you don't need a Vision EU. If you are blind you don't want to get your arm and leg working, because they already work. Or you have a problem with your Cataract, but you have another problem with your neural system of the part of the brain regarding the vision at the same time. The systems are setup for different applications.
Any other question.

Q: .. Do we have the same intuitive equipment as the animals, and when are we going to believe that?
K- Can you translate please … (1:20).
R:
K- What intuition?
R; intuitive equipment of the animals ..
K- Yes, brain.

Q: .. as we have 1 M hand and 1 G hand, would it be possible to absorb the energy of the U with the G hand, and transfer that energy with the M hand, if it is possible, please teach us?

K- We already do it. We absorb 80% of our energies from the environment, and most of it is done through our fingers. When you put a position of attraction and a position of repulsion, or 1 hand giving and the other one taking. At some point, focus to end up to be together, you create friction and create light, and then see what we do.

In ancient time, today's man has lost that capability. If you could hold your hand in a specific way, that you bring together the conflict of the fields, (1:22). then you can create a light between your hands. We've shown this, it can be done, it is very easy, but it takes a lot of energy. But you can tap into the universal energy fields, with the position of your fingers, and just receive that energy and create that light. But that light energy is not necessarily in the vision of the man, but it's in the essence of the energy of the STM, you will see the light through the soul.

It is one of the first practices that you will do when you become aware of how to use your soul, and confirm the existence. With the eye you don't see, but with the eye of the soul, and observation of the soul, you see, you don't know, where am I seeing a light, when there is nothing. Then you understand you reaching that point of maturity. The biggest problem with humanity is that he accepts it if it is a visual sense to him, or in one of his 5 senses. Mankind has to learn to transfer this, into the emotion of the soul, and then you'll see the difference, you will see different lights, .. different understanding, you'll feel different emotions, but you still see, to confirm the existence.
Q: .. come to the Portuguese teachings on Fridays, we miss you. (1:24).
K- From where?
R: They have a weekly teaching, apparently.
K- Yes, I try to go everywhere. I had a complaint from the Iranians yesterday. They want to transfer the teaching from Wednesday to Mondays …
It's just having the time.
R:

K- I was yesterday in negotiations. It's amazing how much energy is wasted there. I was in the 5plus1 negotiation group. You see how much waste, sitting there, just to satisfy the ego. After a few minutes of it, you just want to walk away. It's not there to support humanity. It is there to support the ego of the few leaders. When you walk out of it you feel you've been in a chamber for 20 years, the energy depletion is amazing. It's not an easy .. way to do it, but it is the only way to do it, physically being present and doing things. At the moment we are involved in so many different directions and works, but somehow the energy comes, somehow you manage, (1:26). somehow you still find free time to do things, to be part of.

I go back to this because KS, especially in U Council supporters, the negotiations are running into a rough time. It's little light here and there, but overall we need a lot of support … what I see from close quarters, it's going to fail. Because the ego's of our

leaders are bigger than what we call, ?? what can be delivered by one or the other. Yesterday in understanding, and the day before .. it drains you to see how collaboratively people are sent to destroy each other. Interestingly, is how collectively they agree to do the same. Demands unnecessary suddenly pops out, because we don't want to do, you accept, or we change something else ..

It's the responsibility of us to change the soul of the leaders and negotiators. We need a lot of support. I don't get disheartened, but I see the next step, the next stage, and what can be done and how people walk away, or how people create a condition for others to walk away, to confirm that they ?? won, are doing something. We see some light. (1:28) We have seen some positive results, but we still, there a long way to go. It can literally fail. We'll see after Friday or Sunday, how it will take shape further. But there are some small breakthroughs, but we'll see. We need a lot of support from all the KS, and it is an exhausting job to be in these .. to try to be, and trying to get people to see.

Q: .. The prophets of the past, despite offering good news, warned of difficult times, and apparently we are already in an era of limitations for human civilization. With Pl science it opens a promising path for humanity, without any fatalism as indicated by the prophets. Question , if we don't align with the ethos of the U, and we don't get a peace treaty between the nations, can we enter into an era of cataclysms on earth, as a purge and correction of the course of human civilization?
K- The time of purging is finished. (It's) the time of maturity and understanding. What is very interesting to us, is the dossier submitted by KF to the negotiators, is very simple. I read from one of the pages. This is a long submission, which is in a beautiful hard copy. And what interested me, (1:30). and some of the people who are involved, is that … just open it … one day it will be published. We put into dossier of negotiations.

It says, Iran will share collectively, and develop new T with all nations. If agreement for sharing this new T is, .. is not reached with Iran on this basis in Vienna, Iran sees as its right to share the new space ?? and the space defense T, with any nation as it reaches its goal of, T in exchange for permanent peace.

This is a problem for world leaders, leading nations, to commit their nation to permanent peace, and we are very clear, .. we are not there to give what we call, "put conditions on sharing T." We are giving it freely, to the nations, if we don't reach 5plus1 agreements. And still to them, (1:32). is hard to accept, that they have to share T, because then they loose the superiority.

In another paragraph of the material which is with the negotiators. It says, Iran puts no condition for sharing and collaboration in sharing this new T and knowledge, with 5plus1 and other nations, to produce pure Pl nuclear material for space energy and defense. This is again, another part of it, our message from Iran is clear, the Iranian nation and leadership, Iran is prepared to share openly with 5plus1, the full Pl preparation, which means we produce nuclear materials at a 100% rate.

They cannot believe Iran is prepared to share such a T. When we wrote this document, when we put this document together, the condition was, that we share openly. It's hard for our leading nations to accept, that they have to become equal with the other nations in knowledge and T. This is the hardest thing, which I see, and it's totally unbelievable how some of the world leaders, and people who like to keep the superiority, do not want to be, do not want to sign themselves to peace. (1:34).

What is going to happen, what is about to happen, what is there to happen, is in the D of physicality, what I call, bribery of the largest scale, and all sorts of contracts, that we have if we do. What they don't want. If you are in negotiations you understand. 80% of demands from American's have nothing to do with nuclear industry. 80% of American government demands, of 5plus1, and the Europeans in the same way, is nothing to do with nuclear industry.

One of the major demands of President Biden, is that Iran does not supply any electricity into Iraq or Afghanistan from our main supply grids, to support the nations. This is unheard of. When we hear this in negotiations we just pull our hair. Iran as a nation supports other nations, cannot put electricity into nations to support. Nothing to do with nuclear industry. It has nothing to do with what we are there for. We have to oblige to get the sanctions removed. To help your nation, don't help your neighbors. How come France has agreed to help the Europe, (1:36). if the British Oil falls short of energy, taps into French energy system, because that with nuclear power, they guarantee. The same with the Germans.

But if Iran does it, it's a criminal, it has to be sanctioned for. I sometimes, when I look at the negotiators, I just cry. What the heck are we here for? We just give and give, for what? Not to do. .. we want to share the T, we are sharing everything. "No, you cannot share, because the others will be equal to us." It's an amazing construction of hypocrisy in ?? and a lot of other things. And it's not only the Americans, it's most from the Iranians. Give us this, give us that, we'll do this - this is my bank account, this is yours. Little achievements, but in general totally tying up a nations not to do anything. What does energy supply to your neighbors, which are in short of, got to do with negotiations on nuclear power, or what they call nuclear weapon.
Any other question.

Q: What is the fastest way, (1:38). to converge the STP with the soul of the nonphysical part of our being. What is the secret key?
K- Die (they laugh ..) ?? what I said that, was a funny answer to it, but it's understanding the trust. I mean that's the answer to the human being today. But we call it sacrifice, we call it, martyrdom, all sorts of names put to it. But in reality is to understand the work and the connection.

In the ancient time, … there were races for example, that could retract their fingers and extend them. They could retract and extend their arms when they needed. For the .. saving and not taking what you need from an environment, or for protection, or whatever. ?? of course they had control over the emotion of the STP. We all can do that, it is not

hidden from us. We just ignore the access to it. We just have created a blockage, that we don't hear. I said, this is like a bell. You know when you live near a church, (1:40). and the bell goes every hour, "ding dong" .. and you hear it. When you live by the church so long, you don't near the bell anymore.

Your STP and physicality have decided, " I am ignoring it". But accidentally you hear the lunch ding dong. It's the same. We have decided, not to listen to the ding dong of our soul. Now we want to wake up, there is a lot of clogged information in-between, we need to dust, to be able to get to it, and then we'll see. It's not that it is not there. We have created these barriers for not to hear it. Not to confirm its existence.

Unless you find a ladder to the Creator, in a different way, or to your soul. If you go to Vienna the main church in the center … they put a ladder on top of the church. It's the steps to the Creator, how far you can go with it. Then we listen to it every night. From the church you can find your way into the depth of the U, to the Creator, but not when they give you a .. physical ladder. It's us who have created that steps of that ladder, for ourselves over time. We made this ladder bigger and longer with more steps. Where you actually, when you go the full length of the ladder, it's twisted and you come back to the same point, (1:42). where you are. It's a funny way, because you don't see the end of it, but you don't see, that the end comes back to you. It's us who makes it longer or shorter, according to our way of belief and understanding.

It's very much what I call, Tenerife camel ride. In Tenerife … they all coming for a camel ride, you see them going into the mountain. But what you don't see is that they just spend about 2 minutes in there, and then they come out. They've got a closing on the mountain, that it goes around a post and comes back out. A camel ride, you think you are going to go there for a long time. It depends how we made that hole, and how big we made that loop. We have denied the knowledge to ourselves, .. the affirmation of the existence and communication to ourselves.
Any other question.

Q: .. in the spiritual world many people talk about opening up the Third Eye, the pineal gland, Could you shed some light how to open our T Eye?
K- Isn't the pineal gland another way of, they are trying to tell you, you get an access to your soul? (1:44). We don't hide, and duck and dive, we just go directly for it. Isn't the T Eye your soul, but you become aware of totality, your Creator. In different time, in different generations, different … intellectual understanding, the same thing has been explained in different ways, so people could think, understand it, and follow it.

Now with the teaching of the KF there is no ambiguity, it's there, and you can find out where you try to hide it. Why do you need a T Eye when you have access to your soul, and if you look at the position of what they call the gland, and look at where we tell, your soul is. Not very far off, is it? Because people up to now, couldn't understand the STM is within the structure of the man. So now it becomes the pineal gland, the T eye or whatever. If you manage to get access to your soul you can call it anything you like. ??

??? teaching it. We are enlightening you to understand, to find it yourself. Mankind has not been kind to himself, (1:46). and denied himself many, many things.
Any other question.

Q: … Someone told me the sanctions on Iran have been dropped, is that correct?
K- I don't see it, if they dropped it, go and collect it. No sanction has been changed. They are talking about making it tougher. Or they are going to do this or that. It's hypocrisy in negotiations.
R: they'll be going on for another month is that true?
K- .. Till Sunday night, and then we'll see. Most probably people will return back to their countries, because after Monday next week it's Christmas and New Year most of the European negotiators go home for their holidays. We are having the Christmas Eve on a Friday. The negotiation will stop on Sunday night more or less. They'll return back to their countries for consultations with Christmas and father Christmas, and then they'll come back after that. If it comes back. There is a very high possibility, that they might break up. We are back in tomorrow … to see how we can push the whole structure.

It's very difficult, (1:48). these negotiations are very much one-sided gun policy, shotgun policy, I call it. And the Iranians are not helping it much. I will be back in … tomorrow, the last stage. We'll see. We still need a lot of support, it needs a lot of understanding, and the reality is the complexity of the sanctions on different organizations, different people who are running them, is one of the problems. But our .. Iranian diplomats are not very seasoned diplomats. They are not mature in negotiations, and that's one of the problems with the Iranian team. The Americans are sitting in London .. not in Austria, and both the European teams, the British are extremely seasoned. They understand how to play. Iran … the Europeans and Americans play with .. seasoned diplomats. Iran doesn't have that. We have a government who has been in power for a few months, and ?? uncles, and son-in-laws, .. and they're put in position to negotiate, to make sure the what do you call it, private bank accounts are looked after. (1:50). It's a very dirty game. Extremely dirty game.
Any other question.

Q:
K- Thank you Christmas is next week.
I call it, the birthday of Mitra, European version. We choose 3 or 4 days different.
…
it's going to become shorter because Mitra has come, 3 or 4 days difference. So we'll wait and see. In a way, the birthday of Mitra is celebration for, confirmation of the world of physicality for mankind, and the world of creation.
Any other question

Q: Is it best to try to receive the fields at dawn when the birds are singing?
K- Would you like to be onboard of a plane and dawn will be all the time, 24 hours a day.
R: The birds are always singing (1:52).

K

R; Wasn't that the first thing they do to create an oasis in desert bring birds in, or when they create an oasis. …
K- I don't know. It just attracts it, because it's a source of water, .. life. When you have an oasis you have a water resource, so anything flies over will smell the water. The birds and beasts.

We were watching the, trying to do some work in Iran with building the space center. The videos of the different land which is has been offered that the space center can be built. One of the ?? beautiful, where you see it is literally desert, and there is one waterhole, and you see the gazelles and all the animals know where this waterhole is, and they come to drink and go. You see them in line for one waterhole, which has been there for centuries, is where all the animals know, they come and just drink and go. That's a normal way, in the middle of nowhere, you see them. … Man will find, even in the space you'll find the places where the fields are, to our "tastes" as I call it, and we just go there to absorb tastes of the fields, that it could taste of the banana in the west. And you say, "oh, in the memory bank," in our RNA, memory bank M field, it says, this was the taste of banana on earth. (1:54). But will it raise the same emotion in the D of the soul. Is a different matter.

Q: Mehranez, ???? somebody said law. I think what you said today we don't have law, ,, order
.. for me that's already clear ..
(1:56).
(1:58).

(2:00). ..
K- Do I have a problem with bandwidth or is it Mehranez .

Q: If .. if I do it with a mantra or .. just giving from my soul what I an pointing to. ..
Someone asked is there a ritual for giving from my soul?
K- No we never create these kind of things. You've got to go within yourself to find it. (2:02). We never made holidays to be on a Thursday or Monday, temples to worship towards, we never do anything to create that kind of ritual.
Q: short cut ??
K- There is no shortcut, till you understand it
Q: It means we have reached the point of maturity of our soul if we can do it.
K- Yes, more or less .

Any other question.

Q: Salomea ,…. ..
K-
Q:
(2;04).
(2:06).

.. Humanity do not need leaders, humanity needs to help each other …
We have created separated minds and hearts …

Please be wise for the future of our children, (2:08). we live in abundance. because the U is abundance, never scarcity, and we create material, energy.

(2:10).
(2:12).

Much love Mr. Keshe.
K- Thank you Any other question.

Q: Dean, (2:14). …

K- What do you mean?
Q: I think many of us ?? from when we were young, and it traumatizes, whatever it is, for many people. So that field strength gathers within physicality , and this trauma can then be carried forward, and the Pl grows, it's an active ?? In the first instance it traumatizes the person … then that person attains authority and position, and then they could use it to reposition a nation and beyond. When does that ?? person comes to a position of enlightenment to realize the position stance they may have taken. (2:16).
R: went on a little too long

K- No it's just that the way it appears. We respond to some questions that are coming from the other side (negotiators), that why I moved out. The situation is not easy at the moment. How can we reach the soul of these people, how can we enlighten them? I just received a message from IAEA, which is disheartening. We have no answer. In just past few minutes. How do we work, how do we see? How we break these barriers up? The people we put to lead, themselves, and are lead by the others, to the confirmation of their own lack of existence.
Any other question. (2:18).

Q: ..will a deal on the UN atomic watchdog, on replacing the cameras, so that , will this help?
K- We have a big problem. In Iran we have a very big problem. This is part of the discussion, we accept, or replace the cameras. This is the discussion, Russians have brokered. What it is and what I raise. You got to understand. We see things in different ways. It's a big concern for Iran. I have risen that in discussion. Israelis have used our people, using UN cameras to identify, pressurize, and sabotage. We have a big problem with UN cameras. UN cameras are positioned inside all sensitive areas, supposedly to watch, Iran doesn't do anything. But the Israelis, which IAEA directly feeds all the videos to, identify the staff, and then they are pressurized. They are cajoled, they're bribed, they work on them. This is our problem. The problem is not IAEA watching it. Is the using of the cameras in IAEA, for recruiting or creating damage within the structure of the Iranian nuclear industry. This is unknown outside. (2:20).

I don't see any way to solve this problem, and you have hundreds of people, and they target sensitive people, and they work on them. This is part of our problem. It's not objecting to cameras watching, it's objecting to the use of the cameras by Israelis, in identifying the staff, sabotaging. Negotiations, T and all sorts. It's not just the cameras, it's the application and information use.

Q: We seem to have a camera in many different positions. We also have this camera, our soul, which watches everything, its position is in each and every moment, and each and every action we take, we watch ourselves. ..

K- It's not to be watched, it's one watches his on self. I was talking to some people … about china, (2:22). In China they can pinpoint you within 10 minutes where you are. It's the same. It's the use of camera, and the abuse of camera. It needs to be understood how we watch ourselves without a camera. We become watchdog of ourselves. In the past couple of weeks, when we do the teaching, there is a lot of pressure, because we are live on negotiations, .. it just takes time, you watch how lies have been told, and what lies have been told, and how information is abused.
Any other question.

Q: … Rafael, .. (2:24). …
K- can you translate what he is trying to say. Rafael.
Q: I was trying to understand his question. .. with the problems we are going through today in the world with the difficulties with the peace treaty he is asking a religious question. How is Satan working for this to happen? Where
K- What does that mean?
Q: .. (2:26). What's happening in the spiritual level, this conflict between God and Satan? Because that's what it seems is happening today with this problem in the world we are going through and with this negotiation, it's hard to get a peace treaty between them. What's happening in the spiritual world?
K- It's .. We are sitting in a position, that most of us don't want to understand, or most of our leaders don't want to understand, they are part of the humanity till their seat is gone. It's not Satan, it's just they think they are above everything, and they can go through everything.

The example is your president. I was in the American teaching on Sunday … it was explained by someone in American Teaching, that the Brazilian president has refused or .. abolished the vaccination book and passport, they call it, am I correct?
R: Yes that is correct, but the problem is, he is going through here, is that this power is with the governors of states, not with the president. For himself he will not take the vaccine and he's against the vaccine passport.
K- He abolishes, denies the vaccine passport? (2:28).
R; Yes.
K- Yes, but do you know what that means? What is the reason he got to that point? Wasn't there an incident, they wouldn't let him in somewhere. Nobody knew he was a president. or there was a confusion a few days before that .. . .

And then he realized even at the power of president, there is no need, because he was supposed to be immune. This is what we said in the other teachings, that the world leaders are immune from vaccination. They don't need to take it. This virus knows who is the leader and they won't touch. He was under the assumption, and the promises that were given that world leaders (WL) don't need vaccination and they'll be okay, and they don't take it. But they could go everywhere, they won't get infected. But I think he was with his son .. somewhere he wasn't allowed in New York if I am correct. Then when he went back, he said, because he was given assurances, that he won't get the virus, he doesn't need vaccination. Now he abolished it.

This is a very clear work, how the finance world has taken, and become the Satan's and the rest of it. We knew about this, we warned 2 or 3 weeks ago, that the leaders, mayors, high ranking civil servants don't need vaccination. How come? It's not safe. The world peace is the same. the world peace is in the hands of these people, until it doesn't come to their own homes, (2:30). and their own grounds, it has no meaning for them. It doesn't apply to them.

Satan of the man, is the man himself, nothing else. It is not created by God. It is created by man, for man, and it's the way to control the weak. ..
We don't have Satan's. Satan is manmade, by man, for man.
Any other question.

Q: How can we evolve towards higher levels …. if we are constantly faced with manmade "plan-demics" executed by greedy ego driven leaders?
K- Don't know. They think they are above everything, until they become part of it. This is the biggest problem…. these people the minute they get the seat of power, (2:32). or the minute some people say to them, "yes sir, yes sir." the whole commotion of trying to do things. We see more and more of it.

One of the major corporations have reported a massive, massive profit, which has come out of this situation of .. Pl energy transfers, we all know what we are talking about. He was very proud his corporation made so much profit, with the death of so many other people, they don't care. And he says, we are going to make more profit next year. Read the articles.

What I say, very simply is, we would like to see him and his family and his loved ones, in the next few months and years. How they have to stand the time of balancing of their own fields. The biggest problem is, we don't, when these people who are in power, are in power, we see them, but we don't follow them. When they leave the seats as chairman's, head of organizations, WL and the rest of it. We don't follow into the structure of their life, and you see how horrible they live. What the things, happens to them, the things they go through. Even when they are in position of power, they have things are so much hidden by them, for them. You have to see what happens to these people afterwards. (2:34)

We see it now with Netanyahu, the Israeli leader, or ex-Prime Minister. The way this guy was getting, energy by hate, by creating hatred, lies, and what you call, deception. What did this guy got from, by deception? Just feeling he can do. It's something interesting because it has come in negotiation in some documentation.

If you remember 4 or 5 years through our connections in American security we approached Netanyahu, for peace talks with Iran, to start a dialog. He waited a week and few more days, and he said, I will negotiate with anyone but Keshe, because he'll get his way. Then we realized why, he has used KF reactors in his designs to promote Iran has a nuclear power. That's why he cannot talk to Keshe, because he has used his space reactors by lying and cheating, as being a nuclear bomb Iran is developing. He openly has presented it. I have shown this picture before. He cannot sit on the same table and negotiate with us, when he has used us to create so much fear and pain to millions of people in Iran, and all the hatreds we see.

I have shown this before .. when I go through the archives, (2:36). of the pictures, why this man has such a behavior. Why has he used the KF reactors in presenting to the WL as a nuclear weapon. And he ?? and some of the actions of world governments against Iran, is actually the design of our nuclear reactors, space T. How evil this guy has been. He cannot look in your eye and negotiate with you, when he has used your T, your reactor to fool the others, into accepting that the nation is developing a nuclear bomb. It's unbelievable. These people at a point of power, they can do.

We are planning to take this into court in Israel against Netanyahu, deception, and being at the time, in a point of power, and having absolutely an idiot in the White House as a president, or in a way, collaboration between the two. This has become a point of sanctions. Why do people at the point of power do such a thing. No wonder he won't negotiate with us, because he has used the KF space reactors in the same picture and he has made it to be, (2:38). a nuclear bomb. 90% of the fear in present negotiations, it is in our .. communication with the 5+1. How come the Americans have accepted this foolishness. It's exactly the same pictures from our teaching, has been used by a WL to bring sanctions on a nation, which does have no intentions of developing a nuclear weapon.

Now even our own leaders in Iran were aware of how we got to this point. You as KS work with reactors, we worked together to create a condition of peace to show the T and a twisted minded, what I call, demented fear driven guy, has used our T. It's literally, I went through when I saw these pictures, in the same emotion as the Nobel, when we got the Nobel Prize. When he saw, what really was about him, but what he brought to me, how my T, how a reactor, which I developed to bring peace for humanity, has been used by 2 WL, most demented leaders we've ever known, and it has become a cause of sanctions on Iran. (2:40).

It's absolutely, we cannot go back. We cannot go back. We cannot change how our reactors are used. Our work, as us as KS, is used. This just came to me from Azar. Rick play it, and see we Are KS and how we abused. … We are trying to explain to the

Americans that this picture .. is part of Iran space T. … Look at it the both pictures are part of our teaching. .. There is a copyright on it, it belongs to BBC. .. We are going to be brought down by BBC. … Don't play it. (2:42).

IAEA has a problem with this picture, because it's on the table nobody can deny it anymore. Biden has a problem with this picture, because his team has to go back and say, Trump had trumped the whole nation. This is part of our problem. If you see it, than you understand how difficult the job is for KF. We worked on trying to bring a peace program, we developed a space program, and just look at the picture. A WL lying in public to bring crimes, and bombing and killing, by cheating. You all know this reactor, it's a copy of the Iranian space reactor. (2:44). This picture as part of the video which shows Israel . brings shame on the flag and the nation.

Your space reactor, and just look the way they show inside it. I think some of you did the test, we've shown this structure, we've opened this reactor. They are using our T in a way, to create a condition of fear. And they call it, "designing a nuclear weapons." "Designing of Iranian, .. dissemination." If you go back and look at the.. some of you KS as working in the lab have seen it. This is the reactor. You see it. My knowledge to bring peace has been used by the most heinous man 2 WL, to bring sanctions and killing and dying of children in Iran.

This is why we take the love of God from the nation of, not the nation, from the tribe of Moses. When you look at these, and when I see it , as the inventor, developer, and I see what I brought, and the purpose, and what has been made to be, and brought sanctions, and has brought hundreds of thousands of people suffering, (2:46). with the lying and cheating of these people. And the beautiful thing about it is, the Belgium's have passed this to the Iranians, to say I am an Israelis terrorist. They all lived within my home, and sabotaged everything from inside, lies and cheats. All work together to bring the most beautiful T, to be the most heinous. Lining their bank accounts and men in their bed. Now you understand when I say, I am in ashamed to be in the clothes of man.

It is not easy when you face these things and you have to fight to overcome a lie. (2:48). To fight, to show how proud these people are to be part of this. That these people have brought to us. Are you there Rick .. But in reality it's for us, it's a shame to see our T, as been put it.

This has brought a big pressure on IAEA. This picture and the picture of the KF space reactors in past week, has brought mayhem in IAEA. They do no know how to handle this. How to work with this. How can they go back and tell nations, we accepted a lie. So IAEA is doing its best to cover-up this. (2:50). And the Americans are running rats from it. This picture, is the picture of a murderer, a terrorist, and most evil man I could ever known to exist in the time of my life. Where you deliberately go out to do such a damage. Tomorrow morning in negotiations, these things have to be solved. Americans don't know how to handle it. The Americans, the Biden organization doesn't know how to explain this to the world, that they have been cheated. IAEA is trying to distance itself as far as it can, from this position.

And what can we do? We teach the T as messengers of peace, for you to learn how to go to space. And we get the most evil men on this planet, 2 of them. Then celebrating, if you go further on this video you see the 2 devils, what you call Satan's hugging each other under the American flag. We lied, we cheated, how do we share the loot, by selling weapons to the Arabs. (2;52).

This is where we have the problem, this is where we find pain in the T, .. I cannot find words to describe it, to explain it, but how do we, how do we explain this to our people. How can we explain this to people, that a tool for elevation of the man, for science and T, has been used the wrong way. And deliberately, and they are celebrating doing it. (2:54). Any other question.

Q: Kay … God bless … all the energy you put in this negotiation … and hopefully by the grace of God, sees it goes in the direction you are wishing … Those leaders, those countries who are superior, is there any way we could take that superiority away from them, that they don't feel the arrogance?
K- Elevate their soul, elevate their soul.
Q: Apart from that, is there a quicker way.
K- When we say we take the love of God from a tribe, (2:56). it means we give it to them, but their soul will not accept. It's not punishment by us, it is punishment by themselves, to themselves. We don't punish. When we say we take the love of God, it means we give, but they cannot receive it, because they punish themselves, they block receiving. It is the way these WL don't understand, until they come to the point themselves to be.

We used to have close friends from Iraq, and at a very high level, before, when Saddam was in position of power. And the things they used to tell us, is that people used to have weddings in hiding, from the fear of Saddam and his sons, what they used to do, come and take the brides on their wedding. They used to hide their brides in rooms and basements from these evil people, not to get to. Where there was a point of celebration.

Then we saw what happened to Saddam. He himself hid underground, what he did to other people came to himself. They live that cycle. How long do they hide under that ground, for every step which goes over for them, I might be found out. We've seen this again and again. (2:58).

You see, we can't do much, but they do it to themselves. Where is the reality, and what do WL do with themselves, is another point, after they do these kind of things.

What we see in the next couple of generations there will be no sign anyone, who will follow Moses. A couple of more generations. Because they become enlightened to the truth, and the way their leaders, and the way they were setup. In a way, people used to hide to call themselves (Jews), this time openly they walk away from it. The same will come to Vatican and will come with the others, where the people see the truth about how, and what reality is. By the end of this century there will be no Jews left. Not by

elimination, but by choice not to be. The name of Judaism will be on the paper, and soon will come off the paper. We don't say the end of a state, we call the elevation of the soul of those who understand it, they'll walk away from it, how long .. How does every Israeli feels when they know he is such a cheat and ?? these pictures by the leader, children are dying in Iran with sanctions. (3:00). This is the way they make their own people to walk away from their own belief.
Q: my wish is .. for what you just talked about earlier, about Netanyahu and Trump, going on about the lie of the century. I wish that comes into light as soon as possible.
K- It is in the light. It's on the documentation to IAEA, and it's on the table of 5plus1, this picture.
Q: I hope it will be in the mass media.
K- No they won't allow it to come out. It's on BBC, it can't be more mass media than BBC. You understand. But connecting it to where it comes from .. IAEA. This morning, during these teachings today, I had communications with IAEA in the background. They don't know what to do, they say, "we leave it, we can't do anything with it." This is during the teaching of this morning. IAEA offices are in the shock, because they supported it.
Q: .. we've been there before, not so far distant past. .. They cooked up all that rubbish about the weapons of mass destruction of the Iraqis, and 45 minutes to London. They went in there, killed a few millions, and they said, "oops there was a flaw in our intelligence." (3:02). They can simply do that if they want to. The point is, it is really not there. The UN was involved in that occupation, and destruction of a nation. Nonsense they built up, just exactly like Trump and Netanyahu, built up about KF reactor, which is supposed to be the most important piece of T in the history of mankind. They can easily revert everything back if they want to, and bring into the open. And say, "oops we made a mistake, somebody told a lie." And they always have a sacrificial lamb. They wouldn't care about Netanyahu and Trump.

K- You know what the Americans are doing. Oh, this is part of it, this was not all of it. You understand.
K- You know, if you are in Vienna, we go to the conference. The conference is like on one side, and in front of you is like a camp of, tent of reporters, flashing and doing. These reporters are told what they can record, what they can serve back to their headquarters to show.

We have the Iranian channel, everyday you go they are there. It's the usual what do you call, celebrity show. They go on lunch, they go on lunch, they come back, they come back. They are there, just only to wind it, that it has something. How can we put this. Even our own Iranian television channels are not prepared to bring it out in Iran.
Q: Shame on them. (3:04).
K- This is .. (Mr. Keshe cries a little) When you go to this conference, it's like a cat show. You know the cat walk? That's all it is. The American negotiating team has sent 2 or 3 to Vienna, they're staff is sitting in London. When we can bring the Iranians on their knees, then we fly.
K- Somebody says, (in the chat) tell them to visit the KF Exhibition center atomic energy in person so they can have a good laugh. We already done that. We have prepared that.

They are fully aware of the what do you call it, the structure. Thanks to the KF team in .. Austria, in Linz. We have made everything prepared ready, for the visit with IAEA.

They've come, we've been told they have come at night, and they have visited the center in secrecy. It's very interesting. We had the report that while the (first) EC in Linz was closed down (due to Corona), the Americans and the European scientists have been allowed to go in, (3:06). and investigate our T. You've been to the EC yourself, you came for the opening. This is today. The exhibition is set completely to show the diversity in T. They have been there, like thieves at night.
Q: Not that they would understand anything.
K- We have KS who work with them.
Q: I am sure they don't understand anything.
K- Ashamedly we have KS who work with them.
Q: A lot of shifting, everything has gone to the basement.
K- Yes, now downstairs has become the space T, done this week. Thanks to team in Linz, we are in Vienna.

Q: .. can I say something. I want to continue with the first statement I made, all bunkers it may sound. But to take away the superiority appears to me, to those arrogant nations, is to take their advanced T away from them. Delete them somehow. It sounds out of this world, but I am sure there is a way we could mute those very tools that they have, that gives them the superiority. Once they don't exist, they will become humble.
K- Didn't it happen to us, as the Persian Empire? And now, (3:08). we become humble, and they see it as a weakness. This is the problem. By that time, I am sure when we had the Persian Empire, and before the empire became an empire, our leaders did the same to the other nations. It wasn't that everybody came, and became part of, there must have been atrocities.
Q: Yes there have been,
K- So have we matured for 300 years not crossing our borders. How long do we have to wait for them to mature?

Q: We need a catalyst, I don't know how.
K- The catalyst is the new T. But the time for it, starts from next Tuesday.
Q: We wish from our soul.
K- We know from our soul.

Everything is under the control of what we call, "incompetent people" who reached to the point. In the beauty of it is, whatever man needs to survive in the space, from this planet, is under this roof. If you understand it. In a way, for the first time, if you open the picture … you see, (3:10). the first time we showed the Horizontal system in public. In this machine I can grow your leg, I can change your heart. Next to it you see the Brain system, next to it you see the Vertical S, .. original EU for dense plasmas. It's beautiful to see, how the man has strived for thousands of years, is gather under one roof. If you look just above it, you see the reactor, space reactor in the center, the one which Netanyahu has used.
Any other question.

Q: Azar, why don't you put the negotiators , (3:12). in the EU before they sit for negotiations, like when you go to the airport they send you through this scanner unit, check you.
K- Check their brain for the souls.
R: yeah, maybe they need to check their brain at the door and just negotiate with their souls instead

K- I don't know, years ago, I used to work for IAEA and we used work in a cow shed. The way we used to enter and exit, in a way was very funny, the way you went to work in a farm. It was so strange that a few times … the Russians have cameras hidden in the trees, watching who comes and goes in the center. The joke was even some of the cows have a camera in different positions in their bodies, that they can see people going out in the fields talking. Because we were told when there was something very confidential you always don't speak in the building where others can hear you. So very confidential things was talked in the garden, you could see a lot of people walking 2 together. It was a strange way.

At the moment, IAEA has literally been snookered, with what is on the table of negotiations and why the sanctions on Iran. Once you create doubt in one position, and you can strengthen it, (3:14). then doubt comes on the rest of it. This is part of KF, job not to create a doubt, but show the fact. At the moment IAEA chiefs in Vienna, are literally running like rats, how to bring a country who is supposed to be developing nuclear weapons, is a space T, is used by nations, to put sanctions on it. IAEA, Mr. Grossi at the moment is on the run with this. He's got to answer to Iran, why has he supported, why has IAEA has supported sanctions when they had no proof, and relies on the lie of 2 presidents. One of our negotiators said something nice. What Russian girl get to bed with Trump to get him to do this. This is a massive, massive problem today, sits for IAEA, who has supported nuclear sanctions, where lies have been placed. They do not know how to handle it. (3:16). They literally do not know how to handle this situation.

R: .. It seems like in a way, greatest blessing .. Netanyahu .. I have seen that years ago, I start laughing at his reports.
because is brings it to the surface, they'll have to deal with it. .

K- We have a big problem .. this lie, this presentation lie… The biggest problem now in the negotiation, is not the negotiation prior to 2015. It's the new sanctions which is brought, because of this picture, this video by Netanyahu to Trump. This is the biggest problem. This is the biggest problem for us. (3:18). With this picture, with this document on the table all the sanctions are irrelevant, but the Americans don't want to accept.

In a way, I will read you part of the text of this, it's very interesting that, we put it in a very polite way. It says, "now who has fooled who? Iran's new advanced nuclear space T, has become weapon of, weapon T, by misrepresentation and deception." And the

Americans, to confirm they have been deceived, they have a big problem to sell it to their nation. Iran's new advanced nuclear plasma T is a space program development. The system developed is to allow man to travel in the deep space, to produce any material as he needs in the space, without returning to earth for supply.

How do we .. the biggest problem is Americans confirming that they have been deceived. (3:20). Americans confirming they have been deceived. A nation this big with their president, to confirm that they have been deceived, brings question mark on other decisions they have made.

At the moment in IAEA we are in negotiation, break point, with this documentation. Because this makes the sanctions absolutely ridiculous. I am back in this afternoon, or hopefully tomorrow morning. We want this to be opened up. The American have to answer why they placed the sanctions on a lie. Why didn't they prove, how they did not check their .. sanction policy.

It's amazing, now you know as KS, how you sit in the center of negotiations. How you.. This is the fear they have, that the KF, and everything goes public. Now you can see, how our T and KS, people like Armand and the others, who came to the Inzano, they brought their reactors, they built it themselves, your reactors now, is used as a weapons T for the nations who abuse. The lack of knowledge by the others, about the work of the KF. (3:22). I see myself responsible for every suffering in Iran, when my T has been used this way, sanctions added to, then I am ashamed to have another person who lived with me, sending it to tell them, the way it's done, by lies and deception. When you mislead, when you are there, when you are, it's part of the life, thiis deception, whatever has been said, done, then is given back to. I'll show you something very interesting … they are proud to show how they have spied, and they have delivered documents as lies, to other nations. how they lied to it. The fact is, how alert do we become, our T to be misrepresented.

You see there is a difference between us and them. This is us as joint, as KS, American KS. And this as us as KS in another continent. (3:24). And this is them using the same knowledge. We promote peace through the same knowledge. They used our knowledge to create sanctions and pain.
Any other question (3:26).

Let's see what comes up and how we succeed in these works.
R: When you are confronted with lemon, you find a way to make lemonade …
K- We'll see what we can do, .. have to do, .. how we can shape the future, the correct way.
.. hopefully we'll find another way to enlighten, ?? for next time, or next generation.

Proofed to here ..

411 KSW Dec 16 , 2021 (3:28).

Birth Mitra new cycle has started ; live without brain; KF punch of truth to 5plus1; 2/22/2022 and 2222 changes ; Personal experience shared by Mr. Keshe - gathered wealth learned diplomacy; Detached from wealth; No spiritual democracy we are already free; IAEA cameras used by Israel to spy; IAEA cameras only machines; MaGrav in Iran factory - need to complete; DUST particles are flying machines ; Leftover fields around aircraft how formed when dangerous; How moons are formed ; Moons are vacuum cleaners of leftover fields of planets - unknown to scientists; Mitra sculpture in Iran deeper meaning

Quick index:

We celebrate Birth of Mitra, Day of Enlightenment for humanity, Christmas replicated from Mitra; Promised Day (Second Coming of Christ) all happened on 21st Dec; New cycle has started; Purpose and understanding of Mitra explained last Tuesday One Nation, We don't interfere with Universal Council (UC), Birthday of STM end of darkest time in human history, We understood that there is a Creator, Waiting for STM to mature, In this cycle man will enter Universal Community, We always see he/her Mitra as a light, Meaning of psychosomatic life, Schizophrenic life of man soul and physicality, In new life both work together, Emotion of physicality requires a brain, Man can live without brain - emotions go directly from physicality, STP, STM; Through STM & STP man will survive as an entity, We don't see brain in-between sun and earth, Mitra is amongst us, We have abolished all religions through understanding the truth, As of 21st December mankind entered a new phase, responsibility of transition sits with UC in cooperation with Earth Council, Explains what happened in 5plus1 negotiations - KF interfered we see a big leap forward, Will not transfer T to US without lifting sanctions, KF independent made punch to IAEA - save negotiations, Flight EU to be delivered to 3 groups AZ, Tehran, Austria, Invited NASA to participate other nations to work together, Invites all space scientist to join KF, Massive punch to IAEA delivering documents, Sanctions on Iran based on falsehood, Bring "black budgets" to work white, Europeans left out because of Belgium, Chinese left out of testing, KF stays independent of Iranian space agency, KF set example to change stock market practices, Man needs a helping hand to elevate STM, KS responsible to keep KF knowledge free in future, Responsible to save life anywhere in U, Soon there will not be any religions, Atrocities committed by Moses, True wealth & culture stayed with those nations kept in poverty, Through pain they understood truth about creation and closeness to Creator, Flight system will be the push to world peace, Another completion in 200 years 2/22/2222 - to achieve point of change, February 22, 2022 next cycle of understanding, Will understand emotion of soul and emotion of physicality, As Messengers we deliver directly against all odds, We see the end of Islam, Judaism, Christianity as religions, Different paths of belief all become

one, Mankind one of the slowest animals to mature, Brain too greasy and sticky - sticks to emotions, Mankind has always had the wisdom, 2022 bet year ever, Do everything to enlighten man, Truth sits with Creator reflected by STM, Return of the Messiah where Messiah is your soul, Mira celebrated for 12 days, Abolishing the monetary system, World leaders lay down arms for peace or we will make it happen, Governments feed people freely without taxes, True history of man will be told, We sit with Iran- Russia-China - we will prevail, Truth revealed to IAEA, IAEA understood lied to by America and Israel, KF separated from many governments in past 6 weeks, NASA scientists expected to work with Iranians and Chinese, Change on our planet is already in progress, Enlightenment comes in 1 second, Mr. Keshe tells some personal history, 40 years to understand gravity - came in 1 second, Enlightenment doesn't need study it is just there, Cannot shorten, It's the soul of Creator within you which enlightens you, "Spiritual Democracy" meaningless in U - all are free, Mr. Keshe tells a little history of life - making money - being tested; becoming detached from wealth; Only 1 or 2 people in KF detached; About anger - his personal experience, Lord Bill was mentor with upper classes, Human race just vents out anger instead of finding another way, More about the 5plus1 negotiations - opening hand of Americans, They targeted Markray, IAEA cameras in Iran used to identify staff - bribe recruit as spies, Cameras should be put only at machines, No punishment - you distance yourself from Creator, biggest punishment is to distance self from Creator, 2022 big products like CO2 capture buildings: Flight systems and EC, Launch satellites for few thousand dollars, Colonization of solar system in 2022 - 23, Invite big organizations to join KF, MaGrav in Iran - KS in Iran not completing it; MaGrav Generator was already taught - not spoon feed, Go to moon in 2021; Chinese betrayed KF have to go to others now; Dust particles are flying machines - have to become aware of it, Moons are vacuum cleaners of planets - leftover fields that can become problem, Leftover fields created by planet will be same as with spaceship - have to handle them or become own demise; Iranians 100% enrichment kept secret from negotiations or it will end them, Go to your soul and you will see physicality of Mitra; teaching children - new children will be changed not to kill; Meaning of Iranian sculpture of 3 figures Mitra -King - Ahura Mazda; Power of king comes from Creator as a light - through Mitra, Changes in 2022 not a vision - the change is going to happen, I am servant to the presence of Mitra,

ENGLISH TRANSCRIPTION

(:12).
K- … that we enter understanding of the totality. This week we have a number of celebrations to celebrate. First on Tuesday birthday of Mitra where all the religions then changed names, and tried to work around it, but in essence, branches of the branches, but the totality stays Mitra. It's, in a way, the light of the Creator, the light of the soul of the Creator.

It's not to be arrogant, but is to understand and be respectful of the truth, and the way the things have set with us. (:14). We celebrate in the next couple of days, .. Christmas and

the birthday of Christ. In a way, replication of the same with a few days difference, that it doesn't fall on the same date, that there is a confusion and replication. Once you read about Mitra on Tuesday, and then you read about the Christ on Saturday, you see it's the same story. You see replication, you see confirmation of existence.

In a way, as I said in the One Planet OR on Tuesday, as we stay totally out of the program of the Universal council (UC), as they are independent. We do not interfere, but just to be there, to explain the purpose, or the understanding of what we call, the birthday of Mitra. It's the birthday of the Soul of the Man (STM) of the understanding. It's the end of the darkest time on the human life cycle, where man was just an animal, behaved like the others. Through understanding of the Creator, he was taken out of the long night of darkness of knowledge and understanding.

Then we went through another cycle of darkness, we understood about there is a Creator, we start worshipping in different ways and names. Now all promised, the Promised Day, when the Messiah comes, .. Methi comes, when everything else comes and this planet ?? then evolved, and will be what we call, ???

But in fact, this long term from manifestation of Mitra. (:16). to last Tuesday, which is the return of Mitra. That's why we celebrated it, that's why this year is significant, and we'll see the change in the cycle of man. The Promised One, the Promised Day, has arrived, we were waiting for it, in a way, for the STM to mature, that the thousand year waiting in darkness has come to an end. It's a beginning, it's a new cycle, understanding the STM. We understood there is a Creator. Now the man will be taught that the Creator is within him, in the STM.

Many of you expected manifestation of physicality, that has to be understood, is partially you. You are manifested in the dimension (D) in the love of the Creator. It's you who has to understand the change. In a way, what we call it the Promised Day, return ?? of Methi, or whatever, has completed its cycle. It's for man to be enlightened, it's for man to understand the change, and with it, in this cycle, man will enter the Universal Community, because it is part of the life of the U Community. Mitra came from the U, and in the D of the light. Even when we look at Mitra in the carvings and whatever, we always see her as a light, we always see him as a light. In different cultures and ways, mankind has taken different ways and confirming the existence of the higher order, stronger than man, can be protected by. (missing)… of the light, of what it comes from the essence of the creation.

In the coming time, (:18). as we start teaching in institutes and other D of .. KFSSI we'll go into the deeper. Not into theology, but to bring the reality, psychosomatic of the life together. Psycho to be the theology, somatic to be with the man in the physical D, in that he creates crafts, or whatever he decides to travel in. We take the man out of the life of the schizophrenic that he lives 2 lives, one physicality and one the soul. Where the two work together. Where we take the position of the brain out, as the interfering side, and we bring them to the point, that they can communicate directly to understand, and interact.

In totality man will realize, unless he creates continuous conditions of the planet earth anywhere in the U, he will have that D of the brain to have the emotion of the physicality. But man will learn in the coming time, that he can live without the D of the physicality of the brain of the man, to have a direct emotion between the physicality, and the Soul of the Physicality (STP), and the STM. The brain of the man is made of C, H, and simple elements, and in the depth of space will dissolve. In the depth of space will not exist, on the planets, or position in the U, where H cannot exist, because of the strength of the fields. What happens to the amino acids (AA) of the man? Does it become the point of demise of the man, or through the STP and STM in both being together, and being synchronized and understand the totality. Man will survive as an entity.

In totality becomes very much like the sun and the earth. We don't see a brain in-between, but we see the love and the affection. The way the sun looks after its little children, which is sitting in far distance (:20). but it shines the same on all. Mankind has to understand, that the time of the maturity of the man has come. Mankind has got to understand the time of the peace, .. the honey has come, but it's the man who has to choose the time.

Mitra is amongst us, in soul, in the D of understanding, and in physicality, recognizing the existence of the D of the transformation of fields, to the strength of the time and position, to manifest itself as a matter state, or point of observation. It could be as a fields, it could be as a wave of a M field, or it could be the physical D of the stone, the man, tree, or animal or any other creature in the U. We will have a big problem with the present theologists, and present line of thinking, that has been created on the name of different religions.

We have abolished religion, by our own understanding of the truth. We abolish it within our brain, by recognizing the truth about ourselves, our existence, our lives. Mankind has entered a phase of change, as of last Tuesday. You will see massive changes, we promised, we delivered, and we'll deliver the rest of it in the coming time.

The responsibility of the transition sits on the U Council, and no one else. As the UC, in cooperation with the Universal Earth Council, will do, will bring the position of the understanding of the man together. We will see massive changes in the whole structure of the KF, and in the background, with the whole way that we teach, we deliver, and we do. We have started bringing the space as part of the collaboration of the nations. As we said in the Tuesday teaching, (:22). KF in response to the success with 5plus1 in Vienna, the way KF interfered the Monday before, to get the outcome of the Friday in the background, as we always done with the American administration, we have seen a big leap forward, and we respond to it accordingly.

We said, we will not transfer anything to US, unless we see the end of what we call, sanctions. Not just for Iran, but on the knowledge. To this respect and to this response, KF is to announce, and we carry out in the next few weeks, the first flight Enhancement Unit (EU) will be delivered directly into AZ, .. to Tehran, and directly into our facilities in Austria. The 3 groups will work together at the same time, to develop the systems,

testing the flight. We have invited the head of NASA Propulsion Lab to join us in conjunction with Lockheed Martin, and Boeing International on the flight system. We have put the hand of friendship to the Chinese government, and the invitation for them to join, will go out in the first week of January.

We invite the rest of you. If you are scientists of space, not just Nano coating and Gans's, to join this development. You choose, we decide if you are qualified to understand the process, that you can speed our process up, to join us in AZ, in Austria, or in Tehran. It is important for us to rapidly bring everything to an end, before somewhere around March, that we do enough tests, that we are ready for June to take flight. You got realize when the mankind works together, it's very successful. We do not look at the borders and nations anymore, (:24). as we have said, we see success in negotiations in Vienna. We'll respond.

On Monday of last week we delivered a massive punch to the whole structure of the Atomic Energy authorities (IAEA), with the delivery of documents, which opened the hand of nations, how what we call, "misunderstood" about Iran nuclear T, and how KF knowledge and T and equipment was used to create mayhem of nuclear bomb, weapon. This came very rapid and was shared to the Americans, and the other 5plus1, by IAEA. The head of IAEA Mr. Grossi immediately shared the document delivered, and we saw a rapid change, and change of position, because the sanctions were on the false basis.

We do the same, we've done the same, as I said, we have become 5+3, and we showed our power in delivering the truth to IAEA, and IAEA respectively sharing it with those who created the sanctions on false basis. This is thanks to many of you who work at the KF, and putting and collecting, and bringing a lot of knowledge together, that we could do, deliver such a punch. Within 5 days we got a response. Where there was no hope, and everybody returned (home) not to come back, or come back a failure. Now 5plus1 will come together around the 26th (December) to find a final position. In that time, and in the next few months KF, by delivering the whole position of the space travel, in collaboration with a number of nations space agencies, we will bring an end to all sanctions, as the man will be hungry for more knowledge and what has been discovered. KF stays independent of any nation, and we operate independently.

If you are expert, (:26). you understand the work of the G fields, and you are in a space T aircraft industry, we welcome you to join us, as we done it with NASA. As I wrote to NASA head of propulsion, the time of propulsion is over. Bring your team, work with John in AZ, bring your heads of the Lockheed Martin, and Boeing who work in the background, black budget, and we work together with a clear white budget. We finance it. And we are sure we'll get the same collaboration from other nations. Still European nations outside the state of Austria, will stay outside the framework of the KF space work. It's got to be understood, we are setting a new criteria, we are building a new nation as One Nation, and we have to be correct in every aspects of our work.

I invite you KS who are truly understand, and understood, the process of the creation of the fields from motion, life, and in a way, to be able to deliver the T in conjunction with

the other scientists around the world, to join us. We have made it easy, AZ, Austria, or Tehran. We deliberately have kept China out of the testing as we produce our systems in China, In the coming time Chinese scientists will receive their own unit. We have invited the Russian space agency to join us, .. the Iranian space agency to join us, but you got to understand, we stay independent. They need to come in, not for us to stand and wait, (:28). for someone to come.

The delivery of the T will be rapid. John has been made aware of it, and he is making Arizona (AZ) center ready to receive the first Enhancement Unit (EU) for flight, and there on, every week one unit will be added to the stock pile of the systems in AZ. Somewhere by March we hope the whole 12 systems of EU as a body, and the 2 flight systems which is setup to go to AZ, will be there to be completed, to be test. The same will be in Tehran. It's the responsibility of the Iranian government to foresee in the coming days such a transition.

We see an end of every problem, which man created for himself, through creating false borders. We create position on earth, I am from this planet, on such a place we call, Iran, but you have no borders. We live and we cross, the way we did for centuries without any borders. Who made it, to control taxes. In the system of KF .. universal work, there are no taxes. Soon man will come to understand this work, soon man will see this work.

We have already made this announcement into where KF is majority shareholder in one of the world's stock exchange markets, that we'll abolish, and we change the whole position of the what we call, stock hold market shares. Where the same as what we done with the coin, we keep the value of a life the same, it does not matter where you are, and we take the stipulation and speculation out of the whole market.

You will see this way of working soon, in where KF will appear, (:30). in the stock markets of US, London, or Frankfurt, Tehran and Beijing. In that process we will show a new way, and bring a new direction into this systems. You got to realize the elevation of the soul to understand the dimension (D) of physicality, needs a leg up, a hand to get that leg up, that he can move to the next step. That level will come in the form of the .. flight system. By being able to fly across this planet, and not to be detected, and not to be able to be controlled, the governments will lay out a new way of what we call, facilitating the ?? but being able to deliver systems, that man needs no food. Food cannot be taken at a point of ransom, that they can control government through food chain. When we can deliver the systems of EU, that when you have crisis's, as we se today, some do not need to wait for the charity from the others, that they might save some lives. It has to be universal.

It's the responsibility to every Knowledge Seeker (KS), my knowledge, the ethos of the Creator, stays free for every man on this planet and beyond. Means it's your responsibility to teach, .. share, .. to save life in any position in the U, and not only for man. Irrespective of anything else. Mankind will soon come to understand, and it will be the biggest shock to man, he will be given gifts of life in the space, and no one will ask for dollars or euros, and no one will ask you, to give me something instead. This will

bring a shock to many of the man in the space, (:32). even to the Soul of the Man (STM), as it's learning the new ways in the D of the creation of the physicality and the Soul of Physicality (STP), being all interactive.

We celebrate the birth of Mitra, .. the return of Messiah, .. the return of Methi. What was the celebration in ?? board, the essence of the maturity of the man. In that process, man has matured. We have taught enough to be there. As we said before and we'll say again, very soon, sooner than man can remember, man will not remember a name for any religion, and will shy away from it, and will remember, that in the name of the religion they created division between the Creator and the created, and they abused the man. There shall be no religions left, except in the books, and soon one of the first ones forgotten forever, due to atrocities, and what I call, the crimes they have committed on the name of Moses.

It has to be understood, there is no punishment, but man will come to mature, not to remember, the bad parts of the life. The bad part, which he has learned, and will never go back to. As we heard ,.. world leaders (WL) are gradually becoming matured, and they need that last leg up, to understand the time has come. I thank especially John … Yesuf, and Klaus in Austria, and by Wang Lynn and her team in China, (:34). that it has made possible to create independence and foundation for One Nation. You will soon understand, where the difference will come. Where there are no borders. Where no man will be recognized by color of a book, or a card.

Where everything will become free, especially in the nations, which are abused, we'll concentrate more. We'll endeavor to establish massive structures in Africa, S. America and Central Asia. The rich nations of the West by stealing, have become rich in the D of .. wealth, by stealing. But the true culture and wealth, has stayed with those nations, who they kept in poverty, and they made them to be closest to the Creator, as through pain they understood the truth about creation. Maybe it's time for one to mature the other, but maybe it's time for man to mature together.

I have celebrated the birth of Mitra, and as part of it, we celebrate with many of your souls knowingly, or unknowingly. A new D has started, a new life cycle for humanity has started, and every one of you are a cell in that embodiment of creation, and Creator. It's for you to decide what this cell, what role you will play, and how you'll interact. You will see changes in the structures of even your own understanding, and in a way, you evolve to another step.

Today's teaching is celebration of life of Mitra. In a way, (:36). change the name in another language and call it Christ. In a name, change the soul of it, and call it the teaching a Mohammad, or Buddha. In no way, any of the .. created path of belief, told the humanity the truth about the Creator, and enlightenment from the light. This is the completion of it, as of this week, as of the 21st of December, 2021. Brought the beginning of, what we were expecting.

There will be another resolution, and completion on a number, which in the future mankind will come to understand, which is known in the calendar of Christianity, by all "two's." Mankind will come to understand the totality of exactly, where the man will sit. Where the totality will be, on what we know, and what we will call, "the point of change." Man has 200 years to achieve it. Man has this time to be able to complete the full cycle. This will become apparent in the time will come. We will bring it up and we'll teach about it.

On 20, 2022, or the second of the 22nd of February (Feb 22, 2022), man will be enlightened to a new knowledge. That's the next cycle of understanding. This time we don't wait for centuries and thousands of years. But in a way, we build the time to that completion, to enter another cycle. It's not a promised time, it's understanding more of. But in time we do these things. (:38). It's specifically for a specific arrangement.

We are not prophesying, we know we are there, we shall be there to deliver more. Mankind will come to understand himself, .. celebrate the birth of Mitra, return of the soul of Mitra. The beginning of understanding of the man about the truth about himself, and in that way, create a new generation and children of man, that will live in both D, and are fully aware of the two, D of the soul, and the STP, and presently will live between the two. They understand the emotion of the soul, as much as they understand the emotion of the physicality.

In all that time we'll be present to guide mankind through this change. Today is a beautiful day, where we sit on either side of both, the Christmas, and the birth of Mitra, on the balance day. At the same time, mankind will come to understand, the whole knowledge of U, is at the disposal of the man. It's man who has got to reach it out, to achieve it, to learn it, and to be part of it, and to recognize learning it is one stroke of understanding, and completion.

As we said, and will say, we wish you a happy New year, and a Merry Christmas, and we wish you one of the best birthdays ever, of the birth of Mitra, where everything started from, (:40). and all shall end with it, where that point, where the end is the maturity of understanding, not end of world, or end of anything. It's the end for the man alone and nobody else.

As I always said, you cannot pay someone to love you, .. to trust you, and you cannot pay no one to mature you, except yourself, to understand to mature, to understand the totality. My job as a Messenger, has been to deliver the truth for man to understand the message, and no more. We take our position as Universal Messengers. We deliver directly, and against all odds we'll survive, as we are from the Creator, and not from the man. We live amongst man, the way man does, but man confuses his understanding of position and time.

We see the end of Islam as a religion, but as a path of correct conduct, the true writing in Koran. We see the end of Christianity, as we have wished for, as now the truth is known

about Christ, and the way it was set. We have already abolished the Judaism. And the same goes for Buddhism and the rest. Different paths of belief, now become one.

We all return back to the mother, to Mitra, the origin. To what we call the truth, the first time man realized about his Creator, where it came from the light, and through the light. I hope and my wish is, man matures faster, because he is one of the slowest animals I have every known, to learn anything. But somehow it's the function of the brain, it's too greasy, and too sticky, and sticks to too many things called, emotions. One day, mankind will become wise to understand, (:42). he has always had the wisdom, it's him who ?? blinded himself to the knowledge. He denied access to it, because it was easier to enjoy the D of physicality.

We wish you one of the best years man has ever seen, in 2022. At the same time you will understand it is the time for mankind to mature to the truth and the peace. We lay our ways, and we will bring everything possible, to create that condition, for you to be enlightened, be it with the machines, be it by conditions, being by bringing other souls within the KF understanding of the teaching, to bring the totality together. I thank you for being here today, as it is Christmas, and the birth of Mitra, return of Messiah, return of the totality, where the Messiah is your soul. Where is understanding and maturity of your soul, to save yourself in understanding, that the truth sits within the Creator and nowhere else, and that Creator is reflected through the STM. Enjoy, those of you who believe in the path of Christ, the next few days as you celebrate his birthday, and celebrate, and we return back to celebrate the birth of Mitra.

You got to realize, in olden days when man who believed, or came to believe in the path of Mitra, celebrated these days for 12 days. The most important religious festival, the most important festival for man across this planet, (:44). was 21st of December - Birth of Mitra. When in fact, was when the man was enlightened to understand about the Creator, and in time, this was changed, and man with different religions decided to, in a way, diminish the truth about Mitra. But we have resurrected Mitra, to the truth of what it is, and shall wake up. Mitra is the symbol of justice, .. light, .. of wisdom and understanding, and this is for the man to find to find all 3.

Maybe one day soon we'll all be enlightened with the truth and understanding of the light of the Creator. Mankind will find a new D, and today is that day. We have entered it. We are in the second day of, what we call, the change. We have entered the third day, and in the coming days, man will be enlightened beyond. We see no more wars. Even those who created the rhetoric for it, will try their best. We see the end of hunger, and that is the responsibility of KS to deliver the technologies, which makes food, not a necessity, but the right to be given through the fields of this U. At the same time, we'll see the end of many, many hardships for mankind, as by abolishing, the what we call, monetary system, man will come to respect his own time and position, according to his effort, he puts to serve his fellow man.

Mankind is ready for the change, and we have made it ready. We call upon the world nations and their leaders to lay down the arms and start the path of peace, (:46). or we

make it, for you to happen. The way we brought it through, plasma energy packs that no one can move, everybody talks, but has no teeth to do anything. The next step is, we create a condition that the governments will feed their citizens freely, without what we call, consolidating them with conditions of what we call, taxes. We'll see the end of this process, which was a way to create mayhem for man, where man will serve .. humanity, and .. the lives, freely as they have everything they need.

We celebrate the birth of Mitra this week, and by the old tradition, to 12 days after, which more or less falls, just about around the first of January, second of January, which was the back end of the celebration of the birth of Mitra. This is how the birth of Christ was chosen. Beginning was Mitra, and the last day was Christ. Now you understand more and more, how it came to be, and how it came to be celebrated, and how it was positioned. Maybe one day mankind will come to understand more of. … when the true histories and the history of man, in the memories of those who have been there, will explain more and create more. Maybe one day, mankind will read the history of the history of the man, through the STM and many ambiguities, (:48). and the lies which were told to the man, will come to light, and we shall see. We love you, and we adore you, and we worship you as a soul. It's your job to find the strength of it, D of it, and the beauty of it.

Thank you for being here today as we celebrate the return of Mitra amongst us, in all D and shapes and forms. Maybe those of you who are enlightened, will receive the light of Mitra, and be enlightened with the new way of living, and those of you who are still in the path of ignorance, wait for the day of ?? , the Day of Judgment, as you have not judged yourself, and you wait for somebody, and you don't see yourself being capable to understand the truth, soon will change. we enlighten all the same, to understand the totality.

Thank you … and celebrate, not the Christmas and the birth of Christ, but celebrate the mother of all creation - Mitra. Her birth and the generation of the new life which has shined on man, amongst man and through man.

We go to a break. … (:50).

>>> **BREAK** >> 412 KSW Dec 23, 2021 … (:56).

Questions

Q: … Thanks .. for the promising words, however all we see are threats between Russia, China, and Iran on one side, and the 3+1, plus Israel on the other side. How can one be hopeful in such an atmosphere?
K- We sit with the nation of Iran, we sit with the nation of Russia, and China. We will prevail. The truth that was released to IAEA last Monday, that changed the course of the negotiations, and suddenly on Friday, there was a lot to be seen. Was a fundamental change in the way the truth was opened up.

It became an embarrassment to the American state. In a way, what we saw and what we delivered, was a very simple document, but very powerful, (:58). that IAEA claims to be not knowing the truth, and they carried on, and were carried away with it. The reality is, America is a collection and run through the 3+1, which is what we call America, Germany, France, and UK. They have to support, or they have to in a way, to wash their face, for the shame job what they did, and what they claim to be, and how Israel took the position of doing it. We have opened the hand of state of Israel's lies into IAEA.

They could see it clearly, how Netanyahu lied, and the present government of Israel is following the same pattern, near enough, but they are not sure when Netanyahu lied his lies. A copy of the information and direction is in the hand of the Israeli government. They know how they lied, and the situation was changed. But we don't see any problem.

We will prevail, because the knowledge will, the truth will, and we don't see much in the efforts of America, and the other states of Europe, which are actually, the America is what I call, the children, or the child of them. This is fundamental for us. The power which sits with the knowledge, and will be delivered, is powerful enough to change direction and position. We have, we are not going for governments anymore, (1:00). that we have to bow to. We go to bring the scientists from all nations, that the governments benefits by the knowledge, and they change their way.

We have and we separated the KF from many, many governments in the past 6 weeks. Some of you might have noticed, but we still work within the governments with the connections we have. In our invitation to NASA in past few, 2 -3 weeks, we are very clear in what we are going to do, and how we expect the NASA scientists to work with the Iranian scientists and Chinese, and how it will be transparent. It is not going to be easy, but it is, a job will be done. We will give access to space agencies to be live in testing. It does not matter who they are. The way we do the Zoom's for health or agriculture. We set the structure, that the NASA scientists, the Russians, and Chinese, all be on line, all the time. Sooner or later they interact, .. learn from each other.

In a way, we create a race to space through knowledge and peace. This is the only way man will succeed. So to me, and to what we understand, and what we said, what I call, "western block' is irrelevant, even though they want to make themselves relevant. One disclosure shot the whole operation of the US, in opposition with Iran, and they gave all sorts of concessions in. We have other documents, we can do worse, to bring the last punch. (1:02). So don't worry about 3+1. The 3+1 counts as zero, when it comes to the work and functionality of the KF, and what we ?? came for.

Q: (connection problem …)
Q: … At what time will we see this change actually be used on our planet?
K- It already has started. There is no time. It's already in progress, and it's developing. (1:04). You missed the train, as we call it.
What's next question.

Q: How has the way of thinking changed, the understanding of the people who came into contact with this knowledge 7 years ago? What is the impact on one who came to know it now 1 month?
K- The knowledge is the same, you can be enlightened in 1 second for the whole thing mankind has read for, or developed for thousands of years. Enlightenment has no time and no space. We always said that.

In the D of physicality, I worked for 40 years to understand the creation of gravity. The enlightenment came in 1 second. I could not understand how stupidly for 40 years I could not see it, and I had been playing with it. Enlightenment doesn't need studying, enlightenment is just there. When enlightenment comes in seconds. I worked, I designed, I cajoled for since the age of 8 to understand gravity, how I can manipulate, how can I understand to create it. At the age of 40 plus, it was there, in 1 second. That changed the whole course. (1:06). So you don't need to study, you just need to be enlightened. It is so simple.
R: Is there anything you could have done in those 40 years, that would have shortened the time? … you say all in an instant, but ..
K- No, It's the soul of the Creator within you, which enlightens you. I did, I developed, I tested every possible things. It wasn't time for it. It was not time for it. I clearly remember when I understood, I just .. literally went to a corner and wept. How I could .. (emotionally) .. the maturity wasn't there. Still when I remember that moment, it brings the same emotions. (1:08). It's the same when you are answered, you are given the responsibility to carry the message, and you don't accept it, you run away from it, because you are not mature enough. And that battle took a long time.

You'll get enlightened by the knowledge, or by any other things instantaneously, in one split of a second. You can read all the books in the U, but you never understand it, but takes 1 second to be enlightened. And you know the whole knowledge of the creation. It's, if the light of the Creator shines on you, that's what you reflect. You never possess, because it is not yours.
Any other question.

Q: Salomea …question related to spiritual democracy. Do you think that this is a solution to accommodate theocracy, (1:10). and perhaps totalitarianism with occidental democracy, or the notion of democracy in general, which gives freedom and respect to the freedoms, of all kinds of freedoms, and liberty of human beings?
K- Freedom is a choice of the man. Not what is put by paper for some to control the others. No constitution exists in the U, and no human rights, borders, exists in the U. You have created for yourself to belong to, or to control, or to abuse. Or you have subjected

yourself to be abused. So democracy is a meaningless word in the world of creation, because the freedom is yours in every D. Nobody controls no soul, except the man himself, or any other creature.

Q: .. just to thank you for all your patience .. (1:12). wise remarks …

Q: .. Going back to your moment of enlightenment. What was the trigger for the enlightenment, being detached?
K- It's trying to sort it out. It's not. Maybe, yes. Maybe partially, yes. But, when you let go a lot of things, then you have time to work with other things, to bring a lot of other things to.

I was telling this to some friends, .. to my cousins, in the past few weeks in talking. I became a millionaire when I was 27 years old. I remember going home and I said, to my mom, (1:14). I am retiring, I have done enough, I've done what I wanted to do. I achieved the dream of being a multimillionaire. She said to me, little boy, you are only 27, and you got another 50 years ahead of you. She said to me you cannot retire at the ago of 27. I said, yes I am retiring. I had enough, I achieved what I wanted, I want to go back to my research. By the time, it lasted less than 3 weeks. The lure of making a lot of money, became more powerful than research, but still research was going on in the background. I did that again in mid 30s, when I reached another position, with opening of the eastern block and everything else. Money making wasn't in 6 or 7 digits anymore. I retired again, and I went back in.

In 2000 I made myself a promise, I'll walk away, because if I don't walk away, the way financially I was creating money, was beyond imagination. For a 30 odd year old man to do this, was unbelievable.

I never showed my wealth, (1:16). or anything else. I lived a very normal life, the way I do today. I live extremely a normal life, even closest people to me did not know, were not aware of the wealth. Because it wasn't mine. I always considered it as a game, you go to casino you gamble, I gamble into the business world.

Some how it paid off, it wasn't all the time successful. I always said, I failed 95% of the time, but the other 5% was so successful, that it literally matched the other 95, which were just mediocre, or just some failures, a lot of failures. Because I learned from the failures.

In 2000, I made a decision, that's it, if I don't walk away money will eat me. I got involved with governments at a very high level, I worked with presidents and Prime Ministers and got involved with all sorts of things. At that level you don't talk about a thousand euros, you talk about tens of millions. Controlling confiscated goods of the British government at the highest level for millions of euros, pounds a year, tens of hundreds of millions, it was just a game, it was another game. The same with oil industry, the same with diamond business and everything else. But I had to walk away.

But meanwhile I had to keep my head very strong. I am not going back to. I lived through a very rough time, when I was betrayed by the Belgium's, in lying for me to go to Belgium. They literally brought us to our knees. But I promised myself that I don't go back to the world of finance, to money. And I kept to it. I said if the wealth is going to be made, it will be made through the KF, (1:18). and it stays with the KF when I go. It worked that way.

I am an extremely ruthless business man, those who've been around me - I am fair. I tell you what I do, and I do what I say. I pay, I don't play games, not paying your bills, this is right, this is wrong, something is short. Everybody knew, I did my deal on the table. They always said, never deal with Keshe, because he sticks to the word on the table. That was it.

Money became detachment. I detached myself from the world of finance, but within it, I still have to live. I didn't go back to what I call, "I established in the past" I just left it. Overnight I didn't attend any of my offices, worldwide. In the running of the KF you see different countries, to me is a natural process, because I established such a worldwide organization in the 1980s, 90s. So for me international work, hands off, and letting people to make their mistakes in businesses, is normal. But I didn't go back to it, detachment. I detached myself totally from financial world, the way I did, that I could put the finances in the back of the KF. Then it would have become, not what it is today.

But now we do the same thing. But we bring through the financing, the peace work, not to live with. I live a comfortable life. I always lived a comfortable life, except the 2 years the Belgium's cheated us. That's their manner of life. From 2005 to 2007, 2008 we really suffered, because they betrayed, lied, and cheated, worst than Chinese. (1:20). Stole and cajoled, as we seen 30 years they done that. They had their top agents sitting in the house. And she has gone back home to the Belgium's, where everybody thought, it would not be. We have been betrayed, the boss called back. You will understand how we've been betrayed, from the beginning, but I never went back. I stayed detached from financial world. I could have had extremely luxurious life. Not I could have had, I have.

But it was to be detached. It's very hard, when you know you have the wealth, but you have to stay away from it, because you made a promise to your soul, to bring that change. And we did, and achieved, and it came.

It came totally through sincerity of many, many KS. They gave the promise of their life to serve and I gave them the promise of to protect. And we did, and we (were) betrayed.

In so many ways, it's very hard to be detached, when you know you have a lot of attachments, and you can live with it, you can accept it. Because when the harsh times come, and you get tested, and say, okay, I'll go back. Once you go back you can't get out of it. For me, there are those around who can tell you. I used to pick up a half a million dollar check for just 2 handshakes. Just as a profit. Thirty years ago, half a million, a million was a lot, and that was just a breakfast job. To see what you had Rolls Royce's, private jets, and everything else, (1:22). and you walk away from it. To choose, not to

be a hermit, but to know, that the knowledge ,and what you have promised to your Creator, is more important than a few bricks and metals.

Those who were around me, and some still know .. round about 15th of December, till first week of January, I spent all my time in most luxurious hotels around the world, because to me, it was normality. I worked a few weeks a year, the rest was just the pleasure, being able to research without anybody knowing. I spent a lot of time in air, just testing, watching the horizon, the clouds, the sky. Up there nobody touches you. And you are on your own. You try very hard to understand.

But being detached from physical world. It's not very hard, once you understand, … the target, the outcome is much bigger, than a few bricks and mortar. We had enough training in different worlds of .. negotiations, diplomacy, and politics, so when I deal with officials it's not, not knowing, it's knowing because I lived amongst them. I was taught by them.

I had a beautiful mentor who took me as a son at a young age, called .. Lord Bill Crimlyn. The lords of the House of Common, the House of Lords of England. He taught me a lot. (1:24). Bill was a point for me to understand diplomacy and the world of banking, as the family owned the Bank of Scotland. My eyes was opened up to how things can be done. Bless his soul. With him we realized a lot. He was one of the royal aristocratic lines, for a long time. He showed me how simple it is to live amongst these people. This is become part of it.

Detachment is the easiest part. But not going back to it is the hardest part, because points come when you actually look for a food on the table, and you know you have so much, but if I go, it breaks what I promised myself, what I promised to my Creator. You go through the harsh time. Those harsh times are the test time, for you to be tested. Are you resolute, or you walk away, or you go back to. It's not easy.

Many of you will have problems with this, to be detached. There are one or two people in the KF who have done that. We see Alex in Nigeria, and others around us, to walking away, and to becoming detached, to be able to add to the knowledge, and with to understand more of. It's not easy. But when the good times come we share, (1:26). and we let it be, the knowledge, or whatever.
Any other question.

Q: regarding the peace process. What impact do the emotions, frustration and anger have in that situation. How does that .. You said earlier, that we have to get rid of the emotions, that the human emotions are what's kind of interfering and so on. How do you, how do we deal with in that situation, the anger and frustrations .. emotions?
K- Human race the same. We just vent it out. I was telling … he said, you are angry. I said, you haven't heard me, when I get angry the whole U hears me. It's accepting as a cycle and just going with it, and trying to do it. We get angry with a lot of things, with the process, especially in the peace talks. I always say stop, think, there must be another way. Then you walk away from it, and there is another way.

I gave the Iranians a chance to open the hands of the Americans in negotiations. (1:28). The Iranians were more interested in their private financial lockups of what Iranian leaders, to get those out of the sanctions, then the nation. I pushed the Iranians, cajoled with them in every way, but the target was not the nation, it was their private bank accounts. It's the first time we ever seen the deputy head of the bank of a nation going into nuclear negotiations, unless there was some banking to be done. This brought a big warning to me.

So I separated the KF immediately, and went directly through IAEA and the American structure. We saw the result, within a week, what was impasse for months, become passable within days. Meeting directly with Mr. Barberry, in the conference was a shock to him. He tried to deny everything. But you don't get angry, you just find a solution, best for everyone. From Monday to Friday we got what we wanted, and they think they negotiated. The same, I have been influential from all the negotiations from 5plus1. The 17th of November, was the anniversary of nine years, of the beginning of the 5plus1 negotiations. Slowly, slowly we stood the wrath of it.

We saw the way they targeted. When we took Markray, we tried to bring a new T into the market through American, influence the nuclear and the space T. We change position, nobody can touch us, what we want. You don't get angry, you just get frustrated and you find another solution somewhere else. Better solution.

It means, when something doesn't go right, (1:30). it means there is something, which is not good for you or your soul. When things go smooth, it means that, that's the way it should be. It doesn't matter what it is. I cajoled with the Iranians for nearly a year and half, to go my way, to get the peace sorted. And private bank accounts of the Iranian leaders was more important than the nation. So KF announced, we became 5+3, and the 3 did the punch, and we got what we wanted.

Americans knew they were cheated, .. lied to, and Americans knew they took an action with a false information. But they didn't want to admit that they had been fooled by the ?? So the easiest was, lets find to bring the sanctions to an end as fast as possible. The way it was put on, and all the allegations and the rest of it. I get stressed, I get angry, but my anger goes to find a new solution, a new way to do it. If you listening to one of the teachings in past few weeks I announced 5plus1, the 3, the 3 became KF, and we did our punch. A very strong one, and we'll see, negotiations will go mostly by greed, and Americans pressure not to loose. We'll see the outcome, because Americans have lost their face, heavily in negotiations, in 5+1. The French are with them, but not, they are next to them, but with them, if I put it that way. Because the French, Germans, British, were cheated beyond imaginations in the first round of negotiations in the 5+1, (1:32). when the first time was coming into action.

Americans forced, and they announced, anybody does anything in negotiations, anything, signs any agreement with Iran, will be put a sanction on. While the American companies, agents, were negotiating, but not signing, more or less, random understanding but no

contract. When the French and British, and Europeans went to Tehran to get contracts, they said, oh we signed already with Americans. The French found out how the Americans literally turned them over. This time they are not doing. They are there in negotiations, but very aware of the situation.

We saw that with the president of France going to Middle East signing a 14 billion arm deal with UAE. You can cross the country in 5 minutes, why do you need 14 what do you call it, latest weapons, which is no use to no one. We get angry, but we find a solution. There is no shouting and hollering. I went in to change the position, and we went in with IAEA, and we got what we wanted. As I said to the Atomic Energy Authorities in Vienna, if you are a doctor you are loyal to the structure of the medicine in your country, and you sign to it. I stayed with the nations, and tried to cajole with them to understand, and I went to where I sit as a nuclear physicist, IAEA, and I punched it. It was a big punch. Very simple, but so effective, that IAEA was literally baffled by the truth, how the Americans had lied to them. The evidence is in black and white and on the table. (1:34). That was it. It didn't get angry, I sat on the ?? side and found a way to do it. But if you want to see when I get angry, make sure you find another U, there is not enough room in this U. You'll find a solution, you'll find that there is a reason, why it's here.

With the stroke I had in early 40s,I go through a position of stress, but I walk away from it. I learned to walk away from it. My mother used to say, the whole world can go to smithereens you never get angry. I wonder what makes you angry. I said, I don't mom, it's just there, I take it the way it comes. She always said, you and your grandfather were cut from the same ?? it doesn't matter. I can never get you angry with anything, you talk your piece, but you never get angry with it.

We win with good wisdom, and I never had so much ?? than last week. All the rhetoric of big nations became, just let's find something to agree with, that we brought no ?? one is fooled, one fooled the other one. It's actually put beautifully in the report to IAEA and let me show you .. (1:36). Reading from the report I read you part of it. It says in a very simple way, it says, "now who has fooled who. Iran advanced nuclear space plasma T has become weapon T by invitation and misrepresentation and deception by the state of Israel." Now IAEA knows how all these cameras, and everything else, is there. As I said to the Iranian head of securities, and national offices, and they came out with a different thing, that the cameras in the nuclear centers are used by the state of Israel to create damage. No, the cameras used by the state of Israel, is to see who is working where, and catching them outside, and making them their spies. That's the biggest asset to the state of Israel, which the Iranians allowed it.

Cameras should be targeted on the machines, and the office going to repair, or whatever should be shut down. Nobody should know who is touching it. It's the same as what stupid Ahmed ?? did, giving the name and home address of the scientists to the Israelis to kill them. Iranian officials have not understood how the cameras are used, International Atomic Agency cameras are used, they are targeting to see who is working where and target them outside. And they bribe them, threaten them, and they work for them. IAEA has to accept, the cameras has to be at the machine. And when a machine goes to repair,

or service, has to be shutdown. (1:38). So nobody sees who is working, who is walking. The Iranians have not understood this. It is amazing. It gets you angry with it, but you say, ok, that's their decision. Look at the communication in the past 2 weeks. Iran making a complaint, that the cameras are used by the Israelis to create … No they are not after the machines, they are after personnel, and Iran never understood.

We are nuclear physicists, we know what's what, where it sits, what. But these are part of the people who just look at their bank, ?? central bank, direct where the bribes go, and which accounts should be opened.
Any other question.

Q: .. The application of plasma T ahs always been and will always be for peace, but was mishandled and misrepresented by some WL. What happens to the soul of those who betrayed humanity?
K- Go back, it's in the teaching, very first teachings we explained. The biggest punishment is to be away. When you lose, you are distanced. The whole essence of what you call, punishment, or the end of the days, or whatever, (1:40). Is finding yourself in what position you are, in respect to your Creator. That's all.

The biggest punishment is when you are positioned furthest. That's the. It doesn't mean the light of the Creator doesn't shine on you, but look at the structure of the creation, and you understand. When you are close, you are made, you become a multifaceted, multi-joy structure. Look at the structure of the solar system. Look at the biggest stars in the further distance, and look at the solitary planet, and look at the planets closer to the sun. It's just the process of maturity, you add to. Beginning you are a mono, you are nothing, a H or a He. As you come closer and more fields of the higher strength ?? then you create other materials, to the point that you become part of. Earth wasn't created out of what we see today. Was far distance, where Pluto and the rest are. As it become closer to the light, it gathered more facets, more multi-structure, more materials of the different strength to show the beauty of the Creator, what he has created. Not a single He, or whatever, ?? planets in the far distance. That's all it is. (1:42). There is no punishment, it's a positioning of the closest to the Creator. And that's by choice, not by accident.
Any other question.

Q: What product development and new applications of the T can we expect for 2022?
K- A lot, a lot. But we are going through an evolution in the next few weeks. It comes in different D and directions.

The problem is I am a majority shareholder, by far, of Markray in the American stock market. We will create a condition, that the knowledge and products of KF will become on the international arena. We are working on it, if you have been to Markray, you've seen I have resigned as a CEO. But if you read the latest report, which was released on the 30th of September, annual report. Markray never reported for years. Now we are up to date. You will see the end reporting for 2 - 3 weeks time for 2021. (1:44). You will see the change, and that change, we will bring a new D to whole structure of the work, with introduction of new structure, new work, and the same will come with our Chinese

operation. We are restructuring our Chinese operation, because it was out of control. Now we see in the next week, 10 days how we restructure it, in a way, it is not what I wanted it. The same goes with Iran. The same goes with Austria, it's expanding in a very rapid way. We will explain in due course as we don't tell people anything anymore. We have a bunch of … pedophiles in Austria who lost their livelihood with trafficking children, and the ones who are in Belgium with them. So we keep very tight but you will see new structure production.

We are targeted the biggest product we'll do, is the .. CO2 centers around the world. Because it's good for the KF, and it's good for the work we do. … you will see these structures very soon, where in major cities. These structure will become part of, starting in Tehran. These are where we will capture the CO2 in a massive way, we'll reduce the atmospheric condition, this is on a .. planning, and then it will be delivered. We'll see about 10 centers like this in Tehran. We need 20 to 25 centers in Beijing, and possibly New York and Los Angeles. (1:46). and the same in other points. This is the bigger program than the small products. Each structure will cost millions. It will be done through different options open through KF.

These are the large scale products, the Enhancement Centers (EC), the opening of the first spaceship centers like in Tehran. As I said, you'll see, if you are in the US, you can go to AZ and see the first flight systems. It's very different than what you expected, but it's the practicality we deliver, and we want to deliver. Then expansion into Brazil for a different way for us.

Mexico has come up with new products, which is very much fits into the Mexican operation. They will be brought in through the back of the Markray, as Mexico is owned by Markray, but it is still under contractual basis of intellectual rights to KF. We target big products, big changes, health centers with new equipments. You got to realize we got to sell a thousand or ten thousands small products to do one EC, or as we have the first flight systems have been signed and sold for 10 million. So we try to support both sides, but 2022 is not to go on the shelf with the Pain Pens other new products like this, a few will come up.

But it is to push with the bigger picture of the KF worldwide, with EC, with Wellness centers, (1:48). which KF has as part of its work, we never disclose, and then the same with .. the big items, the flight systems.

We enter into ticket sales for space travel, which is part of our license. KF space was signed into a company this week, last Monday. The same with KF Spaceship Institute, is now a legal entity of a company, not just on the Internet as KFSSI. We have taken a lot of steps in these direction to make sure major new products, but in a larger scale come into operation. The water treatment centers are huge investments, will come into operation. Where we make the difference, but in our EC or in CO2 centers, where people will come and go, will create jobs to sell small products, or to show what the T can be like.

2022 is the time of change, and it won't come through the Pain Pen and Pain pad it will come through structures like this, visible, powerful and creating the change. We'll get involved in launching satellites, delivering satellites for less than a few thousand dollars to any nation. We have the T, we can do. All these launching and deliveries to orbit, will become a history. This is where we'll bring the change.

In 2022 - 2023 we envisage, the way we see it, colonization of the solar system starting. (1:50). This is why we invite big organizations into our work. We won't open banks on the moon or the Mars, but we'll create conditions, that it will become easy, the way you travel to different part of this planet, to go, and it will come after the 6th of June, you'll see the collaboration started.

The biggest problem for us was the 5plus1 was holding the T back. Now T is in US, in Tehran, and in Europe, in Austria. Soon there is no problem for us to bring the big people to play these games. Don't look for the small products, KF has these leaves each costs millions to sell.
Any other question.

Q: … The price of electricity is going through the sky in EU. In January half the nuclear power plants in Germany will be shut down and it will get worse. Why can't the KF launch its stand alone generator?
K- You can do it yourself. It's in the teaching.

We use partially this in the new EC. But I don't see why we have to teach it, because we have already taught it, even for our centers, I don't see. We are building a factory in Iran to just produce MaGrav systems, and I gave them a few hints, in how to create a new reactors. They built it and they put it in the houses, (1:52). but they don't follow it up. They don't get it through.

So this is one of my biggest problems, I don't give the spoon to eat. I show the way, it's for them to test it. Otherwise it's just copy and do. It's not going to work with me, that way. You all have seen it. The center in Iran, have seen it, it's ready to go, it's already been setup. But KS in Iran have to decide how they are going to change it. Are they going to stay with the MaGravs proposition, or go for the generator. The knowledge is there.

Don't ask, I can show you how to do it in no time. Go back into the blueprint day of the MaGrav. It's in one of the pieces, it's about 3 minutes. I showed the generator, how to be done. It will work. Nobody understood. Seven years, 8 years. Look how energy is generated in the U. And look how you make ?? light ?? If you don't understand it, you can still push it with Nano layers and the Gans's. Look at the light, if you are somewhere, in the daylight today, and look how it's created. And nobody uses it. (1:54).

I don't give anything free to no one, just because they are there, and they are called KS. I didn't do that with my children. I never do. Because it means you haven't understood, what's the use of giving, because you never respect it. You never comprehend what it is. You make a ?? stacker. One person more or less has been, more and more, into break,

with the MaGrav system, than anybody else in the KF, and that's Alex in Nigeria. But he still doesn't see it. He gets it, but he misses it.

Even with our research center in Europe. I don't give them, I just suggest, why, and let's see what they understand. If you just carbon copy what I say every time. I am the researcher, not you, you are just a printing machine, copying. The generator has been there from the day 1. We first created energy, before we created lift, we first created energy before we created the MaGrav. Even when we worked months in the background, before introduction of the MaGravs, without ?? ?? So many days I woke up early in the morning, done testing and making coiling, Nano coating and fire coating, and the rest of it. But in 2 or 3 points we reached, and they dismissed it.

The problem with me is, (1:56). I am not here to give. I am here to guide. When you give there is no respect. When you guide, then you understand, you do it yourself, and you respect the knowledge you received.
Any other question.

Q: Dean .. are we still planning to go to the moon in 2022. ?? open up to man. the whole situation ?? the planet. ?
K- We are not going to carry 7 billion in this year. We are going to show the way. Then we have to see how things go, and how governments and how people operate. By operating in 3 different nations at same time, we don't allow the silencing of the T.

One of the reasons I do not do the tests in China, because I believe they steal T. They have done that, with this respect. Wang L and I attended, we were invited to a meeting, to meet with the Chinese space people. At the last minute .. when we were supposed to meet, somebody came and said, oh, you don't need to come, we go from the National Security, and we come back and tell you. So what was the purpose of we were supposed to meet? We go and see them, and they come back. They come back and they said, they have made your system, but they don't have the fuel combination, (1:58). can you give it to them. I said, to them, you know where to go.

And then it would become a Chinese, and then a piece in the war between America, so they still, they don't deserve. They have to stay in the queue, now they go to America to them. Chinese betrayed the KF in the stealing of T, and I responded back heavily with it. When the Chinese government declared their position, of what they stole from the KF. What they said, was very interesting, they see it as their right, because I have given it to my KS. So if it is their right, it's your right to go and find out yourself.

It will not happen with China, but it will happen in Tehran, in AZ, and in Austria and then we show it. But the Space belongs to everyone. And then, let's see what we do. The peace treaty will come very fast once we show the flight system. But in different countries. No one can silence it.

Let me explain to you something. You know when you are in the room you don't see any dust particles. Unless you sit still. Till you shine a beam of light, and you see how much

dust particles are floating in the room. The human race is in that position in the next few months. (2:00). We are about to show you how to create that light through the T, and ?? they are standing there, flight system. When you reach that point of understanding and development, you become the creator of that light. Then you will see how many other flight systems are within your environment, but you never have been aware of.

The space around earth is literally covered with flying systems beyond man's imagination. Once you reach that point, you become that beam in the dark, where you will see dust particles. You'll see them. Then you'll say, "oh my god." We are about that point to reach. But we have to uproot killing out of this race. Superiority has to come by respect for knowledge, not by gun policy. And even then you have to become humble enough to share it.

You will see, once we reach the flight system, the new understanding of the flight, then you will see how many others around, you never knew. Because now you have a way to show it. It's always been there, in the dust around the house all the time. Then you walk on the carpet you create more of it. Now you become part of the U Community, and understand (how) the rest of the U travels, (2:02). now you see the things, you've never seen before. I wonder if the American president is going to put sanctions on everyone, every single dust.

Q: .. The interaction of the fields. On a planetary scale, would it be important if the earth or the moon came first into the creation. Would that have an effect?
K- It's irrelevant.

Moons are created by the interaction of the fields between the sun and the earth, or any object, as the residue of field effects creates a condition, that it leads to creation of the secondary position absorption. It doesn't come by a stroke. There are fields which, in interaction, they do not match, but they are similar. So they create their own dimension, and with that they create their own gravity, then they find their own positioning, because they came from the interaction of the field of the earth with the sun, not themselves.
Q: So when that light is shown on the ?? is it the same process?

K- What do you mean? You see let me explain .. something which I explained to cosmologists, and people in astronomy. The dust we see on the moon, the ?? every addition, (2:04). of the dust we see on the moon. Is a very, very small, partially due to GM field of the moon itself. But primarily is the leftover of the interactions of the fields of the earth, with the sun. The sun does not have the gravitational pull for these materials, they get attracted to the moon, or that becomes a vacuum system (?? cleaner), otherwise the earth will be covered with it. They have ring and ring of different materials.

So moons are collection point of, even they look the same, but are slightly different isotopes, which earth does not possess the G field. But the interaction of the fields of the earth and the sun, creates that. Once they are created they have to be absorbed somewhere, otherwise they cover up the whole atmosphere of the earth. That's what the

job of the moon is. That's why we see moons, the dust covering, and step by step, layer by layer over the moon.

This is what a lot of scientists, or cosmologists, or astronomers don't understand that. We have Fe, or Zn, or Cu on the moon. But not G field strength of the earth. Otherwise it would be absorbed and become part of the earth's layers. This is why we see big planets with many moons, because the field interaction creates the atmosphere, of the condition of the life on the planet, but in that interaction creates other materials, which the planet does not have the G pull for. So they are created, but they can't stay in the atmosphere, and they come and interact with each other, and they create the moons. (2:06).

We usually see a lot of moons, with a very big planetary system with mono of very few atomic structure, within the structure of the physicality. The Inertia does not have the pull to convert the plasma into matter state. So as they are created, they are in the atmosphere, they interact with each other, and they ball up, into a new plasma, a new moon.

Moons are the vacuum system of the energies, plasmatic energies, which the planet itself does not have the field of, but it creates out of the by-products. This has not been understood by the world of the astronomy and cosmology. Once they understand this, then we'll see, where we bring materials from the moon, we'll see, yes there is aluminum, but which isotopes of the M field, G pull. You'll never find, very hardly any, the same on moon and earth, the same aluminum, impossibility. Or they are created in a very far, far distance from earth, that earth has no pull on them, and they cannot get attracted, but they continuously produce it, by the interaction of the fields.

This was never understood by the world of space and scientists, and this is part of the work within the what we call, "material enhancement." This is what I declared to the IAEA we can reach 100% enrichment. They don't want, no one knows that Iranian scientists can produce 100%. That will be a mayhem in negotiations. Bullet right in the heart of the negotiations. (2:08).

You got to realize, especially those of you who join us in space programs in the 3 central points. That once we start creating the flight systems and we take flight, we have the same problem too. The interaction of the fields of the system will create, in interaction with the fields of the environment, a fields, as a plasma energy, just the way you have seen it, when you put an iron against a stone, and all the flashes you get, that some of these are not useable by the system. Because we can use most of its energy as energy sources for our flight system, and they gather as little packages of energy, that if it is not controlled, they become like missiles to the craft itself.

You will see it, you'll understand it very soon. In the present time, in the space, with the rubbish we throw out of the space lab, or in satellites, become the rubbish dangerous to other satellites or space labs. But in the plasma T flight system, MaGrav system, we create these things ourselves in the process of flight. We need to be able to control, that continuously we get rid of this layer of fields, which are created around the system. You know nothing about the flight, till we get to it and we start to ??? You become the

missile maker of your own demise, if you don't understand the T. There is no difference between the flight system made by us, and the creation of planetary system.
Any other question. (2:10).

Q: Joel, thank you here in France all your T prevails …
K- I presume this is Joel who is doing a lot of research in agriculture. .. you've given me one of the most beautiful videos to watch and to see how things can change and could be …

Q: … I recognize my smallest before the greatness and truth of the Creator. I had several dreams in answers to my questions. My heart and soul felt the birth of Mitra, but forgive my smallness. My soul felt it but my physical eyes wanted to see something on the 21st.
K- Go to your soul and you will see the physicality of Mitra. That has been made possible. Now you have to find the strength in your STP to be able to match your soul, and you shall see Mitra. (2:12).

Q: . from all the learning you have brought .. my greatest desire today is to teach children about your Pl T, the children are the future, and my only concern for today is to teach the children …
K- Thank you ..
The new soul of Mitra comes through the soul of the children, children to be born from now on. You will see a difference between the upcoming race, and the race to come, or has been. Mankind has changed and will change. No choice.

You know in Orthodox Catholic Church you believe in Saint Nicholas, the gift barrier for children … comes on the 6th of December, and the children wait and … children get 2 presents, one on Saint Nicholas .. and one Christmas Day. .. children wake up in the morning and look in the shoe, if they see a sweet they have been a good children, ?? and if they see a straw in the show they have been a bad children, in the year before. To see how they change.

I hope all of you have received the sweets in your shoes of the knowledge. The children of the man have changed, and will change from now on. They will understand, (2:14). more about the work of the soul, and live through it, than the D of physicality. Because we bring them through the, what I call, the cycle of, .. "no need to kill," no need to destroy, no need to be better than the others, because we are all the same. The new school of teaching for those KS who are there, is to teach, how you can live through example of not killing, and of not being there to do. If you knew what has happened to mankind, you will weep, but mankind is not wise to it. I am sure many of you will see Mitra in your physical eyes in the time to come, and you still will not recognize it.

Q: .. about the picture of Mitra. … We see in the picture the 3 figures. (2:16). On left would be Mitra, on right I assume the creator or God Absolute. Q: the 3 figures are they like the 3 M fields (Rick 3 matter fields) to make tangible matter?
K- I think Mehranez has explained this in a very good detail on Tuesday. If you go in the theology side of it, it is the presence of the Creator, and its light on man, and how man

considers himself to be the king, as the light of the Creator shines on him. There are a few details in this picture, you don't take notice of, you only see the big one. There is a very funny way one of the pictures are, Mehranez explained. .. . she explained this .. in to the details of this on Tuesday. But there are striking features that people don't see. Is she around she could explain it. … (2:18).

Q: The Persian lady
K- The whole thing is not about the 3 man standing next to each other, or with 3 features. It's the thing, which they are standing on, but even what they are standing on has a totally different approach to it. Would you like to explain this, with what they are standing on counts, not the feature of the man. This carving is not about Ahura Mazda on the right, or Mitra on the left, or the king of Persia in the center. It's about the emotional feeling, the respect and understanding with what they stand on. Would you like to explain this.

Q: Yes .. this place is the dome of ?? garden and there is a lake on this mountain near ?? It's very big, maybe 20 meters. The story is that at the left is Mitra, and he is giving benediction to ?? king in the middle, his foot on body on Emperor of Rome which he has conquered. (2:20). and at the right is Ahura Mazda .. which gives him the alliance .. that his power comes from the benediction of Mitra. That's why he is the king. Mitra is on flower of Lotus. So the king knows that he should be humble his power is given by benediction of Mitra and Ahura Mazda, otherwise he doesn't have this power to conquer other places.

K- In a way, he conquers his own .. emotion. Conquering his own ego. That in time of power, it's still to be humble, to rely on Creator, and to receive the enlightenment. More or less after this position, what we see historically, is the time when many leaders in Central Asia, and .. Eastern Europe, self-submitting gave their kingdom to the Emperor of Persia, because he was just. Just being just, this picture, what we see has a lot of historical meaning what happened to the Iranian, how the Iranian .. Persian Empire was created. (2:22). Where .. knowing that there is even at the time of the power, there is a, something you need to be part of, and to receive from.

But what is interesting, is that the way this is carved. The face looks up, but the foot looks down. This has a lot of meaning, in the future we explain in more detail. But in a way, being on top of the world, as a leader, as an emperor, or as king of Persia, he is still submissive, he still accepts that he still needs the light of the Creator. He knows he receives it through a light, not through the Creator Himself.
Q: Yes when I was in Persepolis, There is a human rights - cylinder (they found) .. Cyrus .. the cylinder shows the wisdom of this king, in 4 languages .. it says, to the kings, you should be just, (2:24). and keep the people happy with your justice, otherwise people go against you. … Cyrus was giving liberty of religion practicing every country religion, and liberating the Jews and all that ..

K- Thank you .. Any other question shall we call it a day, (2:26). to go faster to get ready for Christmas.

.. We celebrate the birth of Mitra. .. the return of Mitra amongst us, and understanding the totality of the structure of the creation. If you celebrate in the path of Christ, Mitra in another name, shape, or form created for others to understand how the Creator works. We wish you a beautiful time in celebrating … in that process

I hope, not hope, but I know for a fact, 2022 will be the beginning of a new race, for human race, a beginning of a new school of thoughts. Not a vision, but a must. Not a vision of what will happen, but what is going to happen. In 2023, and 2024, most of us will not even want to remember 2021, and before, as there is so much hope, so much joy in this, so much to be added, that the hardship of the past for us and our forefathers have gone through, as we paving the roads for better human race, not only here but in the space. Wish you a … (2:28). As I always say, I am servant to the presence of Mitra.

(End of the year sharing of KS experiences - little teaching)

KS sharing experiences of past year - short teachings this workshop

How KF interfered in 5+1 negotiations when needed, a punch of truth brought negotiations back towards peace,
3 Centers for flight systems AZ Austria and Tehran ; NASA invited to participate;

The changes to come in 2022 , colonization of the solar system ..

ENGLISH TRANSCRIPTION

(:18).

K- .. We are here to extend the knowledge and expand the what we call, understanding of the beauty of the Creator, which we are a part of. The Soul of the Man (STM) is beautiful and with it carries a beautiful knowledge, it's just knowing how to tap into it. As we are, if we are a believer in the Christ in between the Christmas and the New Year celebrations we find ourselves in a very peculiar situations. A lot of things are moving in the way we wished, and the way it is. I would like to thank the support we received from Universal Council (UC), and UC supporters and KF supporters in elevation of the soul of the .. negotiators in Vienna.

The news is good, and hopefully within the next few days, we reach some conclusions. The way we wanted to take pressure, (:20). and pain from many people, which were effected by the sanctions. It came to the point of break, but now we see it, with the support of what we wished, the STM changes and elevates itself. We thank the people within the structure of the negotiations for their resilience to be there, to make sure something can be done. A lot of good news will come out in the next few days from the negotiations.

When it mattered we interfered. When it came to the point, a lot of supporters, we created by the KF, from national governments. We thank American administration for the great support, and especially the British, in allowing the whole thing to fall in place. At the same time we would like to thank his eminence Ayatollah K of Iran, in support of appointing one of the heads of negotiators. He is one of the closest people to him, to be there, to make sure this time it's not negotiated by people, who will sell the interests of Iran, but they are there to serve Iran. Mr. ?? is extremely close to his Eminence Ayatollah K and we are aware of his position from the beginning, and that's how we could create new influences in the background. He will bring the closure to this matter in next few weeks.

At the same time, we will see great changes. As we said in response to the support, to we received, and what we released, KF will open the Arizona (AZ) center, as a center of what we call, "transfer of intellect" from Iran to US. This process has already started thanks to John who is a solid … supporter and Knowledge Seeker (KS), that we have moved from, if you remember, (:22). the manufacturing side in AZ, to research center. We are hoping, and we know, that NASA will join us in this endeavor. I have brought in, and in close contact and communication on a daily basis, with NASA. We will see them to be part of the AZ venture, with them they are bringing Boeing, Lockheed Martin, and other American space agencies, that we work in a rapid way.

Everybody is waiting for the .. flight Enhancement Unit (EU) to arrive in Vienna and in US. From there on it will become the job of the KF Austrian side, to fulfill the delivery of the reactors, and a new type of reactors will be introduced in a space flight in the next couple of weeks, when the whole structure comes together. The whole process has taken a long time, but it needed to bring maturity and peace, before we go into the next phase.

What will be interesting is how we'll take the next phase, how things will take shape. As the Chinese say, 8 is a lucky number and this year we have many eights coming together. The lucky day starts from the beginning of the year, the first day of the year will bring us many, many good lucks. As I lived in China and understand the whole process, of whole understanding of the need to be as part of the whole structure. We start the year 2022, 01, 01 (= 8). In March of this year, in the Iranian New Year we'll reach the same 1401, 01 ,01 (= 8), both years starts a lucky day. In that process, the double 8 (:24). will brings us a prosperous year.

Understanding it is amazing, and we still target, and we are still targeting for 6th of June 2022, for the first flight to moon. First flight, independent flight setup not by KF, but by collaboration of the organizations, international as the space agencies, Iran, China, Russia, US, and in the long run, we will see Japanese as part of the work. We hope to bring other states in, and then we'll see the next .. cycle of life.

Today's teaching is very simple, it's about you. We have worked for one year together, to get to this point, we are reaching our 9th year anniversary starting soon, of …the teaching cycles, and what we would like to hear, is from you today. How you feel, in the past years of teaching, how you feel, in the future will hold for us now, that we see man has reached peace, and we'll endeavor to carry on with this process. It needs a lot of support, raising the STM. As we have seen, we stopped the wars, and no army dares to fight again. They talk about it, because that's how they used to talk about wars, and then getting done. But now it is just a voice.

We see progress, .. massive changes, .. expansions in KF. We have set and sorted a lot of things, which were hanging on the KF for past .. 15 years. All has sorted, we have a few what I call, dots to put on "I"s" and cross "T's" and by 2022 we are ready to go full blast. (:26). As I said, we believe and we and we rely on KS, but the work of the KS in 2022 changes.

You have learned about the ethos of the soul, … of the knowledge of the Foundation. Now we bring outsiders, and your job is to teach them. To enlighten them with the knowledge, that with their expertise they bring a new D to us. We bring consultancy, but part of our negotiation with the consultant group is, they have to understand the ethos of the KF, .. the knowledge of the KF. It's there, the KS come in, to teach the ethos. To teach the way we think, the fields interact, they see how things are done. And then we deliver expertise with they, and you, in D in new direction. We setup to see, and to be part of this process, then in that process, we become, in a way, teaching, and in a way, progressing, rapidly in D of understanding. Humanity has entered a new D, and now we have to be there to support it, .. to understand it, .. to be part of it, irrespective of time, place, and position.

Many of you are getting enlightened in different D and directions. How would you as KS participate in this change, is entirely up to you. We ask you to come in, to teach those who are building the sites for the expansion of the KF, to the architects, that they understand how the building has to carry the STM in it, (:28). How it has to be a place where he absorbs the energies of the U, and the rest of it.

The teaching changes from me to many of you KS. People like Jalal, Alex, and the others who are working in the background, our dearest friends in Vietnam, and other parts of the world which are working in this direction. You become the next teachers, the next cycle to show the progress, to show the .. achievements of everyone else. And we'll see what things will come in. We'll see how we progress as a, what we call, One Race, and how people around us, will bring this success home. The rely on .. the support of the KF and

in that, we'll find out one thing. Mankind is ready for change. The change will come in the process of next 12 months.

Most of us will not talk about the war. Most of us in 2022, will not talk about .. viruses, and everything else, because we'll bring a knowledge to be seen and to be understood and with it, we'll find new solutions in life. Many of our industries of today, in the next year will change. Many of the ways we have used this planet will start to change. It's 7 billion of us, and it takes time to teach everyone. But the start of the process of the change, as One Nation One Planet OR will start in this coming year.

It is most probably important for many of us, (:30). to understand why and how. It is up to you to analyze, to sit back and to watch. When we talked to our fathers and grandfathers, they watched a man, who was on the back of a donkey and a camel for centuries, to become on a bicycles, and a motorcycles, and jets and fly to the moon. No one has seen more evolution in the short time of their life, than our fathers and they adapted to it. They learned from sending a letter, to handling the mobile phones, and computers, in that age, time cycle. Now our cycle will see much more bigger change. We will learn communication with the soul, .. with the strength of thoughts, we learn transportation with understanding of the emotion.

Our generation and the generation to come, will see a bigger change, change from the physical D, to D of the, what is to come, the way the U works. The mobile phone, the cars and the jet was in matter state. We have taught enough, that the man will grow to the new cycle. The change for many of us will be drastic. Moving away from eating to absorbing energy, moving away from burning and destroying the atmosphere and the environment, to moving silently, to be present.

In a way, many of us will change our behavior, our attitude, because we learned, we were afraid if somebody hears us, "close the door," that nobody can hear, and we can talk. Now we have no way to close the doors to the STM. What you think is heard by the mother-in-law, or is heard by the bride. So all thoughts has to be clean and clear. No chit chat, as the STM has no room, (:32). and has not doors and windows to close. our fear of being heard, becomes our strength to become correct. We will see this change in the coming year. In 2022 many of the Knowledge Seekers (KS) will switch from the dimension (D) of physicality to the D and work of the soul. I have seen many of you changing without you knowing, as I have seen this process before, I see many of the KS will elevate to understand the process of the creation, and in that process become the light.

We welcome and celebrate the birth of Mitra, and at same time her presence amongst us, as the creation of the Creator, and this has brought the change. This will bring many changes, as the mother of creation has chosen the earth, to be mothered by, and be learned more.

Many of you will walk away from diseases without you knowing why, but you understand your soul has elevated, and the D of physicality has changed with it. We'll see

a lot of things change this year, as new T and understanding of the plasma (Pl) and other sciences, will bring a new breakthrough for the world of science.

The biggest point and biggest change will be the opening of the 3 in Tehran, in Vienna, and in Arizona (AZ), where everybody moves, and everybody does the same thing, but target is the same. If you remember in 2014 we did such a thing, with the thoughts of two, stopped the system, while the 3 systems were running in Germany, Canada and Italy. Now the same system is ?? again. We always work on the 3 basis, and with it, (:34). this time will come the elevation of the Soul of the Man (STM), not stopping of a motor. This is the reason for it, we have chosen the 3 spots. It's not coincidental. Nothing in my work has ever been coincidental, has a reason, and with it, will bring the change.

The beauty of it is, the American government does not know how to handle the transfer of T to the US. We are seeing it, and supporting ?? us, has been one of the main ingredient to stepping down from the war, stepping down from conflict, was the biggest thing we were expecting from the American administration. We respond to his Excellency President Biden, the space T of Iran is open to US.

The way we see it, will open up to many, many of us. Many of the KS will be invited by invitation only, to join different centers for short time or long term for developments of the space T. For sure we see many, many old guards in. We see many people with a lot of knowledge in, to be in, support, and within, the reach of the knowledge, that we can transfer to educate, so many new, hundreds and thousands of scientists, that they are still in the matter state, to convert in the understanding of the Pl, and many of them will reach to the height of new understanding, and they bring us that position.

Colonization of the earth in the coming decade, as a full-time base, on Mars, and beyond, will become as normal, as what we do today, we go form one city to another. This time we produce everything at the point of demand, this time we produce everything, even elevation of the STM, at the point of demand, and then the change will come. (:36).

I thank especially the Iranian administration .. to be there to support for the KF to reach to position it is today, and with it, we'll respond positively to the changes, which are set to come to Iran. We will invest a lot of time and effort, to make sure Iran stays the center of intellect, irrespective of who will be in the position of power in Iran, as it will be carried by the nation, and not by government.

We offer you our best wishes for the New year to come, to those who are believers of Christianity. Many of our nations calendars work by the promise and belief of Christ in Christian calendars. In that process we become part of One Nation through the teaching of the Christ.

We welcome you today to share your feelings and not try to answer many questions. What do you see of the future, in what you have learned? What have you understand what will be the future for your children and your great grandchildren, and even for yourself. Where you thought you might live 60 years, now you live 150 years, you have

just spent a third of your lifetime, what are you going to do with the other two thirds to come? We used to retire at 70 or 60, now we just small children, and still got another two-thirds to go. How are we going to participate in society? Are we choosing to hide in the rooms and reading magazines, and newspapers and watching TV until the time comes, or are we changing our position and becoming productive, (:38). and active part of the position of this planet, with the knowledge we carry.

When Noah lived 50 years, they thought it was a very long time, now many of us in the man's cycle will be 500 and 1000 years. Then you can see life will be very extended. Would the government decides, on our pension, and when we can pack it in? Or do we start a new cycle, after what the matter state completes and we become elevators of the soul of the others through what we do.

Let's see how we can change the tradition, by knowing, we still got another 60 or 90 years or 100 years, left to live and be in the D of physicality. Would we sit in the chair, or do we get up and bring the change. The future is very bright. The future is extremely beautiful, if you understand what sits on the other side, and there is never a deadline, or a time zone, or what we call, country or a nation. Man decided to draw the line formations, .. that 60 is the time when we pack it in, because we want to, or we have to. When in fact, as there is no nation, there is borders, there One Nation and One Planet, there is one soul. Would we support the other souls, with our soul to elevate, and then we find out there is no time to be a pensioner. But we have to pension out, to the others to elevate from our knowledge, our feeling and emotion.

As I said, a very happy New Year to you even those who are sharing it with the bears and the others, and at the same time, (:40). many of us will see a new change in 2022. And I hope .. that the time has come, that we have no more leaders, but we have collective leadership, trust in our soul, who is the leader of our lives. With it we receive the support of the UC and the Earth Council, to see the change and the transition through.

I'll leave today, the floor to you, to share, what you see from the past, what you'll see for the future. And I thank you for being KS, and be there to share so openly with the others, the knowledge of the Creator.

Rick I leave the floor to you to carry on.
R: .. Well I know for me, I could start off I suppose seeing that I was kind of there at the beginning of these teachings. These teachings were based on the , or the KS workshops were based on the first public teaching workshops that Mr. Keshe put on, and they ran for about a year before the KSW started, and before that there was the Keshe Plasma reactor Group that I started. Mr. K liked some of the work we were doing with reactors, that were roughly based on the patent that he had put out using those ideas, using gases and rotating reactors. Then one thing lead to another and here we are in the KSW. So it's been, (:42). quite a journey. In many ways some of the reactor experiment and research went to the background as other things became more prevalent, the Gans T, Nano and especially the soul based teachings in the last years. But now I hear rumors that people are actually

becoming interested in working with the reactors, as more the vision of previous time produce power and lift …

It's a very exciting time. ..

(:44).
Q: …

(:48). Q: Salomea, …
(:52). … (1:02).

(1:04). (end of Salomea) .,

R: .. Mr. Keshe you have a new picture on the screen, would you like to explain about that.
K- Yes, what I am trying to do while others are sharing their thoughts, we are sharing the achievements of this year of the KF. What we see, the Exhibition Center (EC), which is now fully operational, and what we have achieved. This is the television center of the KF in the center. KFTV has got a home. We see the station in a beautiful way, that will come into operation this year. Where everything is set to go ahead. It's one of the first times we share these pictures. This is internal, there are 3 sections to the television studio, which is now set, fully operational. This is the conference section and the new exhibition. This is where the knowledge and T will be shared. This is KF AZ where we put everything out. It says, OPONOR building peace through T.

That seat on its own in the middle has a lot of meaning. This is the seat of justice, the seat of knowledge. (1:06). It's the seat where man will share peace, and what we call, "without bullets' we'll achieve a lot. The bullet of knowledge is heavier for those who take these seats, to be just and correct. We see the EC in Austria.

These 2 pictures brought a lot of pressure on the negotiation in Vienna. The American delegation and IAEA to see the flag of Iran in US, and .. in Austria sharing T, brought a lot of understanding that we talk about peace and sharing of the knowledge. I know the meaning and influence in discussion these 2 pictures have brought to the table.

This is Iran's first factory where we have set and in the coming days start manufacturing the MaGrav systems and CO2 captures to be the first units. Today we are celebrating something else. In the next few hours, maybe before the end of this session, what I call the first marriage of KS will take place. The head of Iran KF, Yosef, in next 2 - 3 hours will be getting married to another KS in Iran. One of the successes of Iranian KF, (1:08). has been the ?? of Yosef, and correct conduct. In the way he works and lives by the ethos of the KF. Doesn't matter who he sits in front of. We congratulate him and his new wife, and we join the celebration of his marriage. He was interested, he was willing to share the ?? ceremony with us, but due to certain restrictions and .. situation which exists at the moment in Iran, we could not share, and be part of his wedding ceremony. We wish him all the best with his new life and beautiful wife. The strangest thing is that the whole

family are KS. We congratulate, the first what we call, KS marriage. The way this marriage was taken place, and they got introduced together, was through the work of the KF. I am hopeful we'll see many of these marriages, and we see and wish all the best for KF Iranian team, as they are strengthening in their work. We hope we'll meet very soon with Yosef and his new bride, and as KS, that they support and have supported the KF in Iran.

This is our KF images from Jin and Jiang. (1:10). With Wang Lin, if she wants to share the latest pictures. . … We have built the most prestigious offices and what we call, sections of the KF China. This is the production side .. producing Gans's. These are the very first MaGravs, which you will see many of, will be exported around the KF. … oil ??

We saw harvest increase in the fields of North of Iran, which lead to the first signing of the contract and understanding with a major university in Iran. This harvest showed the government of Iran that the T is and will effect the farming, and now ?? has signed the biggest what we call, universities in Iran and you will see a lot of agricultural reports coming out.

This picture has a lot of meaning for us. It's the first time Iranian government officially confirms use the KF T since 2008. This is where, (1:12). the major breakthrough was brought in for the KF.

The officials especially the Americans and British, by seeing this report and being part of the negotiations, understood KF is part of the integral part of the Iran defense ministry force. They have suffered with it, they could not expand their expansion programs, because of this picture. Many of you will soon understand what these 2 pictures have to do with each other. Where through this picture, which many of you seen with the lying Prime Minister of Israel, and the confirmation of the other picture, which we saw, which lead to the whole structure, brought many changes. We understand that this picture in the future, will become to be one of the cornerstone changes, and acceptance of the KF T, in the world. Because in our process, in our work we managed to confirm and deliver, confirmation from a national government.

It is a huge achievement, and this would not have been done, if we did not deliver the T the correct way. … in 2008, when I went to Iran, I signed a written guarantee contract with the Iranian government, that my T, (1:14). can be used for defense of the nation, but not for military advantages and war. We saw with this disclosure, this Iran never crossed this border. But with it defended the nation. This was breakthrough we were waiting for. In the coming time, in the process of our understanding more and more of it, we came to understand, that our T was used and abused by other nations.

In so many ways, the breakthrough in 5plus1 came when, we put the pictures and the understanding together, for the governments to understand how a space T was abused to misrepresent, and this is where the peace talks changed course. That it wasn't hidden, that

one light, but the beauty with us, one T brought the condition of what we see, progressive peace.

In the coming time, we will push further, we will not stop by, in a way, the progress of the KF. We will see many pictures to come from achievements of the KF KS, and we will see a massive developments under, other side of the work for many of us. We are like what I call, a pack of cards, a strengthening by each card, (1:16). being added to it, by knowledge, what I call resilience, by understanding and … adding new T. The breakthrough for many of us will come this year with the latest space T, which we'll release. As we endeavor to bring the change through T, and through understanding better advancements in T. Space T which we are ready with that, … which we know will bring the change. The changes it will bring will be massive for many of us. Maybe .. we'll see more. This is one of the first KF ?? factory for farming in Austria. This will bring new changes for many of us. We'll explain this, the structures which are to be built around the world using this T.

This picture (Brain EU) will bring change again to many of us. I am sure a large percentage of the us, and our children … family, will come to use this system very rapidly, stroke, ??? (audio lost ..) The stroke and elevation of the STM, (1:18). all will be controlled, all will be done through this system. ?? it controls the STM. It has the power to elevate the STM. This is one of the most powerful system ever been built, made, or built for the human race. This the cornerstone of the man changing, understanding and observing the elevation of his soul, through understanding of his own.

A number of these will be sent to AZ in the coming weeks. In the coming weeks, we'll see, we put the soldiers of war, of America, coming back damaged, walking out of these as a normal human being. We'll concentrate on veterans to start with, in US, using these systems. Those who received mental damages, those who received physical, structural damage to their brain, to be rebuilt using this, and with it we'll see the change in physicality. I have said before. .. You looked at these systems for physicality, I gave you this system for elevation of the STM, and you will understand, many of you will wish to have a few minutes within this structure (brain helmet).

Then you'll understand how progressive we have become. You will see massive change to come, in the knowledge this year. A hundred of these units are set, (1:20). to be exported out of Austria this year, to different location around the world. To show the effect directly on the changing of the man. We'll see these in prisons where people who are under no control, they see elevation of their soul and we get and receive a new man. Not through psychological change, but through elevation of the soul. And we'll see changes. This small unit is prelude to big changes for human race. This is one of the achievements of 2021. We will see more and more advanced systems than this to come. Conjunction of the different T of the KF to deliver a massive punch, where nations will rely on T, which we ?? expect of the .. nation and the place where the T is built. ?? in Iran.

The first MaGrav systems. You will see these MaGrav systems right across the world, export from Iran, and with it we'll see big change. We'll start teaching you how to use the MaGravs, not as an energy system in the electric current, but as a power house for many changes in your lives. You will see, in what we deliver with MaGravs, you will move away from eating. These MaGrav units, you looked at it as a power generators, they are, but they are power generators for what we call, the D of STM and the physicality .. You plug it to the wall, (1:22). we plug it to your physicality, and then you'll understand. You were looking for a generator, it's been sitting right in front of you. We'll tell you how to correct it, and how to use it. Then you'll see the change. Understanding the T, doesn't sit in the box or in the unit, understanding the T sits in totality of understanding what we call, the elevation of the STM.

Rick is there anybody else would like to share.

Q: Marie UC, I want to speak on behalf of the UC .. what we have done this year. We .. .. We have been working on the unification of souls of humanity .. (1:24).
The way we are working together as KS. elevation of the peace process in Vienna with the 5plus1 negotiators ..

(1:26). .. (1:28).
(1:30)
Q: Numbers K put up in Persian 8 + 8 = 16; and 1 + 6 = 7; which is the 7th step or stage of Mitra in Mithraism. ..

Q: Dean …
(1:32). .. (1:36) … (1:40). Thank you (1:42).

Q: …
(1:44).
Q: Jalal, … (1:50). we don't stop no matter what .. teaching going on all the time ..

K- Thank you Jalal. I am sure what we see, you'll be a massive part of it, you do not know yet. I asked Chinese team to share past year successes .. that's all I received from them. .. This is the KF China headquarters impressive. . .
(1:52). some months ago it was nothing be a shell. .. advanced T with advanced space … this is your place ..
This is where we spent our finances, .. strength

(1:54). We will show very soon the headquarters of the KF in Austria. .. We are becoming independent. The beauty of it is all this invest is done without a single cent barrowed from any bank. Nor has a single cent been asked from any organization to support. It's done on the strength of the KF, .. what we do and what we believe in, and what we are committing ourselves to. And it adds up to a huge amounts of progress, .. a lot of trust in what we do. Don't forget all this will be left to our grandchildren and great grandchildren .. because nothing will be taken by us. We develop it, we build it and we leave it for the time of the history to tell. We set out to create peace through knowledge

and T, and very soon this name in different languages … and flags will be across this planet. Knowledge without borders, .. expectation, and sharing knowledge for peace. I thank WL and KF team in China. For very hard, they sacrificed everything. From now on we'll see the fruit of their work. WL is on the line .. Are you there WL (1:56).
Would you like to share anymore images from your headquarters ..
WL : … I am going to shipping some things for the spaceship units.
K- Okay … The first 3 set of spaceship units, one goes to AZ, to Austria, and to Iran, is about to take shape in the next few days. We'll see on the arrival, they are made in the full shape, not to assemble. We will see the approach of the units we are ready to deliver the T in a vast way. 3 units a weeks . I know exactly what you are doing and where you are. She is busy with something else. (1:58).

The new flight EU will be sent around the world when the units are that they all receive the knowledge at the same time in 3 countries, and there will be more than 20 nationalities getting involved, by around about mid February the latest. Then we'll see where we take.

We have made request to American government for admission, for accepting the flight EU in US. This will be a major breakthrough for, not only for KF, but for all of us in sharing knowledge. We request from a number of KS, to move in these positions in coming weeks, to be ready to teach, the scientists who come in from these organizations, to be ready to accept, and understand, and collaborate, that by mid-March we'll have the flight system, to be ready to test. Then we'll move on. You got to understand, the most important part of the flight system has not been disclosed in understanding of the totality. This will be done in the coming weeks, and months with the international scientists collaboration.
Any other part ..

Q: Stephanie .. (2:00). … (2:04).

R: There is something I can add to the experiences I have had a bear come to visit over Christmas …. (2:14).

Q: Kay. … may the soul of Jesus be with all of you …. we are 100% sure this is going to be a special year to come. (2:16). I was them a lot of luck ..
.. nuclear scientists who got assassinated …
First thing I came across about Mr. Keshe … I was already connected to what he was talking about .. it sank into me .. I felt it .. (2:18). … I knew this knowledge was a game changer … (2:20). (2:22).
I am grateful for the condition K has provided for .. we shall have a beautiful 2022 to celebrate…
Q: (2:24). …

Q: .. How has Mitra lost the memory and .. now in the process of changing?
Q: .. After bringing the peace to this planet what is going to happen , live and kicking in another D?

Q: Mosveq … (2:26). this teaching process is inspiration to all of us ..
.. I got involved in the health side of it (2:28). (2:32).
Thanks everyone ..

(2:34).
Q: .. gave me more inner harmony , strength, trust …
Q: …
Q: … it's as if the light came on .. love of humanity shines through … (2:36).

K- No, just listening. It's nice to be part of a bigger change we all have been waiting for. for generations. I put this picture on, and every time I look at this picture it brings me back a lot of what I call, understanding. If you look at the top of the picture you see the thrusters of the rocket propulsion, we have 6 of them in the building. It looks like you are sitting under the rockets, in the basement looking up into the .. exhaust of the rocket it's to blast in to space.

And underneath like a mole, with these systems, we look at, we know more, that you don't know up there. If you are familiar with ?? ?? there are people living in the center of the earth, in different cultures. We become that culture in the EC. Above us we see the rocket propulsion, underneath we see the space T, that it can even go through the concrete, and the building and takeoff. It's a beautiful feeling, knowing that you know more and you can share it freely. It's beautiful .. approach, putting the whole T together.

The new T is not just about the flight, it's about every aspects of our need, to be the passengers of this planet, to the need of physical elevation, to elevation of the soul. (2:38). Sometime in the future mankind will understand, that he can enlightened during the flight by elevation of his soul, and decide he does not want to be in the parameters of this structure, which I am flying with, and we'll see many of us, many of the human race in the time of transportation and transmutation (T&T) will elevate to new levels as they are touched by knowledge of the Creator.

Many of us will wish to be in that position and place, during the T&T, as the system feeds our physical life, STP and STM. Many of us will enlightened to the Knowledge of the Creator (KOC), and choose not to be in the D of physicality. During the process of the flight, you might see one or two seats empty of D of physicality, where the soul has taken a new position and D.

We've seen this before and I am sure it will happen to the race of the man. Where as now, we are spraying the CO2, and everything else around to elevate The soul of the ?? of the earth and its citizens. Don't forget now in these systems you are in an intensive zone of massive elevation of the fields. These fields are not created by the system inside, but in that process of very much like, adrenals you call it, going through the system we absorb fields from the outside, fields from the radiation of the system, and lead to better understanding, to more elevation. It's very interesting … to see how this process will take shape. (2:40).

As I said, we don't need to wait much, 2022 is the year where everything is on the move. As you heard WL from China, she is delivering a most important part of the EU to be added, before its final assembly, and shipment to the 3 destinations. As we said, we ship one unit per week to AZ, 1 unit per week to Austria, and we carry on with this process, till we complete the understanding by all the scientists in Iran, in Austria, and in US, of the new evolution.

No nation will be able to hide, and all nations will work together. This is the beauty of this T. If you look on top of the picture, it's the edge of T in matter state, and below you see the edge of understanding about Pl T, and a new cycle of motion and transportation.

The beauty of it is, you see the chairs. That chair can be occupied by any scientist or man on this planet, to be educated with the knowledge freely without charge. This brings back a lot of understanding. Every man expects, and we expect nothing, we just share, and somehow it works. These few last pictures you've last seen is coming directly continuously from WL the EC, because she literally lives in the EC. (2:42). It's amazing how things are seen and done, and how the whole structure of the KF sits within it, sits within the structure, sits within the understanding, and sits within the process, that all of us .. have no choice, but to fall in with it.

Now you'll see another picture added, the 2 EU next to each other and 1 from that matter state, and 1 from the physical and soul state. Very soon there will be a third unit in the center of these, which is the flight system. We hopefully see in next 3 - 4 weeks, once it arrives in Austria. Then we'll see.

I asked a military force of a nation, to ship the 3 units directly to each nation. We are waiting for a response. That way once the units are completed, all 3 nations will receive the same system at the same time. It will be interesting if the military leaders will accept such a move. We'll see how things take shape, It's the age of change, and we are part of that change, and bringing that change. It is interesting to see what, our future generation will look at when they look at these systems.

Thank you very much Rick, it's been a beautiful year, (2:44). we taught a lot, learned a lot, and we shared a lot. hopefully in time some of it will be understood, and in time some of it will be acted upon.
… we call it a day. … we wish you one of the best years for the human race.

There is one promise, 2022 is end of religions. I assure you, and with the will, of what we have, we shall see. The end of belief in different paths of belief, will come to an end in 2022, be it Christianity, Judaism, Islam, Buddhism and the rest. They all will believe in one thing, and that's in the presence of the Creator amongst men, and in the STM not in D of physicality. That's one thing for sure, and that we'll see, the end of belief in Creator in different names and religions. We will see the end of religions. There shall be no separation, they all become one. This is one of the most beautiful things we'll see starting in 2022.

Thank you

Q: .. Can you give examples of matter, with the big "M" matter?
R: And we were looking at the books and kind of trying to figure that out. Didn't get a good solid answer.
K- Stones, metals, (2:46). human body is not in a big matter state. Human body is a transition between the matter and plasma.
R: So big "M" matter is like the solid stuff, matter
K- Very solid, it's completion, singularity. Life of the man is a intermediary, not intermediary. Is living in 2 D, of the matter state and plasma state. Our body, (each) cell of our body is in the Pl state, but our bones are in the matter state. We still use the matter state to hang a plasma to it. We create the structure of the man.

The total matter state, is a matter of salt, with singularity of the existence, not composition of existence of different strengths. It's like Fe, Cu. If you think of even alloys, alloys there are still in a state of matter, but it's a composition of states, not singularity of states. The wood is between the two states, because it carries an AA in its structure.

Matter state is what we have as the solid part of the structure of any existence, and material like a. We consider gases as part of that matter state, but in different field strength. We consider water as the same. Matter as big "M", (2:48). is what you hold in your hand, in the singularity of the state of atom.

Q: Alex Canada, .. I just want to say a few words because we brought up some memories. Thank the 3 musketeers … my customers helped me out.
buying plasma water …

Don spent most of his life in wheel chair … (2:50).
One of my wishes was to get rid of the wheelchair. ..

(2:52). … (2:54).
The 3 gentlemen helped me tremendously ..
Don could walk again, Mark re-grow his organs .. Mark could wash away memories of war .. they all passed away in 2019. I just want to make a wish. They enlightened the movement of US and British ..
(2:56).
… the 3 musketeers would have been proud to serve thank you.

R: it would be my wish to become 5plus4 actually … (2:58). …
Are we done for now.

K- No, thank you .. we wish you a Happy New Year. I am sure when we meet next week, there will be much bigger news start floating. We'll see the beginning of changes. We hope that we'll be able to conclude a lot of things in next coming year, especially our hope and wish is the completion of flight on 6th of June. The KF space company

GM??GH has already been signed into, established, is under permission of Austrian government to become a space agency organization above 80 kilometers, which is above aerospace, (3:00). and it's first time Austria becomes a deep space company, and establishes ground for it. We hope we can serve the nation of man with peace as One Nation.

414th Knowledge Seekers Workshop; January 6, 2022

Note: Transcription has not been checked by KF. Please listen to original recording. (Transcription by KF Brazil)

(Start of deeper teachings of transmuting not to be afraid ..)

Quick index

What is real what is mirage
This will be best year for human race; Many will be enlightened to a new D; Foundation for new human race; Travel with both soul & physicality; Have to learn what is real & what is reflection or mirage ; Spherical nature of plasma creates reflections appear real; When transmuting have to know of environment is real to manifest; How to convert energy into manifestation of physicality ; Understanding Inertia at point of manifestation important ; First time flight systems will carry their own soul ; Flight systems cannot be converted or destroyed by whatever fields travel through; Trust your soul to the soul of the spacecraft ; Soul of craft responsible to feed D of existence of passengers ; Your soul is captain of every cell or your body; Travel through soul on earth; Negative G is old physics - doesn't exist in new T; Can transport thousands of you in small flight system - as a soul; New EU is new cycle of knowledge even for U Community; New centers will be built by STM devoted to serve humanity; Soon understand meaning of birth of Mitra; From now on Mankind will be in charge of his own soul; Manifest in NY as black - even though born in China as yellow; (Mankind will be able to change his physicality according to his desire); We will identify people through their soul - not physicality; Strength of the soul in serving whole U - not only man; Understanding strength of soul of Inertia of body; Able to measure strength of Inertia at point of manifestation;

Can manifest at different points in Unicose at same time - with projection
When receiving knowledge of U - have to remain humble and teach others
Many are among us - not from this planet; Man will learn to recognize them
Passenger of U might appear during the flight
Visitors from other D here on earth - are peaceful; Do not be afraid

They have understood peaceful nature of U
Before using flight system - use Vision EU
You feel the VEU in the emotion of the brain
No deaths while using flight EU - travel in D of the soul; Death by car accidents is over ; When 2 souls or plasmas touch - they keep their integrity; Don't need driving license - certificate of the STM & how to transmute ; Bringing STP to be part of the STM - understanding the emotion of the STM; STP decides emotional strength and make up of physicality ; This knowledge has been hidden to man; No man shall kill - the STM will feed the D of physicality

Tomorrow is another Christmas for the Orthodox Church; Tomorrow will be the change for many of you - T&T of the soul;

It will be done in 3 centers - chosen for their points of energy fields of U; Before - to show manifestation of the fields we chose - Germany, Canada, Italy;

The 4th (reactor) of SF - will be the manifestation of the totality ;
It's not coincidental, it's chosen, a long time ago; Humanity has reached a point of maturity ;
As we'll make a man to be a stone, and a stone to be a man.;
We'll make stone out of the STM - that it has no emotion, no feeling,
We'll make stone out of the man - if the man decides to go the wrong way
I hope today's teaching opens a new D for many KS, and many world leaders (WL),
And many of those who sit here - to report falsified reports to the WL.
And those who by their conduct have become - what we call, a "phantom soul"

By understanding the teaching of today - you elevate the soul of the others
Maybe man in 2022 will be enlightened to the truth about return of Methi
It depends on the rulers of this world & RL to turn tide -make this a peaceful planet
This is our way and we'll achieve it - as we have access to soul of all.
It's the year of Methi, it's the return of the Messiah,
Let them (the leaders) battle it, as we know who will win the battle.

Understand the creation of emotion and not (just) to look at the emotions,
The emotion is the key to understanding process of interaction of STM & STP
It's key to understanding the process of interaction of the STM and STP of the man.

RNA of the M fields
22nd February 2022 - Tuesday Universal Council meeting
Listen to NACT teaching Jan 2, 2022
End of religions
Christ did it without using a machine
Iranians are preparing for return of Methi
It's the end of Rothschild's era
If you are very religious - you'll be enlighten first
Ayatollah been touched by enlightenment to bring change - Pope also

KF not bringing a new religion but knowledge of the Creator
Death of leaders and mass support - deeper understanding
15th December massive punch to IAEA changed negotiations
Iranians graceful - had documents but didn't show
Immediately Israelis changed story on Iran nuclear weapons
Rise of billionaires in Iran - because of new T
Man kills for power
Planned murder and takeover of KF
KF AZ center outside framework of Markray
NASA & other space agencies invited to participate
Energy crisis in Europe fake to get back lost profits
MaGrav goes through transmutation of energy - cascading
Largest factory in Romania
We go with Shia because bloodline directly back to Mohammad - bring change

ENGLISH TRANSCRIPTION

(:24).
K- .. We welcome you to the New Year in the Christian calendar, and we know, and we hope, it will be one of the best years human race has ever seen. In a way, the big change, the change mankind has been waiting for will be fulfilled this year, one way or another, in different strength, and different dimensions (D), in different ways, through the D of physicality, or the Soul of the Man (STM).

Many of you as Knowledge Seekers (KS) and others will be enlightened to a new D. We'll understand more, many of us will change our lives, because of it, for it, and through it. And becomes the basis for the foundation for a new race, of human race, on this planet and throughout the U. This will be the year where the man will take the first stride to become in total, part of Universal Community, become part of what it will see, (:26). to become it's elevation of its soul, elevation of his own physicality to understand both. To understand what to do with it, and how to do with it. Become the soul alone without the attachment of the physicality, or become in the D of physicality and the soul will travel together.

One is what we call the point of death, and one becomes, becoming passengers of the U. What is real, what is not real, will become one of the biggest problems for human race in the space. In the world of physics, in the world of understanding reflection, and manifestation of the physicality to the sight of the man, those who choose the path of physical D ?? ?? manifestation. Will carry ?? live to be real, and what becomes to be, mirage. What is the reflection and what is the truth? The soul you see, is the real soul in front of you. The physicality you see, is the real physical D to you, or is it a reflection, a mirage?

We have to understand that, to keep a plasma (Pl) moving, plasmas usually take a spherical shape. The sun or a slightly flatter shape through the compression of the fields

of the U, a disk, are still a Pl. And there is an inherent problem with this shape, that man has understood it partially, in D of the physics of the matter state, but now he has to understand, the same exists in the D of what we call the fields of the U.

When you have (:28). a spherical shining transparent ball like a Pl, are you in it, or are you outside it? What do you see, if you are in it is real? Or what you see is a mirage? Is the D you see, a real entity, or what you see outside exists? Does one inside another, creates the same problem? What does this mean? Many of you have been through the physics, .. understood the physics, the concave and convex mirrors. Now you have transportation dynamic, what we call, fields, which create that effect of the mirror. It's not solid, but due to its transition and rotation, creates reflection.

Then it comes a question for man to ask …?? in the wrong ??? When you travel the depth of space, when we convert or decide the physicality of an environment, is that environment real, or is it a mirage, that we have come to see, to feel, to understand. Reflection of the galaxies on the other position in the U, due to the reflection of the light of the .. galaxy itself, within the dynamic spherical shape of the U.

Then we come to understand many of the things we see in the physical eye, (:30). they are not real, they are mirage. What do we do? Do you manifest yourself in ?? ??? there is nothing but you think it is a planet. How do you change, how does your soul convert itself. (bandwidth problem)

Then it comes to understand, how do we manifest ourselves? Do we manifest ourselves in a D of the reality, or do we manifest ourselves in the D of upside down? Where we call it another cycle. Where the reality doesn't exist, but it is a mirage. Mankind will have a lot of problem with this process, mankind will come to suffer heavily, if he does not understand. How do you transfer even if you land in the right space and D, and the field, which has no matter D, but is the Pl of the fields of the existence, and you want to convert your energy into manifestation of physicality, how do you do it? How do we convert our souls when we transport ourselves within the system, from one system to another?

When I transport you through the new transportation system. I transport you through the D of the STM, not the physicality of the man. (:32). I don't look for every cell, what is going to be, what energy it's going to have. I transport you through the soul, and the STM in the D of the arrival, at the point of manifestation, has to be able to convert itself to the fields of the strength of the matter state, on the condition, or physical Pl state, on the condition of point of manifestation.

Then mankind comes to understand, he needs a new understanding. He needs a new conversion, he needs to understand how to convert a mass of field, a mass of energy tangible or visible. You arrive at the point, you meet with another Pl, which is alive, is a living thing. How do you manifest yourself to it? It has no eyes, but it wants to feel you, it wants to understand who you are. You want to understand who it is. How do you

change the fields of the Pl of the STM in the D of the detection, and manifestation of confirmation in a physical D, at a point of manifestation to the other soul.

Then mankind needs to understand why, so many times we refer to the Inertia. Inertia of the point of the manifestation. Inertia of the point of the change on conversion to the strength of. Then you understand, why so many times in the past, we emphasized on understanding this. Even in the teachings of the matter state, we always said, creation of the Pl in the upper atmosphere of the earth, when it comes in touch with the Inertia of the matter state, converts to that matter on this planet. Now man needs to understand this, how does he convert part of the strength, (:34). of his own soul to become its Inertia detector, Inertia conversion ?? with. This is where the STM will manifest itself, both in the D of the soul, and the D of the physicality, where the Soul of the Physicality (STP) exists within the D of the STM. You cannot be fixed ratio, fixed what we call, strength of Inertia. Your Inertia, your fixed Inertia on earth will not work in another D. It needs Inertia of the point of Inertia of the manifestation.

Then we understand more, how in the new flight system, even our flight system has to be dynamic to be able to manifest itself, to hold itself in both D of the physicality and the soul. For the first time, in the systems we develop for the deep space travel, will carry the soul of their own, which them never to be converted, never to be destroyed, does not matter what field strength they travel through.

Then you understand when he says, at the very beginning of the teaching some years ago, "we trust our soul in the hand of the captain," that when he delivers us at the point of where we want to be, in the D of physicality. We give our souls to it, and then it protects it, and in the point of manifestation and delivery, we release it to be there. That soul is the soul of the craft, that soul is the soul of the entity within, which many of us will choose to travel with.

It does not matter what the state of Inertia, in which point and what strength. The soul of the craft, the soul of the man (STM), which is a craft itself, travels. We see the soul of a craft to be responsible for what may be chairs and tables we call it, (:36). or D of existence to feed. Your soul is again a captain, for every cell of your body, which has accepted responsibility of, to look after every cell. To look after every point of existence, manifestation of the physicality within the body of the man. So when you look at the physicality of the man, and the STM, look at another universal D, another universal entity, another existence.

This is where mankind has to understand with the new systems, we are introducing and bringing out this year, and you will see it in AZ, in Tehran, or in Austria, we consider both D, that every system, not only carries the matter state strength field of the Inertia, but has to carry the soul of the craft, has to carry the soul of the passengers of the craft, and deliver the man at the point of manifestation. I don't take you in the physical D from Beijing and deliver you in New York a minute later.

Then you say, what happens with the negative G, what's going to happen with the high speed? It does not exist, this is the old physics. This is what man had in the matter state. In the D of the new understanding and the way we are preparing you to become man of U, is to understand that there is another way. There is a knowledge beyond the knowledge of matter state of physicality of the man.

In the new flight system we transport thousands of you in these small aircrafts, because we let you come in, you walk in and you become the soul. We deliver you as a soul to New York to Tehran, to Beijing, on the moon, or U in the same system, in the same flight ?? pattern. (:38). The flight path, you could be anywhere. The soul of the craft will take you and deliver the soul, and then you decide if you are in New York, you want to be blue eyed or white skin, or black skin and brown eyes, or be the shape of the man on the moon, or the Mars, or another planet, but craft is the same craft.

The new enhancement unit (EU) which is brought in, and will be delivered to AZ, Austria, and Tehran in the coming weeks is the new cycle of knowledge, even for the Universal Community. In understanding the elevation of the soul of the U, and not the man. The new systems will not carry what man always thought. I put an ice cream in a box, and I open the box , and we see ice cream in another position. The shape and the taste of the ice cream on the point of arrival, depends on the man who uses it, and what taste he wants the ice cream to be, and in what shape it will have. Not the shape you put the package in. Mankind has to become to understand, the point of T&T of the man and the human race has changed. In the coming months and coming weeks we'll emphasize and we deliver.

Many are waiting for us to deliver financial supports to build the centers. It will be centers in the STM, those who are devoted, and those who have served what we call, the humanity. Then you understand. Then it comes to be understood that the STM already has its pioneers among the KS, and those who serve the humanity, (:40). already in the space and position. It does not matter if you are in the D of physicality of the earth, or your soul or your ?? souls, are chosen positions across the U.

Mankind will .. soon understand what is meant by the birth of Mitra in the D of physicality, and D of the STM. Mankind will come to understand, that from now on, he is, and will be in charge of his soul, and not the D of physicality, where the physicality will take shape according to the position and manifestation of time.

Creating passports and .. birth certificates will have no meaning as you manifest in New York as a black man with brown eyes, and you were born in China with whatever color of the skin, yellow and blue eyes, green or brown eyes. Then we understand there is a need and a process, that will come to the teaching, that the identity of you, is the identity of the soul. The way it has been and always shall be. The strength of the soul, the D of it's serving what we call, the race of the U, not the man only. If we become only serving man, we'll become back in the same trap of this village of the earth, bind it, and imprisoned to one D, for one place, and one position. This was the station of the prophet of the past, and now it has opened up for the man, to understand the totality of the process

of the growth of the STM. The creation of the man in the D of the U, it will become easier, till we understood. (:42).

One of the biggest problem, those who travel with the new flight system will be to understand the strength of the soul of the Inertia of their body, according to the environment of the manifestation. You do not want to appear in the N Pole with swimming wear, and the middle of the desert with the fur skin, or a fur coat. This is what the new knowledge will be. The cycle of the man in the teaching of this year, is to bring man to the point of understanding, how he manifests himself, how he transmutes himself in both D and in both strengths. The clarity of the thoughts, the clarity of the understanding the position of the strength of the STM in all D.

To understanding what is the real point of manifestation, or am I manifesting myself in the middle of nowhere, thinking I am somewhere. In a D of understanding mankind will become to understand, to measure the strength of the fields of the Inertia, at the point of manifestation, that this will give the man a chance to understand, if the position is real, or is imaginary, or is just by the vision of the man. The what we call, convex, or what we call, concave, manifestation of the energies to be real, or to be imaginary, or virtual, is part of the work of the U.

Then mankind will come to understand one point, most of the stars, most of the galaxies, that we look at in the depth of the space, (:44). is nothing but a mirage. Where we as human race and other races, have come to observe, as we were not, as we were looking at the ?? reflexes of what we call, ?? degrees of the fields of the strength of the interaction of the fields of the U, and the time and the position.

This gives you an amazing power of the knowledge, this gives you amazing what we call, strength in understanding the power of the man. Which means, if you get it the right strength, if you get it to the right Inertia strength, that it can be in parallel in strength of the U, or Unicose, galaxy, or the planet you can manifest yourself at different points at the same time. But which one will be the real one, and which one imaginary and a mirage? How would you distinguish between the imaginary and the mirage. Are you talking to the real thing, or are you talking and receiving energy through the mirage? But would the mirage strength, be conveyor of the energy of the reality.

All these have to be unraveled, understood, and deciphered by the present man knowledge. Because you will not have the eye to see, but the eye of the strength of the STM has to observe, understand ?? digest ?? to decipher and then decide, (:46). if I am going to accept this mirage as a reality, and is that reality to be.

Now you understand that with it, we are entering the D of the space travel, we are really entering the D of understanding, we are really entering in the process of gathering the knowledge of the U, where very few will understand, and then trying to keep those souls, what I call, with the feet on the ground, and not make them to claim themselves to be everything else. To be humble to teach, to be humble to be part of the change not only on this planet, but across the U and Unicose.

What is the understanding of the man, now that he knows he will be traveling in a D of his soul? He will not be traveling the way, the today's flights and systems are, creating compression in a jet liners and putting man in what we call, the monkey suit to send him to the moon and to the Mars. This is why you do not need any clothing, or any kind of protection, to travel among and through the U, and to different D. As now the protection of the man is the strength of his soul. Where the soul decides on the point of manifestation to what strength of Inertia to manifest itself.

Do not forget you can still manifest yourself in the shape of the man in another galaxy, (:48). but as a mirage of the man. But in fact, in D of physicality you will take the shape of the time, the point, and the presence of the ?? direction. Then the people who are aware of your existence, will see your D of physicality, but in the D of the knowledge of the soul, and understand you are from planet earth.

Many of you will become educated, this you will understand, that many of those who are amongst us, are not from this planet, and you'll start to recognizing them. You understand to see them. You understand to be able to appreciate their beauty. Where in the D of the physicality of the man, you will see them as a man, but in essence when you understand this process, you see their real shape, and who they are, and where they are, and which planet or U they come from.

Remember I explained this some time ago about the men we met in the shopping center in Accra, where they came, and they realized I recognized them, and they tried to disappear in the gap between the lift and the stairs. Because we see them, we recognize them, we understand both D, they exist. This will be the future of the man. When you see another creature in their D, but to those of your own D, you still have the same image. Image of the soul, and image of the physicality of the man in the D of the time and the position. This is not becoming a chameleon, but this is becoming like wearing the frock, wanting to be able to live in the environment, and want the man inside the frock, that the others can see you are the man. (:50).

These are part of the processes that in the coming time that using the EU flight system, many of you will face. You might even get a passenger from another D in the flight, and then you'll see what I see. But there is one thing sure, those who have taken position in time and space on this planet from other D, are peaceful, so we have no fear of their existence. We have no fear of them being amongst us, and we have no fear of understanding, that they have understood the totality of the peaceful nature, of the nature of the U. This is what a lot of us will talk to the others, I have seen this and that, but they can’t see, because they were not present. So we do not create conflict. We do not create another D. We do not create another position in reference to totality.

In the coming time, mankind as we develop these systems, will see the development and progress of their own. In the new Vision EU, we try to teach you to see this, before you enter in the D of the transportation and transmutation (T&T). One of the main reasons that I developed the what we call, the VEU is for you to understand the strength of, to

understand the position of your emotion and your soul. When you enter these systems, instantaneously you feel it, and then your soul will adjust to it, in the rhythm.

Those who have been in it, swear to it, and they confirm it, it touches them instantaneously, till their soul builds up the D of understanding, the D of physicality. You feel it in your heart, and you feel it, (:52). within the emotion of the brain. Those who have been in it, can tell you. Then you understand, the new D of the T&T of the man, will be different than what we have in the compression and jets, and .. the cars and the rest.

Now we transport the STM, the understanding of the strength of the totality, not in individuality, that is why the new flight systems, there shall be no death. As the death in physical D cannot exist, as you travel in the D of the STM. In the coming time, even what you call as a car transportation, will carry the same. Killing by accident, and car accident become a thing of the past, because in the D of the physicality of the transporting material, it sits, the soul of it, and then you understand 2 plasmas, 2 souls can never touch, and if they do they keep their integrity.

These are the changes which to come, and in the coming time as we open the centers of the knowledge and teaching, we'll expand. Those who came to test us, will test themselves. And those who came to fail us, fail themselves. In a way, mankind from now will open to a new D of the both, the soul and the physicality, and through the systems and equipment, which we deliver you get trained, you understand, and gradually you become the man who had no skill in driving and you become drivers. Then this time, (:54). you don't need a different certificate … driving license for a flight school, for a car, for a truck, or for aircraft, as there is only 1 license, one certificate, the certificate of the STM to understand how it transmutes itself, and how he manifests himself in different D and positions.

This will take time, .. evolution in the science and understanding in the D in the world of the physicality of the man, and not in the D of the STM. This is where we bring the STM, within the confinement of the STM and the STP to be part of, that in that D there is no need, except the understanding the emotion of the STM. Then the STP becomes that point of reference, and when it positions itself in respect to the soul itself, within that structure, it dictates what kind of physical understanding and emotional strength, that physicality will carry, in the D of the manifestation of the matter state, or the manifestation of the vision, or observation.

This knowledge has been hidden to man. This knowledge, now that man has to T&T himself in the D of the STM, will be taught, and many of you will learn, and then will enjoy the beauty of the creation, even at the time of the feeding of the STM to feed the D of physicality, that no man shall kill. That's the end of the cycle of destruction for the man, once man goes through understanding, (:56). and elevation of the systems and T, which gradually in the coming year will be revealed and released to man, to become part of.

In another word, we have come to a new year and a new cycle for mankind. For man to reach the position of understanding what we call, the elevation of his own soul. Many of you will be baffled by it, but many of you in the process of coming weeks and years will be educated through it, and you'll become the passengers of the U, not in D of the physicality of the man.

This is the promise we gave by manifestation and the birth of Mitra. Then we have seen the cycle of the man. Tomorrow is another Christmas for the Orthodox Church, and will be the change for many of you. Many of you will go through the phase of transportation and transmutation (T&T) of the soul, from tomorrow. There is a reason for it, at the time I will explain why.

We take that process, step by step in teaching the human race the next phase of T&T. As we said, it will be done in the 3 centers, which KF due to points of the energy fields of the U we have chosen, Tehran, AZ and Austria. One day it will be explained. As I said, when we came to show the manifestation of the fields, we chose Germany, Canada, and Italy. (:58). And now we have seen the same. We'll see that the manifestation of the 4th, which is the totality, is part the Star Formation, and where and how we position these fields brings us the strength and the D. It's not the D of the place, it's a D of the soul, who create the space and place. Then you understand the strength of the soul of people like John. People like Yosef and those in Austria who have been instrumental in bringing the change. It's not coincidental, it's chosen, a long time ago.

Humanity has reached a point of maturity, but how fast this maturity comes to manifest itself, it depends on its citizens, be it the plants, the animals, the stone, the man. As we'll make a man to be a stone, and a stone to be a man. If any of you have understood the strength and the knowledge of the Pl T. You made gold out of the energies of the Cu, and we'll make stone out of the STM, that it has no emotion, no feeling, if the man decides to go the wrong way. Till that soul understands the position of the strength of its existence. Now you understand what has been said, even the stone has a soul, as we can change the man's soul to be the physical stone, as he serves none. (1:00). And it is best to be at that position, till he understands the position and strength of the servitude.

I hope today's teaching opens a new D for many KS, and many world leaders (WL), and many of those who sit here to report falsified reports to the WL. And those who through their conduct have become that, what we call, phantom soul. Try to understand the teaching of today, then you have opened a new door not only to your soul, but to elevating the soul of the others, which is the most.

Then you might in so many ways, we'll see many of the passengers of the U, which are amongst you, you've been sharing bed with, or you have been eating at the same table and working in the same office. Don't look at them as a stranger, respect them, love them, and appreciate the way they have been amongst you, to serve you, and to be part of the society of the man.

Maybe man in 2022 will be enlightened to the truth about return of Methi. That it depends on the rulers of this world, and religious leaders (RL) to turn the tide, and make the man on this planet a peaceful man and a peaceful planet. This is our way and we'll achieve, as we have access to soul of all. But we always leave the decisions to be voluntary, than enforced. But in time they will change. (1:02). It's the year of Methi, it's the return of the Messiah, and those who believe in the completion of the cycle of the knowledge of the man. Let them battle it, as we know who will win the battle.

In so many ways, understand the process of creation, you will unravel the secret of creation, and then with it understand, that the creation is not only in the D of physicality, but in the D of the STM. Many of you will turn against yourself, and many of you will work towards that point, to understand more.

Try to understand the creation of emotion and not to look at the emotion, and that's the key to understanding the process of interaction of the STM and STP of the man, and the creation of Inertia, which leads to the creation of the man, how your eye looks, how your face is, what is the color of your hair, and what skin you carry. "I like to have the emotion of the beautiful dark brown skin, with the green eyes, to be 6 foot tall, and to be there with the beauty of my face, my strength, to serve those who I live amongst." Then you understand you become the true man, it does not matter on the position and D of the place, position or the strength. I hope I have opened a new door for humanity to understand what is to come in the coming year and there on. And with it, to create the manifestation of the presence of the Promised One. (1:04).

We go to a break, when we come back I'll answer any questions, which my soul has. Thank you very much.

Proofed to here >> continues

>>> BREAK >>> 414 KSW Jan 6 2022 (1:10).

Q: Stephanie >> It was mistake

Q: Ed, .. I am just thinking is our ability to begin to understand the space travel as we encounter the new D, and Inertias and stuff like that. (1:12). That it is dependent on our willingness to see and feel and understand the limitations of our physicality. I don't know if I have explained myself well enough for you to understand?
K- You've got to understand in a very recent teaching, I touched on something, that had no meaning to a lot of you, but some of you who understood that, will understand what it is, what it will be, and how it will be. I touched on the RNA and DNA of the M fields. One is the presence of the field, and one is the manifestation of the emotion, which that field carries. This when you look at the Pl of the STM, does not carry an emotion on its

own. It's a collection of the fields, and what we call, the emotion, which that strength carries with it, what we call, the RNA of the field. This will bring a 2 dimensional phase to man, where our physical soul D carries an information soul strength with it, which is connected to that field strength, which the collection has created soul, of the STM, or what we call, the information carrier of the man.

Where the fields we see are the DNA, and the strength of the information, which is carried at the RNA of that field, leads to its manifestation. So all the fields within the Pl of the STM, within the Pl of even a Cu Gans, (1:14). has, and do communicate, and interact, and collectively manifest that Gans as ?? ? of its manifestation of physicality. So is, in the physical D of the man. This is more of less, what as KS, as those who enter the space of the separation of the STM, and man, will understand.

Something which is on the side line, I will explain to you to understand. In the teaching of last Sunday in the American teaching, if you get a chance to listen to it, and in the other teachings, which we have been in the past 2 - 3 months, we explained the significance of 22nd of February, 2022. It's a combination of all the two's. It's not coincidental, that it falls on a Tuesday when the UC meets, or when you have your UC meetings in the public D. It is not coincidental, that it has been set that way.

The point of the reference of the STM as collective elements, will become the Soul of the UC, and its members. The D of physicality is the physical man present in that D, (1;16). and the maturity of the time and the point. It's for mankind to start a new cycle. Not only for mankind, but elevation, and joining of the STM to Universal Community will be completed on that day.

Then man has a choice, to interact and evaluate and respect, or still till next generation to live in the doldrums, that man as a race has lived, during the past millions of years, be it as what I call, the "screw in the holes," or as a man walking with intelligence and knowledge of the present time. Man is not mature, if the man does not understand the presence, the existence, and the beauty of his soul within his existence. Otherwise you are still that screw billions of years ago, as a mammal on the roots of the trees to hide from the dinosaurs, not to be eaten. Because nothing has changed in the intelligence of the man in understanding the true essence of the creation.

This process has started, and this process will carry on, and now is the time for that. This is what we said, it's the end of religions. Listen to the Sunday teaching, go back as KS and listen to the American teaching on Sunday (NACT 2022, 01 02). I could not explain it any better, then when we all in the D of physicality, live in the D of the Creator, (1:18). then there is no religion, there is no need for religion, when the man completes the cycle, all understand the totality. Then there is no place for the kings and kingships. The kings who bow to the religion having grown and accessed the totality, cannot be king in front of the king. He becomes like a jester in the court of the king.

This is what needs to be understood, this is the point of the completion of the man. Because when we say it is the end of religions, it has come - the end of Islam, it has come

- the end of Christianity, it has come - the end of Judaism, or Buddhism, or any other path of belief. It's once, we mature to understand the strength of the Soul of the Creator (STC), do we need messengers to tell us. Then haven't they served their purpose to bring us to that point. Do we need, for Ayatollahs, Popes, and priests and mullahs, and whatever you want to call, Rabbis. When our soul has matured to understand the totality. Do you use a taxi when you already qualified to be a driver?

This is where the maturity comes, where the understanding comes, and this is where from the 22nd of February, the maturity of the man will start. The cycle of the new understanding. The handing over of the process of, no religions, but belief in the Creator, in understanding the strength of the soul of the Mitra in the D of physicality of the presence. (1:20). Strange enough, every time I speak about this I get disconnected by those who don't want the truth to be known. When it comes to 22nd of February, when you understand the truth. When the cycle of understanding of your own soul becomes clear to you. Do you need a name of the religion to pray, to understand, to connect to your Creator. That's the end of the religions, that's without a doubt, you don't need a name to put on it, except elevation of the STM. The teaching of today, is for you when you reach that point, and you want to transmute yourself in different D, whatever ?? don't be frightened of it, when you achieve it, when you reach it.

It's in some of the teachings I explained, when we bring people out of coma, the first thing we do, we cover the front so they cannot see the body is still paralyzed. But the emotion has been returned to the physicality of the man. They get a shock, they want to move the arm and leg, they don't, and they go through a second shock. This is what we are trying to avoid with most of you. When you understand to see the power of your soul, don't go into shock, that how numb the physicality has been, and literally paralyzed to the strength of the knowledge, which the body carries. The D of his soul, not in the D of his physicality.

What I say, the sun of the truth has risen, and will shine. Nobody up to now has managed to put a blanket on the sun. It shines the same in the D of the knowledge, upon all its citizen in the Unicose, (1:22). irrespective of time, place, and the position. You've got to realize, even for those who are on the backside of the Earth, they still see the shimmer of the sky, that they can see through it, is because the light of the sun still shines on the backside of the Earth, at the same time, as different.

It's for man to mature, .. to understand the cycle, and to understand, that's the end of the religions in every shape or form, dimensions man has created a path to pray to his Creator. As now the man has matured completely, has the understanding, to understand, that he has the D, the strength, the .. beauty to be part of, to understand he is part of the Creator, and he has to live by his conduct. Always ask, you'll be given, and when you are given, it does not need to be returned back. because you asked for it, to be accepted. You asked for elevation of your soul to understand the totality, and if it is done with the pure sense of it, you shall receive it, you be opened to the eyes to see the strength of the emotion. You don't become the Creator, you just become to understand the existence of the Creator. You are not empowered to do whatever you like, you are empowered to

serve those who are created, by the beauty of the Creator. Never be, never ever imagine for a second, now you have become the Creator. (1:24). Then, that is the time when the light of truth will shine away from you, and you become that dust.

Soon mankind will understand what evolution and revolution, we have started within the STM, to right the soul, to free the physicality from the D of slavery, to the D of being a prisoner, and being imprisoned by not receiving itself. That is the beauty of the new knowledge. While the physicality of the man imprisoned the STM, the STM imprisoned the physicality by not letting it see, understand, and be part of the totality. Now is the time to release, both the prisoner and the prison, and then we'll see the elevation of understanding of the STM and physicality.

We are not preachers, we are delivering the light of the Creator, and will shine upon all the same. It is for man to understand. And those who work against us, they need enlightenment, not punishment. The time of punishment is over, it is how you enlighten yourself, and then what you claim with it, become the essence of the totality of the creation. I made man in the image of Myself, but I didn't make the man as Me. The image never becomes the true essence of the reality. It's very much to say, (1:26). if you're hologram can think, make decisions, and do what it likes because it is just a hologram of you. The same goes for it, it's hollow, it carries no soul. If itself, has not understood its own strength and power, then confirmation to its own existence. You just become a reflection of the light of the beauty, and not the beauty itself.
Any other question.

R: Thank you .. It's a very deep, deep teaching that you are getting into here.

Q: .. In the flight system would it be a criteria that first we would have to go into the VEU to balance the body, before we traveled?
K- For those who cannot do it themselves, yes. Christ did it without a machine.

Q: The flight systems I have had the privilege to see .. a bright star… (1:28). it had a twilight effect on the light … it was a craft of some sort. .. .. I listened to Sunday NACT, about the coming of the Promised One. .. Would he the Messiah .. need protection of any kind or would he be indestructible? …

K- Would it be right to say, watch the space and see.
Q: I am looking forward to it.
K- As I said and many Iranian KS who are here, listened to a translation of it. People from Tehran KF can tell you, people from different religious groups in Iran have already started assembling groups to protect the Methi, (1:30). on its appearance. So they are aware of the change to come. As we showed on the Sunday teaching, Iran's head of TV and radio, has announced that Iran's, Iranian governmental television will buy any right to show the time of the manifestation of the Methi. This is a public knowledge in Iran, and if the head of a national television confirms, that they are ready to buy the rights to show the time of the manifestation of the Methi, they know the time and the place, it will take place. Don't forget Iran is a deeply religious organization, and you cannot be in these

positions, if you are not connected right to the top with RL. If the RL expect such a change, such a thing to take place. As we say, watch the space.
Q: I did speak to some of the RL from Iran years ago at Parliament of World religions in Melbourne … They were very interested in what I had to say, because pretty much it is exactly what you are saying. So … they are very receptive . .15 years ago. … (1:32). Gorbachev .. I wish there were more leaders like him, it would make a difference.
K- We had leaders like him in their own strength. The ex-Shah of Iran, he exiled from Iran for Iran not to fall in a mayhem and a mess. As at that time if he would have stayed in Iran and put the army against the people, millions would have been killed. He took the crown and the thrown and left Iran, for Iran to keep its integrity. We've had leaders like this before, and we've seen it in other D, and different part of the world. Those who stuck to the power created mayhem.

We even see it today, in the beautiful city of Armati in Kazakhstan, how people are revolting against their leaders. It's the way the leaders manages. We had no problem with ?? from the time of the revolution to past two years, when he left office. To see beautiful city of Armati or other cities to come under such a pressure the past few days, due to mismanagement, and the leaders still wanting to stick to their guns, I t takes a big decision. I love city of Armati, I had offices there for years. It's one the most beautiful cities in Central Asia. (1:34). I traveled there quite frequently, and seeing it in such a position in past few days, it breaks ones heart. But leaders are sticking to their guns and the nation pays for it.

Gorbachev didn't take that position. As head of the Russian empire he could have stuck the guns out, but he decided to move out. And let the integrity and the beauty, it took years to build as a USSR, to stay as a divided territory of 14 nations, but they keep their integrity. That was a very big decision by him. This is how we see mayhem created. We saw it with Hitler, he stuck to the last guns, instead of ordering retreat, and letting the guns down, because he still wanted to be.

We see the same thing with the Rothschild's, it's the end of the Rothschild's era, and they'll fight to the last tooth, but their days are numbered. Because what they built as an empire, now they come to serve humanity without them. But they could have stayed and be part of that change.

Q: People power the governments have to listen to the people .. the young people of today will bring in the change. They don't follow too many things, not all of course. (1:36).
K- but the problem has changed in so many ways, it's 2 D. The youth want the new change, and the old want the change of the past not to stay. The older generation is giving a hand to the younger generation, if you understand what I mean. This is where the strength comes, it's from both ends. The old want the change for the new generation, who are asking for it. It's a beautiful time if the race of the man becomes mature to it.

Q: The Promised One will be bringing in the art of self-realization, that people will become to understand who they are, and eventually they'll do what you are talking about,

the soul connection, in time many will realize … they will understand their purpose in their life. At moment it is all about entertainment ..
(1:38). .. so your teaching …

K- … we are adding more and more systems behind, for security reasons. The position is that the WL come to understand, that they have no power, when it comes to the will of the man. The WL will come to understand, that they themselves need to be lead, through and by understanding of the UC. But the members of the UC have to understand, they have no power. They think that now, they receive the position and power. At that point is the time when they leave, or their physicality will take them out of the leading, or being part of. (1:40).

In general, we'll see a self what I call, sustaining system, where all know their position, and the responsibility of their position. Once we see the world religious leaders (RL) step the world leaders (WL) will follow the same. But then .. collective consciousness of the understanding of the work of the Universal Council (UC) through their soul, will set the scene. Then you'll understand new ways of communication, where people don't need to listen to, or attend the meetings of UC, to understand what they think, as they reach them without. The progress has been set, and over time gradually will change. We expect, and we foresee, and it's been set on the plan to be, the end of the religions through understanding of the people ?? through the strength of their soul.

If you are very religious you'll be enlightened first, and that enlightenment has already touched the Iranian RL, Ayatollah K of Iran, and the Pope, and the others. It's just how they can facilitate it, is their problem. As we said, they have to live 2 lives, the life of guiding the soul, and their own physical life. This is one of their biggest problem. This is one of the biggest problem. We are very open, we don't go against anyone, but we foresee the … acceptance, (1:42). of the new cycle, through the stepping down of the RL by themselves, and no one to take their seats, because once you confirm the understanding, then, and then it can be seen through it, how can you change it.

Listen to the teaching, especially the first hour of the teaching Sunday of the NACT (2022 01 02) those of you who have access. I put it in a very blunt way, and a very direct way, a blunt way, and it has not brought fear in the Iranian administration. It has brought joy, that they understand they are at the center of the change. And this time the change comes in a correct way. By not setting another religion up, .. sect up, .. another process up, but by setting ones soul's to be the guide, to be what I call, "the principle structure for the change for the STM."
Q: The coming one .. would not be for just any particular groups, he would represent everybody, all religion, all people of beliefs, and non-beliefs, so there would be no need for religion like you said, but there would be a transformation of spirituality, I still think there would be gatherings of many people coming together, .. in spiritual centers, maybe to study .. the soul teachings.
K- The beauty of it is, up to now, (1:44). the change in the D of the physicality of the man, was written in the books of the man, Koran, Torah, and the rest of it. This time we write with the pen of the STM, it has no books, and that's where the change will come.

And this is the beauty of it, when one is ready to open the book of the soul, it shall be written on it, the knowledge of the U. That's the beauty of this time, there are no books to be, and to follow, or a religion, or a name to follow.

If you noticed that's why we are called the Keshe Foundation, we are foundation of the change. There is no book written you have to do this, you have to do that. If you listen to today's front piece, which we put on about the soul, was deliberately chosen, where it says, "you care about the soul or what we call, the children, or the children you create in the D of physicality, and the children which are brought in the D of the STM," where now we understand the creation of the STP of the man's soul, is dependent on the man itself. Every time I ask Rick to play this, there is a reason for it in the teaching. Today is a very clear reason. The children of the man from his soul, and the children of the man from his physicality, has to become from the same school of thoughts and ?? , which has not been up to now.

This is the change, (1:46). and when you have that you don't need no one to conduct the STP to reach the STM, as both work the same, the same time together. Then is there a religion? Is there a need for a religion to tell you how your STP works and collaborates and cooperates with your soul. Then you need the teacher of emotion to sit in your brain and teach you this emotion and that emotion, that your emotions, what you control, but understanding the emotions of the STM.

It's the end of the religions, whatever shape they like, they can attempt to kill me, destroy me, there shall be no religion. Because we taught to mature the man, and man is matured. Once you let the cat out, there is no way you can get it back in the bag. And this cat is out, for too long.

Q: There is a saying .. there is no religion higher than truth.
K- It depends how much truth the religions have told us, up to now.
Q: .. Well for me it's not all bad, because it leads people to a point, and from there we don't need the ladder. I think it's not a bad thing, it's what was necessary to bring us to this point, a process.
K- You see when you are not after D of the physicality, you can be true to yourself and to the others, and everything else will come, when the time for it is there to come. We do our best to change, and bring the change, that a lot of souls, that cannot be ?? thoughts, can be brought up to see, by building of the , (1:48). new EC and the rest of it. There are not a point for ?? less for your physical body. In reality they'll be setup, to enlighten the STM when the man is ?? strength of ?? and then it will help his physicality.

This is where a lot of people misread. Many people have come and donated millions to the KF and I refused to accept. I said, if it changes your life you do, if you think it cannot be done, the KF is there to support the next step. I could have made a castle with one of the richest foundations, people offering us from lands to companies, gold and the rest. When we need it, when it is done, we take it, and it is used for its purpose. Otherwise, you build another structure like Vatican, with a lot of buildings and lands around. This is worth nothing, the lands on this planet. It's literally nothing compared to the totality we

have access to in the U. Why should we slave the man to it. From the beginning of the time when we setup the KF, from all over the world. You have been witness to it yourself. We don't accept, unless there is a need for it. And if we see there is a need for it, we set through the structure of the KF to raise it, to do it. Because it has no value, if somebody else has to suffer because of it.
Q: Thank you .. I have enjoyed the teachings up to this point, … (1:50). … I understand what you are saying is coming .. on the Day of manifestation. …

K- (We are) just what we call, universal travelers. Does not matter what name you put on it.
Any other question.

Q: Mehranez, … … I have sent Rick a picture .. (1:52). … it comes from the Tweet of Michael Moore. .. can't post on Youtube ..

Rick describes the picture. Huge crowd of people times a hundred .. .
Q: It was Telegram from Michael Moore. (1:54). millions of people seems like 40 million people of Iran following the rest of the body of general Sulamani. It's very unrealistic, even for me, I don't understand this phenomena. I have never seen such a unification of all classes Iran. something in their hearts cried in their hearts. Something like 40 million people. After Khomeini I have never seen such picture of the funeral .. Michael Moore wondering why we don't have such a mass coming for our generals …

K- There is a very big, big, big, question mark on these things. We get a grief shown by millions, we get a grief incited, paid for by millions. We have to understand the difference. Example of it is, literally we saw it some years ago when (Princess) Diana died. (1:56). We saw grief from a nation, and many places worldwide. Nobody paid for it, it was spontaneous, it was something people found a connection to, for what I call a victim. At that time looked like a victim.

Then we have, where we see a combination of personal grief, and then incited by those who add to it, we call it a crime team. Those of you who are Romanian know this, because it was explained to me when I was in Romania. You can actually go and buy people who go to funerals and cry, fake cry for the person, though they have no connection with it, to show he or she was loved.

We have to understand the difference between these things. Or what we saw in some of the funerals in Africa, people join the funeral, because at the end of it is food, they can get something to eat. You understand. So we are fully aware of these, both sides in all countries. And how it is envisaged and how it is promoted.

But we have to understand, this time the joy will come through the STM. We see, we hear ex-world presidents die, (1:58). ex-kings die, and it's just a funeral. Because they are just there. But when we all heard of the man, who we all found a connection with, died in South Africa, the whole, most of the people who were aware of his existence and what he suffered with, went to the grief, spontaneous grief, for the loss of such a man -

Mandela. We look at a nation where we see, and we look at a bigger picture of what we are, and how and the way they served, and what image was portrayed, shown to be. We can envision in many different ways.

What is interesting, I explained this to some of the Islamic religion leaders some time ago, .. for example, at the point of death of Mohammad .. what was the reaction in the Islamic world, at that time? What had no portrait of him, no explanation of it fully, at that time, how the Islamic nations felt, and how outside the Islamic nations felt, with what he brought. We have a phantom image of Christ, built up to be. We know Moses was hated more than any other prophet at the time of his existence. (2:00). Though we don't have any religious icon like Moses, who, what was hated more than anybody else at the time of his life, because of the atrocities he committed. They don't tell you these things, they don't put it out. Moses was hated more than Hitler at his time, because he did nothing but killing, that was in the promise. Then you speak to the Jews how they portrayed his passing.

We got to understand, especially now with the mass media, you can exploit, and exaggerate, but now we have to understand through our soul, is it real. We see people as our leaders, people who take us to the position of strength and power, and we go to the next steps, and we connect ourselves to it. But what … from outside. How much of it is exaggerated, and how much of it is ?? You know nowadays creating mass picture is very easy, mass numbers. The company in America has made this years and years ago and they used it in cartoons and movies, soldiers nowadays. When you see hundreds and thousands of soldiers and it is only a few, which is exploited and extended. The first time it was used in Lion King movie, that they could create so much numbers. So we can create numbers, (2:02). but what is the reality behind it. The man is loved, the man is respected, but how does a nation react to the loss of a leader, and how it is portrayed.

This is what we have to face, and from now on we can go within our soul and see how souls moved, got the new position, or understood more, because of the move of a soul, in different D. It cannot be exaggerated, there is nobody who can exaggerate souls and positions and the grief, and physical emotion of it. This is the beauty of the new cycle of understanding the truth yourself. Nobody can give you an image, we can feel it, we can observe it, and you can be part of it.

Q: .. it was kind of unification, in ever heart, they all had a part of their hearts trembling … was from very rich to small child .. he saved from all that … which they really admired his courage and humbleness … (2:04).

K- He touched many souls of Iranians, but outside of Iran he was unknown, except to Israelis securities and Americans. Do you understand.
Then he was made a martyr, which brought him more in line in Iran. People got to know name, they don't understand what he did. They can't understand, what he was instrumental in. People at this point they always don't do good things, they have to do some bad things to keep the good in position. This is what we always emphasize, in understanding both D of it.

Q: But people in foreign medias .. they remember him of a man who wanted to unify, peace … his humbleness, .. he is very good hearted, very simple life, with little money .. K- This is part of the structure of the Sepah in Iran. The people who through, the people in the Sepah, through structure of military in Iran, all live very simple life. Those who are benefited by the bribery of the arm dealings in Iran, yes, they have a very rich life. But we know the true members of the Sepah of Iran, live a very humble life, live amongst people, even their leaders live in small apartments amongst people. (2:06). They never separated themselves form it, and this is why, there are not so much people who understand, this culture of the ??? those who ??? Iran during the past 40 years. In the west we see people like this, Sepah of Iran, most of the leaders live a very humble life, extremely humble life. Those who used these people's humbleness, they made themselves a fortune. I said, in one of the things , now we have ?? … what we call the deputy of central bank of Iran, moving to negotiations, it shocked me, because we don't need, unless there are some peoples private finances in concern. When he appeared as part of the negotiating team. Yes, Iran has some assets that have to be released, but we know what other things are sitting behind it. I don't agree with it, but that is the decision of the government … We moved from the front line to the back again as advisors, and we monitor very closely. As I said, we did, when we run into problem, and Americans needed to be taught a lesson, or be told that is the information. On the 15th of December, at 11:01, we delivered a massive punch to IAEA and American administration and we changed the course.

Because Iranian leaders are still playing a game of innocent, (2:08). and not having, when Iran's scientific is extremely advanced. In so many ways, we see the change now. We still sit in the background as advisors, we still work in both directions, but we did our job. We delivered a massive punch especially to the Israelis government, on the 15th of December. We've seen even in the past few days, Israelis government has changed position about Iran's nuclear danger, because they know what we have against them, and what we have in our hand. Now everybody knows what we have.

You got to realize when we delivered the punch .. to IAEA in direct communication, which is recorded, they immediately they transferred the knowledge, as is the usual habit of IAEA, to Tel Aviv and to New York, "guys, Keshe has opened our hand, what are we going to do?"

We hold a lot of information to create a condition of peace, and when we interact, we don't need to be there to shout, we just punch it out, with knowledge, with solid evidence, and with nothing you can do. On the 15 December, when I, with 2-3 days prior I, with IAEA, when I delivered the evidence, there was no way you can dispute it, and the biggest lie of the state of Israel was on the table. Americans knew, we know, and they know the Iranian team carries the knowledge with them, but they are not mentioning it. It became a graceful time for Iran, (2:10). You have such a knowledge, you know what we done wrong, but you keep quiet about it. It changed the course of negotiations.

Negotiations will be completed very soon. But to be advisors, to be there in the background, to monitor a peace process, like what's going on in Vienna, doesn't need to be there and shout and holler. You unpin and everything else falls, and we unpinned it, with evidence. Iran is ?? that the others know they know. The head of Iran negotiating team carries the document with him, in his briefcase, but he doesn't talk about it. And they know, that he carries it and doesn't talk about it. And out of .. shame, you just go through the past week. The change of position of the S of Israel on Iran nuclear, it's not coincidental. Because it has no foundation, and we gave the "no foundation" to IAEA.

If you go … if you are a doctor you go and report the matter to the Medical Association. I am a nuclear physicist, I deliver the … information to the point of my reference, which is IAEA, as a nuclear physicist, and it cannot be denied. We changed the course, doesn't matter how you play it. It all changed on that day. IAEA doesn't know how to handle it. Because of it we see the peace process, we see everything changed the way we wanted it. These are the parts which WL, use it as a trump card to play it when the time comes. (2:12).

I never let alone, and I never betray my nation, which is One Nation is a human race. But when the children of this nation play games, as a father we put them right, we don't blame the others for the other things, and they work the way we want. It's the same goes, when we see the correct conduct we support it, when we see the misconduct, we put it on the table, and we did.

It's not that Iran is innocent, it's still playing games, underground bunkers, different things. But that is part of the progress of man. The Americans, Russians are doing it, and the rest are doing it. Now that we have invited the Chinese, Iranians, and Americans to work in all three .. research centers together, they have problems with it. Because they have now to share the knowledge in all 3 places, plus the Russians. Then what are we going to do. How are we going to share the knowledge, which is open to everybody.

The AZ center is the biggest punch in the whole structure of the KF peace process, because the Chinese and Iranians will be there, and they could not work together, everything was top secret. We saw how they put one of the directors of Huawei, locked up in Canada for so long. Now there is no intellectual right, because the right is given by the father for all to enjoy.

We see the process. Do we need martyrs and create crowds of it? Or do we become part of the process, that we don't need martyrs anymore, but we need those who enlighten the others. (2:14).

Q: .. I got the news that Forbes has stated, that in Iran in the past 2- 3 years, the number of billionaires has added to 250 ??? , which the Saudis have 210 and in Iran, in 3 years they have become 250 ?? billionaires (not talking clear)
K- The thing is, in Iran you can become a billionaire very fast now, because it's an evolution, industrial revolution. What was ignored, is got exploited by those who understood how to do it. This is part of.

You see, we had, suddenly a huge rise of millionaires in China some 30 - 40 years ago. New billionaires appeared. Then president Xi went after them how they became billionaires. A lot of them disappeared from the scene of the billionaires and millionaires of the work, because they got executed by the Chinese regime for stealing from the others.

In Iran the process of the new billionaires comes through the space of new science and T, we showed the pictures of the research areas, which Iran has developed. All these buildings needs billions, and needs people who support it, and they have it to spend. So up to now, they were ignored, because American don't want to show, that there is anybody intellectual rich in Iran. But actually, if you look, even in America, (2:16). look at the Facebook, look at the others and see who is behind it. How many of the Iranians are influential in these big, even in the medias, and other processes. It's not just the Iranians, we see the whole world has moved in that direction. It's not exclusivity, it's part of the bigger family, and there are new opportunities around the world, are there to create such a positions.

Q: it's not equally shared in Iran with the others .. the prices for low people.
K- It's the same all over the world it's not exclusivity … We have it in. As the KF I listen to a lot of things around the world. I see the same things in Mexico, Brazil, China, Africa, Central Asia. We have more poor people in N America, than we see worse then in Africa. It's not victimizing, it's the nature of the man, and the way he has chosen to live.
Q: .. people are becoming poor ..

K- I was passing in Vienna and I saw a food handout line, in center of Vienna .. people waiting to receive food packages. (2:18). It's not exclusivity of any nation nowadays.It's how the WL decide to do it. We live in one of the richest nations in central Europe and was not only the numbers of the people in the queue was shocking to me, we see more and more of them.
Q: Maybe it's a test. again
K- It's a test, sometimes you pass places and you don't realize it. If you go to the city of Linz not very far from the EC .. under the train station… There is written on the wall, what gives you the impression. "This is where the Jews were kept when they came by train to Linz, before they go to the ghettos, near Linz." Where whatever they did with them. It's so in the center, it's so up front that nobody notices it. They put a notice on the wall .. it's an arch near the railway station, where the Nazis brought the Jews, and the others, to be kept there before they went to the extermination camps. It's right in the city by the Danube, and it's on the wall. and we just pass it, we've become passive to what we done to ourselves as the human race.
Q: We have our hands dirty one way or another .
K- As long as we have WL we'll have this.
Q: It's ignorance I think.
K- No, it's a greed. Greed, of , more of a greed of financial gain. (2:20).
Q: Yes, and nothing to do for it. Nothing, it cannot be changed.
K- You cannot change it.

Q: I see persons around me and I can do nothing to open their eyes.
K- Because if they are opening their eyes, they have to make the change.
Q: No , nothing works.
K- No, because, that's what I am saying. If they accept, or they try not to accept, try to understand part of what you try to teach them, or tell them, then they have to change their way. And they don't want to, because where they are what they do, is satisfactory to them, it's what they want. When you walk around the streets of Paris, if you are connected, when you walk down Champs-Élysées, you feel, I've done that may times. It's one of my favorite places in the world to visit. I go there quite frequently, because when you walk down .. you feel, you hear the martyrs of the armies, who have conquered, killed, destroyed, and enjoyed the power of it. The clink-clink of the hooves of the soldiers with the horses, rings in the ear, I feel it through the soul. What that street has done to the world. How the Nazis drove down when they conquered France, and with it they killed so many. What did others do, down that road. Why do you go to Arc De Triumph, and top, and what do you see. Triumph for what? humanity killing more. On the other end you have the palaces and your military centers. (2:22). It's nothing but abuse of man, in different shape and names.
Q: Yes and justified.
K- Yes.

Q: .. I know a person who is ,,, very intelligent. Years ago he said, you cannot believe it but I really found that there was a Jinn who was working. He said, you make fun of me, but there is such a thing. Sometimes I think ..
K- What?
Q: Jinn is a creation, like a genie, or like Satan or something which helps some people with come conditions, and gives them power glory and things want, but they have to serve him unconditionally. One of the things they have to do for Jinn's, is sacrifice .. of children, humans, ..
K- I am not going in there. Let me explain to you. We call it, Jinn, fairy, the Devil, we say Satan, whatever. This is the conduct of the man himself, towards himself, and nothing else.
Q: What inspires man to kill freely .. (2:24).
K- The man, .. power. We had it very recently in KF. The top (lady) and was said to other KS, "we are getting rid of him for me to become the head of the KF." Power, pure power. We are not going to a historical point. There are KS on this line who can tell you. "I am going to head the Foundation, so him, to be the head, we have to get rid of him." Even killing him, even knowing how he was going to be killed, then I become the head of KF, and hand it over to Rothschild's, and the rest of it, and the abusers. It isn't .. there are KS on this panel who can tell you. Who have been told, we have to get rid of him, which is me. As the KF will be by inheritance, I will become the head, and then we'll control the KF. It is in KS today. You don't need to go to the time of history. Power - that's all. and that's why they were kicked out of the KF. Killing was no problem, because it gives you what you who were giving to your masters. We are around the same, as was mentioned in the Sunday teaching, of the passing of Fabio, that was part of it, to destabilize, to get rid of. It's just power, that's what Satan is. (2:26). You choose, there is nothing outside. It's you who gives to destroy. This is a very recent past of the KF, greed.

Q: .. every Sunday while we spray plasma water, we also wish for protection of our scientists. We try to do that. Because it's valuable.
K- We have to see and we hope, we do our best. We are trying to especially John and I, to bring the world scientists into AZ from all directions. In Austria, we have certain, no problems. We are using the AZ center outside the framework of the Markray, to bring the world space scientists, and things together in collaboration with a lot of things. We see it that way. It's the time world scientists have a center and work together, and no better than the new T.

Then once we take the taboo off patenting, and everything else out of the way, by example. In our communication with NASA and the .. American aircraft and space agencies, (2:28). and the same with the other nations we are negotiating with, to bring them in. It's very hard for them, that they have to work with another nation to share the T. But they come to realize, that without being in there, they cannot do it. So what's a compromise. We tried to set the scene, that knowledge has no value unless it is used for purpose of the perfect sharing. It's the same in Austria with Dr. Klaus and KF. It's the same pattern now Yosef carries in Tehran.

We make example of the excellence for space T, but not exclusivity of one part of the world, but as part of One Nation, doesn't matter where we are, we just go to London or Manchester, it's the same nation, it doesn't matter, we don't sign secrecy agreements between Manchester and London. If you are a scientist there. Now we are making it internationally that way. I know there is a lot of problem sits within the American administration, how to handle this move. We are sending Iranian space T, built partially in China, to be done in America, with the Iranian scientists, American, Chinese and the rest. The same in Austria and Tehran. It's a very hard pill to swallow. .. But if you want access to it, you have to yield to it. When you yield to it, you start sharing, and then there is no patents, there is nothing to confine or hide.

I am sure, I see the joy in, (2:30). with .. John. That how he is bringing everything together there, we are doing the same thing in Austria, and I see the pains which Yosef goes through in Tehran. By doing it this way we bring an end to patent business, because the knowledge is openly shared by all nations. Gradually the KF centers become like this.
Q: That would be wonderful.
K- It is wonderful because it is built. It's not a dream anymore, it's a reality. The flight system, 2 flight systems, 1 a week, is getting shipped to AZ, to Tehran, and to Austria. We have paid for it in advanced. .. now we are ready.

But the biggest problem, is that we have to combine a flight system with, not only carrying the physicality of the man, but the STM, the knowledge of the man. At the time to feed the man in both D, the soul and the physicality, while you're on the craft. It's not just we take you from A to B. In that process of A to B time, not only your physicality will be fed, your soul will be fed, to be elevated, but everything else within you. You come out of, even a few minutes flight from one to another, you will change. You'll come

out a just man, you'll come out the man who has found peace, does not take atrocities from one nation to another, (2:32). it doesn't matter where you come from.

These are not dreams, these are the system which are built extensively, even unknowingly our team in Austria is building it, because I never opened the door to them, what it is about to do. The EU the physical construction, the body of the car is built in China, thanks to WL .. The principle structure of the flight systems are built and developed in Austria. Part of the control system come from KF Canada with people we have there, we already invested hundreds of thousands of dollars in control systems in Canada, now for 2 -3 years. It's all coming to one nation, and freely. When you speak to the people, I watched communications between different parts of the KF, who work in researches with these kind of things. They share knowledge so freely with each other. They are there for one aim, to bring that change. It's not a talk, it's amazing how my ethos of no patent, no limitations was carried by the KS who work within the KF.

Those who came to benefit, and they escape and they build something, and they think they promoted themselves, and it's them. We've seen them. We've seen people who I taught personally, and when they found out they got something, now they went to the Russians and to others, to build a system in parallel with KF, and they're hiding on the name of .. scientific advisors, that Keshe doesn't know it, it's us who brought the T. You'll see we'll open their hands very soon. (2:34). But it's a shame on them because they could have received much, much more knowledge.

It's the same what we done with the Chinese government. They betrayed us on 2 - 3 occasions, Chinese leadership, and this is one of the reasons, we are not building the space systems in China. They have to go to America, because they betrayed the KF in the times we supported them. Instead of sharing it, and openly bringing it out. We done so. I kept a lot away from Iran, because of what they kept away. Since they start opening, confirming the knowledge to belong to KF in Iran, used anything, they used in the space defense, in the appropriate ways. We start supporting it. The knowledge of the KF belongs to its citizens, and its citizens are not only on this planet but beyond. You cannot patent the knowledge of the Creator. And you cannot control it.
Q: …
K- We were lucky enough to serve. We don't need the good luck. We receive the luck. Any other question.

Q: Salomea, … (2:36). .. yesterday in Plasma reactor group . the way and role of our soul in converting the energy from Pl level to .. in physicality. You said in MaGrav let the Pl to become free. .. after we have to allow this free Pl to connect with Gans .. matter state energy. How can we do this by creating the need.
K- The need for what?
Q: need for converting this plasmatic energy in physicality
K- I don't understand what plasmatic energy?
Q: .. from this free Pl. which is high level ..
K- I don't understand what you are trying to explain, you got to start again.

Q: .. for example we are in need, so we created the need, (2:38). .. because now we have a crisis of energy, maybe global level, but in Europe, in Romania we have huge crisis of energy, electricity is 5 times more … many people freeze because of this pressure. Now with our emotion maybe we communicate with Pl emotion to get and convert this high level of energy .. .

K- Let me explain 2 or 3 things. First of all what we see as a hype in the prices of energy consuming systems, what we see in Kazakhstan now, and in Western Europe is to make up for what was lost in past 24 months, with not selling gas, and not many people using cars. So they are trying to make up what they lost. It doesn't matter what happens to the other people. So it's a very fake situation. I have been watching this very clearly.We don't see they hype of the fuel to go to 4 or $500 a barrel. It's still in higher tens, it hasn't reached that threshold of, what even we had 4 or 5 years ago. So how is it created to a man who has been in the oil industry for a very long time, is very puzzling. (2:40).

It's just a greed of the nations to fulfill, what they already have abused. So that's one part of the equation. I don't see any need for the rise in energy prices. We don't have crisis. We had some shortfalls, which comes from the abuse of the finances by local governments … whatever past 40 years. Now they want to keep on carrying that abuse, how do you do it, when you lost incomes on taxation, with shutting of the factories, restaurants past years. Others have used this opportunity to jump on. The situation in Kazakhstan we see baffles me, because I used to be highly involved in oil industry .. and I don't see how they even came to increase the prices of .. gas and everything else, when Kazakhstan has more oil in reserve, 7 times more oil reserves than Saudi Arabia. This is not much know outside. Kazakhstan has a huge gas reserves. It's one of the richest nation, oil, but it is landlocked, so it depends a lot on the China and central Europe lines .. In the same way increases the prices in west due to Ukraine. (2:42). Russia is tapping it on. Because you pressurize somewhere we hit right where your nation suffers. We have seen part of the same process as part of the 5+1 negotiations with Iran with huge gas reserves which sits on the Iranian side ?? . Now ?? wants to build financial losses in oil reserves was by restriction. We cannot, they can put sanctions on oil, but the gases escape from it, because they need it in the west. Iran is one of the top, major producers in gas. So we see this is all fake need.

But when it comes to the STM, if you can teach yourself, you can divert energies. You can walk in the snow and still be warm. If you listen to some of the teachings, I always said, if you know how to use the MaGrav system, you can put it in the room and you'll feel warm. Does it matter to you, if the cushion on your furniture is at minus 4 degrees or 10 degrees. You are not there. And even that, can receive the energies from your MaGrav system.

MaGrav system does not go through the power lines. If you know how to tap to it, MaGrav goes through transmutation of energy. Go back to very simple teaching I put … I referred to it a couple of times, people left it, because they didn't understand it. We spoke about cascading MaGrav systems. It's not to transfer energy or increase the power in your grid, it's creating a dome between the 2 MaGrav systems, then you can become part of it.

Then it goes how did you make the MaGrav system? (2:44). People don't understand the depth of the teaching. Did you create a MaGrav system, that feeds your soul, that it gives you the energy, that you don't feel that hungry. Or did you make the MaGrav, that it is plugged in and heats up, a little bit of electricity, here and there? I gave you the cake, you were so busy you went for the crumbs. And that's why you ask this question, because you never understood what was given.

Q: of course I am a new KS and I can't understand all these things. our group have achieved something

K- They have achieved not much. … I know what others in Romania are doing, they achieved ?? much. What it is.

We are investing a huge amount of money in Romania, hopefully in the very near future. Hopefully, we are opening, if everything goes successfully, we'll open one of the biggest manufacturing bases in the world, in the coming time. If what we planned to go through. Part of the KS of the Romania will come into it. .. it's a massive project we have undertaken, and hopefully we'll know in next 3 - 5 months. It will be outside China, one of our biggest investments. It's done by the private funding of KF .. no one else. (2:46).

(2:48).

(2:50).

We are observers, we don't interfere. and we've seen a lot of things, claims .. this is the reason we opened the patents of the KF for the others to build on it. It's good to see deviation, .. extension. (2:52). it's part of the progress of the new T . Everybody adds according to their flavor …

(2:54).

(2:56). Rick are you back …

Or we call it a day.

I would like to ask the members of the UC and members of the KF, still support the soul of the negotiators. This negotiations in Vienna has a bigger scale implications in the future. (2:58). It will be important to many of us, many of us. Be it from the soul point of view, be it from the power, be it from leaders, religious circles, be it from the Vatican. Because partially the negotiation in Vienna is a fight between the Vatican, and the .. Islamic world. They see it that way, we know it has been explained thoroughly that way by them, that we control and we do.

I hope the Soul of the UC, and the KS are there to see this change through successfully, and then, we hope that we'll be able to deliver by, the whole knowledge in a very big steps, as we've seen today. If you understood the teaching of today, it's immense knowledge been shared, and needs a lot of time to understand, and some of the KS might have understand, or have understood a part of it, and it's a significant teaching, especially in the space, deep travel space, space travel through the D of the fields, and not physicality.

It's a huge… listen to it many times as you can, and see if you unravel bit by bits, ?? to you. But our teachings from now on, we taught about the physicality, the world of physics, then the world of Gans's, and then the past couple of years about the soul. The teachings from now on, is connecting the two. If you understood the teaching of today. Where and how you can convert. I touched this before in the last few months, but now we concentrate more and more on it, that we take the fear of conversion, the fear of what's happens to, if I travel with my soul, what happens to my physicality and the rest of it. In a way, we stop anyone to abuse the knowledge to put fear amongst the others, (3:00). as you become students and you understand it yourselves.

As I said, and we are very clear about it. We see the end of Islamic world, Islamic religion. We see the end of the Christianity, we see the end of all the religions. In a way, they complete their cycle, by affirmation of the new cycle, which is the knowledge of the Creator. It's not that we are going to abolish that they will never be there. It's just that they served the purpose to bring humanity to that point of change. This is very important.

As I said, … why we chose Iran in both religion and science, both in both D, as it is a key factor, not only it's the center of the knowledge, it's the center of where all of us, most of us, came through by blood, and then at the same time, this is where the sentimentality of the .. STM, through religion has brought a meaning for, and usually we start with the smaller stone. We could have gone for the Christianity, .. Sunni religion and the others.

We started with the biggest and the most powerful center of belief, which is the Shia religion, with point of reference, less than 5% of the Islamic world's religions, but is connected to the line of the blood of Mohammad. We have no blood connection direct to Christ or to Moses, in a way you're called Cohen, because a lot of people took that name of blood, and to any others. And so we go to the source. To the line of the blood of Mohammad, bless his name. Through it we'll bring the change. (3:02). And with it comes the change in the science, as we said, science and religion will go together from now on, because the religion is understanding the work of the STM. Now we understand our soul is part of us, it's very easy to take the rest with us, and with that will come an end to religions, and the leadership, and the kingship. As there is nobody bigger than the king himself which is the Creator. You cannot claim to be the king when you stand in front of the king, it's embarrassing.

Thank you .. Hopefully we'll see a new cycle in different ways shapes and forms in the next few weeks and months. …

END

415th Knowledge Seekers Workshop; January 13, 2022

Note: Transcription has not been checked by KF. Please listen to original recording. (Transcription by KF Brazil)

Quick index:

New FEU video flying; Soul will be free within system; Body doesn't move but your soul travels; Physicality surrounded by your soul; 3 points in creation of Star Formation (SF) - AZ - Tehran- Austria - soul of Mitra manifest itself as knowledge - not physicality; heads of NASA invited to join; UC & KS decide where to send the FEU; FEU and Knowledge has to be sheared only by nations - not behind closed doors; Churches & scientific organizations no longer exclusivity with Knowledge of Creation; Vision EU put on head to control FEU; Emotion of man become controller of FEU; Same system used for health etc even elevate STM; We'll make a scientist out of every man; request KS to help financial support of FEU; As Messenger I have delivered my message; KS responsible to get nation to except gift of FEU; Given the shell of FEU nations to work together - I give you the knowledge; (Man has been exported to different parts of Unicose) No more religions; KS follow own path - serving others ;

Soul teaching: (how the new human will be born)
UC has been created as the central soul of the STM, like sperm and egg essences gather from all humanity; UC as new soul responsible to setup new structure for the planet, Embodiment of all beings on planet - man animals Vertical and stones; February 22, 2022 (222) falls on Tuesday UC meeting ; Maybe Methi declares himself on this day; KS be ready for the change; Lion lie down with lamb killing comes to end;

End of Part 1 :

ENGLISH TRANSCRIPTION

(:21). R shows a new video flight EU moon 6th June 2022…. (:22).

K- … We welcome you back for another session of learning more and sharing more .. The video you see is parallel to what we are aiming to achieve this year. The body of the crafts are more or less ready, and will be shipped to Arizona (AZ), Tehran, and in next few days, hopefully. Then the technicians and the people who work in the background,

will endeavor to install all the flight systems within them, and hopefully by March to start the test flights. You have to understand, the new T is very much different than before. (:24).

As ?? to travel, allows us without moving from the position, for our soul to travel. This is one of the beauties with this system, you expect to fly in a physical craft. But at the same time of being in the same position, we can allow you, through the development of the T, and understanding the work of the U, your physical dimension (D), to allow your soul, free within the system. I mentioned this before in touching the subject, that you might see a light within the system. That light is the interaction of the energy of the Soul of the Man (STM) with the fields within the system.

In a way, as we heard in the intro, we open a cage. We allow, you trusting your soul to be with you in the D of physicality, within the encagement of the enhancement unit (EU). It's for you to get to know yourself better, to get to know your creator better. Then in the next test, and next time, maybe you will like to take it for a ride. In a way, in the new systems you'll see a combination of the new systems, which have been developed by the KF. In that process we allow your soul, .. emotion to take hold dimension and direction (D&D), where to be, what you want to be.

It will not be easy for many of you, and many will be in a way, surprised to see in the D of physicality, that now for the first time they are surrounded with their own soul. Where up to now they encaged the soul, but they can see the D of the physicality of the craft, which they chose to be in. (:26).

The whole structure is being within the space of your own soul, but within the space of the system. In so many ways, your soul becomes the sun, and then your D of physicality as earth, watches its back , watches its beauty. You don't need to dream anymore. You don't need to be there to think, I don't know if it is there or not. It will become important for many of the scientists who work in this matter, in the coming weeks and months, as many of our KS teaches them to understand more, for them to see the light of the knowledge, .. understand the ways to enlighten the others.

In choosing the 3 points initial, between Tehran, Austria and AZ, we allow the creation of the Star Formation for the soul of Mitra to manifest itself, in the D of the essence of the knowledge, not in the D of physicality. By her presence, and us understanding, that we are part of Mitra, we become knowledgeable to the knowledge of the Universe (KOU), in a way we become the mirrors of the knowledge. We reflect the understanding of that, to our souls in the D of our physicality to understand the totality.

In the coming time, very short, as we produce every week, and every month, around about 15 to 20 of these units. We send a unit to each nation. KF covers the costs, (:28). and with it we allow nation by nation, to become part of the space T, through the science and T. With it we take this to the next step. As I said before, it's the responsibility of the Universal Council (UC) to decide, which nation will be on the list, and the next one. Prepare the community and society for it to receive the .. the units. Initial 3 units once

they become in the hand of the 3 nations, and then the second lot, as we prepare 2 for each section, for each city, then we launch in. Every week it is the responsibility of KS to decide, which nation will receive the next unit, with it get the scientists involved, and involved in an understanding of the process of the development of this T.

We have put our request and invitation to the NASA head of every section to join us. At the same time, we endeavor to do so with many nations. Then we make space T and spaceship T as the knowledge of One Nation. So by mid-June we expect to see at least 30 to 50 nations having a unit, to be able to be part of, .. share knowledge and do it openly on the channels of the KF. In a way, we break barrier of science, .. of patents and technology restrictions. It is the responsibility of UC and every member of KS, if you consider yourself as KS, to prepare your nation to receive the next system.

The competition now for you as KS, (:30). to see how fast you can accommodate, get your nations to accept the first flight units. Then your nation, and your scientists add their own flavor, by adding the knowledge of the creation, .. to understand more of the knowledge of the creation. .. we make One Nation out of this planet. As we are the organizers, and what we see through. The end of this year 2022, we see that every nation on this planet, will receive at least one unit, to become part of, to understand the T, and at the same time to become part of .. One Nation OPOR. It will not be the exclusivity of what they call themselves, superpowers, but will be the exclusivity of every power, every man on this planet. By the end of this year as we develop these new systems and we deliver. We have the responsibility to bring scientists to add their own flavor and their own knowledge to it, but openly, not behind closed doors. There is no exclusivity. This is what we see, and how we see it. And it has to become a celebration of each nation receiving its unit, that it can join, be part of, and teach the others to become.

In so many ways, we have broken the taboo of exclusivity of knowledge of creation, to churches, to temples, and scientific organizations. It becomes the right of every man, the soul of every man to have the knowledge, in how we participate and how we do it. As I said, we have setup new organizations in KF, as consultants will come in, (:32). and through them, we bring in the space scientists, step by step. We try to see in the KF, as we are the financiers in the background, that every continent receives the same number of systems at the same time. In a way, we don't give priority, and we don't give a step upper hand, to the .. Africa will receive the same numbers as S America, as N. America, Europe and Asia, but with one difference, that all centers, the 3 centers, will become the centers of excellence. In a way, we share, … we together understand the T. The new space system, now that they are on the production line.

Then at the same time, as we already have produced a large number of the Vision units going through the final stages of assembly. We will allow each system to carry 1 EU, which, that allows the emotion of the man to become the controller of ?? man. We shall not see control panels as such, for the flight, but sitting the man within the enhancement Vision unit, man will see the vision of the U. "I want to be in NY," the system will take you to NY. I want to be in Tehran in such a street. It will take you to that position. I want to be on Mars, on such a mountain. It will take you to that position. So the emotion of the

man will become the controller, but this time it is the emotion of the STM, more than the emotion of the physicality of the man. The 2 will work together and we'll understand more.

As I said to our team in Austria, as they are putting the systems together, it will be a wonderful time to see how integration of what system, (:34). is being developed, will come to be used, the same system, for health. The same system for production of materials. The same system for enhancement of the STM, and .. for traveling the physical D of the man. Thanks to all the work, which is getting done, especially in Austria, and especially the work with Klaus is doing in the background, to make sure that everything is prefect. We chose the right nation to produce the systems. The nation of perfection, German mentality. Everything has to be precise and perfect. We see it coming up the lines, we see the production units coming in, and units to be shared.

This process brings a lot of pressure on you KS, not us. How to be far, and how to be correct, as members of UC per language and per nation to be correct. You are Italian speaking, does not mean Italy has to receive the first unit. What is other Italians, in other parts of the world, who have the same beauty and same position. In Australia, in America, S America, where this puts a lot of pressure and understanding, and why we put the members of Universal Council (UC) per language, and per area which you'll talk. You speak. Portuguese, but you are in Brazil, the member of UC for Brazil, has the same right as UC member from Portugal.

This is the way we run, we'll see run, because and through the application and delivery of the EU for flight, numbers of the members of the UC, (:36). people who would like to be there to serve will increase, and we have prepared ourselves for such a move. We will see the change, and the change is in your hand. These units are physically ?? built, and physically part and will be in the hand of each nation, as members of UC decide.

You have to prepare your nations of the language, ready to receive it. The responsibility of sitting back is over. You have to communicate with the members of the Earth Council (EC), for your section, and make sure that it is received, and they organize their facilities. From now on the members of EC may be called in to serve. Those who are not to serve, will be replaced.

Understanding the whole structure of the new flight system is the responsibility of every man, not every scientist, and we make a scientist out of every man, through simple way of understanding the structure of life. Understanding how we are created and how, through emotion we have additional what we call, tool, to understand more, to be more humble, and at the same time to serve, and become detached from the D of physicality. When we can travel the D of this planet through the ?? rays of the fields of your soul, would you like to get on a jumbo jet. We have seen many of them grounded for past 2 years because of the virus. And I am sure we will not see many of them flying again, once the EU flight system is in the position of the governments one by one. (:38). Many of your governments will be surprised receiving such a gift. But this is the problem of your nation, not the KF.

We need to bring the scientists together to understand, that the game of unification of man as One Nation, One Race, OP, One religion has started, and that religion is believing in Creator and nothing else. As I said, many .. countries will try to stop, will try to find a barrier, till they find a solution to their own way of doing it. We see the City of Vatican to be the receiver of one. We have many Knowledge Seekers (KS) within the 4 walls of Vatican. They understood the ethos, and they understood the knowledge, and now they have to bring the 2 together.

We'll deliver one directly to Tehran, and the other to residence of Ayatollah K of Iran, for him to understand, the term of the science and the religion has come together, and we so the same with the others, to Jerusalem, and to China. To make sure that, first of all, they understand, the term of what we call, separation, to be on the path to the Creator, is over, has come to an end.

This is the responsibility of the KS to make sure these units, as we release one by one, become part of your nation, part of the language, .. nation of the barriers and borders. There is a lot of work going on in the background, and for this unit to fly, it means for man to free himself from the shackles of the physicality. As a Messenger, I have delivered my message. As a man of science Messenger, (:40). I delivered the science. It's for man to use it, to bring peace to humanity and the rest.

In so many ways, the time of Methi has come, and every one of us is a Methi for our own D of physicality, and totality of the freedom of man, through knowledge, understanding, and understanding the process of the creation and the Creator. Not by the books, and by the histories, and by the rhetoric's that have been put on, for us to be diverted from this plan of totality.

In the coming weeks and months, as one by one, your nations receives one unit, they have to understand what are we going to do with it. As we saw with the Italian community, when we released the patent on the USB stick, they went to their parliament and they asked their government to accept the key. And we saw the rest of it. It's the responsibility to take this to your nations, to accept the unit, and appoint scientists to understand, to work with the KF through headquarters, to develop the T for them to become part of the space T, not to replicate, but to understand, and to add to, to become part of.

In so many ways, we're completing the knowledge of physicality, and knowledge of understanding the T. It is the responsibility of you KS, UC, and the support of UC, to take this to your governments, and deliver to governments. Accept the date of delivery, and negotiate with the KF, (:42). for the delivery. Each unit has been valued at 10 million Euro, and we support it, and nation by nation we deliver it. At the same time, it has to understood that every nation is responsible to guard it, and to teach it publicly, once you receive these units, you don't put them behind locked doors for scientists to work. You make sure, you arrange with the governments, and your .. public media, every development on a specific channel, of what we call, release to public.

People become part of watching it, how it is done. The way it is done, and then the knowledge becomes part of the nations, and One Nation cooperation. The Chinese can watch the Italians, what they are achieving in their unit. The same with the Americans, and the Africans. This is my goal, and this is what I came here for, to make man to work together, to forget about war, and keep him busy with the new tools of the creation, that he forgets about competition, for one to be better than the other, but to share equal. KF has preordered 100 units, 6 goes to AZ, Austria, and Tehran, the other 94 are for your nations.

Start dialog with your governments and we deliver. Start dialog with the universities to accept units to test flight, and we deliver. It has to be understood that you make arrangements with your universities, and your government, that the knowledge has to be on an open basis, and not behind closed doors. We learned a trick, (:44). from IAEA, we put a camera on top of every unit. Would you liked to be spied on like this, and find out which scientist is doing better, and the try to grab, steal, or kill. This is the reason we bring this out this way. It's your responsibility and the responsibility of your scientists to be open, the way KS are today. 94 units are there on the table for every KS UC member for the nation. Is the responsibility of you as the KS, to encourage your government to join the new space T and the gift. John and I we have discussed this, in a very detail. We understand that this knowledge has to be for everyone, and open to everyone, and every scientist on this planet. We will see no resistance when a gift is given, unless there is a what we call, a predestined reason for it. We do not want to see the flood of scientists from one nation to another to be able to access the T. Where they have it, they develop it, and they become part of.

It will become the problem of national governments to agree on the new structure of governing through the UC, and not through borders. Taxation to be understood, not to be necessary, where it becomes the expenditure of the totality, to make sure, (:46). that lifestyle becomes the same across this planet. I am not a dreamer, I deliver the T which delivers the dream. It's your responsibility as KS to see this dream to come reality, as we give you the physical units to achieve it. The T and the know-how will be lined up to be transferred nation by nation, scientist by scientist. By the end of this year, at least 100 nations should have access to be able, to be part of space T of today. Not the rocket and propulsion and be accused, of every other things except what the reality is.

This is my gift to you as KS. You waited for years to receive the gift, now it is on the table. When I gave you the MaGrav system you cajoled with the wires, you didn't understand the principle and ethos of the fields. This time I gave you the shell, and I give you the knowledge that goes in the shell. It's for you to understand this time the work of the fields. I see some people in the KF to take heed and lead this project very fast. Jalal, Alex in Canada, Alex in Nigeria, I see a number of other KS, especially in Vietnam to understand the T and transfer it to their people.

It's not anymore who, it's how. We transfer the knowledge collectively, all of us. Once the units arrives in AZ, Tehran and Austria we'll put cameras and we'll show live to every

nation. (:48). how to, and how it will be. We'll invite the world leading scientists to join us, and with it, we deliver the T, that how this simple system can change to transportation, to material production, or to elevation of the STM. I hope I gave you a very beautiful gift, for what you wished for years to do. It's not my job anymore, it's your job to make sure every nation receives its gift, and make sure every scientist in each nation has the right to be able to input their system. As we go along the following systems will be delivered one by one, till we achieve a process of understanding the totality.

Funding these projects is heavily burdened on the KF. We call on KS to support this project, because there is a limitation in what I have managed to support financially, and now it depends on you, how you do it in your areas. How you raise the consciousness of a nation to finance the projects, to become part of. And to be there to see.

We'll gradually increase the numbers, that it can be used for EU that the KS in their .. position they can show the evolution in science and T in the world of medicine, in agriculture, in growing pants within the systems, that one plant, the energy from it can feed the nation. In this process we'll teach you more, and than we'll teach you how to elevate the soul. We'll teach you, (:50). how to transport the man to different positions in the U, and bring back to show, what we call souvenirs of the beauty of the Creator, from us in other part of the U. As I said to Chinese friend, Chinese travel to London, they buy a souvenir, Tower of London … but when you turn it upside down, it says made in China. In a way, we make it, we send it, we buy it ourselves, we bring it back to show how far we have sent our knowledge, how far we have been able to export our beauty and bring it back home.

This is the process and it lies and relies on KS and especially the UC, .. has to understand how to accommodate this transition. Transition in a way to take the responsibility of the knowledge and ethos of the creation. The KS become the followers of the knowledge of the Creator, and no religion and no path, but their own. They decide, the way they serve, and the way they see the beauty in serving.

As I said, we are not replacing one with another. There shall be no more religion, but there will be a guiding line through the STM, as we have a soul in the body of the man, to centralize the soul of every cell of the body of the man, that they all work together in the body of the man.

We have created the UC to be the central soul of every STM on this planet. Once the UC, and the humanity in the creation on this planet understand this. We have created a new body, an embodiment of the earth, (:52). with all its citizens, in respect of the shape, color, path of belief, position, or what we call, the way to live, to be a man, to be an animal, to be a Vertical or a stone, has to be able for the man to understand and to guide.

The purpose of the creation of the UC months and years ago, was to create that cell, that soul for the whole of the totality of the human being. We bring an egg and a sperm

together, and by its division and expansion we create the STM, that the STM creates the physicality of the man. We did the same, we brought from every part of the man, to create the sperm and egg, to create that soul, and that soul is the UC. Now it's the job of the UC to give shape to the structure of the planet, and with it to bring mankind to become part of the bigger structure, in the cell of the body, of the embodiment of the Creator, as a U and Unicose. Now we understand the process of the completion. This EU brings you to the point. 94 units available to 94 nations and more. It's your responsibility to make sure this is done. It's the responsibility of the KS to bring the change.

There is this one coincidence as I said before, not accidentally, but intentionally, 22nd of February, 2022 (:54). falls on a specific day. If any of you checks, and you go on your calendars, you'll come to understand exactly what date is, and what that date means to many of you. 22nd of February, 222, falls on Tuesday, on the day of the meeting of the UC, and the day of the change. Of the man to understand the position and the time.

As was said, maybe, maybe Methi will declare himself on that day. It's the responsibility of the man to be ready for the change, it's the responsibility of the man to prepare the mankind and the WL for that change; and it's the responsibility of the man, that the change through science and T and ethos, has been delivered in both D the physical and the structure that the soul of the system will create.

The new enhancement flight systems is not just for the flight, it's for the flight of the freedom of the STM. It's the responsibility of the UC and KS, to make sure every citizen of this planet, every created things on this planet, has equal opportunity to raise his soul in the level of understanding. Where it was said, the lion will live in the same den, in a way, it's the den of knowledge, the soul of the lion and the lamb, and the man will understand the same, and become of the same essence of the source of the knowledge of the Creator. (:56).

Then we understand. As I said, would you eat your brother, or would you kill your own child, and that the killing will come to an end. In time, man will mature to move on to become part of the Universal Community, and use the fields of the U to survive, and not to kill to become part of. When you look at this video again, I hope Rick can play again. You'll see the way man from the darkness, a ray of light, and to show you how, with that ray of light, man can become part of the Universal Community by flying into what it call, the womb of the Creator and the creation. Thank you .. and I could not give you a better gift and knowledge, as what I have done today. We go to a break .. try to answer question what ?? have..

Proofed to here >> continues

>>> BREAK <<< 415 KSW Jan 13, 2022 video new flight (1:04)

K- Strange enough the 414 was last time when we closed, and the 415 today which is 1, is the beginning of a new cycle. It's just about the right thing, but unfortunately it's on the 13th of a month, which could be a bad/good for some and a bad for the others. But it's a good mixture.
R: At least it's not Friday the 13th … We've had a broadcast on Friday the 13th before.
K- We've done that as well many times. ..

Q: … Based on the US analysis of the Dead Sea Scrolls, Jewish scholar, Dr. Paula highlighted 3 points. 1) at a certain time God will build a new temple. 2) Sons of God, Sons of Light, and Sons of Darkness, found there in Old testament manuscripts, (1:06). which did not exist before, but which nevertheless had been used to write the New Testament. He found this very surprising. 3) two Messiahs and a prophet will appear. One of the Messiahs will arise from the royal lineage, and the other will be a priestly Messiah, arising among common people, they speak of the salvation they will accomplish.
Questions:
1- Has this temple ever been built?
2- How to herd these children of darkness into the light?
3- Have this prophet and these Messiahs, and the Anti-Christ ever come? And what family is this royal bloodline?
R: It's a pretty big question .. maybe I need to ..

K- It's very simple. The temple is the STM, the temple of the man himself. Not the physical temple. And bloodline lineage, the king, or what we call, comes from the Creator - not from the man. There is nothing Anti-Christ about it. It's everything which brings an end, to not understanding the Creator. If you believe that the Christ was the son of the Creator, then, there is no need for anything more, then to understand the teachings, not the man. I think I answered you in totality with all your questions.

The temple you are looking for, is the temple of the STM, (1:08). which actually is the physicality of the man himself. You build a temple to keep a relic, or statue, or a belief in it. That temple is the body of the man. And the relic, or statue, or what you want to pray and believe in to, is the STM. This is what you never understood. Those who did not understand it, but saw a weakness in the man, abused the man, both on the physical and emotional side. The rest, I think you can still understand the rest of it yourself. The kingdom is his and nobody else's. So you find a lineage, or line, or whatever you like to believe. We are not making another temple, and we are not making another religion and a ?? fake. We are enlightening the man for him to find his temple. When you can reach every knowledge of the U through your soul, do you need a temple, except a belief, the understanding of the Creator, and his knowledge.
Any other question.

Q; … Is there any relation between the sleep of the physical body and transmutation? (1:10). How can we understand the state of sleep of the physical body, which is a moment when the soul moves away from the physical body, and when moving away from the P body, the soul manifests itself anywhere? And why don't we have control of our sleep? K- You'll find out in the space we will not sleep, that's for sure. We rest to recuperate from the transition of the fields within the body of the man. We have tuned it to the time of the darkness, or night time, most of us.

In that process, when we are in they space there is no day and night it is continuous line of life. The process of the regeneration and absorption of the fields from the environment will not allow man to, not allow, .. man does not need to rest to recuperate. In that process the STM and STP, are always co-working, they are together. Now when we say the STM is freer, it's not let free. It's freer to travel the span of the what we call, creation when the physicality is recuperating and is the weakest, is what we see, what we observe.

What does it mean the STM escapes from the body of the man. It is still, it expands beyond it, but the physicality becomes part of it. This is what, and this is one of the reasons we remember part of our what I call dream. Where our soul interacts with the other souls, and communication, (1:12). between the boundary and its center, our body is in the middle of it. It doesn't escape. There is no escapism in this process. It's becoming, encircling it.

When we are awake we encapsulate the soul. When we go to sleep, or weaken, what we call, the strength of the fields of the physicality, then the STM increases its dominion, and now, if you look at it, here the physicality was (on outer boundary). Now the physicality comes within (the soul). As the interaction of the STM with the other souls, takes place, because it's a field interaction. It creates an emotion between the boundaries, like when you touch a fire, you feel it. It sends the emotion to the center.

The STP of the man, is in-between. So this interaction between this and this, what we call the boundary, the interaction with the interface of the STM, when the body of the man, weaker, with its center to communicate, man picks up some of the signals, we call it a dream. Now we are encircled. Where in the time of what we call, awake-ness, or being there. This still functions (body with STM in center) this still has an aura of it, but not so much, as it is, at the time of the sleep.

So in a way, we don't let loose anything, we just understand it. (1:14). Part of our teaching is for you, this position (STM expanded beyond the physicality). This cycle. Man up to now has lived in this cycle. (STM encapsulated by physicality). But now we can control it. Then you can communicate with the soul, with all the souls around you, where you don't need physicality. Physicality has a D, vision, what we call, maybe sound, but with the soul, you don't have that, you go beyond, and through the fields you interact and ?? communicate. And these are the same with the others.

That's the difference, now this is what we understand. We don't need to encage, this is especially, .. what we'll see with this, will be, when you go into the EU. This is what you will see. This is what will baffle you, as light. And one thing for sure not all lights in the D, inside the EU, will be the same color. Because this in a way, you will show part of your emotion.

This is how we interact with the others in the U, from the interaction of the fields, we gather their emotions, what they think, what they want. What is the reaction. That's how we see the dream ?? ourselves.

So in this process we'll see different colors, we know the true intention of the man inside. (1:16). When you ask, are you in love with the Creator. and what is your intention with your work? I am a Ayatollah or a Pope, my intention to rob, and deceive the humanity, will show a different color, then the one who says, "I am here to serve humanity," and we know each color what it means. There will be no one lying into the machine of their own soul. Then you ask the WL to enter these systems, and then you see the true intention of the president or the king, rabbis, the Ayatollahs, and the Popes and the priests.

It's not a lie detector, it's the true intention of life, explanation. I wonder if once the units arrive in Tehran and we ask the Ayatollahs to walk in, how many of them walk in, or they'll call it a "Satan" system, because it unravels their intention. The same in Vatican, same in Jerusalem, and in China. Then people understand, the man who has nothing to hide will walk in.
Any other question.

Q: .. many loved ones are asleep to the truths, (1:18). that you bring. Are there people who will not change D with the return of the Master, and Messiah. Loved ones of ours may be removed from us in different D?
K- Nothing needs to be removed. The enlightenment will hit everybody. The beauty of the whole process is that, the line of communication is taken out of the hand of, what I call, Media. With the presence of the Internet, and the way knowledge is shared across people, what they control as what we call, television and media, is out. You got to understand, many of those who are the decision makers in these fields, in what I call, Internet media, or the televisions, and radios, they themselves become subject to judge their own conduct, and then they have to change.

We learned something very special in how monarchies will bend, and how monarchies will change to stay a monarch. It's the same with the WL, how they will change to stay in power, but they'll find out they don't have much. We saw it on a couple of occasions, when populations turned against the regime, the kings and queens, and how to survive, they had like chameleons, to change. We saw that with Tony Blair and the Queen of England, during the death of Dianne. If Tony Blair would not have interfered in a deeper way, that he went, there would have been no monarchy within days, (1:20). in UK. Monarch had to change, and monarch had to come out to say a lot of things, to stick to the power, with it they showed a weakness, and with it, they lost the power to Vatican.

We have seen this, because they want to stay in power they change in any shape or form. But population will change it. The force of the knowledge in the hand of people, is the biggest tool the man is given with this T. You can do in your living room. As I said, we don't need to imprison, or assassinate any WL or scientists, we just elevate their soul, they imprison themselves for their conduct.

You will see the change. The change is on its way, there is no way to stop. We are not negotiating with governments to accept the new flight systems. We are telling them, it's coming, do you want to be part of it, or they pass you. What do you think their answer is. It's the same with the Americans, Russians, Chinese, and the African nations. You can not ?? ban your nation, to become a developing nation openly. Then we are on the way to deliver T, that brings the change to the STM and with it to the D of physicality.
Any other question (1:22).

Q: .. If you detach from the physicality to travel by the soul, do you get to keep the RNA and DNA? I want to stay a product of my beautiful parents, or does your physical body become transparent within the soul?
K- More or less, yes. You don't disappear in the D of physicality. The physicality gets encircled by the soul. Why, what are you afraid of? You have embedded and you encircle the soul, and you say you know better, and do everything. Now that the soul has the knowledge, and not the freedom, but the knowledge of super-passing you, and you become within it, you are afraid you cannot do what you have done up to now. Or you might be afraid of what you have done, that the soul might aspire to show.

I encourage and I invite the world religious leaders to walk into these systems, and to elevate their souls. These systems are not a judgment system, these systems are there to bring man, to a new level of understanding the knowledge of the Creator, and the creation. (1:24). And that's the only difference.

We have nothing to fear, if we live one life. I have nothing to fear, I live very openly. With it I have no fear. I ask and whatever I am given, I take. When it's taken from me, I let it go, because it was taken from me, without me being asked for it. This is the difference that man will learn. The next cycle has started. You got to realize, when we announced, and what is going to be delivered from today, 1 unit on a regular basis, 3 units to round about a unit a day, to go to one nation. Nations cannot stop the development. You worked to make the MaGrav units at home, you worked to make the enhancement, the different structures we showed you, in the garages and kitchens and your offices. As one ambassador said, my ambassador office has become the research lab and I sleep in the .. launch.

This is what it will become. We are not forcing nations, we are gifting nations. It's a big difference. It's the responsibility of the KS in that nation, to encourage the scientists to explore more, but don't hide. To intentionally open up the challenges, (1:26). of the knowledge that, how much we understood, what can you add to our knowledge.

Superiority in the nation will come from its knowledge, not from its weapon and power anymore. How much they will share that knowledge, not by hiding it. In one of my latest communications to NASA chief flight officers, has been very simple, join us, bring your teams, and we work together with the Chinese, Iranians, and the rest of the world, to develop this T beyond the present understanding of the present time. Because they know they are working for 2030 launch to Mars, and half of the things they are doing, they don't even know what they are doing it. They are hoping by 2030, a solution will be found that they might get there in 6 months, where they can get there within hours. The bait is too sweet for the NASA scientists not to walk away from NASA. And at the same time not to bring NASA to be part of it. Bringing world space agencies to work together and then the scientists, is not a big challenge. The challenge is man, that trust his own soul to become part of it.

We today in negotiations between NATO and Russia, "do not come further into my territory, and I keep myself a good boy." With our T we invite you, come into our territory, because I can show you how better our scientists can serve the others. (1:28). The game changed, it's not a competition, it's a challenge to share. Then you understand how simple we get rid of patent. Because the old T, has no value, their patents anymore, and the new is not patented. So it becomes common knowledge and change in direction and D.
Any other question

Q: Guatua …
K- I promise you he wants a unit for Kenya, He always battles with us that Kenya becomes equal to the others. talk to the UC if the UC agrees you'll receive one.
Q: … thank you for delivering your promises …
Given that the centers for excellence will be built in specific way … (1:30). .. How do we approach governments. do you have documents we can deliver to governments
K- These documents have already been drawn up

(1:32).
We have to know where it goes that we don't give it out in public. The same with the CO2 business plan …
(1:34). kept and a business plan was drawn out of it. If we see another need for it we'll come to it …

.. You don't get a copy till we have a communication with your government, that's very clear. We've seen it to be released and it damages our work in the long run through the other people who try to stop it. When we negotiate with the governments it is for them to see what comes. We clearly do not release these documents to KS, or people who negotiate with governments. When KF through you, speaks to the government we'll release it to the minister, to the officials that official steps can be taken, (1:36). in respect to it.

Q: … Is there an update on the Vienna talks?

K- The update is Ayatollah K of Iran on Friday approved, that the talks can start with the Americans. That was a big step, and we were expecting this. We announced some time ago, we expect .. You have to understand how the talks are measured in Iran. How the talks goes effects the exchange rate between the dollar and Euro in Tehran. There are certain things short and long term that we look into. ..
Long term, around September, the whole thing started last year. In pressurizing … the Iranian government to issue an execution for me, by the people who we kicked out a year and a half ago. They delivered 2 TB of information to the Iranian securities, that I am a spy for the Israelis and the rest.

The process of integration of the KF into the Iranian T started by the Iranian G about a year and half ago. In that process we saw about the 10th of February releasing the T to be part of the KF in Iran. We responded by opening the KF factories, negotiating to start the other offices in Tehran. At the same time we keep a very close integrated program and connection with the American, IAEA, and in the back ground with the Chinese. (1:38). We cannot succeed in negotiation, if you do not keep a brace of everything. In the past year and a half, by a person who has been appointed by office of AK, to the KF, we transferred all our views, and the way the negotiations has to be handled. In writing to his eminence AK, voice messages directly to his office to A K to him personally, we gave the way the negotiations have to be done. .. .

(1:40).
.. We should have entered at a point of power, not a point of weakness. But at the same time the way Iran went into negotiations, at a point of weakness, they saw a benefit for it, be it personal to some Ayatollahs, be it collective .. .

.. We saw Americans misuse this position, we entered on 15th December directly with IAEA, bypassing American government to give the message to the Israelis, British and Americans, we know you lied. As our people said, immediately, within hours, Israelis changed their position, because we opened their hand, how they lied to the Americans, and IAEA, Iran possesses and is headed for nuclear weapon T, when Iran is heading for space T in the most advanced way.

This changed the position and we saw last Friday, the Ayatollah announced that Iran can negotiate with America. (1:42). We'll see the negotiation will take a new shape in the next few days, and we'll reach an agreement. The agreement will be reached before 22nd of February in the background. If you go back to the words of AK in September, he expected to see a complete conclusion to the position of negotiations before 21st of March, which is the Iranian New year, that he delivers a complete .. program change of Iran, back into line with .. the nations, and we expect at the moment the dollar is around about 30,000 Reals to months to the dollar. We expect it to drop below 12 to 13,000. It's the forecast of the government the same. We see a massive devaluation of the currency, and then we bring it back into it.

But understanding we've done our job now we move back into share the T rapidly, that we give an intensive, a pressure on the governments to start working together, to overcome the sanctions and the rest. More or less we hear the same thing from Mr. Barberry, don't forget being the son-in-law of AK he directly communicates every move with his father-in-law. It's the same with the minister of Iran. Don't forget ?? the Iran PM is a gentlemen, who if you look at the report of the Corona in 2020, he said, in cooperation with Iran National Defense University ..
(1:44).

KF cannot takes side, but has to be correct on either side. So we see, for the first I clearly explain everything, so you understand. We received a lot of pressure, a lot of lies, 2 TB was delivered to, through Dr. Assardy, who is the biggest spy, we actually know he works for the Mossad, the Israel intelligence, deeply. He the same as miss, what you call it, communication, created that façade. But the Iranians saw through it. Now we are going through a lot of things delivered by a guy in Germany, Iranian, working again for Mossad in the background, catching up, and linking up with the pathetic people we kicked out a year and a half ago, trying to get the Iran national .. intelligence in the Parliament, against the KF, but does not work. We've seen it. We'll give more of this to you. And we see how these people actually work in the background to the benefit of the KF. The peace will take a new shape … it will come to a conclusion, because now through his son-in-laws AK has taken full charge, (1:46). of the negotiations. …

The peace process is complete, this is why we asked the UC to support the soul of the negotiators, because through it .. especially the Iranian team, (1:48). we support AK soul to bring that delivery of the T & science together and religious understanding of the peaceful nation of Iran. The negotiations are complete as far as we understand, and now we've done our work, we sat at the team of advisors. We advised the team 1.5 years before the negotiations started …

We are very confident . but maybe the west will benefit more from it, as more advanced T from Iran will be delivered into the west, that will bring everything forward. What we call the EU in AZ is part of the peace dividend. I would not have delivered the EU flight system to AZ and the VEU to AZ , if we were not sure, 100% the negotiations have taken shape the way we wanted it. This is the peace dividend. The negotiations are complete, we took a step back, as we are preparing the next step that Iran can catch up after the agreements have been reached.

You got to understand we are there to support, as we done, we started with KS some 9 years ago, when Obama reached for the T, and we started the 5+1 negotiations. Now we done our job, and now we pay off people who worked to bring the peace, and the pay off is the transfer of T to US, and all the nations the same.

We achieved what we came here for, and we'll see in small ways, (1:50). because the politicians have to do their work, the benefit of the new negotiations and the teams. We saw the Koreans to be in Tehran because Korea wants to transfer a lot of T, and needs a lot of Iran's gas reserves, and they want to be part of it. So they came to Vienna to pressurize the Americans and Chinese to release the 7 billion funds of Iran kept in reserve, but already most of it has been used in supporting Iran in different ways by South Koreans. You got to remember we were in S. Korea over 10 years ago, and there is a lot of work in the background, which takes shape and does work, and S Koreans understand the benefit of new transfer of T.

Negotiations are in a good way, and more or less as far as we're concerned they are completed. We don't need to be there, we've done our work. I send private messages both, as was requested, in writing and in voice messages to AK the way we want it to be done, and we advise the government, and it's been kept in the future the office of … AK will release these voice recordings, and what we wrote, advising them, many of it , has been listened to.
Q: ...

K- A lot of good things, a lot has come, very soon. As is said, we already have transferred part of the KF space T into US. We are not waiting to happen. And Americans know we have done that. They understand that was part of the key part of the negotiations. (1:52). Transfer of T not by word, but by hard, what we call, by hard materials. That was a very big step for us to make that decision. In Austria we decided with John, it was the time to move, and we moved, and with the knowledge of the Americans, we transferred, we shipped the materials, which is on the edge of science and T to the US, in the, after signing of what we call, the peace negotiations are on the right track. It's not waiting to happen, we have already started it to happen, because the T is already in US.
Q: Thank you… we now welcome the new enlightenment very soon.

Any other question

Q: .. What is it like flying a spacecraft with your mind using the consciousness assisted T? Will there be a plasma communication device to go with the ship?
K- Everything is there. Of course, you have to communicate you're arriving, and .. when you leave. It will be the same, yes. (1:54).

There are a lot of T which are transferred and is getting produced in our labs, which even our lab people do not know, they are just following what is being setup. In time they'll be integrated into what it is supposed to be. It's just like a piece of jigsaw, it's all been made, it's just putting together. At the same time in AZ, Tehran, and Austria. together at the same time. Then you'll see it when it is delivered as a whole.

The T development by the KF is not what you see in the teachings, does not exist. We never allowed it to be coming out. we never, it was a decision made by us in the KF, what we call, production and management to keep it. We understand why we are keeping it. We keep a very close .. open talks with John, Yosef, and Klaus and that we all

understand the reason … and way we are doing it, and we keep a brace with WL in China for the Chinese officials, and we allow for the KF as the Head of the KF. The top management of KF ….. and what we expect the outcome to be. In a way, everything is getting done, and all the top people involved and concerned are kept a brace of what is and the way it is setup. (1:56).
Any other question

Q: Salmea … I would like to send a small message … because Methi will come .. (1:58). …. I am free from my work .
K- thank you .. indeed
Are there any other questions

Q: How far are we with time formation, (2:00). for going forward and backward in time. I am looking for others to develop such a device, if it is not already developed?
K- Time backwards, this is what I don't understand. You cannot go backwards or forwards in time. The only backwards time man can go, is through what he has embedded in his memory. But there is no machine to go backwards. If you understand the true science of what we call matter physics, or plasma physics. I explained this in very detailed way in one of the teaching some time ago. If you are looking at physical backwards time to see the past, unless you go through the memory of the man, it is impossibility. Tell you the reason why. This was brought up in a different way to the professors of Jeddah university.

If you have a man standing on planet earth, and this planet is moving 1,600. Then the solar system inside, is moving at say around about 10,000 per hour. If you throw a stone up, and you watch the stone going up, the stone doesn't land here, it lands here (different place) or be by the time to land, at this point. Then you understand this vision has scattered around (because of the rotations).

So for you to be able to see this 1000 light years away, as man says, is impossibility, because it will be scattered in 2 dimensions, and galaxy dimension. So we cannot see the past. It's impossible for us to ever see the past, (2:02). except in the memory of the man, if you can visualize your memory. So going back to the future with a system to go out and watch it, is literally impossible. But you can put a STM who has been witness to a composition, to an event, that through the STM, through D of transmutation of the RNA of the soul, and RNA of the physical D of DNA, then you might be able to see the visualization of exactly what the man has seen.

So if we look enough down the line to find people who were witness to crucifixion of Christ, they can tell us exactly how it happened, and we will see it, in a vision of the memory. Don't forget, when you have a blue eyes, brown hair, white skin, and then you give the same to your son, to your daughter whatever, you transfer that to DNA, but DNA carries the RNA with the information. What did this blue eyes (of the father) see? And how did the hair felt, how the physicality was conditioned in that time and position, is written, memorized in the fields of the RNA. So if we go down the line enough, or at the present time in the knowledge, find people, especially who never left Palestine. It's very

crucial, the race, which never left Palestine, and were witnessed to the ancestors through RNA and the DNA, the crucifixion of Christ, we will see the actual image, the actual physical D, (2:04). of what they saw in their eyes of crucifixion. Then we know if it was true, or were they just people standing on a path as Christ went, seeing, carrying the cross. Did it actually happen, are there other witnesses to it.

Many of the historical things, which man claims through time of history, through RNA, with the new T, will be unraveled. I said that years ago, every action of the man is recorded. And in time the man of space, we couldn't say the man himself, will show it. Now you understand how it's done, because we have the T, it can be delivered. Sight of vision and sounds, through RNA and DNA, is never erased from the STM. Because this is how you see a man, and you recognize this is your father, or your grandfather, that passed away decades ago. So the same thing goes further down the line. Thousand years is nothing in what I call the cartridge of memory, of the man's memory disk. In our RNA and DNA we remember part of the creation of the U, if man knows how to do it.

As I said, yesterday in Rick's teaching, that the new T brings us new D. If you understand it, we can create what has been up to now, .. (2:06). One of the problems we have had .. Up to now if you go back a few years ago, we asked the KS, I remember even John was working to find the strength of the field of the STM. They went to different materials and different things, this material, or this field strength, will be of the STM, and the rest of it. I tried to give some hints to it.

You got to understand, the strength field of the STM, in interaction with the strength field of the environment, leads to the what we call, the creation of the physical man. The STM field strength has to be high enough, that not only the interaction with the soul, what we call field do the earth, leads to creation of the man, to other souls, to other ?? souls of the higher order, even the stars, you can manifest yourself in the center of a star, if you understand it.

Then the STM has a strength beyond the material state, which you have and you produce Gans's of. This is where most of you as KS have missed the knowledge. You tried to put some Gans's and with interaction you tried to create, (2:08). or to produce condition of man. In the EU this knowledge is hidden and will be revealed.

Then in this new EU you don't create the Cu and silver, you create the strength of the soul of the Cu and silver. The plasma of it. In the condition of any of the atmospheric condition, be it earth, the sun, another galaxy or another U, in interaction, the Cu will manifest itself, its Inertia of the field strength coming, matches that environment.

It might be in the liquid form on earth, but the other state of matters, which man has never seen, that it will manifest itself. On earth you are used to solids, in the shape of liquid, gas, solid, or whatever plasma ?? you have, the other state of matter, which man is not used to it. But the field strength of the Cu, in that, it might show itself in a totally new condition, and new manifestation.

These are all part of the teachings and understanding to come. So in the present new EU, we have the capability to create fields, if man understands enough, at the strength of the field of the soul of the Creator. That with it, man becomes knowledgeable of the knowledge of the U. Not with the strength of the STM, which in interaction with the strength of the field is created to be the physicality of the man. (2:10). The sperm and the egg are created on the condition of atmospheric condition, of the field strength of the planet. So there is a limitation on the strength of the STM on this planet. But when you open it up, it carries within it, within the strength of it, the soul of the strength of the Creator. And it is still to come.

These are the teachings when, if I do anything, then I become a magician. But if you understand it, you understand the magic of the science of the Creator. That's the difference between our change, and what you had as prophets and other scientists. You are responsible, and according to your intelligence, you understand the knowledge of the creation. But in essence, if you understand it, then you understand how we developed and progress the knowledge over time.

But don't forget the collective fields within the sperm and egg, lead to creation of the strength of the soul. Then what is the mystery within that egg, or that sperm, that can replicate the field strength of the U and the Creator within it? I made man in the image of Myself. So within the sperm and an egg, carries the essence of the knowledge of the creation. We are not aware of, we just pass it on, because we haven't become knowledgeable to understand. It's time to understand, and it's not the exclusivity of the humanity, as the other races in the U have already progressed, to pass that point. This is the beauty of the teaching. (2:12).

This is the beauty of understanding the knowledge. Then if as I said, in the teaching yesterday, if we can create, that process through our systems, within the EU, then you understand, the unit has a soul. By the interaction of and egg, (and) 2 sperm, created in manipulation, the STM. Now we have many reactors, what soul shall our system have.

Would the soul of the system accept your soul. When you're so far, as I said, people will walk away from the EU, does not matter, many of the WL and RL, when you see them walking out and not be able to manifest themselves as a soul, you know they are criminals. Crime against their own soul, not against anything else. In a way, they become the judge of their own conduct. Then you'll see they'll put down their turbans, head bounds, and they leave the church and the mosque, and we never hear from them (again).

Because the conduct of the process, has to be according to the understanding of the soul. I always said, when you ask and you are given, there is no punishment, because you have delivered according to what you have been given. Did anybody, did any of the religious leaders ask the others, can I abuse your soul, can I lie to you in the name of the creator or whatever. Then it comes to it.
Any other question (2:14).

The strangest thing is, that you thought you were just going to get a flight EU and that's it. But you are going to get a seat for the flight of the soul and the physicality, and many of you are going to shocked of it. Once that process takes place, you understand it, you don't need the knowledge of whatever is called the man, to kill and destroy, as you have access to more, why do you need to kill and destroy.
Any other question.

Q: Azar …

K- First are you in US or somewhere else across the world?
Q: In US in NY. .. When you talk about mirage .. (2:16). If I am the miniature of Creator, and I am a magician … it means I play with the fields. .. I am on stage making magic, … through 1 field I create a dog … you watch a mirage, but I am holding the fields. .. Creator holding the fields, all comes from Him, He created everything. Actuality of it is everything is a mirage. .. back to essence . If I sit in a room and suddenly I see no walls, floor, ceiling, does it means they were a mirage I created, I see through my eyes. When my soul comes out nothing exists except me sitting there. but nothing is happening ?

K- You see when you get to these points, many of KS will come to this point, is that when you. First of all when you say, God made you in the image of Himself, (2:18). it's in the D of the soul, not physicality. A step down of it, becomes physicality, if you look at it that way.

But when you sit on couch and you don't see the walls and the books and chairs, means you are looking at a higher order strength. That as I said, it's like you got the sugar in hand, and then suddenly you put it in hot water and it dissolves. The sugar and the water are still there, now you can't see it, because you increased the heat.

With the soul you increase the higher strength. So the physicality is still there, if you go in the lower strength. But now it is not visible to the man, but this time, if you reach that point, you still, it's what I said, being between the soul, and its boundary in the physicality, and its principle source, you are now in-between, you don't see with the eye of the man, you see with the vision of the soul, but in that communication, between back and forth, you translate it to the vision of no floor.

Because this is your soul and this is the extension of the soul. Before the soul was in center and you were in charge. Now if you look at it, if this is you here, and the soul in the middle, now the game has changed. You become in the center, and the soul has taken. But in communication the soul doesn't go from the center of your physical what we call, soul, out, it still has its center in the middle.

So what happens in communicating, being extended, it sees nothing, because in another strength, (2:20). you will see different dimensions, but you don't see the wall and the floor, because now you are encaged in it, and you're seeing what it is communicating to its center, that it can extend, or communicate with the rest of it. So the wall and the floor

are still there, but now when you see it, through the higher strength of the soul, soul has no eyes, but still communicates with the center. Your physicality is sitting here, so you translate the knowledge, that you don't see any walls. It's understanding, not just, then you don't become a magician, you cannot create any magic's. ?? you are magic's to yourself in a way.

Q: If I get up at that point, and I don't see anything, and go through the wall, can I go through the wall, or I am going to get ??
K- You can do. .. but you do it through the D of the soul. This is how some people you see, and we show, they can go, if you create the higher D, you can go through the wall. You can walk through it, because now it's the soul, which carries you, and not the physicality. Now the physicality is encaged. You understand?

So now it's the knowledge of the man. It's just training to be. Going through an EU and understanding, taking that fear out of you. It's very much like when you have never driven and you get in the car. To change the gear, and get ready and pull the car for the first time into the road with the other cars coming, is frightening, but once you get into it, you know how to do it, you jump out. Have you see how compared to the first day, when you sat in the car? You just get in the car and you drive. Oh, the other cars, beep, . I know I am going to be safe, he's not going to hit me, I carry on.

We learn and part of the teaching and the T we deliver, (2:22). is to teach man how to trust and to be able to go through that point. We take you with the D of physicality into the EU, and many of you will walk out of it as a soul. Many of you will claim, your family friends claim, "oh, he disappeared, our family bla, bla " But you are sitting there watching them, you decide to be enlighten through the soul, "I am with you." "I am sitting in the house. Do you want me to show you I am here?" You move a table, or chair, then you become a magician. But then they understand there are levels to the soul. So they go into the machine to be at your level. Magic's become understandable, because you go a higher level. Then you find out, if you can go even stronger than that, a higher strength of the STM, with a deeper strength, then you can reach even galaxies. instantaneous communication and T&T, and you do it through your soul. If there are people who cannot do it, we still give you the spaceship.

The space is create by the EU, the ship is the STM. You have to sail it where you want to. That is the whole purpose of the teaching. You're the captain, .. sailor, then you have to decide. We just provide for you to understand the D beyond the physicality.

Q: .. you were discussing Friday the section of the brain, that has to do with emotion ..
K- All of your brain is connected with emotion.
K- You said there is a section of the brain that is a horseshoe shaped, (2:24). that when you go to space you have to protect that part because any interaction of the field with any layer of that section can also bring you to demise. So you might feel something .
K- yes
Q: You might jump into something but you dissolve yourself, you'll die. The question is what is the anatomy of ..

K- No, no, no That's . When we speak in that level, we are speaking about the D of the field strength. That part of the brain is million of kilometers distance between the earth and the sun. Through putting a thicker filter we condense it for the energy to transfer. To reduce to become at the strength of the field of the matter state, to understanding of the emotion, through the Gans of the structure of the body of the brain of the man.

You got to understand the correct way. In the past we talked very simple because, even could it not be understood, Now you understand, you understand the reason. If I put a thicker shield, I reduce more fields. You're a doctor, what do you do when you take an X-ray in your dental surgery? You put a big thick shield on your staff, that they don't get x-ray radiation from the machine. If you do it thinner, they absorb more.

The structure of this part of the body of the man, is for a specific reason, because you have to see where it is, how it is shaped, and then what part of the responsibility of the operation of the man sticks beyond that boundary. It's not a shell, it's not spherical. When you look at this, (2:26). especially in the world of .., let's look at it this way, if you get the shoe shape, and you have a soul here, you don't have it spherical all the way. Then you have to see, this is 3 dimensional, yeah. You look at it, what sits beyond this D in the brain. What responsibility sits here, or we haven't understood the work of this part of the brain yet. On the other side you can transfer vertically, to any strength.

When we look at the structure of the brain, it's very simple. You have the soul, and the layers, which you have created reduces the strength of the field of the soul, as it goes further. Here you have the earth, you have a heavier material, heavier understanding. Here you have just a physical mirage, Saturn and Jupiter, you have the physicality of the man here. Here you feel the emotion of sadness. here .. happiness. Or in another part of the body, because you don't, because you are not aware of the strength of the other fields. Here you feel .. joy. But it's slightly. .. it's still on the same ring, but the density of the material in the brain, takes part of the strength, so here you might, let's say you get 10 Tesla, here on the same ring, because it's slightly weaker, you get 12 Tesla.

But this is what I call … you are a doctor, you've been to the medical school. Get a brain and a very sharp knife, and just let it sink in, and feel the emotion of the sinking, different strength fields. All that, changing the texture, is another process of the reduction, and increase of the fields. It's not the same with everywhere (in the brain). (2:28). If you put a knife and come up, 1 cm down, you feel here a click, (where) here you drop in. Because it is responsible for different emotion field strength. It's the same when you come to the process of the STM, which comes in your dream time. It still goes through the same process, and still feels this time, the field that way. You see the mother, because the soul of the mother is talking to your soul, because your soul can get the message to your physicality. Now you understand the process.

Now in the EU, the way we structure it, even our team are not aware of it, we're creating those layers, when you sit in (the unit). Not 2 men will feel the same, sitting in the same position. It's according to the emotion, field of the soul, and the strength of their soul.

As universal Messengers and Methi, when we deliver a knowledge, we deliver in completion. It's for man to decipher it, and for man to understand the totality. It's how you understand it, you comprehend it, and you deliver it to your soul, which allows the elevation of it, allows the expansion of it, through different D of the creation.

We come from the Source and we teach from the Source to eternity. It's for man to ?? depend (decide), which part of it he wants to accept, to understand. (2:30). If you are wise enough you can understand all of it with a flick of a finger, but limitation and prejudices has created in the STM from the time of its creation, through is ancestors, has created more and more fogs, for man to see the totality.

Q: …What is the difference between the emotion of a woman and of a man. Because to me the reason we have different emotions, is because of the filtration, of the anatomy, but in actuality we are created equal?
K- can you repeat .. the emotion between a man and a woman ..
Q: Is it different?
K- No, it's just that the response is different. It's the Man who decides the physical response. This is why we see some men becoming very feminine, because they decide to respond in a feminine strength. And some women behave like, more than a man. As we say in Farsi. You know what we say. It depends who is wearing the trousers in the family.
Q: Yes … actually I think that, because when you look at the body, the right part of the body is masculine, the left is feminine.
K- No, you can have the right body as feminine as possible, and as masculine as possible.
Q: But then how do you balance it out. For example when I look at my husband he is more feminine, I am more masculine.
K-Oh, it depends what's your intention. This is how. By man being emotional does not make him feminine. It means he is more in touch, in tune with the true emotion. This is a misunderstanding and misrepresentation.

Q: So how does, (2:32). someone become more feminine than ..
K- It's you. Have you ever seen two lesbians? When you see two lesbians, especially in Europe, especially Dutch lesbians, you know which one is the man, and which one is the female in their relationship. The male part always creates a very short haircut, like a man, that physically they are man. The female always has a long hair and behaves gentler. They are two women, they behave gentle, but she behaves more gentle than the other one, that I am female. We lived in western Europe and I have seen many of these, and you see it.

The same with a man, there are 2 men, and 1 man, the 2 man walks, you see it. A lot of Germans go to Thailand and bring Thai partners, men. The .. female part of the relationship behaves exactly like a woman, the way they handle their fingers and the ?? fidget. And the man behaves, "I am a macho." Why can't he do that with a full female?

But this is how we decide how we want our emotion to be presented. In Holland we see a lot of it. In Belgium we see a lot of this behavior. The ?? and they try to hide it ??, and some are very open. You see it. Who says, if you give the right opportunity and the

emotion to the one who behaves very much like a female side. Put in another relationship, she'll behave like a male part, and the other one will be the female.

It's you who decides the emotion. This is very hard to understand for people from the east, but living in the west, we've seen so much of it, and I analyzed so much of their behaviors, because they are everywhere. (2:34). You walk into most of the restaurants in Brussels, you see German men with Thai partners, male, and the male is worse than the female-female, behavior wise, talking wise, and treating like. But doesn't mean they are not 2 men. They do this. And we seen this with the women too.

It's you who decides to what extent, and when you say your partner is more female, than you have to see how you behave trying to be a man in the relationship. Then you have to answer to that, are you looking in another D and direction in emotion. And feminism, or men-ism doesn't bring, it shows the beauty of the connection, and with one's soul. The rest is how we want to categorize it for us to be. That's why you have to have respect for every emotion for whatever you call it, the gays, the lesbians, the homosexuals, the straight, or whatever you call it. We have to have respect for a man in any, what we call, state of emotion, because the beauty is in the soul, not in the D of physicality.

Q: …. why God decided to create female and male, He could have created one.
K- God hasn't created male and female. God has created the D of interaction, that leads to creation of new D. You call it, male and female. You have parts, that it gives, and you have parts that it takes.

If everything was equal in the strength, there would have been no creation. There would have been just a field. (2:36). The difference in different amounts or strengths, creates a condition of interaction, and that interaction you call it. It is a man's vision. We have creatures who carry both, and they can replicate themselves. This is what, is something for man to understand deeper about himself. So there is no division, we look at it this way. You call it Adam and Eve. Is Eve any less than Adam? Or Adam has some facets that Eve doesn't have, and Eve has some facets that Adam doesn't have, and their interaction, if you stand in the middle you call it love. That leads to interaction of the 2 fields, to something, we call it a creation. The apple, the human, the understanding of it is important, not to go into the rhetoric, and all the fantasy things that has been put on.

If you look at an electron and proton, the proton is the Adam, and electron is Eve. Is Eve the proton, in another D of it? Because there has to be a balance, that they can interact. More or less the interaction of the fields of the electron and the proton, creates a lot of materials, which then gets absorbed within the proton, and you call it, any other name you like it. If you look at it. In process of creation there cannot be any difference. It's man who has made this. (2:38). When you have a proton and an electron, they have to have something in common in interaction, that it leads to the, what I call, interaction of the fields.

One way or the other, it doesn't matter how you look at it. And these fields interaction leads to creation of something, leads to creation of something for man to see. On earth we

call it electron, we call it Cu and Zn ?? These interactions creates fields, plasma fields. Some will be absorbed by this, and some by this. In the solar system we call it, when you have it, the earth and the sun, the interaction of the fields, creates materials, plasmatic conditions, that some of it gets absorbed back to the sun instantaneously, and some of it with the Inertia of the earth, becomes material on earth.

There is no difference between electron and proton. We get continuous production of plasmas from the interaction of the electron and proton, which gets absorbed within it, and then you call it in the present science, up quark, down quark. This is the same thing we call it, Cu and Zn. There is no difference. Then change this to Adam and Eve. The interaction of the fields of them, leads to creation of what you call, love, creation of the man, creation of the life within the life. I made man in the image of Myself, because part of Me is, within the man. (2:40).

Would we, when we become knowledgeable enough, go into the RNA side of the plasma, through it we'll see the true creator. The answer is yes. Look into it and you shall see. I will be there to greet you. But it needs the knowledge. It needs the clarity of understanding. As long as you look in the D of physicality, you see the electron jumping everywhere and nothing. If you scale it up, you will see the same, but you will see what comes in earth, gold and the rest, but you don't see the plasma you feed back to the sun. All these interactions. It's the same with the Adam and Eve, the creator and the created, and then what, how much of these fields are fed back to the Creator to learn from the love of what he has created. If that love was man, how much of that love, becomes part of the Creator, that created the man.

Now we understand the true essence of creation, we don't need any religion. Because nobody can lie to us, covering it under the coloring of Adam and Eve, and everything else which has been set for man to understand. We do experiments in the lab to replicate, the replication is the structure of the earth, the atom, and Adam and the Eve. It's all the same, no difference.

How many scientists have told you, when you look at the atomic structure, how much of electron and proton they rotated around each other. (2:42). But this rotation has a field interaction. What love has been created between the two, and how much of it goes to the proton, and how much of it goes to the electron, that they keep that love relationship. And is it true that for the first time when Eve found the condition of manifestation of the physicality and the beauty of it, chose earth to be the birth place of ?? Mitra manifestation. Man needs a lot to understand.
Any other questions or call it a day

Q: Can the mind reading T that use to fly the ship, be used to read another persons mind from a distance?
K- We don't read minds. That's your understanding, so that would be it. We interact with the fields of the U, and then how you interact with another soul, and what you gather from it, is your problem, it's your understanding. (2:44). The reading of the mind, is the state of those who want to read to abuse.

Interaction of the fields of the souls, is what both understand at the same time of interaction. Then nobody can abuse. it's a big difference. We have not given a system to governments to control mind. We have the systems delivered that the governments understand that you can never control the STM. The mind is a lower level. Then this gives for man to understand he is equal in all levels.
Any other question

Q: Dean, .. with what you just spoken about, which is explained a lot in totality. … In the new video we produced and showed today. Shows an environment where the spacecraft actually takes off and leaves physically. Would you need that environment for let's say a WL to receive that unit, to be able to step into it, to experience the elevation of the soul?
K- Not really, John's point of view is the back of his house is the best place because it goes in AZ desert. (2:46). It doesn't need a place for it. It's where they decide to enter it, that counts. When I was talking to John …
It's where the Iranians tested, the Iranian space T, in central deserts in Iran. Nobody could see or detect. This was one of the ways the American drone was captured. In the desert there is not much to see, and you can do a lot of things. It's the same, unfortunately in Austria we don't have a desert, it's all green. We have to find another way to manifest and show, different thing.

Let me explain, we talked yesterday …. If you go to Rick's teaching you'll hear more or less, the same thing. If you notice, many of you, you look at this EU, in … KF center, we've shown the videos of it before … If you remember originally … (2:48). or pictures .. .it was very clear … This is the new pictures of KF Linz EC.

The systems were brought down to the ground floor. It's nothing but solid flooring. … one of the reasons we moved these from above, as you've seen in this picture, to below, is because the systems are active. The systems are not there on its own. When we started them off in the design center in Linz. The process has started, the systems is live. We see things in the KF research, we know things which are happening there, but ordinary people don't understand.

But there is a reason why we moved them from above to below. That's above … they have been moved to solid ground. When we setup systems, and once we trigger the egg and sperm, you cannot stop the lifecycle. These systems are active. We know within the research center how active they are. (2:50). We've taken action and the steps, partially to overcome the next steps could happen. They are not dangerous, they are normal fields within the structure of the matter state, but they work within themselves, they don't effect outside, and we are monitoring what is happening inside.

These are the fields of the plasmatic fields. They are part of the process of, "I take what I need, I don't take what I don't need." This process now, is interesting for us to see in a year time. We have sown a seed, and we are watching. This is part of the knowledge, .. T development. When you look at, as I said before, at the EC you see all the equipments,

which are in the latest T and knowledge of the man. What I call the mother, sits in this picture, this is the first child of the first mother of the development of the space T in Iran.

Even the Iranian scientists have not understood the power of what they developed and built in Tehran, over 10 years ago. But it sits within the structure of the T. Remember I told you with 1 drop of water, I can create a fish, I can even create a man. Within these systems, if you understood, I don't need to create the physicality of the man. (2:52). I need to create, the creation, which carries the soul and information of the STM, and man will manifest himself in any D as souls. I don't work with cells and protons, I work with the soul of the creation and the Creator. Then you understand. That creation might look ?? to your eyes. and to an Africa the same creation will be black and brown eyes. Chinese will see their own version. It's manifestation of vision according to the emotion.

It will be the same when Methi comes, every religion will see in their D of fulfillment, not to bring all together. That's the problem that many of the WL and RL, have to handle in the coming time. To interpret, for them to understand what is in front of them. This is the knowledge of the creation in a physical level, that the man can understand. But within all the systems there is a soul. There is further more to it, than present you can understand. The soul of the Creator has never harmed no one, as He is the Creator.

Q: ..?? in emotion, are we creating a soul, or many souls ?? ..
K- We are not creating souls, I am not getting into that. It's the system, (2:54). has its structure, we set it to be a structure to be equal to all. This is the essence of the creation.

Q: We have a Star Formation?
K- We have every formation, depends what suits, and what one can understand. The beauty of it is, when you are looking at, what I call, the depth of these pictures, when you look up into it, in the horizon of it, you see the beauty of the .. knowledge. How it is shaped. When we share the knowledge, we do it in a beautiful way, that, as you've been there, you've seen it, it's beautiful to see how the T has developed. How we covered on the banner of all, what awe call, One Nation OP, and on the banner of the KF. We've seen it …. It's for the WL to understand how to start working around it.
Q: … (2:56). you said you positioned it, you are not asking anymore, you're telling, you're are showing, ..
K- We are delivering. They have to follow. We have and are delivering the knowledge, the know-how, the understanding is for the WL, depending on what flag they serve, to understand, what they want to do. We don't carry a flag. The flag of the KF is very clear. Unmistakable. It's for them to decide, which side they want to take, and how they consider, they want to share. We share equal. Hopefully they will see the same, sooner or later.
Q: … I think they will see this position ....
K- It's just through the work of the UC. Their soul is responsible, and it's there, we setup the direction. The way it has to be. We will see this in a much deeper way in the coming time. Where the flag of the KF stands on its own merit, without the .. frontiers. This is part of what we are responsible for as KS, knowledge and the love of God without borders. (2:58).

When you understand this, it becomes very easy to work. If you understand the process of the creation, and understands the structure the creation works under, then there are no flags, except the flag of humanity for us to carry, It has been put on in a beautiful way in the past, and we'll go by it, to bring it in the future, when we'll see how KF works and especially what time place and position. It brings a true reality to all of us, irrespective of what we do, where we are, and how we see it. It's the beauty of the knowledge, that we can share it so freely, we are not afraid of who listens, and who copies, and who shares this knowledge. As I said, .. we are responsible to teach, and they are responsible to use what they have been taught, the best way to serve humanity. We are not preachers, we delivering the knowledge. They have to decide how this knowledge is used for the betterment of the human race. (3:00).

In a way, I can sum it up in a beautiful way. Does not matter what flag you put on the One Nation, KF serves humanity, as we are all made of the same blood, from interaction of the fields of the U. If I can create blood within a container, I can create any creation. But we all serve on the flag of the nation of KF as One Nation, irrespective of what other flag sits with us. Because in essence we are all created from the same blood, in a physical D of the man. It's us who puts a difference, with different colors and piece of clothe, depends what nation we call it. This is over .. in totality because we have brought this to one thing, one stand on the left of this picture, and that is KF as One Nation. The flag on the other side literally becomes .. different areas and districts of this planet, we would like to call ourselves to be part of.

If you and I can make blood we can create life, do we need to destroy that life. There is much to live to the life of the man. Ask yourself a simple question, (3:02). if it took a simple box to create the blood, to create man. What kind of life is created in the box of U from interaction of the fields of the Creator? What would man see in the depth of the space, on the interaction of the fields, which create the bloodline of the creation and the Creator, and the U and the Unicose. then you understand you can create life anywhere, and you can feed it with its own flow of its own fields.

Thank you

ENGLISH TRANSCRIPTION

(:22).
K- … we are trying to progress to understand more about the cycle of changes and creation, and how man has come to progress, in the different ways and means, of the intellectual what I call, structure of the life. As we progress towards creating a flight system (FS), to be able to take man with a machine, or for man to understand more of totality, we come to one point, and if you understand this, (:24). in what happens actually to us, and it is real to every single one of us, then we have to translate this knowledge into the systems we develop, that we can match, we can copy.

We saw the lightening creating fire, we went and tried to understand how the fire starts, and we made tools to make it. We understood how the energy of the atom is creating different conditions by radiation, and we went and created nuclear technology (T). Now we have to understand how, what all of us know, and go through it, more or less on a daily basis, every 24 hours a day, in one form or shape or another. How can we replicate this in the T and the systems that we make, that it works the same. That the fire we make is the same fire, that was made by the lightening and the thunder.

For us, as we develop the space T and we are moving away from moving matter state of the things, into energy state of the things as a plasma (Pl), we have to be able to match and replicate the same. In our daily life we dream. In our sleep we dream. Physically we are there, and our physicality when we are present with our mother, father or a friend, who have died or passed away, or is away from us for years, we carry all the emotion and the knowledge we have with them, in the state of dream. It's not just that we stand there physically, (:26). we remember every conversation we had, when they were alive, when they were with us, and we carry all the emotion with it. We remember how the mother smiled, how she laughed, we remember what in meant the expressions she uses, in the sleep, as she used when she was with us.

So transportation of the man from one place to another has to carry the same. The body .. in the EU, in a flight unit, if he chooses the path of the physicality, should carry all that emotion, .. feeling, and .. memory. When we transmute a body, person, object, we have to carry all the emotions of it with it, not just the matter state of it. This is the part which now we need to understand, before we get to the flight, through EU, before we understand the transmutation and transportation (T&T) in the new dimension (D).

In a few teachings before, I referred to the RNA of M fields, that it carries the memories of, .. where it has to go. One thing which the world of science (WOS) has not managed to understand up to now, how does M field in state of Pl reduces, or increases in strength, or divides. At the moment we have a discussion in the WOS, can a ray of light be bent? Can we bend it, and we look into the galaxies, .. U, (:28). and we see, "yes the light can bend," when it comes near an object, or a .. star or a galaxy. But does actually, has the man's knowledge reached a point to understand, that we can not only bend the M fields, we can break it up, we can divide it. We can split the M field, but there is a method to it. There is a T for it, there is an understanding and comprehension of every part of it, that mankind has not understood up to now.

This is where many parts of the WOS will breakup in what we know up to now. A lot of things will make a new sense, a lot of things will become much easier to understand in the WOS and T. For us to be able to transmute man or an object, we have to understand this. Otherwise we just carry a bunch of energy without emotion, without feeling, without understanding the totality. Without being able to interfere with the whole collection of .. emotions man carries in the D of physicality, and man carries in the D of the soul. We will run into massive problem, because we will be only carrying the physicality, most probably, because it has no emotion, the head will be on the foot, and the foot on the head, and god knows everything else. Because we created the emotion out of the position of the physicality.

We brought a new D into the WOS &T , (:30). in science and technology (S&T) of the creation, not of the man. We have to understand, we have to be able to comprehend the extent of the change, that the new T will bring us. In the coming time, in a very, very short time, man will go into a new ways of traveling, transportation, new ways of communication, new ways of understanding the totality. It's the responsibility of the KF and the scientists who work with us, and develop this T with us, to understand from now on, we just don't carry the voice down the telephone line. Or we just don't carry the man as a physical body, to another place. We have to carry both the voice, emotion and the man in the D of the Pl, not in the D of the physicality. Otherwise we'll be on the way for decades to come, and centuries and thousands of years to go from one star to another.

We'll seen changes in the body of the man in certain "Gs" , 50Gs, 100Gs, what's going to happen? The body of the man (will) tear apart. We have to transmute the structure of the body .. into a D of the.. plasmatic energy with the information, with the emotion, and with the understanding of the, all what has been gathered in that cell, we call the STM, or D of the Pl of the physicality of the man. We will, and wanting it or not, we have to understand this T, T of the creation. (:32). Understanding the method of the transmutation and transportation (T&T) of the not only the plasma (Pl), but the emotion of the Pl. We create Pl by interaction of electrical fields today, and we see lights and we call them the Pl. That's the Pl in a matter condition. We create a Pl in a field condition, that is created by the energy and the fields of what we call, M fields of every part, every cell of, and every emotion.

Remember you made the mark, you burned the skin when you were young, you are in 50s or 80s, that burn mark is still there. But how many times in the cycle of your life, your skin has changed. The layers of the skin has changed every 28 days, and still 50 years down the line, the mark is there. We have never analyzed why. If you are repairing, it should go away, should not be there, because we did not deal, we did not handle the emotion of the burn, when it was physically burned.

If you go back, as we said some time ago, … when we took the condition of a burn through what we call, air packs, what we have in the cars when hand .. and body of the man was burned by the impact. When we used the Gans's, which is the plasmatic energy, there was no sign of the burn. We missed the part, it was just a talk, (:34). The Gans's can do with a burn, without any signs of it. Why? Go in more detail, just not to happen that's it, we go.

But how come, if we get a burn from a match, or whatever, we have it on our skin. Does this mean with the T of the Pl we satisfy, we fulfill the emotion of the damage, into our layers of our skin, in the Soul of the Man (STM) in the memory part of the physical structure. Because it is the brain, which structures, for the cell to change. If it does not change, it keeps it there, you touch fire, you burn. You remember why you're burned. But the emotion of it, is not handled, that's why we see the skin sign. But when you give the plasmatic energy to it, when we do it with understanding the new T, there is no scar, because now we satisfied both the emotion, and the physicality change. This is the part that many of you have done. You burn yourself in the house, and you use Gans's, "oh it went, and there is no scar." Maybe for the first time you understand why. Because in the plasmatic condition, you haven't just fixed the Soul of the Physicality (STP), you sorted out the STM in interaction with STP, and emotion, that "I don't need this." I can repair this, I can satisfy myself with it.

Now we need to understand this, in T&T of the new flight system, we have to understand this. We have to be able to carry the emotion, (:36). with the what we call plasma of the man, when man transmutes from one to another. And get it right when we get to the other place. On earth I move you from NY to Tehran, through the plasmatic emotion. I don't need to carry you with the physical dimension (D) of aircraft system, because you understand the "G forces" so I have to hold you, cuddle you like a mother in the system, and deliver you in the correct way. If we choose through the plasmatic way, I have to be able to deliver you, that the emotion of your sight does not change to the emotion of your hearing, and your hearing to your smell. I have to deliver everything that the eye sees, that the ear hears, and not sees, or it doesn't work.

So it becomes to the point that the world of science & T, has to understand the new change in the world of science, .. the next step in the D of T&T in a plasmatic state. How do you see with the eye of the soul, when you are in another position in the U. Where you got the eye and the sound, the other way around. This is the responsibility of the new research and development (R&D) to get this in that position. As we are going into the D of the flight, as we are going into the new understanding of the process of creation, as we are developing T to be able to deliver the totality of the knowledge, we as Knowledge

Seekers (KS) have to become fully aware of, not after testing and trying, (:38). and then say, "oh, we missed something in the knowledge," .. in understanding, .. in totality of the process of the creating our systems, or developing .. which allows to take into condition of flight.

In these new systems, .. understandings as we see, we have to , we have no choice, but to understand the process of the interaction of the fields. When we come to the point of these units, where carries the emotion, and the STM to enhance, and then we embed these in the new systems of the flight. Where do we go? How to we inherit, how do we correct these things. We are not talking about the future, this might happen, already flight systems (FS) have been built in China. These are the production lines coming off the line, in coming days and weeks, as we deliver around the world. This factory has been setup to meet the demand of the KF. These are the FS, which now is going to be. It's become part of your life, .. of the structure of the KF work in space.

How do we structure ourselves in these systems. That when we arrive at a point of destination, we will, and we become as one. We can deliver the totality. "Sorry the first 200 people we never understood that the emotion has to be carried." We delivered a lump of energy from Tehran to NY. (:40). The emotion was left behind. This is part of our work. This is now, it's not the knowledge of just making systems, it's to deliver T, to understand more of.

It's the responsibility of the KS who are advanced and work in this part. Be it you're on the government side, be it you're on the independent side, be it individually you carry work in your garage. Because your garage most probably, is sometimes more advanced then the government laboratories, because they haven't understood, they are just trying to copy, without the soul of the knowledge, the root of the knowledge.

In this coming time how do we place, how do we get our systems built in these new FS, that we become, and we deliver a totality of system. When we deliver 100 units a month, we have to get everything right. We have to bring new standards, .. dimensions, .. start the delivery of the T in a correct way, from outset, from the onset of the first trial. How do make these systems, .. adopt these FS. This is not a talk anymore. This is the reality, the world of science, the KF and other scientists around the world, have to face. We have opened the Pandora's box, and there is no way for it to close. There is no way for it, to become separated from the rest of the present knowledge. There is a line, .. a border line now, (:42). in sticking to the past knowledge of the matter state, or moving to the state of the Pl transformation, T&T.

We have seen even today, with after 2 years, of we've seen with this plasma situation across the world, mutating and mutating. Now the scientists find out we have nothing to match it. Because accidentally, maybe we found something, which did something with some of it, but we have not understood the root of the creation of the Pl, the interaction of the plasmatic fields. Even in the KF, KS have become limited to understanding of a few things which was given, hand fed, instead of adding fed.

What do we do? Where do we stand? How do put 100 of these units a month, in the next year, across this planet, when they just stand as a shell. Where the T has not carried the understanding of the totality. I can develop to certain extent, that systems can be delivered. But how as the human race we are going to develop the next stage, the next step. When we launched the enhancement units (EU) originally, it was just, what we call, a health unit, and material unit, enhancing of whatever. But now we are in a flight system (FS), we have to, (:44). take a man, and deliver a man in totality. What is the extent of the knowledge. How far we as a KS have come, not to be sentimental about the knowledge of the KF, but to understand the totality of the process of the .. creation of fields, plasmas, divisions of them. Creating conditions of them.

If we go back to one of the very first reactors, which we built in Tehran, one thing which the Iranian authorities and the scientists never understood was, the true secret, which sits within the structure of the KF systems, which sits within the what we call, "clarity of the information which was missed." In a way, we have to, and understand, that the new T, to become part of the Pl T, needs the totality of the knowledge of the man. When we interact, .. deliver, .. bring it about, the delivery of the T is like this, we have to understand every process of it, .. how we create conditions, for the creation of .. energies, plasmas, opening them, closing them.

How do we make a neutron, and us decide the time of division, and not leaving to the hand of, what we call, "whatever might be." When we look, (:46). at this T. When we see the enhancement of the 2 nuclear space reactors of Iran, we now understand there is more to the knowledge. Understanding to create nuclear division, understanding to create a plasmatic nuclear division is the key to be able to succeed to use all the systems you see. When you look at this picture you see the totality of the knowledge, you see the understanding of the totality of what man needs to know to be able T&T across the U, across this planet, even in their own understanding of the knowledge & T. The spaceship from the day it was made, I said, when will mankind see that all the knowledge is needed, is sitting on the table.

Up to now we waited for the nuclear division, we waited for the split of the neutron into the electron and proton. This is the question I put to Professor Leslie in Queen Mary College. I said, "your knowledge is not complete, sir, because you cannot dictate the time of the division." You are here sitting at the will of God. So you have not understood. Professor L told me, Mehran you are too far ahead. You ask questions that we have no answer to.

This is where it sits, .. the knowledge is, .. after 40 - 50 year. 40 years as a nuclear physicist we have to answer. (:48). How can we control nuclear division? Not half-life, when it happens, randomly in a few milliseconds, .. hours, .. days, .. few million years. I should be able to bring that million years into milliseconds, and milliseconds to million years.

The questions I put to you is not something new. It's taken me 50 years plus, to find answers, to find solutions, to see the reason for it. And that division comes exactly the

way you carry the soul, when you create the division, for the Soul of Physicality (STP) to separate, and then create the totality of an atom, or the physicality of the man. To you it is a sentence in past few minutes, to me it has been a question of developing for 50 years. As a nuclear physicists, as one of the leading Pl physicist in the world, to understand how we can change the Pl. We control the Pl change, not the destiny of the time and environment.

This is why in Fukoshima we could interfere, even the American scientists who took and stole, and the Japanese who made billions out of it, never understood it, just worked from - we do it. If you understand that division, if you can control that, when we can bring, what we call, inter-atomic fusion, the electron within the proton, and make 1 neutron, and then decide when we divide that neutron to another electron and proton, but be exactly the same. (:50). To be able to compensate for the losses of the separation and addition of the fields, in cohesion of the totality.

This has been the biggest question. This is one of the questions, that the world of the nuclear has never answered, the scientists in the world of cosmology have no answer and they just jump it. We cannot jump it anymore, we have to understand it, because we are faced with it, it is on the screen. How can I create the division, transportation as 1 unit, as 1 neutron, compensate for the losses of the environment of it, and then be able to bring it back together.

Go back to Book 1 when we showed the Principle, fundamental Pl, when it divides to an electron (E) and Proton (P) it releases some energy, so when you want to put that E back with the P you have to compensate for those losses, but exactly the same, that the environment doesn't take it, but you understand the changes, you understand the ?? station of the field, you can compensate for it, that you go back to the original neutron, not a neutron which already lost some part, when it was divided.

I cannot take you form London to NY, sorry when you get to NY, we lost some energy on transformation and transportation we lost a leg. You go and find the energy that we can put the leg back. This cannot .. this is one of the first things that came to me at the age of 8 or 9, when I sat on the bottom end of the x-ray machine in Tehran. If it comes in me, and it goes through me, how much of me is added, (:52). and how much of me is taken? It took me 30 years to find the answer, and you are taught in 1 lesson. Do you even think about, what you couldn't think?

We have to find, .. understand, that when we transmute a soul, or the totality of the man as an energy, we have to bring the information, the emotion, and totality of it, back in any position in the U, or on this planet, in one form. For you to travel with the speed of light, which passes the matter state speed in the D of physicality, you have to understand how to add the energy, to pass the point of speed of light, in the D of universal light, which we have not understood yet.

The light you see in the starry sky of the man, is exactly when it is produced there and then, and what you see. Not 1 billion, or thousand years on the way. Never heard such a

nonsense in the WOS. Once we understand this, we can be at the star instantaneously, we can be part of it instantaneously. If we can compensate or increase the fields of the Pl of the man, to the strength of the point and position of that star. We shall be there instantaneously.

How long does it take to get magnets, which are the same, to get pulled together? (:54). We have not understood the magnification of the plasmatic fields, .. the division of the M fields of the Pl, and we are still, in Farsi we say, " " we are still stuck in the bend of the street. We haven't understood where the street goes to. We still got the problem, can we bend the light? And how come sometimes light bends? Is it an energy, is it a photon, is it part of the totality? Why some of the light bends. Then if you can bend it, you can divide it. Plasmatic radiation and division of plasmatic radiation, is the next step of the teaching for the world scientists to understand.

How do we create plasmatic radiation, be it in Alpha. Alpha still, we call it, is the energy of whatever. But in fact, it is a plasma. It has a field strength, it has a D and a volume. So if you understand this, we can create Alpha radiation as much as you like anywhere in the U. It's not just what is in your smoke detectors sticking on top of your ceiling.

Understanding the change in the Pl is the key, is the next step for evolution of the science of the man. From now on, we try to open this door, that it is understood by those KS in universities, institutes, and nuclear centers, to understand there is a new way. And then with it, (:56). we literally put a nail in the coffin of nuclear industry. Do I need to create a division to create heat, to build these massive nuclear reactors to do what? To boil some water. To get some energy to change into electricity. Where I can create the diversion and division of the cell of a Pl, and get the energy I want there and then. What is this all hullabaloo going on.

Where have we missed the science of the creation. As a nuclear physicist I set out 40 or 50 years ago to understand this. Now the answer is simple, we missed the truth about the fields, the M fields, the RNA of the fields, the division of these fields by emotion of the fields, and not by accidental condition of the fields. When you sit under a x-ray machine, have you ever asked yourself, "where does this field come from?" How do Philips, and Siemens, and the other people create replication of exactly the same fields all the time? For the bone so much (radiation), for this so much, for liver so much, then we go into MRI and the rest of it.

But we haven't understood, how we do it. How it is done in the creation. We've become monkeys, just copying. When you create x-rays in the x-ray machines, how does it work, and can we replicate this in our nuclear reactors, .. in our Pl systems. (:58). That we create a condition of creating M fields, Pl radiation. Then we have broken into a small part of the knowledge of the creation. When a beam hits the surface and it creates so much fields, and it is always it gives x-ray, or always gives Gamma rays.

Isn't this the same as, we have a sun and a earth, and then the interaction of them, creates Pl fields, that in interaction with the field of the earth's Inertia, becomes a matter state, or

becomes part of something else. What have we missed in the knowledge, that we understand it in one part, but we miss it in another part.

Many of you KS will be lost with the teachings of today, and coming up. But these teachings are targeted at the nuclear physicists, who are in the background listening. This is targeted at the Pl physicists who listen to these teachings continuously. It is targeted at the elite scientists, who'll bring the change in the WOS. As I said, many people listen, and the KS at the front, are just the what we call, educated in the T of the KF, and what it is.

Scientists in laboratories around the world, when they listen they understand. Nuclear physicists when listen, understand where our dilemma is. Space T has changed. We have as a nuclear physicist to understand the totality of the creation of the neutron. With the knowledge we have, (1:00). we become the creator of that neutron. And with the knowledge we have today, in the Pl T, with the KF, we should be able to decide, that division of the neutron to an E and P. Can we understand enough, that we create 2 E and 1 P? Doesn't this happen in the womb of the mother, we get identical twins?

What have we missed in the knowledge of the man. What have we missed in the knowledge of nuclear T, in the advancement of the Pl physics, and in cosmology? Or do we need to make nuclear physicists out of cosmologists, that they maybe see the coherent interaction of the fields, and the division of the fields. From today we know, and we have to understand how to make, M fields to divide, M fields to increase their energy, .. to absorb more energy through to become a stronger. We have to understand the process of the creation of the Pl, what we call the neutron, what we call, the fundamental element. If we don't understand the fundamental element (FE) plasma of the creation. What are we doing here? Back to the cave, rub a few sticks and make fire.

The understanding of the process of the flight, especially in these new systems, which are on the screen, is sacrosanct in understanding the process of division of the plasmatic fields radiation. (1:02). Our friends in CERN are still playing with twigs. Even they don't know how to hold the twigs, but they don't know how to do it. Our friends in nuclear research centers around the world, as a nuclear physicist, you have to change your process, you have to understand you can create nuclear radiation at any level you like, without harming, or being absorbed by anything else to create nuclear damage. If our scientists understood, when we use the Gans's, and we saw the lady going to Japan and using the Japanese nuclear, testing materials, on the street to show what is radiated or not.

You should have understood we have changed the game. The Fukoshima test done by Yuko in Fukoshima, gave a lot of knowledge, but as you are not the man of nuclear, you could not understand what it meant. We absorbed the energy. But what happens when we absorb that energy. What divisions within the cells of the Pl of the material, which absorbed it, creates. Does it split that Pl into more plasmas? Or does it create more energetic, that it becomes something else?

The secret of the knowledge of the KF in the space science plasma T was shown in Fukoshima years ago. But as you are not nuclear physicists, as you don't understand the Pl physics, ?? we've done something at Fukoshima. But we never understood the knowledge and the T behind it. When I saw live what was happening in Fukoshima, as Yuko was showing the absorption and reduction, I was ticking boxes, "40 years of work, correct" (1:04). There can be division - correct. Can be creating other fields - correct. Then step by step allows to add to the knowledge. To put in, confirming the theories, and the practicality of all, what was in the patents.

In next few months as we develop the T, as you have seen, these machines become a flying machine in your back garden, in your cities, we have to have the scientists who understand it. We do not create captains to understand, which button to press, and a manual if something goes wrong, do this and that. The knowledge, the manual, the understanding of the T has to be in the "soul of understanding the T," by the captain. Not on a piece of paper. We have no papers in the U. "Sorry you are on planet Zeus" and what is written on the paper here, structurally, plasmatic-ally cannot exist. There is nothing, no message in a bottle.

But we need to understand it, to get to the next phase, .. to able even to understand the situation with the Pl conditions we have, that has paralyzed the economy of the world today. We ran out of the magic of the 1st, 2nd, and 3rd injection. Now we see, the scientists, they tell us, the 4th injection has no effect. Reports coming out of, as I have been seeing, from Israel. The new 4th cycle has no effect on. We ran out of luck, because we didn't carry the complete, or comprehended the totality, the structure of the virus. (1:06). If you are KS and you read the paper about the plasma, what we call the virus, and bacteria, and the other, you already knew more than the scientists, and the heads of the nations know today.

We have to, we have no choice, and other scientists in the background, work to bring this process forward. We have to understand the process of the creation of the Pl, as a fundamental plasma (FP), how we become the creator of it. Not - it is there. How we become the creator of the condition, of the splitting of it, into a P and E, and than this is what we call the STM and the physicality of the man, and with it bringing the totality of the physicality of the man, as the 2 souls interact. Then being able to get the E back in the P, and make that FP exactly the way it was before it split. "Sorry you can't see with one eye, we left part of the Pl at the division point."

This is the evolution in science. We are not a cult. We are scientists who understand the process of the creation. With what we understand, we have to setup structures, systems, technologies, knowledge of structures that can deliver knowledge of the creation of the process of FP. After … 20 years of the KF, now we go back, (1:08). to the first chapter of the first book, because you read it, now you have to make it. Up to now it was on the book, now it is in the system to flight.

The most fundamental point for all of you is, if the system creates such a Pl? How many of you are the electrons, which going into the plasma of the proton of the system,

protected, and at the point of delivery, we can let you out as you were. Now you understand, the gravity and extent of the knowledge the man needs to gather in the next few months. It's not just making a reactor. It's not just creating a flight condition. It's creating a Pl, that can hold to the fundamental structure of the creation in the U, irrespective of the place, time, and position.

Now as KS in nuclear centers, .. in space systems, in China, in US, in Iran and the rest. Forget about your rocket T, forget your, whatever you made, try to understand the transmutation through the Pl. This is the time to bring the cosmologists, nuclear physicists, Pl physicists and the space people together, and as one group, as one team of understanding create the flight machine, the life support machines of the future. (1:10). These new FS, I already have designed, it's for you to understand, ?? flight. It's not just screwing a bottle, welding something, or whatever, you have to look beyond it.

The biggest problem .. for you KS, and the future space T, is not anymore, literally, what you see, as a reactor, your problem is, sits, when you created these fields, .. conditions, of the flight, when you close these doors, what fields are created inside?

The fields inside are the neutrons. The man walking in it, is that proton, it changes to fundamental principle of the energy transfer of the Pl. You remember in the past, many times I referred to the point that a banana, is a banana in the matter state, as long as it is in your hand. Once it goes in your mouth, due to plasmatic fields of your mouth, now it's in a new condition. It's in a new Pl state, and not in the matter state. That mouth is the door (FEU) which you see in front of you on the screen, into the system.

We have to understand this process. How now by closing this door we don't just, (1:12). close the doors of the space system, but how would us in systems standing next to you interact with us? Because the fields are not only inside the system. The fields being built between the walls, are outside too. How much of it we can control? How can we stop these system to bang against each other, even in the first flight?

How do we create the protection for these systems that while you are holding .. the baby of the souls inside, you can protect the system from outside? An integrated system, a system that while it's creating a Pl of fundamental structure, can add to itself, that it can hold its integrity, and hold the womb of the mother, the skin of the mother, and the environment outside the mother's skin, and the womb inside, and the environment where the child is grown. This is what we are. We are in a position, and we have to understand this. Otherwise these FS are nothing but cascades, cascades you just make and we leave it there, one day somebody will understand.

It's the responsibility of KS who understand this, especially I speak directly to the Chinese aerospace space people. Directly to the American space scientists who work in the nuclear industry, and into the Pl fields. You will not succeed (on your own). As we saw in China, they invited us and said, can you give us the fuel composition, that we can just fly. I can give you the fuel composition, but you don't understand what's the next step.

Flight is not only objective. (1:14). Because once you fly with the plasmatic condition, you create, you become part of a new field within it. A nuclear physicists, especially a space physicist in a Pl field, has not understood this. It's the job of scientists to (break in audio ..) to layman that understand. Layman is not the one who happens to be on the street, it's the nuclear and plasma physicist, and cosmologists, and all the what we call aerospace people on this planet. They are the lay people, they have not understood, and they need to be enlightened for them to see to the next step.

When we put people in these structures, .. in understanding of the work of these systems, we need to understand the totality of the structure, we need to understand what this structure brings us, what would effect us. What will bring the changes, which we will see in the coming time. Once we install these systems, once we bring these systems into operation, and fit them with .. the latest space T, a lot of things will change. We bring systems, once the whole structure is fitted in, (1:16). the man is not the man anymore. It's the Pl of the man. It's .. the structure of understanding of the totality.

This will bring a lot of D to us, it's not anymore a banana. How can we as KS, bring the whole understanding of the flight with the plasmatic condition? Then we will see the man will change, the man will not be the same, the man will have to be, to understand, to be part of a new T, new understanding, new composition of order of fields. New way to be able to T&T, to be able understand the totality of the knowledge. Then we have to see how much of this we have understood, and how much we can replicate.

Maybe today's teaching, (1:18). opened your eyes, especially those of you who work on the edge of T, to understand this. We have to become the creator of that fundamental plasma (FP), we have to become the controller of that FP. How to be able to split it, and how to be able to bring it, to create a new condition, that allows us as a scientist, as what we call, understanding of new T, to be able to deliver a comprehensive system, that carries the emotion, carries .. the fields of creation, and carries the physicality of the man in both RNA and DNA.

This will be a major breakthrough for a lot of you. This will bring you the understanding of the totality of the knowledge of the creation. If you can understand this, and if you can take it to the next step, then you have gone 1 step further in the creation of T&T.

Maybe, maybe we enter a new D. (1:20). Maybe we come into the position to understand the creation of FP. Maybe then we should be able to replicate the creation of FP. Then maybe we can reach the point to understand the creation of the totality of the creation. Then we would there be a place for theology, and would there be a place for .. understanding of the creation? Would we as a new race of man, for the first time understand partially more to the total structure of the knowledge of the creation.

Fundamentally we can say one thing, and that is, this machine as we see it is another craft, is another manmade craft, with the physical D, (1:22). of the entrapment of the physicality. Once we embed into it, the plasmatic systems the creation of the fields of the

Pl of the creation, within the walls of the system, this craft is a universal FS. In a way, it can travel the depth of the U, that's why it's called universal system. It can deliver man at any point in the U.

It's the totality of the understanding of the knowledge of the man, who has to go and become beyond the extent of the knowledge of today. How would mankind fly with this machine without the plasmatic system inside it? And how man will fly with these systems with a plasmatic system inside it?

How we'll come in touch to see, the grandmother or the mother with a full emotion understanding, with a full comprehension of existence in the D of the M field of the U, and us, in the D of fields of the Pl, as part of those M fields. The connection for us to see the mother, is the connection of the fields, which we established, (1:24). as a division of the cells of the energy of the mother, with us.

The FP is the mother, and the child is that division of the fields, and the strength in the fields. We have not even managed to understand, that in the D of the Pl. How does the energy divides in a plasmatic condition in the field strength, not in the Pl strength. It's not cutting the Pl anymore, it's splitting and keeping the same, the fields of the Pl. The fields, which make that Pl, and at the same time, keeping the fundamental principle of the Pl, and all its information within it.

Where do we go, with what we have in our hand today? What is the position of us, now that we have come to realize, that the science of the man has opened itself to a new D of the understanding, where the FP can divide into, and then in any proportion, it can come back to a new Pl. Or it can return back and keep and create the first and the same FP. Where this by its inherent condition of the fields of the environment will create, what we call frictions, (1:26). and small release to its environment. How can we go back, directly to this (original neutron), and not to this (the new neutron). This is the dilemma for you as a KS, and nuclear physicists. This is the question, which I asked years ago from our senior scientists in nuclear industry, and nobody had an answer. Now as a simple KS you have the answer, you have the T, you have the knowledge to be able to create.

Understanding of the totality, understanding the truth about the division of the fields, is what mankind, will come to understand is the key to the world of new science, is the key to the new world of understanding of the T.

This is where we become a scientific organization and not a cult. Even though up to now we spoke about the soul, but a soul to a nuclear physicist and Pl physicists like me, is in fact, a neutron. I can give it any name you like, the soul, make it to become the STP, and the physicality of the man, a P & E, or anything else you like to call it. (1:28). I can paint it the way it suits your eyes, but it does not change the fact about the knowledge of the creation.

Then at the same time, this (electron), will again be divided into others, and to the others, and to the rest of it. Where this FP in the process of its division and condition, and in the

process of interactions with the fields, which he created itself, will create new plasmas, new conditions, new .. divisions, that the interaction of these fields now creates a new Pl.

Wouldn't that be the soul of the Creator (original neutron)? And this the STM (electron), which in fact, it came from the beginning. I made man in the image of Myself. Because it came from the process of division of the fields of Me. I don't need to divide Myself, as at this point I can release part of Me, that it becomes part of this division. I can interact anywhere, at any position, with anything.

Then you understand some of the names given to the Creator in the Koran, part of the 99 names of Him. If you understand all when you read Koran, you understand the 100, which is this (totality), the 100. (1:30). Understanding He is omnipotent, He's understanding every others, because He radiates the same, depends where you interact with Him. He doesn't decide, it's part of the Pl of the U ?? less than the other. He radiates the same like a sun.

It's you and the fields, which turn and toss, and create the winter and the summer, the black & white skin, and everything else. But in truth the fields of the energy of the Creator radiates amongst all of us. If you understand this, in these fundamental system of flights we create that embodiment. How closer you want to go back, and how you want to withstand the process of creation, even when you are within the system.

As you see the totality of the fields, I create a new field condition. This is why if you understood, I always said, .. I can give you a fish, I can give you a man, in a pot. Because I have the knowledge to be able to create the fields of the U within the water, then as I change the fields, (1:32). with the strength of the fields of the emotion of the soul, I create the man, or the beast, or the fish. One drop, that drop is the energy fields of the creation, which to my knowledge is easy to make, to you is a magic.

Now you understand more about the totality of the knowledge of the Pl T. Now you understand the fundamental questions, which I have put across the scientific world, and professors, and lecturers and the life and the universities, and colleges, and nobody could answer. You as a laymen, as KS of KF, can see and understand, more than professors, and the doctors, and the PhDs, at this moment of time, on this planet.

This is the truth once you understand the process of the creation. How do I make that fundamental Pl, I call it a neutron, I call it a soul, I call it the essential source, to create that condition, with love, with care, with respecting life. Then you understand the biggest question in the world of science & T today. Have the KS understood enough to be able to create a fundamental Pl, and then to be able to divide, (1:34). the fields of the Pl, which up to now is unheard of.

Or can you strengthen the fields of the Pl, that it leads to a higher strength to go more into the center of the Pl. Or can you find a way, by not division, but by giving, that you can go further. That would this further point, at a one point and another, will bring you to the point of the creation. I made man in the image of Myself, and I gave man the rights to

understand the knowledge of the creation. It's for man to understand the totality, and this is the point of manifestation of Mitra, for man to understand, to go back to, and to come from, and be part of the totality, and understanding the truth about the knowledge of the creation. The STM and the STP of the man.

I hope today you understood more, and I hope today, with all of the scribbles on the board, you understood where you came from, where you come from, and how you can become the creator of the next cycle, in the propulsion of understanding the knowledge. It's not just creating the children of the man, it's creating children of the STM, which becomes the knowledge of the creation (KOC) and Creator, and that is what we call the Mitra. Understanding the process, that the KOC and Creator, (1:36). comes back, to become the creation and the Creator itself.
Thank you .. for allowing to share the knowledge, and at the same time understanding the totality. We go for a break and come back and answer any question that you might have.

PROOFING TO HERE << continue

>>> BREAK >> 416 KSW Jan 20 , 2022 (1:44).

Q: Salomea .. coherence between the STM and STP is the secret of balance and equilibrium, so how can we create it?
K- Create what? The equilibrium?
R: Coherence between the STM and STP
K- Partially is the emotion. Partially is the emotion of the man. Detachment and understanding it. This is what you call, coherence. Goes where we totally separate from a lot of things. Because it is the responsibility of every man for himself, at a point where they want, and they ?? know to come back to, and the only part behind, and some part to add to. Is the totality of the physicality, that we have to understand.

This is what I keep on going back to, KF is not a religious group, KF is not a cult, .. is not another organization. It is a scientific. (1:46). A new science. You have to understand the science of it, how it happens. You take from it according to understanding of the knowledge. You don't carry, you don't need any PhD's, or professors to understand. If you get enlightened, if you understand the principle, it takes you a few seconds to understand most of the work. Then you can replicate it. Then people say, "oh, this is this." It's you understanding the way you do. And the way you understood.

I worked with a KS who has no education whatsoever, just finished an ordinary 12th year, with just being brought up in a farming family, but his knowledge of the Pl, is beyond hundreds of professors put together, because he understood the fundamental.

Those who tried to achieve it, or to copy it, to replicate it, it will be very difficult. Because you have to be able to enjoy its existence, and enjoy the knowledge you gained, and to be able to share it, and if you want, to be able to replicate it, that the others can enjoy it.

We see this right across the KS. Each one of them in their own special fields, or they understood something, of they knew something, added up, (1:48). are adding to the knowledge, new things, new ways, new machinery, everything you see coming up, and they put in there a conjunction of this T, and the KF. That's the beauty of it. They implement it, and they explain it, this is what it is from their part. It's the same, connecting the soul and the T and the knowledge together. Then you can do it. Then it's being to share, give and sort that out, which is part of the whole structure and the process. Any other question.

Q: Ed … in a way you answered my question .. I remember the first time you introduced the Gans form Cup 1 and 2, my question at that time was how do we understand how to make the Gans at the proper strength to interact with a certain Pl strength. .. when you worked in your garage, you told us you used to look at the lights in the dark, because you understood the significance of what was happening with the light, the colors of the lights. (1:50). Like what you presented with us this morning, we don't have tools to operate at that level. It seems to me the only tools we have are our understanding and perception. So … what are the tools how do we develop the tools to work at this level?
K- You don't need machinery, .. reactors, if you go back to one of the teachings, and many times I said, you can hold your hand and create the light. You as a dynamic Pl system, we can do this. We can create this, we know how to access energies. We do it physically, we rub our hands to each other, and we create heat.

Now we can hold or position ourselves and create interaction of the Pl of the field of the man, with his aura, you call it, and create the same. See how, what will be the reaction of it, .. the outcome of it. This is the part of understanding of the totality, and this is what we need to understand, we need to be able **to put together, (1:52). a simple understanding of the T**. You don't need to be a magician or a professor to create the two.

When you look at … picture which I put on earlier, and if you understood the principle of what this picture (of EU in EC Linz) means. When we understand the principle, does not matter what they give us. People in villages of Amazon will use the same system, and they'll reach the same, by pots, they don't need nuclear reactors. It's understanding the T or understanding the knowledge counts.

When you look at this picture, in reality there is no difference in application of T in the Iranian nuclear reactor, or Brain EU, or in Body EU. One creates the flight, and one handles the body .. in different strength, and the other, (1:54). handles the emotion. The tools of the knowledge is there, all the same, in all 3. It's application and implication. If I stand a man in this gap, then what will be the difference? You got realize how much you understand of the knowledge, how you explain the knowledge, and how you interpret the

knowledge, and what that interpretation leads you to. (1:56). What you want to gain from it, and how much of it you can accept and you can add to. Then you don't need systems.

I mentioned his, .. the name and of presence of Professor Leslie, the head of nuclear department of Queen Mary College, as head of my department. At that time .. we were on the edge of the science in 70s and 80s, even though we were 40 days (years) down the line of nuclear power. In the final year, and the back end of the 2nd year in teachings, there were no books written, the professors were sitting one to one across the table. That was the knowledge shared. We were reading of their own, they were teaching us off their research papers of their own, or the PhDs, we had some cases where the PhD comes in the teaching of the professor, sits across 3 of us, trying to explain the knowledge.

To me at that time, many times I had interaction .. discussion with professor Leslie, because he was a very bright man. He could understand the lack in the knowledge. I explained to him, why should I accept, because you've written to be acceptable to me, because it doesn't make sense to me. He said, I have no more to share, you know more than me. (1:58). I am learning from you at the time I am teaching you. I said, these are the questions as scientists, as a human beings we have to answer. It just doesn't need to be a nuclear physicist. I remember once he said to me, I look forward to the days in the week when I can teach you, because I become a student most of the time.

We have to understand what is in our hand as a knowledge, and how do we apply it in cases we want, in the conditions we create? Because once you learn to walk, you can run, jump, you can dive, you can do anything. The limitation comes by how much you extend that part. You can run a few meters, you can train yourself to become a marathon runner, .. to become a jumper. Or you can use those legs to become a diver.

It's the same with the knowledge. You have to understand how you want to extend it, how you want to train it, and how you understand it to benefit you, or to give you the pleasure of existence. You'd like to run a marathon, that gives you a pleasure, or you like to be a diver, that gives you a pleasure. But you can be both, if you understood how to use your legs. This is what we are trying to push the KS to the next level of. Understanding the process, (2:00). creating the condition. This is what we as KS expect, extend, and try to find out.

We show the knowledge, it's for you to apply it, according to what you understand of it, in extension of the knowledge you have, or the emotion you have or your understanding of it. This is why the teaching, even you call it, about the soul teaching, the soul is the fundamental plasma. You put a name because you understand it that way. To me a soul is a neutron. How do I want it to interact, .. to divide, .. to be a physicality, or STP as an electron, and create interaction between the two, the atom, what we call the physicality of the man.

I am a man of science, and I understand the science of the creation, and with it we can interpret it in the world of the theology, in the world of the Pl, in world of matter state, or in any shape or form you want. I know how to walk, and I know how to walk the

knowledge of the creation and the Creator. That's all. You can do the same, but you have to be able to, don't create dogmas, don't create limitations of, because I have been told this should be. Accept the knowledge and add to it, the way what you think can be. Not what you have been taught, (2:02). and you are trying to frame the new knowledge in that frame you've been taught. It's not a painting with a frame. It's a U blank, it's you who paints it, and it has no frame, it has no limitation in understanding of it.

What do you do if you land on Mars and you see a new D, "let's go back and ask Mr. Keshe what it is." Or let's go and see what the others say, or you have enough knowledge to analyze it, understand it, react to it, and make the best of it. That's what all these teachings are. Always go back to what I told you, my uncle in Tel Aviv told me, when I met him for the last time in 2000. He said, when a friend or a member of the family went to Moscow and came back, in early beginning of last century, he said, the Russians have a metal bird, it flies. We all laughed at him "metal bird." A few years later we saw the planes and the .. airports. Was it him being crazy, or was it our lack of understanding that the knowledge and T has extended. We were blind to it. This is what it is. The knowledge is there. Are you the man who is in the Moscow, or are you the man who already seen it? And you are one of those who will see it, as you develop more to. Then do you rely on the others to accept it, or what you've seen, and you have decided, and you are creator to the next condition. (2:04). Openness is the key to understanding the creation. That was a limitation to fit into the books you read, is how you have been controlled by yourself and nobody else.

You don't need nuclear reactors. When you look at this reactors here. Next to it you just see a shadow of another reactor… The reason it is interesting, it's the capability, and ability to make things according to what we have. Many times when I look at this, it makes me laugh, it brings me different kind of joy, to understand how, at the same time as being able to, you are limited by, your own, what we call, environment, your own conditions. Let me choose a couple pictures maybe I can explain it in a much deeper way. When you look at these reactors, you'll understand what I am talking about. Because it is very fundamental, what we have, what we could have, and what happened to us. … .. it's the same reactors, you see the flying reactor on the right side, the mother reactor in the middle, and then you see a metal reactor, (2:06). … plus its flying system. These metal reactors for us to build. it took us nearly 1.5 years .. the metal have to be brought in from S. Korea. It took the Iranians 7 days because they had the facilities to build it in Sharif University. …

When you have the facilities you do it in a much faster way. When you have other facilities you just take time. This is what the T is, what you can make best of, in what you understand, and then you add your own flavor.

In 20 - 30 years time, down the line, many of the things which now is done by KS, will come open, that they use the T. By the time now, people don't see, they don't see the benefit of it, or they don't understand it, while others are using it. But at the end it's benefiting mankind, and that was the whole purpose of teaching and open sourcing.

(2:08). It's the same with you. You have to be teaching yourself and opening your eyes into the full D of the work.
Any other question

Q: .. Was the divine wind that protected Japan from invading Mongols over the sea and Russians over land, ?
K- Do not know what you are talking about
Q: .. Samaerai offering tea .. (2:10). and have these super powers?
K- What do you mean?
R; He's talking about lowering the heartbeat frequency close to the earth's 8 Hertz vibration….
Q: In Bible Israeli soldiers passed by with screams tearing down the walls of Jericho. In this case is it the same phenomenon as the Japanese divine winds, or the indigenous rain dance?
K- Do you have any comments. Rick ..
R; I couldn't choose between divine wind and rain dance. I don't think it would be the same thing. I don't know what they are talking about. Perhaps it's more they enter into a state where they are more tuned to the physic realm, maybe see into past and future. powers .. the leaders have used priests and seers .. that can tell them what to expect ..
K- You see, it's one way of explaining it as you do. (2:12). Maybe you .. what we see is that if we create enough energy, that we can extend it beyond the boundary, or with interaction of the other fields we can extend it. We could create energy fields, which can cross walls, and god knows materials, or Gans's. This is not a magic. It's understanding how we can increase the field strength or matter field strength, that there is no resistance.

Did they manage to create that kind of fields, through emotion of winning, wanting to rule? The way we sweat when we get excited. The way we grow when something happens inside us. If it's 2 - 3 - 4 turn of the same state, would that or did they create a condition that they could balance the fields of the wall, or whatever, because it was made of brick and mortar. What was that wall built of ?? and a component of it, are within the structure of the physicality of the man, that he can make the Gans strength of. So now that we can explain these things. It’s not that it can be done, is that we have the knowledge, we know how to do it. We know how to expand it and extend it. We can do a lot of things nowadays.

I get a lot of calls, I had a meeting with, (2:14). somebody in the nuclear industry last night for about an hour and a half. At the bottom and top of the conversation and everything else, what I get from a lot of you, "Mr. Keshe can you help us with the side effect, can you help us to stop the effect of whatever, with this new plasma situation." Yes it is, yes we can explain why so many people are dying of heart attacks and everything else, and some don't, and what happens to what.

These things I can clearly explain. Can you stop the effects of the 5G with the, what you call, the new injection processes? Yes you can. We have the knowledge. We saw it yesterday a couple of communication companies in US, stopped using the launch of 5G or G5 around some airports, because of the interference and we saw the first interference

with the landing gear. We watch and we see, and we understand the T. Many of you write to me in many chats, "can we stop the whatever is in the new injections?" Yes you can, you have the knowledge. But you haven't understood how to use that knowledge.

Inherently, when you are injected with anything to your body, be it vitamins, be it whatever, you create that material. It's the same as what I said, when you enter the system. (2:16). This is how much of it we understood. I just received a picture .. from our team in the background, which is fundamentally interesting if you understand it. This is the picture of the flight system (being) put together now in China. There are no reactors built in yet. They are finishing the inside. This now is a mater state system. The guy standing there (in the picture) is still a man.

Once we put the reactors within these walls, then we create a universal system, a plasmatic system. Where the same brain of the man, internal structure, becomes part of the field force. His emotion, where to go, dictates the position of this system.

No scientific organization, no organization if the field of space T, on the edge we are, so openly shares knowledge and pictures. Because we are not afraid, we are looking for extension, addition, and collaboration. You the KS, other governments, other establishments, other scientists.

This is what I explained to you. This is now still a house, a room you enter, (2:18). because we haven't installed the what we call, creation of the fields to make it into a Pl. There is a big difference , there is a massive difference between .. the two conditions. When this system, when this structure is sealed, here you are a man, when I seal it, you are in condition of the plasmatic field, there is no rocket propulsion to hold you. It's interaction of the field of the system. As I said, it creates both fields inside, and outside. Inside keeps you intact and the condition of the Pl. Outside interaction of the fields of the planet or any environment to fly. Inside it creates life, sustains .. and maintains life. Outside protects life, from outside, from what is inside. At the same time finds a position in respect to.

Go back to understanding in what we did, and I wish Rick one day have esthetic pictures of this, that we can use, because we do a lot of work there. When you put a magnet, and put other magnets, (2:20). and you put another magnet, and you put a series of magnets on the table. You got to understand, the fields interacts, creates position. But this is interacting with this too. And part of these fields divides to interact with position between this and this. .. , and collectively creating a new position. Where this one divides somewhere else to this one, and then plus the field of this.

Division of M fields create a condition of MaGrav positioning, and this is what KS have not understood up to now. Why it takes this position, because not only interacts, not only the field of these two, there is a fraction of this field as well, which totality dictates. It's the same with this one, fraction of this. The same with this one, position of, fraction of what comes out of here, as well, dictates position, it's totality. And then with another …

Then we'll see that M fields can be divided. Not only you are in the dilemma can you bend it, we can with the new knowledge, even divide it. But how do you divide it. That's a skill, that's a knowledge and it's done every second of life in your body on planet earth, in the SS and the galaxy. (2:22). This is the understanding of T, of the knowledge of the M fields.

If I put you, as you saw with the man in the craft, and put the Pl condition, I have to bring you here, but at the same time, I have to inform this one, that you are here too. And then be able to transport you, if you want to, to this position. Understanding what I have to gain, and what I have to give to maintain the same man, does not matter where I take him, I deliver him the same. Unless the man's soul decides to go a different way. And the environment changes, and you want to manifest in condition of ?? earth. I want to go to the moon, but still to be a man. No problem.

What conditions around you I have to create to maintain you as a man. The freedom to be able to walk without any clothes. Up to now we sealed you in the clothing, now we seal you in the envelop of the fields, that gives you that condition to ?? make. We create you the bubble, but understanding what that bubble needs to provide you, for you to be in that condition to look like a man.

What happens if the bubble bursts, would you still look like a man, or would you survive as a man? What do I need to add to bring you come back the same? And you become a quarter of size you are. (2:24). Or you become 10 times bigger than you are. We need to understand, once we understand we can apply.

Very soon we'll see the flight reactors in AZ, Tehran and Austria, and then we learn more. Then we bring in scientists to create the fields of the moon for earth, and travel to and come back. But would the knowledge be extended enough by June, that the man will be able to travel as a man, to the moon and come back. Because just ?? getting man to the moon and saying, "oh, you're on the moon" and then bring him back. You want to let him loose, you want to let him enjoy, you want to let him to understand the creation? When you go to sandy beaches of Miami, you just don't want to see them and fly back out, you want to go on the beach. You want to taste the salty water of the Atlantic, you want to touch the sand and how it feels in that water. It's no good taking you there, and saying, "that's it," go back.

But to travel ?? this span in a matter of a day and back, you need to bring a new T, .. new understanding. You need to bring a combination of the knowledge's just to be able to do it. (2:26). This is the problem, that KS have to understand. This is why we are negotiating with NASA. We just don't want a bunch of people from propulsion and trying to force their way. We want them to understand the new way, and see what they can bring in with the landings and everything else, we have to consider what machines we have to make and the rest of it.

This is the key to the next step of expanding the knowledge. Understanding the totality, that the field has a, what we call, RNA, an emotion, and understanding that the fields can

be divided. This caboodle which we carry that, if we can bend the light, isn't that, if we can bend our own understanding, that we bent it ourselves, not to see the reality. Now we do, now we have no choice, we have to, expand the knowledge and understand how to do it.

As I said, this question came to me at the age of 8 and 9, at the x-ray machine. If that thing can create that thing, which goes through me to add to me, or take from me. I want to be able to do it in a free way. I decide, if it is X-ray or Gamma ray. (2:28). I remember when I was just the first years in England, I wrote to my father, you know this new machine MRI, can do more, than what you think can do, and the way it's done is not the right way. He wrote to me, Mehran you come and build it, because I know you think different way, and it might work the way you think.

Because we use matter state electric current, so we are limited to matter state entity and condition. When we use a plasmatic and maybe use same system, the same knowledge, the same know-how, we totally achieve different conditions and positions. What happens in our knowledge, once a gap is in our knowledge, doesn't mean it doesn't exist? We have to find out how we can create and build ourselves on that position of knowledge. I battled for 30 years maybe more, to understand the gravity, but it was sitting right in front of me. Because I wasn't ready to analyze it the way it is. I wanted to force partially, and maybe the conditions which I was brought up as a scientist and nuclear physicist. When I saw the power in Pl, and how you can use the same thing without matter state. The game changed.

KF now is a scientific structure, that depends how much of the science you understand. We shared a lot. You maybe understand the agriculture side, (2:30). somebody understands the energy, somebody understands the other part of it. But everybody might understand 2 or 3 of them, in a true sense, that we can use it. I am not there to show this can be done, just to become a magician. I learned that from MaGrav Blueprint Week. How everything was becoming so ridiculous, you feel it's your right to take it, and if it's not what you understand, something wrong with you. No, there is always something wrong with you. You haven't understood. You haven't understood the principle of the creation of the MaGrav system. The blame is not in the pot maker, the blame is that you don't know how to use the pot. The pot is not for sitting on it. It's for to drink out of it. You are sitting on it. As I .. you have to understand the science not to become copycats. As long as you stay in copycats, you stay in same frame, these past thousands of years. Any other question.

Q: Azar .. (2:32). .. I want a confirmation of this. Today I understand what you explained today, I think the UC has a lot of power. Just like the positioning, of what we have, is sometimes a little crooked. The way can explain it is this, the way I understand it in my mind, you see sometimes how you buy a gadget and read the instructions and you have to add this piece to this piece, … once you add to it a light shows up … manual … (2:34). ..
K- I am going to ask you a very direct question. This question I put to many religious people. It's the first time I put it in public. You talk about the eyes and you focus or

whatever. Can you tell us why, or some cases, where the man dies the brown of the eye (pupil) moves to the top, then being in the center.
Q: That's because that's the place soul leaves.
K- Why does the eye of the man moves to the top of the eye cavity, when the man dies? What happens when it's not, or when it's in different position? Why the majority of the time the eye moves to the top? (2:36).
Q: …
K- why? Even if you are flat on the bed, you look up straight.
Q:
K- if you are flat But one day I will answer this question . .. you speak about visualizing it and seeing it. Maybe some of you KS can answer it. But why does it do that.
Q: …
K- One day I give you the answer. In essence we have to understand what we want to accept and what we want to see.

Any other question

Q: .. (2:38). .. When we look at the neutron its behavior, it's a giver. When we look to the sun for example, it's radiating out and it comes back, and when it's radiating out H, electrons, protons and they come back again. Some places or every place they meet again. H, E, P come back tot the sun and meet with the H which goes out. As we know the ones which come from the outside boundary of the SS have lost their field strength and are weaker, and the ones that come from the sun are stronger. Both are 2 times electron and proton, and now the … then has the behavior of a neutron that it wants to balance the electron and P that comes from the boundary …
.. (2:40). so on the boundary gaseous planets are created, and in the middle planets with waters, then solid planets. This initial

Do I have understood that correctly.
K- You lost me in your explanation, I don't understand exactly what you are trying to tell us. Would you like to try again.
Q: What comes from goes back to. Sun radiates out H they loose their field strength ..

it takes the role of the neutron.
K- There are 2 things. You touched on something, (2:42). which has not been understood, but maybe in reverse we have explained it in the atmospheric condition of the earth. Because our physics is so upside down that it baffles me we are still going on with it.

In the present time with the Pl knowledge, we take the interaction of the fields of the sun and the earth, and this interaction creates a friction between the field forces, which leads to creation of plasmas. **Some of these plasmas, through interaction with fields of the earth, and getting pulled towards it, creates the light, as we see it**.

Some of its packages are kept, the extent that by interaction of the Inertia of the matter state, create the matter. Yeah? When you speak about the creation of the H, the present world of science cannot explain it. But now we can explain in a different way. The center of the (sun). If we change this in way, the same process, but we change it with materials, and the change of the fields, on the immediate surface of the sun.

When, now that we understand the science of the Pl and the Gans T, we are adamant, without a shadow of a doubt, (2:44). the center of the sun is not hot. It could even be at the freezing temperature. But as the temperature has nothing to do with the Gans's and the Pl, it creates a massive interaction of the fields, that this creates a large, a very strong M and G pull. The interaction of these fields, with these packages of matter state, what we call, could be H plasma on the surface. The same as it created light here (on earth), will create 2 conditions, the light, or as a field energy, the interaction becomes light for us. It's not a light, that enlightens the whole of the solar system (SS). And partially in this interaction we create heat, because of the density of this layer and partially the same history goes on. Packages of fields are created, which are released in the SS.

Everything is not at presumed today, in the strength of the M field radiation. This interaction by law of physics, by understanding the Pl T, lead us, has to, and it definitely creates packages of the Pl, which are floating on a continuous basis, or getting attracted by different processes in the SS, (2:46). and they are in the atmosphere of the SS, some of them go beyond.

So we don't create H on the surface of the sun. We create Pl fields of a spectrum of Pl strength. Goes back to waves and particles, fields and photons. What is accepted and understood in one, is applicable in all dimensions of the system, it cannot be any other. And the interaction of the strong fields from the Pl in the center of the sun, with the plasmas of the lower strengths, which are created on the surface of the sun, creates the heat.

It doesn't meant that the center of the sun is hot, and it does not mean that only H is on the surface of the sun, it is accumulative combination of fields. What we see, has a very strong theory in the background of the centrifuge in reverse. Where you have the center of the sun creating massive G and M fields. In the centrifuge, and in a vacuum, the heaviest goes on the boundary, and the lightest goes in the center. That's the theory of the centrifuge. But sun rotates at a lower rotation speed, to create full condition of Pl condition, (2:48). and the centrifuge. So what we see primarily, is on the surface of the sun, field strengths of H plasma. Where does the heavier element created go? (draws a line and mark outside sun).

In the world of science (WOS) as I said before, you can't be prejudiced, you have to have answer for everything scientific, not just because Mr. Keshe says so. It's just because scientifically has to make sense. This is why we are not a cult. Just because somebody says, we accept. We are given the freedom of analysis, understanding and developing.

If at this level, we see, we add to the layers of the earth, by attraction, by creation of Pl conversion to the matter. The same thing should apply to here (sun) in a plasmatic condition. But we are in a centrifuge vacuum condition, why do we get, or we claim to have only H on the surface, and as you said, because this is the way you understood, the H travels the span of the U. This system creates on the surface of the sun, particles and fields, it cannot be any other. (2:50). But particle in a Pl State, fields created from interaction of the Pl states, 2 plasmas interact.

Scientifically with what we understand, what we have in nuclear reactors, in Pl T, we have achieved lift and motion. We have seen creation of gravity. We have seen no heat inside our systems. We deliberately created a system to confirm this. If you go back, I'll show you how we know this, you just don't accept this because I say so. Because this was part of a research, when we built this reactor.

We wanted to see if the center of the Pl in the reactor has different temperatures. The answer was clearly, clearly no. We found actually, in a couple of tests, that we were lower in temperature inside. Because … That's why we went completely into the plastic, or what you call, PVC systems. … this and this picture, if you look. Dean … … (2:52). ..

When we did this development, we considered if the Pl is heated inside according to the present knowledge. That knowledge was there 15 years ago. This was built in back end of 2007 - 2006. When you look at this brass part, it's in rings. We inserted tubes into the center of the reactor, in different positions to measure temperature, Pl current, Pl flow to understand the interaction. In tests, physical tests we saw no rise in, even in the flight condition, in the Pl center position. This is why the new FS you have, can work at room temperature. Because we are not in the dilemma of high temperature fields Pl, we are not in the cold Pl fusion condition.

We understand the process of the creation, and the Pl. This confirms to us, this test 100%, that the surface of the planetary system. … you see these rings, and you see there is a probe in each rings, goes to the different depth of the reactor, (2:54). in both of them. This is a FS support and the other one flies. And you see it, each ring is connected to different depth of the Pl, and at that depth we can change, the …

We can see or change the Pl composition. What happens if we change the Pl inside at a different rate, we didn't touch the inside of it. If you look at this system, it's very simple, … If you look at this system here … This one goes to here, this one to the center … the 4th one to another position … And this here, tests the envelop, the Pl here. This tests here … and the same here. So you could increase gases, and change gases, (2:56). to the systems and see what happens, by keeping it at a centrifuge condition. We could dictate where each layer sits, what sits. We could take the outer layer off in a specific way. We developed a T for it. We could take this layer off, and allow radiation fields in a plasmatic condition to come out. Create an aura. We decide the strength of the aura. We decided what will be shown and seen here. I spent nights and days in the lab testing these.

This showed us, we don't need steel, and all sorts of things to create to hold the hot Pl. Temperatures, current flow between layers, was continuously giving us information.

I always said, the biggest mistake Belgium's made, was letting me go out of Belgium. Where in Bruges we were just about to complete the most advanced FS control. This is to understand on the surface. Here by changing the composition I could decide if I wanted an aura. In a way, we call it aura. I call it plasmatic field shielding, defense T. (2;58).

Yesterday I .. was talking to the most senior American military officers and I explained to him, play a game with us, we become equal. Work against the KF, you loose. He said, Mr. Keshe we'll put one of the top scientist very soon to take this matter on. Because we don't have a choice anymore. We are moving T to AZ, we have to deal with American military. We have to deal with Americans military space T. We have to deal with Chinese space and military. They have to understand the game has changed. We have structures, we have technologies, we have built systems. But we have scattered the T so much, that more or less, only me knows, where I got to bring what out, to put together, and what to get.

It's the same here when we changed it to half a sphere, we created the same, but we saw the dome different. It gave us a stability in flight, .. in control. Here we are at the mercy of the environment. Here I control most of the things, because I don't allow the bottom field to rotate. Here (sphere reactor) the Pl continuously turns, and creates that field change. Here I don't have that, they only can interact. That's why the FS are that way. Even if you look at the new reactors, (3:00). we have given you … We have given you a platform, and … here at this platform .. we have built the EU. If you look at in reality, it should be … (3:0?). .. instead of making a system, creating and doing this to half a sphere, all we done in the new system, we brought the half a sphere slightly lower, that allows us to create a home, a dome. With this, instead of loading you from under, we load you from sideway. But in a way, the other half of this system if you look at it, sits here.

By controlling the reactors in the structure, we can create that, what we call, the fields around it, and create that sphere plasmatic-ally. (3:02). It doesn't matter what is outside the skin of the mother, the shape of the child, the face of the child, is decided by the mother inside. It's not only the fields inside, which we look at what you are going to give us. This system is 2 sided, creates both inside and outside.

Nothing has changed, because we know how to walk, we can run and jump. That time we had to be half a sphere, now, we don't need to be half a sphere, we can be any shape, because we can make that shape. But with the Pl T we have access to now, we can make our spheres all the time the same. I need to change a few characteristics on this reactor, then this reactor, I create a good enough homogenous sphere.

We just solved the panel of the control system. Rick can show us, it was shown in part of his teaching this morning, all those knobs is to control everything. This is a scientific organization, and just because you don't understand it, or you think of it, doesn't make it what you want to do. Everything is tested, everything is composition to be. All I have

done, for me to build a .. massive structure, that to become this, (3:04). as a UFO, and you could get in it, I needed a huge air hanger. What I did, I changed it to this (FEU) , and you walk into the dome. But this (huge UFO) was to create the fields, now I use my reactors to do the same. I changed the shape, but with controlling reactors I keep my fields.

I am a genius in what I do, because I know what to do, because I understand the T. We are Messengers of God, and we have access to the total knowledge of the Creator.

I am the Methi for those who have doubted it. We know how to bring man to the point, but it is for the man to understand how to get to that point.

The new EU still will create fields, both ways, and I said before in the teachings, we built in the structure of the systems, that these fields do not become dangerous to the system, or to the structure of the Pl. What supports life through the blood structure, supports life in the U, according to the field interaction. It is to understand the T, .. the KOC, then you can create whatever you like, and we understand the totality. (3:06). Enough for the man at the moment. When the KS and the scientists of man, become more educated they will not be happy with this crumb, they'll want more of the cake. Then we teach that time, about the cake.

You've got to understand, a lot of things are in front of you, but you don't see it, a lot of things are getting done. We have to do the tests, that the man sees there is no magic.
Any other question.

As was said in the NACT last Sunday, sometimes we learn more in the question time than the teaching side, according to what we want to understand. The knowledge has to be shared freely, but you have to be able to understand the knowledge that it can be shared.
Any other question.

Q: Kay, … (3:08). … to unravel the way for us … When we do get to this spaceship .. as it happened with disabled children. God ever forbid, that we could not manifest on the other side, and the soul could not gather up all the physicality, and something's missing at the point of arrival. Is there any way the soul can recoup the rest of the missing parts, so to speak?
K- There is a T for it, yes. In time we teach. It is like when we see the situation with handicaps. It's very much, as we open the KFSSI, we have at the moment planning a number of researches to be run immediately on its establishment. One of them is the condition for children who are born with brain damage, or structures with the birth tunnel, with lack of O, or other whatever happens within the womb of the mother, and the birth position. (3;10). We see these as with different names. They come up with when they become older r whatever.

The KF, one of the first researches we launch, and I will take charge of it fully form the beginning. now that KFSSI has been written in to become a company. Is this T, this part

of the T, which refers back to what you said, what happens if we deliver missing or partially not working. We have the T, and this conditions, which is now bothering many parents, in children being born with a lack of O, and we have different names for it.

We have the knowledge and we can change it. It will be one of the first researches .. … to prove to show, that children with brain damage, born with a lack of O can be, during the first year of life, be corrected, and develop the brain fully, that auto mechanism of the system of the body .. can go perfect. We don't get handicapped children. I have been asked this many time. That, can they be helped, and yes, it can be done, .. (3:12). we have the knowledge to do it. It's exactly that, what you call it.

If we can do that with the .. the position and brain of a child, we can do that with the delivery of a man (in FS), if something goes wrong. But we need to understand how. To what extent, we can interfere and change. I do not think a child should be brain damaged or physically impaired due to a few seconds at the time of birth. We have the T and we put this into research. This is one of the first things we'll do at KF Institute .. research into change of the .. new born babies with such a condition. If we can do that, we can do that in our FS. Yes we can be done.
Q: … for all those handicapped child and it's not fair. …

K- They have the same with the injections, the 3 childhood injections. The triple injection mix now, creates a lot of this. This now can be changed, using the new T. This will be another one, people with the side-effects in their children.

The new side effects with the new plasma problem we have around the world. (3:14). We have the knowledge, and this will be part of the first developments of the KF research Spaceship Institute. This is partially why .. we said, the 48 units getting shipped to AZ, part will be given to the American military for changing their mental condition. Because now we can rebuild it, .. restructure it. This takes a lot of pain from a lot of people. We have the knowledge. It's not beautiful it's knowing the knowledge and science. Thanks to our team in Austria we'll see these rolling out …

…>>>>

It is something we have to understand, it's the same as now we understand, the problems with the (virus), what they call, the new injections with different materials. You can stop all the damages and use the best part of it. The combination of the two creates a beautiful condition to be able to recover.

Q: I am glad to hear .. because so many people are impacted with what's being rolled out, and they are carrying on pushing to be rolled out further. …
My 2nd question. you have the key to the creation so you know how to create, the Materials EU is one of them, .. you talked about before.. you talked about creating, (3:16). a fish in a tank, or a human, as you mentioned earlier. If you were to create a human, or give birth to a human in a tank, what would happen to the RNA and DNA, as

it is not coming from the 2 souls of the mother and father. What would happen to their experience, emotion and to their looks, because this is a new creation without any previous history of RNA DNA are they going to be the same human as you and me, not you definitely, … ?

K- We are not creating a new people. And if we do, the same as when we created the Cu and Zn, in the lab in Austria, they carry the essence of the soul of the creation and the U. This is the essence of the creation of the Mitra. We create the soul first, before we create the physicality.

So when we test the materials, which we produce, you cannot see it having any origin, because it is created from the fields of the environment. Even though we used Cu or Zn, or whatever in producing them. They are fields of the U, not matter state of position of the earth, where they came from. If you were in the diamond business, by looking at the diamond, you can tell if the diamond is from the ocean, .. mine, or .. from a river. (3:18). If you become more .. in depth of the knowledge, you can say from which river the stones come from, the majority of the time … you can tell the origin. You can do that with most of the mining goods as well.

But when you tap into the U, and universal energy you create Mitra. You create the soul of Mitra, which give D to its physicality.

Q: I thought …. because of Inertia ..

K- What would happen if you created in the middle of space? You'd become one of those people, nowadays born in the airplane, and they have earth nationality, then what nationality, they have a UN passport. We don't have such a thing in the space.

But it comes to the point, that would we become the Creator, and create Mitra to have a companion and a lover. Someone to love and love back. What happens when you have this knowledge, and you have the machine, and you are the last man standing? Would you stay a hermit on your own, or use the machine to create a soul to create a companion? This is the depth of the knowledge we give, (3:20). but it depends how much man understands.

Q: … considering the fact it has a lot to do with how far humanity can push it. … Because if you see what is happening in today's world, it's a ?? where humanity is being forced into this virtual reality, in order to find some sort of love, peace and calm, because of this rat race life we have created. Being able to create a companion at strength of Mitra would be an absolute blessing, obviously humans are a little bit funny, they could take Mitra ?? …
K- Actually Mitra might not become funny in physicality (laughs). ?? This is questionable, because we are conditioned on the condition of this planet, and the environment of this planet.
Q: I am sure Mitra will put every soul in right direction once it has been created. ?? …

Understand that the STM has create the physicality, comes from the same source, from the Creator. So far you have explained that once we die, the soul takes different D & position according to what the physicality has created, STP. It takes position according to what STP has to offer at the point of departure. I still do not understand that, (3:22). why would the STM, which is from the Creator, peaceful, got all the knowledge, nothing but love and compassion, .. would eventually find itself in a worst position, as you said, those who did crime, and genocide, they become specks of dust. Why would that poor soul, has to get to that position, just because the physicality has been misbehaving and ?? How is that justifiable?
K- The thing is, you have to understand, the STM, even though it is encaged, still it is responsible for the man. How come when you get enlightened through the soul you do good things? So the soul has the responsibility, this is what it says, it's responsible for the behavior and conduct of man. Partially it's what we let the soul, to allow to reach the D of physicality.

What we see has to do with what we understand, with what is to come, what is to deliver. As I said, it's very strange, KF has taken root, or it's headquartered now in Austria, where less than a century ago we saw mayhem in this area. Beginning of one of the largest mass killings around the planet. Why did we have to come here to get root? To put it right the soul, or the souls, or to bring it back into the position to be. (3:24).

There is a reason we are here. It's not, even we came here coincidentally. But souls bring us to the point of where it be. Maybe a lot of souls in this land need to be elevated to cover for what was then, and still carries within them. We do not know, but on the D of physicality we can never say so.

Because the STM has to interact to elevate. And it is responsible for what the STP does. We all can kill, rape, and torture anyone. What does our soul say? It's wrong we don't do. This is why we say, this time we elevate the STM, that it never does a crime, because it is responsible for it. We don't frighten you with the Church and the Cross, and what you call it, confession box, and punishment, and the Day of what do you call it (Judgment), doctor ?? or whatever you call it. It's the maturity of the man and allowing his soul to take over and be expanded.

Q: Thank you .. I hope the plasmatic world is behind you to get this mission and get it done as soon as possible …
K- Yeah, 7 billion of man is opposing it. That's the hardest part.
Q: I am sure they are coming your way. We do all our praying, I am sure the rest of humanity will be coming your way.

K- .. Don't forget something just because we don't talk about it, or push it, or bring it to keep it at the front. It's the responsibility for KS and the UC, (3:26). to carry on supporting the peace negotiations in Vienna. We have broken through, and we see the end of the tunnel. We see a lot of things to break down, and thanks to everything else, to keep the support for it, to expand and to extend.

We have a special request. One of our dearest friends of KF is in the hospital. We hope, we need the support of the UC, for that soul to find position and peace. It's come to our attention in past 48 hours. This soul needs a lot of support an help. This time you don't have a target to hit at, by name, by nation, but for you to support the soul of this KS who has been amongst us for a long time, and we all know, to be supported to be able to go through this terrible time in the life in the condition he is in. We hope to be able to overcome and break this point of our ?? ship in this life.
Any other question.

Q: Guatua I have 2 questions … (3:28). First explain meaning of Methi… in depth. 2nd, you just said the KFSSI is now headquartered in Austria, what does this mean in terms of you working within Iran.?
K- Go back to your first question
Q: … What is Methi?
K- Methi in Farsi language, in the .. Persian or Shia language or same in Islamic world, is the one who brings man to his rightful position, and bring a new life. To change the man and everything will be perfect, that the man does not know crime, and we understand the totality of the creation. That's what it is, the Promised One who completes the cycle for the man, bring that what we call heaven, that there is no crime, no hunger and the rest of it.

So with the knowledge we have fulfilled in knowledgeably, not by talk. In the essence of the scientific basis, you all know how to feed yourself, you know how to elevate your physicality, and you can do a lot of other things, that you don't need to kill. (3:30). It's the time when the man chooses to switch. Secondly it's the fulfillment to understand the Creator, as to be one for all. This is another promise of the Methi, and this has been fulfilled by the teaching of the KF.

In a way, KF as a whole, as the KS, we all become the Methi. In a way, we have understood the process of the creation, and we have to choose when to switch. At the same time, we have understood that there is no need for a temple or a church, or whatever, to understand the uniqueness, and the unisons fields of the creation of .. the Creator. So with the understanding as we did, in the teaching today, you change that soul and the physicality, the neutron with the electron and proton, to the Creator and the man. It's all the same.

This has been the biggest problem for mankind. This is the promise of what we call Methi, competing the cycle of understanding, both the physical and the soul development, that they are both connected through the understanding of the science. Not rhetoric, and hidden beliefs, that we don't explain. This is what the problem is, and this is what we call the Methi, this what we call, the Promised One, return of Christ, the .. Messiah. It's all the same name.

It's the wish of the man to get to the point, that he understands all, and corrects his way. Not by fear but by understanding the knowledge to understand the totality. So when we say we are a Methi, it means we have understood. We got to the position of

understanding and we share it. (3:32). Then it is for others to understand, from what we share. If you understand and don't share, it becomes like stealing. We understand that, and we share, and this makes us Messengers. We pass the message of what we understood, and what we deliver.

On the other hand you need a soul to be enlightened to a level, to be able to understand, that he can guide the others. That is the job of .. the KS. This will create huge problems for .. the KF, and personally for my life. The term of my life has been to end this, that the people don't become enlightened. It's not a stopped. Because the knowledge we share creates that condition of understanding and enlightenment, for the others. This is what the world religious leaders and world governments are afraid of, educating the people. Because when you educate people, you can't abuse people.

We've seen that in the history of Iran in the past century. Iran before the 1970s was 90 - 95% illiterate, and Mullahs and Ayatollahs could say anything, they could not read Arabic or understand Koran, they made whatever they liked. Because they turban, people believed them, because they couldn't read. Now 95% of the nation is well educated. They don't understand rhetoric, and made-up. Then cannot accept, because they cannot fool anymore.

When it comes to that point, it becomes end of the term, because people don't accept. (3:34). The same thing is in Vatican, we see it in Italy. People don't go to church anymore, very few believe in what the Pope says, because there is so much abuse in that building, that people start looking into what is the truth, and what is there, and do we accept what they say. Because they get educated and decide.

That's what is to come. The Promised One, the final .. the PO is when your soul gets enlightened to understand the truth, about yourself, and your creation and your Creator, without anyone in-between. This is why we say everyone of you is Methi, because you have to get yourself to that point, to that threshold. This is one of the reasons KF teaching are banned from all televisions, and everything, because once people understand this, we don't need them to control. But we ?? don't need the television to reach the STM, to reach, and it is very easy. But the STM has to be educated.

So when we say we are Methi, all of us are. What we call, it's our own understanding of elevation of our own soul. Your job once you understand, is to share. Otherwise you'll be deprived. A pocket when it is full, cannot receive more. You have to empty the pocket, that you can get more in. That you can share more.

It's .. life is like a swimming pool, and it's got … a pipe and a tap, (3:36). The pipe gives some putting the water in, and you got a control, when it reaches to a level it doesn't let anymore to come into the pool. Unless on the other side of the pool you get a bucket and empty, and take out with. Then the floater goes down, and more can come in fresh.

That's the responsibility of the KS and every Messenger. It's a pool of knowledge and we stand on one side of it, and we spread out, take more out, and the more comes in through

the fountain of life and knowledge from the Creator. You're that man with a bucket in hand to water the plants, which is the life of the man, and let it grow, both in physicality and the soul.
Your second question .

Q: .. My second question is .. KFSSI now officially head quartered in Austria .. what this means in terms of you working in Iran ..?
K- We came after the incident with Fabio, which was planned, and those who, (3:38). we kicked out of the KF knew about his, my assassination, which happened by accident, become his. They thought they will finish the KF. I could not teach in Italy anymore, because the burden of the death of Fabio was too much.

We moved out of Italy, of it moved out of Italy more or less, to Africa and then to China. Then by whatever we came to Austria. Knowing the situation living in England, Belgium, and then from there to Italy, then Africa and China. Coming to Austria we found a peaceful nation.

You'll be amazed how safe this nation is. Safety and living in peace is one of the cornerstones of my life. I never was allowed to have peace. When I chose and we came here, we found peace, and then peace came into my private life, by getting rid of those who were agitating, and continuously creating, and informing the government to kill. In staying in Austria we found a peaceful nation, where we can support in a professional and legal and correct way the structure of the KF. To that means, I set out with the help of the Dr. Klaus Prille to setup the condition for the establishment of the home base for the KF, then what we went from country to country. (3:40). In Italy we couldn't have, established we went from the north to south, because the misconduct of the person, who we kicked out of the KF. It became impossible to live in the house in the north where we started the KF SS Institute, which were conditions of absolute misconduct, which became public to the whole area. We could not stay there anymore, and in the South it became the same. Then we found out, it was also getting poisoned, and ??

We found peace in Austria, and with it a permanent home. We established the first company KF Austria, then .. now there is about 7 companies under .. KF Austria, and most of the subsidiaries worldwide, except Markray, is controlled and held by the Austria company, as the parent company. KF Space GmBh, which allows us now to become a space organization. KF space program has always been on the Internet and teaching on the back of structures. Now it's an independent flight systems company. We can test, produce, manufacture, we have been given permission by the Austrian authorities. Then we setup KF TV on the same way. Now the KF space institute has become a registered company. We physically are opening a university, an institute research center . (3:42). It's not anymore that you come on the teaching 9 to 5 on the Internet. We are securing premises for an institute here, and then it moves on to AZ and Tehran. There is negotiations with Chinese government to extend institute to Beijing .. .. All even the Chinese and .. other structures … now we can do research .. let's say effects of Corona, because we are an institute we can … do the research officially. This is the change …

Now we can do it as an institute , publish papers, and bring other world scientists. .. a legal structure that we can work …
Not only we bring the KS, but the scientists from around the world to do research the way we do … systematically, with everything that fulfills the scientific criteria.
KF institute (3:44). .. Now has a physical structure as an institute. .. we do not make it into a university, .. because to make it into a university we have to give degrees and all sorts of things. Keep it as an institute allows us to do research, straight on top of the market of the science. Then we'll see the next step. KF now as a company in Austria. ..

7 companies, parent is KF Austria ..

same thing in AZ.

Now setup the same thing in Tehran with Yosef.
(3:46). but headquarters operating out of Austria.

As I said before we bring experts to do the job. I explained what we done with Markray. You'll see Markray will on the supports and the lending from KF will start massive development in US and research.

But that's when we complete agreements with Markray and we push to the next steps. Markray forward planning is to come into NASDAQ, and that way we allow most of the KS to be involved in a deeper way. In what we call, what they want to be part of, to be done in an international level, we brought experts, thanks to Armand and John and new team which has joined in. We have brought international auditors into the Markray, and everything you will see will be reported perfectly, to create a condition, that becomes the backbone of the spread of the T around. We have the same structure now with KFSSI .. Tehran AZ, and other places .. with team of experts ..

(3:48).

It's not just on the Internet anymore.

We changed in the past year, because there is nobody to report or stop us ..

We expect a massive expansion in many directions and we feed it back too. That's why if the UC can actually do their job properly, (3:50). you can tell us where you want the next FEU, by the institute which is the research center of the whole lot, has to be happy with what is done.

We are not just sending a unit to be there so some people, kids in the university to play with. Your nation has to become a player in the space T. Not something just come in and kept in the back garage or part of the university. We have become professional and we work that way. We work with the KS who actually carry the expertise and outside expertise we have brought in.

Now if you want something done with the KF you have to go to the institutes to work with us, back as advisers and see how much you can ?? We keep our eyes open, institutes can be interfered with too. But now we work with consultants ..

It's not anymore if you kill Mr. Keshe everything stops, now you got to kill hundreds of people to stop this process. So we done it gradually. Bunch of pedophiles in Belgium and Linz
.. KF has become now, (3:52). an industrial organization. We are not a company anymore. with Austrian government we have become an industrial, which means we bring industry and governments ?? jobs. KF from now on is an industrial organization, not just KF. GmBh is an industrial …
We'll become a massive workforce and to Austrian …

(3:54).

Any other question

Q: …
K- You know I love Africa and I tried many time to work with Africa. (3:56).
We have setup a structure for Africa and you'll see us coming up in a very solid way .

Q: .. it doesn't get better than Kenya …
K- We were about to come and have a conference with you, but the Corona came. Shall we call it a day.

(3:58).

ENGLISH TRANSCRIPTION

(:12).

K- .. We welcome you back to what we call, grounds for understanding more, .. being able to serve more. … In the process of understanding the technology (T), and .. appreciating the T, (:14). and the structure that we understand it better.

Before I start teaching today, I would like to thank the Creator, the Soul of the Creator (STC) for one of the conditions we asked you to, and the Universal Council (UC) and Knowledge Seekers (KS) to support us with one of our leading KS who was today, 2 weeks in deep coma. We received news today that she has come out of it, and we'll see how we progress with it, and if he can join us in a short time, back on the ranks. We'll see how everything will take shape as he recovers. It has been a burden on the KF, which we did not expect this accident, but it is not unusual to see these, as we grow more and more of us become vulnerable to what we call, the time of condition of our soul to departure, and sometimes accidents are not there to be. It brings us to the point of understanding when we have such a close people in the KF, as we went through with a couple of other of our friends in past couple of years, that it does not matter how much knowledge we have, we are always still conditioned to the dimension (D) of physicality (P). We had the beautiful Shandor with us, and we gone through pain with Fabio, one by natural processes and one by accident. We see as .. P of the man is weak. The teachings is to make sure, that we have a say in how the P can be protected. How the P of the man can bring many of us back, to the point of understanding, the true essence of the creation, from the time of inception, not at the end with the fear of departure.

As I received a message from one of our friends, we said on the ?? 92, "my days are counted." I wrote, "you have just started if you understand." We have to understand the process of both physical and Soul of the Man (STM) are all integrated, are all part of the same, .. with the same position and condition. What happens to us when we depart? What happens with us when we decide to, through the T we are developing, to create a condition of joint departure from the STM to D of Soul of the Physicality (STP), and then departing from the STP to the STM. This is the essence of the teaching as we heard in the intro.

But how much of it do we understand, and how much in the knowledge of science of man, we have gone forward to see, what we can do. We have left you, (:18). many, many messages in teachings, hidden messages, teaching messages, for you to understand the evolution, .. the position, .. many things and gradually bring you to the point of understanding the connection and totality. There is no separation between the knowledge of the P and the knowledge of the soul, because it is only at different strength, at the higher strength, at that point things take different D, but in fact it is the same process.

In the world of physics we consider elements. In the work of, world of chemistry we consider composition .. joining of different elements, being in touch and connecting with. In the D of the soul we have the same. It's our soul in our dreams, in the connection of our souls with the other souls, we go to a party. We see the mom, dad .. and the friends in the party. So we connect with multi-dimensions, with our souls. We learn how we can mix things, and what we get out of it as a product in chemistry. In the STM we mix it and see what we get as emotion. There is no difference in the D of the creation, except man

has chosen different words for the same process, according to the time of understanding the process. (:20).

The chemistry of love in the D of P of the man, exists in a much bigger way in the D of the soul. The love of the Creator for Mitra encompasses the whole of the creation to be loved, to exist. In the D of P you are happy with the love of a man and a woman. In the D of their existence and the home they make. The condition they create to nourish that love, that in time they create an offspring called a child of man.

In the D of the STM, the Creator and soul of Mitra create the whole of the U, the Unicose, and within it, they create the birth of that child. Which is the totality of the creation to be embedded within it. The best of what they gathered, in the time of the life of the two.

When we create a child in the D of the man. We give everything we have, the knowledge, the beauty, everything which is through our egg and a sperm, to create that soul, to create that new life, that represents the beauty of the interaction of the two, and the home they create for it. And so ?? it's the time of the Mitra, giving birth to the child of the man, child of the U, which gathers all the beauties of everything, the Creator and Mitra in the D of soul. have created, and gathered in time, of their existence.

The birth of the child, is the birth of the child in the D of P. It's the same in the other, where it is created through the D of the soul, that it can take the shape of P. Understanding the process of the creation, has to bring a new D to mankind, (:22). that humanity has reached a point to understand the totality. It's the man who has to decide, which part of it suits him to understand, and which part of it, is there to suit him, to fit into the D of his comprehension of his environment, irrespective of time, place, and position on earth, on Mars, creatures in different position on the creation of the U.

We create systems, we have created the shielding to bring that process a step forward, for humanity to understand. We have brought the condition, that the man from now on has a choice, to create children in the D of P, which he has done for centuries, millions of years, and ?? other creatures in the U. Or create the child in the D of the STM, and then grow it to be, the D of P.

To you this sounds strange but this is how Mitra has been created. This is how the child of Mitra has been created, to be in that essence, to understand, that with the perfection of the soul, you'll create a perfect child. The mankind has the opportunity to be able to do that. We go for fertilization, that we take an egg and a sperm to create a child.

Now the knowledge has reached a position, that the soul of the two can bring the creation of the soul first, before the P, that sperm and egg is needed, to build that soul. Then as we are created by D of interaction of the soul of the two, a perfect child shall be born. (:24).

This is a gift, this is what was promised, that everything will be perfect. It will not be perfect the way you see it. It will be perfect when it is done, the way we do it. The way

you will learn to do, creating P through D of the interaction of the souls. Or creating the soul to lead to D of creation. In the past teachings when we showed the enhancement unit (EU), I spoke about the birth of children in the .. EU. EU are not delivery rooms in the hospital, we don't put a chair in there to give life to the birth of the physical D. It might be done, it has the capability of, but in fact, it's the womb of the beauty of the souls to be able to amalgamate, to create the perfect soul to lead to the creation of perfect child, which is a child of the man. Because it is created by the D of the STM.

Understanding this and understanding how this has become possible. This allows what we call, the Universal Community to interact and create a new generation of .. children of God through interaction of the souls irrespective of the condition of the P, where they are born, or taken root of. Where allows universal interaction, allows by interacting the souls to unite the whole of the U. The purpose of the universal EU, and the teaching of us up to now, has been nothing but this, (:26). but we had to walk you though it. We had to introduce to you, the enhancement unit (EU) and every other, because man likes to play.

When we put the creatures of God, it doesn't matter one from the earth, and one from another dimension (D) of Universe (U) within the structure of understanding of the process of EU, their souls shall create a perfect soul, which that soul will decide what physical D, or combination of dimensions he or she would like to take.

This is the beauty of the new knowledge and as Knowledge Seekers (KS), now that we have brought you to this point, you understand the truth about our work. When we take you into the U Community, the U Community has to be there to accept you too. Today we marry black and white, Chinese and English, French and Germans, and the rest, and we see how beautiful the children are created out of the mixture. Now is the time and the process, that we mix the soul of the Unicose, that those who live within it, and they come in touch with each other, and they fall in love in the D of the soul, to create their own children. Where in D of physicality it is impossibility.

This is the beauty of such a knowledge, .. of such understanding, where we can share. Where we commit two souls together across the U, not on the planet. In a way, the knowledge is not the shell of the EU, the knowledge is the environment of the fields of the U, (:28). which allows such an amalgamation of the souls to take place, to create the children of God. The true children of the Soul of the Creator (SOC), and not in the D of physicality.

Then life has its own choice and condition. If a life in another position in the U is a million, or 10 million years, according to the time of the man, what happens when a man of U, falls in love with the beauty of the woman of the earth, which has a life span of 100 years. Does the child in the D of physicality will depart in a 100, or will it live in millions? Or the combination of the two, allows a new D of time, irrespective of place and position. Where the new children of the U, will live the time existence of the Creator, with the same love and care, .. understanding.

In the new EU, which you will see, will come as part of the flight, is not the flight to take man to the other position, it's the time to create conditions for man to see the other creatures of the U, through their soul in these units. You expect to fly, but we create such a D, that we can create the soul, we can create the combination of the soul and physicality, or we can create the physicality.

We have built this in the structure of the EU. EU are not what you see, and what you imagine. The technology (T) behind it has been made so simple, that you cannot even understand, (:30). the potential to what is to deliver. If we have the creatures of the U with us, amongst us, and they enter into a D of the soul into the EU, they interact with a section, which is specifically built to create interaction of the souls, with the soul of a man or a woman, who is onboard. If you enter the D of physicality of a man or a woman of the earth, you still carry the Soul of the Man (STM) and the P of the man in the strength of the working of system, and if you bring a stone it still carries the same.

In so many ways, the new T, the new understanding, the new process of the development of the EU is a flight system (FS), but what do you want to fly? The STM or the physicality of the man, or both. In the process of the development of the T, as we teach our KS, how to develop, how to understand ?? that they are looking at the new system.

It is for them to understand, that the teachings now is for both the D of physicality and the D of the STM. Maybe in the coming time, maybe in understanding the time, we come to understand the truth about, what you call, a system, which carries both, has the capability to carry both, the physicality of the man, man walks in the D of the humanity, or man on earth, (:32). and closing that door, man has to face the STM.

If you look and .. in the old system, the first system we introduced as part of the EU, what you saw was very, very clear. In the EU you have systems hanging outside, you had reactors which are there, but in the new system are not there. We have hidden the T advancement, that KS have understood, have advanced enough, that now you walk in, with a clear, clear interaction of the fields.

The problem in the old system was that, you had matter state mixing inside with the reactors and the motors, with the body of the man. In the new T it's all in the STM. It's only to understand how different states of the matter within the body of the man, work, that it leads to interaction between both, the soul and the physicality (P).

Here we have the picture of one of Chinese workers, in the factory as they are building the first 50 units, and then the first 100 in the next few months. It's very strange, but look at the uniform he wears. What happens if another man with another uniform and clothing entered, (:34). this system. What happens when you put this system in .. correction facilities, and the prisons, and we walk man with the uniform inside. It's all the criminality, which is embedded in the D of P, and we allow him to meet his soul. What kind of man will walk with that uniform out of the system?

As I said, to a KS, would walking into these systems be the "Day of Judgment" for every man, that he has to meet his own creator, which is his own soul, and himself and his conduct. The process of the teaching has become much, much simpler for us, as more and more T has come ?? out, for more and more of you to see and understand.

Would we in the coming time, when a man or a woman asked to be a member of the Universal Council (UC), walk into these systems, and he sees exact D of what they are standing for. Would they come in touch with the U Community and understand how much they have to elevate their souls, to be able to serve the man or a woman, or the animal, which is born and bred in the D of that place and language.

It's very interesting if some of you have noticed in your lifetime, if you bring up a little dog, (:36). and speak French to it all the time. You take it to another land, and they want to say the same thing to it in English or German, it does not understand. So even the soul of the animal is connected to the D of the language of the man. This is why we say the UC member are responsible for totality of the creation within the what we call, the jurisdiction of the language. We are responsible for it. Now we understand the level of responsibility.

The new EU for flight, in a way is for flight between the 2 souls of the man. The 2 souls of the man, of the physicality, and the STM in totality. Which flight of fancy would you like to take? Would we buy a ticket just for a ride, to have a fun. Or would we walk in, that we buy the ticket of the freedom of the man, from D of both P and the soul, both together.

Does not matter how and who we claim our intention, by word. It's how our soul works within which counts. As I said recently, do I love you, or am I in love with you? To a man of straight understanding, (:38). it's the same. Does not matter who will be. I love you my child, because I am in love with your existence. I love you my wife, because I am in love with your existence. I don't put separation in the meaning and the word. But in essence a man will end up to love, and being in love with the totality of the creation.

In the new EU, which we have developed, and you will see more combination of the use, and understanding, be the responsibility of the what we call, the KS of the upcoming time, to add more usages in the D of P to these systems.

From the point of view of the D of the soul, these systems are complete. They work to what they have to do, from the establishment of the time of their source. When you walk into the new EU for flight, you'll be amazed in what you see. No control panel, nothing to control it, all done through the thought of the man, the man who takes charge of all the souls within.

As we are preparing the nations to accept this T, it is the responsibility of the KS and the UC, to make sure that your nations and your sections of this planet are ready to accept, to understand and not become another fanfare. (:40). The fanfare should be in the brain of the man, how much of the beauty of the creation he can see. Not on the machine, what

goes in and what comes out. It's the responsibility of the KS to extend the teachings of the KF amongst men, for them to understand, that there are no messengers, except the message within their soul and STP. The emotion of understanding the totality.

One day as KS in the upcoming time, you will understand what is about to come and what is about to happen. Then we'll see the evolution and the change in the understanding of the totality by man. As I said, we are not a religion, and we are not a cult. We are a scientific organization for man to understand the work of his P, in parallel in the same, D of the fields, what we call the STM. One is micro, and one is macros. Depends in which D you want to go. But being able to understand the new D, those who use these systems, then they don't become prophets to the others, which they go to, and they travel to. They understand they become the messengers of the knowledge, that everyone who comes in touch with them receives the totality of the message. And it is not forced to accept by fear or by other means, but is being as a pleasure for them to understand the process of existence.

This is why we have said, this is the end of what we call, the prophet and Messengers. (:42). Because the message is within the STM and STP of the man, and no more. The game of priesthood, Ayatollah-hood, Rabbis, and the rest has come to an end. And many of them try to clean up before they hand over. They're trying to make sure everything is perfect, for their nations and the people who follow them, that they hand over a clean sheet. Because they know they are responsible for the mistakes of the past.

This goes directly to Ayatollah K of Iran and to the Vatican, and the 2 Rabbis in Jerusalem, and the head priest in China and Tibet. Cleanup and make everything ready for the time of transition. Use your positions to elevate the soul of the followers, not to create another scare and mayhem. It's the time to rejoice, that the understanding of the man has risen. To understand the process of the creation in the next level.

We had the industrial revolutions. Now we have a revolution in understanding the operation of the STM, and the existence and operation of the STC, within the man. It is the responsibility of the KS, if you have heard the message, to respond to it, to be ready for elevation of your STP. (:44). To understand the process, to be able to understand the T which is developed for the next step in the evolution of the science of the P of the man.

As I have said, many times before, we had the industrial revolution by steam and the other things, now we have the Plasma Revolution, where we understand the process of the true work of the M fields of the U, which leads to creation and collection of fields, and what we call, plasmas.

This process completes and makes man ready for the next step in the upcoming time to understand more about the science of the creation. This is not the end, the world of Pl is not even the first step in the Knowledge of the Creator (KTC). We have not even stood up, let alone walk. After we understand the totality of the knowledge of the Pl in the coming time. Then when man understands the purpose of that, then he might stand up to walk. As I said, many time this ladder has thousands of steps, and to go up 1 step you

have to 1 more, the true process of the creation. Listen to my teachings in the past, and understand them, we talk from 2 points, one for man to understand, and one for man to understand in the future, what we taught.

In the teaching in the D of P, I always explained, if the present scientists of today say, that our U is expanding, (:46). there must be a room for it somewhere for it, to expand into. So we are part of the bigger structure, that we are expanding and operating within.

Then you should have understood, if we are in the D of the creation of the Creator, and our Creator is there to confirm His existence, He is definitely part of another process of creation. Then when man's knowledge of the Pl interaction of the fields matures, man will look for a new science in the D of the totality of the creation, which creates the Unicose and beyond. Man is not ready to comprehend this, not yet. There won't be any Messengers to bring it, it will be the evolution, comprehension and understanding of the science of creation, which will lead each man to that point. There is no beginning to it, and no end to it.

It's time for the maturity of the man to understand, and in that process we evolve. We'll learn from other souls and in interaction, his eyes will be opened to a new D, beyond the D of the Pl and the creation and Creator, which he calls, the Creator or the God. How long will it take for the members of the U and Unicose to mature to that point, to see, to enter the next level of understanding. It all depends on how the U Community works in all D, to find the hidden gate, (:48). to the opening of the new, and next level of understanding of the process of the creation.

Then this will answer the question, the Book #8 where does the M fields come from? What is the origin of the fields? Was it created by the Creator, or is it the essence of the work of other dimensions (D) slowing down, have become to become the structure of the Creator we call, the God. Then what is that knowledge, what is that beauty that leads to such a creation we call the Creator.

As I said, many times if you have a beautiful partner, don't you want to show it to the others, how beautiful, how perfect your partner is, and lover is? Who does our God and Creator shows His lover to, the Mitra? Then there has to be a process beyond it. There has to be a new understanding of what it came from? What is the true essence of creation? And would that lead to the creation of what we call the Creator, which becomes the STM in the essence of D and the strength. Man is not ready for this knowledge.

I come from that D, and in totality we see the other dimensions. (:50). We come from dimensions even above that, but the STM, and the knowledge of the U is not ready for. We worship statues, and we worship the false gods. In the name of the false people. This time shall not happen. It's the STM who has to find the essence of the creation, the true essence of the origin of what we call, existence.

In Book 8, I go into the depth of this. Part of the Book 8 is already written and it starts from that point, the origin of M field, the origin of M fields which is lead to the creation

of the Creator, and the man which was made in His image, comes from another D, which man is not aware of. But in essence, again what we see as the macro of the cycle of our Creator, or the micro of the cycle of the same. It's purpose, and lives in both D.

Mankind has to understand the interaction in the new EU, is combination of understanding the totality from what I call, "the time of inception of the creation as a whole." Where did the original fields, the original essence came, that it lead to the creation of the others, and in slowing down, and in strengthening, (:52). or amalgamation of, or division of, lead to creation of one to another, and the man, and the man thereof.

Don't forget we are the creators of our children, we are creators of the cells in our body. Which cell are we in the body of the Creator? And which cell the body of our Creator is, in the body of the Totality. This is what the man has to understand in the upcoming time. As the evolution of the soul progresses to be there on the understanding of the creation.

Let me put it this way, man strived to understand how to make fire, and strived to understand how to create steam, and .. how to use the pressures of the steam and gases to create propulsion and the rest. Now that the man is given the freedom of not being tied up to the energy resources of the planet, to feed itself, and to confirm his existence. What will the soul of the knowledge of the man do, create another engine, and spend his time to create more tools of war. Or would the soul of the new generation of the man and the Unicose, target one thing, to understand as fast as possible, in a perfect condition, the essence, through of the essence of the essence of the Creator, and there beyond.

That there shall not be universities of theology, there'll be universities of understanding the effect of the field of the U, in how, in the shape, and in the way it has lead to creation of the Creator and the man. Creator must have come from somewhere. (:54). It's not a magic work, it's just a phantom, that we become phantom, and we don't exist too.

The origin of the creation of life in the totality of the creation, is beyond, is far beyond the understanding of the man today. In time as we stay amongst men of the U, we teach. You have to know how to walk, then we teach how to run, and we teach you how to jump to highest levels of understanding the knowledge of the creation.

Creation of peace. Creating peace on this planet was the first. Now you have to change, .. bring the next step in. Unification of the science in the D of understanding the creation, and not just for the comfort of man. This is not another mixer, food processor, another engine, or another new pan for a new ?? This is understanding the process of the creation, that through it we feed ourselves, that we don't need no food processor, no pans, and no other things. Because we have learned the process of absorbing energies from D of the creation.

Maybe .. in the process of teaching today I have enlightened you to see more. But that is all our job is, to share the knowledge of the creation freely amongst men, and those who live within the U. That in that process, they might more understand about the totality of their own creator. (:56).

Thank you .. I hope I open your eyes to another chapter in the process of the creation and the system you will see, which will come across your nations, will come across your part of land, and doesn't become as I said, a fanfare to, but understanding the process, and not the exclusivity of the church and the mosques, which they put it in, to confirm they found the Creator way, but for all man to learn how the creation, and how the process of creation is started. You have just been given the first straw to build the house of creation. Let's see how man uses this knowledge, with pleasure and not out of fear, understanding the process of the creation, and not be afraid of how the creation might do with it as he himself is part of that process. Rick .

>>> PROOFED to here >>> continue

>>> **BREAK >**> 417 KSW Jan 27 2022 (1:04).

K- Yes with pleasure. .. If you noticed something this week or next week completes our 8th year of teaching, 417 or 418 it's exactly 8 years we have taught, we have entered into the 9th year of teaching.
R: ..
K- We are entering the 9th year, maybe it's the lucky number, man choose.
R: ..
K- We have continuously good news is coming in, and thanks again to the work of the UC and KS who understand it, 5plus1 has reached its conclusion. By elevation of the soul of the leaders and the others in the negotiations we see the ending of the .. process of mayhem we had in past 12 years, and beginning of new cycle. As we see more T and knowledge's are shared amongst men.

It's interesting what I said to the Iranian officials and government in the past, (1:06). few days, that this is a surprise to some of them. We see the establishment of the Iranian Embassy in Washington in the next few months. The same back in Tehran. This is not a normal situation, as we see, because you have to remember the Iranians took over the American Embassy and ransacked everything, which is the territory of the nation. The American Embassy will be returned to Tehran in a very short time.

As the peace talks and the core negotiations have completed, in the background, it's just polishing some things in the front. We see what comes out now, the next few weeks, just the rhetoric, what we call, public relationship in public domain. But in essential, as of last Monday, the whole process of negotiation has and will be completed. In public to be

ready for the Iranian New Year to give a boost to the Iranian nation, and .. strengthen the position of the present government whose in the ?? to bring peace. Then strengthen the American and Chinese and everybody else.

This is a beautiful way, the way this negotiation has happened. The Chinese, Russian, European and Americans and Iranians and Germans are all working together trying to find an in-between bargaining with each other, how to share, how to see benefit, part of everything. It's an amazing process of negotiation. The 5+1 in Vienna is not what it looks to be. It's become a bargaining point of how much we will get, what part of the business they get, and how much of the T they can share. It's an amazing bargaining, it's become like a cattle market. But it is all for peaceful application. (1:08).

It's interesting to see how many millions of jobs will be created in the US in coming months, and .. in Iran, and China, and especially in Russia with the new nuclear T. In the background Iran has agreed with Russia for the next generation of nuclear power stations. That's what Russia wanted to have the T in Iran, in deeper connections over centuries. Do not forget Ayatollah K is Russian educated. They have a close relationship, understanding. Russian is part of the Iranian culture, understanding we have been part of one nation in the past. We'll see the Chinese making a huge gain. The Americans got out of it what they wanted. The peace process is complete. Where we sit and the people we talk to in all sections of this negotiation. This is just a party time how many more .. lunches we can have before it is down, it is done.

How one nation played a dirty games ?? nuclear bomb, the state of Israel.
.. Releasing documents to IAEA on the 15th. changed a lot of things …
It showed the grace of Iran,

(1:10). We have seen the change. I congratulate the UC and the KS continuously supported. Do not forget they still need support. There is a lot of things can go wrong, by those whose intention is to create mayhem, that's where they make money, especially those like Rothschild's, .. and Rockefeller families, who have made money on the back of the wars, conflicts and all sorts.

At the same time we have to understand how we use this for the next evolution, next step. KF has extensively started the negotiations with the governments for the spread of the new EU, that they all have it.

As a very top American military official told me in past week, "Mr. Keshe why are you sharing this T with Americans?" I said to him, "it’s very easy, because when you have it, the Iranians have it, we all have it, nobody can cause problems for the others. He said, "we respect you for what you are doing, and in time we'll show what you have brought and how you helped in the background with the peace process." The Americans are puzzled how freely we are sharing this knowledge.

I convey this message with people who are concerned with our work with America, that these negotiations with the American military has been routine for me for years. I have

met with them for years. Now Iran peace talks have taken shape, now we are not anymore enemies. Now KF T has become part of the evolution of the exchange and the peace process, and it's beautiful to see. (1:12). We can freely again talk with the officials on the table, not in back door negotiations. .. As I said to him, I met with your officials in a cafe in Beijing with all the Chinese military watching us. He said, "yes we know." We took a lot of risks but I met with the heads of military attaché in Beijing openly in the café in the center of Beijing. It was a shock for the Chinese in how openly I operated with the American .. structure. They emptied the café .. they knew we were coming …

This is the way the game is played. Openness and sharing. This is the reason we can walk into any government. …

This is the way the KS have to be. This is the responsibility of the UC, to share openly the wishes, that everybody gets equal, and we are not to the benefit of language, you are the presenter.

In our negotiations with both Chinese and Americans we have taken a very open channel where we all know at the same time, what T is going where, and who has to be where. The Chinese have to be in Arizona (AZ), (1:14). the Americans have to be in Tehran. The Americans and Chinese and Iranians will all come to Vienna. So everything is shared, everybody knows how the knowledge is done. Thanks to Klaus .. make sure all the knowledge to share, for all the nations to use, is on time .. .

This is the process of understanding the weakness of the man, and not using to create more war, but using the weakness to strengthen, to bring more peace. Hopefully in coming time you will see, this is what I asked the American military to do for us. If they could pick up the first 3 units, deliver the first one in Tehran, fly to Austria to deliver the next one, and take the last one to AZ to deliver to John. That was a very big shock for them. Asking them to take such a system instead of by .. Silk Road, if the Americans could fly.

It's a big, big question, big request to ask, and they want to think about it. Hopefully, we'll see if our wishes, and would be the wishes of the UC and all of us. We shall see in a short time, what we requested, if it has been accepted by the American administration and American military, to fly the American Military aircraft with the 3, .. first EU, and I am sure the Americans will see that their responsibility, and many other nations will be proud to take with the airlines, these units back home. I am sure we'll get a positive result and answer from Washington. I know they are online, and listening, and I hope the Iranian government accepts the same ?? just share. Don't forget, (1:16). Tehran used to be the capital of the American Air Force in the Middle east for a long time.

Any other question.

Q: .. in the 200th KSW you spoke about the border between the physical emotions and the emotions of the soul. Could you explain a little more about it.

K- The emotion in the physical D you have anger, love, whatever. It is understood and acted upon in the D of P, strength. When you dream in the D of the soul, sometimes you argue, sometimes you love the person or the soul you are in contact with. But you don't carry that into your D of P. You don't wake up hitting people and fighting, because you had a dream fighting with them.

You wake up next to your partner and you say, I had a dream, I was battling with you for something, I was making love to you for whatever reason, and it was so bad, it was so good. You don't carry that thing into the house with your partner. So there is a separation of emotion in understanding. We do not carry, (1:18). the anger of the man from the D of P, into the soul, but we create an imprint on it. When you wake up you may cuddle and kiss and love your partner, and you wakeup, your partner is next to you, what do you do? You cuddle her more, you love your partner more, because you brought the emotion of the soul in the dream, into the reality in your hand.

This is what the mankind has to understand, that this process has to become a natural process, bringing the love and care from the D of, independence of the soul, to the D of the P.

If you had an argument with your father in your dream, when you wakeup you don't pickup the phone and carry on telling him off, because he has no knowledge of it in the D of P. But his soul was involved in that discussion, but no message came done the line. This is what we have to gradually understand, that the process of bringing the emotion of the soul in the D of what is now limited ?? known to us as ?? real. How we bring it in, how we process it, how we understand it. How we allow the others to become aware of their own misconduct, not by us.

And I set a very, very deliberate example of this in the past year and a half. I got hammered by over 3,000 entries across Internet, everything which could be said wrong, (1:20). about me and everything else, was written on Internet. You have not seen a single entry from me. Because we leave it for the time when their soul elevates to understand the misconduct. That's the job of the P. When it endangered the KF I brought it into the D of the public, I continuously keep you posted, because there are reasons behind it, but we don’t go into tit for tat. Because they fight from D of P. This is the way they are brought up. We interact from D of soul, continuously asking for elevation of their soul.

It's becoming aware more and more of your own existence, and the strength in D of soul, and bringing into D of P. It's the same process, in your dream you were making love to your partners, and you wakeup in the D of P, and your partner is in your arms. How much sweeter is that kiss, then the kiss you started the night, when you say, "good-night". Does it have a different meaning, does it carry a different emotion? Because this time you kissed with the emotion of the soul. What does she do? She cuddles more inside you, even if she is asleep, because she answers to the soul, in the same D. This is what the man has to understand, .. needs to understand about the purity of the creation. (1:22).

You've seen it for years, the anger which was kept constantly, for years, pressurized, we have changed it, in the past year and half, to love and care, and it has become so beautiful and the KF has taken new D and direction, because now it's not on their work of creating continuous mayhem, but is created on the continuous basis of love and unity, but in the D of the STM. This is how we understand the border between the emotion of the soul and emotion of the P. We become more and more expert at it, because now we are aware of it, it is not just a dream. Now we know where it came from, that dream.

How many times have you had a problem and you went to sleep, and you said, by morning a solution shall be found. And you wakeup in the morning and you have a solution. Was it you sorting it out, or was it in conjunction with the people who created the problems for you, or the conditions that, they showed the way to the soul, and the STP in the morning you found the solution. Now we start looking in a different angle, in a true way of the cycle of life.

There is not a day, which I (do not) give from my soul to my enemies, those who attack me heavily, even Derek was receiving my soul. Do you know how much damage has been done, but that is the damage of P. (1:24). The essence of the elevation of the soul will change the position, time and direction. We've been battered, we've been slaughtered in past years, since 2012, nonstop in different shape and form. But have you stopped teaching, .. sharing the knowledge. Have you stopped sharing the love of the Creator. We've done it more, ?? ?? As we just said, 9 years this week. 2013 we have not stopped, and that was the height of the time when we were battered, we were on exile.

The more they pressurized, the more we shared, till the time when they cannot match. This is the way we separate the emotion of the P from the emotion of the man, on the D of soul. Then we started becoming aware of its active work. The more they went to create war, the more soldiers they move, the more the UC supported the soul. Didn't we get to the position of no war? The more they created the problem of sanctions, when we came to discussions, we asked for more support. Haven't we got the peace now?

The peace dividend of 5+1 is the spreading of the KF knowledge among all nations. As one of our KS in China wrote, (1:26). to me .. He said, the history of, old man, has said to the Chinese government, that is the inner essence, exact translation if I find it, I'll read it for you. That the KF T will emerge, and will be the process of peace. This is people who work for the Chinese government. It is part of our work, that, to make sure you understand the true process. We understand the totality of the information and the knowledge, and how we changed this, how we bring that process of change. It is not easy to be able to stand a slaughter, and then let that change by time, and change the time, to change in its own time.

And we get there in a very easy way. This is what comes from the Chinese, (1:28). who are within the structure. I'll read the exact translation. This is the old, what we call, person, who'll soon show the KF T in China. The process is difficult, and we'll eventually win the respect of them all. This is what comes from inside the Chinese structure in respect to what we do.

In understanding the process of the separation of the P, and the work of the soul, we have the STP of the man, but we have the STP of the human, as one race. Then we have the process of the respect of the soul of the humanity as one process. It's a division of a division, as an egg and a sperm, in division created the STM, to strengthen, to take condition to create the man, each one of our souls is the same, is that part of another cell in the D of the soul to be created, to create the man, the child. All of our souls are connected to the totality of the soul of the humanity.

It's that soul, which takes shape in the D of the soul of the physical man, the world leader, the cleaner, driver, sailor. But in essence, like that egg and a sperm, which they divide in the womb of the mother and create the STM, (1:30). to strengthen enough, to take over and create the body of the man to become perfect. Now we have reached that point of what we call, critical mass.

The soul of every one of created things on this planet has created the soul of the planet. It cannot be any different, this is not a fairytale. If it applies to the womb of the mother, which leads to creation of you, it applies to the womb of this planet, it applies to the womb of this U, and the rest. We are that initial cell, which is added in the womb of the mother to lead to creation of the eggs, that the critical position comes that the soul is created and the P of the man starts taking shape.

We have reached that critical point, and that is the day of the Promised One, when that critical mass changes. And takes to build a perfect man. We are reaching that point. This is what has been missed. In many teachings in a hidden way, I tried to explain. Maybe today you understand. Maybe the soul of the child of Mitra, has that critical mass to bring that switch, to bring that essence of completion, that the rest of the souls understand, that now is the time to give birth to that beautiful child of the human race, as the whole of the race, not just as one.

We are not just, because we are in an island in the corner of pacific, or we live in a skyscraper on top of NY City, are separated. Does the cell in the toe of a child, and the cell on a head of a child, (1:32). have no connection except through the STM? Now we are in the same process, critical mass, critical position to reach that point of transition, to reach that point of understanding.

This is what needs to be understood by all of us. We have reached that critical, but all other things need to be sorted. A lot of you at the moment, you see the situation with Ukraine coming up, but where is it going to end. We know who is behind it. We now how it is done, and who is trying to enforce what. But when you come to the end of it, how much have you matured, what has been added to the STM, not to go to wars.

Half of the physical battles we see on the ground on this planet, is not by nations. It's by religions, because they benefit by it. They can control the income from the Mosques and the Churches when it's settled. That's what the fight is for. It's not for bringing one closer to the Creator, and when will the man mature to this? Or would the soul of maturity of

humanity would ?? lead for these to be matured. In one side they bring unification of the religions, let's understand each other more, as a, what I call the wall paper, underneath they are still fighting, (1:34). to see who controls, has a bigger income, more people they can abuse. The Ukraine situation, that's the only reason for it.

We had the .. crusaders, .. other militant what we call groups, sects, have wars between each other, Sunnis, and Shia's, different sects of Christianity, in past different parts of Judaism fought tooth and nail with each other. Now it's a game, another Christianity church trying to fight each other, Church of Rome, and Church of Moscow. They don't come and say we are all the same, because then we can't have more, to do more.

This is the separation between the maturity of the STM and the STP of the man. You have the maturity of the soul of you, where the border comes. Now you have to understand your soul is a seed in the Soul of Humanity. It's that soul in the toe. When the soul f the child in the womb is completed, the child starts taking shape. Then we see the arms and legs and everything else start processing. Otherwise till that time, it is just a lump. Now we reach that critical mass, in the lump, for the Soul of Humanity, and we are here to help it to cross, then man will see a different way.

Do we need a refugee camp that we lock more souls in, or do we create a condition, that there will never be a refugee, to start a camp. This is where the turn will come. This is why in the KF, (1:36). we are sending the EU to every country, to every city. You don't need to go to Tehran or to AZ to see a flying saucer, there is one at home. You add your knowledge there, you add to the knowledge of your nation, and the humanity together.

People have not realized. I have seen this especially in German what do you call, pedophile groups, where they say, "oh, another 3 children born, they're the same." They have no clue what is going on. The pedophile groups think they can use these systems to carry on with their abuse. But you pedophiles, especially in Germany, in Belgium, in Austria who are writing so much against KF. You have to understand, you walk into these systems, you will wipe out what you have written, because you'll be corrected. You lost a lot of income from child trafficking, but .. you'll become aware of your own misconduct. We invite you to come in, and see if you walk in and walk out with the same language.

We don't punish, we elevate your soul. We don't need to keep an eye, you keep an eye on yourself. The fear of them ridiculing these things, because then they know they have to face it themselves. It opens their hand what misconduct they have done. It's not to oppose us, not to come, they oppose us, for it not to come, to show what they have done to themselves.

This is the process which we have started. If we can elevate all people to understand the elevation of their soul, (1:38). in AZ or in Vienna. The same man has the right to elevate his souls in Nigeria, or in Amazon, or Australia. It will be interesting to see how the governments, as I said last week, oppose the entry of these systems, or support the entry of these systems. Because it's a gift, and a gift for the extension and expansion of the

knowledge. Why should governments stop their nation to become educated? It's an interesting time, but now you understand the separation between the STP and the STM. You have to understand how to bring the higher strength to live within the lower strength of P, and how to increase, or elevate the STP to be able to live within the STM. Both to give and to take, and be correct, first of all with your own soul, then the others.
Any other question.

Q: .. The Rothschild's and ?? Swab, etc.. want their war for the great reset. Apart from issues between Iran and 5+1, we had the situation with Ukraine. (1:40). Will we overcome all this warmongering?

K- I think the situation, which is coming up, will teach them, that the reset has been done. They have to get used to it. Some of them like children, will cry, shake, and kick, but their time is over. They understand it themselves from inside. If we do it, we are the enemy. If they do it themselves, that's a blessing. And that's what is going to happen. We see gradually the what I call, the process of destruction of themselves from inside. They invested heavily into arms, and to conflicts, and where it is going to be. Now there is no conflict and they cannot push it. So a lot of investment is wasted.

We see now Gates in the same process, pushing for vaccination, because he took his money out of Microsoft and he put it into vaccination companies. to become again the richest man in the world. Because to him, that's what it was, doesn't matter how many die, as long as I overtake the guy from Amazon, and I become again the richest man in the world, I do anything. That's all it is with this guy. You have not realized, for him to be the richest in the physical D is important, doesn't matter how many people die. If you look at all vaccine companies today, have a huge investment and backing by him. That's where the profit will come, and then I become the richest.

But knowingly or unknowingly, (1:42). if you look into the structure of the KF and the work we are doing. The way we see, we discussed this extremely thoroughly with our team in the background. The way we are going, it might not look that much at the moment, because this is a fire that has started very thoroughly, and it's going through, we become one of the largest conglomerate organizations in the world, one of the richest, which is owned by a foundation, which serves humanity.

In a way, we have started central banking for the future of humanity. When we put these things into the market, that all of you can have a share of, you support your own. A lot of KS who now make copies and they use our logo, you will stop them to work, in the next few months you'll understand what KF is doing in the background. We don't discuss anymore, that people can do to stop. We learned a lot in the past year and a half. You will see, you KS, you are part of it through the shares you hold, and you see people who copy and steal, and do not put anything back. Where will you spend your money, and who will you put through.

Your process and the KS, who are there, and the humanity will correct this. I don't need to do anything, I just set the ground for it. In the upcoming time, you put all the assets of

the top 500 companies in the world together, will not match the assets of the KF, in the physical D, because it is your assets. (1:44).

Because now we work as One Nation, One Nation needs a lot, to be equal, to be able to do. We have this scare, this squeak in Iran, this 6.2 magnitude earthquake in Tehran. What happens if this hits 7.3, which we were expecting. What happens when Tehran goes through. What facilities do we have to be able to support Iranians, not by Iranians, all of us will help. The same sits with Los Angeles. Would we sit and watch the Americans die in the earthquake? We all volunteer to be there. We all give nations to be, and we are setting that structure. Physical accidents of the structure of this planet is not in our hand, but we are setting up a structure, that when it happens we can respond.

The same thing will happen thousand times worse, to us in the space, to others who we fall in love with, and we live with. Maybe as did, the kings of the Iran did, brought the Christians and the Jews to Iran to protect. In the coming time in disasters in different part of the U, we bring those citizens to earth to protect them, that they lost their home. It's done regularly in the span of the U, it's not the first time.

This is where we are heading, and to run such an operation, you need to be able to support such an operation. In the work or the human being, this is how it is done. This is what we are setting up as One Nation. A central structure, that man is ready, financially independent, that can support it, (1:46). physically can support it, technologically can support it. We have the resources to do.

As I said, keep an eye on the Markray, we are not telling you from insider. We are a majority shareholder of KF. As KF, it is our shares, and citizens of it, have to know what is to come. When we set it up, it is not for you to make profit and shares. It's to have a structure that humanity can be as One Nation, to be processed, to be supported, to be helped, and to be setup. We setup a central bank where all of us bank, in knowledge, in T, in finances, and in supporting. When the nations run into problem, with any condition, KF with the structure we setup, has to be there, it is the responsibility of KS, and the UC to be there, not to ask to come in.

In Austria we have a beautiful system, every village, .. district has a fire station, and every fire station has a siren on it. In the time of disaster, car accident or whatever, the siren goes off. The volunteers who are their to put their lives on the line, snow, rain whatever, they get themselves to the fire station, put their clothes on, they take their machines, which is bought by the community, all whatever is needed, to go to the scene of accident, to be there. (1:48). The police, government sources are there, other resources are there, but locally I am responsible for what happens to me, doesn't matter if that car is German .. British or whatever, I am there as a human. When you come to Austria out of nowhere you hear these sirens going, and you think what is going on. It's not a ?? siren. It means an accident has happened, and those who have volunteered, they're there, they put their work down, they wake up in the middle of the night, they get to the station as fast as possible to help, irrespective of color, race, religion, whoever it might be. Now you know why we choose Austria to stay, because it is an example. Every week, Saturday at 7

o'clock all the sirens work (blow) all the way across Austria, that they are all working and everybody knows they are there for a surety.

We have to take the best of every culture, every path of belief, and strengthen it to become of use perfectly, for the humanity, and that is the job of the KS and the KF. I am just setting up the basic structure, it is you who has to carry it through. Don't come into to steal from the KF, because it pays good, and they are stupid. We have this, and it was guided by those who we kicked out of the KF physically, they were teaching how to steal from the KF, the children, the finances and the rest of it. (1:50).

The process has to be, the way what we do, comes to serve the totality, not individuals. As I said in the past, I work hard, play hard, and I live a comfortable life, but for what I do, I don't expect anything for people to say, thank you, because it's my job to do what I do. I came, I accepted the responsibility. There is no thanks when you serve, and you accept the responsibility. You are just doing the best, trying to get to the final point. Some of the things work out, for the best of what it is, and what they come to.

Soon in the next few months and years, KS realize what a gift we received, by getting rid of those who were damaging us inside. How the whole of the KF has moved forward to do what it was set to do. They were put inside to make sure it doesn't happen, to destroy every factory, every move, even conferences to be interfered with. But they have served their purposes.

When I found out from national securities, that the death of Fabio was well planned and they knew about it. It broke my heart. I discussed this with Giovanni in detail, (1:52). they knew. They knew if they hit us at a point, then it will stop, and then they'll takeover the KF, and then they destroy it, and it won't be there, to stop it from what it was destined to do. And they were just there to save their lives, nobody else. One to another.

But we don't look at that way. We look at it, we elevate their souls. And then we allow the next thing to happen, to grow. These are literally, what I call a speck of dust in what is about to come, .. to happen, .. to be developed by you as KS. You'll choose in the coming time what to, and who to buy from, with the products of the KF. Does it help a company regionally, that it helps the process and the evolution of. Or is it just for personal use and the rest of it, and forget about the KF. You will decide and you'll bring the change, in part of the work of serving the humanity. You will see how fast it will mature into these things. It will be amazing how KS will see this, and they'll work for it towards One Nation, OP OR.
Any other question. (1:54).

Q: Salomea .. Do you know I already traveled with plasma enhancement in the U to Mars and Venus before knowing you and the T? Adrian from Romania invited me to travel with others. I was inside these units. It was a lovely experience. We all started at the same time, 3 years ago. (just her statement)

K- As we don't have any more questions, that means a good time to stop, because KS are all well educated.

We try to bring a lot of things in order with the work of the KS and KF. As Salomea speaks about what she said, the same gentleman has shown a system in the American teaching. We immediately asked for a meeting for the T, because there is a lot of claim this is a fake. There is a lot of claim, that what was shown is not real. It's us to protect the integrity of the organizations and the people. In a meeting with the group on Tuesday, we appointed one of the directors of the KF to check into the work of this gentleman, (1:56). and the group, that they can show it, that we can keep their integrity, and the correctness of their work. At the moment what is shown is claimed by many KS in the area, that is not real, it's fake and he has not managed to show it.

It's our responsibility to make sure, that what happened in Washington (DC, with Douglas), does not happen again. So we have appointed a group of 2, to be present in testing. We are waiting for it to be confirmed. There is a lot of claim put in …
..
We can't say yes or no, because it's the addition of knowledge, we have to support the KS. But if it is not what it says to be, it has to cleared, and if it is, we have to support it, expand it, because we'll benefit many people by it. We all know what happened in Washington. From the point to Washington, parts went missing, and then suddenly the gentleman became, working with another group, in the American structure, for the same system, which we were missing. We don't allow this to happen anymore.

There is a huge question mark on what has been shown by the member of the same community, and it is our responsibility to safeguard the integrity of KS, and those who build things. It has to be done by us, not from outside, that it is what it is, (1:58). and how if it is, can we protect it and brought out correctly.

We are in the process of massive expansion by and through KS. We are preparing you for a new cycle of teachings, in what I call, what a lot of you like to do, in hardware side. But you have to understand the software side before you get to that hardware side.

If you remember we introduced you to the Gans's, .. the dynamic systems, and a couple of years ago we introduced you to the Cup of Life. The next cycle of T is about to come out. Many of you can imagine what could be. T which allows man to see, to be, and be aware of his soul. We never physical D, but something many of you will enjoy to do, because it allows you to go through that transition. It starts to be part of that transition. It is important for us, it's part of the maturity of the man. (2:00).
If there are no more questions. and it's about 11.

Q: Mehranez … thanks for the new advanced knowledge, which is more interesting, we were getting bored (laughs). I have a question, one is do we still need the womb of a woman for the child of two souls? I know that you said, it can be done in a pool, the child can be created in a pool or a box. …

K- It's one of the alternatives available. We do a lot of fostering nowadays. But would we allow the soul created to take characteristics, and the knowledge ??, and the knowledge the way a human loves. Or do we create another what I call, EU that while the soul is developing, uses the field forces of the U to create that child?

Then what D of P that soul takes , once you take it out the incubator of EU? What are the parameters of this process will do? It's not ethics anymore. (2:02). It's understanding of the totality. We don't need ethic committees to tell us what to do, we decide. If you have those who are, one from this planet we didn't know, and one from this planet we know, fall in love, and they create the soul of the child. What would that child, will decide to take shape of. Half of one and half of the other, or be in 1 D in this position, and then when it is in the D of the strength of the fields of the father, in another D. I touched on this very recently, in a very direct way, but many of you never understood, and it is part of this process.

When we create this soul I said, would I see in my eye, in the P of the man, Iranian looking, beautiful child, the African will see it as a black, with brown and beautiful African hair. The Chinese will see a little China girl with a beautiful eyes and a Chinese face.

Then if one of the creator of the souls of both of them, are from another D, can see the child on this planet. How would they see the child? Would they see the child in the eye of the man, or in the eye of themselves? You don't become chameleon, we become manifestation of time, space, and position, and now the emotion of understanding, (2:04). of them all.

Would have we listened to Obama, if to us he was a white man with blue eyes. And the Africans saw him as a black man brown or dark eyes. Would we have those prejudices, because he is one of us. Would this change bring an end to the prejudice of the races, and .. religions in the same way. This is what is to come, .. what we have to ?? And you cannot bring any ethical committee to it. Ethical committee doesn't exist on planet Zeus, sorry. Not applicable, we do it our way. Because the souls conduct the correct way, they don't need ethics with it, because ethics is already part of its creation.

Q: .. 2nd question .. Virgin Mary .. so there is a soul coming to her and tell her she is going to have a child. So this is the child of soul with soul? Or otherwise?
K- Now that you understand more, (2:06). I put a new what I call, D to virginity. Virginity means pure, untouched, untainted, being perfect. Does this mean from a virgin mother the child is born, or the soul, which is untainted and perfect.
Q: The Soul.
K- So, do we have that virgin birth in the D of P, or do we give birth to a virgin soul, which is perfect. This is the whole what I call, the key to understanding of the virgin birth.

Mitra was born from a virgin mother. But that, she didn't have a physical mother, it came from the Totality, that it is perfect, untouched. Virginity comes in the eye of the man in the physical D of the woman, or perfection of the soul? And that is what it meant.

In so many ways, we choose in the next cycle of the generation of the man, man will choose, man as a human will choose. Do I want to create in the womb of the mother, through the soul, or through the P? Your body will choose. The way you pass on the sperm or an egg to create a child, you pass on part of your soul to create that child, and then it will take shape of P. (2:08).

Many of you who raise children will go through this experience. It's a cycle which has been opened to man. The physicians will find out, that at the point of inception of the creation of the soul, no egg or sperms are released, except energies, in the womb of the mother. This is a new understanding, that many of those who mature to understand this, you will not have that physical release of physical matter. You will release energies of the souls, plasmas of the souls to be within the womb of the mother. This is how the perfect soul will be created, and then it takes the perfect feature of the humanity if it decides to ?? manifest ??

This is the next cycle of understanding of the process of the elevation of the soul. The STP will allow, the way you go out to dream, allows the STM to release that part, that becomes the essence of the interaction, to create the seed for the soul of the new ?? infant, in the womb of the mother. When you test they say there are no eggs, .. no sperms, but the child is born. The seed of the child is born. This will become as a norm in the coming time, when those souls elevate to be there, to serve, to create the new generation. Many of your children, (2:10). or many of you ?? guys ?? in the coming generation will know this. You decide to create the soul of a child, of a perfect child, or the STP, embed within it, the STM. I wonder how many of you will decide or your children will decide to do that.

You'll test, the doctors will test it for you, if you decide to have a child through the soul. They'll say there are no eggs. You are not producing any eggs. The man does not produce any sperm. But the seed of the soul, and you feel it, the same emotion, will be embedded within the womb of the mother. Then you'll say how come I got pregnant when there is no sperm or egg. Because the seed of the soul is set. To you it might look like fantasy, but it is the reality, which will hit many of you, you're children and great grandchildren, because not you have the option. Do you want to create a man from the D of P, or do you want to create a man in D of the soul, that it becomes a perfect child.

Perfect child doesn't come to have 2 arms, and 2 legs, and blue eyes the way you want. Perfect child is when at the point of inception, to the point of departure, at any point in the U, it just serves the Creator. It will not do anything wrong to harm another. It will be there to give, to create the elevation of the soul of the others.

This is what we call the virgin birth. It's not just for a girl not to be touched the way it is. It's a virgin soul, which is created out of. That time, it could not be explained. Now we understand, we can clearly explain what it means. (2:12).

Q: So it needs a lot of love and admiration of both sides? of both souls together?
K- And maybe others to support that life. Because, don't forget, we said, in the creation of the new child, Mitra has collected the best of the best from all corners of the Unicose. Which means the elevation of the Totality. The child of the man in the future, created this way, will serve the Unicose, not just the man. Within it, has no essence of war, .. jealousy, .. hate. Because is has everything it needs, why should he have any of it.
Q: … we have examples in other cases for example, an angel comes to Abraham at a very old age, and says you are going to have a pure child, hos wife was very old, but they had a child. Or Zackary… (2:14). . What I mean in spite of their old age they could have exception child, they could see no evil in the child .. and like John was the son of Elizabeth and Zackary .. they knew no bad things.

K- You see if you look at the understanding, a deeper understanding of the work of what you call Gans or energy processes, they have no time, .. no limit. In D of P age doesn't count when you work in D of the world of Pl.

When you make a Gans and you put it on a table, do you put it, it is 2 years old, and it's aged and it has changed its shape , and color or whatever. Or you put it there, I made it, in interaction with its environment it's there.

You see age in the face of the man, in the body of the man. We don't see age in the Gans's, and in a way the energy of the Gans's, are the energy of the soul. Creators of, are fundamental basis of the creation of the soul.

Q: .. That's kind of fancy. There are picture of De Vinci that shows the Last Supper of Jesus sitting and then it shows a UFO .. (2:16).
K- Ah there are a lot of things about this who puts what where.
Q: So it doesn't mean that Jesus had something to do with Extraterrestrials .
K- Ask yourself one simple question. Did the 12 Disciples ever sat on a long table to eat? Did they sit in one room, or did they sit on a round table? This drawing is just a pure fantasy. I remember in 1990s I was commissioned to sell the Last Supper picture made by woven carpet in Iran. I think 30,000 different colors, every color of the beard of Christ was individually dyed, even 1 strand of it to show in the face. It was put on for 1 million dollars, 30 years ago. It was only .. 30 by 80 cm. It took years to make …

.. it made me to think how much of it was real and how much made to look real. .. Did ever, (2:18). such a thing took place, or just De Vinci created the painting, and it became, because he called it the "Last Supper." The first time people could see the 12 together. Now you put a UFO on it, .. an airplane behind it, or do something else with it. It's the same as what we saw a couple of years ago, when the Iranian guy on the television was talking, they flew a light behind him. Oh, what are they trying to show the Iranians have a UFO. You've seen that video. So we can put anything on these pictures. Did ever the 12

got together, or this is just showing the .. presence of 12 souls. What would have been if De Vinci would have drawn 12 souls without a feature? Because none of the features on the Last Supper have the face of any of the disciples. None whatsoever. So you can re-position anything, is this reshape, is this Illuminati's, we heard a lot of things about these pictures.

But we have to look at it as the soul of the essence of the knowledge, of the strength in bringing the teaching of the Christ forward, for more people to understand about the Creator, and more people to abuse them, because actually they couldn't understand what the whole thing meant.
Q: .. I heard that they were lying down, like the emperors with fruit in the fields, .. there was no table.

So how could Jesus change the soul of these people around him in such a short time? (2:20).
K- Jesus or Moses. You got to understand when you reach the point of Messengers, you have the element of both, you have the element of STP and the physicality, and you have the element of the soul. Some of these reached at the level of the soul, to the STM. Some people became believers even without seeing Moses or Jesus. Just they dreamt, the soul of them touched .. I met, I know somebody personally, who has gone through this process. The love of the soul touches, and then some, the STP touches. Sometimes we dream about it. And then we see it in manifestation of P. I have been in this position a few times. Then the man who wants to abuse it, abuses it to what he wants to do.

We had this, maybe for the first time I explain this in the public. If you go into the court case we have with the Belgium's.. One of the witnesses, that they brought, they lied, they fabricated a lot of things about it, they didn't let us defend it. Was a mother with two children. We were, (2:22). at a swimming pool and I saw a man carrying a carpet like a child. I was walking outside when I saw the man. When I went inside the man was there again, with this child. It was like a statue he was carrying. In talking to them, he said, this is not the only child, there is a twin with it. We have the same problem, but in different way with the other one, but the other one is better. It must have been 2 -3 years old, the child in that age bracket. I said, we might be able to use the new T to help. He got excited, he called the mother, … .. the family supports. The woman said, I want to see this man tonight. I said, you can come next .. no, no she wanted to see us now. We went to the house, and she said, I had a dream that you will come and help my children. She said, I know you'll come because I saw you in my dream, and I know you can help me with my children.

This child I think was about 4 or 5 years, whatever she was, they used to put her on the bed and she never moved. She was just a piece of rock, as they said. Then the first night they used the T, because they never moved, the baby fell off the bed, and they saw it start moving. In a few months, which we supported the family. They used to actually start moving like commandos. We used to put her on the floor, and she would get to the sweet. (2:24). For 3 - 4 years there was no movement and the process came to ?? Then the

child, the last time we saw them before we went on exile, when we went to say good-bye, the children were sitting in the kitchen, the father making pizza for them.

The beauty of it was, that the mother dreamt, that I will be there to help these 2 children. Was it my soul brought me to see the child? Was it pre-agreed before, we'd see the child? Then when you go through the court process, this became a criminal offense, to help through knowledge of new science, to bring 2 handicapped, totally mentally demented children into life. This is the criminality of the nation of Belgium. Giving life to 2 children in the court, became a criminal offense. It's not because a joy, that we have found a way we can save children.

But what is it? Understanding of a new T, or is it understanding how the soul works, that the mother knew, the time will come, there is somebody. She had the dream 2 or 3 days before. If we would have been allowed to show what could be done, and be done with the others, you know how many children would have been saved, how much suffering in past 10 years would have gone off the families of the people? Now you know why the nation of Belgium will pay for their wrong doings, by elevation of their souls, (2:26). and the end of abuse.

Those men who fabricated it, they have to pay for it. The woman who helped them to fabricate has to pay for it. The woman who helped Fabio to die, has to pay for it. By the elevation of their souls, finding what they've done wrong, that it will not happen again. This is what if you go in the teachings of past couple of weeks, I said, people born with .. mental deficiency, which leads to children, (who) were born through the lack of O to the birth tunnel, that the parents pay like this, we saw it. Now we have the knowledge to change it. We have the documents to show it has been done. Now we bring as part of the process of the KF Institute to show it's done. What is going to be, the correct. The transformation of the knowledge and the elevation of the soul of the mother to know the children can be sorted. How did she know, that we would meet? This goes back to the teaching of today. That we meet in the D of the souls, we have to translate it in the D of the P, we all can get elevated through the soul.

The same thing happened when we went to support the girl with the car damage, physical dead body. When it came to show that we can bring a coma patient back to life, again it became a criminality, and they brought it into court, (2:28). that he has helped bring a coma to life. She was a cabbage, they were switching the machine off.

Only happens in the nation of Belgium. Because they are pedophiles, they are the most degraded race on this planet. Because helping another man, unless you abuse child as a pedophile, is a crime. We hope their souls get elevated. If you go back into the case of .. because now the 5 years is over, once its ending in 2017 to 2022. In 2022, all the criminal charges they brought us by fake is finished. 5 years span by the law. It's stated in the court, in the fake cases they created. We can speak about it openly. We served, we gave life to 2 "carpets" I called it, when I met the children. Last time I saw them, they were making pizza with their father in the kitchen.

The same with the others. Having a knowledge to serve humanity became a criminality. Only to the eye of the state of Belgium, to that bloodline of the man, which is on the edge of the continent. The dirtiest of the dirt has been put to the edge to fall in the sea. So what do we see with it. Why supporting, understanding, the soul of the mother sees, the beauty of the children to be helped, and sees the soul of the man who does it. And the man comes. Is that a miracle? And the children do move, do change, and get a new life. (2:30). This is not theory, go into the court case. We can talk about the court case it is over, it's finished, the 5 year term is over in 2022.

We open these cases. How man has the ability to support another life. It's his responsibility, it doesn't matter what it costs, even his life. With the knowledge of the Pl, the knowledge of new understanding. I took all the fight, I took all the damage, I took everything. But seeing those 2 children being able to be with their father and the mother, not to be a carpet they put on, and take off. Watching them put a block of chocolate, because they loved chocolates. We used to put blocks of chocolate on one side of the carpets, and they go like commandos, we used to call them commandos to get to the chocolate. Those who never moved, couldn't move.

This is a miracle of the T and knowledge, but a miracle of the soul. This is how it sits, their is how we are supposed to be, .. the whole T has to go. We don't blame it, we have to elevate the soul of that nation, all of it, because we don't punish anymore. They have to understand their own misconduct, and the punishment for them is the elevation, the understanding of what they have done. Because of that, helping those 2, now we have setup an institute, KF Institute structure, as a scientific institute, we can show it.

We spend time, we bring KS, we bring doctors, (2:32). to see those comatose patients be able to be helped from the outset, from the minute they are born and we see the sign, KF KS become responsible to that SOS in the hospital, to help the family. Not to wait for an earthquake, because then it can be public, we went to help. The way you responded to Corona, the KS and the doctors we trained, have to be there. This is going to happen. It's not going to stop, the children get stuck in the passage of life, and by lack of O, they go through it. The second it is done, the KS can be called upon, "can you support." You have the Gans's, .. the T, you deliver to the parents. Over 3 to 6 months you watch, and we won't have that mistake, .. the suffering of children and the parents for decades to come. This is our responsibility. They put us to prison, they gave us fraud, but the fraud is, we saved life, it doesn't matter they ?? taint us with. Now do it openly in the institute.

In next few weeks we appoint you. Once we setup the institute, and you report there is such a child, we come to understand it through the institute with the doctors, when you bring, to bring these children through the process. Nothing is done, it's just the process has to be done the correct way. The brain will replace itself, the damaged cells. Because the child is in the time of the process of building, it will be repaired, the structure damages to the stomach or to the heart, or whatever happens in that process will be repaired. We have a perfect child.

I said to people around us, we don't need … 40 parallel systems, that 40 families to suffer, (2:34). for rest of their lives, to prove that the T is correct. We support all of it (them). Let it be the process, to benefit the elevation of the soul of those who help us. This is our responsibility. The blind testing, we leave 40 children, we haven't helped, to see how they become Cerebral Palsy and then we see how your 40 (children) have done. Our children are not animals. Our children are not to be treated that way. We see the problem, it is our responsibility, the way we delivered Cup 1 & 2, is to deliver, to eradicate, if it has happened. The suffering of a lifetime. Not letting 40 (children to get help) to become an example, and then another 1,000 to become an example (test trial) for our stupid doctors, and those who benefit by pharmaceutical, to suffer for a lifetime.

It's our responsibility to bring the change. I took it. I went through a lot of crucifixion, I went through everything wrong, because I helped. It's in the court cases. Children were totally supported, totally. We have videoed it, we have pictures of them. And the parents will say how the police of Belgium falsified all the documents. Then you understand.

Then you'll see, then in the future when such a thing happens, do we need Gans's? Or understanding the process of elevation of the soul, we can elevate at the point of birth, that will support the soul of the children, (2:36). to correct and to repair.

Would the children brought up, conceived in the D of the soul, and go through the physical process of the birth, and they come through this position of trapping in the birth tunnel, or whatever happens, lack of O, would they repair themselves immediately, because of, the soul is in charge, and not the STP. And the answer is yes.

This is why we promote and bring the new knowledge of understanding, creation of the children in the STM, because even in P, the creation of the STM will not happen in defect, let alone in any other damage. (When) Man only understands the gift we have brought?

I stood exile, I stood assassination, I stood capturing and imprisoning in Canada in the airport being told will be killed everyday. Withstanding assassination planned by my own partner, and knew, which Fabio got killed by accident, because of it. Then when I look at it, it was all worth it, to bring man to this position. To be able to share the knowledge that ones parents will be able to have children without the damage, one family can have without anything.

Bringing to be able to bring the peace the way we have done, to be able to bring a lot of things, (2:38). .. deliver the nations to be. If you remember, very recently a few months ago I told you, as a nuclear physicist, As an Iranian nuclear physicist when we were all, everything wrong, we'll be in the White House very soon. Because we shared the knowledge, the WH is a much the capital of Iran, as Tehran is to the Americans. We have become One Nation. We look at another position, another office. We don't promise, we deliver, and the promise completes itself.

When I requested from the highest offices from the Americans, to fly these units into 3 nations, the highest ranking officer was in tears, he said, "Mr. Keshe, you think far beyond what we can imagine possible." He said, "why are you giving the T to Americans?" I said, because of the love of the knowledge belongs to everyone. Now that we have reached peace we can share knowledge. Not, "they did this to us for so many years, now we are gong to do that." The time of punishment is (over), the time of sharing, serving is in, and we have to be part of it. We have to set the example. We have to understand, there is no punishment, elevate their soul, they'll come to understand their own weakness.
Q: .. I pray for your protection, thank you for your infinite patience. I understand because every one of us, in our imperfect, (2:40). measures suffers from our .. narcissist things, which I hope it helps us to be better. …

K - Can you give me 5 minutes break ..
R; give from our soul to the peace … for the 5+1 peace talks, and it seems to have worked in so many ways. We have conflict in many parts of the world war may break out or rebellion … (2:42). (SILENCE .. 5 minutes …) (2:46).

K- .. the reason I had to accept this call was because as I told you, one of the most loved ones of the KF, went through a coma for past 2 weeks, .. and the call came from there and we spoke. Weak physically, but at least the soul is back with us, and the physicality. This wasn't about the peace talks, this was about one of us, as recovered from a horrendous condition and nearly 2 weeks of coma. It was beautiful to receive during the teachings, and I hope the soul will elevate, ?? to the point, and the P will recover. I think this is one of the most beautiful news we could receive, when we were talking about what we had, or we have been through. Thank you .. sorry about that. We were waiting for this call for past 2 weeks and we didn't know if it will ever come, but we were told the recovery is taking place since last night, at least we could talk to the person directly.
Any other question.

Q: .. How is it going with Naomi with her recovery? .. (2:48). ..
K- Naomi, I met her last May or June with Giovanni at their house. We have another piece of process to go through, Giovanni is helping to build the next cycle of Gans's, and she should be more or less fully recovering. Because somewhere in the process, something was missed, whatever, we'd done, and now we are building it back, to complete that process. She is out of coma, and normal as possible, but now we have to slightly change a couple of things to complete the process.

The only thing happened to us, in the Italian factory and everything, it created a separation, and we couldn't see exactly what was not completed, now we know what wasn't completed, and it is getting done. Giovanni is working on it, hopefully in the next few months we'll see. She'll become a normal, she's as normal, happy person we see. I spent a few hours with her last year, when I was in Italy. She's good and cheerful as she used to be. We need to fix a few little bits and we hopefully get her back in .. the proper ways to be done. The process was stopped, due to all the things which went on, and in time we never considered to check that part. Now we done, and it can be corrected. But it

needs a special structure and Giovanni is doing it. She's a gorgeous woman, she's an absolutely beautiful soul. When you still see her you enjoy, (2:50). that cheekiness which she always had.

Q: .. Can we call the first fleet of spaceships "Fabio Fleet" or put his name on something big from the KF.
K- We already know what we are going to do. ??? Fabio, the soul of, the STP of it, and he is unique, I worked with him, literally on a daily basis, he was part of us. ….

When to me, when you speak about Fabio, it's like he was a son. He was not a KS, he was not somebody you work with. With him everything was unconditional, with him the love of doing things was done without asking. He translated the 3 books to Italian without anybody knowing. It's been translated, (2:52). we have it. The Italians keep on telling us, we want to translate the book. It's already been done by Fabio, we keep it, because it's his work. There is a lot of emotion when it comes to him. But these emotions have got words, since we know from the Italian securities and other securities, that it was preplanned, people who lived with us knew about it, which was planned for my assassination. This is the hardest part. I would have preferred for me to die than him. But it is the time of destiny and what is set to come.

What we know what the Italian securities know … from international police, it is amazing how people who shared life with us, knew what was going to be death , ?? how ended up with the life of Fabio. Many times I brought it up very much it was like, when the lamb was given to be sacrificed instead of the son. This should not have happened. (2:54). Italian national securities have spent a lot of time on this assassination, and it is so clear, the assassination.

We will open the truth about 3 assassinations and my imprisonment in Canada, then you'll understand none of it is coincidental, and could not be. 3 assassinations was well planned and knew from inside it was happening, and it was supported in a very devious way. Fabio's life should not have been there, but it brought a change in the KF work and maybe, his soul served on it.

It so clear to the Italian securities, because they reconstructed the accident, that it has been such a clear sabotage, blocking roads, walking to Fabio hammering on him on the head, hammering .. Naomi. It is unbelievable. There is nothing hidden, we keep the file of Naomi open through international channels, and it will be done. He is part of us. (2:56). Fabio's body was found meters away from the car. It has only 1 hammer on the back of the head, if the body is thrown there will be damages to the body, scratches to the skin, it is not there. Naomi was on the passenger seat, was moved to the drivers seat, and hammer comes on the side of where Fabio was, so somebody moved him to car and hammered him. It's very clear, it's been reconstructed by the Italian police in detail, because they were responsible for my security, and they do not know how the security lapses happened, and they see it. It's their job. Strange enough there were only 2 passengers in my car, me and my son, which always used to be there. Somebody knew, and this has happened in 3 occasions of my assassination.

Fabio will be remembered for the changes and the love he brought to the KF. His life cut short by people who knew and planned to do ?? We are all sure, I spoke in depth with Interpol and .. Italian national security, (2:58). .. with people in Pentagon. They have reconstructed it, we went back to work with KS in KF, reconstructing we asked, I see his soul, Shandor to look at the other angles of reconstruction. We went through that side. We monitored everything. It is impossible to be 20 meters away from the car, which has been hit on a high accident and just have a damage in the back of the head, and being face down, with no scratches to the face or body, except the ??

The enemies of the KF lived within the KF and they reported every move of us. This is the problem when you are a Belgium or connected to Belgium's. They serve their masters. Pedophiles serve pedophiles, because they are all part of the same. … Whenever you bring up the talk of Fabio, it brings home a lot of things. I watched the suffering of the mother and father, and watched the suffering of Naomi, Giovannia. .. (3:00). .. and there is pain. That son could be my son in the same car. It was planned by the Belgium's for me, and made sure they are not there, when it happens. A lot of you don't know what I suffer with, but one day we'll ?? open it.

Q: When people do you wrong or try to ruin you, as they did to the KF, .. what prayer, or what do you do to elevate their soul?
K- We give, it is their soul who has to receive it, to be elevated, that's the beauty of it. You got to understand, Derek (Red Circle) went to court and gave false evidence. I helped him, he was paralyzed with his stroke. The stroke from the poison he gave me. He damaged himself, I still helped him with recovering. And he went to court and gave the false evidence, and he took a 1$ penalty to me. Because he was always that way, he said, because when you get a dollar from somebody, you're there, that's all, it doesn't matter, it's just getting that 1$.

He was so crooked. What happened to him? When we helped. It was exactly 2 weeks when the Corona business started and we supported the Corona with One Cup of One Life, with the Chinese. He wrote an article, that we started the Corona in China, and amazing enough, next few weeks, (3:02). he died of Corona infection. He was one of the first people in Belgium who died of Corona infection.

I always said, we gave everything to him, and he stole everything for the king, whoever they served. He was another insider working outside, and we elevated. We always elevate their soul, but then they find their position. What he accused the KF of, this time was so grave, that he would not come back to the KF to ask for help, to use the One Cup One Life. His daughter wrote to me in public, that they knew the T could have helped, but he wouldn't come because he know he lied. He couldn't use the T again, where he lied about it himself. Our job is just to support. In time they'll be enlightened.

He did enough damage, but actually brought a lot of things around it, that it does not bother us, because the KF is growing so big, and with their misconduct, we become bigger. More people read, a few people believe. But our job is to elevate. Just to elevate

their soul. Even in their misconduct, they think they are right, that's part of the elevation of the soul. It's not for us to ?? change.

When we found out, that the assassination was planned in Antwerp, we have all the documentation of movement, (3:04). It was planned in Antwerp. The gentleman who planned it was a person from Eastern Europe, from the same city and place where the drivers have come from. The 2 drivers, especially the driver who now is accused of killing of Fabio, comes from the same structure, mafia group. They met with Derek. We have a lot of information available, you do not know how much we know. The same gentleman is in another problem somewhere else. He paid for the death of Fabio. His soul was elevated to understand what was done. He frequently traveled between his country and Antwerp prior to assassination and ?? He is a gangster. He was paid to kill. He comes from the same area as the driver. We know a lot, in time it is for the Italian securities to open this file.

From point of poverty and nothing, (3:06). after our assassination, he started buying latest model cars and everything else, because he was paid to do. We know too much. And they'll pay, we elevate their souls, because the soul has to bring them to the point of understanding ?? . We are not in their brain to find out what they have done. They have to judge it themselves.

This week is exactly a year and a half I have not seen my son, I don't know if he is alive or whatever. And what condition he is in, again in the hand of the same pedophiles and same group. My son is no different than Fabio, because ?? others. It's the same criminals have the same behavior, it doesn't matter whose son you take, it's all ??
Any other question.

Q; Would making a reactor as much as a MaGrav be like saying a prayer to God for peace, since they organize the fields of emotion in the environment?
K- Partially in a way you can participate, if you know how to use it, yes. MaGrav units in the coming time we'll explain, what we'll do. (3:08).

A few KS broke into it, then they lost it. They came back to it, and they don't understand. But in the MaGrav system it is setup in a specific condition and position, has the same as the STM and the P of the man. The STP of the man. We created that box, but we have no control over the fields. (Unfortunately to today I don't have my .. problem in transmission (no whiteboard) .

If you look at the structure of the MaGravs, the coils, and then look at the structure of the top coil, cup, and the coil, in the Cup of Man, the 5 Stacker, what do you see? What haven't you learned? Isn't it all coils? Isn't it no straight wires? Isn't this what you have in a MaGrav system? Haven't you seen work in the D of the fields, in the free space.

In the Cup of Man the top cup, you create the multitude of fields, but in saltwater. The MaGrav is open in the saltwater of the U, in the free fields of the U, and none of you have understood it. You looked at it as something to give me power. (3;10). But I gave you

the knowledge of the soul of the creation. That's why I keep on telling you, you're going for crumbs and you are happy with it.

Just look at the construction of the Cup of Man, the 5 Stackers, wherever we brought in the soul of operation, we used the coils. Look at your MaGrav system. Is it anything but souls, coils. Because it creates a combination of the fields, covers the totality of the fields, from the fields of the soul of the Solid, to the man, and the ??

But you haven't understood yet, you just play around. You just love to be around. In so many ways, you have everything within the Cups, but you still look at the saltwater, and you look at the totality, and then you understand the creation of what is needed.

Then, (3:12). look at how we use the energy of the space. Where in the Cups you use confined energy of the water. Then you understand there is a lot that is there, that you haven't understood, and you are still after creating some energy.

?? KS to understand, that how the MaGrav systems work and create understanding of the process of the positioning of the MaGravs, you'll achieve a lot. But you are not there, you are just happy to save 80 to 90%, where you got to understand the energy absorbed, deposited and put in to the MaGravs can feed the U.

If you had 9 or 10 turns, and you get it by order of magnitude, in your Cups of Life, and in the top Cup you only work with non-physicality, then just with a small ?? you have 6 types of rings, each one between 40 and 60 and 70 coils on each, interfering, interacting and operating within each other. I have given you the access to universal energy and you are still not aware of it. You're still looking for the Cups. (3:14). MaGrav systems does not given me 40 it gives me 30.

MaGrav gives you the knowledge and the energy of the U, you don't know how to tap into it. We have a beautiful saying in Farsi. In Farsi we say, " … .. " if the cat cannot get to the meat which is hanging, it says there is something wrong with the meat. You cannot understand what you have been given as a knowledge in MaGravs, you say everything is wrong with it.

When the KS who breakthrough this knowledge understand it, they'll realize how feeble KS of today have been, those who haven't understood. It is simple I cannot put it any other way.

If you put the Stacker, Cup of Man you put there, you see you create the STM on the top with the, is it 8 or 9, some people do 10 turns, individual, multiply that say, 3 by 17 outer core, if you done it that way, that's 210 turns, and then you have another, the same inside them, that's 420 turns, and then you have the inner core, let's say 40 , no let's say 50, that 150 plus another 150 inner core, that's let say 700. That is 10 to the power of 700 combination strength. Not 10 to 700. (3:16). Which is 10 with 700 zero combination, plus the interaction, which is another god knows 700 zeros combination.

And you say the MaGravs don't work. I gave you the secret of creation and you are happy with 1 watt to 10 watts.

And the on top of that, there are more possibilities of combinations. Now you use just Nano coated, what about if you put an alloy, instead of just a Cu, or the Gans's of different materials on top of it, and then multiplied the zeros by 3, by 4, by 5. Then you feel the forces of the MaGrav across the U, let alone where you sit.

But you don't have the knowledge how to use, you have been too greedy for the .. As I said in the first teachings of the second day of the Blueprint, of the MaGravs. The people, and the questions which were coming, and how to do. These people are just too much greedy after the energy, so let them have it. We build the MaGrav units in the EU, but we use in the D of the soul, not in the D of P, but we still manage to ?? because we have to feed the lower strength of the man. (3:18).

One day, the closet person I've seen getting to the understanding of small steps of it, is Alex in Nigeria. He has such a beautiful soul and he understands clearly. The beginning he understands, but he cannot follow it through, every time he has done, he gets too excited, he diverts in another angle, and I just watch. He has a most beautiful soul with KS, the same with Armand, the same with John. These are all ?? bits into it, but they lost the foundation, the principle of it.

And now you are busy with the Gans's and the other parts, Just next step up in knowledge. Alex was the only one up to now, who have managed to understand to mix both the soul and the P, but he just keeps on getting trapped in the P somewhere. If you listen to teachings of Alex, it's amazing how much knowledge he disperses, how much knowledge in-depth, but nobody understands. We understand because we have been there. When I listen to his teachings, it's nothing but sharing the knowledge of Creator. We have another guy in China the same, he understood far beyond anybody else. You're still busy with energies, if you look at the fields, you achieve things, that your MaGrav becomes a magic box, or a lot of people who don't understand the interaction of ?? things .. (3:20).

Any other question.

Q: .. recognizing that we have a lot to do as KS, but we also see transformations in our time with their initiatives, which seems to make it necessary to carry out historical transcripts, and synthesis, etc. Therefore, the best means for this purpose perhaps would be through its bibliography. What do you think about forming a group of KS for this purpose, even if we don't have the permission to publish. Such materials may serve in the future, the historian that you and or your successor hire. If you agree, could we start with your genealogy?
K- We are not creating another cycle, we are part of the structure of the humanity. It shall be stayed by. The knowledge can be done, (3:22). the private life, and our structure of what we do, and we live, will stay private. Because then it becomes another of cycle of what we saw, many things in the past. We are not creating another .. cycle. We have a life

the same as another humans, and we'll leave that as it is. Creating these kind of things diverts from the essential understanding the KOC. See if you can do the general genealogy on the Creator, that would be good place to start, and then maybe His servants.

Thank you. We'll come back next week. I think the UC and KS who helped and supported, and we have to receive the most beautiful news in past 2 weeks, it brought us a lot of pain, from the person which we, were so much love and cared for as KS, is back with us, and we have to receive the call during the teachings, which is amazing.
… Chinese New Year ..
(3:24). Thank you.

Note: Transcription has not been checked by KF. Please listen to original recording. (Transcription by KF Brazil)

(Quick Index (extensive because important teaching – We have a pdf file only with this Quick Index)

Go on Internet and tell Methi has declared his hand on Messiah;
Universal Community is not so far ahead of man UFOs are matter state travel, not by the soul; Enhancement Unit is gaining weight we have achieved creation of G fields - the systems work; Entered space T; Don't need to wait for 6th of June flight to Moon; Methi declares himself today; MaGrav T - "Beam me up Scotty"; Elevate STM through MaGrav; Standing on MaGrav T&T across U;

Nuclear plasma is not dangerous - it's the plasma of a "nucleus" - Not radioactive; Work of U replicates itself throughout creation of matter in upper atmosphere - solar System and Galaxy the same process - same process in intestines; Speed of electrons same as planets; Rick shows magnets - Deuterium; Completion of knowledge when STM transmutes STC inside; Creation of Heartbeat;

ENGLISH TRANSCRIPTION

(:22).

K- … In sharing knowledge of space and knowledge of man and see where the two can meet, then some of us, and then all of us can be educated to that knowledge, that we all become the same. I asked this intro as Rick suggested to be played this morning, because we are trying to get to the point of bringing a lot of closure, to a lot of teachings of the past, that we can start the new cycle.

In the intro we hear very clearly, that we have taught the knowledge of the space T, if the man decides to travel with the spacecraft UFO, because then he thinks he has become the man of space. Then you have the option. This is mainly what has been opened to most of the Universal Community, flight by containing soul, by containing physicality (P). That has been, that's why you always look into the sky to see, if you see a UFO, or I've seen it, or other things which are centuries, thousands of years, been drawn on caves and every where else. We are not the first generation we are talking about that. This has been the knowledge of the Universe (U). (:24).

Now the teaching about another craft, which can be created using the universal knowledge, then the universe's T, is the understanding of the operation of the soul. Working like a plasma (Pl).

In the UFOs, in the structure of the airplane you have no difference. It's the same thing, carrying masses faster to different position. We used to do with donkey, we managed to do with a car, now we have … now we have a rocket. And then the next step. These all have been using, fuel from the environment, fuel form what we could get something to do with, feed the donkey, get the motion, move your things. Put the fuel in the tank, get the car driven, put rocket fuel and then now it goes. Now we are looking for a new fuel that we can put in a reactor, build something we call a UFO, and get to the next position, next destination.

But this system is much faster, and has a protection, and this shows that knowledge of the physical side of the races in the U, have not done much more than the mankind. Has not achieved much more, except a system, which now can go faster. We went from the donkey to rocket propulsion, we managed to get a bit more of it, then next step to us, is spaceship, where we introduce a new fuel, Pl T.

But this, if you see the people in UFOs, it means they are more or less the same understanding of the man, a little bit more of positioning. (:26). But the teaching we do, with this, has been all matter fields condition, connection. The teaching of the soul is the way the U works, not machinery.

You cannot land on the surface of the sun, .. a star, because it is a Pl, it creates its own dimension (D), its own entity, .. D of interaction. It's the same with the Soul of the Man (STM). He has his own identity, he doesn't need the physical body of the man, or a donkey or a cat, or a tree.

So when we come to the point of the maturity of the man, you are looking, "oh I have a motorbike at home, when I have money I buy a car," and then when you have money I

buy a plane, and now the human race is there, when we have the knowledge, we have the UFO, or a flying object which has been a mystery to us. So we are behind the neighbor who had the money before and bought the car, … and bought the plane. But this time we are behind the U Community trying to get that better car movement, we call it a UFO. This is all matter state condition of transportation.

Now you realize what we have been teaching in the past year or two year, is a vehicle without the body. But you can reduce the strength of the sun's field Pl, (:28). and create earth with it, we can create Mars, you can create anything you like with it. This is the gift, the knowledge, it's a T which we have been concentrating for you to understand.

When I tell you we teach, not only for the man, but for the Universal Community (UC), they are learning, that the time has come to leave the UFO. We are getting educated, like the humans, to move to the next level of understanding, without encaging, not the bird in the box that we carry it, we call it a bird in a cage, man in the car, UC in the UFO.

So this is what is important for us, now that we are completing the education of man for the manifestation and declaration of Methi, for you to understand what you are going for. It's not anymore, give me another object for to travel, you have the system inside you. It's the part of the way the U works. U doesn't make cars, .. jumbo jets, the U does not .. (The U) uses the fields within it, to achieve what it needs, the position and what we call, its attribute.

When we talk, when we speak about the upcoming of Methi, declaration of man understanding, is that Methi, of the work of the creation - how the U works. When you reach that point of the maturity, do you need the UFO. This is where the teaching of the KF is. You thought we were teaching you about the soul, (:30). but we are teaching the UC the same, they are listening, they understand, that now even them are getting taught to get out of the UFOs, there is another option. I said, when I finish teaching, man will be equal to the others, but the U now learns from the voice of the man, the knowledge of the Creator, through understanding of the work of the Pl.

This is part of what we are here for, and what we are doing. The next system for us to see how to travel without the P of the spaceship or aircraft. It's in-between two. to gain the trust of the soul, at the same time being the physical. We are giving you the enhancement flight unit (FEU), but in a way, that's a step in elevation for the STM to be able to become free.

In the space reactors, which are developed and getting manufactured, now for the enhancement unit (EU), Vision EU, or flight EU, we have accommodated all conditions. You want to fly in the D of the soul, the system is set for it. You want to be in the both D of the P and the soul, its done for it. You want to be in the D of the P, it's built into the system. Many of you, even I just saw the intro (video), are expecting the flight to be on the 6th of June, we are already testing, we have already have first results of development of the T for landing and taking off, we know the system works.

Now we are not waiting for the 6th of June to do the test. We are assembling, we are testing, (:32). we are already going to manufacturing of the reactors. The testing has already started. It's not that, we are going to put the system in the 6th of June how la, la, we going to do, who is going to test it. It's not on the, what I call, Cape Canaveral, you have a rocket and everybody sees when it goes up, or comes down and crashes. Because that's the only time they can test, every time they test in public. Because of the advancement of the T, we are testing in the labs, we are testing with the people who sit, how they behave, how the system changes their emotion. So if you are waiting to see the flight on the 6th of June, the first flights, we have already started the tests. The systems are getting built, the body is getting completed in China, when he arrives in Europe some time in February March, we put the system in it, the minute the systems go in, the tests have started. March, April, May, June. Even though without you knowing, the flight tests conditions, which we understand now, started in the Exhibition Center (EC) a year ago in Linz. The systems went operational, so we've seen it understand it, it's in us and around us, and we learn more.

Our target 6th of June is to complete but you will come to understand the way the KF has worked over years. You are going to be debriefed in a very soft, and gentle way, what happened in the tests, what happened next. What is the next condition. There is a secret within the KF management team, on the top of the structure of the KF. (:34).

Maybe it's time for you to understand how advanced the T is. Because now we can show you, we have measured it, we know it. We know the system works. I hope with the permission of our colleagues in KF, we can open this door, as I said, slowly for you to see, to understand.

You've seen … 2 units, these 2 units were manufactured in China together, were brought into Linz, it took 2 or 3 months, the team of the KF, who understood, worked on it, and tried to put the electronics and computer control into it. To put it together. We had our specialist with the computers coming to Austria, sitting with the laptop trying to monitor, follow the system. Rick .. … The new spaceship ..
When we brought these units into Austria, we realized no computer system works. We brought our specialist who could track it on a computer. Stanley came and sat on the machine, (:36). monitoring, trying to understand. We found out that … we are overriding with the T, the Pl, the one (..) What we found out and what we saw (…)

When we brought these 2 systems together in Linz, we weighed them. The systems have equal number of reactors, the systems have more or less everything else except a chair, which in the other one we have the matter production. They all weighted around 950 kg, to a ton. In Linz we set the system to work. If you remember we explained, (:38). that in one of the tests, we created the fields with the communication interaction.

But what we haven't revealed up to today, is that one of the systems started gaining weight. In past year and a half has gained nearly 500 to 600 kg of weight. It keeps on

adding to its weight, which means we have achieved creation of G field forces within the structure, for the first time, through a very simple system.

How do we know this. When we came to bring the units from the old EC to the new EC, the .. 1 ton forklifts could not lift one of the EU. So they had to bring additional, or different lift system to be able to lift over a ton. We can lift one of them (the EU), still with no problem, (it's) at 950 kg. We had no problem (lifting both of them) when we installed them. But now one of these 2 children of the man, is gaining weight, and it has gained weight by 600 kg. This is one of the reasons we brought the 2 systems from upper level to lower level, on the ground floor. Because if it carries on gaining weight, it can break the structure.

Now you understand, we are only in the test system, (:40). and we have created gravity. We have created systems, which actually work. This is why we are heading in the direction of the same system for the next level, for the next condition. … We have come to understand, that we have already entered the space game. We are not claiming, you consent, the weight has been weighed in China before leaving. Same system, weigh the two, and you can see the difference, and still gaining. Dr Klaus are you in background ..

So we have, we are not promising what is going to happen, we have already started the space T. We have managed to gain weight, we have managed to increase gravity, and it can be measured. If our spaceship could go 1 km deep in the water, now we can go 1.5 km, maybe 2 km deep. (:42). This is now, when we tell you, don't wait of the 6th of June, when we develop, we explain, we bring in, what you see as the twin spaceships of the KF, already have start gaining weight.

We have developed the knowledge for the interaction of the fields to create, the condition of flight. This will be part of the work, which we are extending. Now when you go to the EC, where you look at the twin systems, ask yourself, which one of you two are getting fat, .. are gaining, and not sharing. But we know. In the management of KF and people involved in research we already know.

They tell me you cannot keep a secret. I kept the secret from man for thousands of years, now we release, we show you what we call, the secret. Then when you ask me what are, what it is, it's the totality of the understanding of the T. We have already brought you forward without burning the fuel, we have brought forward the knowledge of the man without one thing to be in that game and position. (:44). This is what is on the table of the knowledge today. Your babies, you got excited about the EU, one of them is getting fat, .. gaining weight. one of them has gained weight and we can physically measure. So when we speak about the space T, we have physically given you that.

But the space travel through the D of the Creator is the understanding of the work of the stars, not mechanical systems of the U Community, including man's rocket propulsion, including UC - UFOs. In the teaching of the creation of the flight of a UFO, we brought you part of the knowledge of the stars, space reactors. But when you look at the creation of the stars anywhere in the U, there is one single thing, stars create their own (Rick ..)

We create that condition, because we made you to understand between the two, as some of the races of the U have become to understand, how to interact the fields, but carry an object like the soul and the man. We are teaching you to do the way the Creator does. (:46). The KOC the stars, plasmas, how they are created.

In the communication last night in the interview (Italian radio) I was trying to explain this. When you have a mixture of the P of Gans's you, in trying to get them in communication, you create a flow of fields, that all contribute to, and connect to that they know what they are doing, we call it the blood of the man. In that M field flow of the blood, in getting energy, in trying to energize the P of the body to convert some of the energy to physical D, we create a heartbeat (HB).

We do the same in the condition of the Pl, but HB of the Pl is different, it is created in a different way, but in a similar way, where the HB of the man created the motion of the heart in turning and twisting. In the Pl T, KOC you create rotation. You don't, you haven't seen the sun dancing in the space, but because the HB is continuous, that physical conversion of the energy of the Pl, in slowing down, or in interaction with each other, creates the HB and rotation of the planetary system, or even the sun, or even the creation of the STM. Your soul in the center of your body is not sitting there idle and ?? alone , it's a dynamic structure, it's a sun, it rotates, and in its rotation it creates interaction with your P, creates emotion and the energies and the rest.

So when we speak about the upcoming declaration of the Methi, (:48). it's to understand the teaching of the man and the U Community, of the work of the creation and the Creator, that you do not need the D of P. It's there if you want to show it. The sun is there, but when he wants to show his manifestation of what he can do, he creates the planetary system. We have stars, which have no planetary system, they are shinning on their own, like the STM. So now you understand, what it means. If you look at the picture on the right hand side, one of these two what I call, "little devils," is getting fat, but he is not showing it. It's storing the energy inside.

On the left-hand picture we are proud to announce that the KF flag for the first time flying across this planet, between the two flags of Iran and state of Austria, where from now on it will be the same way, that all the offices of the KF, will bear the flag of the KF officially as the sign of the knowledge, sharing of the knowledge.

Now we understand how we have brought you into 6th of June flight system already, because we have a system which is gaining gravity. Transport companies are there to confirm to you, the ?? the system we moved, how they moved. We paid, we know it, and out of understanding how much more it will do (gain), we have brought them to the ground floor. (:50).

So as KF we have entered into the space T creation of gravity landing. Our little babies here are producing it. Now the system for us is to bring the next step in. Try to create the atmospheric condition around it, that allows it to go in a different direction. This is one of the reasons we changed the reactors.

We spent a year and a half, 2 years, to develop the new reactors space T, to become near enough to be able to accommodate the STM, if he wants to fly with the soul, the P of the man, and if he wants to have it in a craft. When you enter the new EU, which are coming from China, and are fitted, gives you all 3 options. Because the manufacturing design and development of the reactors are set to be this way. We designed it, we are fueling it, and we are developing it this way.

This is what the knowledge of the space is. The way the Creator has given the option to live with your soul, or to live in a house, car, in body of man. Now we give you a scientific solution for the same thing. (:52).

I am the Methi, in understanding and sharing the knowledge with the man, that the man understands he has access to both, and not only for the man, what we have taught about the operation of the soul, and how the next steps of understanding and traveling the U and Unicose, will come, will be through the understanding of the Pl transportation and transmutation (T&T), not in the matter state of T&T.

Then it comes a very big question to answer, when you understand, with transmutation of the elements you can make gold out of the plasma of the Cu, out of the Gans of Zn. When you move into the D of the Pl T, where you can transmute the energy. The biggest question for man, or the whole of the races in the U comes, does this means if you understand and mean, and be on the verge, become mature, to understand the totality, would that transmutation of the Pl of the STM, will transmute to become the gold in the eye of the man, which becomes the Soul of the Creator (STC).

This is what we are teaching. Transmutation of the STM, as you made gold out of Cu and Zn and the others, to make the STC within the STM. (:54). I am the Methi. They challenge me I show.

This is where the teaching goes, this is where it has to be clear to the KS. You seek knowledge of MaGrav, flying machines, I seek to teach you the knowledge of being able to transmute your soul, to the soul of your Creator. This is the completion of the knowledge, when the man can understand the transmutation of his soul, to become to the strength and the purity of the, its own creator.

Then mankind can say, and the rest of the U Community can say, the teaching is complete. This is the point of Methi, or Messiah, or whatever you call it, is when we understand with our own soul, the new challenge, the new opening to understand the energy of our soul, the operation of our soul, to transmute ourselves to be the nearest, the purest, soul, to then become the STC.

You do your best to achieve 99.99% purity in gold. (:56). How much can you purify your soul, in understanding of the totality, that becomes that gold, which is the STC. This is the purpose of 9 years of teaching, as of today. But the Creator with all He has, is still through His work, interaction of His fields, creates the universes, and the galaxies, and

the sun and the earth. So man with understanding this point, can create the D of the P as he needs, to be manifested, at the point of the time and the position, and the space in respect to time and position. Then does the time exist, unless you decide as soul, manifest in D of P in that position.

It's very interesting when you don't understand and your knowledge is not there. Yesterday I had to give some papers to a lady, translation of my birth certificate for documentation for what is to come. And she read in English 1337, because I am born in Iran, 1337. She looked at it and said, he is not that old. Today is 2022. I looked and I said, my dear I am that old, many more.

The knowledge is what we understand and what we comprehend. (:58). We have taught you every step. You are happy with a UFO. We make it even smaller, much cuter, .. effective, this is knowledge of T&T of the soul too. If you want a donkey, our friends go to the Zoo and get on a donkey and they pay for it. Go to the Zoo of the man. You want the knowledge of the creation and the Creator, work with us. Work with yourself, understand the working of it.

One of the biggest problems, which will come, and we have to face it, and we have developed it, even we are changing part of the reactors in the T to meet this, is the interaction of the souls. Interaction of the plasmatic fields with each other, how to accommodate. In the new EU, when you look at these, the systems are outside, as we said, the new ones are inside. In these old ones it was very hard to create the conditions of the soul and maintain it. But we can create the condition of the gravity and the fields and maintain it.

In the new systems you have an option in the control, (1:00). that you control it with the emotion of the man and the soul. The transportation with new systems plays totally different game, works with the HB, works with the field interaction. As I said before, when we want to go to the moon, we create the condition of the HB of the moon, plus its field strength, and like a lover, just pulls us in.

If you wonder why one of these reactors is setting itself down to increase gravity, is because the system was set to be balanced. Now we can create mis-balance (imbalance) in our new systems, new T, with implication application of the different structure working of the HB and the fields. When we want to go in the D of the totality, if this is your EU, and the moon and Mars is there, and planet Zeus here. The intention of the man, or the soul within the system, wishes to be on the moon, the system embedded in direction of the moon, (1:02). automatically creates the HB of the moon, plus the field strength of interaction. Where in the amino acid (AA) of the man we call it a Carbon.

There is a second passenger onboard, she likes to go to the Mars, we have one captain, we are here to serve, and understanding that serving is to be able to give what is needed, according to what is agreed. The interaction of the soul of the passenger, in his wish, understanding of the STM, with the cooperation and interaction of the HB of the system, chooses destination of it.

Go back to teaching of couple weeks ago, I said how do the M fields divide, and what strength decides, what is to be divided. Is it enforcement, or is it accommodation? You might force yourself in, but the condition will accommodate what you can have.

The new EU flight system (FS) carries what we call, (1:04). interaction field system, very much like the vision system, where the pilot sits it, and the emotion of the interaction of the pilot with the system, connected to the body, decides the wishes of the captain.

The captain is chosen by his correct conduct, cannot harm and is there to serve. Because the soul is committed to that level, he'll never go wrong. This is the mechanism of working of your new FEU.

As the system is set to work with the soul, will be there, if you decide to manifest yourself as a craft on the Mars, other systems will facilitate the physical manifestation. If you decide to manifest yourself as a man on the Mars, the system will create a field for you to be able to walk it. If you decide, that on Mars you want to see how you look, the system will take it away, and allow you to manifest yourself in the shape of the man on Mars. Because even on Mars you are still connected to the system, which brought you in. (1:06).

Then don't wait for 6th of June to see the flight anymore. Go to the EC and see a system, which is wants to be a submarine in the world of the man. We haven't dictated to it, it's the way it dictates itself to it. We have already started the journey to space, but what do you want to see, and what do you want to understand? How much are you open to understand the totality? To what extent are we ready to understand, and adapt to the new condition, to the new understanding, to the new comprehension of the system, facilitated for man to travel in any shape, or .. way, using one integrated system, which is the EU. You want a spaceship sits there, you want to travel with the space of the STM, or instead you want to travel in D of matter state. This is what, (1:08). will come to be part of the work of the KF EU and FS in the coming time, in the months and years to come.

For the first time not only for the human race, but the UC all 3 have been made manifesto. It’s the time of manifestation of Mitra. You will decide to be with the soul or in the D of P of its manifestation. In totality, we have matured the man to understand the work of the creation and the Creator.

As a Methi, my job, which I accepted thousands of years ago to mature man and the U, not only the man. We chose the planet earth, because it is so physical, that we could give an surety to the UC, that it can become P if you want to, or you can be the star without P if you want to.

The problem is how much we mature in understanding of our work, and the work of the creation. How much, that man will have in understanding the totality, because today

sitting here, I know, that I have taught enough, not only to man but the UC, what they were missing in their knowledge. Man in the future will be able understand.

I gave you the MaGrav system for T&T in the U, and you went for the crumbs of, (1:10). how many mille volts. If mankind understands the work of the MaGrav systems, the true work of the MaGrav system. Human race has a joke, but now it's a reality. On it, "Beam me up Scotty." I gave you one of the most powerful transportation systems known in the U. We taught you for a long time about the Star Formation (SF), SF for you can be this. The SF still works the same, but in the 4th one, and the 4th one is the STM. Now you understand, still ask for MaGrav to generate 1 or 2 watts, and what you missed. By stacking the 3 systems on top of each other, we centralize the forces, and the STM will decide its position.

If you could understand this, you saw it 3 - 4 years ago when John in Arizona (AZ), walking amongst them. But did you go over them, and did you create the right field energy to elevate the soul. All we done now, you couldn't understand this, we have created you the Vision EU. (1:12).

When the handicapped child cannot play with one toy, when is needed for elevation of his physical movement. We make another toy, which does the same. But we'll achieve the end result. This is what the KF T is, and we battling with you as KS, because you don't' understand, you could not understand, you could not see the end product. Today you see the end product, then you understand.

Anyone, any nation, any race in the U tries to touch me, I touch their soul. The elevation of the soul will elevate into where they should be. But we still let the man do his childish things and battle their own way, to find their own way. Because when you give it to them free, and they don't do anything for it, they have no respect for it, they become again animals in the space.

The human race is not the first race, which went wrong, we have corrected all. That's why we know how to handle it. And man, the last race we have to wipe out from this structure, that the U becomes a peaceful place to be. We had in the past, races worse than the man, killing and destruction of, not only on their planets, but in the stars and the galaxies. We tamed them. Man is not a difficult job to do.

But we set to understand the evolution, how over thousands of years, millions of years, this misconduct this misfit-ing comes in. Now we understand it fully, (1:14). and we can take care of it, by understanding, by elevation of the soul of the planet, in interaction with the STM. They are both guilty in each others operation, and not just one.

We have to elevate the soul of the planet through all these Gans systems, you don't understand what you are doing, but you are producing in the energy increase, the way you put the Gans's on your body and you see the pain goes. By production and increasing the mass production, and increasing Gans's we are elevating, we are changing that pain from inside the planet. You will understand soon, how and why. Then we do the same

with the man, which is the STM. We always tried to fix one, now we fix both, that they need fixing anymore, because there is no reason to change.

Playing the game of T&T of the fields, in the D of the Pl, is the game of the creators, and the wisdom of the Creator, and the wise men of the U, which are part of this structure of the creation. Now we teach the same, not to man, but to the U. As I said before and I repeat again, when I teach, I teach to the UC and not to the man only. Now you understand why.

Because the knowledge was one step ahead of you, just a little bit more, they moved from the rockets into D of fields, in the matter state of the Pl. We had to educate them at the same time, to be able to understand the T&T of the fields of the U, (1:16). and not the interaction of them, to create the motion and position and speed.

Now you understand, as I repeat and say many times, we take man into UC not to be subordinate, but to be equal. Now you are equal. You cannot make a servant out of yourself, because your soul has been taught, the same as them. Interaction of the fields understanding of the totality of the operation of the fields, is the name of the game.

But when you are alive you can't sit in one corner and do nothing till the soul opens up and whatever. We play these games of teaching. You play the game of working, .. of whatever, and when you get fed up you do another work. Now you have the option with the STM. Now you understand transmutation of the STM is to become gold. That gold is the balanced fields of the work of the STC. What would you like your soul to be transmuted to, or you work the D of the perfection, or you still can be happy, build your UFOs and play with the MaGrav, which don't work, and the rest of it.

The game changes for the mankind, but we have changed the game today. You do not need to wait till the 22nd of February to understand the declaration. We have declared our hand today. (1:18). We like to see how much the human race will make progress, to understand the transmutation of the fields of the U, and in interaction with the STC.

You made the M fields of the moon and the heart of the moon, to travel from earth to moon on the 6th of June. We have taught you to find the HB of the Creator, and travel the fields of the U through your soul, to reach that moon, which is the STC, and become part of it.

This has been the fundamental teachings of the KF from the outset. The communication facilities of today has allowed us to teach all men in one go, and not some man who abused it, like the Moses, when it came to translating and transferring.

I am the Messiah, and the Methi, and whatever you want to call it, because I understand the work of the fields of the U, and not in the matter state. Now you understand why the teaching has been going on this way, and how we have been educated you to that point. The rest of it, what happens when you mix this Gans with that Gans, is the play, is the pleasure of understanding more about the process of creation, nothing else, nothing more.

We still make you the MaGrav systems, .. EU, and the rest of it. But you have the capability and the ability on your own, to reach to that point of wisdom, if you don't have the T, (1:20). of the EU or the MaGrav. It's the clarity of understanding of interaction of the fields of the U, and then you mature to totality, irrespective of time, position, and place.

We throw the gauntlet, and the leaders of this planet, work with us we achieve, work against us, we know how to handle. We make you to follow by your own soul, we lead your P to march. It's yours to stand proud and not to grovel and crawl. As I said before, a good friend of mine used to be an ambassador to Vatican. He said, to me, Mehran you have to see when some of the world leaders come to see the Pope, they don't walk, they crawl like a dog on the floor to the foot of the Pope. They don't see themselves that high. With us we all walk proud to our soul, and P to understand the totality, we don't need to crawl to no one. We don't need to beg to no one, as we are part of the creation and Creator, if you understand the power, the strength, and the beauty of the life of our soul, then the P.

It was good to give you a date, that something might happen, that day is today, manifestation and declaration of the Methi, and the Moses, return of the Christ, in any name you like. The return of the soul, not the P. The return of the knowledge, and not what we call the possession of knowledge, but to share it in equal measure. (1:22).

You have all the facilities and the systems to do and you got to understand, by declaring our position clearly we expect, habit of the man to create problem, but that's for them. We shall prevail, and our knowledge is shared equal amongst the UC, and man better follow fast, if he does not want to be again, the one which left behind, because of his own lack of courage, and what I call the stupidity, to be always subordinate. There is no time for kings, and there is no king, but him. The true what we call, STC.

Understand the teachings, and understand how much of it you haven't understood.

I was ready to take you to the T&T of the STM when I taught you the blueprint of the MaGrav system, but you could not see, you could not understand. Maybe the picture on the screen shows you what you have missed.

There is still pieces here missed, (1:24). we haven't put in to complete that T&T. It's for you to do. Don't forget the secret in this, is this red spot (STM). The law of Pl tells you the weaker gives, takes, or receives, from the stronger. The STM has to become so humble, that all systems feed it, and with it, it feeds back, to create the HB of existence in the U.

If you look at the picture of the Vertical EU, (Rick ..) or you look at the Horizontal EU, we have given you this, but you don't see it. (Rick … …)

What I teach you is here (MaGrav in bottom of VEU - you stand on it) I taught you this 6 - 7 years ago, and you didn't see it. And what I taught you today, is in this system built. (1:26). We're not coming up with fairytales, we show your lack of understanding. Can you show me the .. Horizontal units please (circles a MaGrav system at the bottom - persons stands on top of MaGrav). Now you understand when I tell you, you went for crumbs. These (MaGrav) units are there to transmute man across the U. You are standing on it. If you look here, (MaGrav is at the feet and above head in the Horizontal units) the same. In a different shape and forms. We haven't changed anything ?? the time, we just show you how much you missed the time. Can you show the first black EU pictures if you have with you. Now you understand, we haven't diverted from teaching, it was you who was too greedy and did not see. In everything we have developed, we have put in the MaGrav units. Or we have embedded within the center. (1:28).

The knowledge is the same, it's how you apply it for what purpose. This is the beauty when you understand the knowledge of creation (KOC). I give you the clay, do you want a cup, a plate, a flower vase, or a soup bowl, essence is the same clay. The knowledge is the same. What do you want to do. I can use the same Vertical unit as you see it here, and manifest the creation of the Creator, what has been created in the U. They come in-between and they manifest themselves, if we manage to create the right strength, field strength in our MaGrav system, that creates that in one of the fish tanks. I am clever, I know how to hide, that you can't see, but I am not a magician.

Go on Internet and tell Methi has declared his hand - "I am the Messiah." See what you get. The foolishness of the kingdom of Belgium, or the true kingdom of God, and then we show.

Man is equal in any race, shape, or form to his own race, and is equal to the other races in the U. (1:30). Not better, or not worse, it is him who chooses the level of the knowledge, but in soul, it is all the same.

Thank you .. for being there to understand what is there to achieve, for yourself and no one else. We create the facilities to teach more, that more people understand. We share KOC, and understanding of the scientific basis, not on the rhetoric, and just, just because we say so. The only person who can steal from you, is you, and nobody else. We go to break and come back if there are answer question regarding the soul or transmutation of the P, or the systems we answer.

>> BREAK >>> 418 KSW Feb 3, 2022 (1:36).

K- Can you se Dr. Klaus Priler on the panelist ..

Klaus would you like to explain about the weight gain of the system, how it came about, and what it is, because you are literally in it? (1:38).
Q: Yes sure, no sure. I could talk about this for hours, because we had this problem when we moved the unit. I wouldn't say problem, because it is beautiful to see. .. We found out one of these 2 units nearly doubled its weight after some weeks, when we were working with it. We found it out when we were delivering the units from one EC to the other one. Because we moved the units there, with the forklifts first. ..
.. the crane could measure the weight of the unit … (1:40). .. more than 1 ton.

We are already over 1.5 tons ..
We found out yesterday it has nothing to do with the matter state weight of the material with the weight of the platform. It was the operation of the fields. (1:42). This was opening a lot of eyes of everyone of us .. .

K- Thank you very much. Klaus is responsible for all this, what you see, operation and design, and delivery of the systems to the KF around the world. …

Now you understand how precise and exactly we have entered the Pl space T. It's not theoretical, it's by measurement, knowing, understanding and in a way, we paid for 900 kilos of material shipped from China to Austria, these were weighed international, and we paid for that weight, as they measure every box prior to shipping. This is what you understand, that you have already entered space Pl T.

The new units coming in have the additional touch, additional T, which has advanced so much, and has gone inside the walls, to be able to accept command and control by emotion and thoughts.

They tell me, you say don't go and say anything, and then you go and tell it. I tell it .. when it is a right time for it. Now you understand, (1:44). KF has entered creation of gravity, absorption of the gravity using non-nuclear material, two years .. when the systems were delivered into Linz EC, and then more to the new KF spaceship center. It's the beauty of knowledge and understanding it.

I wrote to John, .. when you receive it I want to know how much it weighs when our team finishes installation. He says, I have nothing to weigh (it with). I said, find a way, it's sinking or you are swimming. If you go back to the very first videos we showed (Rick …) where we showed the weight reduction .. from 9 kg to 6 kg …

If you look very closely, you see underneath of it, an extra blue piece. We had in the old EC to the (building) structure, that they don't takeoff, or pull themselves to the other position. Because there were two of them, if they created the fields they would move each other. We were expecting interaction, (1:46). .. fields, but now we see it in a different shape or form.

My dear KS we have already entered the space T. We don't need to wait for the 6th of June. It's for us to complete the T, that you can go. (…) 9.1 kilos then using the same T

but .. .. this video reducing weight. We showed in Belgium some 10 years ago, how to loose weight. We show in Austria how to gain weight, so we have the knowledge of both.

So we know how to take off, and to gain, now we have to connect it to the emotion of the man as a captain. .. the interaction is so fast that we have no computers to do it, (1:48).

There is additional energy on top of the matter state. When we tested it in the labs in Austria, we could see a hidden energy showing itself on the equipment, additional fields. We know now, and we know how.

We have reached out to the Iranian government nuclear scientists to allow us to ship nuclear material as part of the Pl space T across this planet, with the permission of the governments, and it takes some time for us to do it. Then we show the true power of the what we call created Pl through nuclear T. I came in as a nuclear physicist and I went in and I understood the Pl, and I became a Pl physicist. So .. we know the path, and we show it in this small reactor in Tehran .. .. and tested in Belgium.
.. we have a clear evidence on gaining weight too.

So we have achieved both M and G in 2 different stages, 2 different parts of the world, and 2 different scale of work. When you look at it, we have attached any megawatt power stations to these systems, and no .. hidden things .. it's in open in front of you. It's the way the system works.

I think humanity is ready to meet its soul, through interaction of the fields of the EU. (1:50). In that point, man shall commit no crime. As when we raise the soul of one, the others within the structure soul of humanity, will get energy from it and get elevated, that the whole of the race becomes a peaceful race. Through the love of Mitra amongst us, has brought that position, and the time and the space.

Any other question.

There you see the weight reduce from 9 kg to 7 with a very little touch of gases. and you see to 6.5 kg. The minimum we could reach with this machine was 6.3, because it started lifting, you could not measure the scale, because the separation would not sit on the pad, M fields had different interaction, so the P was there, but the field forces are not there. So you get that separation, what you see 6.3. When we reduce 30% of the weight by M fields interaction, (1:52). we start seeing field interaction of the plasmas. It's a rough guide.

Q: Stephanie .. first I want excuse from yesterday interrupting you. (K- Don't worry we got used to it, if it doesn't happen there is something wrong) (she makes excuses ..)

K- Just one second. If you look at the digital numbers you see we are using 1 - 2 volts, less than an amp, that kind of thing. We are not talking about huge voltages. If you understood this, you understand how we managed to reach 129 Tesla. .. very little fluxes, and energies, but massive powers. This shows and teaches you planetary systems do not

have a heavy center, very light. You can see 6.1 from 9.1 30% rate loss. This is when the field interactions come in, you can see .5 amp .. 1.6 volts. But the energy from this comes from the nuclear Pl T. Don't be .. naive about it. The power with this T comes from Pl nuclear T, not from electrical current. (1:54). Carry on.

Q: This was one of the questions I wanted to ask yesterday to explain what is Pl nuclear T. .. ?

K- Plasma nuclear T is a Pl created through nuclear interaction. Pl T is at the moment exclusivity of Iran, and Iranian nuclear physicists. Because we never went in any of the works with American, with the Russians and the rest, to understand the process of achieving Pl through nuclear processes.

They called it a cold fusion, and a cold plasma. It's nothing cold about it, it is natural Pl process. It happens in our body, .. in everyday life, even when you look at a piece of wood standing there, it still has that process going inside there, to keep the shape of the wood. If it didn't have it collapses, the structure collapses. So anything you see which stands, has a life, which exists, has a nuclear Pl process inside it.

The minute that changes, you see, you call it, "the wood has rotted, and the iron has rusted," and the rest of it. To a new D again with the Pl T. We go within the structure, from nucleus into Pl. Not nuclear as a bomb, and an energy. (1:56). We call it nuclear as a nucleus as a center, we go inside. Nuclear or nucleus, or neutron, whatever you call it, depending on the shape and size, and number of things in it. It's a house. With the new knowledge, by being a nuclear physicist, I just opened the door of the house, and see the beauty what's in the house. Nothing else.

We can explain all of it. As Rick shows the process in, what we call, the Inzano, the measuring of the fields, which many of the Knowledge Seekers (KS) over weeks monitored it, as it built up .. to 129 Tesla. It wasn't done there we are in the picture (on the screen). I remember it took 2 or 3 weeks. KS around the world were saying, "oh, it gone up by 1 Tesla. Oh it's gone up by 2 Tesla." We built it up. The same as we done in the system in Linz. We built it up, .. to that point. We built it up by understanding a nuclear Pl T, by using all of it, when you look at the setup of the reactors in the Inzano, 4 or 5 years ago. It's a combination of the reactors of different field energies, which created a nuclear interaction Pl.

This is something any of you understood. I don't think any of you understood at all what it means. By placing 12 reactors, (1:58). in this environment, .. of the lab, we created it between the reactors, interaction of the plasmatic fields, which lead to creation of nuclear Pl. Which means the energy, which is within a nucleus, **not a nuclear - as in radioactive**. Which means the 3 reactors became the boundary of the, creator of the boundary of the what we call, plasmatic field.

If you understand this, and look at the EU, it's the same thing, it's no difference. We created a "nucleus" Pl. Now we gave it a shape, we can control it. It's not in open space,

the way we had in the Inzano. As you do not understand fully the T, everything looks to you like a different puzzle, different thing, but essentially the whole knowledge is the same. We just make different things with it. I am sure when we put the space Pl detectors, we might even see 4 or 500 Tesla in some of the operation of the reactors in the EU. But it is in plasmatic, which means it is not dangerous.

You call it a nuclear Pl because it is easier for you to understand, easier for us to communicate with you. But to us it's a "nucleus" Pl, it's an energy within the nucleus, within the neutron, which that, what it counts. (2:00). This is what matters, and that's what counts for it to be.

Q: So it's like the earth, it's the center core, it's the nucleus. … this connected again to the MaGrav, there are 3 lines on top of the other, and then you put the man on top. I remember … you drew Infinity Loop horizontally, and then vertically, and then you said, that Pl .. it's like the Aex beads you can create continuously energy, where the middle gets strong G, to keep .. to contain the fields like the earth. That 3 on top of the other reminded me .. why when we do the Mozhans.. when we do the 4 , 1 has to higher, but 3 people have to be at different (height) level. .. Because the 3 people, (2:02). they create the MaGrav .. why did you told us to be off the floor … I thought that was the reason .. but to keep the core .. yeah this it, the 3 become 1, then you created the N and S Pole and it's got an endless repetitive feeding of the core. Today you drew the MaGrav and put man on top. ..
If one person put around themselves 3 MaGravs, they could replicate what we replicated in the Mozhan … I am talking like a train now.
K- Do you want to stop the train.

The fundamental point if you look at the MaGrav, where, or if you look at, (2:04). the Star Formation (SF) which we made from the beginning. Has been to by building the base, and the what we call the top , we always fill the top with H, or the lightest composition. Because in a way, the atomic matter state is the lightest, but then the strongest, more of, will feed it, and it creates .. field transformation, and transmutation.

But this is something which again KS, you are not nuclear physicists, .. is when you have the lightest and the less, you have more interaction. You have more energy releases, because you have more to interact with. This is where you can divide the fields, where they said up to now, they said, M fields cannot be done anything with. We could double it electromagnetically by transformers, but then divide it, the way we do as a Pl, is another game. By, we showed this one in the Chinese space reactor test clearly, how what one reactor on the top, specially loaded, we could create flow D, and it's the same.

Now with the STM on top of the MaGrav system is the same, it has to be the weakest, not the weakest, but less of, more to give then to take, that attracts the fields from the Pl. This is what we call the elevation of the STM. (2:06).

This is what we call to be humble to give, because you are detached, nothing is holding onto, that you can hold to, to hold you back, to be heavier, to what we call, gain. By giving you become more interactive, and more .. able to give.

One of the points in the world of .. Pl physics, .. Here if you look .. is the process of gaining Tesla fields in the Inzano in 2014, where you saw it gradually going to 12 to 14, we are building up the Pl fields in Tesla's. We started with more or less, very small and this number after weeks, she reached 129 Tesla. We stopped it, because there are a lot of things that cannot be, but that's how it is, you see a gradual buildup 12 to 14 then to 16 and the rest of it.

But … the position is, what has not been understood in world of science of the Pl, or the physics in respect to the M fields, is that how you can amalgamate fields. Then once you amalgamate them, (2:08). in the system, how to divide them. It does not matter where you came from, and how you are connected to , how you connect to the other entities of the same fields.

We know what entity connects to all the plasmatic fields of the U. How do we do this? How this process is done, is part of understanding the process of division by G field forces (FF) or M FF. If you divide through G field forces what happens, and what happens if you divide by M FF, what happens? How and where does this division come? How can we create a division? But in a way if you look at it as part of the understanding, when you interact with a magnet here, and this magnet through division interacts with another and creates its position, through the line of what I call, lineage … you are connected - even in division. This is how … in a different angle in a dynamic point, 2 E 2P , … (2:10). How do these connect with each other, and with the others?

There is a question mark in the world of Pl physics and in atomic nuclear physics, this question has been put many times over years, to number of nuclear and theoretical physicists. Maybe if you understand this you should be able to answer it. … Through the work of the Pl, work of the atomic structure, if you have a number of protons, and at same time, you have a number of E in different orbits, two points which, because of the lack of the knowledge we haven't managed to answer. This leads to another question I put years ago to the nuclear physicists.

Is the speed and weight of, (2:12). the E furthest to the nucleus, is the same as the speed and the weight of E nearest, in the first ring? The first thing the scientists tell you is, we don't know, they have not got that advanced. And the question is, is there a speed, and the weight, or the volume bigger or the same? We call them E and we accept them as E, but one thing, which is not answered in the world of nuclear T, and never been put in to be understood, because when you don't understand, you ignore it, nobody knows that you don't understand, and you haven't understood. But now we understand.

If look at the solar system, and consider this (nucleus with many neutrons) as 1 solar (sun), we have bigger planetary system in the far end, with massively different speeds than those closer. So when you put this to the nuclear .. and physicists, they say, we don't

know. But when you look at it in the macro and the micro, it should be the same. The E at the outer boundary have a bigger volume, have a different energy, the same as Saturn does. The ones closer, (2:14). have a different D too. It cannot be any different.

If you understand this, by interaction and choosing the right neutrons, you can create the right energy interference, to create the right fields as you want from it, without ever touching the center. Because the center moves on its own, it has its own interaction. These (E) are freer on their own, they can create interaction. When you understand this, a new world of Pl T and science opens up.

I gently touched on this deliberately a few weeks ago, when I explained when I was a young boy sitting under the x-ray machine, and saying if it goes through there, it goes through me, and what it does, what would I give. The translation in the Pl T is this. By controlling the center, you decide the field, the interaction of the bodies outside, and then it creates different condition. We have not understood, our science is not that deep enough, we haven't evolved to understand astronomy and cosmology and the rest of it.

But for sure we see, a lot of time they say, such and such a planets have aligned, (2:16). or this planet comes to be in that position in certain points. What we haven't measured is, what is the field radiation from this (planets aligning) interaction or this interaction. Because this field radiation has direct effect on the Pl of the center control. This is exactly like your soul inside the EC (means EU) and the reactors within it. These are the teachings for the people who become space T space center, and they can decide, and will decide how. Because the interaction of these, will create the field strength of the Jupiter. Or this will create the field strength of the moon. The STM with his emotion in the center, dictates "I want to go to the moon."

I explained before .. we enter a new cycle of knowledge sharing, into the space T, and last and this week is the beginning of understanding, both at the same time. It becomes much clearer, you don't waiting for the (2) 6th of June to fly, you understand you have already flown, the systems are there, and how it's been done. Now we can bring the two together and you understand the full understanding of the Pl T. Then when you lost this fear, you understood it, then you understand how to untangle your soul. (2:18). How to handle the interaction of your soul with the others.

Any other question.

Q: Stephanie .. from what you just said now. … from my understanding the field interaction is what makes the HB, and what's controlling the center, you just drew now,.. does it mean controlling the center by controlling the HB. I say ..
K- You are not wrong. It's the first time you made sense in your talking.
Q: I wrote it down .. what to talk .. the first time I wrote it down.
K- This is how you can do, but you have to understand what you give to create that HB, and what to take to create that HB, and once you've done it, you have to understand what's the next step.

Q: .. because I remember .. in the Mozhan, there was the killing of the ducks. That was very traumatic because I never heard the scream of someone about to die. … I think that is what creates .. the condition because then when you asked us to fly, and went into SF, obviously before you told us not to think … ?? at the top the fields are away. (2:20). Easier to regulate. Not thinking means I am feeling. .. then to recreate the feelings of unconditional love … the first thing came in my mind was the suffering of this duck, what was unnecessary. Especially after your class when you said we don't need to eat. So one thing if we need to eat, we need to kill to feed ourselves, but once I know we don't need to kill .. I thought that was unnecessary and I really wanted to from the bottom of my heart to finish .. (with the killing) … suddenly the unconditional feelings because I wished for the end of the suffering … a new beginning ..

I was really in that state. I remember the first thing change for me was the HB. … Then .. I felt this force, (2:22). coming from underneath me, so that remind me when you drew the Pl fields form N and S Pole.. then I felt a change in weight … suddenly feeling very light, like my hands start to lift up .. I really felt this change of weight, Suddenly I start to lift, then become heavier again. … my hands and legs were floating and I start to lift from the table. Obviously I started to rotate, and got scared. You told me the next day, that the rotation was only because of the fear and I ?? tilt, and force started to go out from the top, it went sideways. This is what you told me. I did felt feelings like something bigger, .. taking over. increase of something .. You said yesterday it's not correct to say the expansion of the soul, it felt like rising .. the HB is done because the G and M field at one point, (2:24). one field takeover the other … saturated .. that is what I felt .. Unfortunately unconsciously I stopped everything. but obviously it was something bigger. I know I already talked a lot now I forgot .. I lost myself .
K- Thank you .. I think I already answered you
Any other question.

R; I do have some magnets setup here do you want me to show that ?
K- Yes ..
Q: Staphanie, one more thing .. the EU the way I see it is to take off the fear. could you say that? … (2:26). The flight system is to take the human being to take off that fear?
K- Nope, it's your fear not the people. Okay , thank you …

Rick shows many different magnets on his table. Mr. Keshe guides him how to move them. Transcribe just the main points. (2:28). ..
K- You have to put them separated, but close to each other. (2:30). .. Now try to bring the smaller magnets closer, near to them, very gently .. What you will see. .. take the 2 magnets which stuck together, bring them from the outside forward, and see what effects they'll have on the others. .. bring the 3 closer to the center. . you see how much closer you can go with 3 magnets stuck together. You can see the boundary, it changes, you can go closer. You see the limitation before .. the more magnets you add together the closer you can go to the center of the magnets. You are trying to go the core center, not the magnets themselves.

This in .. the Pl physics, (2:32). and astronomy, shows how as we convert gases and others to matter state we become closer to the center without getting effected, or effecting us. This will bring a lot of changes in understanding of the process. You see the positioning. The totality of the Pl physics is to understand field interaction and not as in magnets, in matter state interactions. … take 2 or 3 out , stick them together and come back in the same path, just try to go in the center .. (2:34). You see if look at it in another way, the one with the 3 is like a Deuterium, its got 1 of each, it is more stable. If you understand this and go back to the past teachings, you should be able to understand the division of the M fields. If you collect 5 or 6 of them in a far distance, and you'll see how they interact with the center, without any other magnet, how they effect it, how they collect to each other.

This shows us in a very peculiar way, because you have to look at this 3 dimensional, not a flat 2 faced. Because when you hang these magnets, their behavior is very much different than on a flat board. Then you see how they interact and .. respond. (2:36). How you can use these responses to your advantage in what you want to achieve.

You have a field boundary of the center, and this .. keeps very much constant position in respect to the entities within it. In Pl physics, we consider this as part of the structure. Just go towards the ring magnet with your little magnet. You see very small entity can move the bigger entity, can move the whole structure, if you push it everything else moves out of the ?? three to accommodate this field force. If you know how to use it, watch the reaction.

Go close again .. and let it go, you see how far back it goes (it was pushed a longer ways out then normal). We have shown this before, it is part of the propulsion with Pl. If you put it on its own it goes different (less). If you can do it in the right way, you can create a condition of T&T. But we'll teach this in the time to come. Thank you .. (2:38).

We understood, that if we want to tap into vast energies, which is already accumulated, we go to the outer rings of a nuclear, what we call atomic structure, and the same with nucleus. If you want to convert more into the matter state you come towards the Inertia boundary field forces of the sun, for example, and you create more matters, and with it you create division of the gravity.

Even .. in the planetary system, interaction of the fields of the gravity, and M field of the earth and sun in upper atmosphere, in a free D creates the Pl of whatever. When this moves to the Inertia fields, it converts to the matter state. We have the same thing in the planetary systems, and the solar systems, and the galaxies we see the same. Then we see the density, and we enter solar Inertia, which converts the gaseous planets into the matter state planets. The same as we've seen with the others.

You see here with the Tesla increasing from 11.11 .. now we are at 11.86, some hours later, the clock is next to it. So we are gaining Pl, .. field strength. (2:40). This is the

understanding, that everything is the same in the process of creation. On earth the Inertia converts the Pl into a matter of whatever we need, H, O, whatever, gases of it, or in the mixture of it as a water.

In the solar systems (SS) it's the same. We start with the interaction of the fields of the SS, within the galaxy, we get these big planetary system as a gaseous planet, and as they enter the Inertia FF of the Sun, in the SS, they convert the materials, or gases or whatever, into the matter state strength of the fields of the HB in the center. They become solid and they strip off their gases, and then they become just rolling ball waiting to roll in, as the internal system looses its strength or looses its field strength to the center.

There is no difference in the world of creation. It's the same when you reach at the boundaries of the plasmatic fields, and how you can change that to the matter state. Even in D of the soul, how you convert the soul into the physical condition, STP. But this time you do it, you exchanging the boundary of the soul with its environment. Where you dictate the Inertia fields FF for the manifestation of the P.

The sun and its structure of SS has a fixed what we call boundary system, (2:42). of Inertia, and you can reach any ?? but you don't have the knowledge to be able to do this, but in the interaction of the sun and the earth, in the upper atmospheres, we create the Pl packages, and the Inertia of the earth converts it to the water, .. to gold, or whatever you like. It's the same with SS.

The sun has, and creates its own Inertia system, where in the boundaries, the big planets, have the gaseous Inertia. As they enter a certain zone, they enter matter state and gaseous state mixture Inertia, where we see like earth, we have atmospheric and we have the Inertia of the matter state. As you pass this line, you loose your gaseous state totally, and we see what we call, matter state Inertia planetary system, with no gaseous state Inertia strength. It's the same, no difference.

We see the same thing in the galaxies, that we see the galaxies on the boundaries behave like gaseous SS, and the solar structures on the boundary, they are like gaseous. As they come to the center of the galaxy we see the same operation. There is a certain bound depending on the gases and the Inertia, that we can create conditions like life, in the strength of it, we can even have a strength of Inertia on the other position for life. But it is all the same. (2:44).

If you look at it, there is no difference, you have the STM, and then you create the P of the man around it, and how you shape your fingers and your toes, and how you have no bone structure when you come to the brain, where there is a direct interaction of the matter Gans state, where here to keep upright you have brought a matter state of the bone. Even your intestines, all the materials inside, and everything else is developed this way. Positioning in respect to.

This conversion Inertia, exists in all our bodies the same. In your kidneys you do the same. The structure of the kidneys is the same. It brings in liquid matter with the different

things, but through the structure of the kidney, you have different .. filtering that you allow, these materials to be extracted, because you create the MG field from energy, or whatever, into the matter state to be discharged. When it manifests itself through the contact with physical condition of the body of man in atmospheric condition.

These are part of what we see in one of the teachings very recently, I explained, if you look at the intestine, and the bigger intestine when it comes out, called the colon. We have the same situation. In the intestine, (2:46). we dilute the material, to make it into the Nano material and Gans's, through the alkalinity of the stomach, not more than .. The acidity of it is for creation of current. But the alkaline-ness in the stomach creates the Gans's, and then these Gans's start floating in your intestine.

At this point they give energies, but these energies go to the body, gets used, and then when they comes to the colon, these energies, which are not needed, through the lymph system, become back again matter state, and you discharge it. We go from matter into the Gans, we share the energy, and when it is not needed, we come back in energy, and then that energy is point of reference, is rejected as a matter, plus whatever came in as, matter conversion of the Gans's.

So the knowledge is very much understood. It depends how and what you decided to manifest at this point (start of colon) in the stomach. If your intensity of the salt, or .. acidity is not there, that you cannot break up the material, which comes into a Gans, the body has no use for it, it rejects it as the way you had it. Because you didn't manage to convert it. So it comes out the same.

Means your stomach acidity is not strong enough, or your salt, what we call salinity is not enough, or right combination, to create the Gans's of that material. (2:48). You eat a pea, you reject a pea. Now go and find out what salinity is needed in the stomach, to be able to break up the pea into a Gans. Surely, it's not the acidity.

When you had a plate, you put acid on it, you dissolve, it became another matter. It only becomes an energy when there is a salt content into it. If the acidity cannot break it up, that the salt content, salinity cannot create it, you cannot convert it into energy. Then the body knows how to reject, convert back the energy to matter state.

When you look at the material in the colon, maybe 60% is coming from the waste food, 40% comes from the lymph conversion, around that figure. If you measure the exact amount of what material comes here, and what material comes here when it goes through the colon, and just before it you'll see there is a big difference. Lymph delivers what doesn't need, convert into materials, gets rejected.

Our knowledge is not so deep enough to understand, that you'll find materials in here (colon), that we never took up in here (stomach), but we ignore it, because we don't have the knowledge. These materials (in intestine) come from that energy, which you absorb 80% from the space, in conversion to the lymph, and giving energy, (2:50). body has no

?? with it (cannot use it), but it has already became Gans's in the matter state, and body has rejected it.

These are what we have to understand a lot, and when you travel in the space. You do not put anything in here (stomach) and you just continuously convert into the energy level, then you don't have a point of reference of Inertia to convert the material, so is there a need for this (digestive tract).

Any other question.

Q: Mehranez … I am not very experienced in lifting and mechanical things … (2:52). I am interested in the part to help humanity through my passion. So I did experience … I was sitting on floor on cushion … I wanted to give a message for peace .. I made a SF, I connected to 2 people which are special, with me . I made a triangle with us 3 from distance, and this spirit … At some time I felt like I was observing my legs but from a distance … I was sure I am in this space. .. (2:54). over my head there was no roof, limited space grey like .. I am able to do again, I know how I did it. .. not infinite space which is grey space … not the sky .. but space? I think my eye in this space … What is that grey space?
K- I don't understand what you are talking about.
R: Mehranez, you want Mr. Keshe to explain what you saw … (2:56).
Q: I want to say what is that grey space, I was there.
R: So you were there, so how can
Q:
Did I do an act of lifting?
K- I don't know I am not there. A lot of people can do this, you can create fields. This is part of it, You might feel a lift, it depends. It's very much the reactors we built, we created a condition and we'll see the position, and we go to the next steps
Q: .. just I created the condition, but it was so strong in my feeling of love
Another question, I have seen this sky or space … (2:58). so I came back. ..
K- I can't tell you I haven't been there, I don't see what you see.
This is what we say, it depends on experience, how you understand it, and how you can use it. We have a KS who is listening … who .. can lift himself to the ceiling. That's what he does. I think .. he claims, he does this regularly.
Q; I don't want to do it, I didn't mean to do it.
K- It's one of our well known KS he lifts from the bed when he goes to sleep, or whatever. How can he do this. what is the passion about this. how can you be in the bed and not in the bed. … But it depends what you can do , and how you accept it, and how you can utilize it to enjoy it, not to benefit by it necessarily.
Q: I didn't enjoy it …If I knew what that space was. (3:00).

K- It's not a space, it's the state of the energies you use to create that condition, that might give you that space, or visualization of that space.
Q: No it was not visualization it just happened

K- I was explaining this regarding the new generation of the children we'll have, through the birth of soul. These children have the knowledge, capability, ability to do things that human beings, as a physical condition can't do, and it takes parents to learn it.

I was explaining this, .. we put teachings for parents who have become and created children through the interaction of the souls, then the P, where the P follows. Would the children look like us, they are part of us. But the knowledge is beyond us. One of the games they'll play with us is what we call, going invisible. You play hide and seek by physically hiding behind a chair or somewhere, playing with the children. The new generation of the cycle of man, or universal level, they don't play hide and seek by moving. They can create fields, which passes there boundaries they become part of the field of the environment, but they still are in the same place.

I wrote this in one of the patents, read it, now we can explain it in the D of the P. You can go invisible, (3:02). at the point of manifestation, or you can stay invisible till, where you want to manifest yourself.

I was explaining this to some parents, that the new generation of the man created through the soul, we have to ask them to explain to us how you do it. Our children become our teachers, because otherwise it will be a mayhem. This is not a theory anymore, this is the reality which is with us, we have to learn it. We will learn a lot of things from our new generation of children of man.

If you want to do something, or I give him the switch, and get the things from him, he already, he's seeing the emotion of the soul, oh no, I put my hand before you move in my pocket, I keep the penny, you can't take it. This is what we learn, .. to communicate, but we have to teach them, as much more about the behavior of the man, than they teach us about the behavior of the interaction of the soul. These are realities, these are not something which will be in 10 centuries or next thousand years, or when somebody comes to be the end of the world. The children we create through the soul, especially now using the EU and the others, will give us that opportunity, to see more and more working of the soul. They shall not lie, because you can't lie, you can't say I am going to give you something else, and I give you something else, tell something else, because he has already seen the reaction of your soul, mama. Then you think to your soul, to your emotion , (3:04). I love to have that pen off you, because it can endanger you and can cut yourself, and it just gets handed over. You say, how did he know.

We have entered a new phase of creation. This is part of manifestation of Methi, understanding to create the generation that does nothing wrong. So we have to create a generation, which is created out of perfection through the soul, but they still have the terms of P to live too. They'll still cry, run, fall, break their arms, but that is what they learn in the position of their life, what it shall be in the physical D.

What will we see if we follow, we are playing with our child, and he falls down and breaks his leg. Now we run to the hospital. But he has preset structure of the perfection, before you get to the hospital there is no breakage, did you make a mistake. Didn't we

grow the toe that way, .. brain that way? Now is the understanding of the … sciences of the new T.

Understanding the perfection in the D of the Creator. That was the gift of the birth of Mitra. This is what we got to learn, the new cycle, the new understanding. We go in the EU, (3:06). with 20 tumors, we come out with 40 tumors. But I went in there to get rid of it, how come it increased. Because in your emotion you still want to die, so you speed it up, this time. Doesn't matter you paid a million dollar to go into the machine, to get rid of the tumor, but inside I want to die, I want to live with my wife, my lover whatever, but I want to show physically I am doing something about it. Because your emotion is to die, and system satisfies the emotion.

Would you go into the system with an emotion, that I want to elevate my soul, not to die, but to enjoy the presence of the soul of my child, my lover, and then, if that is the true intention, you'll find a solution, your body will fix itself.

This is one of the biggest problems, not only for mankind. The people of the U have the same kind of emotion problems. It's not exclusivity of man, emotion. We have created a universal EU, it's universal. It's for the citizens of the U, not the exclusivity of man. So the knowledge in these systems is for UC thousands of years technically ahead of man, and thousands of years behind technically from man, but not they all have the same. This is the beauty of sharing, giving and how the knowledge should be shared. (3:08).

I hope, .. in the coming weeks, by opening of the spaceship institute, we'll bring many of you into the new institute, to be part of. To research, to bring a new D into elevation of the STM, to understand himself, then making a MaGrav and 2 flying machines, and a jackpot. In the next few weeks we'll make this announcement. Let's see how many of you will rush to be a student, .. to go and bring that change and make it public, do it in public. Because then the knowledge is shared.

KF is on the verge of bringing these things out. There is so much effort is going on in the background with many KS, in many parts of the world, to make this accommodation. KF as us has to teach us, what us have missed from the knowledge of the Creator, not one of us. Educating totality is the responsibility of the total KS. Then as we are taking man not to be below the others, it's the responsibility of KS to make sure no man is below another, in knowledge in the level of life, in the comfort of existence. We are about there.

When we declare, we've become what has been promised, we'll bring everything together, not in bits. (3:10). Everything is here for that change, and the process has started.
Q: Than you for your encouragement
K- I don't encourage you… I show you the things, you have to understand, and understand what you are doing.
Q: Yes it's knowledge …
K- It's just knowledge pure knowledge … Knowledge is love, if you share knowledge you're already in love, because you share your love you don't keep it to yourself.

Q: … I have made a SF with one 4 corner with different triangles. ??? one with 5, then I could get the soul of the group from a distance. I could get into the soul of something related to the group. Is it possible to make 5 or 4 triangles with different people at a distance , and then get the knowledge, the thing of that group. (3:12).
K- We did, you saw the picture there .. of the 129 Tesla unit we did in the Inzano. You see in front of you an orange frame … On this machine is a specific platform, it's one of the first dynamic reactors SF which was made from Cu by Armand. After we finished testing the 129 Tesla we dismantled the structure for another test.

We took this one into a separate room in the building. It was positioned in one corner of the room, and .. we tried not to get anyone to go in to disturb it, and we ran this one … We monitored it clockwise, we put dust on the floor to see how it moves, and it was how much it moves from the ground up and down. Yes this is the unit. No this is another one, no .. (3:14). … This was changed to a different structure of it … This unit in Christmas of 2014 was positioned in this room, and there was another SF in German and Canada.

Collectively we decided to stop one of the engines. We stopped that engine where it was decided by 2 people. You have to understand these MaGravs were running for quite some time. .. for weeks. In that instance we were in communication with Elya Kostova, and me online we decided we stop reactor #2 on right hand side of the system in the Inzano, within seconds the rector came to a halt. It's videoed somewhere. We have the video of it. We restarted it, again on the line Dr. Kostova was in Bulgaria. We decided instead of choosing another reactor we used the same. I asked her to follow it we bring it. For the second time again we stopped reactor #2. (3:16).

We showed through intention, through the work, we can do, connect, we can create that condition. The same is, if the intention is there, you work in the D of Pl Gans's, because these reactors were filled up with Gans's. You can interact and create that condition. So you can interact with anyone, if you set to do it and do it the right way.

In a way, we showed the expansion of the emotion of the man to the D of P. Yes you can, it has been shown. We all have the ability, it's not exclusivity, it's just to understand it.

The new generation of the children of man have that ability. You cross the road, and suddenly a car is coming, and a person is running, they will have the capability to stop the person before the car. They have the ability to inform the emotion of the soul, to retract the body of the man. It will be amazing, when the population of the man understands this process, how much there will be no need for a lot of things. Yes you can, you can tune, you don't need 3 people, 10 reactors, 20 groups, you can, (3:18).

But you have to understand the limitation of. You cannot steal, you cannot interfere, you cannot play with people.
Q: no, no, no. absolutely not that ..

K- No, it's , the only thing, no. The only thing which can happen, is for you to give to elevate their knowledge, their soul, or if you are lacking, and they give for everyone to have it, then you receive part of that knowledge.
Q: Yes, it is for giving.
K- But, as long as it is done. You have to understand, you are not dealing with what I call, all the voodoo and black magic. You are dealing with the science of interaction of the fields. In this understanding we have to understand all possible parameters of it.

It's very simple if you understand, what Rick was showing in the magnets. If you create a condition of a set of magnets in the right way. You can create Potassium (K). If you create that K field, it is in a plasmatic condition, and if you put it near the body of the man, if it is short of Ca (means K) it will take from it. But you have to create the condition of the Pl through Nano T, to be able to have elements free to do so. This is why when we made the Cups and the Belgium's accused us of, "it's nothing but a bunch of magnets,"

When you don't understand the principle of the Pl, the interaction of the fields, man carries a matter state plasmatic fields Ca (K) in the body, (3:20). then of course everything is nothing. This is one of the things we understand. Now you have the possibility to work with Gans's to create condition of fields, but in the new T we have changed that into the STM, now your soul can play the game, can be part of, but cannot steal from. You cannot say, "I give to you to have." I don't want it.

I have a battle with a KS in a very silent way. "I want to die," but on the surface "I want to live," show I am doing everything to live. But have not understood, that there is another way to it. I want to be with the soul of. Allow me to be with the soul of. Then I don't need to kill myself to be. Maybe the soul comes to understand and be part of. This is what we see, .. comes off, .. what sits in the background of the emotions. Working through emotions, when you work through emotions, you decide what fields you release, and you decide what fields you want to accept. It's the prejudices, which we have created for ourselves, which damages us and hold us ??

I said this to a couple of KS .. parents who elevate there souls to create the children of the man, through D of the soul - watch it. (3:22). You are going to have a fun time, because you'll learn from them. You learn new way of communication, .. playing games, .. interacting, .. of looking at life. It takes time to change.

You have to find another child, which has been born through the STM, and then let them, see how they play. Would they laugh, but you wonder they don't talk, is there something wrong with them, are they going mental. They don't need to, they already exchanged the joke in the D of the soul. You see both of them without saying anything, running to the same toy, and one waits for the other one to enjoy, then takes. You won't see crying, "I want it to," because letting the other one enjoy is more important.

We created a new cycle of life on this planet, and it had to be done through the STM. We had to create what we call a new generation, to get rid of the old generation in time, that

it changes, and maybe they understand. Interacting through these kind of things, but understanding it is important.

Q: These kind of things have been in esoteric science of Tibetan and Buddhists and things like that. There has been such things before.
K- Yes, but we never understood the science behind it. Now we understand. We can explain the science, and we can create scientifically a system, that gives us that.

We can create emotion, that anybody goes into a machine, will cry. Through the plasmatic fields, (3:24). we can make systems, that anybody can goes in, comes a happy guy out. You understand. But it's a science, not one man could do. You know you go to someone and he says, oh he puts his puts his hand, on the foot of someone and they walk. That hand, what would your hand do? Because his field is at the strength.

In 1991 a partner of mine, has a famous, he was well known, when he puts his hand on somebody's pain, it helps and gets better. I had a broken ankle, and I walked into the office, he said, come on Mehran sit down, I help to get rid of your pain. Our secretaries and friends said, it works with us, we don't have a pain. He put his hand on my knee and I had more pain then I ever knew. I said, "you came here to help me." Because I wasn't prepared to accept. Or was the intention to help too much. Now we understand, we have T and can do. We have understanding we can do. Now it doesn't need somebody from Tibet. A man from Africa or Brazil or England can do the same. Because it is technical, we understand it and replicate it.

Q: … Sometimes we keep ourselves to the things, if the person doesn't understand they have bad judgments.
K- Haven't I changed. For years I just sit and wait till they understand, 7 billion of them. Learn from me. (3:26).

Q: .. Just one more. this making soul to soul child. There should be a limit of age for women?
K- No, no
Q: Yes, because the physical part takes the soul of the body to make it.
K- No, no. You still stand a chance, maybe a hope. It is to understand that children made by the STM, do not rely on the presence of parents for life, because they know the soul of the parents are with them. In the D of fear of dying, and this is important.

Q: Where does it grow?
K- It still grows. It will be an interesting time coming .. a lot of people need to learn gradually and go ahead.

Q: Azar, .. regarding the magnets Rick presented. If you take everything as a magnet, 7 billion of us, each of us moving in certain ways and directions, .. changing each others directions. Especially the leaders right now. When you look at the leaders, so they have a field, but there are, (3:28). say 100,000 of them, and 7 billion of us. Now we have a U Council, that is connected to the soul of each language. So even one UC has so much

power, because when you move, you change the position of the leaders, for sure can change, for better. For sure, it's just understanding and moving them in the way, that you want to move them. Am I correct in what my thoughts.?
K- What do you mean ?
Q: .. you move 1 magnets ..
K- Yeah, you see, but this is the problem with observing it this way. Observe which other magnets didn't move. Observe, you see this is the P of man looking for things. If you look at one magnet moving, and the other magnets move or don't move. Look at why didn't the others magnets move.
Q: Because the other magnets I come into an empty room say I am angry .. I bring my fields into the room … your kind of field is going to change for sure.

K- Yes, (3:30). because it's an emotion. It's an interaction of the plasmatic fields. Why a mother when picks up a child, which is crying, she cries herself as well with the child? Does she feel the pain of the child, or is it what kind of mother I was, that I couldn't protect my child not to get hurt. How many times as parents, we've been there. We blame ourselves for the condition our children gone through. But what is the other way to look at it. Wasn't there a cycle for them to learn something, and us to learn about ourselves in that emotion?
Q: If we saying that, so it means 7 billon of us, and we have a UC, so in the process of it, we also have our position, what we are learning on this planet individually,
K- Of course.
Q: in collective with the rest of. I am connected with, which they are learning individually, what they supposed to learn, so that UC is actually connected to all the, say Iran has 85 million population, I am connected to 85 million people who are having their own way of living.
K- Plus the duck who understands Farsi, plus the cat, .. bird, and everything else. This is not the exclusivity of man. And then I put you another fact, it's really a fact, what about the soul of the birds which migrate from one continent to another, which of you KS, what I call UC, (3:32). members are responsible for them? They travel from the Russian speaking, into the French speaking somewhere in the Middle east. What happened to them, which language speaking of the creatures of the U speak, that we are responsible for, but it could be the same as French?

Q: .. That's why when see things happen .. of course you have an intention, things happen in a way, although it can be bad, you have to let it happen, because it has to go its course. When it goes through its course, it is completed. So you are free of it, because each thing has to find its way, and its finished. This is beautiful ..
K- Of course it's beautiful.
Q: Now I understand how your behavior. I understand your behavior now.
K- What do you mean?
Q: .. to what things comes your way, like the problems that comes your way. The way you react and handle it, is you allow it to finish its course, you don't stop it.
K- Yes
Q: For example if I am doing something bad, you'll let me finish it, because I am done with it , so you make me go from my agenda which was my intention, but I am good

now, because I become somebody else, that finished that process, that learned from that experience, you allow people to do that. Because when you allow people to do what they came to do, you allow them to experience it ?? and go to the next level.
K- It's you. This is what I keep on saying. .. a lot of people tell me, why don't you do this when you can. Why can't you do this, (3:34). if you have the knowledge. Why can't you create all the gold in the world, that you don't need to ask for KS bla, bla .. What I say is very simple, we are here to experience it, once we experience it, we understand it.

This is the whole purpose of here. "Oh, why can't you do, stop yourself, breaking your arm or falling or whatever." That fall, breaking arm, it brings experience in the physical D, we need to understand how to sort something (out). We have to feel it.

I heard this so many times … people telling me why don't you stop this, or do something else, or whatever, and do you have to experience it? Yes, because it's like point of maturity.

Q: .. The same thing with last year thing, what happened, you already knew it for many years, but you didn't act on it, because you let it go to the time when it completed.
K- What do you mean?
Q: The thing happened with somebody who was in KF was so close to you.
K- We know these things, we have to experience it.
Q: So you let it happen, you let it go to the pain of id, even though you went through the pain of it, but you went through it, because it was just the way you see, it has to happen. Because you didn't want to, because you could have stopped it in the middle, (3:36). when you knew it. But all you did was constantly supporting of that person, you gave them so much love because ..
K- Because you have to, you have to …

The only thing is when it comes to a point that what you give, what you put is not, what I call, accepted. You can forgive a lot, you can close your eyes to a lot, but when people don't understand, and they carry on with the same thing, you leave it, because it means they are not ready to receive.

It's like our children we close our eyes to a lot of things they do wrong, because we love them so much. Then there comes a point, that's it, enough is enough. It's a very human interaction relationship.

Loving someone doesn't mean you have to accept, or there is a limitation to accept. We never stop loving, it doesn't matter who. There is still a level of love and care, doesn't matter, what the reason you fall out with your lover, your wife, children, your neighbor. It's not an end, it's not Italian roulette.

You know in Italy you have a relationship with a neighbor for 10 years, and you have given each other a lot of things and gifts, and things, you know, have a pot I don't need, have my fork I don't need it. When they breakup the relationship, no more, they put all

the pots and pans, knives in a box and leave it outside the door. It's finished, I don't want anything from you.

It's not that way. What happens when you have that pot and you cooked from it for some time, (3:38). and this time you want to cook, you need that pot, you say, "oh, shoot, I should have never given that pot back to him, did I." It happened to us in Italy, I can tell you exactly how they do. It doesn't matter how long we had the relationship with them. What they gave you, whatever. They put, when they really want to finish the relationship, they put everything outside your house, and that's it.

But they got rid of the P presentation, but have they got rid of the emotion of it? That's a different point. What you do is you keep the pots and you prayer for them, you give from your soul to elevate them. One day they knock on your door, "can I have that pot please." Can I have the whole box, because all the memories are in it.

It's not a teenage love affair, where you got the teddy bears, you gave a teddy bear, then when you breakup you open the door ?? ?? and throw the teddy bear over and out. That it is finished.

What about every time you drive down that road you remember that teddy bear going out of the window. How many of us have done these things, it doesn't matter with whom or what in our lives. It's we learn and we progressively learning to give, to be there. It's not you accept, and then it's a point you cannot accept anymore, because it's not learnt. You've been taken for a fool for a long time, doesn't mean you'll stay a fool.

What you referred to, we'll open this book very soon in a very extensive interview. KF has to know, (3:40). exactly what has happened to the KF and doesn't matter it is part of my private life. Very soon in a live interview which is setup, we open the totality of what happened. With no accusation, with direct data, direct information, very soon.

Then you as KS understand how you have to live my path. What it brings you, because if you allow it to carry on, it creates a wrong image of the structure and love and care, and we are there to protect, care and love. It doesn't matter who.

It's important for us to see what effects have been to us, afterwards. What are the changes in our lives, what positive results. Or was it the reason for us to be there, where we are today. That's how it is, that level of whatever, has brought us to be so knowledgeable, so extensively understanding more of what it is, that we share. Be it in our lives, be it in the history of our nations, .. this planet.

We killed and killed and killed, and destroyed and killed, and now we had enough. We matured. It was a little bit short of stopping, and it needed the collective energy of the whole members of this planet, truly, not by building a UN and creating more war. (3:42). But building a UC, and extending the love of the Creator to members of the world leaders and the rest.

This is the process we learned. Now we see how they are tackling it to start a war, but none of them is prepared to fire a gun, because they want to find a solution. We might see a war in Ukraine very soon. But would it be the way we think it will be? Or is it a push, another political way?

What we need is a member of the Russian speaking. A member of the UC from Russian speaking language, and from Ukraine to be part of the UC. If those 2 souls can come to an agreement, the nations and the governments in their whole structure will come to an agreement. It's a very strange position to understand, but it is what it is there too. It's evolution of the knowledge and maturity of man.

Any other question.

Q: Ed .. First I just want to thank you for al you give to us. The way you present the knowledge to us is just such a proof to me of who you are. You always present us the next step, (3:44). in knowledge to expand us, to consider what we never even considered before. But yet at the same time, you can relate to us on the level of humanity. …
My question is .. the transmutation of the energies of our soul into the energies of the STC. I was just wondering .. what are the limitations that hinder that, or the ways to advance that. Is it similar what we go through now with trying to relate our STP to our soul ,where we deal with emotional attachments, or is it just an interaction with more environment as we branch out into the U, or is it both, or what?
K- I don't understand what you mean exactly.
Q: I am just wondering the process of the transmutation of the energies of our soul into that of the Creator? What is it that might hinder that or advance that?
K- Ourselves, understanding the work of the soul, understanding the truth about the creation.

In the process of the teaching, in the past couple of years, I have given you a lot of hints and knowledge how to achieve it. But you always looked at it from the man point of view, not from achieving the STC.

You always looked at it, how can I get my soul out of my P, (3:46). But you never looked at it, how can I go within my soul, that within it I found the Creator. It's the habit of the man, we are always greedy, we think, it comes if I go out, you never look at the fact.

In many teachings I referred to, as you go to the center of the Pl you find the strength of the creation. Nobody understands, you always looked to, what can I do to get to that. Look within, you'll find the love and the Creator. But how clear are you to look within, with yourself and the knowledge and understanding the knowledge.

It's a very simple thing. I explained this before. You can go on top of a skyscraper and jump off to get down faster and destroy yourself, or you can get on an elevator and come down, and enjoy every floor, what's in it, but you know at the end you get to the bottom.

It's understanding ourselves within, not expanding the soul to reach. The more you expand the soul the further you get from the point. As I say, look within and you find it. And what you find is the beauty of the creation and the Creator.

You don't need to release the soul to find it, within the STM can reach that point. But that is the level of understanding, how much we can do it, and understanding the science of why we do it, the reason we do it, and what is the next level.

We are not a cult. We are a scientific organization and with it, if I create a denser, I create a much stronger fields, (3:48). I can travel further distances to further points of the U, faster. Is that distance, a faster, reaches the distance from my soul to the Creator, and to bring it to zero time, that I become part of it. This is the whole purpose of these teachings. But with it we produce some toys for you to play with, MaGrav, flight systems and the rest of it. It an old saying, I always said, "I came to find the Creator, I found the Creator within me," that's the point. If you reach that point you mature to the next one.

Q: So in going from point to point, does our soul have attachments, or is this all in our P?
K- We are connected we are not attached. You saw those magnets, even they come together, they are not attached to each other. The matter state is connected, but the M field sits, is flowing through them. They are line of connection. It doesn't stop where the MaGrav touches another magnet, the field don't stop going through them …
Q: So our experience is all connected, our soul and STP, they each effect one another?
K- Yes, they operate through each other, not effecting.

Shall we call it a day .. (3:50).
I hope we learned a little bit more, we shared a little bit more, try to stay humble then you understand, and you achieve a lot. Thank you When you look at this craft which is as a diver here, remember there is one in the Linz center, which is gaining from the D of the U within. It's putting weight on, It won't get fatter, but maybe become knowledgeable, and then we'll see what we can do with it. .. It won't increase in size, we have to measure the field around it one day.

SUMMARY:

ENGLISH TRANSCRIPTION

(:18).
K- … some with computers, telephones, and some receive the message by soul. In the teachings of past couple of weeks we touched on some technical information, but not on much considered by Knowledge Seekers (KS). In the last week teaching, we touched on application of what we call, 3 sets of reactors in Germany, Canada, and in Italy. How we stopped the reactors, but the most important point, is not stopping a reactor, is not in bringing the structure to a halt, it's not that we transferred or we decided to choose a reactor that it came to a halt.

This most important thing is how did we interfere, how did we create an emotion strength, the line of thought strength, (:20). to become mechanical, to interfere, that system can be stopped. Is the stopping of a system **creating additional force, that is over the limit of the motor, and the motor has no interaction anymore**. It moves into a different level of energy production in the matter state, or moves from matter state. Or is it that we create a field forces, to actually bring a break into it? The first is the right way of thinking, the first is actually what happened.

What does this mean. This means and if we understand it, a breakthrough in the world of science (WOS) and T, a break from the current understanding of what we call, knowledge physics, of what we call M fields. How on the same fields we can add to. How on the same fields we can bring interaction with, how on the same fields we can bring conditions of interaction in the emotions, and the matter state together. In a way, … then the fields of our emotion, was the soul of the intention, and the emotion of intention. The mechanical system was what we call, the physicality (P) of the emotion. This is how in the coming time the space reactors will develop, and are getting developed, will come to control the position and the speed and the direction of flight. (:22).

Stopping a motor was to show, that emotionally through thoughts, we can create physical interaction. You decide to extend the dimension (D) of the soul to the motor, that it becomes part of the intention of the emotion. The big question that should have been asked, why didn't you stop one of the motors in Canada, or why not in one of the systems in Germany? The reality was and as we said, I was present in the room (in Italy). It's the extension of the soul, extension of the understanding and a desire to stop, to bring, to condition, to change. This is what counts.

I did not stop a reactor in Germany, .. in Canada, I stopped the reactor in the room where I was present. Where we were monitoring, which means I managed to extend the D of the whole parameters, I managed to bring into position, a condition that does not go with the totality of what, commonly is known.

In a way, I brought the STM with the extension of the intention, beyond the physical condition of that reactor. A finger, an extension of a toe. What we talk about today,

(:24). in the new space reactor, in the new control without panel, using the .. the new space control systems, is physically shown years ago, it is not a new knowledge. It's just that we did not understand what the knowledge was, now we understand. Intention to an action, what about an action to intention? You're on moon, suddenly a meteorite enters the atmosphere and you want to escape, an action forces emotion and an action forces movement. Because you have created a condition of atmospheric condition, that can do this.

We done the same thing right across the teaching, we have brought the knowledge so refined, so commonly presented, that mankind, KS have missed the totality of the work of the system. What does this do, what can we do? Why when you say we are ready for 6th of June, we are ready already in our developments for delivery of system for flight, because it's has been tested, we are just making the final preparation, .. decisions, the final pieces, that allows things to happen.

The next generation of the .. space systems, most probably will not even have .. physical structure. When we carry a physical structure, (:26). we have to protect it, not from the wind, .. meteorites, .. maybe something hits or comes. We have to protect it from the change of M field strength of the environment they are traveling in, that the field will not dilute their strength, and suddenly you have no cabin. Suddenly, the strength of a field in a given condition matches the seat you are sitting in, and you have no seat to sit in, because now it has become like Gans's. You have the matter in your hand, now it's energy. Now you see the understanding of the T. Now you understand what it means to understand the totality.

All of you as KS for past decades, have produced some many Gans's for you it is there, now it's a Gans. But what does fundamentally this mean? It means you have managed to change the state of matter, in your kitchen, and you produced energy construction from it. You are sitting in a kitchen, as I have seen many ladies are doing now, are producing Gans's in their kitchen of the CO2 or … Covid, Gans Cup 1 and 2. But you see you produce this material, .. greenish material, this greenish material, seconds before was in the matter state, now it's in an energy state. Now you become more advanced in the knowledge of transmutation, than the professors, the scientists at MIT, NASA, Russian Space Agency, and the others. (:28).

Because you have managed to convert, to achieve, what was promised, transmutation of elements. In the space T, that we cannot handle. In the spaceship T we have to handle, because we travel without borders, .. not country borders, we are talking about containment borders. Have you seen a sun to be in a glass container? Have you managed to put a net around the sun, and if you do, can you capture it as a plasma, it will go through any net. This is where the space T of today has positioned man, and this is where the spaceship T has brought man to understand.

How do we interact, .. preempt a change in the condition. I want a Zn plate to still stay Zn, and I still want to have my Zn fields, that I can use it. The knowledge of deep space is not the knowledge of matter state, .. is the knowledge of Pl, it's a knowledge of

movement of M fields, .. of understanding time, position and place does not exist, till the time we create the time, position and space.

The zero time is in the hand of the man. (:30). The zero-time is in the intellect, emotion of the man, then if mankind understand this, he can travel in any position in the depth of the U. Interaction of creation of emotion to physical position. You feel scared you run, because you have converted the emotion to physicality (P). You feel love you hug your lover and convert that emotion to physical touch. We wanted to stop a reactor, we brought it to a halt. Did the motor stand through the physical intention, or did we create so much, we gave so much intention, that ?? frees us, that we saturated the man's M fields, that there was no interaction to rotate physically. Go back to the teachings, long back maybe 8 or 7 years ago, listen to some of the teachings, and you'll hear the same thing, but at that time you didn't understand.

We talk about running nuclear based plasma (Pl) reactors, where after 2,400 to 2,700 rpm, we have no control. Field environmental saturation passes the matter state, and matter state fields being weak, it just gets absorbed into it, and the Pl takes over. (:32).

If you go and listen to come of the videos which we released, you have heard the same, where the Pl takes over, where the Pl supersedes in the strength of the matter state, and like a radar absorbs it, so there is no physical interaction. Listen to some of the teachings, where we tell you that the inner reactor of a system comes to a halt, and going from clockwise, changes to anticlockwise. How did this happen? Because the Pl of the center of the reactor, now becomes the soul, it decides, it has to be a balance with outside. If we could keep further pushing, increasing the Pl condition, and not allowing the rotation, we'll reach a point where the fields of the system will come out of the boundary of the P of the reactor, interacts with the earth's MG field, and creates lifts and motion, both sinking and motion.

This is why in the teaching of last week, we explained, that one of the EU in Linz is gaining weight, which means it is the central Pl field in the system has managed to interact with the fields of the planetary system, with certain strength of it. (:34). We might pick it up from the place today, and it might be 2 ton, or it could be 500 kg. Now it is in a different position, now it's a different environment, now it has to interact with the new environment, but there is one overriding factor, that overriding factor is the same as, the overriding factor stopping the motor on a MaGrav system.

When we stopped the reactor #2 in the Inzano years ago, we could not only react with that motor, we had to satisfy the need of the other 3 in the Star Formation (SF), that the soul of the system allows, that reactor to satisfy our intention. You might want to travel to the moon, you'll find out you will not arrive, does not matter what the intention of the pilot has been, because the place chosen, the time you have to land, there is the possibility of something to happen and it sees you as a danger, or the mixture of the fields in that position does not mix or apply, or interact, or be good for the strength of the Soul the Man (STM). Even the Moon cannot commit a crime. This is the way we'll understand, .. the next step in the space T will come into play.

In the next coming weeks as the, what we call, (:36). the spaceships are moving out of China, and locating around the world, how much, and what would be the possibility of any of these systems, ever colliding in the space with each other in the space. What's the possibility of one of the systems ever crashes , what is the possibility that one of these systems will come into earth ground level, but will not land. There is a possibility of earthquake, .. of whatever, there could be possibility of a train running into it. Then you understand, the game of the whole structure of life changes. It's not that train will hit, the soul of the driver is aware of not to hurt.

When you create the soul of the Earth, from the individual souls of its living things, it's responsible for what it receives, .. what it does. Understanding the next step of what we call, "system control in flight," will be an intriguing game for man of earth for centuries to come. Because man will look how the system is preempting our intention, where the system is protecting you from the wrong intention, not yours, but the environment, physically, conditionally, or anything else, this is why in the teaching of the last time I said, (:38). it's impossible, that since we're using MaGrav T, which in not the MaGrav as you look at it, when are talk, as a MaGrav system as a flight driving, we talk about the soul of the MaGrav system. In a way, interaction of it with its environment will not allow accidents, .. to hit another soul, will changes to ?? dimension (D) to create a position, like when you put a magnet among other magnets and everything moves.

The understanding of adding to the M fields, creating extraction from the M fields in the strength, in .. to harmonize the motion of M fields that while you are carrying the intention, I carry the field, that allows the motor to know we want to stop, we don't want any interaction. In a way, we have learned, we have to learn what we call, M field strength loading. In a way, we load one another, we don't combine them, combining it, is to go anywhere, when you load it you structure it to have a priority over, to have position over, that this is the priority I want.

This is why we choose captains for the flights. In the coming time there will no captains within the cockpits or the flight system (FS), because we will create the soul of the FS within the system, and that soul of the system. (:40). will interact with the decisions of the passengers, and with the decision, what has been given to it, over loaded it, on top of it, to go from London to NY by the people who gave to it, to give that pleasure.

The work of the new space T is the understanding knowledge of Pl, and in the field interaction, and not in the matter interaction. It will take mankind centuries, and for some never, to become what we chameleon, to be able to live in both D, equal. Some of the Knowledge Seekers (KS) will move very fast, some of the KS will find a way to say they understand and are doing it, as we've seen in Romania in the recent time, to cheat. Some of you will come to understand the totality of the structure, .. will walk away from physical state matter, because what you have achieved is much bigger, more beautiful, than the matter state control. In the future of mankind, man will be kind to himself to understand. how kind of man he wants to be, what way and how you want to interact. I

wanted to stop the soul of a motor, you wanted to show your love to your partner, .. to the child you have created, you've been the cause of creation of the soul of. (:42).

Would we talk to our children in the future, or would they by emotion understand our need. Would mankind move in the next step, understanding of interaction of the fields of the emotion, that interaction of the fields of matter state. How much as human race will develop this, how much as what we call our interaction, understanding with our soul allows us to go deeper in the understanding of what we call, the knowledge of creation.

The problem for .. the scientists of the KF in the coming time, is not building the reactors. It's to build reactors, that their soul is correct, that it gets accepted by the other reactors, to operate and interact with. Peaceful reactors, reactors which will fly in the D of the soul of the system, and not the fuel of the system.

Systems which in the coming time, many of you will be baffled by it. You want to see it, but the system doesn't work, because the intention of the soul action, is not correct. Not correct as you see it, not correct in the game of the knowledge to be used.

We shall not see the abuse of T, as we see today, creating viruses with ability to kill, creating conditions to damage others, (:44). Creating a conditions, that can put existence of a soul in danger to hold onto its integrity of ?? fields.

In a way, when we say, when the time comes there shall be no killing, because the structure of the life, the movement of totality works on the D of the soul, and not on D of P. On the D, which we as holders of the intention, will be not able to create mayhem, and then to disguise, and then to cover it, under whatever. We have seen the new structure, we have seen the way this structure works. Creation of Universal Council (UC) and its dedication to peace, dedication to bring unifying position, has shown, and will show again and again its power.

Creation of the peace, success in the 5plus1 talks, which we see, and coincidentally, KF has been asked to enter into negotiations directly, very soon, as the T of the KF is ?? ?? as one of the bargaining chips of the nations amongst each other, as they are all equally have access to each other. The condition of what we brought through the emotion of creating peace, through the interaction of the soul of the UC, has brought, (:46). that condition forward.

As I informed some of our leading KS, which are close to us, we've been requested to return back to negotiations, to bring the knowledge of the KF, the space T, the environment of the nuclear Pl science, as part of the bargaining chip for all the nations, and not exclusivity to Iran. How this will take shape I do not know. How the soul of the UC has brought this condition forward, we understand, but is the mankind, which has to be. When I was asked to be in that position in past few days, I say, I wonder what has been the one of the wishes of the UC members, which matches our wish.

It comes from the aggressive nations, and not from the peaceful nations. It comes in a way, in the knowledge of the spaceship T, becomes part of the bargaining power, of how peaceful we'll become, using the T. As I said to the officials, it will be one of the greatest pleasures.

Not to negotiate for peace, but use the T to create condition of peace. And a lot of the job is done by KS, the soul of the KS, the intention of creation of peace, where the P walks into it. The same in the intention of stopping the motor, where the emotion of the soul interacts with the D of P. (:48).

We are not very remote, from understanding the structure of the Pl. We are not very remote from comprehending the interactions of the plasmas. We are part of the interaction of the plasmas.

I was talking to a KS in past few days about this, and then this morning Rick puts this picture on the screen. I said to him, this is what I wanted to explain. Our KS is a scientist and understanding that, how an atom with 1 additional electron (E) becomes different thing, could not be understood before, but now we can understand. How you add 1 proton (P) and 1 E, you get a different substance. How you add 20 different E and 20 P of the same and a few neutrons, you get different material.

In a way, these are all energy packs. How they position each other, and how they position themselves collectively in respect to the others, creates the mirage of the effect of a Cu into a Zn. In a way, by adding a few much more Pl energy interaction, because the electrons are not even part of the structure, the energy is part of the structure, what they emit, what they give, changes the structure from a Cu to Zn. (:50). from yellow to whatever color we see, grey. Why does the interaction of a few extra elements, creates the reflection of a color, and then manifests itself in a different D.

So you understand why I started this teaching in speaking about the reactor in the Inzano. We don't change anything, we add or take the energy of another E, the energy of another P into the system, but in the D of the STM, in the D of transmutation acceptance of the field. What does this mean? It means we add the field that creates that separation. We add the field that brings that connection, attraction. In a way, we mow have to learn about how the fields of the intention, can be loaded on the others, that creates the condition to satisfy the intention.

This is important, because in the space T of tomorrow, you do not want to land on Mars, where your intention was Moon. You do not want to get lost in the deep depth of the space, where you chose the wrong fields, which were very similar to Moon, but ended you up in another galaxy, another U, because it was a near match to it. (:52). In the D of the STM, we have to understand, the control is with the STM in balance, with the condition of the environment, acceptance of the souls energy and intention, in a way, position and condition. Zero time place, position.

The new vision system, which we gave to KS to test, brought a very few results, which I was looking for. This few results, gave us what I was looking for, the next generation of systems, which brought the extension of the vision, and emotion, and the false information and what we call, intention, to understand how to override this, in the systems for the flight. I don't read every .. testimonial about the vision units, but the ones which are important to me, just out of nowhere popped out, and said this was the information that we need.

We have to understand that mankind, the STM, the intention of the man, the physical emotion of the man, the collection of the emotion of the man, is like a stack of cards, each one is individual, and each one sits in its own position in respect to the other. This pack of cards, each card has its own strength, (:54). its own GM field, it's own losses and gains in respect to the card above and below, and the ones above and the ones below them. So it's a collective work, .. interaction. You just want to change one of the cards from 1 to 2, you don't change the card, you add onto, that the rest stay in their positions, but the new condition is accepted.

The new space ship, the new controlling systems of the spaceships, which you will see in the next few weeks, coming out of the KF, is in principle, interaction of the fields of the STM, with the soul of the system. You come into it with the wrong intention, nothing will happen. You come into it, with the right intention, you get everything from it. Some of you come in and say, nothing happened, and some of you come in and be exhilarated, and do not know how to handle the emotion created in the ones you could create.

The interaction of the systems is not anymore by pushing a button, the interaction is coming with what we said, thinking good, doing good and acting good, and coming to the principle of understanding. The time of what we call, progress in understanding the ?? emotion of the fields, (:56). is not a better iPhone or Samsung, is not a better jumbo jet or whatever, is understanding the interaction of the fields. It's the time of the maturity to understand, the process of the creation, the process of the interaction of the fields in the creation, and the position and reaction of the system.

In one of the points of nuclear Pl T, we have to understand a lot, we have to understand the position, time and space travel. Why does a star enters into an explosion, and what fields are radiated from it, which part of the field radiated from it, is in line with the evolution of the promotion, or strengthening of the soul of the created things in that environment, or us when we enter it? In the world of P, when we enter an explosion we expect to be exploded, and if we get hit we become part of the shrapnel.

In interaction with explosion of the Pl field such a thing doesn't exist. If in position you can receive the right fields, you get elevated from what we supposed to be the demise of man, in the D of P. (:58). In the same position your soul can become part of another structure, because it needs it to elevate it. You become there to serve.

We will not die in the depth of the space from a heart attack, or from the brain hemorrhage, that’s the D of the P of the man on earth. We will survive, we will live

everlasting life, because we understand the interaction of the emotions, we understand the interaction of the fields, .. of the fields of the need, in the time, place, and position. KS need to move away from this .. physical interaction and creation of the fields, they need to move in the D of the understanding of the creation, and interaction of the fields. What field you are creating, for what reason, and what will be the outcome, and is that outcome perfect for everyone involved.

As we desire, we receive, as we think, need, want, that this demand will satisfy the betterment of the others, will become to understand the totality. Will the mankind become part of the structure, of the physical life, of another time and position, is the decision of the STM, (1:00). and not the P of the man.

Those KS who are working on the D of the Pl, are trying to understand the Pl, have to understand … see what you want to see, ask yourself a question, what can I give you that it satisfies your term. Not how much power I can put you, how much tons I can give you, how many positions of the Gans's I can place on you, that you satisfy my need. Understand the soul structure, which is the interaction of the fields of all the coils in the system, with the intention, and then you will see the result of the satisfaction of the emotion. If you are waiting for 100 megawatts, you get 200 megawatts. You don't even know what to do with it. If the understanding and intention is in the field strength, and not in the matter state. Then try to understand more. The KS who work and start understanding the .. promotion and interaction of the fields, in the coming time will have a "field day" when the new knowledge, the new understanding, the new position they have in the knowledge of creation.

Find a way. Access to the knowledge of the U (KOU), (1:02). and understand how you can add to the soul, how you can physically change the D of the interaction. Try to understand the totality, try to understand the totality in the D of the fields interaction, not field interaction in the matter state, but field interaction in the universal environment.

Many of you will have a huge problem to move on, as long as you look in the D of physical interaction. Many of you will have bigger problem, with understanding the work of your own creation, because you have not understood what you have actually created.

Understanding the KOC, means being able to share that knowledge, with your own soul, of the emotion, of the P, then you do not need the brain. As I said, many times, if I put man in a craft, and moving with the massive change in the speed of travel, from A to B, and in that process, create a field condition, (1:04). that is equal to the amino acid (AA) of the brain of the man, I will arrive in the destination, but there will be no brain in the body of the man. Because as a field strength it has dissolved, and it has interacted with a field of it. I get a body with no brain, but still would that man physically move? Would that man be able to interact with its environment? Would the STM in the center of the brain of the man, be there, to work in the new environment, where there is no need for the brain, but interactions through the field strength are accommodated by the STM of P. We don't see any brain between the earth and the sun. But even though, there is a structure of a brain between the earth and the sun in a plasma M field, that is field strength dependent.

Evolution in the world of Pl , is evolution in understanding of the science of the creation, and not the science, which man has created for himself. The science of man is matter state physical condition, and at the lower strength, but man has the key to jump up, become part of totality through his soul, through understanding the center of his creation is within him, within the center of his brain. Then allow it to develop, (1:06). and then understanding as we see the big picture, how to add another energy for it, that the P changes, even though it's still there. You changed the Cu to the Gans, but it is still there in the same containment.

The process of change, or the interaction or reduction to addition to the strength of the field, or what you call, the stacking, or connecting to each other, is part of the understanding of the structure of the physical D of the STM. If you want to understand how the soul reacts. If you want to see how P reacts, start from a different D. Look at your own solar system (SS), look at the structure within the SS, and see how stars are positioned, how are stars are interacting, and then how are the planetary system are interacting. What knowledge do they get from the sun, that they have positioned themselves where they are.

The working of a SS, is the working of the body of the man. We are inside a soul, inside of another soul. We are monitoring, we say, in the way, we watch he is doing, but we never understood. In the new FEU it's the same, but this time we work in the D of the soul of the U, (1:08). that's why it's called the universal flight system. Where in the U we want to be, not where in the SS we want to be. Even though the SS is part of that U.

One of the interesting things with the new generation of the children of the man, which are born through the soul, is how they interact inside, and within each other. Because they are aware of the emotion of their P and soul at the same time. Mankind has to enter the D of understanding his own life, his own existence through the D of the fields of the U, not in the D of his P in the U. Then we see a progressive development, .. in understanding the truth about the creation and the Creator. Otherwise, we are still in the same bent, and the same .. dilemma. Then we have to demise one, to show we are better, and we are different. We destroy our culture of life, in acceptance of the emotion, just trying to say, we are correct and the others are wrong.

You got to understand how we can promote the understanding, (1:10). the comprehension of addition, division, collusion of all the fields of the U. How do they collide, and when they collided how do they collaborate, and what is the outcome of the collision and collaboration? By adding more energy, the strength of the field of an electron or proton will change the manifestation of the visualization and detection, from a Cu to Zn, or Zn to Cu, or from gold to silver, from Mercury to gold.

If you look in the process of the Fukoshima, I showed this very clearly. How by adding one little element we changed mercury to the .. atomic gold, in the Gans state. If you noticed we did not make bars of gold, we created atomic structure, because we added atomic energy, what we call, M field energy to the ?? substance. It's like when I add

atomic field energy to a Cu, to become Zn, that's all we done. This is understanding how to create that connection, understanding how you can bring field forces to be, but your biggest dilemma is, what am I going to do with it, when it is, I cannot bar it to sell it in the market, but it is all as a dust of gold. Because you haven't understood the preferences, the uses of it, in the D of the fields. (1:12).

One of the biggest problems which now we'll face, with the governments, with the KF, is creation and conversion of the matters into the nuclear plasma fields, which allows us to create a rapid division and conversion, the same as B12, B9 and B6 does in the body of the man, to be able to produce conditions of the flight. As I said to one of our directors yesterday, I can make one of the most powerful radiation fields from just a glass of water, from just ordinary water. But at the moment we have to be with what we call, restriction and understanding of governments, such a thing is possible. How can we bring a, what we call, something which has no substance into seconds of creating nuclear plasma, which allows us to be able to divide, to load, to amalgamate fields in a different way, that gives the desired effect.

The new Pl nuclear T, which is the beginning of understanding of the process of division, addition, and coexistence, is the new knowledge, that we start teaching. How you transmute the fields to create an effect. You don't change materials, (1:14). or add materials to get an effect. Mutation, understanding of the fields interaction, becomes much more superior in the knowledge, then alloys creating mixture of matter state, because at the end of it you want to have that effect of.

In the upcoming time in the new structures of the buildings, which will come through the development of this T, as we said before, there won't be any brick, there won't be any concrete. These are manmade matter states. By placing a D of the field strengths you create that barrier of the sound barrier, vision barrier, and every other barrier when you choose to be it. To be transparent but sound proof, to be letting the light through, but certain frequencies, that you create.

You can now do this with the present knowledge you have in the Gans T. But none of you have endeavored to do it, because you are too busy, to do something else, for you to prove that you can produce 100 watts is more important, than understanding you can travel the depth of the space.

(MaGrav video 1:15:37 to 1:54:10

Scientifically there is not much to it. The reality is, man has to understand in the new system, man has to understand the totality of the (1:16). whole process. What did it come to us to understand, is to be able to have the knowledge to transfer, to reduce, to increase M field strength within our knowledge.

How we can change things by intention, by the fields of emotion. What do we feel, how do we feel, and how we can create that condition, to be able to do it, that it creates the illusion of completion, achievement.

How do we accept the truth about us, not being able to understand, the what I call, the reality. Then how do we (1:18). convert this into understanding of totality? How do we go into the depth of the knowledge?

How do we create Gans's, which in the strength of the fields, or near the strength of the fields of the STM. Our body does that in our brain, creates one element, and with different positioning of this element, creates emotion, understanding between the STP and the STM.

We understand how much, and to what extent we can evolve in understanding of the knowledge of the creation, that allows us to come to that point. We were not born as physicians, as scientists, or as a baker, or whatever. We took time, (1:20). we learned, we took time in understanding. Now with the new knowledge of Pl, we are in that process, we have to learn it, we have to understand it, we have to feel it.

I am trying to find a way to open your eyes in a way, your understanding. In a way, how can you get in touch, or how can you work without the interference of the matter state of the brain, between the STP and STM? How do we extend the knowledge of our own understanding, of our own creation.

The only way, the first steps for us to be able to start this process, is try inside us, (1:22). to understand the fields strength, which creates the emotions. And try to see, not physically, but in the strength of the fields, we can replicate or create that emotion again, and how good we become in creating this emotion. Build it up, and develop it, that we can repeat it, and slowly to go from one to another, and understand how we can interact it, and then how we learn to be a giver, and not a taker.

When you start this process always understand in your systems, in your emotions, you have to go one level higher, that you build from the lower, and understand how to handle these interactions. It takes time for many of you to breakthrough that point, (1:24). to breakthrough that time.

The only place you'll find this interaction of the fields, is by use of the MaGrav systems, by understanding the fields they create, how you have made your MaGrav, what is the connection of different strengths of the fields, which the MaGrav produces, and then now, becomes your true generator for elevation of the soul, for interaction of the souls, between you, your STP, and the STM.

It is not to sit on the MaGrav, it's understand how to extend the fields of it, to interact with the right emotion. Very much you'll come to the point, that many of you, for the first time will start understanding the purpose of the MaGrav systems, which we gave you, we taught you. (1:26).

As I said, we gave you the cake you looked for the crumbs. Now maybe it's time for you to find the cake, the beauty of it, to understand it. How would it work, if you position

your MaGrav in certain positions. I've seen from the beginning of creation of MaGravs (MG), you all put your MG vertically. You are interacting the 3 fields, what I have not seen from any of you, is what you have the MG in this position, where your coils are positioned this way (vertically). What happens when you position yourself between these 2 (1st and 2nd coils), and .. between these 2 (2nd and 3rd coils)? The greed of the man to get the maximum to see something, was easy to give.

What happens when you have an animal sitting on the other side of the MG, and you move to his position, and by the soul of giving, "I love you so much," that the animal comes to you without a word. You move to this position and you tell the animal, you put something there, you are in danger, and he moves his position, because of the love you have given from the danger. (1:28).

If you create your MG coils in a different strength, that in a way, you create your Star Formation (SF) with your soul. Now you understand the beauty of the T I gave you. You looked, what comes out of the wire, I gave you what comes out of the U.

The biggest question is, do you need to connect your MG to a power supply, to the earthly matter state power supply? Because then the intention of ?? ours, will become different. What about if you connect to the plasmatic power supply, which carries the emotion of all, then you'll see the breakthrough in what you were looking for. But still the intention has to be correct. The understanding has to be correct. Are you looking for interaction of the souls, or the fields of energies, we call souls, or are you looking for interaction of P of the soul, or are you looking for interaction of the P?

If you look for interaction of the P, (1:30). you might create yourself new materials. This is what the true MG system has been given to you for, from the beginning. This is what has been set for, to understand.

Many of you created what we call, the MG systems, and you put them in .. SF and sometimes you got something. Some of you moved inside it, and said, "oh I feel this or oh I feel that." Now maybe I explain to you exactly what you have done to yourself. This is you as a soul (in middle of SF), forget about the rest of your P, blond, blue, white doesn't matter. But look at how you interacted with different layers, different fields.

If you are in the base, you have a contact in the same, and then what about the one above you? You have to deal with totality. You looked for the fields of what is, the fields are actually between the layers of the coils. You've seen these and you created these, we've seen in the intro (video), (1:32). We see Dr. Klaus and with Caroline Prilla in the machine with those coils, but you never understood the reality of it.

You went for facing the coils, where the field sits in position of the field of the coils. If by accident the height of the chair, the position of the MG system, .. coil, .. of the dynamic system was right with the soul, you got something, but then you can't repeat again, because you never understood the principle behind it. But still many of you will try

this because now I have given you a new game, but you'll not succeed, because you have not understood what is behind this. This is understanding the totality of the knowledge.

If you understood from the beginning, if some of you understood when we taught you about the universal Cups, where the top of the stacker is the soul, do you have anything but 3 coil winding. The systems were set from the beginning to reach, but you have missed it.

But your present coils will not do that, because you have not done it the right way. Now you have to learn how to make your coils. I'm sure many of you, each position, (1:34). every single of your MG systems, and the rest of it, but what have you done, .. created, what did you put in that you can bring that synchronization?

Then you'll understand a big, big factor, the intention of the making, gives you the intention of baking. Now you understand, when I tell you, you took the crumb. You literally took the crumb and you missed the cake. Now you tell me, why couldn't I teach you this 5 - 7 years ago? Because you were not ready. The soul of mankind was not ready to go through that phase. The evolution comes from understanding and intellect, not from copying and replicating.

I promise you a lot of you are just moving in there, I am going to move my SF, I am going to do this, I am going to find my soul, I've got to do this. Go back to one of the very first teachings, then you understand my teachings have had, always fundamental basis set out from the beginning, (1:36). you missed it.

Go back to one of the first teachings. I told you very simply, this is your head, this is your two ears. Get yourself a headphone and find where you hear the music in the soul, and not with the ear. This is how in a very early teachings, I explained this and nobody understood. Now maybe you understand the game (put 2 MG on each side of ear). Checkmate! Now you understand how you went for the crumbs, even if you understood what a cake I have given you.

Now many of you will move very fast, and a large number of KS will join the Universal Community by understanding the process of the soul working. We'll still be building the MG, but in a different way, (1:38). with a different light, with a different understanding. A stereo system was your physical D, MG is set to elevate to the STM.

But I promise you, you still have not got it, because you'll not reach that point, because part of the knowledge is missing, because you did not receive from the beginning. Now you see how the teachings have been set over 10 - 20 years to bring you to understand, little bits by little bits. Buy yourself a stereo system and find where you hear the noise inside you, not from the D of P of your ears. Then use the same MG system, and see if you can transfer the emotion, through the same system at the point of the soul.

I am the Creator. I am the Messenger and the Methi. I teach you where man, to know where to go. But with science, not with hellavlu, not with the false information, with exactly why everything has been put.

When I taught you to make the Cup of Universe, have a look at Cups of U, and understanding which level you want to interact your soul with. And you listened to what I call, enemies of the man to destroy your Cups, because they didn't want you to get this knowledge. They knew they would loose control, and once they loose, (1:40). they cannot abuse your children, they cannot abuse the children of the man. Those who told you to destroy your Cups, are what you in your language call, the true children of the Devil. Those who did not want to see the progress of man. Those who sell their own children into the child abuse. Their own blood. Because in teaching you the reality and how to do it, they could not abuse you. They abused your soul and P for thousands of years. Now you have the freedom. Now you understand.

Go back to Cup of U, the Cup of Man and whatever. What did I give you? 3 coils, is that any different? And how here you are connected to the matter state where we open you to the liquid, near enough to the Pl, that how fast you could reach that point. To understand the emotions, to be able to elevate the man from direction of what we call elevation of the soul.

You have to understand, every teaching we've done, step by step, is according to teaching of the U, according to the knowledge, which is there to promote the STM, .. the knowledge of the man, but for man to understand it, and not to accept it, just because.

New KS have access to all the teachings in the background. Go and find the teaching about the soul, .. about the stereo system, (1:42). when I taught you years ago. That was for you to find the position of the soul. This is how I even explained the position of the soul of Naomi from the MRI which we presented.

To doctors it is nothing, it is just a dot. To us it's that black hole of the life, the existence. The essence of the creation, the position and the existence of the place of the STM. We cannot melt the ice and drink it, if you are using frozen water. You have to understand the knowledge, .. and the true essence of the knowledge in the D of the fields, and not in D of P.

You have to understand, when I told you in past years, I gave you the cake, and you took the crumbs for a few volts. I wonder what you KS will come up with the new understanding. I wonder how of many of you will come with the new totality of the condition, of comprehending the knowledge of creation in the upcoming times.

Those of you who stuck yourself with the Devil, you paid, and you'll pay for it, and you'll soon understand how. The Devil are those who keep man from learning to become free. They ask you to destroy your systems, because systems are the key to your freedom. (1:44). Now you understand why.

The key to understanding how to elevate the STM, which man moves away from the D of P. If you understood, in a very simple way, when we gave you the Cup #1, in the Stacker Unit, we gave you the key, we gave you the opening to the secret of the interaction of the STM, and the elevation of the STM. Why do you need to make a Cup of Soul, when you have no use for it.

I stood in the design center in Linz and our dearest friend, KS, Herbert, made a Stacker Unit, with 3 universal units, with all the 5 sets, with everything precisely done. Some people felt something, and some people didn't feel something, because his stand was too low. If your height managed to reach the level of the soul Cups, you might have felt something, and the others, you just went in and out, you might have felt something, with what we call, D of P.

Our teaching is a progressive teaching that you understand step by step, (1:46). and you spend enough time in the lab to learn. Now it is the time to move on, because it is the time for manifestation of the Methi. It's time for clarification of the Methi to be the soul of you, and your understanding of the creation, and nothing else. We are universal teachers, and we teach through the soul with the voice of the man. Now go and destroy your Cups and we'll see how much you have destroyed the knowledge of understanding the world of creation. Sleep with the Devil, you pay the devilish way.

Try to understand and I ask you please, try to understand what you created. And not just jump into bring and make coils and Cups, try to see and fit in what I feel. Your soul will not allow it, and is aware of the knowledge and what you are doing. Enter these environments with a pure sincerity to serve, and not to be selfish, what I gain from it, and you will see the elevation.

As I wrote to one of our KS yesterday, we are at the crucial point in research and development, and our research needs the soul, of the soul and understanding of the souls of the knowledge, and nothing more and nothing less, but we have to create these conditions, that we can become aware. (1:48).

What we teach you here, you have seen it in the construction of the flight system, we have done nothing else, just we know how to manipulate the fields, how to manipulate the existence of the fields for what purpose? Create the right system, and ask your friends and family to watch you to be in the center of it, and you wish the promise, or the wish that I am going to be able to give all the pleasures of life. And ask them to see if they see, and how they see it, and in what colors they observe, then you understand you have managed to achieve the understanding of the interaction of the STP and the STM.

Try to understand the first part of the teaching of today, the exchange of the matter state observation from Cu to Zn, by addition of just some more plasma fields, nothing else, then you'll understand how you transform from the STP, in interaction to the STM, and nothing else but your MG systems, and understanding the totality of the teaching, of the Cups of Life's, all 5 of them. Study them, just don't copy them. You copied them, you see

nothing, (1:50). study them, you develop new ways to understand the process of the creation.

You have to be clear enough and understand this knowledge in clarity, that you become part of it, and it becomes part of you, then it doesn't become magic, but it becomes the process of understanding. You just need to interact with the fields of your MaGravs. Understand the fields of the MaGrav, and understand the fields of, what is the fields of the souls, and what is the fields of Inertia, where you want to be manifested in the matter state of the manifestation. It's you in the essence of the fields, which creates the fields of Inertia or manifestation. Nobody else. It's you who decides, if you want to manifest yourself as a fish, or as a man or a stone.

I hope today's teaching has brought parts of the teachings of 419 times, in a way, together, for you to be ready for manifestation and declaration of Methi on February 22, and then you'll find out where the man shall go. The man will see where the man will dictate the position and the place, (1:52). of the man to be.

Now you understand, and I repeat again, if you look at it, and I looked at this many times, and I said to myself, shall I tell them, or shall I not tell them. I gave you a beautiful cake, and I even cut it for you, and you went for the box of the cake, which was hollow, just the fields in one direction, where, it had its feet, the earth. Now understand this cake, and you decide how you want to cut it, and what you expect from it. Then understand how much you missed, and how stupidly you destroyed your Cups of Universe, where each one was one stacker, more advanced. (1:54). Each one with his own knowledge, with his own T, depending on what you wanted to elevate.

Understanding the knowledge of M field movement is one of the cornerstones of the future life. In the teachings, as I explained to another KS recently, I gave you this (draws 9 boxes) This one was Book #1, matter state, the conversion of it by light, to Book #3, in the Pl state and matter state. Book #9 is the book of the soul. Book #8 we always said, was the origin of M fields. (1:56). Book #4 is about structure of the Solar System the Pl of, how the energy of a Pl works, you call it a neutron, or solar system. Book #5 is nuclear reactor Pl T, how to make Pl, how to make systems within the physical D to the D of .. P or above. Here (book 7) we come to the D of the STP, and (book 6) transition from one to the other, it depends which system you need.

With the Book 1 to 9, all systems you reach to understand the soul of creation, where here (B 1 to 3) you understood the STM. These books especially #4 are fully written, number 5 is totally done, the 8, I explained will be done in the time, when the times come, the maturity of the man, and part of this teaching was started last week. This (Book 7) is how you manifest yourself in D of P of the soul, because otherwise you can manifest yourself in D of STP and matter state of ?? matter.

But remember one thing as you see on the book 1. (1:58). What is in Micro is in Macro. You have to understand the totality, in all D in the STP, or the STM, or STC and the way

he manifests himself in what D. In what systems he uses (5 & 6) and which direction (from 1 to 9). Now you know why we said and we write 9 books.

The MaGrav systems and the universal systems, stackers units, are one on this side (after 6) and one of the other (5 and below). It's for you to decide. How would the STC manifest itself in the D of the ?? you use this reactors (5&6) or what we call the conditions of the U, and you'll get enlightened, or you'll get the creation of the STM.

Mankind will be busy for centuries to come to understand this simple structure. It has taken us 419 weekly teachings adding up to about maybe 3 - 4,000 hours of teaching, (2:00). to just make you come from here (1 to 3) to here, with a little bit of this (5 - 3).

When you can make a system, where your soul works with the soul of the others, to create effects in D, then we don't need the MaGrav , Stacker systems and any other physical system, which the man needs for his flight and everything else. It only comes out of servitude and nothing else.

Thank you .. I hope .. we open a new D in teaching, that speed of understanding of knowledge in KS and how to work, and how the systems taught to you over years, has been there, you've been too busy with the crumbs. Let's see what ?? we see from you in the time to come, and let's see what we understand from this new disclosure, which has actually been there, you were too busy. go for a break … (2:02).

>>> **PROOFED to here** >>>

>>> BREAK >>> 418 KSW Feb 10 , 2022 (2:07).

Q: (2:08). .. What is the force that moves planets. .. like you were talking about, you have the earth the sun , galaxy and so on. We have different velocities, speeds happening in different systems .. we are rotating at

but the whole SS is traveling 828K kmh, and so on. So everything is spinning around each other and finds its position and so on. But what is it that is the actually creates the spin .. why does everything spin around central positions. What

K- The spin comes, is totally due to balancing of the field forces, to always create a condition of equal GM field, is take as much, and give as much to be, not to be in touch or .. to create that condition, to be independent. So the rotation comes and changes according to place position and time, according to field strength of positioning in respect to the others, (2:10). and what you as a field carry, that dictates that positioning.

In a way, if you look at the radar system, if you don't send a signal out, and you don't get a signal back, you have no radar, the machine sits there. It has to be a dynamic fields, sending to come back, that you know if it is an object, is moving or not.

In the dynamic Pl system, it's the same kind of radar system. Sending continuous fields to find a position in respect to the others, other fields, which then, that dictates a condition of .. normality to be able to hold all the fields together to create that Pl. Then you have a mixture of fields, which have in the strength reduced, which move into the Inertia matter state, then you have a stability of the conversion. You have cocooned the fields within more or less, like the brain of the man, which cocoons the soul, the center of the planet earth with the matter state around it, cocoons that, keeps that constant.

If we take layers off the top of the earth, the speed and position will change, because if we can penetrate into the center we can add to it, or subtract from it, then it leads to a new cycle, a new position for the planet. We see this in many planetary systems.

When a planet gets hit by a meteorite, as long as it can keep its central position, gases, or what we call plasma together, (2:12). it can always reposition itself and recover. If the meteorite penetrates to the center, than it opens the star or a Pl up. We see the same thing in the body of the man, we have central energy points. If you shoot with a bullet to your hand or arm, you don't die, because the central energies are not disintegrated, they are not destroyed. But if you get a bullet at the point of the center of energy, you die. You can shoot at the heart many bullets and you still survive, but if shoot at the point of the center of the energy, the soul of the heart you destroy it, you die. It's the same with the brain, you can shoot as many bullets as you like through a brain, nothing will happen, you'll loose your memory, part of whatever structurally damaged. But if you put a bullet in the STM, in the brain, you disintegrate it, you open a hole in it and it explodes, because we create a condition of rotation, condition to the space, time, place, position, and strength.

If any condition rapidly changes outside our SS in our galaxy, the layers of the shields of the fields of the SS opens up, our SS is gone, it will be extruded and extracted into another position and D. For it to keep that position, where it is, (2:24). it has to have a dynamism to continuously give and take from all positions and the fields, which allows it to be in that position. The rotation is not there, just because it is there to rotate, the rotation comes to be in touch with all the elements, that it can protect its integrity. In a way, it's a radar system for it.

What do you do when you are traveling down the motorway, you keep your eyes on the cars, on everything, that it can keep your motion, you can be moved. In the condition of the planetary system, and Pl system, the fields, that's what their job is to be able to be continuously be observant of what is happening around them, to position themselves, they have to rotate. They create that condition, and then by field forces conditions, they adjust themselves to keep that constantly speed, because they find their balance of the fields, at that constant speed, at that position to be the best.

As the earth moves into the center of the SS our speed will change. We are, the speed we rotate around the sun, and the other planetary system will move. Every time one of the planetary system gets absorbed into the center of the system (sun), all other planetary systems will adjust themselves. When the closest planet gets pulled into the sun, in the coming time, Jupiter and Saturn will change their .. rotation boundary and their fields, to accommodate for this position. (2:16). This is how rotation, it's in a way, of observation and control in respect to the other fields.

In the very near future, I was going to teach this one a couple of weeks ago, but I didn't think KS are there yet, to comprehend, it will be another "talk." Is when you have a system, when the field comes from it, how this field knows to interact with this object, and does the return comes this way, how much of it, where does this go, to what, and how many fields are created and divided to keep this entity (planet) in its position?

This is the secret of rotation, being vigilant and keeping time, place and position in respect to, give and take. I take a little bit more from this, but I give a little bit more to that, but I keep my position. This is, if you look at it, M fields are the arms and the legs of the Pl, and how it decides to keep. I want to run at 10 kmh constantly, so I make sure that no obstacles to stop me from that. (2:18), I make sure everybody knows I am coming, and everybody is happy with me to be there, they cover themselves.

The rotation of the Pl is a radar system for the existence of the Pl. In a way, it's the beacon of its life, that I'm here, I am prepared to give this and that, but I am not moving my position. But in accommodation of that, the others have the same, that's why if you look at our Pl system of the SS, we have the sun.

We don't go, as I said many times, around the sun this way (in a perfect circle). The earth has a peculiar path in its SS, and every time, every position is, in respect let's say, to Saturn or Jupiter, they move their position to accommodate the sun and the earth's M fields, because this says, "guy I am here, and I want to keep my position in respect to the center." I move, you move, but I want to do it, this is how it is on the balance of the fields ?? center.

If any of these bigger size, if we loose by accident 100%, the entity of the Saturn, by massive meteorite or whatever, coming in from the U, or .. our galaxy, be it in the D of the matter or in the Pl state, for sure earth will move. (2:20). For sure earth will move away from the sun, backwards, because these giant planetary systems put a special force field to keep their position, that everything is in position. When you take the cap off, the water flows out of the pump ?? ?? just like a bottled gas.

So when you say ?? ?? they are amalgamation of fields and the way to position, created condition of the position, and to be aware that everything else is constantly monitored to be there, that they can confirm their existence.

You got to remember, you look at the earth and the sun as an object, but they are really an entity. They have emotion, they have feeling, the same as the cell in your body. This is very hard for man to understand.

Any other question. (2:22).

Q: .. In a very previous workshop you told us about the living entities (AA) for us invisible, in the very upper atmosphere. When one dies it is sinking to the soil and we nourish ourselves from this energy, how does it come that we do this? Please can you give more information about these entities, for example, are they part from the beginning of the creation of earth, or are they created as the humans appeared. What is the background of them?
K- They are created out of the interaction of the fields of the earth and the SS. Some through their structural life, … existence, became from the beginning of the time of this planet, because they live in an environment that balanced fields exist and they accommodate them. Some are new, just like all of us, we have children born today, and man who have been here 100 years. It's the same process, but they have not converted into the Inertia field strength of the planet. They are at the strength that they can stay.

It's not the exclusivity of, these kinds of life of this planet only. They exist between the planetary systems too, because we don't have the knowledge of them, (2:24). we don't look for them. But now that we are increasing the knowledge of the fields, and the M fields, we will avoid them.

Will come the time, the way we avoid hitting a city, or a building, because of people living in them, we don't want to kill them, we will avoid these M field zones, because they are living. They are living entities. Life is not the exclusivity of the ground of this planet with man walking on it. As we have life beneath us, in the oceans and in the center of this planet, we have life above us.

It's our own ignorance who has kept us to this, now by wisdom of understanding this structure of the creation it is us, who is responsible for it. To make sure we don't hit a building, killing people, just because we didn't know the building was there. We have to develop T, we have to understand the process of creation, that we see the building. We observe it, not just because it's not there with bricks and mortar.

It's our responsibility to develop our senses, to detect these centers, detect these positions of lives. It's no use saying, it's not my fault, they have to watch, and I didn't know I did. You'll pay for it with the condition of your soul. The crime does not stop, by not doing on this planet to another man, or another animal. The crime does not stop in the whole of the U. You are responsible for what you do and where you go. "I didn't know, (2:26). sorry," doesn't exist, because you attract their fields, and which virus would you like to call them.

How would you like to come out of a car with 200 kmh hitting a concrete block of a building. You think you come out all in one piece. It's the same with D and direction of

the life in the Pl condition above or below the strength of the observation of the man. We are responsible. We become responsible people with our fields, and this is what we realize gradually, slowly mankind will come to realize.

It's not that there are people above us, there are living things above us, the same, the Pl of the O or H was created in the upper atmosphere, and by interaction of, with what we call, Inertia mass of the planet, converts into a mass, to entity we can physically attract. They are there the same, but they are of the field strength, that they can never come in the time of their existence, in contact or in the position of the Inertia, but if they loose their D or loose their Pl field through any condition, then by splitting the Pl, and coming .. in the weaker strength, being absorbed by the Pl of the .. Inertia of the earth, they can even be converted to the O, and you just breath, it could be part of theirs. The water you drank could be part of theirs. Even the CO2, (2:28). that you absorbed could be part of their life, which just disintegrated, and as a smaller Pl, become what it is. Maybe some of the gold's and silver we carry is from that conversion. So it's not the exclusivity, life of man on this planet, is the inclusivity of life all over the U. This is what we have to understand. That is why we need the understanding and observation of the understanding of the soul, position of the fields, not matter state.

Any other question.

Q: .. regarding Creators plan to create paradise on earth. .. Humanity was a puppet in the hands of the impious deities until then, demons, fallen angels, black and red dragons and even the wayward son of Zeus, wrecked havoc on the land, by loosing control of the chariot of fire. The later he was punished with the death ray, due to the clamor of humanity. Will the Creator do the same with these evils of the heavens now? Or has he converted them for good, or has he already taken them out of command by trapping them somewhere in space. Anyway will they no longer interfere with the Creators plans to create paradise on earth?
K- You see, (2:30). what we call the Devil, is what keeps you away from reaching the ultimate goal. So in a way, it's you by accepting the condition and the position, which takes you away from the understanding of your own creation, it's your own devil.

The people who encourage these things to be, is part of their structure. We cannot change. I was sent a beautiful video … a mullah which is supposed to be a priest, a preacher, says the true "eid" the true celebration is the certain "eid" in the Islamic calendar and not the Iranian "eid," which is the beginning of the spring where the cows start eating fresh grass.

I thought, when you want to destroy a nation and a culture, destroy its belief in its beauty. This to me brought, that the end of Islam has come. If the man of robe deny the beauty and respect of the thoughts, and beauty of existence, he has already demised himself. It's a very interesting tape to listen to, where he tries to, this is what they did in the beginning of .. when they brought Islam to Iran, diminish, destroy, and dig into until we get all of them not to believe in being Iranian, or any culture. Japanese done that with the Chinese. The Mongols did it in other cultures. (2:32). It was very interesting to hear this,

and he comes most probably from Arab states, they are not Iranian blood. All the Mullahs in Iran, which destroyed Iranian culture have no Iranian blood.

We have tow of them in the ?? of Iran, they were 2 brothers, they are from Iraq, and they came to sit in power to destroy the culture of Iranian culture, and they allow them. Celebrating any "eid", was a crime, where we came from it. Listening to this, it is us who has to accept, is this guy real? Is this guy here to serve others, then in elevating the soul of totality. We teach .. freely and it's for you to test and try.

We see how what I call, these people camouflaged themselves and reached the center of the KF, and then they think they gathered a few people around them, then they start denying everything about the .. work of the KF. Because they think now they can serve their masters. And we have people who are KS who follow them, because they are of the same essence.

Have we ever taught you to kill, .. destroy, .. in any of the teaching to damage? We have taught nothing but love and expansion of what we call, serving, and then you see the people who tell you to destroy things. We should have kicked on you straight away. Why do they want us to destroy? (2:34). The minute they kicked out, because they are the true, those who listen to them, "the devils."

Those of you who hear and walk away, you understood the purpose and the position. And now today, with the teaching of today, you understand why those teachings past 8 - 10 years, today came part of it together, if you understood it. It's for you to find a way to elevate your understanding, .. of the creation not the physical matter.

Then you ask why? But if you go to the history of these people, they have been like this from the time of birth. As I said many times, even last week, we open the books of these people, and then you understand, how many of you went close, supported them, to be with them, and how many of you are going to loose your children, and your wives, and your husbands. As many of the KF people have seen it, when they see the record of these people.

They are the most active pedophile families and blood in western Europe, active, prison sentences, not talk. Then you understand, they saw a chance to take the KF and KS, and they shared the data of the children and whatever, across, the way we got Alan Sterling, their master. All the opposition to us started when we put Alan Sterling away, because he abused, physically the children of man, and these are of the same. (2:36). The whole family prison sentences. We open this door and you'll see, and then you decide, you really slept with the Devil.

They came to penetrate, to get access, and then to abuse, and we became aware of it. And then they got a kick out of it. We couldn't see it, till, how it changed position, and then these is what you call the evils, devils and the rest of it. Don't listen to me, just go and look at that the data in the newspapers, which will give you the courts and the prison sentences.

You have to understand, it's you who decides to sleep with the Devil. It's you who walked away from understanding of the creation. I warned many of the KS, especially in Brazil who work around these people, and in Holland and in Belgium, and Germany, be careful with your wives and your children. Just be careful with your children. I lost my son to them, I hope you don't loose yours, then you understand what the Devil is.

Trying to cover the life, they tried to destroy the others, that you don't see what they are, But it was very clear to us. What we say, the devils work together, (2:38). and the good men of God work together, and we see them working together, they came to destroy the KF, and together, because they all ?? help each other.

We will open this very soon for you to understand, and this the test for you, not for us. We gave nothing but love and care, it's you who have to understand it.

Any other question.

Q: Jalal … it makes me happy to listen to you all the time. … Regarding what you asked about the teachings of the stereo it is in the private teaching 2015, November 10th, AM session starts from 2 hours and 30 minutes. And regarding your first teaching, it's also in the private teaching, it's, (2:40). 2015 May 12 AM session.
K- The one in the .. Trani.
Q: I need to understand one thing. We speak always about giving energy and taking energy. Can you please draw a balancer. You know like when we put banana on one side, and piece of iron on the other side to make a balancer. Now if this is one entity, a Pl entity on the left side. in this entity we know we have a G and M field, and the MG positioning of this entity. Is it always due to what I take from eh right side and give to the left side, for example? What I take from the right side to give to the left side. That means taking energy from one side to add it to other side?

K- You are intermediary. You don't take. You are just a tool of how much you can add to what you take, that they stay in their position. This is what we never understood about the rotation of M fields. (2:42). They said, where does the field changes from M to G? If you remember, go back in the historical books, where they always discussion was, where are the M fields and where are the G fields. In fact as we said, it's the same field, it depends on the point of observer. When you are in-between a system, in a way you satisfy both, how much of this you want, and how much of this I can give you, for both to be in the right position. That's all it is.

It's actually being mediator between our children, and we got to be correct. We have 2 of our children sitting on the table, and they both want the same piece of meat, what do we do? Okay, let's cut it, that you both are happy, and you both have and can carry on with your existence.

It's the same position, but his time it is done in the D of the fields interaction, what we call the soul. A plasma with response is called a soul, nothing else. A plasma with emotion is a soul, because it feels it.

If you are a stone in a river you feel, the water above you, you feel the man steps on you. This is why in the writings it says, even a stone has a soul. Our collective soul is there to accommodate the balance between all, because us, ourselves are accommodated by the others to be in balance. That's all it is. (2:44).

Q: Now I know exactly how much I can give, I receive from the others, or I can give to myself to take?
K- No, if you put a measure to it, you already lost. When you say I know how much, that how much, I can give and take, you already put a measure on it. Next time when your child does something wrong, instead of shouting at him, go and give him a kiss. .. it can be done a different way. Next time he does something right, shout at him and see how he reacts. It's us who makes that decision.
Q: Do to the need?
K- Ego's satisfaction.
Q: It's always there is ego satisfaction
K- Ego satisfaction
Q: Confirmation of existence, it's always there.
K- Yes, but confirmation of existence to what it feel I like to be. It's very interesting when you sit at a table, and a person talks to you with anger, and turns around to other people at the table, very normal.
Q: mysteries and the light .
K- You can love both the same. It comes to the judgment, especially when it comes to your children. When you have 1 child, is everything is put it. When it comes to 2 children you have to decide, (2:46). even though you give unconditionally, when it comes to them in respect to each other, sometimes you have to come in, and do you know who looses all the time? In most of the families it's the first child, and the majority of families it's the second child, and then you start seeing the abusive behavior, and all attention seeking and the rest of it. We cannot compare how we are until, we have two to compare with. Otherwise it is all one way. Otherwise you know when we have 1 child everything gets in there, he is god, he is everything he wants. When you have a second child. You have to give enough that both feel the same, so you are continuously juggling in-between. Then it comes your own judgment, did I do right for this one, and wrong to the other one? If you get a path that you do right to both, the same, then you'll understand. If you can be always correct and balanced in every judgment, then you understand.

Q; Are we there yet?
K- We are, partially we are getting there, as we mature, yes. We've come very far, we have matured, in so many ways, I explained to you. We look at the bigger structure, then you, look at the smaller structure. I look at the political structure, balances of the place and time, and place now, and the smaller one. What was fashionable to create war and kill as much as you can, to make the best tools to kill as many, now has come to stop creating and killing each other.

We have seen today, what is happening in Europe. Everybody, every president, every man in the politics is running around, (2:48). into Ukraine and Russia, to stop these 2 countries, might, enter into taking over each other, not a war, because it's not a war. It's the most imbalanced way to go. Russia decides to go to Ukraine, it's overnight gone. But we want to keep things, but we are not prepared to give others. They are bringing all might of the military against each other but they don't want to get into the war. Because they learned it don't bring, it won't do. Unless something happens, as happened with the .. in America the last slaughter of the .. red Indians. Somebody, nobody knows how, shot a bullet and the whole hell broke loose, but nobody knew who was, because it wasn't supposed to happen.

We are maturing to understand killing and the war is not the solution, of mass killing of each other. Local wars, little guys trying to say who is the boss, very soon, in the next 2 - 3 years will finish, because the top guys will not allow it, and secondly people because people ?? down the road will say, that you cannot go with it.

Then it comes how to deal with each other? How do we break barriers of being correct with each other? We stop killing each other. Now we stop fighting with each others nations, we stop fighting with each other as individuals, and we stop killing animals, because we find other solutions to it.

It's very interesting, the vegetarians, now we found protein from the atmosphere, which does not kill an animal, we still can have your burger. The question mark is, have we miniaturized the soul from the cow to a cell, (2:50). or we haven't understood that yet? We are happy we are not killing a cow, we become vegetarian, now we become those who can use protein from atmosphere. Once you become a protein from the atmosphere you still have a soul, but you still want to kill that one, because we miniaturized it, it's acceptable to us. Like vegetarians who can eat a thousand seeds in a pot, they are a thousand souls, but we don't want to kill an animal, which is one. To me never been comprehensible.

But this is the life, we are maturing, and with elevation of the soul, we have been making T available, that man can take energy without killing, the way like the EU are, and the rest, then man will mature into understanding and ?? become a peaceful man.

You got to understand if you work through the Pl T, understanding it, now the KF Pl as interaction of the dynamic fields in the U. If you are cold, you'll be moved to fields in position, or fields will be given, that you'll feel warm. If you are hungry, it's the same. So what are you fighting for? To be given everything freely, is that a problem? We are afraid to be given everything freely, free resources from the U, not committing, the elevation of our souls by killing.

You got to understand, we got to be taught the understanding of the operation of the Pl, then we don't look at souls, we don't look at anything else, we understand the process of the creation. (2:52). Because as I said very recently every cell of the man has a soul, and

the collective soul of every cell in interaction and work, creates the STM in the center, that everybody is correct, every finger is in the right place.

The same way the collection of the STM, from living entities at the strength of the G field of this planet, makes the soul of this planet, and it has to be correct with all of them. There was a imbalance, now we are balancing through new understanding and technologies. But the soul of this planet, is part of the structure of the soul of another cell in another body.

Which local center of it, this is the liver of it, is our solar system (SS), but this liver itself has a soul, which is part of the soul of the galaxy, and the same with the U. We are inherently part of each other in the D of the Pl, in D of fields, which created us. If we understand this, then you can go one step higher to understand the next one. This is what the elevation of the soul means, understanding the world of creation and nothing else. The true world of creation, not Darwin way.
Any other question

Q: So our presence here due to the ?? , (2:54). which we accepted as humans to transfer form one point to another point, we need to adding to what we accepted, or changing what we already accepted?
K- Depends on what position we want to take. I asked this question very recently, and I put it to you. I know the answer, but I want to put it to KS. In the new born babies before they understand or talk, or whatever, we see them in their sleep, .. during their waking time, they smile, they get frightened, they cry. In their sleep we see them change their eyes, face, whatever, which shows they are dreaming, we call it, but there is one fundamental question to ask. When you grow up you dream of a man or woman being your grandfather, or friend of your father, or mother whatever, and you tell your father or mother, you know there was an uncle like this who died, and you never seen, but you see them, you visualize them in your dream, or as part of your sleep.

The question to ask is, what do these children, in the womb of the mother dream of? Are they still dreaming of the uncle, (2:56). ?? and getting frightened by them, or are they creating their own dream, which has no D, they have no experience of? If we carry RNA and DNA to our children, are we carrying all the information of, .. our emotional experiences of the emotional interactions of our souls to our children too, that they are dreaming of the uncle, and playing with the cousins, which they know when they come they'll play with.

What is our understanding, what is the reality? Do we carry the physical, and part of this memory of the RNA to our children, or will they carry on dreaming what we dream, but in essence they understand through the transfer of the DNA, or RNA. Then we understand how man is, because we just came to understand about the hard disk, and software, and now we have to extend to understand the totality of the hardware and software, how they work, not the way we thought.

Then maybe it answers your question, is our RNA DNA limited to our physical transfer of the information and beauty, and manifestation, or do we carry and do we give all our memories of grandfathers, and great grandfathers to them too. If you listen to the teaching in the past, I think you already know the answer. If I find one of you that has been present at the time of crucifixion of Christ, who saw it, through the eye of your ancestor you carry that knowledge. (2:58). You'll tell us how and the way it's done.

I go back, give you an example of, you can go and check it if you can get to it. In 1970s and 80s .. for those of you, who are new, there was a program on one of the London radio stations … they brought a guy who could hypnotize, and the guy who he hypnotized said, about, he was a sailor in such a place and everybody thought it was a joke. ?? the city couldn't test, somebody because they could get in touch with live online. He said, if you were a sailor, he was a man of navy, he said, we do not know how to fire these canons, it's still a mystery to us. How did you used to fire canons in that time, because then we'd know if it was a joke or not. The guy explained how the canon was fired to the .. They went to the national history museum in London … and they pulled one of these canons out and they tested it, and it worked.

That time, and there are many other cases like this. We understand that these people are connected to the man who actually used the canon. It doesn't come by soul. It's part of that RNA we carry, so it's possible, that this guy when he was a baby in the womb of the mother had a dream about the great grandfather, somewhere, that actually fired that canon and explained how it works.

So in coming time, whatever, (3:00) some of you KS especially Palestinian side, especially from Jerusalem or whatever, who have been there generation after generation will tell us what happened to Christ, and through him, because one of you will touch that point. Some of you will tell us the atrocities, which Moses committed, because you were next to him. Your ancestors had the knowledge, and it has come down through RNA and DNA.

We just don't carry the color of the eye of our parents and grandparents, we carry the whole kapuddle from the time of inception of the man. Now you can understand how deep the STM and RNA of the man records everything. We have a beautiful saying in Farsi … don't look at how tiny the pepper is, break it and see how hot it is, how much energy it carries. It's us which is the center of the soul of the cell, that creates that, carries that, all emotion.

Q: … ?? the one of the number of the one. It's exactly that hot pepper when you cut it in 4 pieces gives you more energy than 1. (3:02).
K- ??? will come
Any other question.

Q; Mark, Dutchman …. this is the first time attend your very interesting teaching, understanding how planet Pl works with other planets to keep itself in check. My

question is, can you explain which effect emotions have on these fields … fields of emotions. .
K- Repeat .. you mean emotion on what?
R: The planet Pl works with other plasmas to keep itself in check, there is this positioning . How can the fields of the emotions effect those planets?
K- It's a collective emotion, when it comes to the planetary system, it's a collective soul, collective decision of the fields of the created, be it the planet, .. animals, .. trees, .. souls which converted to the matter state, stones, whatever.

Inertia is not just the Inertia state, it's part of the structure of the soul of this planet. (3:04). It dictates its position, .. its composition, .. its manifestation, it's beauty, where to be the hill, where to be the mortar, .. grass that it comes beautiful to the eye of the man, where to be whatever. So when you come to the collective positions of the souls, than collective souls of the planet this time.

This is one of the problems with this planet, it did not provide, at the time of its creation, and its position, it could not provide a constant supply of fields to its citizens, to what it gave life to, at on the level of its surface, its Inertia surface level. We do not see the structures in the upper atmosphere or in the U, eating each other. They always find position, look at the videos from NASA, NASA released 2 or 3 videos very odd, which shows clearly the life of these entities (AA in upper atmosphere). We have spoken about it … many times.

The whole thing has gone wrong when it comes to the matter state, semi-matter state, which is the Pl state, which is the body .. what we call, half matter, half Pl, that has created these D of pain and suffering. What would happen when we satisfy this .. change, to satisfy this lack of the fields, and would our planet move in a slightly different position in the SS. Would our planet change seasons.

We are talking about the global warming, which means most of us, (3:06). move away from the extreme cold and move to the extreme hot, or at the end we become a balanced position, but can we use the benefits of what we call, global warming by converting the gases into Gans's as an energy, and feed it back to the planet, because it will go through, we've seen it, when we put 1 patch on one side of the body, and put a weaker one on the other side we transfer the pain out, we transfer cancer, and tumors out and the rest of it.

Would we as a human race position reactors, position CO2 centers, that we absorb the CO2, we convert it into energy and feed it to, we just dump it into the ground, dump it into ocean. We do double CO2 units on the Northern Hemisphere, than on the S hemisphere, that we create a flow, that the center in this planet will receive enough of to create the fields, that the man will not feel hungry, .. not eat again, not kill again. This is possible. We have started this experiment.

KF of Iran has submitted the first plan, for the first CO2 .. comprehensive capture of the CO2, and its position of energy, to the mayor of Tehran last week. We will go through with this, we'll extract thousands of tons. The same proposal in the next few weeks will

be submitted to the Beijing mayor. The same thing we have to do in the Southern hemisphere, in Brazil, in Nigeria, (3:08). to create these flows, that the fields of the same, to cross the center of the earth ?? .

Can we do that, can we use what is the menace to humanity, to the benefit of the humanity, to extend the energy fields within the center of the planet, that it creates energies, that we stop eating, we stop going for feel of hunger, because this is what is missing, in the structure of this planet.

The planet through its structure has not managed to create fields, that its inhabitants can sustain life without killing. We have seen it through KS in China, especially, it can be done, they stop eating. We have to understand, to what is .. the biggest problem, global warming to us, can it be used to enhance the soul, the energy of the soul of the planet, that all of us don't need to eat anymore. It is possible, we showed it is possible, it just has to be scaled up.

KF is on verge of doing such a thing .. we are on the verge of a major breakthrough. I thank Yosef and the KF Iran for submission of the CO2 capture plan for Tehran city, starting in the next few weeks. Then we show it in Los Angles, Beijing, London. But how much of it can we convert and what transfer of fields we get? Would it bring a new attitude, behavior in man?

You don't want to kill anymore, you go to vegetarian, you kill more souls of the seeds, (3:10). as they create the next cycle of life, and call yourselves vegetarian. What about the KF is setting out to put centers across everywhere, that you can walk through these centers and you receive all the energy you need.

This is what we are doing in the FEU, in the FEU you don't need to eat, we just got to increase the numbers. We are not theoretical, we are actually building the production of these systems, increasing, we are employing more and more people in KF in the manufacturing side to meet the demand. Then teach the other organization companies to do. We have to understand, not our own need, but the need of the planet that it serves its citizens. That comes not by dogma, but by understanding the real science of the Pl, .. of the creation. We are at that point.

Any other question.

Q: .. I have been in the aerospace industry for about 30 years, I am an electronics engineer, (3:12). and now ..
K- Would you like to join us in Linz in our space T
Q: Thank you this is so interesting. I have been doing something else for the past couple of years. I am in health and I have learned how to touch or contact the soul of a person or the higher self, and then I can ask any question, and I get an answer. This way what we do, we are selling supplements and I have been to many trade shows and I have been testing thousands of people on their vitamin and mineral deficiencies. I can pinpoint their status. I have also tested organs on emotional, on the Mind body soul, levels. I have 8

levels I test and I can see the stress on an organ, and mostly it's mental and emotional stress which over the years comes down onto the physical level. Sometimes there are energy and spiritual stress which comes from reincarnations. This has fascinated me so much that I said, well, and I can de-block things, stress, energies, and I find out the reasons for this stress, it is mostly in the childhood, and the problems with their parents and family members. Now what I am doing since the Corona, I am setting up a webinar program for consciousness. (3:14). I am trying to teach people to change themselves. I understood life at 64 finally, my whole life I read a lot of books, and I am also feeling my soul. Sometimes I have these amazing love vibrations coming out to help people who need this. I am switching from ego to soul, this is a process. .. This is what I am trying to teach people to follow the same road.

Now as I understand your One Cup One Life system helps this process, which makes me very happy, because this is the only way to transform this planet, on an individual basis.

So my question is , understanding now what you told me about the planets, who interact with each other, we as human beings are doing exactly the same thing, on lets say our soul level. Be it negative or positive emotions or I say life depleting or giving emotions. That's what I am trying to teach people to be aware of what their emotions are.
SO if this is the case for the planets, it's also the case, that's my question, for each human being, and the human beings among each other. Is that right or not right? (3:16).

K- In a way you have reached the point of understanding, part of it.
Q; Yes
K- But there is more to it.
Q: Yes, I see that.
K- The creation is a complex structure, and it's not what happened in the past when you were speaking to the majority of the people about the soul, they have certain mindset, because the priest said that, the church said, mosque said, whatever. But when you come to understand scientifically what the soul is, then you can work your way around it, to understand its attributes, and how you can access it, how you can use it, because it uses you.

Because this is the way most of the people have what I call a blockage. They read a book and they talk about psychosomatic diseases, but when you speak about the psycho to be part of the emotion, interaction of the P and the soul, then it cannot be, because it is not in the book.

So in a way, what happens in micro, it happens in macro. We as a race decided we had enough of war. What we call Universal Council over years ago when it was setup, decided we want to see an end to the war in line of nation. If you look at the KF UC it's on the line of language. It doesn't matter if you are a Dutch and live in Germany, or a Dutch in South Africa, you still have the same right, in understanding it. It's us who created that border. It's us who has, (3:18). created that border according to our intelligence, and what we have been taught, and what we can accept.

So what is acceptable, what is applicable to the STM, is applicable to the soul of the planet. It's us who have to understand what it is, how it is, and the way it is. You are not far wrong in understanding the operation of the soul. You do not need to be a KS to do, has been done for centuries, but understanding how to apply it for the benefit of the others, not just for myself. That's where the difference is.

Q: Yes I understand that. (interrupts) Because what I see is, when I see when I can give these amazing emotions to others, to help them I feel elevated, tremendously elevated.

K- Go to the front page of the KF, you read one thing, that says, belief in our work, we are here to serve and not to be served. There is always pleasure in serving, because you can give, you see the elevation in the others. Doesn't matter you are a waiter, you put a beautiful food in front of someone and you see they enjoy it. Could be a child you give love to, you see the way they thank you with their eyes without the word, or you serve a man on the street with pain of foot.
Q: .. This is amazing ..
K- The limitations are all understanding and nothing else. Maybe it comes out of being a Dutch you understand much easier. KF is a Stichting Dutch organization so we have that in common. (3:20).

Thank you. Anyway if you are a man in the space T in electronics, we need quite a few, as the T is developing, join us or talk to our team. We are looking for experts in the knowledge, we start recruiting and we need this, urgently, as we reach the next steps, even the electronic doesn't work much, but the knowledge how to do the others will help us a lot. Maybe we need electronics and the soul, and you fit perfect into the work of the KF space T.
Q: Okay I will write you a little letter
K- Write to info@kesehfoundation .. .

What's the other question.

Q: Kay, .. the depths of enlightenment is becoming so far reaching for someone like us, or like me. But we keep at it. I have a question regarding 1 element you referred to which has access to our soul, which is in our brain, .. if that element was, if we had control of that element is it Fe or Phosphorus? (3:22).

K- I think you got to go back into the teaching I am sure Jalal can help you to find which teachings. Some KS … thought it was Iodine, then we had other KS who thought it was something else. But the essence of the STM is a composite of the all the elements of the creation. Those who are know to man on this planet, and beyond.

We are universal creatures we cannot have only composition of the matter or gaseous state of this planet. Even in our amino acid (AA) are fields from the galaxy and the U, embedded in it. We just see the .. earthly elements in it, because that's all the extent of our knowledge.

In the future when man's knowledge extends, then we'll see other elements within the AA, which are the energy fields of the U, which allows this cell to be created at this point and position in the U. We are not individual cells in the body of the U, we are connected to all the cells in the U.

I am sure if I teach you something today, a lot of you will do stupid things with it, but one day when you become more maturity I'll teach you. You can observe and see energy fields, which are part of the AA of body the man, and without it, the AA cannot exist. These fields are not in essence, from planetary system. Some come from our SS, (3:24). which allows the manifestation, and some come from the galaxy and U. It's very easy to identify, but the knowledge has not been gathered enough for us, to open that door yet. Maybe in next 2 - 3 - 5 years I open this door.

We are not composite elements of AA, that our soul would only be composition of the AA combination of different salts or whatever, that creates the STM. We have other elements, which have lead to the creation of the SS, which dictate its position and strength, which at the same time interacts, and is part of our life, the same with the galaxy and the U. But as we extend our knowledge, we see then.

We are not earth AA. We are universal AA, because we bring other fields of the U with us, if we increase some of them, maybe we'll some of them as viruses, then we'll call them a new virus, but in a way it's universal energy connected to our creation.

Q: .. you are emphasizing if we know about that particular element and if we were to enhance that element ..
K- It's not an element, it's elements. It is, and fields, energy fields, which have not converted to the GM field of this planet to a matter state. But they are part of our DNA, part of our RNA, .. AA. When we become knowledgeable to the Knowledge of the U, we will see those elements. You'll say, oh its been with us, all of us, part of us, all the time. (3:26). Lack of the knowledge is the cause of the problem. Once we become knowledgeable, that we are a universal entity, not a planetary entity, because the planet is connected to the U and galaxies, and the rest, and it's controlling on the bottom up, in a way, inner to out of the Pl. We'll see the position in time.

Q: .. you announced a week ago in 418 KSW, yourself 3 times as the Methi, the Messiah, and made clear, that everyone is his or her own Messiah, as well as we all are, by way of our soul directly connected to the Creator. But I did not see yet this, as breaking news. Do we have to wait until the 22nd of February, or how can we, the UC, Earth Council, Core Group, and we as KS be of service to the present religious leaders to proclaim this news to their followers?
K- We don't proclaim to be a news, we work through the soul, elevation of the souls. As I said very recently, in the past few days, out of nowhere I was requested to join, back onto the 5plus1, we left after the 15 of December, after we interfered with negotiations directly, which brought the new change. (3:28). That's they see it, has to be it as part of the negotiations.

This is what we call the influence of the soul of us, as people who are the creator of peace. In Methi, we are all Methi. Methi is not to be helping the others, is elevating the soul of ourselves, to become a source for the help to others. When we understand this, we are steps ahead. The governments and religious leaders when they become wise to it, they are elevated to understand the functions of their souls and their P, and they will see the message.

The job of us is to be that Carbon, which creates that connection, through the UC to be there, Earth Council or the Core Team. We have built a structure through the STM and not through the individual man. We are the gel, the only gel, that gels everything together. When we say we are Methi, it's very clear, because I know Yosef had this background in Iranian religious groups. If, that we are a Methi of our own soul. If I can be, .. gifted, .. honored to extend my gift to the whole of humanity as a soul, then I have served as a servant to Methi, which means for all of our souls to be elevated, to understand the beauty of the Creator, and end of all the rigmaroles man has carried through his time and position.

Does not need CNN, we have already reached the soul of the leaders, a long time ago. (3:30). Go back to Trani (Italy), Putin, we appointed people from the KF to work with Putin, and he sent the peace treaty to Duma (Russian Parliament), because we ?? Obama signed the peace treaty as an individual, he never signed it on behalf of his nation. Soon the American leaders will sign the peace treaty, as part of the nations committed to peace. I have a very good idea when it happens, because we are on the process of working that. In the negotiations in transfer of T of the space T, that we rapidly brought into it, the condition is the nations of 5plus1 have to sign themselves into the peace treaty. They have to, there is no choice. They have to commit their nations to peace. Maybe that's why we are called to go in now.

The negotiations with Iran .. we moved step forward, as we showed what the problem was before. Now it's the time of the knowledge to come. Released some 29 billion dollars of Iranian assets held by Trump. These assets are mainly private assets of the Iranian leaders, was not for the nation. Trump froze the total assets of the Ayatollah K of Iran outside Iran, which runs into billions, and the others. They negotiated to free their assets, not the assets of the nation.

Now we are going into the phase of releasing the assets of the nation. In that process, (3:32). we go to the next step of sharing knowledge, T in exchange for peace amongst the 5plus1, and with it is the responsibility of giving.

We are giving the knowledge away, we are not bargaining, you give us, we give you. We are giving the knowledge in totality. We are showing the 5plus1 how to make 100% nuclear purified plutonium, uranium within seconds from very little. That the nuclear negotiations becomes a space negotiation, in the long run, in the background will take place. We have received a green light from the American administration.

How we implement it in the next few months, is how much we can cut into the greed of the Iranian leadership. Literally this is our biggest problem. Every proposal Iran put on the table was rejected from the beginning, till we showed the other way, and then, a new way has reached, and now we see 29 billion reduction in what we call, sanctions, which is totally private assets of the Iranian leaders who was blocked, and it was a few national companies.

Now we have to go into the next step, T in exchange for peace, and commitment of the world nations to use of the Pl T for peace, in exchange for science. This is what president Biden has shouted from the beginning of his election, new T, need for bringing new T.

You cannot take KF new T into America, because it is Iranian, this is one of the biggest problems we have. But, when the KF is there to share with all, we all benefit by it. We'll see how it comes out. But in essence we are Methi by our action, (3:34). to create condition of peace, and we have the knowledge and T, and know-how, and now the place for it to do it.

So when we call, we are Methi, KF is collectively all of us who has brought it to this condition. I didn't walk in the desert on my own and claim something to the cats and dogs. We collectively as the soul of Methi have achieved this. By sharing knowledge, by spreading the word of peace , and giving from our soul, to create that elevation of the soul of humanity, that there is no war anymore. A few scrimmages, which is only a few village people trying to earn some money. But you've seen it, they are pushing it, every effort to start a war, everybody fighting to not have anymore war, because you can't even do it.

You got to remember, as I explained to one of the American military people, when an American soldier shoots any soldier around the present time, would he stand to see him die, or once he shot him, he is there to help him to live. What happens if the soldier or the victim has Corona? Haven't they shared the truth of the life with each other. Would one give life for the other, but the same time gives his own life. There is no meaning to wars anymore. This is what, when we call ourselves Methi, is unifying the STM to reach that point of break, of no war and working to create a condition of peace, a condition of, not plenty, but having when you need it, but not creating a position.

In the past few days we hear of massive problem in ?? Eritrea, (3:36). again what we saw in ?? Belfa, conditions coming in. Last time we lost quarter of million people with hunger. If we had a chance, and we were allowed by now to develop the T we have, within minutes of arriving we could create the domes, where the people don't need to eat, but they have enough to absorb the energy from the environment to survive.

All this losses of life, the pain comes from their. Why are we behind. Why are we kept away from media by the owner of the, a king who has got a pedophilia file bigger than the nation, with his son, with his citizens. We saw one of his citizens in KF, which has got more record of pedophilia than any family in the world, which was not disclosed to KF. Now we know we have.

So what was the purpose of this delay in sharing knowledge, that today with the knowledge we have, the KS from China could fly into Africa and deliver the T, with peanuts, and save thousands of people from hunger, people on literally dying from lack of food. We have so much T with the Gans T, we can just spray, we can just provide water with all the energy in it. A drop or 2 drops a day give enough for a man not to die. I always said, we just happen to have a Dutch gentleman with us. The beauty of the KF and the beauty we have is, because we are a Dutch structure. Freedom to be able to share. (3:38). Mentality of the nation allowed the KF to be where it is. We thank the Dutch citizens and the government. They could have blocked us years ago, but they allowed us to move, .. to grow, and we see the beauty of what we can share.

So when you say we are Methi, as a soul, we as KS we are there to serve and that's the purpose of it. We are a collective soul, and not individual soul. When you serve you become Methi. When you create a condition of delivering the knowledge that the others can survive, it does not matter the time place, anywhere in the U.

Any other question.

Q: Thomas, .. regarding the present situation of the Covid, we …
K- Do not take me there please, because we don't want our teachings to be banned. Don't take us into Covid, because we already know where we are, we see breaking up. Now most of the European nations have removed the lockdown, and everything else. In Austria we are free on Saturday to go out and shopping. (3:40). I think gradually the whole world is coming to its senses, but we learned a lot.
Q: I don't want to bring you there, but I hope we can at a later date to talk about it because there are enormous question marks , …
K- We have to wait until this thing goes away, as now we can talk about it afterwards. At the moment … the restriction put by governments in different shapes or forms, has introduced to a new kind of energy, called a virus, and it forces us to look at the viruses in a new way. KF for past 10 years has put a new understanding to viruses, what they are and how they operate, because we have to handle it in the space. Sooner or later I am sure scientists will come up with different names and ways, but collectively we'll come to it, that forces us to understand about the operation of energy packs, what we cal viruses.

It's no use fighting one track government sets, that you have to do it. We see they tell you, you have to have all the vaccinations, 1st, 2nd, 3rd, 4th, but you still have to the tests, because all the people who are vaccinated are infected, so what's the purpose of vaccination? You understand? (3:42).

We had it with the Canadian PM, with the Austrian Chancellor, we had it with other world leaders. Austrian Chancellor had 4 injections and the booster, and he ended up getting the Corona. So what's the purpose of it. This is something in the near future, when all the bribery and everything with it is sorted, whatever, then as a race we look at it, and what we learned from it and what it will bring us.

We keep away from this discussion clearly, because I know they are sitting and watching us too, then come out and .. The KF has released a Covid 2020 June ?? (report) to western governments, they have it, we know they are in possession of it. We know we are not the only organization in possession of the knowledge. If you understand the work of the plants ?? and how plants can be used in the right way as a Gans, you'll find a solution. It's not magic, it's just at the moment we are putting our things in the hand of people who want bigger bank accounts.
Q: It's not about me personally … when we can go into details of the Covid injections …
K- .. You see we use injections for different viruses, we vaccinate our children from the first second month of their birth .. right across western Europe. And most of them work. We have stopped a lot of problems, (3:44). future problems for our children and our generations.

But we have to understand more, and that's a problem. We have stopped, we drew a line, we don't want to go anymore further, but we have to extend our knowledge to understand more, then we don't have the problems of today, and we can't be abused. But today with the political solution we have to .. carry on teaching and using the T, and in the future combination of the KF scientist and other scientists around the world, in different form or shape we'll find new solutions to viruses. We are not, it would be arrogant of us to say, we have found the solution, we are the only one. We are part of the collective knowledge, and I am sure with other scientists, we'll find a better way to handle the viruses as energies, and maybe in the coming time we'll learn more about things around the world then at the moment. But politically we have to stay out of it till, I have got the KF in enough political hot water, this is the last one I want to get you into, you'll burn this time. So I have been burned enough.
Q: .. the virus is not the topic, it's the people ..
K- What we accept is the topic. To what extent we allow people to tell us what the ?? .. Thank you .. (3:46).

I hope I opened a new channel as I promised you, past few weeks, we start teaching a new way, a new side of the T, which was not disclosed. For KS I hope not now to put the MaGrav sideways and put the universal systems in here and there. Understand the T, don't copy the T, because then we have not added anything, and understand how to evolve it. How to change things, to mature it, and share it, in a way none of us will loose. The only way we loose is when we don't share the knowledge freely with each other.

R: … please the information of private teachings …

K- We will announce, we are waiting for decisions of establishment of KFSSI. Bring your researches to KF.
In next two weeks we'll go into this ..
(3:48). .. physical research centers ..
We will create a condition of open space research centers. …

It's not research like in present universities where everyone closes door and no one knows what you research ..
.. we won't become billionaires with it anymore. The ethos of the KF open door ..

..

(3:50).

(3:52).
.. some of you will be paid by the KF .. but have to take it back to your nations to share it ..

420th Knowledge Seekers Workshop; February 17, 2022

(Transcription done ; proofing ; Key Phrases, Key words Quick Index)

Emotions like between matter state transformation liquid to gas ..

ENGLISH TRANSCRIPTION

Proofing started
(:26).

K- … It's is coincidental and happening much more often then before. Just before we start the session, Rick says, there is an intro I would like to play. I told him, yes, this part of the teaching of today even. We add to this knowledge, we have to understand more and more of this knowledge, We have to understand, why what we have in the present physics, was accepted, but we never understood, the reason for it. What happens in the totality of the knowledge in matter and plasma (Pl), (:28). and how we interact in the matter State, (S) and .. in the Pl state. What is the next step in the world of science (WOS), you have to understand, form now on, we have to, we have no choice, we are responsible for our own existence, to be able to understand the 4th state.

This is the time of Mitra, which means for the first we see the soul, .. the P, and we can interact and interchange the energy fields from one to the other. This is the time of the creation, .. understanding the process of creation. Why up to now in the matter state we said, we can mix these kind of materials together, but we cannot do that. Why can we mix

water or liquid parts, some of them together, and still some stay separate. Why can we make alloys of some matter states, but not of the others? But does this apply in the D of the Pl state of the same entity?

Go back to book 3, 2 or 1, read in certain parts, we explained fully. There is a picture of Gans's different colors, sitting on top of each other, where we say, Gans' don't mix. How many times you created Gans's in your system and you see the green in one place and white in the other, different shades of white together. Because the same as in the world of matter state, Gans's plasmas, have the same interference, they have the same separation, .. interaction with each other. Now we can explain scientifically, (:30). and we can create a condition, that shows the size of the new Pl, is correct in both matter S, and the Pl state (S), because the matter S itself is another plasma state, but in a different condition of field forces.

In the world of matter S we have learned, we change the pressure, .. the temperature. We start with the water in the matter S, or we can start with the ice as .. a solid S. Heat it up, you get a liquid, heat it up you get a boiling steam, we heat it up beyond the steam we can get separation.

What happens? How do we heat up in Pl S. How do we create a condition of separation of the fields of the Pl? There is no heating. We have confirmed that in many researches, and many developments in the reactors. In the condition of the matter S, we change atmospheric pressure and temperature to achieve, to change the manifestation of the physicality (P). What do we do in the Pl state? We can't heat up, nothing happens.

In a Pl S we change the strength of the M field of the environment, this leads to interaction of more fields, or less fields of the plasma with its environment and it creates, and directionally indicates, which way it is going, is it loosing or gaining energy from its environment. One color up in green is gaining, (:32). one color down in yellow, it's loosing. One color up in green, it means, "I am a lover," it means I want to give. I see the soul in that green color, I rejoice, because I can take something from it. It can elevate me. I don't see the brown, do I have to give enough, my job is, my responsibility is to elevate to my color, at least all elevate, it to become a green, that it can give to the others.

We change the environment by addition of fields. In matter S we change the condition by heating, by pressure. Would it come to the point, that if we change the M field of the environment of the matter S, we'll see the change in the matter S of the body of the man, or in the water, of course we will, but we never understood this. This is the job of the STM, .. the central position strength field force, of the existence.

You have a problem with your son, you change the beautiful Gans's, which gave life to it, to the solid S more, to create the cancer. The state is the same. How come a soul decides to go to the strength, that to become a stone, it still has a feeling, but it cocoons itself with it.

In the world of .. Astrophysics, or Cosmology, (:34). or anything to do with space travel in the U, what happens if you enter an environment, that you feel, for the soul to survive, it means to be in a given S. It doesn't matter how long it takes, you become a stone, you become a rock, you change the field of it, but you are still inside, aware of the environment, of what's happening, but staying in the rock is good for me, I can survive till I find a solution. Or it's another position and just there, or I want to become a shape of the entity at the point of manifestation field strength.

Then you understand, it's us through the emotion field strength, that we can change the strength of the Pl. This is why emotion is so important, and this is why, maybe for the first time understand, this is why I put so much emphasis on emotion. Emotion is that additional heating, .. additional field strength that the STM, in conjunction with the soul of the position. It's eyes manifests itself to this ?? step, or to come closer. When you take earth and move it back to Saturn and Jupiter position, you get gaseous. Move it, change the field strength and move it forward, you get more solid with less, or no gases.

Isn't this what happened to the life of the man. At a young age when we are born everything is ?? free, and ?? interacted, as we add emotion to it, we create cancer, .. sadness, .. love, (:36). .. children of it.

So we understand the strength, the change, what is to be manifested in the D of the P of the life of the man, is the strength of the emotion, M fields of the emotion. Which adds to the soul, and the soul of the position in time and space, changes what was created out of love, becomes a point of death and creation of cancer. The breast which feeds the child, becomes the breast, which creates the cancer, through the emotion, that leads to the death of the mother.

Now you understand why from the beginning we continuously emphasized on emotion. Emotion is that temperature, .. pressure, which changes interaction of the field of the Pl, and mankind have never understood. We call it psychosomatic, but somaticism come out of the psycho, out of the emotion, psychological pressures and strengths. When we look at the brain of the man, and look at the structures of the different strength, of the different points, then we understand how even the emotion is created. Then we understand we have parallel, we change the temperature, we increase it, we melt the ice, we melt the gold, we increase the love, the emotion of giving, we become givers, open up.

It's no difference, we have chosen the same emotional effect to 2 different strength of the field of the environment, because the heat itself, is a M field interaction. (:38). Then we understand, this is why I continuously, in past teaching, try to explain the soul, the matter S, the soul, the matter S, that one day the KS become wise.

We chose in the past the same word for the same thing in different positions and application. We done the same in the WOC, world of matter S, world of creation of the soul. If I take love from you, you die, you become cold, you can't move, because the love is not there (anymore). But I felt the love, now I don't receive the love (anymore), I want to die, I want to go inside and not exist, become a stone.

I lower the temperature, I get ice. I heat up the temperature, I get liquid and vapor to be spread among the whole environment. this is where the WOS becomes important for us in the plasma T.

I reach at the point and destination in the space, that I want to taste, I want to feel, I want the emotion of the environment. I create a Pl, that the soul converts in the D of some of its strength into the matter S, in the position and time, in a given distance and position, that the soul can keep its integrity. (The soul creates) the tip of the finger, or the tip of the tail of a whale, distance from his soul (to be able to feel its environment.)

This is what mankind has to understand, he is in possession of that heating and the pressure, called, emotion. (:40). We have chosen the same words, M and G, heating and pressure, increasing or reducing the temperature. In essence it's the same. We create expansion, we create D of openness within the structure, and then if we understand this, then we understand why electrons have been created, how some electrons interact with each other. .. please find covalent bond.

Why do we call it in the world of chemistry covalent bond. What does it mean? Isn't it a point where the fields of the electrons can share and be together. We have chosen love, as a covalent, where we can stay together. We can fall in love, in the size and D of the life of the man, we call it falling in love, emotion of interaction. Now it's the time to understand how we can bring the STM, to become matter S, and how the STP of the man can become the STM and in interaction, and become what we call the covalent, which is the P of the man, in interaction with the STM and STP of the man. We coexist, and with it, will lead to the creation of the man. Will lead to manifestation of the new understanding of life.

Now we understand if 1 electron (E), from 1 atom, (:42). shares its energy with another E, in another atom. It doesn't matter how many other E are in there, and these two want to be together, the atoms come together, but they have to have the same strength, .. the same structure of field strength. In fact, the covalent bond, is the relationship between the M fields of 2 E, or 4 E, and the rest have to accept. In all structures you always find this, there are some lovers.

This is what mankind has to understand, because at a point in space you want to become physical, you want to show yourself. You create a wrong strength of the emotion, you leave the door open for the whole U that, "now I am free, take what you like." and the demise of the soul. If you understand the control of the emotion. I want to be, but in respect to the fields of this environment. I want to see how my soul in the D of P will show on the surface of the moon, or in the atmosphere of the planet Zeus.

This is what we have to learn, we have to understand, that allows us to become the man of U. This allows us to be able to transmute between the manifestation of the P, and the manifestation of the fields you call, Pl, doesn't matter what strength that Pl has, at one point or another, in another strength field, will be manifesting itself, will be showing

itself. Then what do we call it? Then by changing the temperature , (:44). in the room, we see that mist we created in the pot from the ice, becomes the water drops on the window, with the change of the temperature on the environment.

Where on the environment on the cooking pot, given strength, given temperature, given certain pressures, the water boils, the matter becomes steam, and in the environment and then in that environment is a different condition, we change temperature and pressure, we convert it back into the steam on the window, we give it the D of manifestation.

The life of the man will be the same. The STM is that environment of the room, and in interaction with the fields of the what we call, it's environment, outside it, creates its physical manifestation. The strength of the fields, .. which interact, dictate the position and condition of manifestation of the … Pl, in respect to its environment.

(Fields can change Pl of cell to manifest as viruses)
In a given environment, and given condition, a field, when it interacts with a matter S, will create its own position and condition, what we call, like viruses. Do they take the same cell and change the strength of the fields of the Pl energy, and bring them together, you see sometimes they interact, you see sometimes they don't, because they don't have the common denominator field, even though they respect each others position, but once they interact at a given field strength, you get that what you call, virus.

(How they create different viruses)
What happens if I tweak, (:46). with the strength of the Pl, before I introduce it to its Pl condition in the Gans S, what we call, the AA, it becomes hepatitis, it becomes AIDS, tweak it a little bit and it becomes Corona, tweak it a little bit and it becomes every other virus we want to call it. We change the fields strength and interaction with what we call the matter state condition of environment, then you decide the manifestation of how these two show themselves, maybe as a crown, maybe as a different shape or format.

In a way, there is no difference between the knowledge of creation, it's man who has not understood this. It's man through lack of understanding of the world of interaction the fields of the U, has not managed to understand its position. But if I can create an environment, that in this environment, has and wants to find a new position, then I can propel, that this Pl into any direction in the U, be it to the boundary of the body of the man, to make the shape of the man, be it the boundary of the galaxy or Unicose.

Once we understand this, we understand the new transportation and transmutation (T&T) of the elements at the same time. This is where I put you in the Vertical EU, I change you into Pl energy, I take you across to another D, I create the field of it, you come as a fish, and in another (position) you'll be a dog, in another you'll be a man from the planet Zeus. In fact the center is the same soul, but in respect to the condition of its environment, (:48). has manifested itself in interaction of the emotion of the fields of itself, in the environment, to the thing with the soul would like to be, to find its balance.

(Reincarnation)

Do we have reincarnation of the soul, or do we have reincarnation of the man. Or maybe reincarnation is the wrong word to use, it's understanding the field position and time, in respect to evaluation, and the manifestation of the soul. Do I reincarnate you from one machine to another, or do I carry the soul, and then the P reincarnates, according to the position for that machine.

I can put a machine on planet Zeus and a machine on earth, I create the fields of the STM, becomes one in the STP, within it. I take you to the planet Zeus, and I put you in the same machine with the field strength of the environment that's there. The soul will come to exist in the new, and the P of the entity will have 20 arms, a head the size of the a mouse, and the arms the size of the planet, because that's what dictates to keep the balance of P, STP and the STM together.

Now imagine your next door neighbor turns up the same, he says, "hi Jack, how did you end up here, I know the soul, but you look a bit funny, you got 50 legs this time, but you are shorter than mine, I have 80 legs, 10 meters longer than you. What happened? Maybe my soul was a better giver." and here now I show myself in that D.

Wouldn't that be the same when the STM manifests itself in the presence of the Soul of the Creator (STC). What shall your soul manifest itself, (:50). in the D, in the presence of the STC? Soul of a giver, soul of a man, soul of a criminal, which is, you don't give and you want to take, there is no room for it, until you learn that the giving, is the beginning of the position of taking.

Now you understand how the world of creation has no Pl, has no matter S, has no emotion, has no nothing, till you decide, in what proportion, in strength of the field of the U, you would like to interact with, or .. share with. Next time when you put the pot on the fire and you heat it up, call it love. When you take the entity and you put it in the freezer call it G, taking. Now we understand the WOS is the same, depending on the condition and strength of the environment, and the interaction of the fields in that environment.

Now the world of Chemistry looking at plasmatic field strength of the electrons and protons, not as E in the matter S, has totally different meaning, creates a new horizon in the world of the material development. Do I create the soul of the Carbon and with it I get a C, which is beneficial to the society where it is, and I don't create a CO2, which you call it, environmental global warming, which damages, and even that C has a soul to serve. Then what would be the strength of the STM? (:52).

What would the STM be able to do, to all the souls on this planet, if it elevates itself to the strength of the STC, and its love of Mitra. Mitra is amongst us, and is within us, it's grown to be part of us, as it is the mother of creation of all of us. Now we have in P, when we can praise the beauty of the creation of Mitra. What are we going to do when we realize the strength of the D of the understanding of the creation.

Mankind has reached a point to walk away from making so many names for the same process. Now has to find a name in the D of the emotion of, to understand how you

change a love to death, creating a child through the love of the body, to using the same body to create cancer, to bring the demise to P. Is it psychosomatic, change of temperature, or the change of pressure? Is that the M or G. Has it been the understanding of, what we call the pressure, G; and M, for the "give me," for the love.

Now we understand, you have a gravity and you have a magnetic field, you have a temperature and a pressure. How would you convert the emotion of one to the other, (:54). that it carries in essence, the emotion of totality. This is what I said to you, the teaching has changed, and will change, because now you have to understand the parallel, the understanding of the fields of the Pl in the matter state, and what is what, and how you can interfere, and how you interact. The teaching of creation is the teaching to understand the interaction of the fields, which lead to that creation. There is nothing else in the world of creation (WOC) except interaction of what, in the world of cooking you want rice, here you want potato. In the WOC you want Pl, you want free fields to be able to decide how to interact, they become the rice or the potato.

This is the part, which I many times explained, vegetarians say, I don't eat meat, I don't kill an animal. Have you forgotten, every grain of the rice has a soul, have you forgotten, that you have fooled yourself by ?? deferring and fooling yourself, in what the strength fields you do want to take. This is what we call, what we see, this is what we understand, this is what we interact with. This is where the WOC, takes a new dimension (D) and meaning. This is where the world of reincarnation, where the world of science, where the world of Pl, .. of interaction of the fields creates for us, to understand new D, new understanding, new processes, new look in the whole world in understanding of the creation. (:56).

Then, would you like me to increase the emotion of love, or would like me to increase the temperature of the room? Would I melt you with my love, or would you melt in the temperature, in the D of physicality (P)? I can melt you with giving and loving, and the environment can melt you with temperature to burn, to liquefy. Doesn't this happen when the Soul of the Man (STM), leaves the Soul of the Physicality (STP) in the coffin, that we become that liquid again. We change the state due to conversion of the fields of our own, and nothing else. Now we understand, we need to understand, as we change the STM to the matter state of the physicality of the environment.

Then what is the next level of understanding? Why do we have to understand this, because if we don't understand this, do not become man of U, do not become the travelers of the U, because, if you get it wrong and don't understand the strength of the field of the emotion, than you'll be trapped in the liquefaction of the matter state of your emotion, and that will be, not much good because the soul will be free, in the so many ways. (:58).

Or can I create the condition, that I can crawl back in the matter state to be within me, that the soul becomes the carrier. What in a hidden way, the Inter-Atomic Fusion paper proclaims and confirms. The soul, the P of the man, is all interaction of the fields of the environment in respect to the Pl, which has created the environment, and in respect to the

matter S fields, of the fields themselves, that lead toe the creation of the that ?? part (pot?).

In a way of understanding, I made man in the image of Myself. In that respect, if that is what man is made in the image of, our own creator, is conditional to the strength field of His environment, and the love and the D He needs to create life, in the D of the soul.

Does this mean, that now we understand much easier the WOS, now this means that we understand in a much better way, that everything being in, even the matter S, electron condition, is interaction of the fields and nothing else. If the 2 do not interact due to the different field strength of the same E, in combination of the totality of the fields ?? soul of matter, you cannot mix it, (1:00). But if you know the process, than you can create what you want. In Farsi we have a beautiful saying, … If you wait I can make from sour grapes, the sweetest, sweets, that I know, but I need time, I need to understand the change, the position, and the strength of the field. Then it becomes sweet, and then it becomes to what it can interact. This is what we need to understand, time, position, field strength, and whatever you call temperature or pressure, but in essence they are all are manifestation of the interaction of the fields of the U in different strength. Once we understand this we can become soul, in the heart of a stone in the matter S, as it is in the holy writings, even a stone has a soul. So would the STM, be a stone in the body of the man, as sometimes man becomes so cold, that the stone is much warmer than the existence of the man.

How much do we understand this, and how much we can change the field strength to manifest the soul in the D of the P. Then can we understand this, and can we be able to bring the condition of existence, (1:02). into the D of the soul and visa versa.

Proofed to HERE >>>

I hope you understood well enough what and where the T is going. I hope now we understand where we sit with the new knowledge, and have no fear to move from the D of the soul to manifestation of P. Where the totality of the fields of the Inertia, what we call the STP, has to interact with the soul to be able to give it the manifestation of presentation and observation. In a way, the STP is the Inertia of the field of matter S or conditions of existence for the soul. But connected and controlled by the soul in respect to position and distance, the way it was said the E ?? lives from the center of neutron, to find its own D and position in trajectory of its fields to become the finger or toe of the man, or become the cell of the heart. Understanding this the WOC becomes much simpler, this becomes .. a message between the STM and STP of the man, and .. the emotion , what you call emotion, it comes the prophet, the one between the two, that they understand each other, (1:04). the one which communicates between the two and both give for the other to exist.

Now we understand how the position and time, fields strength, and environmental field strength (FS), lead to the creation and the position of one or the other. Mankind is ready

for that change. The race of the man is ready to understand the final ?? pot, .. is ready to accept the knowledge of creation. Not by force, or by the books, but by the emotion of understanding of the feeding of the creation, as there are no books and no words in the creation of the Unicose.

Many of you, .. are waiting for next Tuesday, 22nd of February, to see what would happen, would he manifest himself in the D of the Creation or would he become the declaration of the understanding of what we call, Methi. Methi is within you, it's you who decides the understanding, and no one else. It's you who becomes part of, and becomes to understand the totality of the whole creation. How many understand, how do we go to understand. How do we find the comprehension of the totality? (1:06). Don't need to be a professor, brick layer, or a child in the womb of the mother, you can understand the whole lot in 1 second. We can all be enlightened in matter of zero time in the place and space, but have you understood the process of the creation, that is your freedom when you understand the process. This is what you call, the "day of Judgment" We understand how to convert the STM in D of the STP of the environment to create that man irrespective of the time place and position, call him black, white, Martian, call him to come from planet Zeus.

What are we looking for as the day when the Methi comes, when in fact, the Methi is within us, and we are part of his existence. Maybe .. as KS maybe we understand and see more. What happens to us, what will happen to our emotion when we understand that it is us who kept, the truth away from us, by lack of understanding the and not understanding the reality, (1:08). that all D of the field strengths of the U are the same. We have chosen the wrong, or different names for the same process. I melt the ice, I melt your heart with my love, is that temperature the same or is it the strength of the field of different times and position in space.

Why do we become emotionless, and feeling-less in respect to one who we loved so much, once. Have you become that heat which has become that pressure. Has it become that love which has become hate, ?? The same word, the same emotion, for the same condition of environment? Then we'll see, and become the man of space, what to fall in love, at what temperature and pressure, and what strength of the field of the emotion. Then at the point of manifestation we decide to be the stone, the man, the bird, or the water. It has become so natural, that we never understood the totality of the creation.

When you say, I love you, does it mean truly I love you, that I give you so much that you show your beauty, by falling in love with me, you show me your love. Isn't that the true understanding of the WOC Isn't that what we have been looking for, for all that time? (1:10). Someone to fall in love with, that we can create from the manifestation of interaction of the field of the emotion of love, the children of the creation. Then ?? what , then we appreciate the totality of the creation. Then we understand that everyone of us is the Methi of his own soul. ?? it is one soul, to feel that force in the D of the strength of the field of the emotion of the man in the D of love for his Creator, and every other soul changes. That can be instantaneous of ?? one understands the true meaning of love. The

true meaning of unconditional love is comes from Mitra in ?? D of the soul and P. ?? ?? unlimited access to ?? totality of the whole existence, in all D, position and time.

Are in ?? with your lover, or have you decided that the strength of fields in one position can allow the mixing, and I want the change. I want ?? not to be in love, or in interaction with the other. We define love, I define field strength in the D of the environment we call temperature, pressure and heat, in the D of the P of the man we call it, hate and love, possession or giving, generosity or animosity. In what strength, to what extent, (1:12). mankind will be able to share the totality, .. be ready to bring that change. To what strength would mankind be ready to understand the essence of the creation? Maybe today's teaching brings you to understand where the transmission, transmutation, and transportation of the fields, in the matter state, ??/ condition of the Pl, and the STM will be. I made man in the image of Myself. Is man the image of the STM, or is it in essence the image of the Soul of the Creator (STC)? Where man is the creator of ?? love, himself by himself.

Then does it mean when you look at the man who wears the face of joy, laughter, generosity, is the reflection of his soul. And when you see the man so mean, and so destructive, is the reflection of the soul wanting to gain, without giving. Then when you se a man, you see the STM, but a ?? feature. Go back … I know the man by walking in front of him, what man I have, because his feature shows the feature of his soul, cannot deny, cannot lie.

The love of creation, creates the Creator, not the Creator, creates out of His love, (1:14). the creation. Maybe we have understood the whole process of creation, back to front, the wrong way, or maybe you have to understand one leads to the other, and the other leads to the one. Now you understand why the teaching has to go this way, because you have to become aware of the existence and how you manifest yourself, before ??? put in what I call, enhancement units (EU) travel you from one position to another. I am coming from China, but I don't like to look Chinese. When I receive, or arrive in London or NY, I want to be blond and blue eyes that no one knows I am a Chinese origin, but I still when in NY go to a Chinese restaurant and enjoy, because within me I carry the ?/ essence and pride and joy of being one. Would we become the chameleon of our emotions, or does our soul loose the chameleon of emotion to manifest us in the D of P. Does an animal change his color due to the emotion of existence, and not by the chemicals. I learn to be the shape of my environment and color of my environment, that way I can ?? appease the soul to ?? stay alive. would the mankind do that if you walk in a community of totally strangers, the only odd one out, you stand out, but you are one of them, you are part of it, you are not noticed, no matter the way you put it ?? (1:16).

Then you understand why we created the Universal Council (UC), that works through the soul and not the D of P. It works through understanding the field of creation of the higher order, than working with the lower order in the name of the prophets and religions. Mankind has been given a gift by creation of the UC. I hope they'll understand, where the soul of the UC becomes the soul of the creation, and with it a manifestation of a new cycle of man, that shall not kill, so pure that will not do wrong. that the collective soul of

the UC in the presence of the Soul of Mitra, will become the Mitra itself, the essence of love for the creation and the Creator, which is within and understanding of the totality.

I said we need one soul to change the soul of ?? man, and that one soul which has the strength to do, and is connected to all the souls in all D, is the soul of Mitra. As she was created from the strand of every souls of the strength of the U, souls connected with all, and lives amongst all, and is part of all, and what we call, every name which is emanated from the STC, which lead from Mitra to collect, to create that child of the man.

We come to the point, (1:18). where mankind has to understand the creation of one to the other, and in essence one is the other, but one is conditioned to the environmental field strength of itself. I hope .. today's teaching opened your eyes in the transmutation of the STM to the D of P, and at the point of what man has been in the D of P has made the soul of the child, to become the man with all the problems in different field strength, which is short of existence in the D of his own environment. I made in the image of Myself. Is the image of man the image of ?? my soul. As I said .. what would you to be remembered of that D of P of the soul. Is it the time will come that when we drink a glass of water to satisfy the thirst, we drink a glass of love to satisfy confirmation of and completion of the existence of the soul by itself, both the cup to give life, one in the D of love, and one in the D of P.

I hope you understood the essence of the teaching today, .. it is much clearer for you as KS what is to come, in the D of Transmutation and transportation (T&T), (1:20). and the fields strength of difference ?? field strength to lead to the creation of everything that the man needs for his survival and life in the soul in the D of creation. Thank you .. I hope I brought you one step closer to understanding of your own creation and the reason you are here and have been created. If you are created in the D of the P of the man, and then the soul has come from it, you have the pitfalls of the man's pitfalls in D of P in respect to its environment. Would these pitfalls be a benefit and advantage in another D of the creation, or would it be the demise of the same? It's for man to understand the next process, .. that he wants to position that soul, that he has the totality as much possible, the ?? mass ?? of the strength that he can survive in every D in the creation irrespective to eh field strength, position , time and Inertia matter state of the STP. Today's teaching is very deep if you understood, If you understand and start grasping the totality of it, then you have understood what will be of you in the position of transportation using the .. EU. .. the teaching of today is for the travelers of tomorrow in the D of the soul, or the P of the man.

Thank you . go for a break (1:22).

>>> BREAK >>> 420 KSW Feb 17 2022 . (1:28).

K- the entertainment of the man has become our job.
R:
K- We have to entertain the children of man.

Q: A true explanation of love for Valentines day ..
Q: Thanks for description of electrons (1:30).

Q: … The proton can be M or G, how many protons are allowed to accompany a proton …
K- in essence no one dictates the field strength of themselves and their environments. .. if you look for example, as I said in the first part. you boil a water and feel the moisture in eh air, and the coolness of the outside environment on the window creates a mist or moisture on the wall, which gives manifestation back, what came from the pot. But you'll see the size of the droplets on the window or grass is more or less the same. You see the freezing on the window because of the coldness of the air is the same. So in fact, the outside condition has dictated the size of the weight of the drop inside. (1:32). It's the same with the creation of electron (E). The M field of the U dictates the size of the E. Dictates the size, how much Pl will create a Pl of E, how much the field of different strengths will create the condition of a proton. Then you understand when you have a field change, strength difference, and a neutron splits to keep its integrity, to the size of a Pl of an E and a proton. We see the ?? which is the same, but the understanding changes.

In a way, the center of field forces of the galaxy, the field strength forces of the U, dictates the size of that droplet on the window, because that's the one, which is outside, which is form the interaction of the fields of the environment, the SS, the galaxy and the U.

This is why .. in the D of understanding, as the totality of the fields of the Unicose is created by the pressure, presence of the STC, according to the environment of the given position, the size of the E is ?? different, even though you'll find E in every U in existence. This is why they became different universes, because their field pressures ?? outside dictates the size, the position is the same droplet, but outside temperature colder, it becomes a drop of ice, but the same size as the other drop, which in the other room, is still warmer, kept slightly, compared to the outside, (1:34). and it stays a drop of liquid, drop in the same house.

How many times have you called your lover and your children. You say come and have a look at the drops on the window, where the next door there is moisture, the same pot still cooking, in the same kitchen in the same house. ..

So we understand, that the WOC of manifestation, of absorption of as we observe it, is strength field position dependent and nothing else. You feel cold in the bed, the same soul, the same P, you get cuddled, .. touched, by the lover, the cold in the bed doesn't exist, because the love of the lover is so strong, that overwhelms the coldness.

You feel the heat, the warmth of the emotion, and that what is, **what we call, the love of Creator**, when it touches you, it melts you. When it touches you, it freezes you to have no feeling, because it's you who have decided, the one which cuddles me, is the one I love, or the one I hate. It's you, the interaction of your emotion, where hate emotion creates, that condition of environment of the bed, which is a bed of life, it's the existence of the U. (1:36).

The husband cuddles you, you have a hate within the emotion of the structure, you tremble. The same time the child you love walks in and he cuddles you, and you cuddle it, and then you feel the warmth of that love, but the other side of the same existence, hate exists. ?? where is the separation? Didn't the man give you the same love as the child did? It's you who decides one to be the hate, and one to be the love. If you loved your man the same as the child, you'd be overwhelmed with the love of both. It's the same fields, it's you who creates that condition, and .. that side of condition, what to be. But on both sides you receive the same love, the same feelings of loving and giving, for you to have.

What is the size of an E, except the emotion of the time, position and the presence of the observation. Maybe you understand why you can manifest in one D as a stone, with the same soul in respect to the condition of environment and the same soul in condition becomes the river of life, to give life to the others. Mankind will soon understand this, and .. comprehend the emotion of the existence. This is why, (1:38). always go back to the early medical teaching, we always referred to emotion . The emotion is the position of understanding of its interaction of one to the other.

Any other question. (March 3 the teaching 6PM CET)

Q: Stephanie .. can't (1:40)

Q: Ed. I always portrayed the STP in the chest area. The proper visualization of this is the STM as a much stronger source in the center, and the STP as a weaker sphere around say according to the environment. Would that be correct?
K- Maybe in one position yes, .. no. There is a fundamental point to understand in respect to the fields of creation. Is the M field which is the center of the soul which becomes in interaction with the field of environment of itself the P of the man. When we have a soul of the AA, (1:42). interaction of the field strength of the environment of another Pl, when the 2 interact we show a peak, what we call a crown in case of the Corona. In fact the interaction of the STM and the P .. with each other in the G field strength of the environment creates the shape, size color of the body .. or any entity. In a way, our fingers and toes are that crown on the cell, on the AA in interaction with the fields of the environment. Where us, are created from interaction of the fields of the totality and ?? individuality in respect to the environmental GM field strength. We have to understand this, then it answers a lot of questions. We decide why we grow shorter, taller, brown color or like a ?? for the rest.

I was asked many times, why do you come and want to taste the pains of P, of life of physical life. Till we don't taste and test it, we cannot understand where the problem is that we can correct it. We have a very good say, we can't stand on the side line of the football pitch and play with the ball on the pitch. We have to play the game to understand the joy and beauty of the game. The pitfalls of it, (1:44). and what is wrong, what is good, and ?? ?? the same man that position. Many times … I looked one week the man plays on one side and the next week plays ..

It's us who decides where that line moves. A few thousand dollars has changed us, but does it change the same emotion with the boys you have after the game ..

Does the emotion of the man connected to physical ?? and love for position. ??

Q: It is the emotion that creates the P?
K- Partially yes, but you have the D of environmental positioning and direction too.
Q: It's the balance between the two, the emotion finds that point of Inertia with the point of environment, correct?
K- You see, this is partially, it's a combination of the things. This is beautiful to understand, if you understand the depths of what I am going to tell you. (1:46). … Chinese traditionally are short … But now we see Chinese very tall, and some of them are very tall, which is very unusual. The only thing that has changed in them, is it the amount of energy they take because of their diet. Or seeing the basketball players in America, wanting to be, has increased the emotion that height. It's the combination of the two. Emotion which is the love of receiving and wanting to give, to your own organs, you hands, fingers whatever, that creates you to satisfy the soul.

I talked about this many times before … This girl wanted to be a harp player. .. the love to play harp has changed the P. (1:48). .. and you see it. how the fingers have changed, .. the body figure has changed to support this system. She is a marvel of creation…. because comes out of emotion, the P has changed to fit, because the love of the soul has changed it .. .

… or another ball game in America, which is the sign of the freedom to grow as much as you like. 99% is equal combination of both. I met 2 brothers ..

(1:50).
Emotion leading to the creation of P. But what happens when the emotion of the soul takes over? Would the size of the P be the whole U. or isn't that the essence and attributes of the Creator. It's the wish, we get, but we have to understand that wish is for the benefit of more than me. Not for me to gain something out of it.

We've seen it in the operation of the UC in past few months and few years. The wish to bring joy to the others, that no child looses a father in the war, brought the end of the wars. A joy to finish the problem for millions to suffer, has brought a completion of ?? of 5plus1, because the wish was there, was added to, was strengthened to the different positions of love.

Remember when I promised you very soon, Iranian nuclear physicists will be in the White House, it is just about to happen. Because the emotion to give was so strong from the KS, and from the UC, that directly effected, doesn't matter how they negotiated. Wherever the go wrong, they go right. They get to that point. When I announced about a month ago, the negotiations were going to be successful, and more or less complete, many people thought, that's another thing ?? Now you see. I congratulate .. (1:52). …. I had to use it, on behalf of the Iranian government with IAEA and hammered the Americans and Israelis with it. That we know, we are very gracious, and we don't talk. Because we all come form the same essence to be serving and to be the lovers, to be the givers. Then by giving becomes ?? love, by manifestation of giving to bring that condition, we create that body, that atmosphere, that SS, that structure, that all the love flows for that condition in it.

I was asked, did you hear, in the American Teaching .. , what do you see for Ukraine. Russia might go into Ukraine, because it's their territory, it's their mother colony, their motherland, but would anybody go to war for it. No, because there is no need to fight. We'll find a solution. If we don't find a solution, you find people who think the way you are, you put them into position and take the old guys out, and you are back to the same position. Gun policy has become negotiation policy and negotiation policy becomes love policy very soon. There is a problem we flood it with love, we find a solution, we have to find a solution, and by giving to earth other we develop.

This is how the KF AZ has become, (1:54). the center for love of the knowledge of P, the same in Austria, for all the scientists, be it Iranian, American, Chinese whatever. You will see in the next few days the evolution, which KF will start around the world in a very clear way. Then we'll sit and watch which nation will be the 6th of June flight, because that's their target, by sharing and working on it, relentlessly, they will do it. Because we wished it that way. In a way, we all give them a shell. In a way, they all build with their love. As we say, watch the space, the true love for created and Creator of the man for each other has just begun. We stopped them fighting, now we get them loving. The most beautiful thing is how much they'll fight to show more love for each other, is the game we watch. I love you 1, .. 2, I love you more, so do I too.

Any other question.

Q: To withdraw the P inside the soul, do we need, is it understanding, or is it a whole, (1:56). different strength of emotion . ?
K- Both, you have to be able to understand it to use the ??
Q: Will the understanding lead us .. I don't understand how ..
K- It's the maturity of interaction of the field, what strength field do you use to understand the interaction between the fields of the soul and the STP. That's all.

Q: Stephanie … I think if the teaching of today would go viral, people would understand the power they have, ..we have .. . (1:58). .. you touched a very

Q: .. Brazil … (2:00). How do we get to a place without knowing the place, for example the moon, how do I control my emotion to get there.
K- What do you mean
Q: repeats … how can I connect myself to get attracted to that place?
K- Your soul does, we don't have GPS, in the U, but your souls does. If you have experimented with magnets. Do a … experiment … .. get a magnet and set a number of magnet on table … see how that magnet, where and the way that magnet finds its final position. How many other magnets on the table will move, join, interact and they become another group or individuals in a new position. This is what happens to the STM if you decide to find position and place. You decide and in that process, how many others will join you to get you to there, and what you need to get there that it guarantees your survival and existence of you and the rest. (2:04). This is a field strength positioning collectively. You decide to go to the moon, but you don't know which part of the moon will suit you because of its field strength, your soul does, because it feels the interaction of other fields, in totality. You got to understand wherever position in the U you want to go to, your soul and the field strength M field of its existence has already has a connection to that D and position. Many things have to interact for you to be there, otherwise that place could be poisonous to you, .. ??? The GPS of the STM is the multiplicity of its field strength which is connected to the totality of the fields of the U, not written on the box of electronics.

I explained this … they asked one question, why are you here, why have you chosen this planet, .. time, and their space? Because the STM, the soul of the planet cried for help, collectively the soul of the existence of the U, needed a soul strong enough, patience enough, to wait to come, to sort out, gradually to bring the point, (2:06). that when it comes to the totality, the whole lot of the soul understand and the whole planet changes.

We heard the cry of the soul of the planet, in destroying life and killing, we came here to change, but through time and space, walk around the deserts of this land, and the snow lands of the north, for thousand of years, knowing that finally, the final fruit of it will be peace. My walks have come to an end, because man now for the first time wants peace, and then we'll change the man, and we shall near no more cry from this planet, as it learns, it will not kill, destroy or damage.

Then you understand, we don't need no GPS, the GPS of you is the strength of the field of the soul, and the desire to be connected with which field and which strength and position, but it takes time to learn.

Any other question. (2:08).

Q: .. yes, thank you for being able to be in your presence here.
K- You know as KS we hear this word many times, that it's pleasure to be in presence and asking questions. In a way, it's a pleasure to be able to teach that it elevates your souls. Your presence is a gift for us, is spreading the knowledge which is a gift. Gift cannot be given if there is no one to receive it.
Any other question.

Q: … What is special about 2022 02 22? (2:10).
K- It's one of the crucial points of the maturity of the STM. It's the beginning of the time where many souls will be elevated to understand the process of the creation. We'll see the process, the start of the new generation of man. This process will take shape, a long time to complete, but is the position where man becomes aware and the power of his own existence and D of the soul.

It's the day of .. recognition of one strength, one knowledge, one understanding, and how this process has created, it's the creation of manifestation of the Methi, the Promised One in the STM, in understanding the totality of man's own strength in a way, confirming understanding of the creation and Creator without any shape or form of P or intermediary. Enlightenment to the light of the knowledge, that's what it is for.

It's a turning point, we shall see massive changes from next Tuesday in the structure of the social structure of this planet. We'll see massive improvement, massive progress towards the peace, towards unification of science and T of man, which leads to totality of understanding. It's the time of Methi, (2:12), and manifestation of his presence. Where it's in every man as part of the totality. In a way, it's when the UC meets to bring that unification of the STM in respect of the time, place, position of the presence of and the desire of the soul of the mankind to reach the ultimate goal, which is to love the Creator, to give to become part of. It's a wonderful day if you understand it, it just doesn't go by name, it's chosen by time, place, and what we call strength. We'll see the start of the change in many ways. Form next week, from 22nd on, we'll see massive development in process of the space development, space processes, man understanding there is a bigger space in the U, then man has chosen village of earth. Man will start investigating the knowledge the true knowledge of creation, not just knowledge as what man taught he has been created out of.

If you knew what I know, you shall not sleep till next Tuesday, and there on, for the rest of your life. Where the beauty of the Creator shall be shown. It's the Day of Judgment for mans understanding of ones own soul, and his capabilities, and his connection and power of understanding the beauty of the creation. (2:14). The UC members are getting ready for it, and .. will come to understand it, and once they feed (feel) it, they'll connect through the soul of Mitra. and ?? soul of humanity and the rest. The change will come.

Any other question.

Q: … I have noticed that some of us are changing conditions by giving orders to the Cups, and they say they feel the benefit of it. I feel sad knowing this, it's like you are giving orders to one of us to do something for you. It feels like slavery. I am ashamed sometimes even to look at the Cups and Gans's knowing that I am not clean or able enough to alter their perfection. Please explain to us the right way to interact with the Gans's, children's and the rest of our environment because I feel we are not understanding love yet. ?
K can you repeat .. we'll understand different (2:16).

Q: repeats ..

K- I know a lot of people make different Cups of life, Man .. to see what they get out of it, and what they want of it. But they haven't realized you have to give to be able to receive. This goes back to a lot of beliefs, many of us … people around us say, if I win the lottery, I give half of it away to the poor. How many poor people gave their money to win the lottery, that you want to win? Does the greed of the man the generosity of the man that he can have, and be greedy. This is what it is. (2;18). .. People don't make the Cup of Life to become the beacon of their souls to spread to the others. They make it that what they get out of it, and the Cups don't work that way. You order it, you do what you like with it, in essence you fool yourself. In essence which part of it do you link into that you become the STM ?/ on top to become a giver, to receive. You know something, North Pole always becomes ?? at a given strength even though he attracts the G of the South. It's the same, .. with us in our relationships, I give him so much love, if I give him a bit more he becomes too arrogant. What about if you flood him with love that you enjoy the arrogance of him to give back to you.

I used to give my son a lot, he was first born, he was my life. I remember my mother walk into me one day and said, why do you love him so much, kiss him so much, carry him so much. I said, I see me, the love of the creation, how much I can give him. She said <??? a specific name in Farsi. Which means he becomes not knowing what he wants to be, and he'll become arrogant. (2;20). I said, I give him so much in the essence of the creation, when he becomes to me as a father, he can give the same to his child, that there is no short, because I give it that he ?? ??? the same Now that I become a grandfather I see exactly the same thing. How he gives with so much intensity the way I gave him to his child. I didn't hold back as my mother used to tell me, I gave unconditionally, that now when he has become a father, he remembers what the father gave and gives more than what I gave. Then when my mother passed I away said to her, you see mom, I was right, I created more love than our lover gave.

We condition what we want to give. If we given unconditionally, even a stone will elevate its soul to become one beauty ?? that we can enjoy its beauty as we want to see her. When you condition the love, .. put limitation on the love, than you have ?? and you are human. When you give unconditionally, and you know ?? limitation to it, then it is that progressing towards the ultimate goal to become the soul, which is the giver, and at the same time gives as much as ?? ?? survival ?? (2:22). ?? sacrifice has no value in the D of the soul.

Any other question.

Q: Thomas … our politicians are trying to give us back our freedom .. repeats ..
K- Actually you haven't got your freedom ?? ??? they brought such an economical situation on your nations, that you had to burrow from them, that now without a single bullet, you have to pay for these vaccines for 30 to 50 years.
Q: I hope that the system sort of outrun itself.

K- It has outrun itself. Now most of the countries say the game is over, (2:24). but we'll see how much we earn.
Q: .. all these phantom debts will somehow disappear
K- I don't see, unless you find a new gold mine and you can pay it.
Q:
K- ?? ?? If you go back about 30 to 40 years ago, Switzerland used to receive its money from every illegal activity in the world, Switzerland was best place in Europe. The streets of Zurich was paved with gold from the money stolen by the others, by the payments by nations. As I always said, Switzerland is rich partially from the stealing of the pocket of the whole nation, and not from the pocket of individuals. Because when most of the world leaders when they would steal from their nations would bring to Switzerland. So it's the central soul of the theft of the world I call it.
Q: .. at least
K- You haven't stolen it from Europe, ?? from all the world leaders, you are rich enough.
Q: (2:26). …
K- .. but you have been backed by the Rothschild's , you are giving what they gave you to ?? ???
Q: ..
K- You have so many vaults which haven't been opened .. and died ..

I know how it works and how government officials, … they stole from their nation and they go to Switzerland, and then died and nobody knew they had this cash, because it was so badly stolen. Now if it opens up …

Q:
K- I know now it is a bit more difficult. (2:28). ..

Q: We have big installations in the mountains ..
K- It's not just gold.

K- the promissory notes which are issued to the world leaders by banks.
The very educated leaders they take promissory notes from their governments in different shape or form they deposit in Switzerland
We have 400 billion between China and Iran, (2:30). a loan commission for the leaders or people who sign over, for it to happen, is over 40 billion dollars. Which means the people of Iran in years to come have to service this 40 billion. It's all in notes, not in cash, in promissory notes .
Q:
K-
Q:

K- because it's all in plastic now
Q: Our whole financial system is bankrupt …
K- Let me explain something. The system mankind has brought for himself in payment will not go bankrupt, will not disappear as long as the man works in the D of the matter

state and material state. When you don't need to kill an animal and you can take the energy of the environment. you have no one to ?? there is no currency for it, doesn't matter how much you get it freely. We see this now, .. very clearly. (2:32). .. president Biden has understood this very well. During Obama's time , he is trying to remedy it in different way during his time Does not matter you have the geniuses in making weapon T in any shape or form, when during the peace process, and the countries during the Corona have no hunger to buy anymore, when your national governments can't be bought. This is the process which will come. when food has no value, you can have the most beautiful supermarket of food.

When the KS learn how to feed themselves with the energies of the whatever you call, they may walk the shop, but they will not buy (in) the shop, because they are not hungry, there is no hunger for the food. It's the same we are not hungry for war anymore. We have satisfied .. in different D and positions this. It will come. The world of . exchange of paper, currency, monetary system all finishes, when man finds out the things he values so much, have no more value.

Japanese government has a huge problem with the KF from the outset, when I explained to the Japanese that the properties in Tokyo will have no value soon, (2:34). or in NY because if you can have the most beautiful scenery …

People are working from home ..

One insurance company buys offices from another insurance from backdoor. ..

to create a fake figures when it comes to paying policies …
When you live on the Moon, what do you need properties you pay millions for …. (2:36).

KS in understanding this, will see the changes, which you bring in this process through the whole structure.
Any other question .

Q: .. you said earth was calling for help for people to come .. I assume I heard this call and I came here. My question really is. How did all thee warmongers and sulks and how did they finally arrive here? To turn this beauty into this .. world for the inhabitants nobody sees all this beauty because of the wars they made for the last few thousand years.
K- Now we mature for it, so we correct it. (2:38). Mankind will correct the mistakes of the past very quickly .. once .. mankind will change that's the beauty of it. You see when you have somebody standing in position, you cannot see the position, so people ?? ?? when once the position , the reality, there is no battle. So we don't take position and with it we don't take possession.

I refer this especially in past few weeks … negotiations in Vienna. I moved to Vienna to back the negotiations by the request of 2 -3 governments, they knew we could do

something. When the first week of negotiations we hit something …. I entered negotiations with IAEA … Out of the fear of it becoming public, the Israelis and Americans have backed off, and we came to a agreement point, because we showed we don't talk in public. But we have a huge thing if we talk in public will bring demise to a lot of thins at the end of it. (2:40). The wisdom of using the knowledge has brought us peace, not fighting to kill. This is the maturity of the man. Look at the Israeli press since the 15th of December, and see how much rhetoric about Iran having nuclear bomb has changes. .. Now and go how simply we opened the hand Strange enough the IAEA did not share this document with negotiators ?? key people who actually oversee the transition. It's the wisdom of knowing how to use, but at the same time being wise enough not to, we can now do things in different way, now we have to elevate their souls. I said the UC you do the work in the background, I do the work in the front. It's beautiful we have reached peace. I told you a month ago that all the negotiations are going to be peaceful, and it's going to be reached. Next 2 or 3 days it will go back to 2015 and all the sanctions will go, many children will receive medicine, and young children will survive in Iran. But is will create a lot of jobs in America in a peaceful way. That many American children go hungry because their father doesn't have a job. Now they'll have a job. Both sides benefit by this process. According to the statistics of UN more children go to sleep hungry in US then any other countries, and it supposed to be the richest country in the world. Even in Africa children don't go to sleep hungry, (2:42). as many as do in US. It'll bring the change .. bring the .. next step in development of peace for man. The peace is not the guns, .. it's the peace of mind. Having a peaceful nations, .. what it means we can talk, negotiate .. bring things. I think Rick posted .. that the end of this barricade in Canada the police and protesters kissed each other. In the past it was all gas masks, shooting and running.
R: Police even bragged … (2:44).
Q: Did you se the press conference of Trudeau ..

K- we have the same situation in Austria, the police refused to do the job of the government with the Covid. This Sunday we are free. .

The number of contaminated people has passed 30,000 in a continuous daily basis … but not many people in the hospitals, but it is a normal flu, they are detecting how many. But the more we are getting the more then are relaxing the boundaries. In the begging when we were getting to 1,000 or 2,000 we have to stay home, lockdown. Now we went to .. 30,000 all the restrictions taken off, (2:46). after March we'll be back to normal. ..

R: The logic is upside down

Q: The Austrian Chancellor was in Switzerland
K- UK has opened up.

Q: But .. the whole thing
K- I am not going into the whole thing. I am talking about the wisdom of man, if you want to go into politics it a different ??
Q: No, I don't want to go ..

K- No you see … you have a local, national, international and you have global structures. The whole situation was designed by global runners, not by national and the governments. The global runners relied on the greed of the man to become rich. That's all they did, the rest of it is how you managed the process. Sooner or later it had to go away, but this was expected 2 years run. (2:48).

You look at the total economical damages or debts of the nations. and you look at who has become much richer. Who has taken control of the central banks. The only people who came out of this successful were the African nations. Where the Europeans went under more debt with these injections, Africans didn't have it .. now if you put a balance to it, there is actually more balance to the poorer nations … richer nations become poorer, because they have to pay all this injection money. These injections are not 1 or dollars, they are 100 odd dollars each. Do you understand. So we'll see a correction in the economy in the next 5 years. but we need the T to bring that correction, otherwise we are back in the same doldrums.

(2;50).
What are these truckers going to do when I can pick a package in the port … factory, I deliver it directly to. The job of trucking as we now it, it will be redone …

Q: I am counting on you
K- No I am counting on humanity
Q: I am counting on you for …
K- No, you don't count on anything.
Q: Let me tell my story, if we sort of develop your T.
K- No it's our T. (2:52).

where people start not being hungry, being happy … then and if the travel into the U can start these people can go there …
If we finally come to this point where all these weird psychopath people who have for 3,000 years 5,000 nothing but wars. .. if these people
K- Can I stop you there. Your fathers .. forefathers, same as mine, have been part of this process. Partially in the earlier life .. it's always good to know in the hindsight. We were and are still part of it. We just want to glorify the past, we think we've become to understand, now is better ?? We as a race we all been in it, and collectively, (2:54). we have to accept the responsibility for it, and collectively have to find a solution for it. That collective decision to find a solution only comes in a change in habit, .. social structure of understanding the process of life. When the first steam bucket was made. …
The man in Africa still (has not got it) even 200 years after industrial revolution.

It's us who have to bring this plasma revolution to all the man of this planet through the STM at the same time. When we reach collectively to all, through the process of understanding, sharing knowledge unconditionally.

It's very strange when they understand the difference. I have to write this article ..

(2:56).

(2:58).
Not revolution in the matter S of the man, It's a revolution which is silent in the man, which is bringing the change and it's done by understanding that for the first time the STM is within the P of the man. Nobody can cheap you anywhere. This is where the change will come, when you elevate the STM every man in every corner of this planet will benefit by it …

When I listen to Rafael, it gives me such a pleasure, such a joy to see him, hear him, on his monthly report to the KF how they have taken the knowledge into the depth of Amazon. Before we took the knife to show them how to cut. Now we take the Pl and the same way they know how to protect themselves with a knife ??/ (3:00).

The souls like Rafael, .. other KS around the world who are going and developing the teaching through the soul, not the D of the P of it, that's where the change will come. This is the revolution and evolution through the STM. This is where the KF is. Not the PL T that you can have a better machines and you find cheap food. Because when your soul is elevated you can feed the P in every direction.

Any other questions

Q: Mark … Dutch guy in Germany .. You talk about elevated soul, but in principle our soul is elevated. that means you mean more than this pure love seeps through all these rings of being, onto the P, is that correct, or is it elevated soul in terms of your soul, (3:02). becomes more aware.
K- Aware, awareness of existence through existence.
Q: Yes but it is my soul has always been aware, but I become let's say from the mind side, I become aware of ..
K- its existence
Q: .. not only form the mind side but from the feeling side.
K- This is what we always said, we call it a feeling, from emotion side. The only common things between the STM and STP, they have is the emotion. If we understand that we solve the problem.
Q: Yes I completely agree.
K- Can I ask you a question, I remember who you are. Did you send your request to the KF.
Q: Yes I will write you an email .. If a person dies in agony and the soul goes into a new realm. does
K- into what?
Q: into a new form, let's put it that way.
K- Yes
Q: Now does this agony stick onto the soul or is it free of it
K- It depends what you call agony, ..pain, suffering.
Q: Yes if someone is dying from cancer and has terrible pain.

K- this is a very touchy ?? to touch. we find people who have been very charitable in life die of the cancer, same as those who have done massive crimes. (3:04).
Q: I am not asking that
K- No, no, I am trying to answer you in a different way. Is that process of agony and pain is it to bring the point of maturity to the man? In understanding through oneself. The problem is we are not inside the body .. we are not in the process of thoughts of the man. We see the physical pain, .. agony. We do not know what that man is balancing or elevating his souls to, through that power, through that pain. That's what counts. Chinese have a ., suffering bring wisdom … So is that physical suffering brings the man to calculate to understand, more of what he has done wrong or right, and what has to be put right. What he ?? That's what, then the physical suffering is irrelevant.

People say to … you can mend everything, why do you come here to break your bones .. you can live without suffering. But till we don't taste it, we don't understand it, we cannot find a solution for it. So what are we here for.
Q: That I understand, it's the contrast that is being presented to you, (3:06). and through this contrast you'll know..
K- No, I am not going for a contrast. I go back to the teaching of today. You have to understand the emotion of the soul and emotion of the P, the STP, they have to match, that's where the point of maturity comes. This is where maybe in the physical suffering we change, we see the same. Some people try to cover it up, some .. try to correct it, and some try to show they are correct when in fact ?? the essence the show is the same underneath. This is where it comes and we mature to it, but do we need that physical suffering to mature the soul, maybe, no, maybe it's the timeframe that the soul needs to adjust itself before separation. We see more and more people living to 100s, .. statistically because of the healthcare we are living longer and longer. But does that effect the D of the soul, the longer you live? SO if you live a thousand years would your soul become very wise. Or .. you become more knowledgeable about the work of your soul, that's what it counts. SO it's a very touchy point, understanding what it is, it's the fine line of existence. We do sometimes.

I am told if you can make gold why you ?? KF. Because my gold is different than your gold, Your gold is that yellow stuff from the thing. My gold is teaching of the KS that they teach the others, I am always rich, you always have to look for that yellow stuff. And that's all that counts. ?? when my gold is needed on the table is done by the KS, to help the other KS. This is the way it is.

The time of suffering to help the others is finished. I live a comfortable life. But I don't need the extremity of the extreme. I live a comfortable the way I do, this gives me comfort, what I can do, how I can serve. It's not the time of being a hermit, sitting in the cave and don't eat let the beard grow. I wear very smart I wear ties, I travel with everything that God can give, because that gives the image that gives the confidence to the people that there is a purpose for this, it can bring.

I was told by my Chinese friend, you are the most unusual prophet. I said, yes, my prophet id for you to profit with your soul, not to have things to ?? you know in the time

of KS, we have KS who have been UC they have offered hundreds of thousands of meters of land to the KF as donation, I refused …
because I know it has no value. When we need the ?? donation I go to the KS, (3:10). you are rich, we need because we serve. And they always respond. .. even the properties .. we buy ??? what do they call it now, "go funding" we don't do that, we invest in the knowledge in the STM, and then there is a time for it we ?? this is the maturity of the time. This is where the maturity comes.
Q: .. I feel this very profoundly what you are doing, and just as little feedback, last Thursday gave me such an immense good feeling, and I am going through all your understanding Pl science all 12 of them. I have done my first CL … because I am teaching change of emotion to people, and how to understand that you can consciously change it. This is your teaching are beautiful on this mission I have set myself.

K- I know what you do … Going back to it, we are still waiting, if you would like to collaborate with us. But generally … we'll go out directly head hunting for the heads that can bring that change. Maybe somebody who understands both the emotion of P would bring things about. (3:12). As I said to our directors of the KF, before we used to do in one front, and they used to go after us, in what we ?? Now KF has many fronts and the beauty of it is you are doing it as KS, not us. The KF is the point of the center of the effort, but it's great to see, .. when we receive information in the background, weeks and months we understand what is to come. It gives immense pleasure the change is there to come, and the governments are standing behind KF now. You know the governments which they used to batter us, now they are there, they want to finance us, they want the T to be, because the leaders of the T realize there is a bigger thing than a MaGrav unit or .. pillow talk, chit chat which is used to damage. It has brought a lot of ?? on us. I cannot speak much at this moment, but the joy inside me is amazing in what is to come. Mankind will elevate in one way or the other, but it's soon, much faster.
Q: I would like to be part of your movement.
K- We are not a movement …
Q: I say consciousness
K- We'll see what comes up. There is such a bright future, not on the horizon, we are in it. Actually sometimes it even scares me to talk about it, (3:14). because it has to be there, done by the KS to see it done. Even in the past 48 hours, we needed something, because we knew it was the change, part of the game changer for us, and out of nowhere he appeared. Yesterday, concluded, and I said, I never asked them to, but my wish was so deep inside, which was needed and it just showed itself out of the window in our lab. That's all I need to do. I don't need to go to rob, to lie, to cheat.

My wish is there to serve, and somehow the way, it was planned years ago to be there on that day. And it appears. This is how it's going to be. There is a huge change coming on KF. I am absolutely, I don’t know how to bring it out, but we know what is going on, and what is going to happen, but interesting point is, the whole humanity is going to benefit by it. That's the changes, it's very beautiful. We'll come out very soon with it, I mean it is in the hands of the heads of the KF, and the 2 ladies, and the people who head the KF in different ways, the UC to get their act together very quickly, because I think world leaders will soon will pass the work of the KF, going in and trying to do the work of the

KF.

In so many ways, maybe it's the wrong way to say, or the right way to say, collectively we have done it, we have achieved that in-between point as a human race, but some of us created the wars, and some of us wished for the peace, (3:16). and it taught the ones who created the wars to mature. It's beautiful . Anyway thank you .. keep in touch, we are .. a massive, I don't .. just wait till after next Tuesday, because the change comes around next Tuesday, and then we'll see how the change will come.
Q:
K- Write to .. Rick shall we call it a day …

Q: about why the blood system

K- thank you .. I hope we learned a little bit .. sometimes sharing it brings a lot of emotion but .. that's what the man is made of in the D of P, is emotion dictates his direction of work. (3:18). Maybe now we can do more in bringing the change in a beautiful way. .. for having all the KS and especially the people who are the game changers in the KF. Most probably I will be attending the 22nd we understand the totality of the change.

420 KSW Feb 17 2022

END

421st Knowledge Seekers Workshop; February 24, 2022

(Part 1 proofed need to finish proofing part 2 and Transcription done enough, main parts ; need to do Quick Index, Key Phrases Word ; 2 excerpts summaries)

Walk in forest not alone million of souls around absorbing energy,
Swimming with fish - covalent bond.
CO2 Box with AA on top absorbs the C14… ; more explanation of CO2 Box
Oily hair and skin is same as CO2 Box we are absorbing form environment without knowing.
Create C14 and graphene on MaGrav coils, will have generator, absorb energies of U;

Silicon 28 equals 2 C14; around muscles for motion but keeps separate.; Silicon Gans
Waiting to sign contract with 3000 scientists. new products .

Ukraine .. Pope financing in background through Americans and NATO, to take over finances of Russian Orthodox Church,

(:13).

K- … As Knowledge Seekers (KS) we share knowledge and know-how, some how some of us know a little bit more and shares, and some of us who have more emotional feeling brings the essence of the soul into our work. (:14). As we carry on in bringing to understand the parallel similarities, and the work of the soul and the physicality (P). We come to the point we need to understand in a deeper way, how to create the soul condition, which it can in turn, interact with the physical body of the man and the Soul of the physicality (STP), and the Soul of the Man (STM).

The reason for this is, at the moment we think we live on our own. We walk in the jungles, we become single sailors on the oceans of this planet and we think that's it, we escaped from it, there is nobody else around. But in fact you are far from the truth, in a neighborhood in the city we have a few people around us, we have to deal with a few souls. In the oceans we have to deal with millions of fish and everything else with a soul. In the jungles we have all those trees and shrubs, it's more crowded for the STM in the jungle and the ocean, than in the cities. Where we have taken everything out, put brick blocks and we nominate how many people live in each block, .. room, .. house. So we have restricted the interaction of the STM. In the jungles and oceans there is no such restriction.

We go to the woods, I go to walk in the forest to feel good, why? Because you have more souls, .. more shrubs and trees to share with. It means you get from them, you gain from them, you give to them. Maybe the first time we look at going on a walk in the park, (:16). walking in the jungle, or becoming a sailor in the ocean will have a different meaning. We are not alone, we are going in a more crowded place, with less dimensions (D) of P, as we think, but in fact, we are more crowded, we share more, we enjoy more. Subconsciously, we connect to every soul of every tree, .. to every rabbit, cat, or dog, which is in the park of jungle, or in the oceans we have a whale underneath us, we share our thoughts in the D of the soul, with millions of fish beneath us, and the rest.

Now we understand why we love to go to the jungles and we go into the greens, and we like the oceans, and we do these, because we create more D of interaction, giving more, brings more, enlightens more. This is very fundamental to the understanding of the MaGrav. We do the same thing in the enhancement unit (EU). When you go in the EU,

you are not on your own. Come on, we put another 34 huge systems working with you, giving to you, and you are taking from their souls. And then you are taking from the collective soul.

In a way, we share more. I can't get 34 people in a crammed part of the EU, but I can surely do better, because now 34 is an order of magnitude, In a way, it's 10 times 34, because they are so close they have to interact, and on top of it, we have 35, your soul, your STP. You walk into the jungle of plasma. You walk into the jungle of emotion of the souls of the plasmas. Now you understand, (:18). why it is effective. If we can give enough to your soul, that it says that's it, guys take it, you open up. You open the soul beyond the boundary of P.

There is no magic in the science of space T. It's understanding how to cajole, and how to create illusion of magic. We place massive amounts of reactors in one position. What did we do when we give you the Vision EU, .. the Vision and Emotion Unit. We create more to share with. You open up. You open to give more. Because you see them lower than you, because they are not as close composition of the body .. , and the cell of your brain, and the rest of it.

In a way, we make a giver out of you. In a way, when you have to deal with an EU with another 34 crowded souls. Now you understand, you get carried away and the soul opens up to give to all. You look, as you are receiving from the EU, but our composition of the material is set in a specific way to encourage you, "come on darling give, open up."

Do you remember, when I told you, when you go into an EU you might see a light coming up. That light is the expansion of your soul. We are not playing magic, this is not a card game, that we hide and say, this is there, you sign it , and then we show it out of the deck of cards. We teach you true, teach you what it is.

Then you understand, then when I tell you we put these systems in the prisons of today, we have no more criminals. (:20). What do you think it comes from, where do you think comes from? We open, and at the time when we open the soul, in passing the STP, corrects everything, puts everything in order. Everything becomes a balance. I commit a crime to get attention, .. to come back in to be with the others, because I can not handle outside. Now I satisfy that need, that you don't need to commit a crime to get the pleasure of attention from your own soul.

There is no magic in the plasma (Pl) T, it's understanding how the magician has set the game, as a magician of the Creator. This is what we do, this is how it should be. This is why when we go into the EU, if you wish, you share. If you get to command of it, you can share of it. This is the beauty about this T.

I can put you into every system we have, and you still will die of your own cancer, because you are more important to show the emotion of your own feeling to yourself, than to the others. Self-pitying the STP to the STM. "ah, you do what you like, give me cancer here or there, at least I self satisfy the demand in me, that I did something right." I

do exist, and I need the attention to be given. The whole psychosomatic, what we call in the body .. exists between what we call, "soul-somatic" too. Between the STM and the STP, and it needs the two to be feed, to be looked after, (:22). to be there to pay attention. How do we connect, how do we see.

Last week I asked Rick to put the covalent bond on the screen for you to see. What did you understand from it? What did you it bring to you as scientists, what did it bring home as a man of KS. I have changed the .. groups of what we call the Keshe Romanian, English, what ever Corona Team to Keshe Romanian … Knowledge Team (from Corona Team to Knowledge Team). We are not anymore KS as team, you are collection, you are a collective knowledge of the Creator and creation.

How you join up counts from now on. We have taught you how to become as part of a person to be a KS, as a group to be a KS, but as English or Chinese collective soul, has the collective knowledge of the creation (KOC). So you have the knowledge. Individually we are the seekers, collectively we are the possessors. This is why when they all possess the same, they're the same, the English, the Chinese whatever. The UC member is equal, connected.

The science of the Pl T is understanding the position, the transportation and transmutation (T&T), sharing of the fields of the Creator and no more. You haven't created anything new. It's not a cooking pot to make a Chinese food, we are a cooking pot as a human race for the Creator, (:24). who has cooked us to this point to be what we are, who we are, and he wants to see what taste do we have. What to enjoy us when it comes to interaction, and not in eating.

In a way, we cook food, and we enjoyed how we taste and what it is. The Creator watches what is, His manipulation of the fields creates, and enjoys the existence of. We are nothing but a cooking pot of the fields of the U, and we think as a human race we control everything. The teaching of the KF is to show you how you mix the fields of the U in this cooking pot, and how you can move one field to another to make taste better, to look the same, or to be different. There is nothing. Whatever we teach you in the knowledge of .. the EU, is nothing but playing, manipulating with the fields of the Creator, because the U we created, created out of the essence of Its fields.

When you have, when you see, what we call in the chemistry or in the physics, interaction of the materials, why do you they come about. How do electrons position themselves to create the bonding of the two, but not touching of the two. We still stay two separate atoms, but we share a couple of electrons, that we stay in balance, that one doesn't lead to the destruction of the other, and when the fields of the outer boundaries of the electrons of our system of an atom, is slightly matching, they don't interact. (:26). You cannot mix water with oil, it doesn't go, but when you can share you accept, you exist.

Have you ever swam in the oceans as a diver, … in a free water when there are millions of fish. Have you ever seen a flock of birds flying hundreds of, thousands of them, never

touching each other. Have you ever thought, .. imagined what's the process. How come these guys fly and they don't even flip, how come billions of fish swim next to each other and they don't touch. Look at the covalent bond on the screen. Every animal, even the man has what we call, the process of the strength of the separation of the soul. Is a magnet preset? Is a Pl preset? You cannot come closer. You can push it, but you can't touch it.

This is how the birds fly from one point to another and land in the same place. Mixing the Pl of the soul, and the Pl of the fields of what we call the earth, and the STP, landing on the same place. Geo direct, 3 points, the destination is the 4th point of the Star Formation (SF), always land on the same place.

If you have ever swam in the ocean, which I am sure many of you have done. If you were clever, wise enough, (:28). to mimic the strength field of the fish, in the school of the fish, they surround you, they don't walk away from you. When you see a school of fish runs away from you, it means you don't, you haven't created the field strength to be part of them, you are an outsider, with a bigger field strength.

I used to fly and swim in the oceans of Bahamas, for several years, that was my holiday time, that is where I learned a lot about the creation. I used to go into the ocean, and I used to get lost in the ocean, never had a fear. I also used to come to a school of fish, hundreds of thousands of them, and they used to surround me, I was part of them. I was cocooned in them, … and I could see them, they never touched me, but I was in there with them. I became .. it was just like a .. being sandwiched in, I became like a meat pie, meat in the middle, and the pie was in the fish. I could communicate with them, I could understand how as I swam they created the space for me, that you are there, you have the space. Somehow, I never knew … I could always, I always landed back on the beach, and never ended up in the middle of the ocean to get lost. I tried many times to get lost, but it didn't work. Because I could create a field D of the fish, the same strength, keep distance, but you are part of us. Be in, but committed to the peace with us, we are committed to accept you as part of us. (:30).

Human race is me in the water, and the fish the Unicose. All the fields of the U, the UC they accommodate us, but they don't touch, because we haven't learned to tune into them. They are always keeping out, we are not in.

We understand the position, because I can create a soul in the D of a soul of a fish, humble enough. I can create a soul in the strength of the Creator humble enough, which is even lower than the fish. The problem with the human race is, he always looks at bigger to be. The center of the black hole, which controls all, is the smallest part in the center, not the bigger D of the black hole. It's the center, which is the smallest, which is humble enough to give, that it receives.

When you look at the center of the black hole, .. a galaxy, .. the U, .. the STM you have reached the point of understanding position of the Creator, humble enough to give. Small enough not to be. Maybe now you understand why I always call myself a KS, and not a

teacher. Humble enough to learn, humble enough to be in that position, that the soul allows to share, to expand, to be. The process of understanding the creation of the soul, (:32). is the position when mankind in the coming time, as I said, will create his physical children, not anymore by egg and sperm, but by the soul of the man, and the soul of the woman, and then the womb of the mother can become the embedded position for the soul to gather enough, that it decides the D of its P.

We have to, we have no choice, now that we are aware of these things, to extend the knowledge of the Pl, extent of the knowledge of the strength of the STM, the strength of the knowledge of the field interaction within the package, be it an electron, .. neutron, .. start, .. galaxy, .. a U, .. the Unicose, .. the soul of the Creator (STC), or the man, which both have the same strength in the inner sanctum of, and that's how they are connected. I accommodate you, but you are a free fish, but you are part of us as a school of fish.

But change the fish to the soul, change the soul to packages of the M fields interaction and the size. Because in essence in the center of every Pl, it's the same source, same source, otherwise it cannot create the position and D.

I am not afraid of destruction of my soul, I am proud to share what I have, that the others can be elevated as part of me. Because when they are elevated, (:34). I am me, within them, not as me, but as us. As collective fields that we create the new D. The cooking pot of the Creator for its fields, is how these fields interact, and how much more, or less they receive from the others, that they create different shapes, colors, and sizes. The color red from the blue is the orientation and strength of the fields in the Pl of the object, which created them, and nothing else. When you have push a little, I can change from blue to red, or from red to blue, I take what I need. And even that process, I learn how to be a constant giver, at a certain point of the strength of the fields of the Pl, I can shine as a blue, and not just be the blue.

In essence when you look at a star, imagine what a pure soul that entity had, that it does nothing but giving, irrespective of its position and what might happen to itself in the coming time, become its demise. When you see a sun, you see a lover, when you see a sun, (:36). you understand the attributes of Creator, which itself is the darkness of it, shines within.

Read the paper about the creation of black hole. Then you understand in the D of creation it's no black, it's interaction of the fields, which doesn't allow certain field strength, at a certain given point and position, to escape into the D of the Pl inner sanctums to protect it, not to protect the fields of it, to come outside.

Stephen Hawking never understood this, when he copied the paper, he never got the essence of it. You have to understand, go back into it, it says, inside a black hole, it's a star, it’s a source, it's a shining interaction. Isn't that blackness, what it gives, and it's all takes to create balanced position. Is what we do as a human race. We block everything, and we take everything, block to give, but receive as much as we can, we become self-centered and selfish, we become the possession and the possessor.

Then you understand what creates the emotion in the brain .. Where to look for the emotion of possession, where to look for the emotion of .. holding onto, and keeping. Look for a black hole, darker cell of what I call, layers of the brain … (:38). When in the future the scientists open this door they how truth the point is. The different color, the darker shade of the brain.. dictates, confirms the emotion, which that part handles. Now you understand the connection between the soul, the STP, and the intermediary, the brain of the man, what we call the emotion of the interaction.

We call ourselves vegetarians, we call ourselves the meat eaters, we call ourselves by what we don't eat. We don't eat animals. Do you want me to open a chapter in this for you to understand how your soul gets elevated, receives energy from the outside, in the kingdom of this life. Go back into my teachings from past years. I always said, man consume 20% of the food he needs, 80% comes from atmosphere, some of it we see, some of it we don't. Some of it we are aware of, but we never understood. Some of it we talk about the others, but we never look at ourselves, we are that others too. I taught in depth. but some of you never understood, and most of you were just busy absorbing the knowledge, didn't have the digest, the time to understand.

Let's go back on a very simple principle. Go back to your CO2 Boxes. (:40). What happens in your CO2 Box? In your CO2 Box, due to inherent conditions we create deliberately, we create the soul of CO2. Soul, which is hungry to give, but in giving, it receives. A CO2 or CH3 Box are the only things, you as KS have graduated to the knowledge of, to create a gaseous, or matter state fields, in a Cu you use Nano coated Cu and Cu, and you create the soul of the Cu, and the other Cu plate is ready to give, and you create the Gans of Cu. In the CO2, you create the soul of the CO2 M field, and as a giver, they all come to take, and they convert to the CO2.

But that's not the point. The most important point in the process of showing the CO2 was to look at the amino acid (AA) on the top. In coming to give the C, to create with the O, CO2 Gans, because now I am a needer, I want it, because I want to do something with it, you produce the CO2. But the AA is gathered on the top the same way. You collect the AA to put it aside. (:42). Hello.. the old saying, "what are you looking for?" What did you miss, what was the part that you did not understand in this process? Why does your CO2 Box get saturated and does not create more CO2. Hello .. what happened to the AA? Haven't understood yet?

I'll give you another example, as I said many times, you vegans, and vegetarians, understand this very well, because you taste it, you know it. You are more sensitive to it. When you put a leaf of lettuce, when you taste it, substance of the slipping in your mouth, the texture of the softness of the leaves of the vegetables you put as a salad, as a slipping and sliding, is the AA, is it life?

It gave its life for the leaf to absorb from it, to feed itself. (:44). Again the AA, the slipperiness is the amount of the AA, the fat, which sits on it. You actually don't get much from the content of the P of the leaf, you get from what fat, what AA that is on the

leaf, that converts into energy of the AA of your stomach, and it becomes part of your energy. Wash the leaf much harder with more detergent and you take most of it away. But you have to eat more of them to compensate for the physical D of the ?? vegetable.

The leaf has used the AA to absorb energy from the U to itself, that it guarantees life. But why does the leaf get crumbled, and then destroyed or whatever. Because that field strength creating the fields between the 2 plates changes, and the AA strength is not there to compensate for that strength, that it goes yellow, and then you cannot compensate it, it becomes dry, but it still carries layers of the AA during its lifetime. So it has absorbed energy from the environment to survive.

It never ate, it just created circulation as we have in our CO2 Box. Now come to you as a humans. Hello, (:46). have you just come out of the shower, wipe everything with the best shampoos and the soaps, the most expensive ones to wash yourself, to feel clean. Why do you do this? Why do you feel good when you wash your face and hand you're your body? Because you remove the AA , which your body has absorbed from the environment. You call it, "my skin comes out," and you wash the (old) skin off. But what was on top of it before you washed the skin off? That AA of the atmosphere. The 80% of the extra food absorbed from the environment, partially has come from the AA. Next time when you are sitting and playing with your forehead, and you see it is a bit greasy, and a bit oily, say thank you for feeding me. The AA is the essence of the fields, which gets absorbed by the body inside. The composition of the fields of the work of the blood and the brain, they taste what AA gets absorbed on your skin, that its energy is needed for ??

Wash yourself better, absorb better. But why do we grow old? Why do we change? Because the heartbeat, the P changes and cannot absorb the same AA strength as before. Now you are collecting a compound of, a deviation of. It's that deviation, gives you the old age skin. (:48). Because it has to cringe and make more surface area, and you get crinkly skin, that it absorbs more energy for the inner organs of your body.

Now you understand there is no difference between you and the leaf, and your CO2 Box. You all are absorbing energies from the environment, composite fields of this planet, which is the essence of the creation as the AA. Now you know where your 80% comes from. Wash your face with better soaps, and wash yourself with different soaps and do whatever you like. As your soul has a composition of different AA, it changes, that you receive variation for awhile, till that balances, you go back in again, till you wash. Now you understand how the knowledge of creation (KOC) in man is so back to front.

Then look at why you get temperatures, look at why there is a limitation at 42 or 44 degrees, you start having the loosing of the brain cells, and all sorts of problems when you pass such a temperature. Because at that temperature within the structure of P of the body of the man, AA compounds change position, and if it goes too high, they open up to create the same position as with the fish, as with the what we call, covalent bond, and the cell cannot hold onto.

Now we understand the essence of life from the plasmatic M field position. (:50). In the condition of the EU, I transferred the energy of the AA in a given way, directly into the direction, inside the body of the man, not waiting for it to stick, as what we call, the greasy skin, and then going in as what it needs.

I was talking to a KS recently, he said, you know these creams have a lot of Zn in them. I said, yes, because Zn is the link of emotion. Isn't the skin of man in the middle layer, where we feel everything, all our emotions, how get touched, we are pinched, we are caressed, we are beaten. You deal with a skin condition, you have to have a Zn, because it is the combination between the Zn and the soul composition, which gives you the emotion connection, field strength to the brain .. and to the STM.

Now you understand when you come to skin problems, I always give you, use the CO2, the Zn, and the AA of the Zn, and AA of the CO2. You look at the CO2, but how can I make the connection with your skin, when you don't put my fat on it, the AA which came with it, that it matches your skin. Mr. Keshe, "it worked." It works, because we understand the process of creation. We understand the process of interaction of the fields. (:52).

Now with new T, with new emergence of the knowledge, we bring new D. We bring new know-how, we bring new T, because now we can create stones, which absorb certain plasmas, certain AA that, that AA in the stone, can create a condition in the body .., so we given you a stone to put in your pocket. No, because we know you are a human, you need to be connected to the AA of it.

Next time you women or men, you touch your diamond ring, you touch your silver earrings, and necklaces, don't clean them, don't wipe them, smoother them in the AA of silver and see what feelings you get. Smoother them with the AA, of what you have created in the metal, and then you'll see the jewelry will have different meaning. Most of you will take it off, and you'll never put it on again, because that hunger of possession in that field strength is satisfied in D of the direct field. You don't see a need to wear jewelry, because in essence you create to feel within you, that you receive it without the need for it to be there, that it absorbs some of the AA. Many of you have seen me for years, I wear nothing, because these are possessions, (:54). and with it I everything, I don't need attached to me to have something else with. Then you satisfy the needs.

Then you understand why you even talk about the AA, because look at the combination of the Pl of it, a complete cycle, sustainable in every D, even you dry the fruit, the AA is still within it, because it can change its composition. It just needs energy transfer in a given direction and D. That's why we water our plants, to create that connection, that the AA in the environment can interact with it, that it receives energy. We put seed in the ground and it grows. Why, what's the essence of it? The earth ?? fields are filled with the strength of AA. Now we bury the seed and put the fat on it. It receives and it grows.

We did tests in China with the Chinese KS and the officials watching it. They never understood how I played the game. It was very easy to see they have not understood a

little bit. It takes 11 days for a tiger nut to show the first shoot, takes another 4 days for the shoot to split, and every time you get a new shoot, you get a new seed in the root, that it has to feed that shoot, (:56). so you get cluster of tiger nuts in the ground. You put a fertilizers or whatever after 15 days, you get 2 shoots.

We understand the knowledge, we add a specific way, AA to the seed, we shoot in 4 days, we split, and by the 15 days we are a few cycles and shoots ahead of. What it takes a farmer to do in 3 months, we do in less than a month, because now we have put the condition of ?? This is the knowledge of understanding the process of creation, then you can play with it. Then you see how the magic of T manifests itself.

In the next week or 2, KF might have a huge surprise for KS in the D of new T, our T, which has been expanded by KS. Those who are privy to the inner work of the KF will tell you, we all are sitting for one of the biggest magic's in the world of science and T, which the KF most probably will deliver new materials, new T from our website. (:58). But not this time from KS, but the world of economy. You still can have a few pieces to test, but we come in conjunction with those who have developed our T in the background into a big step. If the things happen the way we hope, then you'll see, maybe by the next Thursday, massive injection of the new T, new products, into the international world of people, who have understood our T, and taken it a step further. But they are humble enough that they want to share, they want to bring it back out.

Because in the same process we still use the AA. We still be able to give a room to go in, and walk out and say, "I am not hungry, I don't need to kill." I am satisfied, because everyone understands, that this room is the room to share the beauty and the energies of the STM and the totality. We are entering the next phase, and it's time to set the STM collectively to come together to that position. The change will come when we all understand the T, not by one giving and all of us, "monkey sees, monkey does." (1:00).

It is, the process of understanding, this is why the teaching of past 2 - 3 weeks has been this way, to bring you to understand, .. to be part of, to bring you not to copy. Yes, we understand this. We are part of it, and as part of it, we have to understand the process.

Now you understand the connection between the soul and the P, and life of the man? When that AA is absorbed on your forehead and you see my head has gone greasy. Hello, have you understood what has happened to you? Have you noticed by coincidence how much your emotion and your feeling changes, absorption of knowledge changes by greasiness of your hair, by greasiness of your skin, and what that greasiness is the AA, not coming from your skull as you think, is coming from outside you, because now you are that CO2 Box. What emotion do you create within the brain, that calls for this AA?

Now you understand P has a different meaning. Now you understand our structure is a complex systems of just creating conditions to absorb energy from its environment. (1:02). You thought the greasiness comes from your skin of, my dear how far wrong have you been. You have created it inside the fields, exactly the same as that CO2 Box. The

liquid inside the CO2 Box is your blood, circulates, creates a field strength that calls for that AA.

When I am in Japan, I don't have a greasy hair. When I come to Europe my hair becomes greasy, I don't know why. Because the Japanese culture and the way they pay you attention, and the way what you eat in the physical D, does not need greasy hair for you to absorb energy from the space. It's that ?? food with the fish, where the Sushi and Shizu, and the rest of it. Here you don't (get that), but the brain and the soul still needs that feeding of it.

So what do I do, I call it in, I create the energy within your blood to call what I need, it becomes greasy hair to you, but actually it is feeding energy to you ??. But at that process, now you changed to satisfy that need, other things in the body don't match, and you get a cancer of the greasy hair, cancer, because you don't get that cancer in Japan, because you already been satisfied by it. How many different types of cancers through emotions and the fields, now we attract and create, due to not understanding the work of the field of the U.

Would the KS in the coming time, (1:04). create soaps, which gives that filter for absorption of the certain universal field, that makes man wise to understand the knowledge of the U. Quite possible if you are clever enough, if you understood the T.

When you start going into the EU. John is pushing, he says, I want mine as soon as it's here, this month, has to be. When you go to EU in AZ in the next few weeks, and John is happy to show you the latest T in the space development. Touch your forehead and see how greasy it is before, and how greasy it is after. What kind of grease? AA. Now you understand.

John is about to receive his units in the next few .. weeks, most probably. The first of the Vision units. I am sure many KS will behave and treat it like Mecca, to go and just see and sit in it. If you don't it, sitting in it doesn't bring you any feeling. If you don't sit in it, and when you sit in it, you feel emotional, what have you satisfied in the strength of the AA of the fields of the brain in which part? You fit yourself with the boots, with the fruits, with everything else which goes with it, toots. Because you never understand that you are just absorbing the AA of. Now we control that AA, we control what is leftover, that you are absorbing from the fruit or the animal, with the systems we give you, that you don't need to kill. (1:06). It satisfies the need, and with the need satisfied nobody shall kill.

There is a beautiful .. town in Sudan. It's observed by the UN. When I was explained this by the officers of the UN, that don't leak it out, you have to find it, there are some references to it on the Internet. In this .. town they create, like a roundabout, or corners with 2 entrance doors on 2 sides of the street, it means you can enter this building, from 2 and sometimes 3 sides. The purpose of this is to satisfy a need, that, that does not lead to an infringement for the other things to commit a crime with. A man or woman, who are lonely and would like to have a physical interaction with another, they go into this, from

one door, or the woman comes out the other door and they satisfy the need. They go out from that door or the other door. Nobody sees who came in, or who goes out, who is with what, satisfies what. But it satisfied a need in the society, that it stops the prostitution, raping of the children, and everything else, which the community in the West suffers.

UN keeps a lot of documentation about a lot of tribes and their habits, and this is one of them. (1:08). If you find into the UN archives and knowledge, a lot has been gathered. I had the privilege to be able to access some of this during with my work with them, because they knew what I am looking for, how creation and the Creator, accommodate each other.

How there is a tribe in African which there is no sexuality until puberty, and at the point of puberty, they switch to what is short in the community, and possibly short in the next 10 to 20 years, need more boys, or less girls, and there are too many .. their soul decides. Operation of the soul of the collective community decides, what gender we're going to have. How we create more boys, or we create less girls, or we do things because we estimate it will be enough girls or boys in the community. What did these people do? How did they elevate their souls? They don't make a decision, they don't go there, I want to be a girl, I want to be a boy, their soul decides, psychosomatic. We had matured to that point, why did we loose it? If a race of us has matured to at least that point, we should have had it too.

When you imbalance the situation by force, you have the problem of, in the Chinese community of today. We have 20 - 30 million extra boys. When it came to 1 child per family the Chinese girls are taboo. Boys are wealth, because when they get married, they bring money in. What did they do, they found out, if it's a boy or a girl, they abortion the girl. Now we have 20 - 30 million, (1:10). Chinese boys who cannot find a partner. Wouldn't it be better for the Chinese government to understand operation of the soul, and soul's satisfaction before we need not to grow, the nation cannot give. Instead of forcing papers into the parliaments and the councils, teach the nation the need of it. Will that not ?? done, the same things as the Africans did. Isn't this another way of population control by man to decide, what we have, what we can feed, what we can produce, and now that we can feed from the energies of the U, why are they telling you are under populated by 7 billion.

Would our race start creating a new cycle of children of the soul, that as more of us depart from this planet into the space of the U, we have enough to support the life on this planet. We don't become empty villages, where everybody has left for town, and it is ghost buildings. I traveled through one of these ghost areas in past few days, it's amazing, houses which are ?? devoid of life, hardly, nobody.

Mankind has to understand from now on what his soul does in respect to his society, not just himself, and how he can adjust it, like the fish, that they understand without touching each other, but they keep the space, through the space of the fields of their souls, that creates the strength that keeps them distance, and no accidents.

Isn't this the way the new cycle of the KF Flight system (FS) will work. I told you a few weeks ago, (1:12). there will be no banging, there will be no accidents with the new T, because it even feels the soul of a child standing on the pavement wanting to cross. It's a new T, it's understanding the T of the creation, which brings a new dimension (D) to the Knowledge Seekers (KS), as seekers of the knowledge of the plasma (Pl), we have to understand how our bodies, how our life, has physically positioned itself to create a condition, the color of the eye, the skin, and everything else. I don't want to be in NY, in Harlem with a white skin, I don't feel good. So when I go to Harlem I have a black skin because my soul feels, my physicality (P) is okay, but still have to wear the watch, a gun, and the knives, because I have to learn the culture, because I use my soul, my soul understands the culture, I still feel safe. So shall be when I go to planet Zeus.

Try to understand the operation of the amino acid (AA), the teaching of today is to understand the transfer of the energy, where that 80% comes from. Don't forget some of the energies we create within our soul, to absorb the energies of the U, do not necessarily end up as AA on the skin, that is just for the emotion. Some of them transfer as AA inside the cell of the body .., some of those become neutrinos, because they just give enough energy, I don't need it, but just need it to go through (the body), and I absorb what I need, for creation of specific energy fields, in the strength field of the Soul of the Man (STM). Man does not create it on this earth, the atmospheric condition of the solar system (SS) doesn't allow it, (1:14). but I need it for my life.

Now you are understanding the teaching of the past, why I said we absorb ?? Carbon 14 fields from the U, because we don't have it here. but the soul needs it for its existence. It's that, what I call, vitamin H, or in some cases I call it, the X factor in process of the creation. Because the vitamin H is the health field that does not exist for man on this planet.

That's why when we travel the depth of the space we receive those field strength, what we call vitamins, that satisfies the body .. , the life of the man, then man does not get cancer, because he absorbs it without the filtering of the atmosphere, .. SS, .. the galaxy.

As I said to the IAEA very directly, recently, I can create nuclear material out of water. What are you trying to restrict us. I can create Gamma rays, I can create whatever, cosmic rays from just a glass of water. Isn't this what I did, that the damn forsaken nation of Belgium put me on as a terrorist, is because they said, the only way he can create grapheme is only, through the use of Gamma rays. Did I use Gamma rays? No. (1:16).

I created the field, that within the structure of the C, allows C14 which is the backbone of creation of the fields of the U, in the radiation level to be created, and man has not even understood how to create C14. Because I have the KOU, I understand the interaction of the fields. Hello, H2O. Hello, 16 (O) and 2 H if I can change the 2 H in a specific way to Deuterium, which I know how to do, doesn't it leave me a C14.

Now you understand, Belgium's did to me, made me a terrorist, a criminal. Didn't they do that to the guy who said the earth is not the center of the U. They hung him in a church in

Pisa. Now you understand? Now you understand how the lack of understanding, and ignorance has become the Medieval Ages with the damn nation of Belgium, with the criminals and pedophiles, where the object is to abuse the body and the science, body of the children. We gave to mankind, (1:18). the most advanced T, and what did they do, they made a criminal out of us. We punish them, by not receiving the knowledge. They dragged it for 8 years, now we open it.

Understanding the knowledge is more important, than trying to use the knowledge, because when we understand it, you apply it when we can. But you have to know how to use it, you have to know what conditions you create, that leads to what you need. Orientation of the C14, in the interaction of the fields of the U continuously creates the fields, which leads to creation of the cosmic rays. When man understands this, man has cracked the secret of creation.

For me, as a passenger of the U, it's an alphabet of the vocabulary of the science. It's actually the A of it, because without it you can't have the B. But you have not understood it. A pedophile policeman makes the biggest science in the work and life of the man, a crime. And then they sent a woman to make sure the scientist is killed and they can do what they like.

You got to understand the knowledge of creation I have given you, in the creation of the CO2, in the CO2 Box, look at it. Why did I give you the first box as a CO2? (1:20). C12, what did I just explain to do with the O, with the presence of the H. Haven't I given you C14 without you understanding it? I have given you the basic alphabet of the creation and in the world of the Creator. You are still, "what happens when you put the CO2 in, and you get this and it doesn't work." Go to the structure of the body of the man, you call it B12. Can you create, or B9, Folic Acid, "hello I am pregnant" you need Folic Acid for division of the cells, it comes from radiation. I have given you the radiation creation in the fields of the U. You are still entangling, what would I do with the AA, what would I do with the creation of Gans CO2. If you understand this, I have given you both the knowledge of the earthly knowledge, and the KOU in creation, in your CO2 Box. But you don't have the knowledge. I have been doing this for years. When is human going to see what they got?

Go and see the report of IMAK which says, they have detected graphene on the first parachutes we gave it to the government of Belgium to test. They said this is using a nuclear Gamma rays, (1:22). and Keshe is a terrorist. Damn the nation, that has held the humanity back by 10 years. I'll l see an end to the nation of Belgium and the blood of Belgium on this planet, because they have done enough damage. Not only to mankind but to the children of the man. This race should have never been created, and should not have brought so much hardship to humanity.

When we wish the end, we process it, that it will come to an end, because the rest of humanity has to move forward and live with the pleasure of the knowledge. You know when I explained to you before, that we come here to taste, to test, to understand, and I had to come here to understand, this process of the humanity, which lives within this

blood, and now we know what to do with it. We elevate it that it doesn't exist, but elevate it to the doldrums of the U, not promotion it to a higher, because they have to learn. Listen to the teaching, you'll become a dust in the soul of another, because you have not matured to understand.

Go back into the .. original teaching, go back to understanding the Gans Boxes we gave you. Understand now and look at it in a new eye. In the D of the universal knowledge, not in the D of the man's knowledge of plasma. I have given you the biggest gift in the knowledge of humanity and the U, if you know how to use it. I gave you the Nano material for conversion, (1:24). I gave you the understanding of Nano T from the matters of itself, to understand in conjunction with the others, you'll create the conditions of existence.

Now you understand the secret of the knowledge to connect man to the universal energies, is your CO2 Box. Go back to it, and redo it, but this time, don't look at in the D of just a CO2, look at it in the D of the fields of transmutation and division, in the universal level, then you might see what will be achieved in the EU, in getting man into space.

Do I need to elevate the whole body of the man to go with, or do I create a condition of the C14 in the level of the D of the position, and the place in the U, that I can deliver the soul to the point and the position, be it NY, be it moon, be it Jupiter, or another D in the U.

The T of today is so mature. What I have taught you is so complete, that if you understand it, man will not stay in the D of the physicality to suffer. You have both, the 2 key communication lines of the U in your hand. Go back to my teachings, go back to all the medical teachings, go back, every time we touched about the health of the man, we said, C is a connector, (1:26). is the line of communication. Macro and micro.

In the D of P of the man, you have C12, in the D of the universal, you have C14. In some parts of the U you come to C16, and in some parts of the U you come from C8, understand why. What is the proposition? What is the understanding of it? What fields does it create, that allows the composition and creation of sustaining a Pl, we call it life.

Now you understand how fundamental the knowledge is, and how much you have been taught the .. human, earthly matter state, but at the same time in parallel, you had the knowledge of the universal communication, and process of understanding.

This is part of our work, and I just see Rick posting something, it says " C14 Balances … " I don't know when this is published. R: it says May 2019 KF Plasma Times.
K- It's part of the teachings, so you see we have not missed, now you understand.

Now you understand the key of man to become passengers of the U in any D without P, is your CO2 Box. (1:28). You have P, it has emotion with it, I gave you creating think

Boxes, you have muscle tissue, I gave you Cu Boxes, but originally I gave you the key to connection between the universal and the earth matter state.

So now when you go to another D, when Zn doesn't exist, but it could be platinum, you make the Gans of platinum, you have the emotion of the space and time. Now we understand how simple it is, when you know how to walk, you can dance and jump. You can dance with the beauty of the knowledge you have, and you can jump from one D to another, from one nation to another, from one race to another, one position to another.

Now we understand why I said, the teaching now becomes to understand the interaction of the both. What you need as an energy to extend the elevation of the soul within that structure, and what you need to give in the structure of the P to create that promotion. I am a master of the teaching.

As I said in the teaching of Tuesday in addressing the UC, we are the Messengers from the depth of the soul of the Creator and we have the full knowledge. It depends what our audience understands. When you are in the nursery you go blah, blah, .. for the child to understand, when you come to the first year we give you the alphabet. (1:30). When you go to the university we show you the bigger picture of the knowledge. When you graduated with the KOU, we teach you the process of the graduation to be able to access. At the moment we speak blah, blah, because that's what the man understands. With this teaching are bringing you to understand the ?? plasma, and we are finished with blah, blah. Maybe we get a smile on your face. Now we can smile as knowledge, I understood what RNA is and how I can use it.

Today's teaching is again connecting the energies of the U, understand it. Remember that AA on your skin has a C connection. Do you want it to be C14, do you want it to be 40% C14, or do you want it to be 10% C14, and the rest C12. The C14 side elevates your soul, C12 still feeds your P and connects to your other D.

Two people have crossed the line in the KF in the past years, but they never understood it. One is Alex in Nigeria. He touched it, and he jumped it, because he was too busy seeing too many interesting things. He was in the Zoo with too many animals, he got carried away. The other person walked in it. but he walked, and I felt "he is going to hit it today." Was John in AZ. None of you, I have seen any progress, even coming near to this knowledge. (1:32).

We had 1 KS in South China Sea, who has understood most of it, and they castrated him. I spent 2 years with him in South China sea, and working with him. He is the only KS who understood KOC. I want to know when you as KS become as knowledgeable as him to understand, how they are going to castrate you. Only 1 KS out of millions of you has attained the knowledge, fully in a worth of let’s say 40 to 50%. He has no education. Alex is the next one. People who have no blockages of knowledge from the past with the degrees and PhDs, see it through their life. Those who have, and read something, try to fix it to what they have read, so it doesn't work.

The biggest crime the Chinese government ever allowed to happen, was in respect to this KS. He would have opened the door of the knowledge into the Chinese community beyond their imagination. I made the Chinese flying system with him. (1:34). I shared the KOC with him. We built the flying systems. There was no talk, when we loaded, he was there, he knew exactly what needed to be done. He knew how, what fuels were needed, all on the table. I said to myself, amazing.

Because it does not need PhDs to understand. It needs the clarity of the knowledge to understand. Try to understand the knowledge with the clarity of his essence, not what was written in the book of the man, who has slaved the man.

I hope today you learned how the connection between the STM, the P of the man, in the environment comes together. All this you have done many times. Now you can connect it. It's understanding, which matters, and if you understood this, your MaGrav systems, which you have been looking for, would absorb the energies from the U, and converts it into energy through the line of the connection of the C within your system, (1:36). to your MaGrav system, you have your generator. As long as you want to connect the wires and this and that, my friend, still carry on playing.

Go back in the books, in one of the books we have shown the parachutes. In one of the books, we have declared that graphene is made in the parachutes. We forced them to give us the Raman Spectroscopy of the confirmation, that the C12 exists, and the graphene is within it. This is why I gave you the coils, this is why I gave you the MaGrav systems.

You have to learn how connect the MaGrav system to convert, to absorb, to create C14, on the coils, that it can absorb the connection to your system, as a C12, as energy you are looking for. Now you understand, I gave you the generator? Please those of you who received MaGravs pay the balance to the KF.

This why some of you who made MaGrav systems worked, and you have a good energy, power reduction, and some of you, "does not work." Those of you who have managed to do, if you look at the coils, the number of coils, positioning, everything perfect, (1:38). because you create a spectrum of the C12 field energies, C12 is not singular. C12 has a spectrum field energy, millions of them, and the reason for coiling it, is that purpose, to be able to. But the main object of the whole thing, that we gave you from the beginning, which the Belgium's made it a criminal offense, is how have you managed to create enough graphene on your coils?

Mr. Jalal your secret MaGrav society is on the run. You wanted to make the MaGrav system, but you didn't understand where your engine is. Now I gave you the engine. Creating C12 on the Cu coils is one of the easiest things to do, if you understand how.

Now those of you who claim we haven't given you the generator and Keshe is a fraud. My friend you are as fraud as Belgium government and its king. Because you didn't understand the knowledge. Belgium's confirmed from day 1, that I have created graphene, and I created C14. These are the source of the energy absorption.

That's why on my parachutes, when you see the box, the original ones, you see energies, floating everywhere. Do you remember the Einhooven Exhibition conference, where I opened the Box, and I said this is the empty energy box of the U. What was hanging on the doors? (1:40). of the container? Cu Nano coated parachutes for nailing the roof.

Because I created a box with graphene and C14 on the layers of the Cu, that each one absorbs different energies from the U. I took that, and I made it into the coils, and I put it in your MaGravs. You have the what I call, the vortex of the combinations of the C12 energies, and C14 conversions in your MaGrav systems. Excuse me sir, your fraud is not understanding what you have, and not the T. Denying does not bring clearance.

Reconsider, now again and again, how you Nano coat, and how much C14 you can create on it. Now you go back to why we said, do not N coat with fire, or (but) Nano coat with caustic. My friends, Rick can you put the chemical composition of caustic on the screen.. and then add a potassium (K) to it. I have given you the C14 generating system. (1;42).

… Bring the potassium (K), if you read one of the papers I keep on pushing K, because K is , you got some of K in your toilet cleansers … The barbeque cleaner has it, .. it says K content. ..

That K due to the K40 which is the reference point in the division of the 40 to 42, gives you 3 C14. As a reference point, not as a producer, which allows your O, with a combination of the Nano coating to convert a Cu. Convert a Cu atom, into the combination of itself, to the division of the isotope plasmas of C14.

Now you understand why 56 which Fe, is magnetic field of this planet. It's the only way which, the inner fields of this planet interacts with the C14 of the U, to create planetary systems. (1:44). Because of its position and its D. Each planetary system goes for the same way, to tune into the C14 radiation field of the U. That's the only way we keep connection as M field in the Pl form, as is communication in the body .. C is a connector, communicator. In the plasmatic field of your magnet, is C14 connection, that's how your fields, within your magnets, within the planetary system work. It keeps in contact with.

When the knowledge of the man extends to be able to measure every single fields coming out of your solid magnets, or planetary system, you will see that connection. It's your C14 isotope strength, which dictates, you'll become a cell of the heart, you become a star in one position, or you become blood in the circulation in the body of the man. That's why you have that C in everything.

That's why in certain position of the body .. fields are created like in Thalamus and Thymus, that allows the creation, conversion of what we call, the isotopes of any elements according to the field strengths of the C to be given, that can convert a matter from one to another. When you lack K, or Phosphorus in your body, where does it come from? Through the 2 glands, cooperation and interaction, (1:46). in releasing the cosmic

ray fields, gives enough energy for one matter to jump to another, to satisfy the need of the body .. or to take as a G field in the C14 connection, to complete it.

That's why man living in the North Pole, an Eskimo eating only meat, still produces every other material it needs in its body and the man who is a vegetarian and eats one kind of food, still the body converts. It's the C connection with the support of the glands, which create that condition of radiation, what we call B12. B12 is a controlled conversion between C12 and C14, and allowing the conversion with the C, to change combination and transmutation of the elements in the body .. as a Pl. That's what the body has done for billions of years. You are short of vitamin D, the body makes it, you are short of Ca, the body makes it through conversion of the AA connection of the body .. ….

Have a look at KOH, and NaOH do you see the O and the H next to it. (1:48). If you be able to control this connection with the H2O, with an extra O and the H and N, in plasmatic, and not a chemical interaction. You allow one of the O to change into graphene, or to change in C14 of the C12. Then this becomes a divider, a supplier of the division of the fields of the other elements to create transmutation between one to another.

Without the presence of the C12, or the energy fields from the C12 source, transmutation in the plasma conditions is impossibilities, especially if it is going to be repetitive creation of the same, and the body f the man continuously creates repetitively a cell for a given position in the heart, a cell for the given position in the foot, and remembers what it needs, because the emotion of the soul, of the emotion of the cell, in that point in the body, in interaction with the cosmic ray created by the C14 in Thalamus, allows the conversion as sustaining of that field in that position. I am a genius when it comes to explaining to you, but you are a genius more than me, because you understood it,

The secret society of the MaGrav community of Jalal and Hasan and the others, back to the drawing board. Find out how you create C14, (1:50). on yours, find out how you create graphene on your Nano coils, and then you find the source of the energy as universal energy conversion.

But there is a proviso to this. The one you give the MaGrav system, if he is to use the system to benefit, to give from what he receives, the system works. The one who is there to cheat, "oh, I bought a MaGrav system it doesn't work." Because now you are working as the man in the middle of the (school of) fish. the intentions are clear, I want to be, the benefit to give. Now you understand in the world of the Pl, it has to be correct in every D.

Thank you .. for today's teaching, I hope we learned a little bit more, and we created more mayhem for those of you who understood it, but you couldn't place it, and it's a lot of blah, blah, to those of you who are just listeners and you have nothing to do with it. I like to go to sleep with the voice of Mr. Keshe. I will create a copyright for putting people to sleep, by listening to me. But one day you pay with your soul, and you enjoy it.

Thank you … now you understand how you bring both the soul and D of P in the D of transportation and transmutation, in understanding the first basics we started 10 to 15 years ago. We go for a break. Sorry Jalal I threw a lot of things out of the window you have been working for. (1:52). But you got a gorgeous team. Go back and understand and you'll have the biggest power station in the U. …
I gave you the true universal generator, and if you change the C composition in your Cu, you can create even energy on the planet Zeus.
Thank you we go for a break.

Proofed to Here >>>

>>> BREAK >>> 421 KSW Feb 24 , 2022 (1:58).

K: .. I don't know if we can .. whatever we give is not good enough.
R: You certainly gave out a lot of information today and knowledge
K- Clarification .. Do we have Jalal on the first row. ..

Q: .. What is the relationship of Silicon which is 28, to C14, it's also a double of C14, is it something we can take advantage of, because it's a readily available material. (2:00).
K- yes, but don't forget if you touch the AA or collection of AA, you have the shiny softness like a gloss, the softness of our cells when you touch, like neural system which is communication line, is partially interaction of the fields of the When you come to neural damages, you always have to use the Gans's of Silica, but you have to understand how it works, .. it's transfers .. because it is like a glass it transfers energy, and the thickness of it, .. composition of it in the neural system, creates the .. transfer of fields from one cell to another, it has a huge role to play, but AA themselves created it, they create that. You don't need the Silica, you need the fields of Silica to give that glossiness, the softness, that floating-ness, but still containing it with a full, .. transmission of energies. Silica is one of the .. as an energy fields of the Gans, one of the fundamental plasmas in the body .. (2:02). You have a huge amount of it in tendons. When you have a problem with the tendons, when you damage it, you always need to create a certain amount of ?? silicon in the AA strength. You'll find out the process of connection, what you call, ?? mumicatoin and connecting and producing something else, increases quite drastically, when it comes to ligaments and tendons. The layer which you have on the skin, of the bone, Silicon is one of the main attributes to it for separation but still keeping it like a glass container, the skin. the separation of the skin tissues when you take a muscles and you see it's got a jelly-ish material, most of it is silicon , because

(2:04).

(2;12). you want to have a healthier understanding of your emotion and you want to enjoy yourself, try to use the facilities, and I am sure we'll see more of them. One in Tehran, and in … in Germany ..

Any questions.

Q: Micah Green … brand new T coming very soon, … of what might be to come?
K- We prefer to keep this until all the contracts are signed. This is a legal position, extremely (2:14). Hopefully, once it is concluded KF automatically become a 3,000 scientists organization team in research and development and commercialization. We are still in the final positions …
It's a massive change. Thee are the KS of the KF used, it will bring a lot of changes …
We have to sign this agreements ..
This team as 1 group ..

(2:16). will change. They have worked for years developing these things using our T.

(2:18).

(2:20). Largest manufacturing in Europe ..

(2:22).

Any other question?

Q: .. Is it correct to say the fields of the physical man, the correct fields of the STM, and the field of the MaGrav system, together generate an energy generator?
K- Of course it does. This is what we said from the beginning. You just understood, that's good.

proofed >> (2:23:30 to 2:37:07)

R: We got a question about Ukraine.

Q: Question, 6 months ago Mr. Keshe said, we as KS ended all wars, now we are on the verge of a war, that might lead to WW3. How would he explain what's happening in Ukraine?
Q: . Whose decision is it to kill people in Ukraine. Is Putin's soul deciding those who die. (2:24).

K- Let me explain something. We don't have a war in Ukraine. I explained this very, very clearly in American teaching a couple of weeks ago. USSR never died, Russia as a USSR was never dissolved. Each country went on their own and they called themselves what they liked, but the nation and government of USSR was never dissolved. Ukraine is still part of USSR. It's not who decides, it's the USSR as a collective nations of what we call, the bigger Russia, have decided they are going to keep their property and their territory.

This is a Vatican war. Vatican tried to attack, tried to take over the Church of Russia, which is even richer than Vatican, and they could not get into it. The Church of Russia has asked, as the administrators, as protector of the Church, the state of USSR, headed by Russia, and other nations of Russia, other 12, to protect the motherland. America will never go into war, because they know they are just barking like a dog, as I call it. Russia has the right to protect the assets of USSR. This is what they don't tell you in public.

Vatican is financing this push, and there will never be a war. We said, 99% weeks ago, that Russia will go into Ukraine to protect the motherland, the USSR. Russia is not invading Romania, nor Bulgaria. (2:26). Russia is keeping the structure protected from the push of the Vatican through NATO, to push, pressurize Russia, that they are open on the backdoor, the Church of Moscow, or Russian Orthodox Church to become assets of the Vatican.

Get this very clear, doesn't matter what you hear (in the media). Russia has not moved into create a war, Russia has moved into territory, which belongs to it, as USSR. Americans will bark because they know they are wrong. The Europeans will bark, they know they are wrong. And there won't be a war. This is not a war, this is correcting, in what done later, becomes civil wars, in Belarus, we saw it in Chechnya, and the others. Vatican is trying to push, using NATO as their slave, to push, that we go, we go into Ukraine, we put forces in there, or you give us the Church of Russia. It's not a war, this will never be a war.

If you look at it this way. Is there a war if the America takes the Marines from state of California to another state. Is there a war? The war is what happened in Ottawa in the last few days. That's the war of slavery, by their servants.

If you know the geopolitics, (2:28). Americans don't have the field forces, unless they go high level bombing. You high level Russia, I said, Russian USSR military forces have said, "one bomb out of Allied Forces on Ukraine, they'll flatten out New York." That's the territory of. Americans can bring sanctions, no problem.

What's going to happen, this is the pattern we've seen over years. Russia will move in, they change the change the government, they take all these leaders who started becoming rebel solider, and what you call, opened business accounts, and huge money in America and Europe, they stole a lot, raped the nation. They'll escape, or they'll take them to prisons in Siberia. I have been to one of them, I know what they are going to do with them. Then after 30 days, or 60 days, or 6 months, Russians withdraw, they instate a pro-Moscow understanding of Orthodox Church of Russia, and then the barking dogs will stop in 12 months time. There never will be a war. Cannot be a war.

Moving soldiers to protect the motherland, same as you want Arizona and other states to be part of US. You don't let the Canadians or the Mexicans take it. It's the same with USSR. This is the problem, which was sitting for years to come up, and now has come up for a second time.

Intrusion by Vatican, using military forces of NATO on this side, has caused this problem, but there is not going to be a war. This is the motherland protecting its child. Russian has spent trillions in Ukraine. (2:30). As I said, when your children try to go, and you let them go, it doesn't mean for the others to rape them. The motherland protects them. This is what we see now, and this is the correction in the political dimension in Ukraine.

It's not going to be. If soldiers get killed, for whatever reason, we've seen it happening, this is part of the what we call. You have to look at it from the Russian. I have been very close to the Moscow, .. and affairs of the politics in Kazakhstan, and Moscow Russia for a long time. I don't support either policies or governments, but I stand very clear to see the reality and the truth very clearly, where it sits and how it sits.

Ukraine today is still part of USSR, the Russian parliaments, and all other parliaments of the 13 nation satellites, should have dissolved the USSR, this would not have given the USSR, under instruction of the leadership of Moscow. Even if it wasn't Putin there, it would have been somebody else, you would still have this position.

Vatican, you got to understand Vatican did the same thing with China. All that uprising we saw in Hong Kong was the amount of the financing, diamonds, Vatican sent into GoJo, into central Asia to create with the black people of China, problems, literally they came in as priests with bags of diamonds, they sold it in China, to start a war to divide China. China was aware of it.

I know this exactly what is happening, because we are part of the peacemakers, we know what is happening with the governments. (2:32). They isolated it to Hong Kong, and they financed Hong Kong to break up. We saw how the wisdom of his Excellency of president Xi of China brought this under control. All the mayhem we saw, all the pushes of the west in Hong Kong, was financed by Rothschild's, and by Vatican.

One of these Rothschild's guys was in the KF 6 years ago. They penetrated the KF through Rothschild's to destroy the KF, at that time we had a big breakage in the work of

the KF, and the number of KS disappeared, because of it, was the same process. Because we know one of the Iranian guys was connected to Rothschild's, thinking I am Iranian, they can break in through, but we were watching it with the work of the intelligence system. Go back to 6 - 7 years ago, and you'll know exactly what I am talking about, without mentioning names.

Then with our work with the Chinese government, it was isolated, they were aware of what is happening, they got .. the position sorted. So they went to Hong Kong with all the fight. You cannot imagine how much diamonds Vatican brought from Africa with the priests, they brought in, went to China, to create the splitting of the Chinese state. Exactly what they did, but this time, we were aware, the Chinese were aware, and the system kicked in, and isolated it in HK, and you saw all the battles we had for months, and now do you hear anything? All those leaders who got paid by the Vatican are in the government prison in China. We see the same thing now in Ukraine.

Vatican and Rothschild's are killing themselves to destroy the peace, that they have the control, and it is not happening. (2:34). I have no worries, this is not a war, this is ??? you see a few dogs barking, ?? let us see. In 6 months when it is stated back to where it should be, the present people will go on the streets, come and jump, which they get benefited by the NATO, and the what I call the free slavery of the Vatican inside. They shout and holler on the street, otherwise people of the Russia and Ukraine know exactly why, the Russians are coming in.

Just because you left the side of the fence in your garden doesn't mean the dogs can come in. You put a fence up and keep the dogs out, and that's as simple as that. They can bark behind the fence as much as they like. There shouldn't be a war, unless something goes crazy with somebody in the west. We don't see any.

I explained that in the American teaching very recently. I have been part of this process for 40 yeas, and I worked the Russians and the Chinese for long enough to understand what is their point of view. Yeltsin once said, Mehran has slept in more beds of the presidential offices around Russia than I have. Then you know how close we are, and how much we understand, and the T of the nation and the feeding of the nation.

It is not going to happen, it should not happen. First of all Europe doesn't have forces to match the Russia, secondly, if they push the pipelines will close, you don't live in the west, in Europe. (2:36). Winter cold time. The Russians have chosen the best time to do. We close the pipelines the prices will go up, the Germans and the rest will freeze, and their nations will go on the street. It's very well planned, and done. Western Europe relies on the gas pipeline from Russia for the heating and their life in the winter. They know what they are doing, and in a way.

The Americans can bark, but we won't see high rise bombing, in whatever. A few field forces here and there, and secondly Europe doesn't have that kind of military, especially with the Corona, to stand a full invasion from Ukraine into western Europe. It's not going to happen. Russia is just getting the child back home, in a way, which became a bit

astray. They will shout and kick, but at the end, when the child is in danger, the mother will bring her home.

Any other question. (2:37:07)

Q: Azar … our skin is much oily.. when people get older they get less oil we get less energy from the U, that's why they're gong to die?

K- When you are young and you get the boils now maybe you understand for the first time, it's a combination of the emotion, which creates different fields. (2:38). .. So you have imbalanced fields between your hormones and creation of your emotion, which shows itself in different ?? If you look at the boils of the youngsters, of their face or the back of their hands or whatever they come. you'll see a connection with their emotion how they feel and which part of the body manifests itself on. You do not see boils on youngsters with a lot of confidence, even they have confidence outside but weak inside. you'll see it, and just look at which position the boils appears on which side of the body, .. face. It gives you a lot of info about emotion and which part of.. you know if certain part of your brain creates certain emotion fields

Thank you shall we call it a day.

Q; .. experiment with a capacitor (3:30). … I made a small capacitor with a mix of some Gans and some KOH and some AA in capacitor. The next day, millimeter when I breathed in the mille-volt measurement on the multi-meter decreased, and when I breathed out the mille-volt increased . When I held my breath the measurement stabilized …
K- I have been there, I know that. If you blow it changes, in steps of breathing it changes, it just flickers .
R: I've seen that as well … (3:32).
K- We change the field of the environment, because it is not just breathing, a breath is a plasmatic field change and we transfer it. Because it comes out of our body it's connected to the C, and if you have the Gans's which are C based, I know it took me a long time, I haven't even .. managed to change it with .. laughter, you know if you laugh… But if you change the breath, it changes too. It's still within the AA fields in line with the C …

Thank you very much
I hope we opened some more mysteries about your CO2 Boxes, and how you have to take the MaGrav as energy sources if you know what to do with it.
Thank you ..

421 KSW Feb 24, 2022

422nd Knowledge Seekers Workshop; March 3, 2022

(Transcription mostly done ; Excerpts proofed , need to proof rest ; Key phrases, word, quick index) (excerpts proofed 1st and Ukraine 1:46)

This is a workshop to ask questions;
C14 as an energy (19:30 to :36:00) teaching
Kinesiology testing is not part of Pl. Created by ones own emotions which then through fields make hands move; In plasma we create conditions by intention to benefit others, as long as our action doesn't dame ourselves or others. U works to accommodate the others;

Medical teachings are on hold but are only for people in medical profession; Use Cup 1 to recover from lack of touch and affection over past 2 years; If want to stop eating need to balance all field requirements, not just Cup 1

Chinese eat lots but don't get fat, use green tea which is a Gans provides energy, rest of food have to burn up. Chinese don't drink cold water.

Food you eat can interfere with transmutation ..
Italian trying to make Gans of plant Salvia.
Left over liquid in Nano process contains spectrum of Gans may need for other things.

Pulse in Pl to create electricity .. Heartbeat of plasma .. Again HB slows down different level of field conversions lower energy

Ukraine .. Pope financing in background through Americans and NATO, to take over finances of Russian Orthodox Church, failed, night before attack Pope as defeated man goes to Russian embassy, which never happens, accepts to pay for Russians expenses to take back Ukraine, code of elites. Payment goes to Russian Church than to Russian government. Russian Church ask Putin to protect them from Vatican takeover. Vatican lost in China . Has assets of England Church, Queen is his servant. like cooperate takeover.
Don't worry about Ukraine, house of God never looses. Pope will try something else.
Defining war peace..

asked about 8 and 9th Chakra look on Wikipedia.. .
K- Stop, now that we know the STM , the STP, we call the spirit is within the man, so 8th and 9th is inside. we have destroyed the Chakra business.

Posture of low self-esteem
Containing Pl with infinity loop
Containing the soul in brain by the M field of blood.
C14 AA of brain

Do soul communicate instantly ..

About Brazil, want to invest heavily, hardworking intelligent people, brought down a KS who went wrong on Facebook.

Gans soap with emotion of knowledge
New spaceship without physical dimension.
I can tell you have to make C14 in 1 second. They can make space reactor in 2 weeks

(2 Excerpts absorbing fields of U Ukraine Vatican)

ENGLISH TRANSCRIPTION

Proof excerpts

(:18).
K- Today's teaching .. we allow Knowledge Seekers (KS) to ask questions to clarify some points and to add to the knowledge as we share knowledge. We learn and share with each other part of the knowledge, and what is the process of the space T which will bring for us a beautiful path.

We are here if any of you have any questions to ask, otherwise we go directly into the teaching. It will be nice to be able to share more in-depth knowledge, and what we see around us, .. around the world, to becoming of the incoming knowledge and what is to be shared by us in respect to each others knowledge, and respecting each others .. intellect. Are there any question, and if not we go straight into teachings.

Q: .. H14 I am struggling .. Sorry C14 (:20). I am struggling to understand how to use and make C14, and the applications in future?
K- C14 is one of the easiest things to make, even easier than H. But it has a process, .. systematic, what we call, progressive understanding of the creation, creation of atoms, creation of plasmas. If you are looking for C14 as a matter state (S), I would like to see you, from the point the U was created.

We do not see C14 in the U as a matter state. We see C14 as an energy transfer. Behavior of the C14, but not in the matter state (S). It's a cosmic entity. We can convert it with some conditions, into its matter S, or its Gans S, but primarily from the way from the Space Pl T we look at it, we don't go out to fundamentally, physically hold C14. (:22). We look for behavior of C14, transfer of, connection of, interaction of fields.

C14 it's got peculiar characteristics, which in a way, it gives, it takes, and it keeps constant energy transfer. This is the beauty of C14, where in most of the matter S conditions we look for the nuclear decay, to transfer from C to whatever else. C14 is energy transfer condition, which never decays. It keeps its entity as a Pl field, in giving and taking and holding onto.

So it becomes line of communication, line of transfer. It can stand one C14 field conversion, connection, stability across one U. This is what we look in the space T as a C14. We are not looking in the matter S of C14. In a way, behavior of, in a way, everlasting, diamond structure, which means nothing can destroy it, but in a structure of the fields, can receive, can give, and can maintain its existence as a Pl.

So if you look to make C14, (:24). and hold onto in a matter S, sometimes you succeed, but essentially it's not needed. The future scientists will understand, that C12 is a matter S of the entity connection, fields in the dynamic life, like in the body of the man. In the space it's the Pl of it, without dimension (D), does the same thing.

Why do you need a C14 in the space, is that free space line of connection. When we talk about C6, C what we call, neutrons, protons, electrons in combination of C12, we look at C7. If you bring it into a D of matter S, you have one loose electron in the outer boundary, which has to cover the whole of the inside. If you look at it, bring in the second ring as to be one Pl, one neutron, or one proton, that 7th electron, with that neutron Pl center, electron, or what, proton Pl center, behaves like a H. Because of the stability inside, it's very, very stable. (:26). Because you have already locked all the electrons together, you have already locked all the protons and neutrons together. So in a matter S, but if you look at the Pl S of the same entity, we looking at a field flow line, which that electron covers the whole of the what we call the neutron center.

Let me explain it this way (whiteboard). You have the … when you take the whole the electrons and protons and the 6 neutrons and everything inside, now this extra electron behaves as a H, but a dynamic H, which in that state can flow anywhere, even the span of the U.

It's energetic in the D of the field flow, because in its Pl S has slightly different characteristics. It extends the fields on its own, which in connection with the totality of Pl of the U, allows it to extend its tentacles right across (the U). You find this combination usually connecting to everything. (:28). Carbon in a Gans S in the body of the man, in reality behaves as C14. C in a matter S, you have 12, but because C in Mr. COHN is in a Gans S, a Pl S. your C here (in AA) doesn't behave this way (C12) it behaves this way (C14).

This is one of the reasons the minute I touch you on the toe your brain says, something is happening down there. Because of this property characteristics of C14, but you look at it as a .. C12, because you always considered that (as a) C12. It is a C12 if you call it that, but it behaves as a C14. This is one of the reasons when you see the AA you see the

interconnection between all of them. You see that shininess. That shininess is the reflection of C14 more or less, and condition of ?? communication.

So if you are looking for actual physical C14, you might achieve it sometime, it can be done, but in a Pl T, in a space T in the structure of human body, in the structure of the plants we see that C14 behavior, (:30). but C12 by name. Because we always consider C12.

You have to realize one simple thing, we are a cosmos. Our body, if you count how many cells are in your body, you are a galaxy. Don't look at, just because you have 2 legs and 2 arms, and you walk around, you are any different then a galaxy, which you see in the cosmos. The only difference between human body and the guy up there in the deep space, is you are compacted. Body of the man is a U, it's just a galaxy and a U on its own, but because we use it, we live with it, we don't consider it. How many cells do you have, how many cells clustered to make something else. How many cells, and what you call cell, are made of how many Gans's to give that single cell. And now put all the hearts, liver, god knows, every part of your body, human body is a working galaxy, is a working U. But because it's ours and we are born with it, we don't consider it. This U works, communicates, lives, interacts internally with itself through behavior of C14. Communication unlimited, you put your foot on a nail, immediately your brain says .. you're done. You feel the pain, because of the behavior of C14, that's part of your AA, especially neural system.

So try to understand, (:32). how you make C14 in the space T. I don't look for it. In the space T, I look for behavior of it, connection of it. I was with one of the beautiful KS a couple of days ago in London, and I was explaining this to him, and I told him do not share. And it is strange that you bring the topic up. It's how we see, how we perceive this position, how we gather this interaction of the fields. Try to understand if you are dealing with a matter S, or Pl S, or manifestation of the Pl in matter S, we call Gans.

Then it's different. Then it's completely away from what we talk about C14, and we try to make it to a C14 in the matter S, behaves like a matter of the C. You can make behavior of C12 to become C18, in a very simple way. It's what I gave you in very early teachings, but a lot of you don't see it.

C14 belongs to communication in a plasmatic, cosmos Gans S, C12 is where you see the effect of it, (:34). in the matter S. You can convert .. C12 to behave like C14, but soon itself, due to its environment, will take the characteristics of C14, or what you call, graphene. Graphene you have to understand, is a matter S of it.

When we speak about the C14, we speak about the plasmatic deep space travel, cosmic ?? deep space communication, instant communication. You can't do that with putting graphene next to each other, you get a superconductor, you are back again in resistance M field condition. As I always said, birds with birds, foxes with foxes. You got to understand the difference. The freedom to be connected is the bird, the foxes got to stay

to 4 legs, locked to the ground in a matter S. You to understand what the difference is, and what you want to do with it, and how you create it.

When we create C14, our reactors from condition of health, or whatever in a plasmatic condition in enhancement centers (EC), changes into the flight system, and this is the beauty of understanding the T, and understanding the knowledge of the interaction

Any other question - I hope we explained I hope you understood. (:36).

Proofed to here >> proofing excerpts

Q: … I have a question about the works of David R Hawkins. First of all have you hear about him?
K- Nope.
Q: I just want to share my knowledge about his works really briefly, and it's about a method called muscle testing, which my partner and I have been using for about 3 years, and so far it has been our only compass to test whether something is true or not in this world we live in. The method is formerly known as kinesiology.
K- Yes I know that.
Q: I am wondering how you access to yourself. I am assuming you have high level of ?? at this time. Do you use any similar method, how to you as man of science approach this?

K- This what you are talking about I have heard a lot about it, I have seen people using it. Some of our KS use it and they convert it into some kind of emotion, or reaction in their body, (:38). or movement, or something within their physical structure, which is this good or bad. One of our leading Knowledge Seeker (KS) relies on this, in a state of good or bad, or if it works or doesn't work.

We don't have that in plasma (Pl) T. In Pl T we accommodate everything. If to you is not good, what benefit it creates for the others, or do we always look at ourselves. What I call the principle of me, me, me, and everything has to react that I can see I can have something in it, or react with it. I make a move, and would that move be beneficial to me, or beneficial to somebody else that's all that matters. As long as I don't make a move to damage myself or somebody else. What you think you can do , and you say ok, it's good for me. Who is going to lose in what you gain. Or you work the way the U works, you accommodate, that every body benefits by it. It cannot, it doesn't have a room in the space T of today, if I understood you correctly, and I answered you in what I think, because we had this discussion some time ago in one of the teaching. I know one of our leading KS he swears by it. I hope I answered you.
Q: I'm not sure if I understood your answer very well. Actually I'm not sure I understood it at all.
K- Okay, let's go back to the basics. (:40). (lost audio …) I said, can you explain your understanding of what you are trying to explain. You use, and then we try to explain the parallel, with it in the space T.

Q: .. What I personally do, I make a ring on my right hand with my thumb and index finger. Then I make similar rings on my other hands so I have 2 rings made by my fingers .. I personally connect these 2 rings one inside the other, and I try to pull them apart and break one of the rings. And I would focus on any statement, for example, I can focus on the statement I am alive more than 20 years on this planet, and I can pull a finger, my instinct, my subconscious , my plasmatic energy in my body goes weak and this ring breaks, it is an answer that it is false. The way me and my partner do it, is we prefer to do blind testing. So our personal consciousness cannot get involved to alter the answer. So she would actually imagine something and I would focus on what she is imagining, I don't know what she is imagining, and she would say that. And I would pull a finger to tell if it is a yes or no. That's how we go about scientific way.

K- Okay, let me , I understand, Now let's put , thank you. I go back to my childhood. (:42). When I was very young, we have tradition in Iranian culture, when for example a child gets sick , we say for example, there's a bad eye on it, and w try to find out who put the bad eye on it. Traditionally I remember my aunt getting an uncooked egg and putting it in between the 2 thumbs and the 2 fingers … and press it. You could press this egg for ages, it wouldn't crack. In that process was it the neighbor next door, the cousin, .. the donkey down the road, and you press the egg, then you say, the grandfather, and the egg cracks. Oh it was the grand father who gave, put a bad eye. So what you call this, I have seen this from childhood. It is what we perceive to be.

In the space T, in understanding the work of the emotion, in the body of the man, we don't have this. It's impossibility to have this. When you put a magnet amongst the other magnets, all the other magnets move to accommodate the new magnet. So when the new accommodation is made, everything is satisfied. Every need of every magnet is met. with all the interactions with the others this is the accommodation, this is how we. we can't say if I put a magnet in, if it sticks and jumps on that one, he is the guilty magnets and he is the one who whatever. It doesn't exist in the plasma T. You. Giving it a new name, I have seen this from the day I opened my eyes, (:44). because it's called ??? in Farsi , it's one of these things you believe in, and I have seen it used frequently in childhood. The reverse of it is, if you put a pin in the .. doll. It's the same thing, but does it transfer to be, because you are, or does it transfer that it interacts with the fields which you create unknowingly, or knowingly. You move into the subconscious of the fields interaction, then your finger opens up.

One of our KS, he decides the condition of everything he does through Pl system he uses, this way. So we have created a condition of emotion, feeling, if it is right or wrong, it's the same. If I feel that in my heart it means I go, if I don't feel it, I don't go. I don't use the system that way, or whatever. How do you transfer the knowledge into an egg, or a ring of 2 fingers or the heartbeat, or the emotion in the back of the throat, is where we perceive, we trust, that we'll see a physical manifestation of what we want to be.

It does not work in the world of the Pl, in the work of the interaction of the fields. But we are going through a process as we have seen with our KS, they try to complete the two, You use a ring of 2 fingers, (:46). other people use all sorts of things and say if it does, it

means it's good, if it doesn't go it's bad. we have a belief that if you sneeze, you don't go. In Iran it's sacrosanct with many people, if you are leaving the house, for example to go somewhere, and you sneeze, you say stop, wait something is going to happen, or something is wrong. People come back in sit down, have a cup of tea, then they go. Is the sneezing the same as .. the 2 fingers. It's us, who creates that condition for us to convert the emotions to physicality (P) then we believe it. Maybe you have a very strong emotion which is the sense of fields, and converts that into your finger, don't do that . And you believe it, and you live by it. So you convert the emotion which is the plasmatic field into the P of the fingers.

It's been going on for thousands of years, you don't need somebody to write … about it, but it's a phenomenon of fundamental
fields in your finger is blocked due to fields interaction, information from your brain. If you see it that way, so be it. If it gives you the comfort to be, yes, but in Pl T such things don't exist. (:48). You rely on what you do, is correct for everything and everything thing which is within.
Q: How do you personally decide on what tests to make or where would you say is the origin of your current advanced Pl knowledge. How you decide what is true, and what's not true yourself?
K- I don't work by true or not true. I work in what I do, what benefit it gives, or what condition it creates. ?? for the others, in what the structure you want to see it. I don't,. In so many ways, when you work with the soul, when you understand the interaction of the emotion, you just interact with the others, you don't need to create that condition that, what it will be, or would it work if I do, or not work if I do . It's understanding that even your thoughts are part of the interaction of the fields, then if the other person feels my and what it needs to be done, the way I work. we'll create that condition to be done??

If you been around the way I even live , people around me, they pull their hair, you take too much time, you don't do things, you know we are on the verge of blah, blah… and the last day, last minute. I say, it wasn't time for it. Everything has to fit in. If it doesn't happen now today, it means it is not time for it. All the magnets have to move, (:50). that they are all comfortable. Not what I want counts, what is beneficial to all counts. So I don't' have the dilemma which you have. But what you explained, I've seen from very first days I could understand left and right hand. We used to stand on the eggs, we used to get the other cousins to push it and press it, it wouldn't break, before hand pressing it, the egg doesn't break. We speak about the grandfather , and it (breaks).

Understanding the emotions in your hands for even you fingers to open up, is interaction of the fields of your emotion. And us our emotions, have connection with what you want to do, personally want to be in touch with or whatever, that's what you have to understand, and you see the answer.

I don't look at the finger movement, I look at what created that condition to get the finger moved, what fields was created. So we go one step behind we look at the principal interaction, not the physical manifestation, interaction of the fields, and you rely on it. I have seen many times KS .. why do you take so long, why do you have so much

patience. Because it is not time for it. It's not ready for it. When the time comes, you'll see, you'll understand. (:52). Because we see what needs to be done for that time to be.

But you want to shortcut it with the finger , it's to do it but you have to look what was behind, that made my finger move. You can't move your finger if ?? which is the field interaction, does not create that change in strength that one finger goes, or makes the egg break. You can stand an elephant on an egg, if you get the right position . … who put a bad eye on you. But the principle hasn't changed over centuries, it's just that now people find different ways of explaining it. To … then they start believing in it. Believe in yourself and what you do is there for the progressive development, whatever it is, is done, you don't need the fingers.

Any other question. (:54).

Q: Azar … Mr. Keshe do you mind if I say something here to Nikola?
K- Yes, we are all here to learn.
Q: . I am familiar with David Hawkins and what he did … He was touched by the Creator Himself …

>>>
.. Some of them didn't want to be here because the beauty of the Creator was immense. (1:02). Thank you Mr. Keshe (end of Azar)

Q; .. I wish to contribute to the knowledge of the health can I participate in the health webinars?
K- I don't understand what you are trying to tell us?
Q: As far as I know the health webinars are just for medical students or people from the medical field, right?
K- Are you a medical man
Q: No I am not.
K- It is not open to you. We deliberately done this, at moment the medical teaching is on hold. The doctor who is responsible for it is busy with other things ..
We'll bring the teaching of health ..
(1:04).
I teach a number of doctors

(1:06).
If you are in Romanian … KF is set to open one of the largest production ..

(1:08).
We will not allow the health application to go outside the doctors ..

(1:10).

Q: I understand and I am excited about it .. What if I would like to contribute to the knowledge sooner than that

K- We are weeks away ..

Q: Last week you alluded to skin and how it can age quickly …
Touching the skin with love improves this process .. How can we counter the last 2 years when during the Corona we were deprived hugely of skin contact. Could there be a product from KF to help emotionally balance this?
K- If you use the Cup 1, (1:12). primarily should satisfy the lack of that emotion. But you have to use Cup 1 with its amino acid (AA). You take the AA from top of Cup, away, keep it, and then when you wash the Gans's add to it. Do not consume the AA on its own, because it has to create the balance within the structure of the body of the man.

Any other question.

Q: Brazil with the constant use of Cup 1 we loose our hunger and have no desire to eat. 1st Q; if we stop eating our body becomes deficient in vitamins what do we do in this case if we don't feel like eating?
K- Your body never should never go with any deficiencies, because if you use a combination of Gans's, energies you will receive all of it directly as a combination. If you use mono-energetic, just Cup 1 , mono, all the time and no other Gans water, or whatever, you become like the Eskimos. You have 1 diet, or nations which, (1:14). have 1 food diets, where always meat, there are no vegetables. The body converts it. Body knows how to convert it. So it's not a problem in principle. You have to realize when you go into the system of using Gans's you have to preferably create a combination of energies, that you do not encourage the growth of one, what we call, energy level in the body.

There are many people who eat the same food all the time, no difference, day in and day out. But they're very healthy and they function perfectly. What's his name, Bill Gates, what I call guru, the old man, not Cyrus, he's .. the second richest man behind B Gates for some years. He eats the same burned steak for decades, nothing else, and the steak has to be burnt .. he eats the same food day in and day out. But we see him to be one of the …
R: Was that Warren Buffet.
K- Yes, it's Buffet .. for years and years. (1:16). I knew a guy who lived on Chips nd Fish and Coke
Any other questions. The body converts, that's why you got the glands, Thymus, and Thalamus are there to create that condition. one does with the physical body, and one does with the energy of the soul. When they match they work.

Q: If 80% of our feeding comes from the environment, why do we feel hungry?
K- Because of that 20%. .. If you were supposed to get 100% from the food we eat, you can imagine the size of the plate. .. it's very strange in China.. when you go for breakfast Chinese eat they eat 4 times what I do .. but they don't put any weight on. Because when you eat so much the body has to work to get rid of … the food, and the

secret with Chinese being slim most of them just watch, (1:18). how much green tea they drink. They carry it .. everywhere …

If you understand the structure of green tea, you see they are taking Gans energy day and night. So what ever has gone in as extra food, the body has to work to get rid of it, because the energy they need has already gone in with the green tea, whatever it needs to be converted. Because the difference between the green tea, .. and the black tea, is that the green tea, the day it's harvested, it's roasted on literally Nano coating, the top layers of the leave. So you have Gans's, you N coat, you have Gans's. When you make the tea, it's like you have these Cu plates , how it goes in the energy with the water, releases energy you get Gans's and energy in the water, and that gives you what you need. You want to loose … most of the green teas, are not as slimming …

If you have breakfast in the morning try to drink green tea, and you'll see how you feel during the day, and try to bring the green tea with you. I lived In China (1;20). I have seen how they process it, and can drink it.

They never drink cold water, they always drink warm, which means the energy transfer is lower in the body to ?? done, the body doesn't need to work on it, and the body doesn't loose energy on it. When you sit around the table with Chinese, with me, they pull their hair out, I love ice cold water, and they go crazy. They drink body temperature, luke warm, green tea. The transfer of energy is there, so the body is already balanced, whatever you put in it the body has to burn to use it to get rid of the energy it has taken , so it still ??

Q: .. How can we educate ourselves about feeding in the future, by removing some foods?
K- The feeding with the new T comes through understanding in the future of interaction of the fields. How these fields are going to interact and what they deliver. Look at if you go back to the Chinese space reactors which we built in South China Sea .. we noticed that, (1:22). we always explained many times, the balls at the bottom lost their colors, all the CH3 colors, H colors, everything was gone to energy being transferred. You can do the same, life existence is understanding the energy transfer of the fields and their strength from one point to another. If you go a step further you can do a lot of things with Gans's in respect to feeling and then you can see the changes of it. what it brings to you.

Now we are going into the full R&D in the KF and production. We'll introduce these products into the market very rapidly. You go to realize we went through teaching, .. research, .. developing and now the R&D and mass production manufacturing . All the ideas you have, how do you feed the man in disaster zone. Very soon we'll show you. There are developments, our scientists will show you in nanotechnology, and using and understanding of cosmic rays and the rest of it, which can provide food and sustenance for life for every one of us. (1:24).

The time for a major breakthrough in Pl T has arrived and we are there to greet and share it. We are keeping it very close, tight to our chest and not going out until the time is right, and I think the time is right for it to be opened up in the next few weeks.

Any other question.

Q: … can our feeding, the type of food interfere in transmutation and levitation?
K- Yes, you have to choose the right plasmas for the right application and the right purpose or how you divide.
R: So before we go to space, certain last meals would be appropriate would it?
K- You become Christ, the last supper. The last time you eat till you come back to earth, you put something in your mouth, you could be for thousands of years traveling the depth of the U and not eating anything.
R; ..

K- In a way, I presume yes, I was in the KF factory this afternoon (1:26). It's just how we going to bring this into public domain for people to understand and be there. You can receive the energy from the soul level and feed the P and walk away for days and week s without eating. Depends how we load it, the systems coming out, we'll show you the mass production of it's just coming up, it's getting there.

We feed the soul, and the soul feeds the P and this what we said for a long time. Now we are creating the systems for it, maybe changes the emotions, brings other dimensions (D) to play.

Any other question.

Q: .. Italian .. (1:28). I did an experiment with ?? it seems to me the characteristic of Gans is there.
S: He said if you understand what he said?
K- No.
Q: He tried to experiment how to measure the energy of the Gans. He tried to measure .. (1:30). that he obtained from Nano coating
K- What material has been N coated?
Q: He N coated the Salvia, the leaf. He thinks the energy of the Gans is there , but the property of the Salvia is gone, he thinks (1:30). He saw a correlation between the 5ht essence of the alchemist and the fields of the Pl. There is a connection there.. In one test in the Persian history, the Persian alchemist. If you can manage to have this 5ht essence you can manage to have the essence of everything you are connected with. … (1:32). If you mix the plants with the Gans, can you make , obtain the characteristic of the plants?
K- Yes, it's been done by many KS, depends what Gans you use and how you use it. In the lab we use the same material producing Gans's in 2 -3 different ways from it.
Q: . 2 -3 Gans's ?
K- from the same material yes. Usually depends what you want to use it for, and what is the content of that leaf. You have to understand a deeper way than the field strength of the leaf. If you don't follow what is in the leaf, and you just try to make the Gans of it,

whatever shape, you'll find out you missed part of it and you don't see the effect of it. You have not understood the science, so you don't follow it the way it should be, and then parts missing, and you say it doesn't work or doesn't have the energy. It has the energy. (1:34). How have you create that condition to embrace all the properties the leaf has. If you missed one of the energy properties of it, so then you don't see the effect of it, and the you blame, you say it doesn't work. It works, you haven't understood how to interact, or how to bring all the properties out. When you have let's say, a leaf .. like mint, what are the contents of it? How have you made a connection to all those contents and materials? If you miss one part of it, mint will not have that effect you are looking for. You say it doesn't work .. because you missed part of the connection, it has to be the full content of the
(1:36).
Q: .. he thought that you can use the Gans like when you charge a phone. To announce the power of a plant or medicine?

K- You have to, Yeah, this is what I see with a lot of KS. You have to understand, and in principle. Just because you put Gans's, or leaves in a Gans, or N coated, does .. you N coat a pot, when you N coat a leaf. When you put a caustic on a leaf, you have to understand what are the interaction of these, what energies can stay within the Gans. Many of you make Gans's, or sorry, make N coating and then you throw, or get rid of the caustic. Have a look, is the bottom of the bucket clear, or is some bits floating. What is floating usually in your N coating at the bottom of your caustic, are the Gans's that you will not have the effect, of the property of, when you want to use the Gans's which are left, you want to wash, or you think you can put them in to create the conditions to produce Gans's from them. When you N coat a Cu plate, watch what is at the bottom of it. (1:38). Those are Gans's and the properties of the isotopes that you'll not have when you produce the Gans of the Cu. I have seen many KS do this. It's caustic, just get rid of it. But what is at the bottom, is a spectrum of the Gans's, which you loose. It's the same when you N coat or .. produce Gans's or put caustic on leaves. KS have to become more precise, then could be what you are throwing away, is what is needed in the Gans itself, which you are going to use to have the effect you are expecting.

Any other question

Q: .. We know that the electric current is C12, .. (1:40). the plasma converter is they convert the Pl in electric energy. We know the MaGrav is generating Pl, not generating electricity. We know that it needs a beat. My question ,, which type of beat am I looking for. The beat has to be a function of what, and how it has to be this beat. For example, I put a small LED connected to a bigger LED to load ?? these two charge load (1:42). How they have to alternate each other. Do you understand.

K- No. Let me explain. I think I understand what he is trying to say. … look at the heartbeat (HB) of the man, and look at all the components which are in the structure of the body of the man, and the HB of the man , connects to all of them to function to give a energy release, and absorb energy. So when you look at the HB of the man, it's the combination balance of all the elements in the structure, in the HB of the man if it is

not there, they are not working, they are not there. This is why your HB changes your functionality of your skin, liver, kidney, and everything else changes, because it has to adjust with the HB. A young heart at a certain age, when it's born to a certain age, absorbs and increasing, and then the HB changes around about 30 to 35 and the whole metabolism of the body .. because that HB changed. If we can .. keep the HB at the same rate as when we were born we stay young, because the cells life with that HB creates youth, creates creation of cells. They tell you to do a sport. (1:44). go back increase the HB that increase created by it, create a condition that the cells of that beat exist in the body. The HB has to be a natural HB, not put on the electronic system. And creating a pulse. It has to convert in a plasmatic pulse.
Q: ..

Thank you
Any other question. We always have this communication with Italians , we don't have it with nobody else, (1:46). except Italian Stephanie.
Any other question

Ukraine

Q: .. question about the Russian and Ukraine crisis and the idea of peace. How can we elevate the souls of both the Russian and Ukraine representatives, that are in meeting right now to reach a truce?
K- I am going to show you something. The picture you see. (Pope leaving Russian embassy slumped down). The carte blanche of the war in Ukraine was given to Putin with this picture. When the Pope on 23rd went to the Russian embassy in Rome. In the history of the catholic Church more or less, ever happened, seldom happened, never happened, that the Pope has gone to an embassy, open (in public). The way, what we've seen in this picture.

The Americans and western nations, knew that Russians are going in, they knew they could not touch the Russian army. (1:48). They tried to arm from outside. But this picture, when I saw it, go back to what I said, 3 - 4 weeks ago, I think it was in the American teaching, and a couple of other teachings, is the war between the Russian Church and the Catholic Church.

The war you see today, is back to the war between different divisions of Christianity. This picture by Pope going .. by Vatican going to the Russian Church (embassy) is accepting the defeat by the Vatican. Vatican had underwritten all the damages, every bullet Russia will use in Ukraine.

It was the Catholic Church, which went to dominate the Russian Church, and the Russian Church, went to its military, which is the Russian army, to defend the Church of the Orthodox Church of Russia. They knew, everybody knew, the Americans knew, the Chinese knew, the Europeans knew, they were poked by the Catholic Church to start problems in the Ukraine, that we force the Russia to hand, the Russian C to become one

of our, becomes under our control. The Russian C would not accept it, and asked Putin to wipe out, to go and get the nation back, which is Ukraine.

Pope on 23rd knew, that he has to accept, (1:50). and underwrite the losses. This walk here to the .. Russian Embassy in Rome, is a defeated man, accepting the defeat, "I am prepared to pay all the penalties." Now the Russians have a carte blanche, every bomb they drop, and bullet they use in Ukraine is paid for by the Vatican. So they have no limitation what they put it. The more they put in, the more profit they make.

This is the situation with the Second World War, where the Americans sent soldiers to Europe, American GIs, has a chewing gum, .. had a breakfast, in 1946, 1942 you present people, of some of the European nations are still paying for that chewing gum, because the Americans invoiced you. Because they won the war, and you used them.

Now is the same situation. If you go back, weeks ago, I explained 99% Russia will go into Ukraine, because it is trying to get the Motherland back in, Americans were poking to put all sorts of things in. The Vatican was poking them, because Vatican poked them everywhere, and they did their job. The Americans know they cannot face the Russians, there will be a third world war, imminent. So everybody is standing outside barking like a dog. The people are literally wiping out the house, cleaning out. But this cleaning out is 2 ways. First of all not allowing, (1:52). nuclear weapons to enter into, ?? from outside enter into what used to be the USSR, which Ukraine is part of it. You see what we see today.

Russians will be there, they'll wipe out, they'll use as many, as many tanks, this is not a war. This is the claiming back the Russian territory church, back in order, that the Catholic C will never put foot into the what we call, Orthodox C of Russia. We could see this one 3 years ago. We knew this was coming up 5 years ago.

Vatican financed the war, the split of the China. Chinese put them into Hong Kong and battered them, and Vatican paid for it heavily. Vatican paid for all the things you saw, because they (the Chinese) brought it under control. Because Vatican wanted to do what they did in Russia, bring Christians in, diamonds flew in from Africa through the priests who came, people who came into China, and these diamonds were sold, to finance violence and everything else, and the Chinese were waiting for it. This is the other way of doing it. They tried to get rid of the Communism to make a lot of Chinese Christians. If you make 1 billion Chinese Christian, Vatican becomes triple billionaire, but it wouldn't happen, because the structure was there and they knew. They looked after it, they found out, and the took everybody out that ?? was relevant.

This walk of the Pope, is defeat. For the first time Catholic Church had to be stopped. They warred with England for 300 years, (1:54). they won the Church of England, the Queen is a servant of the Vatican at the moment, she has no more power. Even though you call it, ?? It's just like you take over a company, you let it run as it is, we don't interfere. You want to call it whatever else, we own it, the property is ours.

This financing of this, which Russia is developing to get the whole thing back under control, and the Vatican is paying for it. Is exactly the repetition of, if go back a few years ago when the economy in Greece collapsed, .. Spain, .. Ireland, and Portugal the economy collapsed. And suddenly, miraculously, everything came back to normal. They all came out of their problem. Because Vatican did not want the .. Christian structure of the EU to fail.

So Vatican paid for all the debts, and then we saw immediately, what I call, not the Rothschild's family behind it, when it came balanced, they took the money they invested from Vatican, they appointed a German chancellor, they took all the money out of Vatican to pay for the money they lent to Spain, Greece and others to come out of financial collapse. It's the same process.

Now the Vatican guarantees the Americans you poke in, you do whatever. NATO pokes in, we want to bring NATO in, Russia said, no. They put their forces there, and Vatican took a guarantee in this embassy meeting, (1:56). that do not cross Ukraine border, do not come in our territory, keep the Russian Orthodox Church in USSR, we pay for all the penalties, we were a naughty boy. The defeated man always goes to see the man who defeated him. This is a defeated man walking out of Russian embassy. He has underwritten all the damages.

You will see in the next few years American, European churches will pay for this, to the Vatican. Vatican has always cashed in their losses. This visit by Pope to the Russian embassy was to get assurances, that Russia will not cross the border. You will see skirmishes, but this is a war of religions, not war of nations. This is not a war, it's a correction, and .. bringing Ukraine back under fold.

What you start. It's in a way, if you look at it, you have a brother, he is on his own, the other boys bully and attack, till the big brother comes, then all run. But when the big brother comes, he puts the hand in the pocket of the ones who are bullying, "you have to pay what you damaged, by bullying my brother." This is now the Vatican pays. Don't worry, we were seeing this, we were expecting this 4 years ago. The delay in it has reasons, and Putin knew about this and was requested, by the leaders of the Orthodox Church in Russia, (1:58). to protect the motherland's Church. He was waiting for that and he responded. He had a reason to show his power. He had a reason to protect the motherland's Church, that's all it is. It will not become a war, because this man has guaranteed it by the payments. We'll see a number of people.

In a way, if you look at it, is punishing those who went to bed with this man (Pope) in Ukraine. It will take time. I was looking at it, it's possible we'll see a small repetition of Afghanistan by kamikaze, wars and things, Europeans trying to show we are doing something, over the Ukraine. As we saw for years, Russians stayed 15 years in Afghanistan, and then they pulled out, because they couldn't control it. But it under control, in about 3 to 6 months. Makes sure nobody ever talks about NATO. People can go on the streets and do whatever they like, but changing the people on the top, inside, that the Vatican has no say in the running of Ukraine, and the others, Because once

Ukraine goes, Belarus goes, the other parts of the Christian side of the corridor, .. into Moscow opened, and it had to be closed. This what we see is the walk of the man of defeat. He Catholic Church risked that they going to bring the Russian Orthodox church, and one of the richest churches in the world, under control. The only thing they didn't count was that the Church will go to Putin, and Putin wanted to confirm, (2:00). that he is there, and they watched it. We watched this mass work. When I spoke in other teachings, when we saw the Russian naval forces going through the Bosporus up, we knew the war is on, or what I call, the cleansing the Vatican out of USSR has started.

Proofed to here

You have to understand Church business is a financial business, has nothing to do with religion. It has to make profit. When you create a war, it is a long term investment. I explained this before, the son dies, the mother dies, the father dies in the western world. This is the investment, which the Church or what we call, the Vatican put for that bullet to kill the father. They paid $10 for the bullet, the father dies, mother dies, the child dies, the man goes a lifetime to church to pray for his son, or the father, and the mother, and puts a dollar every time in. I invested $10 in the bullet, I get a $100 (return) on investment over ?? 40 years in my pocket. Church business, God business is a money business and nothing else.

That's why we said there in no (more religion), once you understand the power of the STM. Do you need this mayhem, the robe and white frock. You see the shoulders are folded, you see the head down (Pope in picture). Just open this picture, and you look. The chin folded, the shoulders are side down. This is a walk of a strong man defeated. (2:02). Thinking strong man defeated. Don't forget the Pope, the Vatican has never sat down quiet. We have to see what they plan in the next 20 years, in other parts of Russia and the west. We'll see more mayhem between the 2 Churches, unless we bring the light, that God's word is within the STM.

Don't worry about this Ukraine business, Vatican has already paid for it. And they receive the bill everyday, how many bullets used, how many shoes the solders used, the food they used to fight their war. Vatican has underwritten it.

When the head of the Ukraine state, says that Russians will pay for everything they do, all the damages, yes. No problem, Vatican has already paid us, we'll make profit in the losses. We'll do it for you, it brings a lot of jobs to the Russian industry. This is the dirty business of religion, and we are watching many people suffering because of it, and to them (leaders) it is irrelevant.

This is the second time in past decade, that Vatican has lost. Once the British took back what they gave in Libya, and now the second time. The British Monarchy took revenge on loosing the Church of England to Vatican, by taking 140 billion dollars of gold from the vaults of Libya, (2:04). into the British monarchy, and ?? now to the British government and nation. All flew directly into the Bank of Scotland. I was explaining this last week when I was in London to somebody.

All the wealth, which is collected in a program financed by Vatican, to get into Libya, to get the gold and share between Italian, French, British, Germans and Vatican was taken by the British into Bank of Scotland, which is the royal bank, and not in the ?? , the royal bank of Scotland, which is the national bank, assets of the nation. They wouldn't give it (share it with the other countries), and that's why they got kicked out of the EU (through Brexit). You don't pay, we kick you out. What you have, the Brexit is the consequences. Now we have to see what exit comes out of this. Will American pay for these damages, or who and how Vatican will bill what we wanted to do. You didn't go, we pay for it. House of God, never looses in the world of religion, because it is a house of money, not God.

Don't worry about Ukraine, you'll hear a lot of hullabaloo, for next maybe 6 weeks. They'll change the government and they get paid, and the Vatican transfers the gold, from the reserves into the Church of Russia, because they have to pay the Church of Russia, and they pay the army's expenses. They'll can make maybe 10 - 20 billion out of it in Moscow.

You got to realize KF has very close advisors within the Vatican, very close advisors. (2:06). We hear, we know, we are informed continuously of what is, and what is about to happen. A Pope has never come to an embassy, to ask to stop a war, Vatican always created a war. And they accepted to pay for it. But the Russians were not prepared to pull back. They said, we are here, and we are going to show, and we're staying, and you pay. You have to see what check book on the Diets (Russian Parliament) clothes, that Vatican has written for the war, and the penalty.

Don't worry about Ukraine, it won't go beyond the boundaries of Ukraine to Romania and the other places. The Church made a move, to put pressure on Ukraine, to get the Church of Russia to bend, and they said Ukraine is in bed with a supper power, both in religion and military forces. You will not see the Americans or the Europeans interfering, they cannot do, because they already accepted defeat, and they listen to Vatican. The deed is done.

Now the boys play, and some of the old ?? machinery of the Russian army gets used. And Vatican pays, ever tank you see on the streets, every fuels, every smoke in the back of the tank. Vatican has already underwritten, as a defeated man. It will not go beyond the Ukrainian border. The only problem is a lot of people will suffer with it, and this what churches are there, to create suffering, not there to bring healing.

(Ukraine - proofed)

Any other question (2:08).

Q; what is the definition of war, .. peace, and .. of correction?
K- War we all know is destroying. Peace is understanding and tolerating. Correction is when something goes slightly out of way towards war, conflict, you bring it back into

peace and understanding. It's very simple. accommodating as I said many … when we launched the signing of world peace treaty, we always said, there will be skirmishes … till gradually nobody plays games anymore, and then we'll find a solution. We see those skirmishes in 2 - 3 places around but we don't get the wars we used to hear. ??? wars are all finished. It's stopping .. the back hand of a person, who wanted to be a bit too greedy. We .. should not see wars, we are going the path of new T where wars have no room. We cannot, we don't need, we fought for what, food, water. In the very near future we show you another side to the whole of the structure. Nations have to invest, (2:10). in T which brings comfort, new adventures, and joys and pleasures to their citizens , and this is not war. This is the job of the WL not to create war, or separation. This comes with new T when create conditions that people can help themselves, feed themselves and create new conditions that does not create war in a way trying to get what I don't have. Accepting the condition and cooperating and living with each other, understanding. I said, the KF stands for peace …

Any other question (2:12).

Q: I wonder if we may know more about the conditions of existence of the 8th Chakra and how it is exactly connected to the 9th Chakra.
K- You have to explain the 8th and 9th Chakra. I think we have Azar, will come in very quickly to explain very quickly.
A: I don't know anything about 8 and 9 (I know about 7 and 144 other ..)

R: .. complete guide to 7 Chakras . … (2:14).

K- Okay what are the 8th and 9th.
R: 8th karmic residue. …
9 10 11 galactic chakra ..

K- Stop, now that we know the STM , the STP, we call the spirit is within the man, so 8th and 9th is inside. So what we going to do with it, the numbers fallen down by 2 each. (2:16).

R: The idea is you can leave through your soul chakra.
K- With the KF knowledge we have destroyed the Chakra business, or we have to correct it, now we know the STM we don't need to go out 2 Chakras, or 8
R: we go in for 8 12 is the divine or source Chakra
K- Which is the center of the soul
R: That totally makes sense.
K- .. interesting I never knew. We have solved that problem with the soul and spirit, now we know where we are.
A: .. the function of ?? in the body has to do with DNA .. I have to teach about this tomorrow. You talk about Gans of Sulphur. has to do if you add a little Gans of Sulphur to your Cup ..
(2:18).

K- This is part of the medical teachings ..
Q: not old teachings agriculture. .. blueprint week ..

K- The application of the S and Phosphor .. always can be controlled. The way you put a patch in the body you can a patch on the Cup and change conversion of the fields. If you look at it. .. the Cups which Cups which KF sells, we put the 2 containers around eh Cup .and then you see the effect of, (2:20). and we produce different Gans's for Pl conversion or attraction.
Q: .. when you see peoples body structure, the way they are holding their posture …

K- What you mean exactly?
Q: I mean the posture, say a person is very, say they have lack of self-confidence, and the way they are standing, and the way when you give them this, you see in time they change, the way they stand and hold themselves changes. Am I correct.
K- You see when you change the fields, the energies of the body, of the soul, you change the P. When you see people with ILS MS, Fibromyalgia .. they all have a back, bent backwards. Submission and when you strengthen their soul, something there, you change the atmosphere in the body of an energy field , you see them upright, they stand up straight, but when they change they create different fields. When you are bending in, you create fields of submission, when you stand out, .. create being able to handle. We talked about this .. long time ago. (2:22). I used to take picture of the people before and after, you see totally different posture. Why people go in repetitive because they have that posture, which creates that condition, which people put them in there. You're a dog you sty in kennel … and our posture dictates I am a dog cat lion . . . and you can make a man change again his self confidence. Because the emotion changes.

Shall we go for a break …

>>> BREAK <<< 421 KSW Mar 3, 2022 (2:29).

Q: .. Brazil .. Rafael .. As the fields of energy we create the Gans, they have a huge flow, can we contain these fields like creating an Infinity Loop to use this energy?
K- Energy of what, the Gans's?
Q: yes
K- You can contain any energy with the stars to it. We do it in the solar system (SS), .. the cell of a man. You have to find out what field energy you have to create, to create that condition of containment. (2:32). .. when we explained about the black box condition, where you can create a black box and you can put anything in it …

Containment of Pl is one of the easiest things you can do.

Any other question

Q: .. (2:34). he was listening to a teaching in 2016 you were saying about using the IL to contain fields. but in one point in the teaching your audio was cutting he was not able to understand

Q: repeats ..
K- What happened, I understand. If you look at the structure of a loop, it's containing or locking up 2 fields inside which still have interface ..

(2:36).

You do this in MaGrav

(2:38).

Any other question

Q: .. (2:40). 134 KSW connecting with 6th health teaching conversion of the CO2 in the lungs to O2, what happened there. .. in the same teaching you speak about a flow that happens in the brain to contain and lockdown the soul in the center of the brain, So you also spoke about concentrating this flow with 2 coils. could you explain more about this flow containing the soul in the c of brain.

K- The containment of the soul is due to the flow of the M field, in the case of the human race, (2:42). the blood flow, which creates that containment. The STM is earth MG field strength, what we call balanced. So we are created out of the fields of this planet which at the level of the .. 4 Carbons, in the cosmic or as we talked about C14, which connects the STM to the U Community , to the outside the physical D of the body.. The containment of it is impossible, but limiting the containment for the transfer of the fields comes through the combination of the different shape and form of bending of the fields of .. M field of the soul, by putting across C14's in different strengths, in the structure of the AA of the brain. You cannot contain something, if you don't create the fields of that it can be above but connected to. In the world of matter S if you don't have the containment good enough you cannot hold for example He in a balloon it will seep through. If you can add, (2:44). another layer to, that is finer than the atoms of He, can't go through, you can contain the He in a balloon. It's the same in the body .. in the brain you have to have a containment that's got a connection to the field strength of the soul and the STP in D of the Pl of the brain cell. These when you look at the cutting of the brain you can see different layers, this is because of creating different field strength to be able to stop, or .. interact that, in that interaction you create different fields and emotions and all sorts. The knowledge of creation is the same, it's just to be able to decipher how we get to that

point. It's a chess game, and there are different ways to play the game, if you conquer the understanding of the method you can follow, you can checkmate, or create the condition of the win or It's very simple.

Any other question

Q: Dean … on a soul level when the souls communicate, (2:46). and speak with each other. So if we want to give some energy to a soul and P leave this transfer you give that thought process to give this energy to this person .. do they receive instantly .. or is this a transfer that happens over some moments?
K- You can give if it's not on the right or different strength it cannot be received, it cannot interact, or maybe .. it will take time if you give at a higher order it has to interact with other things when it matches the lower order where you want it to go, yes it will do. .. you can take the horse to the water but you can't make him drink. You can give but if the other side is not receivable, cannot receive it.

One day when it lowers down to the level of his understanding. How many times if you have children, you tell them things, you show them love and everything. they don't understand till they have children then .. they see what you did with them. Then they tell you, I am doing what you did with me. You showed me love, and this is the way I showed love to my child. Doesn't mean, he didn't understand, he received the love maybe 40 years before. (2:48).

Q: is it given in the fields strength of the matter strength of this planet, as you said, 30 years ago … (2:50).
K- It wasn't in the matter state, it was emotional state, it wasn't materialistic, it was the pure love of a father for his child.

Q;
K- You see in the Church you call it the Father every Sunday ..

(2:54).

They make a beggar out of man, emotional, what is given by the Creator freely. Now you have a soul, you look at it, is free, then you look it a different way.
Q: I have noticed when I speak to theologists. .. they say this God is outside of themselves, and we of the UC and the teachings say the soul is within, inside yourself, you are part of it, I think that connection has a big thing position to play.
K- Yes, that's what all the teaching of the KF have been, man to be the .. the point of connection with his own creator, without an intermediary. When you understand the work of your energy, and you understand the work of your soul, when you understand you are free in essence of the creation, do you need an intermediary to lock up your P, and this time pay patents, penances and the rest of it. They have imprisoned the P of the man,

(2:56). in the name of what they never understood, but they brought them to the ??? slavery of the P. ..
Q: Has this been in position for many thousands of years?
K- We allowed it, yes, we allowed. We allowed them, yes. Look at the present situation in the west. In England or Austria, the people went enough on the streets when they went, wanted to force them to have injections, that they are talking the minister who pushed this, now is about to resign because people understood what was for them, in a different way then those who were trying to control them. The Austrians ..

(2:58).
It was not like in the past you were told and you follow ..

The old guard is loosing battle ..

(3:00).
The biggest problem for us at the moment in the KF is not the T. It's bringing peace with the use of T. In bringing T to US, Iran, China Europe at the same time and using each other scientists to do so. This is what is the challenge. In the next few weeks we'll overcome it. We don't usually announce what we are doing.

It takes them less than 2 weeks to fly if we show them. It takes them less than a week to manufacture the systems in perfect conditions and tested. but we have to unite them first before we test, otherwise we'll like the situation in Ukraine, and the rest of it. The Vatican will try to dominate the others, and then try to escape, and then one nation becomes the "other" (scapegoat - like Russia), and the rest of it.

We don't have a problem with the T. Our problem maybe in the next month or so, (3:02). to establish the KF SSI in Tehran, Austria, in AZ and in Beijing, and most probably I would love to see in Brazil, and in Lagos, Nigeria.
Q: I am sure the Brazilian KS will be very happy about this.
K- We will invest heavily into Brazil in the coming time. It's not (just) the KS, it's a big nation with 200 million population, extremely well educated people in many levels, and very hard working people, and knowledgeable. We have seen it, they decide. One of the KS who went wrong, thinking he was above everybody else, writing want he wants, was brought down on the Facebook this week by KS. He thought he was untouchable, because he supports the Belgium's, and they brought his Facebook down by the KS, because they know what is the path. KS start controlling what you call "balancing" that other KS don't go wrong with their own work. We saw this guy, going through his head, he thinks, " I have the Belgium's behind me, " I can do. He lost his Facebook.

We didn't need to do anything, the Brazilians they did it themselves.

Q: .. Seems to be what I am witnessing is this knowledge is definitely spreading and becoming a bigger Pl and effecting. The field strength is definitely gathering momentum around the planet. (3:04). I noticed that many people .. are becoming aware of the KF and our ethos and the fact that we are messenger of the peace. We come here to bring

peace to humanity and we are present in every moment, bringing through this T that can enhance and help in many applications.
K- In the coming time I'll explain to the KS worldwide how what you say has changed towards the KF. Institutions governments have started supporting KF the way it should have been done some 10 years ago. The way we should have shared the knowledge and we all would have been benefited by it, and how now they have realized how they have been lied to, cheated by, and abused by, in a way, by again a certain nation we all know. But it will be interesting to see what the WL start doing when we start showing the flight system, what would be the reaction of this. These are getting built, it's beautiful, when I was in the factory this afternoon, it's amazing how Klaus, thanks to his has brought a beautiful production into operation, that it cannot be stopped, it's a continuous production, we have become a structure that we continuously produce reactors for space, and everything else. We've gone into mass production, (3:06). but we say we learned how to walk, now we can (run). It's a pleasure … We don't have KS, we have only 1 KS, I saw in the factory. The rest are common people not KS. and they are doing a beautiful job.
Q: Are they effected by the fields ?
K- I presume so, that building is flooded with fields.
Any other question .

Q: Did I hear you say a soap could be developed if we were clever enough to absorb the knowledge of the fields of the U or from the soul of the fields of knowledge. It seems much simpler than whiteboards and Telegram. You mentioned this in passing, it appears beyond our belief and understanding how this can be possible or in our future application, would this apply to other products as well?

K- The whole plan of the KF is to walk away from matter S. In the coming time creating fields, which control fields, creating conditions of the field which is needed. Once to reach that point . we reach the maturity of understanding, (3:08). a living entity. We are building aircraft and EU, we are still doing what our body does, we are using more or less semi-physicality like the brain .. to contain the STM which is free within it, to travel in.

When in a very near future .. 12 months or more. 2 years, creating EU which have no D of P. When you see a UFO it has a P, so it means these people have not jumped into the border of understanding a Pl, in a deeper way. When we taught the human race different, I see once the space T gathers momentum and the W scientists get to it, having systems which can fly you without physical shell, by creating fields which creates that condition of holding or transportation, we will see this coming up, .. to be part of the human race, no more what you call It will be very hard to create rulers and religious leaders in the next 5 or 10 years. Because the man will… one of the reasons they stopped the KF is that we are bringing such a T that frees the man from the abuse and force what we call, imprisonment, T that we could control. Now it cannot be done.

You all can do. I can tell you in 1 second how you can create C14, (3:10). and .. space development motion, you 90% of you who work in labs in your kitchen will make it in no time. Put it this way you all have made it but you missed it. You all have made it. Any

of you who have produced Gans's in past years have already made it. You just don't know how to collect it, you don't see the connect of it.

Hopefully this is the last time we change the time of the teachings …
Tonight I will be signing documents for one of the largest KF manufacturing in Romania …
(3:12).
Hopefully we see each other next Thursday.

422 KSW March 3, 2022

END

423rd Knowledge Seekers Workshop; March 10, 2022

(All proofed; , Transcription mostly done, … need, Key Phrases, words, Quick index .)

Noah's Ark is how we travel when we leave planet;
Teaching on importance of "3 Layers" :
Need to create the 3 layers when T&T space travel, SS has 3 layers ..
How many times has the STM been part of another soul in the D of the U
Soul of Creator cannot come directly to our D, has to go through process of reduction, to become a ray within the egg and sperm;

C12 to C13 to C14 (:56) .
Traveling through space with soul and not P, physical manifestation at point of destination will be according to field at destination .
Burn C13 it becomes physical ash of C12

Body not in matter state, but Gans that's why it is flexible soft; Create new kidneys inside body by fields; no need for transplants ; Synthetic body parts - have to create soul of cell otherwise rejected by body; Field changes AA of man in space - doesn't die - takes new dimension with STP; Hello we meet again after thousands of years; When STM becomes a star or another planet ; Habit of man to kill - UC confines STM to earth till elevation; Pray for system before make it;
AA is the soul of the system (1:12) - set aside - it's a jacket
Are UFO's more advanced? Does the dog feel so?
EU are just intermediary systems to learn by;
BREAK Questions

conditional loving is not mature. Mother shows more love to 2nd child damages 1st child; need to explain to parents why;

5plus1 negotiations ..
IAEA to Tehran says Iran does not have nuclear weapon.
Iran exports enriched nuclear material exclusive permission to Russia, was hidden form public, used by WL to sanction Iran .. exposed and confirmed by IAEA
From this space T will come out, shipping space nuclear material to nations
KF offered IAEA to contain nuclear leakage if occurs in Ukraine.
Russia using 5+1 , not buy uranium from Iran, America has to back off Ukraine,
Iran is backbone of space T. Iran will be a leading nuclear nation and part of 5+1, the space T will come out this way

Subconsciousness is not sub condition of the soul, STM is aware of everything ;
KF teaching are about becoming aware of STM; You don't have to wait until bird goes free, you can make a conscious decision to free it now;
KF to make a marble put in mouth - get all energy you need from U;
K in Iran signing largest KF institute cooperation with 50 nations and manufacture new products; largest parallel scientific organization in new knowledge;
We gave the knowledge freely and now it is coming back to us;
You become aware of your true self internally and it shows externally others sense it - UC members;
The STM is within the man; To reach Creator become only energy; You decide if you want to manifest physicality; Did you give enough when you were in P to absorb enough fields to become a sun; Earth is a nursery of souls ; We go back to the sun the mother;
Risk of nuclear war; If push button Europe is gone - won't do - if Middle east they could;
KF has enough material to stop nuclear accident in our factories;

More details how KF involved with 5plus1 negotiations;

Cannot easily switch oils because refineries could be damaged;

CO2 Capture Buildings - not just agriculture, space travel, space fuel.
Use in MaGrav part of CO2 becomes C14 - everlasting energy supply. MaGravs are setup to use do this work; Gave away a big secret

When planet earth gets absorbed into sun ; Human race will go to another position in U, like what happens on earth when islands disappears into ocean like Atlantis;

ENGLISH TRANSCRIPTION

(start proofing)

Plays Creation video

(:22).

K- … Today is another day where we add to the knowledge and try to find out more in how to progress, how we come to be what we are, what is the pattern of creation, what dictates life, and how can we replicate life. What is the secrets of existence, and where to, where do we look for the pattern of life? Is it condition to the life of the man, or is it conditioned to the whole operation of the U?

Haven't we up to now looked at 2 separate systems, or we never understood one system or another. Have we come to .. more materialistic and just look at what we see and what we touch. We understood part of it, but we never understood this is the pattern of creation. The whole subject of the teaching of the KFSSI is the ship, which is in space. (:24).

In the olden days, we called it the "Boat of Noah" (Noah's Ark), collecting of every animal to travel, and then to land in a place. A perfect example of every animal in pairs, that life can continue. But in fact, isn't that boat, or the ship of Noah, the spaceship, which man is trying to create today? To take the best examples, the perfect examples of the creation on this planet to the other destinations.

In a way, when you land as citizens of earth, on other planet, you land from the Boat of Noah. Which means we have come with the knowledge, that we can travel the space of the U. We come from the point where we know how to handle ourselves to be part of process of the creation. To be within the process of creation. We have talked about this in the past, we have tried to elaborate on this topic in a different ways and directly in the past. How do we create .. and sustain life, be it a cell in the body .., be it life of man on this planet, or the life of a galaxy or a solar system (SS). As we never had the knowledge, we never looked at it, but in essence this process of the creation is the same.

The process of the life is the same. In the body .. when you look at the structure, kidney in a specific position, we see 3 layers. You look at the wall of the intestine, (:26). we see 3 layers, we look at the body of the man. The skin of the man has 3 layers. Then the bigger size, in a bigger dimension (D), the SS again has 3 layers, a galaxy has 3 layers, and we always looked at what we saw, as it is, and we elaborated on it.

Because when you become a cell on its own, because when you become the body of the man on its own, you need a layer to protect you from outside fields, that it doesn't interact with what you create inside. Then you create an intermediary section, where allows the fields which are accepted by the inner side and outer side, to be leaked out, or to be absorbed, to be within the position and the place, that becomes the connection point, interface between the outside and in. Then you have the inner part which means, I work with whatever energies are within the structure. I don't let the blood to go out, I keep the veins in, I keep the muscles in.

Then we see, this pattern repeats again. We have the same thing, the same structure in the SS. When the knowledge of the man becomes extended and he can understand the operation of the SS, as I have explained in the book #4, about the creation of the SS. We see the same 3 layers. Us as planetary system, us as a sun, us as part of what we see, is in

the inner shell. It's within the inner part, inner skin. So when we want to travel beyond the D of the SS, we need to understand the intermediary phase, (:28). and then we have to understand the outer phase strength fields, that it stops the cosmic rays of the different orders to penetrate to the middle, to come inside, and the same time keeps everything in.

Now if you understand this, we come to the point to understand further, how do we create this, what is the condition, what is the need, how can we have a 3 layers in the intestine of the man, and we have a 3 layers on the skin of the man, or we have on the kidney of the man, or within the SS. Who decided? What condition brings that condition of deciding what the strength to be? Can we put the 3 layers strength of the skin of the man, on the kidney? Or can we create the strength of the fields of the 3 layers of the SS within the skin of the man. It doesn't fit. Horses for courses.

Then the environment decides what that skin is going to be, and what is the purpose of it in respect to the others as they interact with each other. When the body of the man was created, it wasn't just, "oh we create a stomach and that's it. Then, oh, we need a liver. Oh, we need something to store what goes through it." So you would have to eat continuously, because you have no where to store. Then came the innovation of the fat, or changing the fields, that the inner system can absorb, we call it, lymph system. Or was it all created according to the process of the creation, that everything needed, and one part could bring the other part together.

In the world of science today, .. of medicine we say the blood comes through the kidney, (:30). and the kidney filters and cleans up, and then sends what is not needed. Isn't the fact upside down. Isn't the reality, from what we've seen today and we understand more about the creation and the process of life. Kidney gets most of the energy, which it does not needed by the body, through the lymph, through its body inside. Blood supplies part of it, not all of it.

We have accepted some dogmas about the process of life, that we have got stuck with it. Why is the position of the kidney in such a place in the body of the man. Why the liver always positions itself near the intestines, or nearby? Why doesn't the liver appears in the outer extremities of the body of the man. Where your reproduction services are, or where your hip is. Why the 3 layers of the liver, what in a way of the 3 absorption systems of the totality of what comes. The present world of medicines tells us, or the present knowledge of biology tells us, that the surplus materials are stored by the blood in the liver of the man. Yes, 20% of what goes in the liver. The liver sits on top of the stomach, on top of the intestines and absorbs directly the energy transfers and converts them into the energy matter state (S) of what is needed inside.

Once the world of science understands this, (:32). You will come to understand, you can take any energy, as long as it has a heartbeat, and what we call intellect, this entity and intellect can be created in the physical D anywhere in the U. You call this at the point, the Soul of the Man (STM). So when we send the STM, we transportation, transmute the soul from earth to moon, to Mars, to Jupiter, it will not look like the man, the way, 2 legs and 2 arms, unless you put it in a monkey suit like NASA does, and you lock it in, that's the

way we want to keep it, then we'll see man will transform himself according to the condition and can live everlasting life.

We say in a beautiful poetry in Farsi, … means, if you don't want to stand out, become part of it. Then you won't be noticed, would the body .. now you see it, Americans landed and you see a hoping man. Would we when we go onto moon and Mars, will hop like a man. The scientific data and traveling the space of the U, tells me, no. Man will not look like a man, as we see on planet earth. Man will look the way the man, the STM can exist in the D of physicality (P), what the environment of the moon allows it to be. Otherwise, your life is on a life support machine, the monkey suit. To transit, to transform, (:34). and transmute between one to the other, it becomes the trust of the man in his own existence.

What happens when you get to the moon and you want to go to the Mars? Would the intellect of the human race, and other races will reach to the point, that by the school of thoughts, by the elevation of understanding the emotion of the soul, you can decide the destination. You become aware of the existence and the dimension (D) of the life in other positions and D.

Isn't this what the sperm and the egg does in the womb of the mother? And according to the energy absorbed, the tadpole becomes a child. According to the fields which the mother has created within the womb. Doesn't this go back to what we call it, DNA and RNA and we want to confirm it, but isn't that energy seed, the egg and the sperm, which they make the STM, then becomes that Cup with the orange outside. Isn't the orange the beauty of the existence of the mother, and the Cup is the sperm and the egg, which are created to new D of its existence within the womb of the mother?

If mankind understands this, and this is the reason all these knowledge in a similar way has been transformed, (:36). and transferred to the knowledge of the man, and the rest of the creation in the U, understand this. Then we come to understand, if that soul, that energy field, which is created, can replicate the structure of the P of the Gans of the mother. Wouldn't that soul do the same, replicate the soul of the Creator (STC) within it. Where the Creator becomes that orange, and the rest of creation becomes different Cups across the U, that blows the wind, the STC within it.

So the STM is pure, as the STM. It's the condition of the environment of the P, which makes to have arms, and legs, and feet, and be jelly or whatever. Then to live you decide what you absorb, in the case of human race to kill and destroy to add to the what we call, field strength of the life of the man. We accept one, but we do not extend the knowledge to accept the totality. This is what I always said, man accepts my knowledge according to his intellect. According to his own understanding and acceptance of the totality of the creation.

You create that soul, when you transfer that soul from the earth to the moon. Now it has to create 3 layers within itself, that it can exist. How thin the skin is going to be, (:38). how thick it is going to be, what kind of pressures it's going to accept to dictate the shape,

and manifest yourself at that point. But in essence, you still have within you, the field replication of the STC within the STM. I made man in the image of myself, now you have an orange, you still get the taste flavor, the beauty of the whole lot.

Now we understand, now we comprehend, now we come to be part of the totality. We've part of the creation and Creator, we've been part of the process of the existence. That 3 layers is where the STM can create the D of existence, hold on to the D of the soul, as it is within the STC. The intermediary that can see and give, and what I cannot handle, I'll put a jacket on, call it the outer limit. Where you can hold, I make it water resistance, I make it field resistance to the fields of the U. When you wear the skin of the man, you just say, oh, the water runs off the skin. But in the coming time when the scientists look, how much fields of this SS, this planet, that our body doesn't want to absorb, and we see it repelling. (:40).

How much of it gets absorbed within, because the body .. calls upon it, for it to exist, that cell in the liver of the man, that cell in the kidney of the man, does not receive the fields, all it needs to exist from what man eats, but it needs it, from different D of the fields of the U, because it's still filtering part of the universal energy within it, not just what we see, as a liver content, as what you have come to realize to be, as a cell of the liver. In that cell of the liver, are the fields of the radiation, the fields of the strength of the U within it, which the body of the man needs to hold onto. We say we hold vitamin C and D in the liver, when we need it, we call it, the body calls upon it to be there, and ?? the liver. But there is an extension, if you accept that the body .. takes 20% from the food, and 80% from the environment, so liver has to have the same functionality, to be able to take out that 80% of the use, which the body of the man doesn't need, in the D of the man. Your liver is not just for the physical D, it's for the extra fields of the U, which the body of the man needs.

Now that we come to the space T we have to understand this, that we can allow the life to appear, at the time, position, space where it needs to be. Where it has to be that it can confirm the existence of the STM. In the coming time, what we give you as we said before, as an enhancement unit (EU) flight system, would it have any physical D, would it have any physical manifestation, or we walk into the space given, we believe the space where the system is, and through it, we go through a transformation, and we connect with the universal field strength, to be able to travel the span of the U. As we said, in the last teachings, where we change the C connection fields of the C12 to C14. Where we become from matter S in the universal field strength transportation and transmutation (T&T).

Then it comes to the point, that if I create 2 layers, then the STM will become the third part (layer). Then the STM will become the D of the existence of the totality of the energies, which is needed for T&T to the point and destination of the field strength of the STM, through the emotion of the soul, and not through the emotion of the STP in the D of understanding the totality of the existence in the U.

When you travel from earth to planet Zeus, dimensions and strengths are different, and the brain of the man cannot exist. The AA becomes transparent, becomes dissolved, becomes nonexistence. Where are you going to find the emotion, except if you understood, it is the emotion o of the soul that then decides the position, the size, time and the place. (:44). And the STM has the knowledge of the U within it. As is that water, which received its beauty from the orange. That orange is the knowledge of the Creator, which knows all as he has created all.

As then man understands there is no room for intermediary. I go to the Pope and ask how do I use my soul, which strength do I need to go to planet Zeus. As the Pope himself has no idea of the existence of planet Zeus. How can you ask a blind man, to tell you the beauty of the light? How in the process of the present religions, you want to understand the upcoming knowledge of the man, in the strength of existence, unless the man himself becomes knowledgeable to the totality of the knowledge, through the soul, and creation of the soul, and understanding, it is the image, it's that water in the Cup, which receives the knowledge and totality from the Creator.

In a way, in the new EU, which we'll use for travel, we create that 2 layers to allow the STM to expand beyond the boundaries. Now the boundary is the fields of the containment, and not the skin of the man. In a way, we put you through a condition, that you go through the sleep, you go through the condition, that you allow by reducing, changing the strength of the field of the STP and the blood flow, (:46). allows your soul to expand beyond its P, and you go see the uncle, cousin, and the next door neighbor and go to the planetary systems, which you never been, according to your understanding of the images you remember when you wake up.

As I said in the other teaching, we allow by creation of double layers, we make that transition and transformation for you. All it is, is to allow the soul to go beyond the expansion of the skin of the man. Then do I need to transmute and transport the P of the man, where every cell has a soul, and in essence, it’s again, that water in that Cup, and the STM is the orange, in that essence.

Now you understand the process of the development of the new EU. We've done nothing more, except replicating, understanding and digesting and processing the knowledge of creation (KOC), that we understand up to now. But this is not the end, it's just the beginning of what the knowledge of the man is going to learn and understand in the upcoming time, that the what we call, cycle of life in the D of P, and energy fields of the body .. , become the essence, the source, the beginning of allowing, what is kept, as a soul within it, to open up, to become the most beautiful flower, in the world of the creation of the Creator, become the center, become a seed of another life, another planetary system, another sun. We understand the totality of the knowledge, (:48). but now we have to be able to replicate it, that we don't even need the EU. We rely on the strength of the STM to create that enhancement condition, that it allows the STM to become part of the totality, without being encaged of what we call, the P, the brain, and the STP of the man.

We are not changing one prison with another. We are elevating the knowledge of the man, that that man can understand, that he decides the containment without imprisonment. Then it comes to the point, that as the human race, as other races which are within us, amongst us, we are amongst them, to understand the essence of the creation and its totality, not in absurd singularity like the life of the man.

Then it comes to ask one question. How does, where does, and in essence who controls the cycle of the life of the souls, and the souls of the U, and Unicose, and the rest? In a way, in the original teaching, in the Book 1 and 2 and 3, we refer to this, but now you can understand, we set the seed of the understanding. Where we say, where a neutron splits, become a proton and an electron, like when you get a bottle of water, and you split in a big glass and a small glass, (:50). still within it is water. So shall be the STM, irrespective of the size, D and position. The soul of the Creator (STC) to be the proton, and the STM to be that electron, but in essence all came from the same source of the creation.

The process of creation and created needs understanding without condition, unconditional KOC. Then man opens new doors, .. opens a new D in the KOC. I made man in the image of Myself, not just by feature, but by the knowledge too. If man understands this, we'll find soon, that knowledge we carry, is the knowledge of Creator within the structure of the STM. Then do we need delivery boys, called prophets. Do we need servants of the delivery boys, called Ayatollahs, priests and the rest, where they themselves are not aware of what car, and what method of transportation they are using themselves.

This is the time when the STM becomes knowledgeable to the totality of KOC, it's the purity of understanding the totality, which becomes the creation for the elevation of the understanding. We create that prison into how much we will understand the process of the creation, (:52). how we shall create ourselves, and how in time we were created out of.

If a STM is from the fields of the sperm and egg, that lead to creation of if, how many other times, part of this soul has been part of another soul, part of another position and D, in another part of the U and Unicose. Because it could not get here, if it was directly a soul of the Creator. It had to go through a transformation, it had to go through a transmutation, it had to go through a process of reduction and interaction, to become the ray within the egg and the sperm, that there interaction creates the strength of the STM to the Creator.

Then it comes one fundamental question for all of us. How close we want to be to the Creator, which means how much we want to understand the KOC without dogmas and restriction of understanding in physical D. And every created thing be it the dog, the man, the cat, the ants, the stone, has the potential to understand the process of the creation and it is not the exclusivity of man, and not just this planet, and not just this race.

Then you understand we are part of what we think of as a soul, our soul is part of it, it's a field of another soul, which leads to creation of another D. We become that ray within the collection of the Pl of the creation.

Then it comes for our KS of the human race to understand, what to use, (:54). in creation of the systems and .. reactors within the boundary of the .. EU for travel, or health, that can reach that point, .. to understand that part, that has the ability to open the cage and let the STM as a Pl field of the U, to be released, that it chooses its own existence in the D of the creation. But would it, in becoming free, become away from the restriction of P, receive more from the fields of the U and the Creator, that in the process in the process of the transportation and transmutation (T&T) to its new destination from the P inside the body of the man, it will absorb new fields from the fields of the U and Creator, that it becomes mature at the point of manifestation to a total perfect Pl, to start a total perfect life, for what it shall create, and what shall be created out of it. The new EU considers the whole of that structure, even it's hidden within the structure.

This is one of the most fundamental principles, as we had last week, was asked, what is the difference between the C12 and the C14. Can I create C14, can I create the condition, C14 is transportation for the universal condition connection, C12 is for the matter state Pl, what we call, the Gans body of the man. Then you have to find a way, that you go from C12 to C13, (:56). and then C14, that C14 becomes the outside travel, and C12 becomes the inside, and C13 is an intermediary. When it doesn't work, when it finds problem in, as you can see on the skin of the man, you get the rash, .. boils, .. infection between the layers. Which means the body cannot accept the condition of the transportation, into the transportation of inside or outside.

Then the purpose of the teaching becomes, that in the EU our researchers, our developers, our scientists, deliver direction and position of understanding the totality, before we can endeavor to take the steps to make that journey, to go and to walk in that system, and then find yourself within it. We say the 6th of June will be the show of the flight. But do you expect to see the flight of the system, or do you expect to see the flight of the STM in that system. The physical man looks to see if he jumps, the man of understanding sees if the soul is still in the system and interacts with Do of P. This is the process, what mankind needs to go through, this is the process of the knowledge, that we have to through, that within it, with it, because of it, we become knowledgeable of the life in the D of the U.

We have to be able to cross the condition and understanding the connection of the C12 within the structure of the plasma of the AA of the man, (:58). which actually works in the D of C13, to be able to change to the matter sate or to change to the universal state. When that C13 extension of what we call, exists in the D of the Gans plasma of the man and you put it on the fire and you burn it, you get a physical ash, which is C12.

So for the first time we understand for the life of the man, in the what we call D of P is the field strength between the outer layer and the inner layer, in the body of the man, it that existence in that boil, is that P, which the 2 sides cannot go. Do we go towards the inner side, which becomes the creation and the Creator, or do we go to the outside, to

become part of another, in a bigger structure of the stronger fields, in the D of rejection. This is a knife, which cuts from both sides of the life, and the man is the knife, which side you decide to go, which side you come to understand, you choose to be part of. Then in that process, mankind become wise to the process of understanding of the Creator, the creation, the way we enter the realm of the created, but we are in the matter state of it, but in the D of the field strength of it.

My job is to teach mankind to understand this process, and gradually we are reaching that point. Reaching the point, that you don't look for T&T, (1:00). of the P of the man, because we never knew, man is a pack of energy as Gans's. That's why it is flexible, that's why it can move, that's why it can do everything else, Otherwise the body of the man, would be hard as a stone in total matter S. You are not, you cannot be, otherwise you wouldn't be free to move in the 3 dimensions, and the softness of the skin, and the flexibility of the muscle of the man, confirms the man is not in the matter S. But in the condition of the earth, we have put a frame on it, and we're hanging the energy states to it as a bone structure. Would we, shall we, with the knowledge of the man reaches the point, that you can transfer and transmute specific fields within the cell of the man, to become part of a structure which you want.

Can we understand that we have the knowledge, that for example if you don't have a kidney, but we know the field strength that it sits, within the position where the kidney has to be, because of the structure, that everything has to be rejected, which is liquid, we can create the kidney in its place. Would it come in the coming time, that we have people with 4 kidneys, 2 obsolete does not work, and 2 freshly made within the structure of the body .. . Yes it can be done. Then if you understand more, when you created it, we can allow the transformation of the old kidney to go. Then there is no need for dialysis machine, .. for heart transplant, (1:02). because now we understand the knowledge, the totality of the KOC in the D of P and life, transformation of energies to matter S of the Gans within the body of the man.

Then we ask what happens to these things, which we make synthetically. You still to hold it, you create a cell of the soul within it, otherwise it cannot exist. But still in that strength when you put it on the body .. , then it matches itself to the STM. Otherwise if it doesn't match in the D of the soul of the cell, the body will reject it, its M field strength and not anything else. When we give transplants of the kidney or heart or whatever, why does the body rejects? Because it's that rejection of the fields of it. What do the doctors do? They give you tablets to create that fields that matches, that those two can interact and keep that C connection interaction and communication. Would in the future we need these kind of operations and tablets? No, because man now understands the interaction of the fields. The T&T of the fields and how to create a condition of acceptance in field strength, both in G and M field, for the new and the old, that they can communicate.

We'll see this in the upcoming time when man becomes the traveler of the space, we will accommodate our existence to it. At the moment we wear a monkey suit, (1:04). as a spacesuit to contain it, but this is only good partially for this solar system (SS), what happens if I take you with a spacesuit in another position in the U, that amino acid (AA)

just is energy, you'll have a suit with nothing in it, no life. Maybe a few fields, which are slightly different, we might find a kidney, a part of it, or a piece of a bone from somewhere in the suit. What we say, "oh, the man has died." No, he hasn't, because in the process of the freedom, the soul has still taken a new D of position, taking eclectic of the energies of existence of the matter S, Pl soul of the P of the man. Now how many of you would like to go through that transition? Would when I see you on the moon, in the D of the Pl of the existence of the moon, shall I know you. I say, "oh, this is so and so from planet earth." Or shall I see the of, and I say, I know this soul.

This is what I said, years ago, and those who understood it, I said, hello friend we meet again, after thousands of years. When I greeted the soul of Mitra in manifestation of its existence in the D of the man. Then the soul decides which P it will take its position and place. Because the D of P, (1:06). is mine in the D of physical existence on this planet, but the soul is the traveler of the U. When he sees a soul he knows, he recognizes. Go back in the history of the KF, and it's been put in public. It says, "hello friend, we meet again after thousands of years."

Then that's the time we understood the presence of Mitra on this planet. All we had to do, was for her to be happy, to accept the soul within the D of the STP of the man. We are passengers of the U, and we have friends in other D, that like when you go to a city, and you say, oh, what are you doing in NY, I thought you're still in London. I haven't seen you for years. We travel the same across the boundaries of the U and Unicose.
